STAG Industrial, Inc.

Notes to Consolidated Financial Statements
(unaudited)

1. Organization and Description of Business

STAG Industrial, Inc. (the “Company”) is an industrial real estate operating company focused on the acquisition and operation of single-tenant, industrial properties throughout the United States. The Company was formed as a Maryland corporation and has elected to be treated and intends to continue to qualify as a real estate investment trust (“REIT”) under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended. The Company is structured as an umbrella partnership REIT, commonly called an UPREIT, and owns substantially all of its assets and conducts substantially all of its business through its operating partnership, STAG Industrial Operating Partnership, L.P., a Delaware limited partnership (the “Operating Partnership”). As of March 31, 2018 and December 31, 2017, the Company owned a 95.8% and 95.9%, respectively, common equity interest in the Operating Partnership. The Company, through its wholly owned subsidiary, is the sole general partner of the Operating Partnership. As used herein, the “Company” refers to STAG Industrial, Inc. and its consolidated subsidiaries and partnerships, including the Operating Partnership, except where context otherwise requires.

As of March 31, 2018, the Company owned 360 buildings in 37 states with approximately 70.8 million rentable square feet, consisting of 291 warehouse/distribution buildings, 55 light manufacturing buildings, and 14 flex/office buildings. The Company’s buildings were approximately 94.7% leased to 312 tenants as of March 31, 2018.

2. Summary of Significant Accounting Policies

Interim Financial Information

The accompanying interim financial statements have been presented in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and with the instructions to Form 10-Q and Regulation S-X for interim financial information. Accordingly, these statements do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, the accompanying interim financial statements include all adjustments, consisting of normal recurring items, necessary for their fair statement in conformity with GAAP. Interim results are not necessarily indicative of results for a full year. The year-end consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the Company’s consolidated financial statements and notes thereto contained in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Basis of Presentation

The Company’s consolidated financial statements include the accounts of the Company, the Operating Partnership and their subsidiaries. Interests in the Operating Partnership not owned by the Company are referred to as “Noncontrolling Common Units.” These Noncontrolling Common Units are held by other limited partners in the form of common units (“Other Common Units”) and long term incentive plan units (“LTIP units”) issued pursuant to the STAG Industrial, Inc. 2011 Equity Incentive Plan, as amended (the “2011 Plan”). All significant intercompany balances and transactions have been eliminated in the consolidation of entities. The financial statements of the Company are presented on a consolidated basis for all periods presented.

Reclassifications and New Accounting Standards

Certain prior year amounts have been reclassified to conform to the current year presentation.

New Accounting Standards Adopted

In August 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The purpose of this updated guidance is to better align a company’s financial reporting for hedging activities with the economic objectives of those activities. This standard is effective for fiscal years beginning after December 15, 2018 and interim periods within those years, with early adoption permitted, and the Company adopted this standard effective January 1, 2018 using the modified retrospective transition method. The adoption of this standard resulted in a cumulative effect adjustment of approximately \$0.3 million recorded as an increase to common stock dividends in excess of earnings and an increase to accumulated other comprehensive income as of January 1, 2018 in the accompanying Consolidated Statements of Equity.

Table of Contents

In May 2017, the FASB issued ASU 2017-09, Stock Compensation (Topic 718): Scope of Modification Accounting, which provides updated guidance about which changes to the terms or conditions of a share-based payment award would require an entity to apply modification accounting under the topic. This standard is effective for fiscal years beginning after December 15, 2017 and interim periods within those years, and the Company adopted this standard prospectively effective January 1, 2018. The adoption of this standard did not have a material effect on the Company's consolidated financial statements.

In February 2017, the FASB issued ASU 2017-05, Other Income - Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets, which provides guidance for recognizing gains and losses from the transfer of nonfinancial assets in contracts with non-customers. The new standard was issued as part of the new revenue standard (ASU 2014-09, as discussed below), and defines "in substance nonfinancial asset," unifies guidance related to partial sales of nonfinancial assets, eliminates rules specifically addressing sales of real estate, removes exceptions to the financial asset derecognition model, and clarifies the accounting for contributions of nonfinancial assets to joint ventures. As a result of the new guidance, the guidance specific to real estate sales in Subtopic 360-20 was eliminated, and sales and partial sales of real estate assets will now be subject to the same derecognition model as all other nonfinancial assets. This standard is effective at the same time an entity adopts ASU 2014-09, which the Company adopted effective January 1, 2018. The Company adopted this standard effective January 1, 2018 using the modified retrospective approach. The adoption of this standard did not have a material effect on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business. The new standard provides a screen to determine when a set of assets and activities is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired or disposed of is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This standard is effective for annual periods beginning after December 15, 2017 and interim periods within those periods, and the Company adopted this standard prospectively effective January 1, 2018. As a result, it is expected that the majority of the Company's acquisitions will be accounted for as asset acquisitions, whereas under the former guidance the majority of the Company's acquisitions had been accounted for as business combinations. The most significant difference between the two accounting models that impacts the Company's consolidated financial statements is that in an asset acquisition, property acquisition costs are generally a component of the consideration transferred to acquire a group of assets and are capitalized as a component of the cost of the assets, whereas in a business combination, property acquisition costs are expensed and not included as part of the consideration transferred.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash. The new standard requires that the statement of cash flows explain the changes during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. This standard is effective for fiscal years beginning after December 15, 2017 and the Company adopted this standard effective January 1, 2018. As a result, the Company has included restricted cash with cash and cash equivalents when reconciling the beginning and end of period total amounts on the accompanying Consolidated Statements of Cash Flows. The effects of this standard were applied retrospectively to all prior periods presented. For the three months ended March 31, 2017, the effect of the change in accounting principle was an increase in cash provided by operating activities of approximately \$0.3 million and an increase in cash used in investing activities of approximately \$1.1 million on the accompanying Consolidated Statements of Cash Flows.

In January 2016, the FASB issued ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The standard primarily affects the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for

financial instruments. ASU 2016-01 is effective for the annual periods beginning after December 31, 2017 and for annual periods and interim periods within those years, and the Company adopted this standard prospectively effective January 1, 2018. The adoption of this standard did not have a material effect on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). ASU 2014-09 is a comprehensive new revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. While lease contracts with customers, which constitute a vast majority of the Company's revenues, are specifically excluded from the model's scope, certain of the Company's revenue streams may be impacted by the new guidance. Once the new guidance setting forth principles for the recognition, measurement, presentation and disclosure of leases (ASU 2016-02, as discussed below) goes into effect, the new revenue standard may apply to executory costs and other components of revenue due under leases that are deemed to be non-lease components (such as common area maintenance and provision of utilities), even when the revenue for such activities is not separately stipulated in the lease. In that case, revenue from these items previously recognized on a straight-line basis under current lease guidance would be recognized under the new revenue guidance as the related services are delivered. As a result,

Table of Contents

while the total revenue recognized over time would not differ under the new guidance, the recognition pattern may be different. The Company is in the process of evaluating the significance of the difference in the recognition pattern that would result from this change upon the adoption of ASU 2016-02 on January 1, 2019. Additionally, the new revenue guidance requires improved disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The Company adopted this standard effective January 1, 2018 using the modified retrospective approach. The adoption of this standard did not have a material effect on the Company's consolidated financial statements.

