2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States (“GAAP”).

The condensed consolidated financial statements include the financial position and results of operations of the Company and its consolidated subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting of normal recurring accruals, which are necessary for the fair presentation of the financial condition and results of operations for the interim periods presented.

The accompanying condensed consolidated financial statements were prepared in accordance with the requirements for interim financial information. Accordingly, these interim financial statements have not been audited and exclude certain disclosures required for annual financial statements. Also, the operating results presented for interim periods are not necessarily indicative of the results that may be expected for any other interim period or for the entire year. These interim financial statements should be read in conjunction with the audited consolidated financial statements of the Company included in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported and disclosed. Such estimates are based on management's historical

experience and best judgment after considering past, current and expected events and economic conditions. Actual results could differ significantly from management's estimates.

Reclassifications

During the second quarter of 2018, the Company identified certain immaterial classification errors on the Company's Consolidated Statements of Cash Flows and determined that, in the Quarterly Report on Form 10-Q for the quarter ended June 30, 2018 and future periodic reports, the Company will correct these classification errors. One classification error will be corrected by including within the changes in operating assets and liabilities in the operating activities section a new line item for "Interest receivable." A corresponding adjustment will be recorded to reduce the amount of "Notes receivable"

Table of Contents

issuances" within investing activities on the consolidated statement of cash flows. These reclassifications totaled \$7.1 million, \$3.2 million, and \$0.1 million during the years ended December 31, 2017, 2016, and 2015, respectively and \$5.0 million for the nine months ended September 30, 2017. These reclassifications will decrease "Net cash provided by operating activities" and "Net cash used for investing activities" by an equal and offsetting amount. These reclassifications will not have any impact on the Consolidated Balance Sheets, Consolidated Statements of Income, Consolidated Statement of Equity, or any other operating measure for the periods affected.

These amounts were previously presented as "Notes receivable issuances," a component of net cash used for investing activities on the Consolidated Statements of Cash Flows, resulting in overstatements in cash provided by operating activities and overstatements of cash used in investing activities. These amounts represent interest earned on mezzanine loans that were funded by additional borrowings as provided for in the mezzanine loan agreements. These amounts are now classified as changes in interest receivable, a non-cash adjustment to calculate net cash provided by operating activities.

The second classification error will be corrected by including within financing activities on the Consolidated Statements of Cash Flows a new line item for "Common shares tendered for tax withholding." A corresponding adjustment will be recorded to the "Changes in operating assets and liabilities: Property liabilities" within operating activities on the Consolidated Statements of Cash Flows. This reclassification totaled \$0.3 million, \$0.2 million, and \$0.3 million during the years ended December 31, 2017, 2016, and 2015, respectively and \$0.3 million for the nine months ended September 30, 2017. These reclassifications will increase "Net cash provided by operating activities" and decrease "Net cash provided by financing activities" by an equal and offsetting amount.

Significant Accounting Policies

General Contracting and Real Estate Services Revenues

On January 1, 2018, the Company adopted the new accounting standard codified in Accounting Standards Codification 606 - Revenue from Contracts with Customers (see also "Recent Accounting Pronouncements" below). The Company recognizes general contracting revenues as a customer obtains control of promised goods or services in an amount that reflects the consideration the Company expects to receive in exchange for those goods or services. For each construction contract, the Company identifies the performance obligations, which typically include the delivery of a single building constructed according to the specifications of the contract. The Company estimates the total transaction price, which generally includes a fixed contract price and may also include variable components such as early completion bonuses, liquidated damages, or cost savings to be shared with the customer. Variable components of the contract price are included in the transaction price to the extent that it is probable that a significant reversal of revenue will not occur. The Company recognizes the estimated transaction price as revenue as it satisfies its performance obligations, and the Company estimates its progress in satisfying performance obligations for each contract using the percentage-of-completion method, based on the proportion of incurred costs to total estimated construction costs at completion. Construction contract costs include all direct material, direct labor, subcontract costs, and overhead costs directly related to contract performance. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions and final contract settlements, are all significant judgments that may result in revisions to costs and income and are recognized in the period in which they are determined. Provisions for estimated losses on uncompleted contracts are recognized immediately in the period in which such losses are determined. The Company defers pre-contract costs when such costs are directly associated with specific anticipated contracts and their recovery is probable.

