Notes to Condensed Consolidated Financial Statements

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Ferro Corporation (“Ferro,” “we,” “us” or “the Company”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. These statements reflect all normal and recurring adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2015.

The Company owned 51% of an operating affiliate in Venezuela that was a consolidated subsidiary of Ferro. During the fourth quarter of 2015, we sold our interest in the operating affiliate in Venezuela for a cash purchase price of \$0.5 million. During the first quarter of 2015, the Ministry of Economy, Finance, and Public Banking, and the Central Bank of Venezuela published a new exchange rate, the Foreign Exchange Marginal System (“SIMADI”). We concluded in March 2015 that SIMADI was the most relevant exchange mechanism available, and began using SIMADI to translate the local currency financial statements. As a result of the revaluation, we recognized a \$1.9 million foreign currency loss and a \$2.6 million loss due to lower of cost or market charges against our inventory, prior to the adjustment for losses allocated to our noncontrolling interest partner, which is recorded within Foreign currency losses, net and Cost of sales, respectively, within our condensed consolidated statement of operations for the three months ended March 31, 2015.

During the second quarter of 2014, substantially all of the assets and liabilities of the Europe-based Polymer Additives business were classified as held-for-sale. As further discussed in Note 3, we have classified the assets and liabilities as held-for-sale in the accompanying condensed consolidated balance sheets and have classified the related operating results, net of income tax, as discontinued operations in the accompanying condensed consolidated statements of operations for all periods presented.

Operating results for the three months ended March 31, 2016, are not necessarily indicative of the results expected in subsequent quarters or for the full year ending December 31, 2016.

2. Recent Accounting Pronouncements

New Accounting Standards

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09, Revenue from Contracts with Customers: Topic 606. This ASU replaces nearly all existing U.S. GAAP guidance on revenue recognition. The standard prescribes a five-step model for recognizing revenue, the application of which will require significant judgment. This standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. The Company is in the process of assessing the impact the adoption of this ASU will have on our condensed consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, Income Taxes: Topic 740: Balance Sheet Classification of Deferred Taxes. ASU 2015-17 requires deferred tax assets and liabilities to be classified as noncurrent in a classified statement of financial position. This pronouncement is effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted. ASU 2015-17 may be applied either on a retrospective or prospective basis. The Company is in the process of assessing the impact the adoption of this ASU will have on our condensed consolidated financial statements.

Table of Contents

In February 2016, the FASB issued ASU 2016-02, Leases: Topic 842. ASU 2016-02 requires companies to recognize a lease liability and asset on the balance sheet for operating leases with a term greater than one year. This pronouncement is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The Company is in the process of assessing the impact the adoption of this ASU will have on our condensed consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Compensation – Stock Compensation: Topic 718: Improvements to Employee Share-Based Payment Accounting. ASU 2016-09 is intended to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. This pronouncement is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted. The Company is in the process of assessing the impact the adoption of this ASU will have on our condensed consolidated financial statements.

No other new accounting pronouncements issued or with effective dates during fiscal 2016 had or are expected to have a material impact of the Company's condensed consolidated financial statements.

3. Discontinued Operations

During the second quarter of 2014, we commenced a process to market for sale all of the assets within our Europe-based Polymer Additives business, including the Antwerp, Belgium dibenzoates manufacturing assets, and related Polymer Additives European headquarters and lab facilities. We determined that the criteria to classify these assets as held-for-sale under ASC Topic 360, Property, Plant and Equipment, have been met. We have classified the Europe-based Polymer Additives assets and liabilities as held-for-sale in the accompanying condensed consolidated balance sheets and have classified the related operating results, net of income tax, as discontinued operations in the accompanying condensed consolidated statements of operations for all periods presented. Though the sale process of these assets has taken longer than initially expected, we continue to believe that it is probable that we will sell the Europe-based Polymer Additives assets within a year.

The table below summarizes results for the Europe-based Polymer Additives assets, for the three months ended March 31, 2016 and 2015, which are reflected in our condensed consolidated statements of operations as discontinued operations. Interest expense has been allocated to the discontinued operations based on the ratio of net assets of each business to consolidated net assets excluding debt.

4. Acquisitions

Ferer

On January 5, 2016, the Company completed the purchase of 100% of the equity of privately held Istanbul-based Ferer Dis Ticaret Ve Kimyasallar Anonim Sirketi A.S. (“Ferer”) on a cash-free and debt-free basis for approximately \$9.4 million in cash, subject to customary working capital and other adjustments. The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches and estimates made by management. As of March 31, 2016, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company. The Company preliminarily recorded \$3.2 million of amortizable intangible assets, \$4.3 million of goodwill, \$0.6 million of personal and real property, \$0.6 million of a deferred tax liability related to the amortizable intangible assets, and \$1.9 million of net working capital on the condensed

consolidated balance sheet.

Al Salomi

On November 17, 2015, the Company acquired 100% of the equity of Egypt-based tile coatings manufacturer Al Salomi for Frits and Glazes (“Al Salomi”) for EGP 307 million (approximately \$38.2 million), including the assumption of debt. The acquired business contributed net sales of \$5.6 million and net income attributable to Ferro Corporation of \$0.6 million for the three months ended March 31, 2016.

The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches and estimates made by management. As of March 31, 2016, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company. The Company preliminarily recorded \$15.0 million of amortizable intangible assets, \$14.3 million of goodwill, \$10.7 million of personal and real property, \$4.8 million of a deferred tax liability related to the amortizable intangible assets, and \$3.0 million of net working capital on the condensed consolidated balance sheet.

Nubiola

On July 7, 2015, the Company acquired the entire share capital of Corporación Química Vhem, S.L., Dibon USA, LLC and Ivory Corporation, S.A. (together with their direct and indirect subsidiaries, “Nubiola”) on a cash-free and debt-free basis for €167 million

Table of Contents

(approximately \$184.2 million). The acquisition was funded with excess cash and borrowings under the Company's existing revolving credit facility. See Note 8 for additional detail on the revolving credit facility. Nubiola is a worldwide producer of specialty inorganic pigments and the world's largest producer of Ultramarine Blue. Nubiola also produces specialty Iron Oxides, Chrome Oxide Greens and Corrosion Inhibitors. Nubiola has production facilities in Spain, Colombia, Romania, and India and a joint venture in China.