New Accounting Standards Issued but not yet Adopted

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors). Topic 842 supersedes the previous leases standard, Topic 840, Leases. The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight line basis over the term of the lease, respectively. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. ASU 2016-02 is expected to impact the Company's consolidated financial statements as the Company has certain operating and land lease arrangements for which it is the lessee, which will result in the recording of a right of use asset and the related lease liability. The standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The new standard must be adopted using a modified retrospective transition and will require application of the new guidance at the beginning of the earliest comparative period. The Company is currently in the process of evaluating the impact the adoption of ASU 2016-02 will have on the Company's financial position or results of operations, and plans to adopt this standard effective January 1, 2019.

Restricted Cash

Restricted cash may include tenant security deposits and cash held in escrow for real estate taxes and capital improvements as required in various mortgage note agreements. Restricted cash also may include amounts held by the Company's transfer agent for preferred stock dividends that are distributed subsequent to period end. The following table presents a reconciliation of cash and cash equivalents and restricted cash reported on the accompanying Consolidated Balance Sheets to amounts reported on the accompanying Consolidated Statements of Cash Flows (in thousands).

	As of March 31,	
	2018	2017

Sergeant Bluff, IA	1	Change in estimated hold period	(3) Discounted cash flows		
Three months ended March 31, 2018				\$3,176	\$ 2,934

The Company tested the asset group for impairment utilizing a probability weighted recovery analysis of certain (1) scenarios, and it was determined that the carrying value of the property and intangibles were not recoverable from the estimated future undiscounted cash flows.

The estimated fair value of the property is based on Level 3 inputs and is a non-recurring fair value measurement. (2) Level 3 is defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

(3) Level 3 inputs used to determine fair value for the properties impaired for the three months ended March 31, 2018: discount rates ranged from 11.0% to 14.5% and exit capitalization rates ranged from 11.0% to 13.0%.

Total / weighted average interest rate ⁽⁵⁾	\$ 1,195,583	\$ 1,173,781	3.56	%

Interest rate as of March 31, 2018. At March 31, 2018, the one-month LIBOR (“L”) was 1.88313%. The interest rate is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining (1) debt or any unamortized fair market value premiums. The spread over the applicable rate for the Company's unsecured credit facility and unsecured term loans is based on the Company's consolidated leverage ratio, as defined in the respective loan agreements.

Prepayment terms consist of (i) pre-payable with no penalty; (ii) pre-payable with penalty; (iii) pre-payable without (2) penalty three months prior to the maturity date, however can be defeased beginning January 1, 2016; and (iv) pre-payable without penalty three months prior to the maturity date.

The capacity of the unsecured credit facility is \$450.0 million. Deferred financing fees and debt issuance costs, net of accumulated amortization related to the unsecured credit facility of approximately \$1.3 million and \$1.5 million (3) is included in prepaid expenses and other assets on the accompanying Consolidated Balance Sheets as of March 31, 2018 and December 31, 2017, respectively.

(4) The remaining capacity is \$75.0 million, which the Company has until July 27, 2018 to draw.

The weighted average interest rate was calculated using the fixed interest rate swapped on the notional amount of (5) \$600.0 million of debt that was in effect as of March 31, 2018, and is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining debt or any unamortized fair market value premiums.

The aggregate undrawn nominal commitment on the unsecured credit facility and unsecured term loans as of March 31, 2018 was approximately \$301.1 million, including issued letters of credit. The Company's actual borrowing capacity at any given point in time may be less and is restricted to a maximum amount based on the Company's debt covenant compliance. Total accrued interest for the Company's indebtedness was approximately \$5.4 million and \$5.6 million as of March 31, 2018 and December 31, 2017, respectively, and is included in accounts payable, accrued expenses and other liabilities on the accompanying Consolidated Balance Sheets.

Table of Contents

The table below sets forth the costs included in interest expense related to the Company's debt arrangements on the accompanying Consolidated Statement of Operations for the three months ended March 31, 2018 and 2017.

Costs Included in Interest Expense (in thousands)	Three months ended	
	March 31, 2018	March 31, 2017
Amortization of deferred financing fees and debt issuance costs and fair market value premiums	\$534	\$501
Facility fees and unused fees	\$339	\$275

On March 28, 2018, the Company drew \$75.0 million of the \$150.0 million unsecured term loan that was entered into on July 28, 2017.

Financial Covenant Considerations

The Company was in compliance with all financial and other covenants as of March 31, 2018 and December 31, 2017 related to its unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes. The real estate net book value of the properties that are collateral for the Company's debt arrangements was approximately \$89.8 million and \$90.9 million at March 31, 2018 and December 31, 2017, respectively, and is limited to senior, property-level secured debt financing arrangements.

Fair Value of Debt

The following table presents the aggregate principal outstanding under the Company's debt arrangements and the corresponding estimate of fair value as of March 31, 2018 and December 31, 2017 (in thousands).

	March 31, 2018		December 31, 2017	
	Principal Outstanding	Fair Value	Principal Outstanding	Fair Value
Unsecured credit facility	\$218,000	\$218,371	\$271,000	\$271,528
Unsecured term loans	525,000	526,685	450,000	451,463

Mortgage notes	58,394	58,611	58,855	59,769
Total principal amount	1,201,394	\$1,213,725	1,179,855	\$1,198,359
Add: Total unamortized fair market value premiums	58		61	
Less: Total unamortized deferred financing fees and debt issuance costs	(5,869)		(6,135)	
Total carrying value	\$1,195,583		\$1,173,781	

The applicable fair value guidance establishes a three tier value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. The fair value of the Company's debt is based on Level 3 inputs.

5. Use of Derivative Financial Instruments

Risk Management Objective of Using Derivatives

The Company's use of derivative instruments is limited to the utilization of interest rate swaps to manage interest rate risk exposure on existing and future liabilities and not for speculative purposes. The principal objective of such arrangements is to minimize the risks and related costs associated with the Company's operating and financial structure.

Table of Contents

The following table details the Company's outstanding interest rate swaps as of March 31, 2018. All of the Company's interest rate swaps are designated as qualifying cash flow hedges.

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate swaps are to add stability to interest expense and to manage its exposure to interest rate movements.