The Company recognizes real estate services revenues from property development and management services as it satisfies its performance obligations under these service arrangements.

The Company assesses whether multiple contracts with a single counterparty should be combined into a single contract for revenue recognition purposes based on factors such as the timing of the negotiation and execution of the contracts and whether the economic substance of the contracts was contemplated separately or in tandem.

See the Company's Annual Report on Form 10-K for the year ended December 31, 2017 for a description of other accounting principles upon which basis the accompanying consolidated financial statements were prepared.

Table of Contents

Recent Accounting Pronouncements

On May 28, 2014, the Financial Accounting Standards Board ("FASB") issued a new standard that provides a single, comprehensive model for recognizing revenue from contracts with customers. While the new standard does not supersede the guidance on accounting for leases, it changes the way the Company recognizes revenue from construction and development contracts with third party customers. The Company adopted this standard on January 1, 2018 using the modified retrospective method, applying this standard to all contracts not yet completed as of that date. In applying the standard to the Company's future construction contracts, certain pre-contract costs incurred by the Company are now deferred and amortized over the period during which construction obligations are fulfilled. Previously, these costs were immediately recorded as general contracting expenses upon commencement of construction, with the corresponding general contracting revenue also recorded. Applying the standard to the Company's uncompleted contracts as of January 1, 2018 did not result in material differences to these contracts in aggregate, and no cumulative adjustment to distributions in excess of earnings was recorded as of January 1, 2018.

On February 25, 2016, the FASB issued a new lease standard that requires lessees to recognize most leases in their balance sheets as lease liabilities with corresponding right-of-use assets. The new standard also makes targeted changes to lessor accounting. The new standard will be effective for the Company on January 1, 2019 and requires a modified retrospective transition approach for all leases existing at, or entered into after, the beginning of the earliest comparative period presented, with an option to use certain transition relief. Management is currently evaluating the potential impact of the new standard on the Company's consolidated financial statements. The Company is the lessee on certain long-term ground leases, which represents a majority of the Company's current operating lease payments, and expects to record right-of-use assets and lease liabilities for these leases under the new standard. The Company anticipates utilizing certain transition relief under the new standard that will allow the Company not to apply certain aspects of the new standard to its existing leases.

In 2016, the FASB issued new guidance that addresses eight classification issues related to the statement of cash flows and requires the presentation of total changes in cash, cash equivalents, restricted cash, and restricted cash equivalents in the statement of cash flows. The Company adopted this new guidance on December 31, 2017, applying it retrospectively to each period presented. The new guidance requires that the statement of cash flows show changes in restricted cash in addition to changes in cash and cash equivalents. No additional changes were required to be made to the Company's consolidated statements of cash flows as a result of the new guidance. The following table sets forth the items from the Company's consolidated balance sheets that are included in cash, cash equivalents, and restricted cash in the consolidated statements of cash flows (in thousands):

	Balance as of			
	September 30, 2018	December 31, 2017	September 30, 2017	December 31, 2016

Table of Contents

The following table summarizes the changes made to net cash provided by operating activities, net cash used for investing activities, and net cash provided by financing activities in the consolidated statement of cash flows for the nine months ended September 30, 2017 on a retrospective basis (in thousands) as a result of the new guidance as well as the reclassification adjustments described in the "Reclassifications" section above:

	Nine months ended September 30, 2017
Operating activities as originally presented	\$36,598
Adjustment relating to restricted cash	(259)
Adjustment for shares tendered for tax withholding	289
Adjustment relating to interest income presentation	(4,962)
Operating activities after adjustments	\$31,666
Investing activities as originally presented	\$(69,485)
Adjustment relating to restricted cash	203
Adjustment relating to interest income presentation	4,962
Investing activities after adjustments	\$(64,320)
Financing activities as originally presented	\$30,666
Adjustment for shares tendered for tax withholding	(289)
Financing activities after adjustments	\$30,377

On February 22, 2017, the FASB issued new guidance that clarifies the scope and application of guidance on sales or transfers of nonfinancial assets and in substance nonfinancial assets to customers, including partial sales. The new guidance applies to all nonfinancial assets, including real estate, and defines an in substance nonfinancial asset. The Company adopted the new guidance on January 1, 2018, and it did not have a material impact on the Company's consolidated financial statements.