The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches and estimates made by management. As of March 31, 2016, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company.

The following table summarizes the preliminary purchase price allocations:

	July 7, 2015 (Dollars in thousands)
Net working capital (1)	\$ 46,642
Cash and equivalents	19,966
Personal property	39,444
Real property	28,510
Intangible assets	33,152
Other assets and liabilities	(22,660)
Goodwill	39,151
Net assets acquired	\$ 184,205

(1) Net working capital is defined as current assets, less cash, less current liabilities, and includes an estimate of potential transactional adjustments.

The acquired business contributed net sales of \$33.4 million and net income attributable to Ferro Corporation of \$5.2 million for the three months ended March 31, 2016. The Company incurred acquisition related costs of \$0.2 million for the three months ended March 31, 2016, which is recorded within Selling, general and administrative expenses, within our condensed consolidated statements of operations.

The estimated fair value of the receivables acquired is \$24.5 million, with a gross contractual amount of \$25.2 million. The Company preliminarily recorded acquired intangible assets subject to amortization of \$27.0 million, which is comprised of \$10.3 million of customer relationships and \$16.7 million of technology/know-how, which will be amortized over 20 years and 15 years, respectively. The Company preliminarily recorded acquired indefinite-lived intangible assets of \$6.2 million related to trade names and trademarks. Goodwill is calculated as the excess of the purchase price over the estimated fair values of the assets acquired and the liabilities assumed in the acquisition and is a result of anticipated synergies. Goodwill is not expected to be deductible for tax purposes.

The following unaudited pro forma information represents the consolidated results of the Company as if the Nubiola acquisition occurred as of January 1, 2014:

	Three months ended March 31, 2015 (unaudited) (In thousands, except per share amounts)
Net sales	\$ 295,822
Net income attributable to Ferro Corporation common shareholders	\$ 16,184
Net earnings per share attributable to Ferro Corporation common shareholders - Basic	\$ 0.19
Net earnings per share attributable to Ferro Corporation common shareholders - Diluted	\$ 0.18

The unaudited pro forma information has been adjusted with the respect to certain aspects of the acquisition to reflect the following:

Table of Contents

- Additional depreciation and amortization expenses that would have been recognized assuming fair value adjustments to the existing Nubiola assets acquired, including intangible assets and fixed assets.
- Elimination of revenue and costs of goods sold for sales from Nubiola to the Company, which would be eliminated as intercompany transactions for Nubiola and the Company on a consolidated basis.
- Increased interest expense due to additional borrowings to fund the acquisition.
- Acquisition-related costs, which were included in the Company's results.
- Adjustments for the income tax effect of the pro forma adjustments related to the acquisition.

Thermark

In February 2015, the Company acquired TherMark Holdings, Inc., a leader in laser marking technology, for a cash purchase price of \$5.5 million. The Company recorded \$4.6 million of amortizable intangible assets, \$2.5 million of goodwill, \$1.7 million of a deferred tax liability related to the amortizable intangible assets, and \$0.1 million of net working capital on the condensed consolidated balance sheet.

In the production of some of our products, we use precious metals, some of which we obtain from financial institutions under consignment agreements with terms of one year or less. The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign. These fees were \$0.2 million for the three months ended March 31, 2016 and 2015. We had on-hand precious metals owned by participants in our precious metals consignment program of \$23.5 million at March 31, 2016, and \$20.5 million at December 31, 2015, measured at fair value based on market prices for identical assets and net of credits.

6. Property, Plant and Equipment

Property, plant and equipment is reported net of accumulated depreciation of \$435.1 million at March 31, 2016, and \$421.3 million at December 31, 2015. Unpaid capital expenditure liabilities, which are non-cash investing activities, were \$3.5 million at March 31, 2016, and \$4.0 million at March 31, 2015.

As discussed in Note 3 - Discontinued Operations, during the second quarter of 2014, our Europe-based Polymer Additives assets were classified as held-for-sale under ASC Topic 360, Property, Plant and Equipment. As such, at each reporting date, these assets are tested for impairment comparing the fair value of the assets less costs to sell to the carrying value. The fair value was determined using both the market approach and income approach, utilizing Level 3 measurements within the fair value hierarchy, which indicated the fair value less costs to sell was less than the carrying value. As a result of the current quarter analysis, the assets had a carrying value that exceeded fair value, resulting in an impairment charge of \$24.1 million during the three months ended March 31, 2016. The impairment charge of \$24.1 million is included in Loss from discontinued operations, net of income taxes in our condensed consolidated statements of operations for the three months ended March 31, 2016.

The following table presents information about the Company's impairment charges on assets that were measured on a fair value basis for the three months ended March 31, 2016, and for the year ended December 31, 2015. The table also indicates the fair value hierarchy of the valuation techniques used by the Company to determine the fair value:

Table of Contents

Description	Fair Value Measurements Using				Total (Losses)
	Level 1	Level 2	Level 3	Total	
	(Dollars in thousands)				
March 31, 2016					
Assets held for sale	\$ —	\$ —	\$ 11,639	\$ 11,639	\$ (24,059)
December 31, 2015					
Assets held for sale	\$ —	\$ —	\$ 33,711	\$ 33,711	\$ (11,792)

The inputs to the valuation techniques used to measure fair value are classified into the following categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

7. Goodwill and Other Intangible Assets

	\$ 42,769	\$ 49,450	\$ 58,345	\$ 150,564

(1) During the first quarter of 2016, the Company recorded goodwill related to the Ferer acquisition. Refer to Note 4 for additional details.

Goodwill is calculated as the excess of the purchase price over the estimated fair values of the assets acquired and the liabilities assumed in the acquisition.

Goodwill is tested for impairment at the reporting unit level on an annual basis in the fourth quarter and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. As of March 31, 2016, the Company is not aware of any events or circumstances that occurred which would require a goodwill impairment test.