For derivatives designated and that qualify as cash flow hedges of interest rate risk, the gain or loss on the derivative is recorded in accumulated other comprehensive income and subsequently reclassified into interest expense in the same periods during which the hedged transaction affects earnings.

Amounts reported in accumulated other comprehensive income related to derivatives designated as qualifying cash flow hedges will be reclassified to interest expense as interest payments are made on the Company's variable rate debt. The Company estimates that approximately \$2.3 million will be reclassified from accumulated other comprehensive income as a decrease to interest expense over the next 12 months.

The table below presents the effect of cash flow hedge accounting and the location in the consolidated financial statements for the three months ended March 31, 2018 and 2017 (in thousands).

	Three months ended March 31,	
	2018	2017
Income recognized in accumulated other comprehensive income on interest rate swaps	\$7,493	\$514
Loss reclassified from accumulated other comprehensive income into income (loss) as interest expense	\$230	\$698
Total interest expense presented in the Consolidated Statements of Operations in which the effects of cash flow hedges are recorded	\$11,386	\$10,472

Credit-risk-related Contingent Features

The Company has agreements with each of its derivative counterparties that contain a provision where the Company could be declared in default on its derivative obligations if repayment of the underlying indebtedness is accelerated by the lender due to the Company's default on the indebtedness.

As of March 31, 2018, the Company had no derivatives that were in a net liability position by counterparty.

Fair Value of Interest Rate Swaps

The Company's valuation of the interest rate swaps is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs including interest rate curves.

The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees.

Although the Company has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2018 and December 31, 2017, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

The following sets forth the Company's financial instruments that are accounted for at fair value on a recurring basis as of March 31, 2018 and December 31, 2017.

LTIP Units

On March 12, 2018, the Company's board of directors appointed Michelle Dilley to serve as director of the Company and serve as a member of the nominating and corporate governance committee of the board of directors, effective on March 12, 2018. On March 12, 2018, Ms. Dilley was granted 3,930 LTIP units which, subject to Ms. Dilley's continued service, will vest on January 1, 2019.

LTIP units granted on January 5, 2018 to non-employee, independent directors, subject to the recipient's continued service, will vest on January 1, 2019. LTIP units granted on January 5, 2018 to certain senior executive officers and senior employees, subject to the recipient's continued employment, will vest quarterly over four years, with the first vesting date having been March 31, 2018. Refer to Note 8 for a discussion of vested LTIP units granted on January 5, 2018 pursuant to the 2015 Outperformance Program (the "2015 OPP").

The fair value of the LTIP units at the date of grant was determined by a lattice-binomial option-pricing model based on a Monte Carlo simulation. The fair value of the LTIP units are based on Level 3 inputs and are non-recurring fair value measurements. The table below sets forth the assumptions used in valuing such LTIP units granted during the three months ended March 31, 2018 (excluding those vested LTIP units granted pursuant to the 2015 OPP; refer to Note 8 for details).

8. Equity Incentive Plan

On January 5, 2018, the Company granted performance units approved by the compensation committee of the board of directors, under the 2011 Plan to certain key employees of the Company. The terms of the performance units granted on January 5, 2018 are substantially the same as the terms of the performance units granted on January 6, 2017 and March 8, 2016, except that the measuring period commences on January 1, 2018 and ends on December 31, 2020.

The fair value of the performance units at the date of grant was determined by a lattice-binomial option-pricing model based on a Monte Carlo simulation. The fair value of the performance units are based on Level 3 inputs and are non-recurring fair value measurements. The performance unit equity compensation expense is recognized into earnings ratably from the grant date over the respective vesting periods. The table below sets forth the assumptions used in valuing the performance units granted during the three months ended March 31, 2018.

Performance Units	Assumptions	
Grant date	January 5, 2018	
Expected volatility	22.0	%
Expected dividend yield	6.0	%
Risk-free interest rate	2.09	%
Fair value of performance units grant (in thousands)	\$ 5,456	

On January 1, 2018, the Company's three year measurement period pursuant to the 2015 OPP concluded. It was determined that the Company's total stockholder return exceeded the threshold percentage and return hurdle and a pool of approximately \$6.2 million was awarded to the participants. The compensation committee of the board of directors approved the issuance of 183,256 vested LTIP units and 53,722 vested shares of common stock (of which 15,183 shares of common stock were repurchased and retired) to the participants, all of which were issued on January 5, 2018.

The unrecognized compensation expense associated with the Company's performance units at March 31, 2018 was approximately \$7.8 million and is expected to be recognized over a weighted average period of approximately 2.7 years.

Non-cash Compensation Expense

The following table summarizes the amount recorded in general and administrative expenses in the accompanying Consolidated Statements of Operations for the amortization of restricted shares of common stock, LTIP units,

performance units, the 2015 OPP (performance units and the 2015 OPP, collectively the “Performance-based Compensation Plans”), and the Company’s director compensation for the three months ended March 31, 2018 and 2017.

	Three months ended March 31,	
Non-Cash Compensation Expense (in thousands)	2018	2017
Restricted shares of common stock	\$434	\$592
LTIP units	871	1,170
Performance-based Compensation Plans	829	537
Director compensation ⁽¹⁾	86	88
Total non-cash compensation expense	\$2,220	\$2,387

All of the Company’s independent directors elected to receive shares of common stock in lieu of cash for their service during the three months ended March 31, 2018 and 2017. The number of shares of common stock granted ⁽¹⁾ is calculated based on the trailing 10 days average common stock price ending on the third business day preceding the grant date.

During the three months ended March 31, 2018 and 2017, there were approximately 202 and 240, respectively, unvested restricted shares of common stock, respectively, on a weighted average basis that were not included in the computation of diluted earnings per share because to do so would have been antidilutive for the period. During the three months ended March 31, 2017, there were approximately 438 unvested shares under the Performance-based Compensation Plans on a weighted average basis that were not included in the computation of diluted earnings per share because to do so would have been antidilutive for the period.

10. Commitments and Contingencies

The Company is subject to various legal proceedings and claims that arise in the ordinary course of business. These matters are generally covered by insurance subject to deductible requirements. Management believes that the ultimate settlement of these actions will not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

The Company has letters of credit of approximately \$5.9 million as of March 31, 2018 related to construction projects and certain other agreements.

11. Subsequent Events

The following non-recognized subsequent events were noted.

On April 10, 2018, the Company entered into a note purchase agreement for the future private placement by the Operating Partnership of \$75.0 million senior unsecured notes maturing June 13, 2025 with a fixed annual interest rate of 4.10%, and \$100.0 million senior unsecured notes maturing June 13, 2028 with a fixed annual interest rate of 4.27%.