On August 28, 2017, the FASB issued new guidance that simplifies some of the requirements relating to accounting for derivatives and hedging. The new guidance eliminates the requirement to separately measure and report hedge ineffectiveness for a highly effective hedge and also simplifies certain documentation and assessment requirements relating to the determination of hedge effectiveness. The Company adopted this guidance effective July 1, 2018. The application of this guidance to hedging relationships could reduce or eliminate the gains and losses that would otherwise be recorded in net income for these derivative instruments.

3. Segments

Net operating income (segment revenues minus segment expenses) is the measure used by the Company's chief operating decision-maker to assess segment performance. Net operating income is not a measure of operating income or cash flows from operating activities as measured by GAAP and is not indicative of cash available to fund cash needs. As a result, net operating income should not be considered an alternative to cash flows as a measure of liquidity. Not all companies calculate net operating income in the same manner. The Company considers net operating income to be an appropriate supplemental measure to net income because it assists both investors and management in understanding the core operations of the Company's real estate and construction businesses.

Table of Contents

Net operating income of the Company's reportable segments for the three and nine months ended September 30, 2018 and 2017 was as follows (in thousands):

The credit facility includes an accordion feature that allows the total commitments to be increased to \$450.0 million, subject to certain conditions, including obtaining commitments from any one or more lenders. The revolving credit facility has a scheduled maturity date of October 26, 2021, with two six-month extension options, subject to certain conditions, including payment of a 0.075% extension fee at each extension. The term loan facility has a scheduled maturity date of October 26, 2022.

The credit agreement contains customary representations and warranties and financial and other affirmative and negative covenants. The Company's ability to borrow under the credit facility is subject to ongoing compliance with a number of financial covenants, affirmative covenants and other restrictions. The credit agreement includes customary events of default, in certain cases subject to customary cure periods. The occurrence of an event of default,

if not cured within the applicable cure period, would permit the lenders to, among other things, declare the unpaid principal, accrued and unpaid interest and all other amounts payable under the credit facility to be immediately due and payable.

The Company is currently in compliance with all covenants under the credit agreement.

12. Fair Value of Financial Instruments

Fair value measurements are based on assumptions that market participants would use in pricing an asset or a liability. The hierarchy for inputs used in measuring fair value is as follows:

Level 1—quoted prices in active markets for identical assets or liabilities

Level 2—observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3—unobservable inputs

Except as disclosed below, the carrying amounts of the Company's financial instruments approximate their fair values. Financial assets and liabilities whose fair values are measured on a recurring basis using Level 2 inputs consist of interest rate swaps and caps. The Company measures the fair values of these assets and liabilities based on prices provided by independent market participants that are based on observable inputs using market-based valuation techniques.

Financial assets and liabilities whose fair values are not measured at fair value but for which the fair value is disclosed include the Company's notes receivable and indebtedness. The fair value is estimated by discounting the future cash flows of each instrument at estimated market rates consistent with the maturity, credit characteristics, and other terms of the arrangements, which are Level 3 inputs under the fair value hierarchy.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. For disclosure purposes, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement.

The carrying amounts and fair values of the Company's financial instruments as of September 30, 2018 and December 31, 2017 were as follows (in thousands):

	September 30, 2018		December 31, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(Unaudited)			
Indebtedness	\$653,750	\$647,311	\$517,272	\$518,417
Notes receivable	\$100,486	\$100,486	\$83,058	\$83,058
Interest rate swap liabilities	63	63	69	69
Interest rate swap and cap assets	3,341	3,341	1,525	1,525

13. Related Party Transactions

The Company provides general contracting and real estate services to certain related party entities that are included in these condensed consolidated financial statements. Revenue from construction contracts with these entities for the three months ended September 30, 2018 and 2017 was less than \$0.1 million for each period, and gross profit from such contracts for the three months ended September 30, 2018 and 2017 was less than \$0.1 million for each period. Revenue from construction contracts with related party entities of the Company for the nine months ended September 30, 2018 and 2017 was \$1.5 million and \$7.4 million, respectively, and gross profit from such contracts for the nine months ended September 30, 2018 and 2017 was \$0.3 million and \$0.4 million, respectively.

In addition, affiliated entities also reimburse the Company for monthly maintenance and facilities management services provided to the properties. Cost reimbursements earned by the Company from affiliated entities were not significant for the three and nine months ended September 30, 2018 and 2017.