Credit Facility

On July 31, 2014, the Company entered into a credit facility (the “Credit Facility”) with a group of lenders to refinance the majority of its then outstanding debt. The Credit Facility consisted of a \$200 million secured revolving line of credit with a term of five years and a \$300 million secured term loan facility with a term of seven years. On January 25, 2016, the Company amended the Credit Facility by entering into the Incremental Assumption Agreement (the “Incremental Agreement”) to increase the revolving line of credit commitment amount from \$200 million to \$300 million. The Company then used a portion of the increase in the revolving line of credit to repay \$50 million of the term loan facility. The Credit Facility was amended and a portion of the outstanding term loans were repaid to increase the amount of total liquidity available under the Credit Facility and reduce the total cost of borrowings.

Principal payments on the term loan facility of \$0.75 million quarterly, are payable commencing December 31, 2014, with the remaining balance due on the maturity date. At March 31, 2016, the Company had borrowed \$245.5 million under the term loan facility, taking into account all prior quarterly payments and the \$50 million prepayment that was made in January 2016, at an annual rate of 4.0%. There are no additional borrowings available under the term loan facility.

Subject to certain conditions, the Company can request up to \$100 million of additional commitments under the Credit Facility, though the lenders are not required to provide such additional commitments. In addition, up to \$100 million of the revolving line of credit will be available to certain of the Company’s subsidiaries in the form of revolving loans denominated in Euros.

Certain of the Company’s U.S. subsidiaries have guaranteed the Company’s obligations under the Credit Facility and such obligations are secured by (a) substantially all of the personal property of the Company and the U.S. subsidiary guarantors and (b) a pledge of 100% of the stock of most of the Company’s U.S. subsidiaries and 65% of most of the stock of the Company’s first tier foreign subsidiaries.

Interest Rate – Term Loan: The interest rates applicable to the term loans will be, at the Company’s option, equal to either a base rate or a London Interbank Offered Rate (“LIBOR”) rate plus, in both cases, an applicable margin.

- The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) PNC’s prime rate or (iii) the daily LIBOR rate plus 1.00%.
- The applicable margin for base rate loans is 2.25%.
- The LIBOR rate will be set as quoted by Bloomberg and shall not be less than 0.75%.
- The applicable margin for LIBOR rate loans is 3.25%.
- For LIBOR rate loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.

Interest Rate – Revolving Credit Line: The interest rates applicable to loans under the revolving credit line will be, at the Company’s option, equal to either a base rate or a LIBOR rate plus an applicable variable margin. The variable margin will be based on the ratio of (a) the Company’s total consolidated debt outstanding at such time to (b) the Company’s consolidated EBITDA computed for the period of four consecutive fiscal quarters most recently ended.

- The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) PNC’s prime rate or (iii) the daily LIBOR rate plus 1.00%.
- The applicable margin for base rate loans will vary between 1.50% and 2.00%.
- The LIBOR rate will be set as quoted by Bloomberg for U.S. Dollars.
- The applicable margin for LIBOR Rate Loans will vary between 2.50% and 3.00%.
- For LIBOR rate loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.

At March 31, 2016, the Company had borrowed \$247.6 million under the revolving credit facilities at an annual weighted average interest rate of 3.4%. The borrowing on the revolving credit facilities was used to fund the acquisitions, the share repurchase program, and for other general business use. After reductions for outstanding letters of credit secured by these facilities, we had \$48.0 million of additional borrowings available under the revolving credit facilities at March 31, 2016.

Table of Contents

The Credit Facility contains customary restrictive covenants including, but not limited to, limitations on use of loan proceeds, limitations on the Company's ability to pay dividends and repurchase stock, limitations on acquisitions and dispositions and limitations on certain types of investments. The Credit Facility also contains standard provisions relating to conditions of borrowing and customary events of default, including the non-payment of obligations by the Company and the bankruptcy of the Company.

Specific to the revolving credit facility, the Company is subject to financial covenants regarding the Company's outstanding net indebtedness and interest coverage ratios.

If an event of default occurs, all amounts outstanding under the Credit Facility may be accelerated and become immediately due and payable. At March 31, 2016, we were in compliance with the covenants of the Credit Facility.

Other Financing Arrangements

We maintain other lines of credit to provide global flexibility for our short-term liquidity requirements. These facilities are uncommitted lines for our international operations and totaled \$7.9 million and \$8.0 million at March 31, 2016 and December 31, 2015, respectively. The unused portions of these lines provided additional liquidity of \$6.6 million at March 31, 2016, and \$7.3 million at December 31, 2015.

(1) The carrying value of the term loan facility is net of unamortized debt issuance costs.

The fair values of cash and cash equivalents are based on the fair values of identical assets. The fair values of loans payable are based on the present value of expected future cash flows and approximate their carrying amounts due to the short periods to maturity. The fair values of the term loan facility, the revolving credit facility and other long-term notes payable are based on the present value of expected future cash flows and interest rates that would be currently available to the Company for issuance of similar types of debt instruments with similar terms and remaining maturities adjusted for the Company's non-performance risk.

Foreign currency forward contracts. We manage foreign currency risks principally by entering into forward contracts to mitigate the impact of currency fluctuations on transactions. These forward contracts are not formally designated as hedges. Gains and losses on these foreign currency forward contracts are netted with gains and losses from currency fluctuations on transactions arising from international trade and reported as Foreign currency losses, net in the condensed consolidated statements of operations. We recognized net foreign currency losses of \$1.6 million and \$1.7 million in the three months ended March 31, 2016, and March 31, 2015, respectively, which is primarily comprised of the foreign exchange impact on transactions in countries where it is not economically feasible for us to enter into hedging arrangements and hedging inefficiencies, such as timing of transactions. We recognized net losses of \$10.6 million in the three months ended March 31, 2016, and net gains of \$1.6 million in the three months ended March 31, 2015, arising from the change in fair value of our financial instruments, which offset the related net gains and losses on international trade transactions. The fair values of these contracts are based on market prices for comparable contracts. The notional amount of foreign currency forward contracts was \$332.7 million at March 31, 2016, and \$338.4 million at December 31, 2015.