Overview

We are a REIT focused on the acquisition and operation of single-tenant, industrial properties throughout the United States. We are a Maryland corporation and our common stock is publicly traded on the New York Stock Exchange under the symbol “STAG.”

We are organized and conduct our operations to qualify as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended, and generally are not subject to federal income tax to the extent we currently distribute our income to our stockholders and maintain our qualification as a REIT. We remain subject to state and local taxes on our income and property and to U.S. federal income and excise taxes on our undistributed income.

Factors That May Influence Future Results of Operations

Our ability to increase revenues or cash flow will depend in part on our (i) external growth, specifically acquisition activity, and (ii) internal growth, specifically occupancy and rental rates on our portfolio. A variety of other factors, including those noted below, also affect our future results of operations.

As used herein “total annualized base rental revenue” refers to the contractual monthly base rent as of March 31, 2018 (which differs from rent calculated in accordance with generally accepted accounting principles in the United States of America (“GAAP”)) multiplied by 12. If a tenant is in a free rent period as of March 31, 2018, the annualized rent is calculated based on the first contractual monthly base rent amount multiplied by 12.

Outlook

The outlook for our business remains positive, albeit on a moderated basis in light of over eight years of economic growth, some uncertainty regarding the current U.S. presidential administration and its policy initiatives, and continued asset appreciation. In March 2018, the federal funds target rate was raised 25 basis points to a target range of 1.50% to 1.75%. This announcement combined with the unwinding of its balance sheet by selling Treasury securities and anticipation of at least two more rate increases in 2018 are signs of the Central Bank's confidence in the economy. The current trajectory of the federal funds target rate aligns with the Central Bank's consistent commentary that future rate increases would be gradual and rates will likely remain historically low for an extended period of time. If interest rates rise further as a result of Federal Reserve policy action (short-term interest rates) or changes in market expectations and capital flows (long-term interest rates), we believe strengthening economic conditions are likely to accompany these changes. This strengthening of economic conditions combined with the currently favorable industrial supply demand environment should translate to a net positive result for our business. Specifically, our existing portfolio should benefit from rising rental rates and our acquisition activity should benefit from higher yields. Furthermore, we believe certain characteristics of our business should position us well in a rising interest rate environment, including the fact that we have minimal

Table of Contents

floating rate debt exposure (taking into account our hedging activities) and that many of our competitors for the assets we purchase tend to be smaller local and regional investors who are likely to be more heavily impacted by interest rate increases.

Several industrial specific trends contribute to the expected strong demand, including:

- the rise of e-commerce (as compared to the traditional retail store distribution model) and the concomitant demand by e-commerce industry participants for well-located, functional distribution space;
- the increasing attractiveness of the U.S. as a manufacturing and distribution location because of the size of the U.S. consumer market, an increase in overseas labor costs and the overall cost of supplying and shipping goods (i.e. the shortening and fattening of the supply chain); and
- the overall quality of the transportation infrastructure in the U.S.

Furthermore, the lack of material speculative development and the broader failure of supply to keep pace with demand in many of our markets has improved and may continue to modestly improve occupancy levels and rental rates in our portfolio. We believe, however, that industrial supply, more so than other real estate property types, has historically had a short lead time and can appear quickly. We have started to see a notable pick-up in development activity in a growing number of the primary industrial markets. On the demand side, we note that the quality and availability of labor remains a key focus of tenants making occupancy decisions. We will continue to monitor the supply and demand fundamentals for industrial real estate and assess its impact on our business.

Conditions in Our Markets

The buildings in our portfolio are located in markets throughout the United States. Positive or negative changes in economic or other conditions, new supply, adverse weather conditions and natural disasters, and other factors in these markets may affect our overall performance.

Rental Income

We receive income primarily in the form of rental income from the tenants who occupy our buildings. The amount of rental income generated by the buildings in our portfolio depends principally on occupancy and rental rates. As of March 31, 2018, our Operating Portfolio was approximately 95.6% leased and our straight-line (“SL”) rent change (as defined below) on new and renewal leases together grew approximately 16.8% during the three months ended March 31, 2018. We define the Operating Portfolio as all warehouse and light manufacturing assets that were acquired stabilized or have achieved Stabilization. The Operating Portfolio excludes non-core flex/office assets and assets contained in the Value Add Portfolio. We define Stabilization for assets under redevelopment to occur upon the earlier of achieving 90% occupancy or twelve months after completion. Stabilization for assets that were acquired and immediately added to the Value Add Portfolio occurs under the following: (i) if acquired with less than 75% occupancy as of the acquisition date, Stabilization will occur upon the earlier of achieving 90% occupancy or twelve months from the acquisition date; or (ii) if acquired and will be less than 75% occupied due to known move-outs within two years of the acquisition date, Stabilization will occur upon the earlier of achieving 90% occupancy after the known move-outs have occurred or twelve months after the known move-outs have occurred. We define the Value Add Portfolio as properties that meet any of the following criteria: (i) less than 75% occupied as of the acquisition date; (ii) will be less than 75% occupied due to known move-outs within two years of the acquisition date; or (iii) out of service with significant physical renovation of the asset.

Future economic downturns or regional downturns affecting our submarkets that impair our ability to renew or re-lease space and the ability of our tenants to fulfill their lease commitments, as in the case of tenant bankruptcies, could adversely affect our ability to maintain or increase rental rates at our buildings. Our ability to lease our

properties and the attendant rental rate is dependent upon, among other things, (i) the overall economy, (ii) the supply/demand dynamic in our markets, (iii) the quality of our properties, including age, clear height, and configuration, and (iv) our tenants' ability to meet their contractual obligations to us.

Table of Contents

The following table provides a summary of our Operating Portfolio leases executed during the three months ended March 31, 2018. Certain leases contain rental concessions; any such rental concessions are accounted for on a straight-line basis over the term of the lease.

Operating Portfolio	Square Feet	Cash Basis Rent Per Square Foot	SL Rent Per Square Foot	Total Turnover Costs Per Square Foot ⁽¹⁾	Cash Rent Change ⁽²⁾	SL Rent Change ⁽³⁾	Weighted Average Lease Term ⁽⁴⁾ (years)	Rental Concessions per Square Foot ⁽⁵⁾
Three months ended March 31, 2018								
New Leases ⁽⁶⁾	909,072	\$ 3.13	\$ 3.28	\$ 2.29	27.1 %	37.7 %	7.6	\$ 0.97
Renewal Leases ⁽⁷⁾	2,402,535	3.81	3.96	0.48	4.6 %	12.1 %	5.3	—
Total/weighted average	3,311,607	\$ 3.62	\$ 3.77	\$ 0.98	8.7 %	16.8 %	5.9	\$ 0.27

We define Turnover Costs as the costs for improvements of vacant and renewal spaces, as well as the commissions (1) for leasing transactions. Turnover Costs per square foot represent the total turnover costs expected to be incurred on the leases signed during the period and do not reflect actual expenditures for the period.

