THE L. S. STARRETT COMPANY

Notes to Unaudited Consolidated Financial Statements

December 31, 2016

Note 1: Basis of Presentation and Summary of Significant Account Policies

The unaudited interim financial statements as of and for the three and six months ended December 31, 2016 have been prepared by The L.S. Starrett Company (the “Company”) in accordance with accounting principles generally accepted in the United States of America for interim financial reporting. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. These unaudited financial statements, which, in the opinion of management, reflect all adjustments (including normal recurring adjustments) necessary for a fair presentation, should be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended June 30, 2016. Operating results are not necessarily indicative of the results that may be expected for any future interim period or for the entire fiscal year.

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect amounts reported in the consolidated financial statements and accompanying notes. Note 2 to the Company’s Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended June 30, 2016 describes the significant accounting policies and methods used in the preparation of the consolidated financial statements.

Note 2: Recent Accounting Pronouncements

In May 2014, the FASB issued a new standard related to the “Revenue from Contracts with Customers” which amends the existing accounting standards for revenue recognition. The standard requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration the entity expects to be entitled to in exchange for those goods or services. This standard is applicable for fiscal years beginning after December 15, 2017 and for interim periods within those years. Earlier application will be permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company expects to adopt this standard for its fiscal year beginning July 1, 2018. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, "Inventory (Topic 330): Simplifying the Measurement of Inventory." Previous to the issuance of this ASU, ASC 330 required that an entity measure inventory at the lower of cost or market. ASU 2015-11 specifies that "market" is defined as "net realizable value," or the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This ASU is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016. Application is to be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The adoption of ASU No. 2015-11 will not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)". The ASU requires that organizations that lease assets recognize assets and liabilities on the balance sheet for the rights and obligations created by those leases. The ASU will affect the presentation of lease related expenses on the income statement and statement of cash flows and will increase the required disclosures related to leases. This ASU is effective for annual periods beginning after December 15, 2018, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2016-02 on its consolidated financial statements. It is expected that a key change upon adoption will be the balance sheet recognition of leased assets and liabilities and that any changes in income statement recognition will not be material.

Note 3: Stock-based Compensation

On September 5, 2012, the Board of Directors adopted The L.S. Starrett Company 2012 Long Term Incentive Plan (the "2012 Stock Plan"). The 2012 stock plan was approved by shareholders on October 17, 2012. The 2012 Stock Plan permits the granting of the following types of awards to officers, other employees and non-employee directors: stock options; restricted stock awards; unrestricted stock awards; stock appreciation rights; stock units including restricted stock units; performance awards; cash-based awards; and awards other than previously described that are convertible or otherwise based on stock. The 2012 Stock Plan provides for the issuance of up to 500,000 shares of common stock.

Options granted vest in periods ranging from one year to three years and expire ten years after the grant date. Restricted stock units (“RSU”) granted generally vest from one year to three years. Vested restricted stock units will be settled in shares of common stock. As of December 31, 2016, there were 20,000 stock options and 105,634 restricted stock units outstanding. In addition, there were 346,600 shares available for grant under the 2012 Stock Plan as of December 31, 2016.

For stock option grants the fair value of each grant is estimated at the date of grant using the Binomial Options pricing model. The Binomial Options pricing model utilizes assumptions related to stock volatility, the risk-free interest rate, the dividend yield, and employee exercise behavior. Expected volatilities utilized in the model are based on the historic volatility of the Company’s stock price. The risk free interest rate is derived from the U.S. Treasury Yield curve in effect at the time of the grant. The expected life is determined using the average of the vesting period and contractual term of the options (Simplified Method).

No stock options were granted during the six months ended December 31, 2016 and 2015.

The weighted average contractual term for stock options outstanding as of December 31, 2016 was 6 years. The aggregate intrinsic value of stock options outstanding as of December 31, 2016 was negligible. Stock options exercisable as of December 31, 2016 were 20,000. In recognizing stock compensation expense for the 2012 Stock Incentive Plan management has estimated that there will be no forfeitures of options.