The Operating Partnership entered into tax protection agreements that indemnify certain directors and executive officers of the Company from their tax liabilities resulting from the potential future sale of certain of the Company's properties within seven (or, in a limited number of cases, ten) years of the completion of the Company's initial public offering and formation transactions completed on May 13, 2013. In addition, the tax protection agreements provide that the Operating Partnership will offer certain of the original contributors, including certain of the Company's directors and executive officers, the opportunity to guarantee debt, or, alternatively, to enter into a deficit restoration obligation, for ten years from the closing of the Company's initial public offering in a manner intended to provide an allocation of Operating Partnership liabilities to the partner for U.S. federal income tax purposes. Pursuant to these tax protection agreements, certain of the Company's

executive officers previously guaranteed approximately \$0.3 million of the Operating Partnership's outstanding debt. In September 2018, these officers were released from these guaranty obligations.

14. Commitments and Contingencies

Legal Proceedings

The Company is from time to time involved in various disputes, lawsuits, warranty claims, environmental and other matters arising in the ordinary course of business. Management makes assumptions and estimates concerning the likelihood and amount of any potential loss relating to these matters.

The Company currently is a party to various legal proceedings. Management accrues a liability for litigation if an unfavorable outcome is determined to be probable and the amount of loss can be reasonably estimated. If an unfavorable outcome is determined to be probable and a range of loss can be reasonably estimated, management accrues the best estimate within the range; however, if no amount within the range is a better estimate than any other, the minimum amount within the range is accrued. Legal fees related to litigation are expensed as incurred. Management does not believe that the ultimate outcome of these matters, either individually or in the aggregate, could have a material adverse effect on the Company's financial position or results of operations; however, litigation is subject to inherent uncertainties.

Under the Company's leases, tenants are typically obligated to indemnify the Company from and against all liabilities, costs and expenses imposed upon or asserted against it as owner of the properties due to certain matters relating to the operation of the properties by the tenant.

Commitments

The Company has a bonding line of credit for its general contracting construction business and is contingently liable under performance and payment bonds, bonds for cancellation of mechanics liens and defect bonds. Such bonds collectively totaled \$33.4 million and \$44.9 million as of September 30, 2018 and December 31, 2017, respectively.

The Operating Partnership has entered into standby letters of credit using the available capacity under the credit facility. Letters of credit generally are available for draw down in the event the Company does not perform. As of both September 30, 2018 and December 31, 2017, the Operating Partnership had total outstanding letters of credit of \$2.1 million. The amounts outstanding at September 30, 2018 and December 31, 2017 were comprised of a \$2.1 million letter of credit related to the guarantee on the 1405 Point senior construction loan.

Third Quarter 2018 and Recent Highlights

The following highlights our results of operations and significant transactions for the three months ended September 30, 2018 and other recent developments:

Net income of \$5.7 million, or \$0.09 per diluted share, compared to \$10.5 million, or \$0.17 per diluted share, for the three months ended September 30, 2017.

Funds from operations ("FFO") of \$15.9 million, or \$0.24 per diluted share, compared to \$15.5 million, or \$0.25 per diluted share, for the three months ended September 30, 2017. See "Non-GAAP Financial Measures."

Normalized funds from operations ("Normalized FFO") of \$15.7 million, or \$0.24 per diluted share, compared to \$15.5 million, or \$0.25 per diluted share, for the three months ended September 30, 2017. See "Non-GAAP Financial Measures."

In October 2018, the Company reached an agreement to sell its at-cost purchase option to the developer of The Residences at Annapolis Junction for \$5.0 million. The Company also agreed to extend the maturity of its mezzanine loan and allow the developer to refinance the project in order to realize the full potential value upon expected stabilization in 2019. The Company expects the developer to close on these transactions in the fourth quarter of 2018, at which time the Company anticipates repayment of approximately \$12.0 million on its mezzanine loan in addition to the \$5.0 million of option sale proceeds.

In October 2018, the Company announced its investment in Nexton Square, a new \$45.0 million lifestyle center in the greater Charleston, South Carolina MSA. The Company will provide mezzanine financing and construction management/development services for the project. The Company will also have a below market option to purchase the project upon completion.

During the quarter ended September 30, 2018, the Company completed the acquisition of Lexington Square, a new 85,000 square foot Lowes Foods-anchored retail center near Columbia, South Carolina for \$26.7 million of total consideration, a portion of which will be paid in Operating Partnership units.