The following table presents the effect on our condensed consolidated statements of operations for the three months ended March 31, 2016 and 2015, respectively, of our foreign currency forward contracts:

	Amount of (Loss) Gain Recognized in Earnings Three Months Ended March 31, 2016 2015		Location of (Loss) Gain in Earnings

10. Income Taxes

During the first quarter of 2016, income tax expense was \$8.0 million, or 28.9% of pre-tax income. In the first quarter of 2015, we recorded tax expense of \$2.5 million, or 15.9% of pre-tax income. The tax expense in the first quarter of 2016 and 2015, as a percentage of pre-tax income, is lower than the U.S. federal statutory income tax rate of 35% primarily as a result of foreign statutory rate differences. The first quarter 2015 tax expense was further lowered as a result of a release of a portion of the net valuation allowance that was recorded against the net deferred tax assets as the consequence of accounting for an acquisition in that period.

11. Contingent Liabilities

We have recorded environmental liabilities of \$7.6 million at March 31, 2016, and \$7.4 million at December 31, 2015, for costs associated with the remediation of certain of our properties that have been contaminated. The balance at March 31, 2016, and December 31, 2015, was primarily comprised of liabilities related to a non-operating facility

in Brazil, and for retained environmental obligations related to a site in the United States that was part of the sale of our North American and Asian metal powders product lines in 2013. The costs include legal and consulting fees, site studies, the design and implementation of remediation plans, post-remediation monitoring and related activities. The ultimate liability could be affected by numerous uncertainties, including the extent of contamination found, the required period of monitoring and the ultimate cost of required remediation.

Table of Contents

In the fourth quarter of 2013, the Supreme Court in Argentina ruled unfavorably related to certain export taxes associated with a divested operation. As a result of this ruling, we have recorded a \$8.0 million and a \$7.8 million liability at March 31, 2016, and December 31, 2015, respectively.

There are various lawsuits and claims pending against the Company and its consolidated subsidiaries. We do not currently expect the resolution of these lawsuits and claims to materially affect the consolidated financial position, results of operations, or cash flows of the Company.

12. Retirement Benefits

Net periodic benefit (credit) cost of our U.S. pension plans (including our unfunded nonqualified plans), non-U.S. pension plans, and postretirement health care and life insurance benefit plans for the three months ended March 31, 2016 and 2015, respectively, follow:

	U.S. Pension Plans		Non-U.S. Pension Plans		Other Benefit Plans	
	2016	2015	2016	2015	2016	2015
	(Dollars in thousands)					
Service cost	\$ 4	\$ 5	\$ 363	\$ 391	\$ —	\$ —
Interest cost	3,937	4,697	939	923	236	242
Expected return on plan assets	(4,935)	(7,291)	(520)	(674)	—	—
Amortization of prior service cost	3	3	11	15	—	—
Net periodic benefit (credit) cost	\$ (991)	\$ (2,586)	\$ 793	\$ 655	\$ 236	\$ 242

Net periodic benefit (credit) for our U.S. pension plans for the three months ended March 31, 2016, decreased from the effect of a lower expected return on plan assets. Net periodic benefit cost for our non-U.S. pension plans and our postretirement health care and life insurance benefit plans did not change significantly compared with the prior-year same period.

In 2015, the Company initiated and executed on a buyout of terminated vested participants in our U.S defined benefit pension plan. In October 2015, the buyout was funded and reduced plan assets and liability by approximately \$71 million.

13. Stock-Based Compensation

On May 22, 2013, our shareholders approved the 2013 Omnibus Incentive Plan (the “Plan”), which was adopted by the Board of Directors on February 22, 2013, subject to shareholder approval. The Plan’s purpose is to promote the Company’s long-term financial interests and growth by attracting, retaining and motivating high quality key employees and directors, motivating such employees and directors to achieve the Company’s short- and long-range performance goals and objectives and thereby align their interests with those of the Company’s shareholders. The Plan reserves 4,400,000 shares of common stock to be issued for grants of several different types of long-term incentives including stock options, stock appreciation rights, restricted shares, performance shares, other common stock based awards, and dividend equivalent rights.

In the first quarter of 2016, our Board of Directors granted 0.3 million stock options, 0.3 million performance share units and 0.2 million deferred stock units under the Plan.

Table of Contents

We estimate the fair value of each stock option on the date of grant using the Black-Scholes option pricing model. The following table details the weighted-average grant-date fair values and the assumptions used for estimating the fair values of stock option grants made during the three months ended March 31, 2016:

	Stock Options
Weighted-average grant-date fair value	\$ 4.92
Expected life, in years	6.0
Risk-free interest rate	1.6 %
Expected volatility	53.6 %

The weighted average grant date fair value of our performance share units granted in the three months ended March 31, 2016, was \$10.02. We measure the fair value of performance share units based on the closing market price of our common stock on the date of the grant. These shares are evaluated each reporting period for likelihood of achieving the performance criteria.

We measure the fair value of deferred stock units based on the closing market price of our common stock on the date of the grant which is when the awards immediately vest. The weighted-average fair value per unit for grants made during the three months ended March 31, 2016, was \$9.66.

We recognized stock-based compensation expense of \$1.6 million for the three months ended March 31, 2016, and \$2.1 million for the three months ended March 31, 2015. At March 31, 2016, unearned compensation cost related to the unvested portion of all stock-based awards was approximately \$11.4 million and is expected to be recognized over the remaining vesting period of the respective grants, through the first quarter of 2019.

14. Restructuring and Cost Reduction Programs

In 2013, we initiated a Global Cost Reduction Program that was designed to address 3 key areas of the company - (1) business realignment, (2) operational efficiency and (3) corporate and back office functions. Business realignment was targeted at right-sizing our commercial management organizations globally. The operational efficiency component of the program was designed to improve the efficiency of our plant operations and supply chain. The corporate and back office initiative is principally comprised of work that we are doing with our strategic partners in the areas of finance and accounting and information technology outsourcing, and procurement. The restructuring charges for the three months ended March 31, 2016, primarily consists of implementing this strategy for our recently acquired acquisitions. The cumulative charges incurred to date associated with these programs are \$50.5 million. Total costs related to the program expected to be incurred, as of March 31, 2016, are approximately \$50.5 million. Total restructuring charges were \$0.9 million and \$0.4 million for the three months ended March 31, 2016, and March 31, 2015, respectively.