The Company accounts for stock options and RSU awards by recognizing the expense of the grant date fair value ratably over vesting periods generally ranging from one year to three years. The related expense is included in selling, general and administrative expenses.

There were 45,000 RSU awards with a fair value of \$10.86 per RSU granted during the six months ended December 31, 2016. There were 12,733 RSUs settled during the six months ended December 31, 2016. The aggregate intrinsic value of RSU awards outstanding as of December 31, 2016 was \$1.0 million. As of December 31, 2016 all vested awards had been issued and settled.

On February 5, 2013, the Board of Directors adopted The L.S. Starrett Company 2013 Employee Stock Ownership Plan (the “2013 ESOP”). The purpose of the plan is to supplement existing Company programs through an employer funded individual account plan dedicated to investment in common stock of the Company, thereby encouraging increased ownership of the Company while providing an additional source of retirement income. The plan is intended as an employee stock ownership plan within the meaning of Section 4975 (e) (7) of the Internal Revenue Code of 1986, as amended. U.S. employees who have completed a year of service are eligible to participate.

Compensation expense related to all stock based plans for the six month periods ended December 31, 2016 and 2015 was \$0.2 million and \$0.2 million, respectively. As of December 31, 2016, there was \$1.4 million of total unrecognized compensation costs related to outstanding stock-based compensation arrangements. Of this cost \$1.1 million relates to performance based RSU grants that are not expected to be awarded. The remaining \$0.3 million is expected to be recognized over a weighted average period of 1.6 years.

Note 4: Inventories

Inventories consist of the following (in thousands):

	12/31/2016	6/30/2016
Raw material and supplies	\$ 28,568	\$ 29,209
Goods in process and finished parts	15,394	16,459
Finished goods	42,584	39,449
	86,546	85,117
LIFO Reserve	(28,342)	(28,796)
Inventories	\$ 58,204	\$ 56,321

LIFO inventories were \$9.7 million and \$10.5 million at December 31, 2016 and June 30, 2016, respectively, such amounts being approximately \$28.3 million and \$28.8 million, respectively, less than if determined on a FIFO basis. The use of LIFO, as compared to FIFO, resulted in a \$0.5 million decrease in cost of sales for the six months ended December 31, 2016 compared to a \$0.4 million increase for the six months ended December 31, 2015.

Note 5: Goodwill and Intangible Assets

The Company's acquisition of Bytewise in 2011 gave rise to goodwill. The Company performed a qualitative analysis in accordance with ASU 2011-08 for its October 1, 2016 annual assessment of goodwill (commonly referred to as "Step Zero"). From a qualitative perspective, in evaluating whether it is more likely than not that the fair value of the reporting unit exceeds its respective carrying amount, relevant events and circumstances were taken into account, with greater weight assigned to events and circumstances that most affect the fair value or the carrying amounts of its assets. Items that were considered included, but were not limited to, the following: macroeconomic conditions, industry and market conditions, cost factors, overall financial performance and changes in management or key personnel. After assessing these and other factors the Company determined that it was more likely than not that the fair value of the reporting unit exceeded its carrying amount as of October 1, 2016.

Amortizable intangible assets consist of the following (in thousands):

	12/31/2016	6/30/2016
Non-compete agreement	\$ 600	\$ 600
Trademarks and trade names	1,480	1,480
Completed technology	2,358	2,358
Customer relationships	4,950	4,950
Software development	2,770	2,402
Other intangible assets	325	325
Total	12,483	12,115
Accumulated amortization	(6,357)	(5,625)
Total net balance	\$ 6,126	\$ 6,490

Amortizable intangible assets are being amortized on a straight-line basis over the period of expected economic benefit.

The estimated useful lives of the intangible assets subject to amortization are 14 years for trademarks and trade names, 8 years for non-compete agreements, 10 years for completed technology, 8 years for customer relationships and 5 years for software development.