We define Cash Rent Change as the percentage change in the base rent of the lease executed during the period compared to the base rent of the Comparable Lease for assets included in the Operating Portfolio. The calculation compares the first base rent payment due after the lease commencement date compared to the base rent of the last (2) monthly payment due prior to the termination of the lease, excluding holdover rent. Rent under gross or similar type leases are converted to a net rent based on an estimate of the applicable recoverable expenses. We define a Comparable Lease as a lease in the same space with a similar lease structure as compared to the previous in-place lease, excluding new leases for space that was not occupied under our ownership.

We define SL Rent Change as the percentage change in the average monthly base rent over the term of the lease, calculated on a straight-line basis, of the lease executed during the period compared to the Comparable Lease for (3) assets included in the Operating Portfolio. Rent under gross or similar type leases are converted to a net rent based on an estimate of the applicable recoverable expenses, and this calculation excludes the impact of any holdover rent.

We define Weighted Average Lease Term as the contractual lease term in years as of the lease start date weighted (4) by square footage.

(5) Represents the total rental concessions for the entire lease term.

(6) We define a New Lease as any lease that is signed for an initial term equal to or greater than twelve months for any vacant space; this includes a new tenant or an existing tenant that is expanding into new (additional) space.

We define a Renewal Lease as a lease signed by an existing tenant to extend the term for twelve months or more, (7) including (i) a renewal of the same space as the current lease at lease expiration, (ii) a renewal of only a portion of the current space at lease expiration and (iii) an early renewal or workout, which ultimately does extend the original term for twelve months or more.

Property Operating Expenses

Our property operating expenses generally consist of utilities, real estate taxes, management fees, insurance, and site repair and maintenance costs. For the majority of our tenants, our property operating expenses are controlled, in part, by the triple net provisions in tenant leases. In our triple net leases, the tenant is responsible for all aspects of and costs related to the building and its operation during the lease term, including utilities, taxes, insurance and maintenance costs. However, we also have modified gross leases and gross leases in our building portfolio. The terms of those leases vary and on some occasions we may absorb certain building related expenses of our tenants. In our modified gross leases, we are responsible for some building related expenses during the lease term, but the cost of most of the expenses is passed through to the tenant for reimbursement to us. In our gross leases, we are responsible for all costs

related to the building and its operation during the lease term. Our overall performance will be affected by the extent to which we are able to pass-through property operating expenses to our tenants.

Scheduled Lease Expirations

Our ability to re-lease space subject to expiring leases will impact our results of operations and is affected by economic and competitive conditions in our markets and by the desirability of our individual buildings. Leases that comprise approximately 10.3% of our annualized base rental revenue will expire during the period from April 1, 2018 to March 31, 2019, excluding month to month leases. We assume, based upon internal renewal probability estimates that some of our tenants will renew and others will vacate and the associated space will be re-let subject to downtime assumptions. Using the aforementioned assumptions, we expect that the rental rates on the respective new leases will generally be higher than the rates under existing leases expiring during the period April 1, 2018 to March 31, 2019, thereby resulting in slightly higher revenue from the same space.

Table of Contents

The following table sets forth a summary of lease expirations for leases in place as of March 31, 2018, plus available space, for each of the ten calendar years beginning with 2018 and thereafter in our portfolio. The information in the table assumes that tenants exercise no renewal options and no early termination rights.

Portfolio Dispositions

During the three months ended March 31, 2018, we sold two buildings comprised of approximately 0.7 million square feet with a net book value of approximately \$26.9 million to third parties. These buildings contributed approximately \$0.3 million and \$0.9 million to revenue for the three months ended March 31, 2018 and 2017, respectively. These buildings contributed approximately \$49,000 and \$46,000 and to net income (exclusive of loss on involuntary conversion and gain on the sales of rental property, net) for the three months ended March 31, 2018 and 2017, respectively. Net proceeds from the sales of rental property were approximately \$49.6 million and we recognized the full gain on the sales of rental property, net of approximately \$22.7 million for the three months ended March 31, 2018.

Critical Accounting Policies

See “Critical Accounting Policies” in “Management's Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended December 31, 2017, for a discussion of our critical accounting policies and estimates.

Results of Operations

The following discussion of our results of our same store (as defined below) net operating income (“NOI”) should be read in conjunction with our Consolidated Financial Statements. For a detailed discussion of NOI, including the reasons management believes NOI is useful to investors, see “Non-GAAP Financial Measures” below. Same store results are considered to be useful to investors in evaluating our performance because they provide information relating to changes in building-level operating performance without taking into account the effects of acquisitions or dispositions. We encourage the reader to not only look at our same store results, but also our total portfolio results, due to historic and future growth.

Comparison of the three months ended March 31, 2018 to the three months ended March 31, 2017

We define same store properties as properties that were in the Operating Portfolio for the entirety of the comparative periods presented. Same store properties exclude Operating Portfolio properties with expansions placed into service after the first day of the earliest comparable period presented. On March 31, 2018, we owned 282 industrial buildings consisting of approximately 56.1 square feet, which represents approximately 79.2% of our total portfolio, that are considered our same store portfolio in the analysis below. Same store occupancy decreased approximately 0.9% to 95.6% as of March 31, 2018 compared to 96.5% as of March 31, 2017.

The following table summarizes selected operating information for our same store portfolio and our total portfolio for the three months ended March 31, 2018 and 2017 (dollars in thousands). This table includes a reconciliation from our same store portfolio to our total portfolio by also providing information for the three months ended March 31, 2018 and 2017 with respect to the buildings acquired and disposed of or Operating Portfolio buildings with expansions placed into service or transferred from the Value Add Portfolio to the Operating Portfolio after January 1, 2017 and our flex/office buildings and Value Add Portfolio.

Table of Contents

Net Income

Net income for our total portfolio increased by \$25.1 million or 36,347.8% to \$25.1 million for the three months ended March 31, 2018, compared to \$0.1 million for the three months ended March 31, 2017.

Same Store Total Operating Revenue

Same store total operating revenue consists primarily of (i) rental income consisting of base rent, termination income, straight-line rent and above and below market lease amortization from our properties, and (ii) tenant reimbursements for insurance, real estate taxes and certain other expenses (“tenant recoveries”).

For a detailed reconciliation of our same store total operating revenue to net income, see the table above.