- During the quarter ended September 30, 2018, the Company raised approximately \$10.6 million of gross proceeds through its at-the-market equity offering program at an average price of \$15.66 per share.

Segment Results of Operations

As of September 30, 2018, we operated our business in four segments: (i) office real estate, (ii) retail real estate, (iii) multifamily residential real estate and (iv) general contracting and real estate services, which are conducted through our taxable REIT subsidiaries ("TRS"). Net operating income (segment revenues minus segment expenses) ("NOI") is the measure used by management to assess segment performance and allocate our resources among our segments. NOI is not a measure of operating income or cash flows from operating activities as measured by accounting principles generally accepted in the United States ("GAAP") and is not indicative of cash available to fund cash needs. As a result, NOI should not be considered an alternative to cash flows as a measure of liquidity. Not all companies calculate NOI in the same manner. We consider NOI to be an appropriate supplemental measure to net income because it assists both investors and management in understanding the core operations of our real estate and construction businesses. See Note 3 to our condensed consolidated financial statements in Item 1 of this Quarterly Report on Form 10-Q for a reconciliation of NOI to net income.

We define same store properties as those properties that we owned and operated and that were stabilized for the entirety of both periods presented. We generally consider a property to be stabilized upon the earlier of: (i) the quarter after the property reaches 80% occupancy or (ii) the thirteenth quarter after the property receives its certificate of occupancy. Additionally, any property that is fully or partially taken out of service for the purpose of redevelopment is no longer considered stabilized until the redevelopment activities are complete and the asset is placed back into service.

Liquidity and Capital Resources

Overview

We believe our primary short-term liquidity requirements consist of general contractor expenses, operating expenses and other expenditures associated with our properties, including tenant improvements, leasing commissions and leasing incentives, dividend payments to our stockholders required to maintain our REIT qualification, debt service, capital expenditures, new real estate development projects, and strategic acquisitions. We expect to meet our short-term liquidity requirements through net cash provided by operations, reserves established from existing cash, borrowings under construction loans to fund new real estate development and construction, borrowings available under our credit facility, and net proceeds from the sale of common stock through our at-the-market continuous equity offering program (the "ATM Program"), which is discussed below.

Our long-term liquidity needs consist primarily of funds necessary for the repayment of debt at or prior to maturity, general contracting expenses, property development and acquisitions, tenant improvements, and capital improvements. We expect to meet our long-term liquidity requirements with net cash from operations, long-term secured and unsecured indebtedness, and the issuance of equity and debt securities. We also may fund property development and acquisitions and capital improvements using our credit facility pending long-term financing.

As of September 30, 2018, we had unrestricted cash and cash equivalents of \$17.7 million available for both current liquidity needs as well as development activities. We also had restricted cash of \$2.9 million available for property improvements and required maintenance. As of September 30, 2018, we had \$45.9 million of available borrowings under our credit facility to meet our short-term liquidity requirements and \$108.0 million of available borrowings under our construction loans to fund our development projects.

We addressed the five loans originally scheduled to mature during 2018. Both of the Columbus Village loans were paid off, and the Sandbridge Commons loan was extended for five years. On July 27, 2018, the Johns Hopkins Village loan was refinanced with a new loan that matures on August 7, 2025. Additionally, on October 12, 2018, the Lightfoot Marketplace loan was refinanced with a new loan that matures on October 12, 2023.

ATM Program

On February 26, 2018, we commenced our ATM Program through which we may, from time to time, issue and sell shares of our common stock having an aggregate offering price of up to \$125.0 million. During the nine months ended September 30, 2018, we issued and sold an aggregate of 4,227,978 shares of common stock at an average price of \$14.33 per share under the ATM Program, receiving net proceeds, after offering costs and commissions, of \$59.7 million.

Credit Facility

On October 26, 2017, we entered into an amended and restated credit agreement (the "credit agreement"), which provides for a \$300.0 million credit facility comprised of a \$150.0 million senior unsecured revolving credit facility (the "revolving credit facility") and a \$150.0 million senior unsecured term loan facility (the "term loan facility" and, together with the revolving credit facility, the "credit facility"), with a syndicate of banks. The credit facility replaced our prior \$150.0 million revolving credit facility, which was scheduled to mature on February 20, 2019, and our prior \$125.0 million term loan facility, which was scheduled to mature on February 20, 2021. We intend to use future borrowings under the credit facility for general corporate purposes, including funding acquisitions and development and redevelopment of properties in our portfolio and for working capital.