The estimated aggregate amortization expense for the remainder of fiscal 2017 and for each of the next five years and thereafter, is as follows (in thousands):

2017 (Remainder of year)	\$862
2018	1,587
2019	1,491
2020	984
2021	581
2022	262
Thereafter	359

Note 6: Pension and Post-retirement Benefits

The Company has two defined benefit pension plans, one for U.S. employees and another for U.K. employees. The U.K. plan was closed to new entrants in fiscal 2009. The Company has a postretirement medical and life insurance benefit plan for U.S. employees. The Company also has defined contribution plans.

On December 21, 2016, the Company amended the U.S. defined benefit pension plan to freeze benefit accruals effective December 31, 2016. Consequently, the Plan will be closed to new participants and current participants will no longer earn additional benefits after December 31, 2016.

The amendment of the defined benefit pension plan triggered a pension curtailment which required a remeasurement of the Plan's obligation as of December 31, 2016. The remeasurement resulted in a decrease in the benefit obligation of approximately \$6.9 million primarily due to an increase in the discount rate from 3.77% to 4.31%, with an additional \$4.2 million decrease resulting from the impact of the curtailment. These reductions in the Plan's benefit obligation were recorded as other comprehensive income, net of taxes.

Reconciliation of Funded Status of U.S. Defined

Amortization of net loss	30	3	60	7
	\$(47)	\$ (94)	\$(94)	\$ (187)

For the six-month period ended December 31, 2016, the Company contributed \$1.9 million to the U.S. and \$0.5 to the UK pension plans. The Company estimates that it will contribute an additional \$3.0 million for the remainder of fiscal 2017.

The Company's pension plans use fair value as the market-related value of plan assets and recognize net actuarial gains or losses in excess of ten percent (10%) of the greater of the market-related value of plan assets or of the plans' projected benefit obligation in net periodic (benefit) cost as of the plan measurement date. Net actuarial gains or losses that are less than 10% of the thresholds noted above are accounted for as part of the accumulated other comprehensive loss.

Note 7: Debt

Debt is comprised of the following (in thousands):

	12/31/2016	6/30/2016
<u>Notes payable and current maturities of long term debt</u>		
Loan and Security Agreement	\$ 1,578	\$ 1,543
<u>Long-term debt</u>		
Loan and Security Agreement	16,311	17,109
	\$ 17,889	\$ 18,652

The Company amended its Loan and Security Agreement, which includes a Line of Credit and a Term Loan, in January 2015 with changes that took effect on April 25, 2015. Borrowings under the Line of Credit may not exceed \$23.0 million. The Line of Credit agreement expires on April 30, 2018 and has an interest rate of LIBOR plus 1.5%. The effective interest rate on the Line of Credit under the Loan and Security Agreement for the six months ended December 31, 2016 and 2015 was 2.4% and 2.1%, respectively. Based upon its three year term, the Line of Credit has been classified as long term. As of December 31, 2016, \$9.4 million was outstanding on the Line of Credit.

On November 22, 2011, in conjunction with the Bytewise acquisition, the Company entered into a \$15.5 million term loan (the "Term Loan") under the then existing Loan and Security Agreement. The Term Loan is a ten year loan bearing a fixed interest rate of 4.5% and is payable in fixed monthly payments of principal and interest of \$160,640. The Term Loan had a balance of \$8.5 million at December 31, 2016.

The material financial covenants of the amended Loan and Security Agreement are: 1) funded debt to EBITDA, excluding non-cash and retirement benefit expenses ("maximum leverage"), not to exceed 2.25 to 1.2) annual capital expenditures not to exceed \$15.0 million, 3) maintain a Debt Service Coverage Rate of a minimum of 1.25 to 1 and 4) maintain consolidated cash plus liquid investments of not less than \$10.0 million at any time. The Company was in compliance with all debt covenants as of December 31, 2016.

Note 8: Income Taxes

The Company is subject to U.S. federal income tax and various state, local and foreign income taxes in numerous jurisdictions. The Company's domestic and foreign tax liabilities are subject to the allocation of revenues and expenses in different jurisdictions and the timing of recognizing revenues and expenses. Additionally, the amount of income taxes paid is subject to the Company's interpretation of applicable tax laws in the jurisdictions in which it files.

The Company provides for income taxes on an interim basis based on an estimate of the effective tax rate for the year. This estimate is reassessed on a quarterly basis. Discrete tax items are accounted for in the quarterly period in which they occur.