Same store rental income increased by \$0.1 million or 0.2% to \$54.1 million for the three months ended March 31, 2018 compared to \$54.0 million for the three months ended March 31, 2017. Approximately \$1.8 million of the increase was attributable to rental increases due to new leases and renewals of existing tenants. Same store rental income also increased approximately \$0.1 million due to a net decrease in the amortization of net above market leases. These increases were partially offset by an approximately \$1.6 million decrease due to a reduction of base rent due to tenants downsizing their spaces and vacancies, as well as a \$0.2 million decrease in the recognition of straight-line income from termination fees at certain buildings.

Same store tenant recoveries increased by \$0.9 million or 10.4% to \$9.8 million for the three months ended March 31, 2018 compared to \$8.9 million for the three months ended March 31, 2017. Approximately \$1.1 million of the increase was primarily due to increases in occupancy and real estate taxes levied by the taxing authority, as well as changes to lease terms where we began paying the real estate taxes and operating expenses on behalf of tenants that had previously paid its taxes and operating expenses directly to respective vendors. This increase was partially offset by a decrease of approximately \$0.2 million related to vacancy of previously occupied buildings and decreases in real estate taxes levied by the taxing authority.

Same Store Operating Expenses

Same store operating expenses consist primarily of property operating expenses and real estate taxes and insurance.

For a detailed reconciliation of our same store operating expenses to net income, see the table above.

Total same store operating expenses increased by \$1.4 million or 12.2% to \$12.4 million for the three months ended March 31, 2018 compared to \$11.1 million for the three months ended March 31, 2017. This increase was primarily related to increases in real estate taxes levied by the related taxing authority of approximately \$0.7 million, an increase of approximately \$0.3 million in snow removal expenses, and an increase of approximately \$0.4 million in general repairs and maintenance and utilities expenses.

Acquisitions and Dispositions Net Operating Income

For a detailed reconciliation of our acquisitions and dispositions net operating income to net income, see the table above.

Subsequent to January 1, 2017, we acquired 54 buildings consisting of approximately 11.1 million square feet (excluding five buildings that were included in the Value Add Portfolio at March 31, 2018 or transferred from the Value Add Portfolio to the Operating Portfolio after January 1, 2017), and sold 13 buildings consisting of

approximately 2.6 million square feet. For the three months ended March 31, 2018 and 2017, the buildings acquired after January 1, 2017 contributed approximately \$11.5 million and \$1.2 million to NOI, respectively. For the three months ended March 31, 2018 and 2017, the buildings sold after January 1, 2017 contributed approximately \$0.1 million and \$1.9 million to NOI, respectively. Refer to Note 3 in the accompanying Notes to Consolidated Financial Statements for additional discussion regarding buildings acquired or sold.

Other Net Operating Income

Our other assets include our flex/office buildings, Value Add Portfolio, and Operating Portfolio buildings with expansions placed in service or transferred from the Value Add Portfolio to the Operating Portfolio after January 1, 2017.

For a detailed reconciliation of our other net operating income to net income, see the table above.

At March 31, 2018, we owned 14 flex/office buildings consisting of approximately 0.9 million square feet, five buildings in our Value Add Portfolio consisting of approximately 1.3 million square feet, and five buildings consisting of approximately 1.4 million

Table of Contents

square feet that were Operating Portfolio buildings with expansions placed in service or transferred from the Value Add Portfolio to the Operating Portfolio after January 1, 2017. These buildings contributed approximately \$2.6 million and \$1.3 million to NOI for the three months ended March 31, 2018 and 2017, respectively.

Total Other Expenses

Total other expenses consist of general and administrative expense, property acquisition costs, depreciation and amortization, loss on impairments, loss on involuntary conversion, and other expenses.

Total other expenses increased \$6.0 million or 12.9% for the three months ended March 31, 2018 to \$51.9 million compared to \$46.0 million for the three months ended March 31, 2017. This is primarily a result of an increase in depreciation and amortization of approximately \$4.0 million as a result of buildings acquired which increased the depreciable asset base. The increase was also attributable to two buildings that were impaired in the amount of approximately \$2.9 million during the three months ended March 31, 2018, whereas there were no buildings impaired during the three months ended March 31, 2017. These increases were partially offset by a decrease in property acquisition costs of approximately \$0.7 million due to the adoption of Accounting Standards Update 2017-01, as discussed in Note 2 of the accompanying Notes to Consolidated Financial Statements. Additionally, general and administrative expenses decreased slightly due to a net decrease in cash compensation, as well as lower non-cash compensation expense as the 2015 restricted shares of common stock and LTIP unit grants were on a three-year vesting schedule and have fully vested, whereas the remaining grants will be recognized based on a four-year vesting schedule.

Total Other Income (Expense)

Total other income (expense) consists of interest expense and gain on the sales of rental property, net. Interest expense includes interest incurred during the period as well as adjustments related to amortization of financing fees and debt issuance costs, and amortization of fair market value adjustments associated with the assumption of debt.

Total other income (expense) increased \$21.5 million or 211.4% to a net other income position of \$11.3 million for the three months ended March 31, 2018 compared to a net other expense of \$10.1 million for the three months ended March 31, 2017. This increase is primarily the result of an increase in the gain on the sales of rental property, net of approximately \$22.4 million. This was offset by an increase in interest expense of approximately \$0.9 million which was primarily attributable to a higher unsecured credit facility balance during the three months ended March 31, 2018 compared to the three months ended March 31, 2017, which was slightly offset by the repayment of several mortgage notes during the year ended December 31, 2017.

Non-GAAP Financial Measures

In this report, we disclose funds from operations (“FFO”) and NOI, which meet the definition of “non-GAAP financial measures” as set forth in Item 10(e) of Regulation S-K promulgated by the Securities and Exchange Commission (“SEC”). As a result, we are required to include in this report a statement of why management believes that presentation of these measures provides useful information to investors.

Funds From Operations

FFO should not be considered as an alternative to net income (determined in accordance with GAAP) as an indication of our performance, and we believe that to understand our performance further, FFO should be compared with our reported net income (loss) in accordance with GAAP, as presented in our consolidated financial statements included in this report.

We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts (“NAREIT”). FFO represents GAAP net income (loss), excluding gains (or losses) from sales of depreciable operating buildings, impairment write-downs of depreciable real estate, real estate related depreciation and amortization (excluding amortization of deferred financing costs and fair market value of debt adjustment) and after adjustments for unconsolidated partnerships and joint ventures.

Management uses FFO as a supplemental performance measure because it is a widely recognized measure of the performance of REITs. FFO may be used by investors as a basis to compare our operating performance with that of other REITs.

However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our buildings that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our buildings, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. In addition, other REITs may not calculate FFO in

Table of Contents

accordance with the NAREIT definition, and, accordingly, our FFO may not be comparable to such other REITs' FFO. FFO should not be used as a measure of our liquidity, and is not indicative of funds available for our cash needs, including our ability to pay dividends.