The credit facility includes an accordion feature that allows the total commitments to be increased to \$450.0 million, subject to certain conditions, including obtaining commitments from any one or more lenders. On March 28, 2018, our Operating Partnership increased the maximum commitments of the credit facility to \$330.0 million using the accordion feature, with an increase of the term loan facility to \$180.0 million. The revolving credit facility has a scheduled maturity date of October 26, 2021, with two six-month extension options, subject to certain conditions, including payment of a 0.075% extension fee at each extension. The term loan facility has a scheduled maturity date of October 26, 2022.

The revolving credit facility bears interest at LIBOR plus a margin ranging from 1.40% to 2.00%, and the term loan facility bears interest at LIBOR plus a margin ranging from 1.35% to 1.95%, in each case depending on our total leverage. We are also obligated to pay an unused commitment fee of 15 or 25 basis points on the unused portions of the commitments under the revolving credit facility, depending on the amount of borrowings under the credit facility. If we attain investment grade

credit ratings from S&P and Moody's, we may elect to have borrowings become subject to interest rates based on our credit ratings.

The Operating Partnership is the borrower under the credit facility, and its obligations under the credit facility are guaranteed by us and certain of its subsidiaries that are not otherwise prohibited from providing such guaranty.

Unencumbered interest coverage ratio (as defined in the credit agreement) of not less than 1.75 to 1.0;

Ratio of unencumbered NOI (as defined in the credit agreement) to all unsecured debt of not less than 12%;

Maintenance of a minimum of at least 15 unencumbered properties (as defined in the credit agreement) with an unencumbered asset value (as defined in the credit agreement) of not less than \$300.0 million at any time; and

Minimum occupancy rate (as defined in the credit agreement) for all unencumbered properties of not less than 80% at any time.

The credit facility limits our ability to pay cash dividends. However, so long as no default or event of default exists, the credit agreement allows us to pay cash dividends with respect to any 12-month period in an amount not to exceed the greater of: (i) 95% of adjusted funds from operations (as defined in the credit agreement) or (ii) the amount required for us (a) to maintain our status as a REIT and (b) to avoid income or excise tax under the Code. If certain defaults or events of default exist, we may pay cash dividends with respect to any 12-month period to the extent necessary to maintain our status as a REIT. The credit facility also restricts the amount of capital that we can invest in specific categories of assets, such as unimproved land holdings, development properties, notes receivable, mortgages, mezzanine loans and unconsolidated affiliates, and restricts the amount of stock and Operating Partnership units that we may repurchase during the term of the credit facility.

We may, at any time, voluntarily prepay any loan under the credit facility in whole or in part without premium or penalty.

The credit agreement includes customary events of default, in certain cases subject to customary periods to cure. The occurrence of an event of default, following the applicable cure period, would permit the lenders to, among other things, declare the unpaid principal, accrued and unpaid interest and all other amounts payable under the credit facility to be immediately due and payable.

We are currently in compliance with all covenants under the credit agreement.

During the nine months ended September 30, 2018, we invested \$119.2 million more in cash compared to the nine months ended September 30, 2017 due to increased development activity and the acquisition of three operating properties.

Net cash provided by financing activities during the nine months ended September 30, 2018 increased \$123.7 million as compared to the nine months ended September 30, 2017, primarily as a result of increased borrowings under the credit facility.

Non-GAAP Financial Measures

We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts (“Nareit”). Nareit defines FFO as net income (loss) (calculated in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures.

FFO is a supplemental non-GAAP financial measure. Management uses FFO as a supplemental performance measure because we believe that FFO is beneficial to investors as a starting point in measuring our operational performance. Specifically, in excluding real estate related depreciation and amortization and gains and losses from property dispositions, which do not relate to or are not indicative of operating performance, FFO provides a performance measure that, when compared year-over-year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized measure of the performance of REITs, FFO will be used by investors as a basis to compare our operating performance with that of other REITs.

However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. In addition, other equity REITs may not calculate FFO in accordance with the Nareit definition as we do, and, accordingly, our calculation of FFO may not be comparable to such other REITs’ calculation of FFO. Accordingly, FFO should be considered only as a supplement to net income as a measure of our performance. FFO should not be used as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs, including our ability to pay dividends or service indebtedness. Also, FFO should not be used as a supplement to or substitute for cash flow

from operating activities computed in accordance with GAAP.