The activities and accruals related to our restructuring and cost reduction programs are summarized below:

	Employee Severance	Other Costs	Total
	(Dollars in thousands)		
Balances at December 31, 2015	\$ 693	\$ 2,077	\$ 2,770
Restructuring charges	532	349	881

Non-cash items	36	75	111
Balances at March 31, 2016	\$ 892	\$ 2,065	\$ 2,957

We expect to make cash payments to settle the remaining liability for employee termination benefits and other costs over the next twelve months, except where legal or contractual restrictions prevent us from doing so.

Weighted-average diluted shares outstanding	84,290	88,298
Diluted earnings per share from continuing operations attributable to Ferro Corporation common shareholders	\$ 0.23	\$ 0.17

The number of anti-dilutive or unearned shares was 2.8 million for the three months ended March 31, 2016, and 1.5 million for the three months ended March 31, 2015. These shares were excluded from the calculation of diluted earnings per share due to their anti-dilutive impact.

16. Share Repurchase Program

On July 29, 2015, the Company's Board of Directors approved a share repurchase program, under which the Company was authorized to repurchase up to \$25 million of the Company's outstanding shares of Common Stock on the open market, including through a Rule 10b5-1 plan, or in privately negotiated transactions. On October 16, 2015, and

February 18, 2016, the Company's Board of Directors approved follow-on share repurchase programs, authorizing the Company to repurchase an additional \$25 million of the Company's outstanding shares of common stock under each program.

The timing and amount of shares to be repurchased will be determined by the Company, based on evaluation of market and business conditions, share price, and other factors. The share repurchase program does not obligate the Company to repurchase any dollar amount or number of common shares, and may be suspended or discontinued at any time.

The Company repurchased 1,175,437 shares of common stock in the three months ended March 31, 2016, at an average price of \$9.72 per share for a total cost of \$11.4 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

During the three months ended March 31, 2016, net sales increased by \$14.7 million, or 5.6%, compared with the prior-year same period. The increase in net sales was primarily driven by sales from Nubiola of \$33.4 million, which was acquired in the third quarter of 2015. During the three months ended March 31, 2016, gross profit increased \$13.6 million, or 19.2%, compared with the prior-year same period; and, as a percentage of net sales, it increased approximately 350 basis points to 30.4%. The increase was primarily driven by increased gross profit from Nubiola of \$10.5 million.

For the three months ended March 31, 2016, selling, general and administrative ("SG&A") expenses increased \$3.2 million, or 6.5%, compared with the prior-year same period. The increase was primarily driven by increased SG&A expenses from Nubiola of \$3.5 million.

For the three months ended March 31, 2016, net loss was \$9.7 million, compared with net income of \$9.0 million in 2015, and net loss attributable to common shareholders was \$10.0 million, compared with net income attributable to common shareholders of \$11.0 million in 2015. Income from continuing operations was \$19.8 million for the three months ended March 31, 2016, compared with income from continuing operations of \$13.0 million for the three months ended March 31, 2015. Our total gross profit for the first quarter of 2016 was \$84.2 million, compared with \$70.6 million for the three months ended March 31, 2015.

Outlook

During the first quarter of 2016, the Company delivered strong performance, despite challenging economic conditions in Latin America. For the quarter, sales increased by 6% due to recent acquisitions. In addition, gross profit, as a percentage of net sales, increased to 30.4% from 26.9%. Partially offsetting the higher gross profit were increased SG&A costs, primarily driven by the acquisitions. Our effective tax rate for the first quarter of 2016 was 28.9%, compared to 15.9% in the first quarter of 2015, driven by timing of the implementation of certain tax planning actions in 2016, and certain discrete items favorably impacting the first quarter of 2015. We continue to expect the full year 2016 tax rate to be in the range of 27% - 28%.

For the remainder of 2016, we anticipate benefitting from strategic actions taken to improve growth in our core businesses and will continue to benefit from recent acquisitions. We expect tile sales, particularly in Asia, the Middle East and Northern Africa, and Southern Europe will continue to stabilize and rebound, providing growth, in addition to recent acquisitions. Certain economies where we, or our customers, participate, however, are expected to remain weak, including Argentina and Brazil. The net impact is expected to result in increased sales growth over the remainder of the year, before consideration of foreign currency impacts. Gross profit as a percentage of net sales is expected to be greater than 2015 levels due to strong volumes and a richer product mix, in part due to increased sales of tile coatings.

We remain focused on the integration of Vetriceramici, Nubiola, Al Salomi and Ferer, and continue to work toward achieving the identified synergies. We will continue to focus on opportunities to optimize our cost structure and make our business processes and systems more efficient, and leverage tax planning opportunities. We continue to expect cash flow from operating activities will be positive for the year, providing additional liquidity to fund acquisitive growth.

Further, we are continuing efforts to divest our Europe-based Polymer Additives assets, including the Antwerp, Belgium dibenzoates manufacturing assets, and related Polymer Additives European headquarters and lab facilities. The assets associated with this facility are currently classified as held-for-sale on our condensed consolidated balance sheets.

Factors that could adversely affect our future performance include those described under the heading “Risk Factors” in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2015.

Results of Operations - Consolidated

Comparison of the three months ended March 31, 2016 and 2015

For the three months ended March 31, 2016, income from continuing operations was \$19.8 million, compared with \$13.0 million income from continuing operations for the three months ended March 31, 2015. Net loss was \$9.7 million, compared with net income of \$9.0 million for the three months ended March 31, 2015. For the three months ended March 31, 2016, net loss attributable to common shareholders was \$10.0 million, or loss per share of \$0.12, compared with net income attributable to common shareholders of \$11.0 million, or earnings per share of \$0.12, for the three months ended March 31, 2015.