The following table sets forth a reconciliation of our FFO attributable to common stockholders and unit holders for the periods presented to net income, the nearest GAAP equivalent.

Reconciliation of Net Income to FFO (in thousands)	Three months ended March 31,

FFO attributable to common stockholders and unit holders	\$42,838	\$33,175

Net Operating Income

We consider NOI to be an appropriate supplemental performance measure to net income (loss) because we believe it helps investors and management understand the core operations of our buildings. NOI is defined as rental revenue, including reimbursements, less property expenses and real estate taxes and insurance. NOI should not be viewed as an alternative measure of our financial performance since it excludes expenses which could materially impact our results of operations. Further, our NOI may not be comparable to that of other real estate companies, as they may use different methodologies for calculating NOI.

The following table sets forth a reconciliation of our NOI for the periods presented to net income, the nearest GAAP equivalent.

Cash Flows

Comparison of the three months ended March 31, 2018 to the three months ended March 31, 2017

The following table summarizes our cash flows for the three months ended March 31, 2018 compared to the three months ended March 31, 2017.

Edgar Filing: STAG Industrial, Inc. - Form 10-Q

Cash Flows (dollars in thousands)	Three months ended		Change	
	March 31, 2018	March 31, 2017	\$	%
Net cash provided by operating activities	\$41,974	\$31,408	\$10,566	33.6 %
Net cash used in investing activities	\$36,112	\$102,089	\$(65,977)	(64.6)%
Net cash provided by (used in) financing activities	\$(16,277)	\$64,678	\$(80,955)	(125.2)%

Net cash provided by operating activities increased \$10.6 million to \$42.0 million for the three months ended March 31, 2018 compared to \$31.4 million for the three months ended March 31, 2017. The increase was primarily attributable to incremental operating cash flows from property acquisitions completed after January 1, 2017, and operating performance at existing properties. These increases were partially offset by the loss of cash flows from property dispositions completed after January 1, 2017 and fluctuations in working capital due to timing of payments and rental receipts.

Table of Contents

Net cash used in investing activities decreased \$66.0 million to \$36.1 million for the three months ended March 31, 2018 compared to \$102.1 million for the three months ended March 31, 2017. The decreased cash outflow was primarily due to the acquisition of six buildings for a total cash consideration of approximately \$78.8 million for the three months ended March 31, 2018 compared to the acquisition of 11 buildings for a total cash consideration of approximately \$99.8 million for the three months ended March 31, 2017. The decrease is also attributable to the sale of two buildings during the three months ended March 31, 2018 for net proceeds of approximately \$49.6 million, compared to the three months ended March 31, 2017 where we sold one building for net proceeds of approximately \$3.9 million.

Net cash used in financing activities was \$16.3 million for the three months ended March 31, 2018, a decrease of \$81.0 million from net cash provided by financing activities of \$64.7 million for the three months ended March 31, 2017. The change was primarily due to an increase in net cash outflow on our unsecured credit facility of approximately \$96.0 million and a decrease in proceeds from sales of common stock of approximately \$68.5 million, as well as a \$0.004999 increase in the dividend paid per share during the three months ended March 31, 2018 compared to the three months ended March 31, 2017. These increases in net cash outflow were partially offset by the \$75.0 million draw on the unsecured term loan that was entered into on July 28, 2017, as well as a decrease in the repayment of mortgage notes of approximately \$11.7 million during the three months ended March 31, 2018 compared to the three months ended March 31, 2017.

Liquidity and Capital Resources

We believe that our liquidity needs will be satisfied through cash flows generated by operations, disposition proceeds, and financing activities. Operating cash flow is primarily rental income, expense recoveries from tenants, and other income from operations and is our principal source of funds that we use to pay operating expenses, debt service, recurring capital expenditures and the distributions required to maintain our REIT qualification. We look to the capital markets (common equity, preferred equity, and debt) to primarily fund our acquisition activity. We seek to increase cash flows from our properties by maintaining quality standards for our buildings that promote high occupancy rates and permit increases in rental rates while reducing tenant turnover and controlling operating expenses. We believe that our revenue, together with proceeds from building sales and debt and equity financings, will continue to provide funds for our short-term and medium-term liquidity needs.

Our short-term liquidity requirements consist primarily of funds to pay for operating expenses and other expenditures directly associated with our buildings, including interest expense, interest rate swap payments, scheduled principal payments on outstanding indebtedness, funding of property acquisitions under contract, general and administrative expenses, and capital expenditures for tenant improvements and leasing commissions.

Our long-term liquidity needs, in addition to recurring short-term liquidity needs as discussed above, consist primarily of funds necessary to pay for acquisitions, non-recurring capital expenditures, and scheduled debt maturities. We intend to satisfy our long-term liquidity needs through cash flow from operations, the issuance of equity or debt securities, other borrowings, property dispositions, or, in connection with acquisitions of certain additional buildings, the issuance of common units in the Operating Partnership.

As of March 31, 2018, we had total immediate liquidity of approximately 311.6 million, comprised of \$10.5 million of cash and cash equivalents and 301.1 million of immediate availability on our unsecured credit facility and unsecured term loans.

In addition, we require funds for future dividends to be paid to our common and preferred stockholders and common unit holders in our Operating Partnership. The table below sets forth the dividends attributable to our outstanding common stock that had a record date during the three months ended March 31, 2018. These distributions on our

Edgar Filing: STAG Industrial, Inc. - Form 10-Q

common stock are voluntary (at the discretion of our board of directors), to the extent we have satisfied distribution requirements in order to maintain our REIT status for federal income tax purposes, and may be reduced or stopped if needed to fund other liquidity requirements or for other reasons.

Interest rate as of March 31, 2018. At March 31, 2018, the one-month LIBOR (“L”) was 1.88313%. The interest rate is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining (1) debt or any unamortized fair market value premiums. The spread over the applicable rate for our unsecured credit facility and unsecured term loans is based on our consolidated leverage ratio, as defined in the respective loan agreements.

Prepayment terms consist of (i) pre-payable with no penalty; (ii) pre-payable with penalty; (iii) pre-payable without (2) penalty three months prior to the maturity date, however can be defeased beginning January 1, 2016; and (iv) pre-payable without penalty three months prior to the maturity date.

(3) The capacity of the unsecured credit facility is \$450.0 million.

(4) The remaining capacity is \$75.0 million, which we have until July 27, 2018 to draw.

(5) The weighted average interest rate was calculated using the fixed interest rate swapped on the notional amount of \$600.0 million of debt that was in effect as of March 31, 2018, and is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining debt or any unamortized fair market value premiums.

The aggregate undrawn nominal commitments on the unsecured credit facility and unsecured term loans as of March 31, 2018 was approximately \$301.1 million, including issued letters of credit. Our actual borrowing capacity at any given point in time may be less and is restricted to a maximum amount based on our debt covenant compliance.

