### **ITEM 2.02. Results of Operations and Financial Condition.**

The information contained herein is being furnished pursuant to Item 2.02 of Form 8-K, "Results of Operations and Financial Condition," and Item 7.01 of Form 8-K, "Regulation FD Disclosure." This information shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

On August 4, 2009, HealthSouth Corporation (the "Company") issued a press release reporting the financial results of the Company for the three and six months ended June 30, 2009. A copy of the press release is attached to this report as Exhibit 99.1 and incorporated herein by reference.

In addition, a copy of the supplemental slides which will be discussed during the Company's earnings call at 9:30 a.m. Eastern Time on Wednesday, August 5, 2009 is attached to this report as Exhibit 99.2 and incorporated herein by reference.

### **ITEM 7.01. Regulation FD Disclosure.**

See Item 2.02, "Results of Operations and Financial Condition," above.

### **Note Regarding Adoption of New Accounting Pronouncement**

On January 1, 2009, we adopted Financial Accounting Standards Board ("FASB") Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. As a result, we have reclassified our noncontrolling interests (formerly known as "minority interests") as a component of equity and now report net income and comprehensive income attributable to our noncontrolling interests separately from net income and comprehensive income attributable to HealthSouth.

### **Note Regarding Presentation of Non-GAAP Financial Measures**

The financial data contained in the press release and supplemental slides includes non-GAAP financial measures, including the Company's leverage ratio and Adjusted Consolidated EBITDA. The Company's leverage ratio is defined in its Credit Agreement as the ratio of consolidated total debt to Adjusted Consolidated EBITDA for the trailing four quarters. The Company continues to believe both its leverage ratio and Adjusted Consolidated EBITDA as defined in its Credit Agreement are measures of leverage capacity, its ability to service its debt, and its ability to make capital expenditures.

The Company uses Adjusted Consolidated EBITDA on a consolidated basis as a liquidity measure. The Company believes this financial measure on a consolidated basis is important in analyzing its liquidity because it is the key component of certain material covenants contained within the Company's Credit Agreement, which is discussed in more detail in Note 8, *Long-term Debt*, to the consolidated financial statements included in its Annual Report on Form 10-K for the year ended December 31, 2008 (the "2008 Form 10-K"). These covenants are material terms of the Credit Agreement, and the Credit Agreement represents a substantial portion of the Company's capitalization. Non-compliance with these financial covenants under the Credit Agreement – its interest coverage ratio and its leverage ratio – could result in the Company's lenders requiring the Company to immediately repay all amounts borrowed. If the Company anticipated a potential covenant violation, it would seek relief from its lenders, which would have some cost to the Company, and such relief might not be on terms as favorable to those in the Company's existing Credit Agreement. In addition, if the Company cannot satisfy these financial covenants, it would be prohibited under the Credit Agreement from engaging in certain activities, such as incurring additional indebtedness, making certain payments, and acquiring and disposing of assets. Consequently, Adjusted Consolidated EBITDA is critical to the Company's assessment of its liquidity.

In general terms, the definition of Adjusted Consolidated EBITDA, per the Credit Agreement, allows the Company to add back to consolidated net income unusual non-cash or non-recurring items. These items include, but may not be limited to, (1) amounts associated with government, class action, and related settlements, (2) fees, costs, and expenses related to the Company's recapitalization transactions, (3) any losses from discontinued operations and closed locations, (4) charges in respect of professional fees for reconstruction and restatement of financial

statements, including fees paid to outside professional firms for matters related to internal controls and legal fees for continued litigation defense and support matters discussed in Note 11, *Settlements*, and Note 12, *Contingencies*, to the condensed consolidated financial statements included in the Company's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2009, when filed, (5) compensation expense recorded in accordance with FASB Statement No. 123(R), *Share-Based Payment*, (6) investment and other income (including interest income), and (7) fees associated with the Company's divestiture activities.