The effective tax rate for the second quarter of fiscal 2017 was 29.9% and for the second quarter of fiscal 2016, it was 53.8%. For the first half of fiscal 2017, the effective tax rate was 39.1% and for the first half of fiscal 2016, it was 81.0%. The tax rate in the second quarter of fiscal 2017 is lower than the U.S. statutory rate as a result of earnings in foreign jurisdictions with lower effective tax rates. This benefit was offset as a result of discrete adjustments primarily for the impact of a tax rate change in the U.K. applied to deferred tax assets which increased tax expense by \$298,000 in the first quarter. In fiscal 2016, the tax rate is higher than the U.S. statutory rate primarily due to losses in foreign jurisdictions for which no tax benefit is recognized. In addition, in the first half of fiscal 2016, there were discrete reductions to tax expense primarily as a result of return to provision adjustments of \$200,000.

U.S. Federal tax returns through fiscal 2012 are generally no longer subject to review by tax authorities; however, tax loss carryforwards from years before fiscal 2012 are still subject to adjustment. As of December 31, 2016, the Company has no local or federal income tax audits in progress. In international jurisdictions including Australia, Brazil, Canada, China, Germany, Mexico, New Zealand, Singapore and the UK, which comprise a significant portion of the Company's operations, the years that may be examined vary by country. The Company's most significant foreign

subsidiary in Brazil is subject to audit for the calendar years 2011 – 2015. During the next twelve months, there are no significant changes expected in the Company's long term tax obligations for prior year exposures.

Accounting for income taxes requires estimates of future benefits and tax liabilities. Due to the temporary differences in the timing of recognition of items included in income for accounting and tax purposes, deferred tax assets or liabilities are recorded to reflect the impact arising from these differences on future tax payments. With respect to recorded tax assets, the Company assesses the likelihood that the asset will be realized by addressing the positive and negative evidence to determine whether realization is more likely than not to occur. If realization is in doubt because of uncertainty regarding future profitability, the Company provides a valuation allowance related to the asset to the extent that it is more likely than not that the deferred tax asset will not be realized. Should any significant changes in the tax law or the estimate of the necessary valuation allowance occur the Company would record the impact of the change, which could have a material effect on the Company's financial position.

No valuation allowance has been recorded for the Company's domestic deferred tax assets related to temporary differences in items included in taxable income. The Company continues to believe that due to forecasted future taxable income and certain tax planning strategies available, it is more likely than not that it will be able to utilize the tax benefit provided by those differences. In the U.S., there is a valuation allowance against foreign tax credits to the extent they are limited. In certain other countries where company operations are in a loss position, the deferred tax assets for tax loss carryforwards and other temporary differences are fully offset by a valuation allowance.

In November 2015, the FASB issued Accounting Standards Update No. 2015-17 ("ASU 2015-17") regarding ASC Topic 740 "Income Taxes: Balance Sheet Classification of Deferred Taxes." The amendments in ASU 2015-17 eliminate the requirement to bifurcate Deferred Taxes between current and non-current on the balance sheet and requires that all deferred tax liabilities and assets be classified as noncurrent on the balance sheet. The amendments for ASU-2015-17 can be applied retrospectively or prospectively and early adoption is permitted. The Company has adopted the new guidance prospectively in the first quarter of fiscal 2017. Prior periods were not retrospectively adjusted.

In March 2016, the FASB issued ASU No. 2016-09, "Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting." The ASU affects the accounting for employee share-based payment transactions as it relates to accounting for income taxes, accounting for forfeitures, and statutory tax withholding requirements. This ASU is effective for annual periods beginning after December 15, 2016, and interim periods within those periods with early adoption permitted. The Company has adopted the new guidance prospectively in the first quarter of fiscal 2017.

Note 9: Contingencies

The Company is involved in certain legal matters which arise in the normal course of business. These matters are not expected to have a material impact on the Company's financial condition, results of operations or cash flows.