Net Sales

Gross profit	\$ 84,229	\$ 70,635	\$ 13,594	19.2	%
Gross profit as a % of net sales	30.4	% 26.9			%

Net sales increased by \$14.7 million, or 5.6%, in the three months ended March 31, 2016, compared with the prior-year same period driven by higher sales in Pigments, Powders and Oxides of \$34.6 million, partially offset by lower sales in Performance Colors and Glass and Performance Coatings of \$11.3 million and \$8.7 million, respectively. The increase in net sales was primarily driven by the sales from Nubiola of \$33.4 million, which was acquired in the third quarter of 2015.

Gross Profit

Gross profit increased \$13.6 million, or 19.2%, in the three months ended March 31, 2016, compared to the prior-year same period, and as a percentage of net sales, it increased 350 basis points to 30.4%. The increase in gross profit was driven by Pigments, Powders and Oxides and Performance Coatings of \$12.4 million and \$3.2 million, respectively, partially offset by a decrease in Performance Colors and Glass of \$2.7 million. The increase was primarily due to higher sales volumes and mix of \$9.0 million, lower raw material costs of \$6.6 million and lower manufacturing costs of \$5.6 million, partially offset by unfavorable product pricing of \$5.2 million and unfavorable foreign currency impacts of \$3.1 million.

Net sales	\$ 277,451	\$ 262,772	\$ 14,679	5.6 %

The increase in net sales of \$14.7 million, compared with the prior-year same period, was driven by increases in Europe, Asia Pacific and the United States of \$12.9 million, \$4.0 million and \$1.4 million, respectively, partially offset by a decrease in Latin America of \$3.5 million. The increases in Europe and Asia Pacific were primarily attributable to Nubiola sales of \$12.9 million and \$4.0 million, respectively, which was acquired in the third quarter of 2015. The increase in the United States was attributable to Nubiola sales of \$8.8 million, partially offset by lower sales in Performance Colors and Glass of \$7.0 million and Performance Coatings of \$1.2 million. The decrease in Latin America was due to the sale of our interest in an operating affiliate in Venezuela (“Venezuela”) in the fourth quarter of 2015, which contributed \$4.5 million of the decrease.

SG&A expenses were \$3.2 million higher in the three months ended March 31, 2016, compared with the prior-year same period. Included in SG&A expenses were \$3.5 million and \$0.2 million of expenses attributable to Nubiola and Al Salomi, which were acquired in the third quarter of 2015 and the fourth quarter of 2015, respectively. The increase in pension and other postretirement benefits of \$1.7 million is a result of the effect of a lower expected return on plan assets. These increases were offset by lower stock-based compensation expense of \$0.5 million and lower business development expenses of \$0.5 million.

The following table presents SG&A expenses attributable to sales, research and development and operations costs as Strategic services and other SG&A costs as Functional services.

SG&A expenses were \$3.2 million higher in the three months ended March, 31, 2016, compared with the prior-year same period. The increase in strategic and functional services was driven by increased expenses from Nubiola of \$2.3 million and \$1.2 million, respectively, which was acquired in the third quarter of 2015.

Interest expense	\$ 4,847	\$ 3,150	\$ 1,697	53.9 %

Interest expense increased the first quarter of 2016 compared with the prior-year same period. The increase in interest expense was due to an increase in the average long-term debt balance for the three months ended March 31, 2016, compared with the prior-year same period.

Income Tax Expense

Table of Contents

During the first quarter of 2016, income tax expense was \$8.0 million, or 28.9% of pre-tax income. In the first quarter of 2015, we recorded tax expense of \$2.5 million, or 15.9% of pre-tax income. The tax expense in the first quarter of 2016 and 2015, as a percentage of pre-tax income, is lower than the U.S. federal statutory income tax rate of 35% primarily as a result of foreign statutory rate differences. The first quarter 2015 tax expense was further lowered as a result of a release of a portion of the net valuation allowance that was recorded against the net deferred tax assets as the consequence of accounting for an acquisition in that period.

Net sales declined in Performance Coatings compared with the prior-year same period, primarily driven by a decrease in sales of \$10.4 million in frits and glazes, \$3.3 million in porcelain enamel and \$1.4 million in other tile product lines, partially mitigated by an increase of \$0.8 million in color products and \$5.6 million in sales from Al Salomi, which was acquired in the fourth quarter of 2015. The decrease in net sales was driven by unfavorable foreign currency impacts of \$10.9 million and lower product pricing of \$6.5 million, partially mitigated by increased sales volume and mix of \$8.7 million. Gross profit increased \$3.2 million from the prior-year same period, primarily driven by lower manufacturing costs of \$5.0 million, higher sales volumes and mix of \$5.0 million, and lower raw materials of \$1.8 million, partially mitigated by unfavorable product pricing impacts of \$6.5 million and unfavorable foreign currency impacts of \$2.1 million.

The net sales decrease of \$8.7 million was driven by declines in Latin America, Asia Pacific and the United States, partially mitigated by an increase in Europe. The sales decline in Latin America was primarily driven by lower sales from Venezuela of \$4.5 million, which was sold in the fourth quarter of 2015, and lower sales in frits and glazes of \$6.9 million. The sales decline in Asia Pacific and the United States was driven by lower sales in porcelain enamel of \$1.6 million and \$1.2 million, respectively. The increase in sales in Europe was primary attributable to \$5.6 million in sales from Al Salomi, which was acquired in the fourth quarter of 2015.

The decrease in sales in the United States and Europe was attributable to lower sales across all product lines, and the decline in sales in Latin America was primarily due to

lower sales of decoration products of \$0.9 million. The increase in sales in Asia Pacific was primarily due to higher sales of automotive and decoration products of \$1.0 million and \$0.3 million, respectively, partially mitigated by lower sales in electronics and industrial products of \$0.3 million and \$0.2 million, respectively.

Cash flows from operating activities. Cash flows from operating activities increased in the first three months of 2016 compared with the prior-year same period. The increase was due to a noncash impairment charge of \$24.1 million associated with the Europe-based Polymer Additives assets that are classified as discontinued operations, offset by a decrease in net income. Also, driving the increase were decreased payments associated with incentive compensation, income taxes and retirement benefits in the three months ended March 31, 2016 compared with the prior-year same period, offset by lower cash flow from working capital.