Table of Contents

Our unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes are subject to ongoing compliance with a number of financial and other covenants. As of March 31, 2018, we were in compliance with the applicable financial covenants.

On March 28, 2018, we drew \$75.0 million of the \$150.0 million unsecured term loan that was entered into on July 28, 2017.

The chart below details our debt capital structure as of March 31, 2018.

Debt Capital Structure	March 31, 2018

Weighted average duration (years)	4.3	
% Secured debt	5	%
% Debt maturing next 12 months	—	%
Net Debt to Real Estate Cost Basis ⁽¹⁾	39	%

We define Net Debt as our amounts outstanding under our unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes, less cash and cash equivalents. We define Real Estate Cost Basis as the book value of rental property and deferred leasing intangibles, exclusive of the related accumulated depreciation and amortization.

We regularly pursue new financing opportunities to ensure an appropriate balance sheet position. As a result of these dedicated efforts, we are confident in our ability to meet future debt maturities and building acquisition funding needs. We believe that our current balance sheet is in an adequate position at the date of this filing, despite possible volatility in the credit markets.

Our interest rate exposure as it relates to interest expense payments on our floating rate debt is managed through our use of interest rate swaps, which fix the rate of our long term floating rate debt. For a detailed discussion on our use of interest rate swaps, see “Interest Rate Risk” below.

Preferred Stock

The table below sets forth our outstanding Preferred Stock Issuances as of March 31, 2018.

Preferred Stock Issuances	Issuance Date	Number of Shares	Liquidation Value Per Share	Interest Rate
6.625% Series B Cumulative Redeemable Preferred Stock	April 16, 2013	2,800,000	\$ 25.00	6.625 %
6.875% Series C Cumulative Redeemable Preferred Stock	March 17, 2016	3,000,000	\$ 25.00	6.875 %

The Preferred Stock Issuances rank on parity and rank senior to our common stock with respect to dividend rights and rights upon the liquidation, dissolution or winding up of our affairs. The Preferred Stock Issuances have no stated maturity date and are not subject to mandatory redemption or any sinking fund. Generally, we are not permitted to redeem the Series B Preferred Stock and Series C Preferred Stock prior to April 16, 2018 and March 17, 2021, respectively, except in limited circumstances relating to our ability to qualify as a REIT and in certain other circumstances related to a change of control.

Noncontrolling Interest

We own our interests in all of our properties and conduct substantially all of our business through our Operating Partnership. We are the sole member of the sole general partner of the Operating Partnership. As of March 31, 2018, we owned approximately 95.8% of the common units of our Operating Partnership, and our current and former executive officers, directors, senior employees and their affiliates, and third parties who contributed properties to us in exchange for common units in our Operating Partnership, owned the remaining 4.2%.

Interest Rate Risk

We use interest rate swaps to fix the rate of our variable rate debt. As of March 31, 2018, all of our outstanding variable rate debt, with the exception of \$143.0 million under our unsecured credit facility, was fixed with interest rate swaps.

We recognize all derivatives on the balance sheet at fair value. If the derivative is designated as a hedge, depending on the nature of the hedge, changes in the fair value of derivatives are either offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in other comprehensive income (loss), which is a component of equity. Derivatives that are not designated as hedges must be adjusted to fair value and the changes in fair value must be reflected as income or expense.

We have established criteria for suitable counterparties in relation to various specific types of risk. We only use counterparties that have a credit rating of no lower than investment grade at swap inception from Moody's Investor Services, Standard & Poor's, or Fitch Ratings or other nationally recognized rating agencies.

The following table details our outstanding interest rate swaps as of March 31, 2018.

The swaps outlined in the above table were all designated as cash flow hedges of interest rate risk, and all are valued as Level 2 financial instruments. Level 2 financial instruments are defined as significant other observable inputs. As of March 31, 2018, the fair value of all of our 21 interest rate swaps were in an asset position of approximately \$12.6 million, including any adjustment for nonperformance risk related to these agreements.

As of March 31, 2018, we had \$743.0 million of variable rate debt. As of March 31, 2018, all of our outstanding variable rate debt, with exception of \$143.0 million under our unsecured credit facility, was fixed with interest rate swaps. To the extent interest rates increase, interest costs on our floating rate debt not fixed with interest rate swaps will increase, which could adversely affect our cash flow and our ability to pay principal and interest on our debt and our ability to make distributions to our security holders. From time to time, we may enter into interest rate swap agreements and other interest rate hedging contracts, including swaps,

Table of Contents

caps and floors. In addition, an increase in interest rates could decrease the amounts third parties are willing to pay for our assets, thereby limiting our ability to change our portfolio promptly in response to changes in economic or other conditions.

Off-balance Sheet Arrangements

As of March 31, 2018, we had letters of credit related to development projects and certain other agreements of approximately \$5.9 million. As of March 31, 2018, we had no other material off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevailing market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. The primary market risk we are exposed to is interest rate risk. We have used derivative financial instruments to manage, or hedge, interest rate risks related to our borrowings, primarily through interest rate swaps.

As of March 31, 2018, we had \$743.0 million of outstanding variable rate debt, all of which, with the exception of \$143.0 million outstanding under our unsecured credit facility, was fixed with interest rate swaps. To the extent we undertake additional variable rate indebtedness, if interest rates increase, then so will the interest costs on our unhedged variable rate debt, which could adversely affect our cash flow and our ability to pay principal and interest on our debt and our ability to make distributions to our security holders. Further, rising interest rates could limit our ability to refinance existing debt when it matures or significantly increase our future interest expense. From time to time, we enter into interest rate swap agreements and other interest rate hedging contracts, including swaps, caps and floors. While these agreements are intended to lessen the impact of rising interest rates on us, they also expose us to the risk that the other parties to the agreements will not perform, we could incur significant costs associated with the settlement of the agreements, the agreements will be unenforceable and the underlying transactions will fail to qualify as highly-effective cash flow hedges under GAAP. In addition, an increase in interest rates could decrease the amounts third parties are willing to pay for our assets, thereby limiting our ability to change our portfolio promptly in response to changes in economic or other conditions. If interest rates increased by 100 basis points and assuming we had an outstanding balance of \$143.0 million on the unsecured credit facility (the portion outstanding at March 31, 2018 not fixed by interest rate swaps) for the three months ended March 31, 2018, our interest expense would have increased by approximately \$0.4 million for the three months ended March 31, 2018.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As required by SEC Rule 13a-15(b), we have evaluated, under the supervision of and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, as of March 31, 2018. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures for the periods covered by this report were effective to provide reasonable assurance that information required to be disclosed by our Company in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

There was no change to our internal control over financial reporting during the quarter ended March 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