Note 10. Segment Information

The segment information and the accounting policies of each segment are the same as those described in the notes to the consolidated financial statements entitled "Financial Information by Segment & Geographic Area" included in our Annual Report on Form 10-K for the year ended June 30, 2016. Our business is aggregated into two reportable segments based on geography of operations: North American Operations and International Operations. Segment income is measured for internal reporting purposes by excluding corporate expenses which are included in unallocated in the table below. Other income and expense, including interest income and expense, the gain on the sale of a building and income taxes are excluded entirely from the table below. There were no significant changes in the segment operations or in the segment assets from the Annual Report. Financial results for each reportable segment are as follows (in thousands):

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

Three months Ended December 31, 2016 and December 31, 2015

Overview

The Company managed through the political and economic volatility of the quarter posting flat revenue and higher net income. The North American market suffered from the uncertainty of decisions regarding major investments as the high-end Metrology sales declined 15%, while the International saw and hand tool business improved, especially in Brazil.

Net sales decreased \$0.5 million or 1% from \$53.7 million in fiscal 2016 to \$53.2 million in fiscal 2017 with North America declining \$2.1 million and International growing \$1.6 million. Operating income increased \$0.6 million as a \$0.8 million improvement in gross margin was only partially offset by a \$0.2 million increase in selling, general and administrative expenses plus restructuring charges of \$0.1 million.

Net Sales

North American sales decreased \$2.1 million or 6% from \$34.3 million in fiscal 2016 to \$32.2 million in fiscal 2017 due to a weakening demand for capital equipment metrology products.

International sales increased \$1.6 million or 8% from \$19.4 million in fiscal 2016 to \$21.0 million in fiscal 2017 due to organic growth in Europe and a 15% improvement of the Brazilian Real to the US dollar offsetting a weak pound sterling.

Gross Margin

Gross margin increased \$0.8 million or 5% from 30% of sales in fiscal 2016 to 32% of sales in fiscal 2017.

North American gross margins decreased \$0.5 million from \$9.9 million or 29% of sales in fiscal 2016 to \$9.4 million or 29% of sales in fiscal 2017 due to product mix related to lower sales of higher margin capital equipment products.

International gross margins increased \$1.3 million from 31% of sales in fiscal 2016 to 35% of sales in fiscal 2017 based upon an improved international performance with higher margins in Europe and a favorable exchange rate relative to the Brazilian Real to the US dollar.

Selling, General and Administrative Expenses

Selling, general and administrative expenses, including restructuring charges, increased \$0.2 million or 1% from \$14.8 million in fiscal 2016 to \$15.0 million in fiscal 2017.

North American expenses, including Corporate, decreased \$0.1 million from \$8.3 million in fiscal 2016 to \$8.2 million in fiscal 2017 as reduced employee and commission expenses offset higher professional fees.

International expenses increased \$0.3 million or 5% due principally to the weakening of the US dollar to the Brazilian Real.

Other Income (Expense)

Other expense increased \$0.1 million primarily due to foreign exchange translation losses.

Income Taxes

The effective tax rate for the second quarter of fiscal 2017 and 2016 were 30% and 54%, respectively. The quarterly tax rate is lower than a normalized combined federal and state rate of approximately 40% due to profits in some foreign subsidiaries with lower effective tax rates. The tax rate includes discrete tax expense of \$0.1 million in fiscal 2017 compared to a \$0.1 million tax benefit in fiscal 2016.

Net Income

The Company recorded net income of \$1.1 million or \$0.15 per share in the second quarter of fiscal 2017 compared to net income of \$0.5 million or \$0.07 per share in fiscal 2016 principally due to higher Operating Income and a lower

effective tax rate.

14

Six Months Ended December 31, 2016 and December 31, 2015

Overview

Net sales declined \$2.6 million or 3% from \$104.7 million in fiscal 2016 to \$102.1 million in fiscal 2017. Operating income decreased \$1.4 million in fiscal 2017 from \$1.4 million profit in fiscal 2016 compared to \$0.0 million or breakeven in fiscal 2017 as lower sales and related gross margins more than offset reduced selling, general and administrative expenses.