However, Adjusted Consolidated EBITDA is not a measure of financial performance under generally accepted accounting principles in the United States of America ("GAAP"), and the items excluded from Adjusted Consolidated EBITDA are significant components in understanding and assessing financial performance. Therefore, Adjusted Consolidated EBITDA should not be considered a substitute for net income or cash flows from operating, investing, or financing activities. The Company reconciles Adjusted Consolidated EBITDA to net income, which reconciliation is set forth in the press release attached as Exhibit 99.1, and to net cash provided by operating activities, which reconciliation is set forth below. Because Adjusted Consolidated EBITDA is not a measurement determined in accordance with GAAP and is thus susceptible to varying calculations, Adjusted Consolidated EBITDA, as presented, may not be comparable to other similarly titled measures of other companies. Revenues and expenses are measured in accordance with the policies and procedures described in the 2008 Form 10-K.

The Company also uses adjusted income from continuing operations and the related per share amounts as analytical indicators to assess its performance. Management believes the presentation of adjusted income from continuing operations and the related per share amounts provides useful information to management and investors about the Company's operating business before taking into account certain items that are non-operational or infrequent in nature. These measures are not defined measures of financial performance under GAAP and should not be considered as alternatives to net income and net (loss) income per share attributable to HealthSouth common shareholders. Because these measures are not measures determined in accordance with GAAP and are susceptible to varying calculations, they may not be comparable to other similarly titled measures presented by other companies. See the condensed consolidated statements of operations included in the press release attached as Exhibit 99.1 for the GAAP measures of net income, income from continuing operations, and basic and diluted (loss) earnings per common share. A reconciliation of net income to adjusted income from continuing operations, and the related per share amounts, is included in the earnings release attached as Exhibit 99.1 and the supplemental slides attached as Exhibit 99.2.

The Company also uses adjusted free cash flow as an analytical indicator to assess its performance. Management believes the presentation of adjusted free cash flow provides investors an efficient means by which they can evaluate the Company's capacity to reduce debt and pursue development activities. The calculation of adjusted free cash flow is included in the supplemental slides attached as Exhibit 99.2. This measure is not a defined measure of financial performance under GAAP and should not be considered as an alternative to net cash provided by operating activities. Our definition of adjusted free cash flow is limited and does not represent residual cash flows available for discretionary spending. Because this measure is not determined in accordance with GAAP and is susceptible to varying calculations, it may not be comparable to other similarly titled measures presented by other companies. See the condensed consolidated statements of cash flows included in the press release attached as Exhibit 99.1 for the GAAP measures of cash flows from operating, investing, and financing activities. A reconciliation of net cash provided by operating activities to adjusted free cash flow is presented below.

- <sup>(1)</sup> Net cash provided by operating activities for the six months ended June 30, 2009 was \$229.2 million. Net cash provided by operating activities for the three months ended March 31, 2009 was \$183.1 million, as reported in the Company's Form 10-Q for the quarterly period ended March 31, 2009. The difference is the \$46.1 million of net cash provided by operating activities for the three months ended June 30, 2009.

## Edgar Filing: HEALTHSOUTH CORP - Form 8-K

For the three months ended June 30, 2008, net cash provided by investing activities was \$6.5 million and resulted primarily from a decrease in restricted cash offset by capital expenditures and net settlement payments related to an interest rate swap. Net cash used in financing activities during the three months ended June 30, 2008 was \$26.0 million and resulted primarily from net debt payments made during the period. Net cash used in financing activities during the second quarter of 2008 included \$150.2 million of proceeds related to the issuance of common stock, virtually all of which was used to reduce debt.

For the six months ended June 30, 2009, net cash used in investing activities was \$77.8 million and resulted primarily from capital expenditures and net settlement payments related to an interest rate swap. Net cash used in financing activities during the six months ended June 30, 2009 was \$133.8 million and resulted primarily from net debt payments made during the period.