We also believe that the computation of FFO in accordance with Nareit's definition includes certain items that are not indicative of the results provided by our operating property portfolio and affect the comparability of our year-over-year performance. Accordingly, management believes that Normalized FFO is a more useful performance measure that excludes certain items, including but not limited to, debt extinguishment losses and prepayment penalties, property acquisition, development and other pursuit costs, mark-to-market adjustments for interest rate derivatives, and other non-comparable items.

Table of Contents

The following table sets forth a reconciliation of FFO and Normalized FFO for the three and nine months ended September 30, 2018 and 2017 to net income, the most directly comparable GAAP measure:

The adjustment for gain on operating real estate dispositions excludes the gain recognized in the three months ended September 30, 2017 on the land outparcel at Sandbridge Commons because this was a non-operating parcel.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements that have been prepared in accordance with GAAP. The preparation of these financial statements requires us to exercise our best judgment in making estimates that affect the reported amounts of assets, liabilities, revenues and expenses. We base our estimates on historical experience and other assumptions that we believe to be reasonable under the circumstances. We evaluate our estimates on an ongoing basis, based upon then-currently available information. Actual results could differ from these estimates. We discuss the accounting policies and estimates that are most critical to understanding our reported financial results in our Annual Report on Form 10-K for the year ended December 31, 2017.

On January 1, 2018, we adopted the new accounting standard codified in Accounting Standards Codification 606 - Revenue from Contracts with Customers. We recognize general contracting revenues as a customer obtains control of promised goods or services in an amount that reflects the consideration we expect to receive in exchange for those goods or services. For each construction contract, we identify the performance obligations, which typically include the delivery of a single building constructed according to the specifications of the contract. We estimate the total transaction price, which generally includes a fixed contract price and may also include variable components such as early completion bonuses, liquidated damages, or cost savings to be shared with the customer. Variable components of the contract price are included in the transaction price to the extent that it is probable that a significant reversal of revenue will not occur. We recognize the estimated transaction price as revenue as we satisfy our performance obligations; we estimate our progress in satisfying performance obligations for each contract using the percentage-of-completion method, based on the proportion of incurred costs to total estimated construction costs at completion. Construction contract costs include all direct material, direct labor, subcontract costs, and overhead costs directly related to contract performance. Changes in job performance, job conditions, and estimated profitability,

including those arising from contract penalty provisions and final contract settlements, are all significant judgments that may result in revisions to costs and income and are recognized in the period in which they are determined. Provisions for estimated losses on uncompleted contracts are recognized immediately in the period in which such losses are determined. We defer pre-contract costs when such costs are directly associated with specific anticipated contracts and their recovery is probable.

We recognize real estate services revenues from property development and management as we satisfy our performance obligations under these service arrangements.

We assess whether multiple contracts with a single counterparty should be combined into a single contract for the revenue recognition purposes based on factors such as the timing of the negotiation and execution of the contracts and whether the economic substance of the contracts was contemplated separately or in tandem.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The primary market risk to which we are exposed is interest rate risk. Our primary interest rate exposure is LIBOR. We primarily use fixed interest rate financing to manage our exposure to fluctuations in interest rates. On a limited basis, we also use derivative financial instruments to manage interest rate risk. We do not use these derivatives for trading or other speculative purposes.

At September 30, 2018, approximately \$338.9 million, or 51.3%, of our debt had fixed interest rates and approximately \$321.7 million, or 48.7%, had variable interest rates. At September 30, 2018, LIBOR was approximately 226 basis points. Assuming no increase in the level of our variable rate debt, if LIBOR increased by 100 basis points, our cash flow would decrease by only \$0.3 million per year as a result of the interest rate caps. Assuming no increase in the level of our variable rate debt, if LIBOR decreased by 100 basis points, our cash flow would increase by \$1.7 million per year.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is processed, recorded, summarized and reported within the time periods specified in the rules and regulations of the SEC and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We have carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, regarding the effectiveness of our disclosure controls and procedures as of September 30, 2018, the end of the period covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer have concluded, as of September 30, 2018, that our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in reports filed or submitted under the Exchange Act: (i) is processed, recorded, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow for timely decisions regarding required disclosure.