Net Sales

North American sales decreased \$6.2 million or 9% from \$66.7 million in fiscal 2016 to \$60.5 million in fiscal 2017 due to lower precision hand tool and high end metrology shipments.

International sales increased \$3.6 million or 10% from \$38.0 million in fiscal 2016 to \$41.6 million in fiscal 2017 with strong organic growth in Brazil. The weakening British Pound offset the strengthening Brazilian Real resulting in no impact related to foreign exchange rates.

Gross Margin

Gross margin decreased \$1.1 million or 3% but remained level at 30% of sales.

North American gross margins decreased \$3.4 million or 17% in fiscal 2017 compared to fiscal 2016 due to lower sales of higher margin capital equipment products.

International gross margins increased \$2.3 million with volume and margin improvement representing \$1.1 and \$1.2 million, respectively.

Selling, General and Administrative Expenses

Selling, general and administrative expense decreased \$0.1 million or 1% from \$30.5 million in fiscal 2016 to \$30.4 million in fiscal 2017.

North American expenses, including Corporate, decreased \$0.5 million or 3% as lower commissions and travel expenses more than offset higher professional fees.

International expenses increased \$0.4 million or 3% due increased selling expenses and a strengthening Brazilian Reals versus the US dollar.

Other Income (Expense)

Other income declined \$0.2 million due to foreign exchange translation losses.

Income Taxes

The effective tax rates for the first half of fiscal 2017 and 2016 were 39% and 81%, respectively. The effective tax rate is slightly lower than federal and state statutory rates of approximately 40% in fiscal 2017 due to profits in foreign jurisdictions subject to lower effective rates which was partly offset by a discrete net increase in tax expense of \$0.3 million. The effective rate in fiscal 2016 is higher due to losses in some foreign subsidiaries for which no tax benefit is recognized in consolidation.

Net Income

The Company recorded net income of \$1.8 million or \$0.26 per share in the first half of fiscal 2017 compared to net income of \$0.3 million or \$0.04 per share in fiscal 2016 principally due to an after tax gain of \$1.6 million on the sale of the Canadian distribution facility in the first quarter of fiscal 2017.

LIQUIDITY AND CAPITAL RESOURCES

Fiscal 2017 net cash for the six months ended December 31, 2016 decreased \$3.1 million primarily due to Net Income of \$1.8 million and proceeds of \$3.3 million from the sale of the Canadian distribution facility which were offset by increased working capital of \$4.1 million; prepaid payments to the pension of \$2.4 million; and property plant and equipment expenditures of \$2.4 million.

Liquidity and Credit Arrangements

The Company believes it maintains sufficient liquidity and has the resources to fund its operations. In addition to its cash, the Company maintains a \$23 million line of credit in connection with its Loan and Security Agreement, of which, \$9.4 million was outstanding as of December 31, 2016. Availability under the agreement is further reduced by open letters of credit totaling \$0.9 million. The Loan and Security Agreement was renewed in January of 2015. The Loan and Security Agreement contains financial covenants with respect to leverage, tangible net worth, and interest coverage, and also contains customary affirmative and negative covenants, including limitations on indebtedness, liens, acquisitions, asset dispositions and fundamental corporate changes, and certain customary events of default. As of December 31, 2016, the Company was in compliance with all debt covenants related to its Loan and Security Agreement. The Loan and Security Agreement expires on April 30, 2018 and the Company plans to negotiate an extension to the agreement.

The effective interest rate on the borrowings under the Loan and Security Agreement during the six months ended December 31, 2016 and 2015 was 2.4% and 2.1% respectively.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

There have been no material changes in qualitative and quantitative disclosures about market risk from what was reported in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2016.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, under the supervision and with the participation of the Company's President and Chief Executive Officer and Chief Financial Officer, has evaluated the Company's disclosure controls and procedures as of December 31, 2016, and they have concluded that our disclosure controls and procedures were effective as of such

date. All information required to be filed in this report was recorded, processed, summarized and reported within the time period required by the rules and regulations of the Securities and Exchange Commission, and such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2016, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

There have been no changes in internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting during the quarter ended December 31, 2016.