Table of Contents

Cash flows from investing activities. Cash flows used in investing activities decreased \$8.6 million in the first three months of 2016 compared with the prior-year same period. The decrease was primarily due to lower capital expenditures of \$7.5 million and was primarily driven by the lower costs incurred for the Antwerp, Belgium facility which was substantially completed in the fourth quarter of 2015.

Cash flows from financing activities. Cash flows provided by financing activities increased \$21.7 million in the first three months of 2016 compared with the prior-year same period, primarily as a result of a net borrowing increase of \$33.8 million, partially offset by the purchase of treasury stock of \$11.4 million.

Capital Resources and Liquidity

Credit Facility

On July 31, 2014, the Company entered into a credit facility (the “Credit Facility”) with a group of lenders to refinance the majority of its then outstanding debt. The Credit Facility consisted of a \$200 million secured revolving line of credit with a term of five years and a \$300 million secured term loan facility with a term of seven years. On January 25, 2016, the Company amended the Credit Facility by entering into the Incremental Assumption Agreement (the “Incremental Agreement”) to increase the revolving line of credit commitment amount from \$200 million to \$300 million. The Company then used a portion of the increase in the revolving line of credit to repay \$50 million of the term loan facility. The Credit Facility was amended and a portion of the outstanding term loans were repaid to increase the amount of total liquidity available under the Credit Facility and reduce the total cost of borrowings.

Principal payments on the term loan facility of \$0.75 million quarterly, are payable commencing December 31, 2014, with the remaining balance due on the maturity date. At March 31, 2016, the Company had borrowed \$245.5 million under the term loan facility, taking into account all prior quarterly payments and the \$50 million prepayment that was made in January 2016, at an annual rate of 4.0%. There are no additional borrowings available under the term loan facility.

Subject to certain conditions, the Company can request up to \$100 million of additional commitments under the Credit Facility, though the lenders are not required to provide such additional commitments. In addition, up to \$100 million of the revolving line of credit will be available to certain of the Company’s subsidiaries in the form of revolving loans denominated in Euros.

Certain of the Company’s U.S. subsidiaries have guaranteed the Company’s obligations under the Credit Facility and such obligations are secured by (a) substantially all of the personal property of the Company and the U.S. subsidiary guarantors and (b) a pledge of 100% of the stock of most of the Company’s U.S. subsidiaries and 65% of most of the stock of the Company’s first tier foreign subsidiaries.

Interest Rate – Term Loan: The interest rates applicable to the term loans will be, at the Company’s option, equal to either a base rate or a London Interbank Offered Rate (“LIBOR”) rate plus, in both cases, an applicable margin.

- The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) PNC’s prime rate or (iii) the daily LIBOR rate plus 1.00%.

- The applicable margin for base rate loans is 2.25%.
 - The LIBOR rate will be set as quoted by Bloomberg and shall not be less than 0.75%.
 - The applicable margin for LIBOR rate loans is 3.25%.
 - For LIBOR rate loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.
- Interest Rate – Revolving Credit Line: The interest rates applicable to loans under the revolving credit line will be, at the Company’s option, equal to either a base rate or a LIBOR rate plus an applicable variable margin. The variable margin will be based on the ratio of (a) the Company’s total consolidated debt outstanding at such time to (b) the Company’s consolidated EBITDA computed for the period of four consecutive fiscal quarters most recently ended.
- The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) PNC’s prime rate or (iii) the daily LIBOR rate plus 1.00%.
 - The applicable margin for base rate loans will vary between 1.50% and 2.00%.

Table of Contents

- The LIBOR rate will be set as quoted by Bloomberg for U.S. Dollars.
 - The applicable margin for LIBOR Rate Loans will vary between 2.50% and 3.00%.
 - For LIBOR rate loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.
- At March 31, 2016, the Company had borrowed \$247.6 million under the revolving credit facilities at a weighted average interest rate of 3.4%. The borrowing on the revolving credit facility was used to fund the acquisitions, the share repurchase program, and for other general business use. After reductions for outstanding letters of credit secured by these facilities, we had \$48.0 million of additional borrowings available at March 31, 2016.

The Credit Facility contains customary restrictive covenants including, but not limited to, limitations on use of loan proceeds, limitations on the Company's ability to pay dividends and repurchase stock, limitations on acquisitions and dispositions and limitations on certain types of investments. The Credit Facility also contains standard provisions relating to conditions of borrowing and customary events of default, including the non-payment of obligations by the Company and the bankruptcy of the Company.

Specific to the revolving credit facility, the Company is subject to financial covenants regarding the Company's outstanding net indebtedness and interest coverage ratios.

If an event of default occurs, all amounts outstanding under the Credit Facility may be accelerated and become immediately due and payable. At March 31, 2016, we were in compliance with the covenants of the Credit Facility.

Off Balance Sheet Arrangements

Consignment and Customer Arrangements for Precious Metals. We use precious metals, primarily silver, in the production of some of our products. We obtain most precious metals from financial institutions under consignment agreements (generally referred to as our precious metals consignment program). The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign and the period of consignment. These fees were \$0.2 million for the three months ended March 31, 2016 and 2015. We had on hand precious metals owned by participants in our precious metals program of \$23.5 million at March 31, 2016, and \$20.5 million at December 31, 2015, measured at fair value based on market prices for identical assets and net of credits.

The consignment agreements under our precious metals program involve short-term commitments that typically mature within 30 to 90 days of each transaction and are typically renewed on an ongoing basis. As a result, the Company relies on the continued willingness of financial institutions to participate in these arrangements to maintain this source of liquidity. On occasion, we have been required to deliver cash collateral. While no deposits were outstanding at March 31, 2016, or December 31, 2015, we may be required to furnish cash collateral in the future based on the quantity and market value of the precious metals under consignment and the amount of collateral-free lines provided by the financial institutions. The amount of cash collateral required is subject to review by the financial institutions and can be changed at any time at their discretion, based in part on their assessment of our creditworthiness.

Bank Guarantees and Standby Letters of Credit.

At March 31, 2016, the Company and its subsidiaries had bank guarantees and standby letters of credit issued by financial institutions that totaled \$6.1 million. These agreements primarily relate to Ferro's insurance programs, foreign energy purchase contracts and foreign tax payments.

Other Financing Arrangements

We maintain other lines of credit to provide global flexibility for Ferro's short-term liquidity requirements. These facilities are uncommitted lines for our international operations and totaled \$7.9 million and \$8.0 million at March 31, 2016 and December 31, 2015, respectively. We had \$6.6 million and \$7.3 million of additional borrowings available under these lines at March 31, 2016 and December 31, 2015, respectively.

Liquidity Requirements

Our primary sources of liquidity are available cash and cash equivalents, available lines of credit under the revolving credit facility, and cash flows from operating activities. As of March 31, 2016 we had \$55.9 million of cash and cash equivalents. Substantially all of our cash and cash equivalents were held by foreign subsidiaries. Cash generated in the U.S. is generally used to

Table of Contents

pay down amounts outstanding under our revolving credit facility and for general corporate purposes, including acquisitions. If needed, we could repatriate the majority of cash held by foreign subsidiaries without the need to accrue and pay U.S. income taxes. We do not anticipate a liquidity need requiring such repatriation of these funds to the U.S.

Our liquidity requirements primarily include debt service, purchase commitments, labor costs, working capital requirements, restructuring expenditures, capital investments, precious metals cash collateral requirements, and postretirement obligations. We expect to meet these requirements in the long term through cash provided by operating activities and availability under existing credit facilities or other financing arrangements. Cash flows from operating activities are primarily driven by earnings before noncash charges and changes in working capital needs. We had additional borrowing capacity of \$54.6 million at March 31, 2016, and \$32.9 million at December 31, 2015, available under our various credit facilities, primarily our revolving credit facility.

Our revolving credit facility subjects us to customary financial covenants, including a leverage ratio and an interest coverage ratio. These covenants under our credit facility restrict the amount of our borrowings, reducing our flexibility to fund ongoing operations and strategic initiatives.

The most critical of these ratios is the leverage ratio for the revolving credit facility. As of March 31, 2016, we were in compliance with our maximum leverage ratio covenant of 3.75x as our actual ratio was 3.23x, providing \$21.9 million of EBITDA cushion on the leverage ratio, as defined within the Credit Facility. To the extent that economic conditions in key markets deteriorate or we are unable to meet our business projections and EBITDA falls below approximately \$130 million for rolling four quarters, based on reasonably consistent debt levels with those as of December 31, 2015, we could become unable to maintain compliance with our leverage ratio covenant. In such case, our lenders could demand immediate payment of outstanding amounts and we would need to seek alternate financing sources to pay off such debts and to fund our ongoing operations. Such financing may not be available on favorable terms, if at all.

Difficulties experienced in global capital markets could affect the ability or willingness of counterparties to perform under our various lines of credit, forward contracts, and precious metals program. These counterparties are major, reputable, multinational institutions, all having investment-grade credit ratings, except for one, which is not rated. Accordingly, we do not anticipate counterparty default. However, an interruption in access to external financing could adversely affect our business prospects and financial condition.

We assess on an ongoing basis our portfolio of businesses, as well as our financial and capital structure, to ensure that we have sufficient capital and liquidity to meet our strategic objectives. As part of this process, from time to time we evaluate the possible divestiture of businesses that are not critical to our core strategic objectives and, where appropriate, pursue the sale of such businesses and assets. We also evaluate and pursue acquisition opportunities that we believe will enhance our strategic position. Generally, we publicly announce divestiture and acquisition transactions only when we have entered into definitive agreements relating to those transactions.

Critical Accounting Policies and Their Application

There were no material changes to our critical accounting policies described in “Critical Accounting Policies” within Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2015.

Impact of Newly Issued Accounting Pronouncements

Refer to Note 2 to the condensed consolidated financial statements under Item 1 of this Quarterly Report on Form 10-Q for a discussion of accounting standards we recently adopted or will be required to adopt.

Risk Factors

Certain statements contained here and in future filings with the SEC reflect the Company's expectations with respect to future performance and constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are subject to a variety of uncertainties, unknown risks and other factors concerning the Company's operations and business environment, which are difficult to predict and are beyond the control of the Company. Factors that could adversely affect our future financial performance include those

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our exposure to instruments that are sensitive to fluctuations in interest rates, foreign currency exchange rates, and costs of raw materials and energy.

Our exposure to interest rate risk arises from our debt portfolio. We manage this risk by controlling the mix of fixed versus variable-rate debt after considering the interest rate environment and expected future cash flows. Our objective is to limit variability in earnings, cash flows and overall borrowing costs caused by changes in interest rates, while preserving operating flexibility.

We operate internationally and enter into transactions denominated in foreign currencies. These transactions expose us to gains and losses arising from exchange rate movements between the dates foreign currencies are recorded and the dates they are settled. We manage this risk by entering into forward currency contracts that substantially offset these gains and losses.

The notional amounts, carrying amounts of assets (liabilities), and fair values associated with our exposure to these market risks and sensitivity analysis about potential gains (losses) resulting from hypothetical changes in market rates are presented below:

	March 31, 2016	December 31, 2015
	(Dollars in thousands)	
Variable-rate debt:		
Carrying amount	\$ 488,792	\$ 461,717

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Ferro is committed to maintaining disclosure controls and procedures that are designed to ensure that information required to be disclosed in its Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to its management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(b) of the Exchange Act, Ferro has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. The evaluation examined those disclosure controls and procedures as of March 31, 2016, the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that the disclosure controls and procedures were effective as of March 31, 2016.

Changes in Internal Control over Financial Reporting

During the first quarter of 2016, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

There are various lawsuits and claims pending against the Company and its consolidated subsidiaries. We do not currently expect the resolution of such matters to materially affect the consolidated financial position, results of operations, or cash flows of the Company.

Item 1A. Risk Factors

There were no material changes to the risk factors disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our ability to pay common stock dividends is limited by certain covenants in our Credit Facility other than dividends payable solely in Capital Securities, as defined in the agreement.

The following table summarizes purchases of our common stock by the Company and affiliated purchasers during the three months ended March 31, 2016:

	Total Number of Shares Purchased (1) (Dollars in thousands, except for per share amounts)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Amount that May Yet Be Purchased Under the Plans or Programs
