1ST SOURCE CORPORATION

1st Source Corporation, an Indiana corporation incorporated in 1971, is a bank holding company headquartered in South Bend, Indiana that provides, through its subsidiaries (collectively referred to as “1st Source”, “we”, and “our”), a broad array of financial products and services. 1st Source Bank (“Bank”), its banking subsidiary, offers commercial and consumer banking services, trust and investment management services, and insurance to individual and business clients through most of our 80 banking center locations in 17 counties in Indiana and Michigan. 1st Source Bank’s Specialty Finance Group, with 22 locations nationwide, offers specialized financing services for new and used private and cargo aircraft, automobiles and light trucks for leasing and rental agencies, medium and heavy duty trucks and construction equipment. While our lending portfolio is concentrated in certain equipment types, we serve a diverse client base. We are not dependent upon any single industry or client. At December 31, 2014, we had consolidated total assets of $4.83 billion, loans and leases of $3.69 billion, deposits of $3.80 billion, and total shareholders’ equity of $614.47 million.

Our principal executive office is located at 100 North Michigan Street, South Bend, Indiana 46601 and our telephone number is (574) 235-2000. Access to our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports is available, free of charge, at www.1stsource.com soon after the material is electronically filed with or furnished to the Securities and Exchange Commission (SEC).

1ST SOURCE BANK

1st Source Bank is a wholly owned subsidiary of 1st Source Corporation that offers a broad range of consumer and commercial banking services through its lending operations, retail branches, and fee based businesses.

Commercial, Agricultural, and Real Estate Loans — 1st Source Bank provides commercial, small business, agricultural, and real estate loans to primarily privately owned business clients mainly located within our regional market area. Loans are made for a wide variety of general corporate purposes, including financing for industrial and commercial properties, financing for equipment, inventories and accounts receivable, and acquisition financing. Other services include commercial leasing, cash management services and retirement planning services.

Consumer Services — 1st Source Bank provides a full range of consumer banking products and services through our banking centers and at 1stsource.com. In a number of our markets 1st Source also offers insurance products through 1st Source Insurance offices. The traditional banking services include checking and savings accounts, certificates of deposits and Individual Retirement Accounts. 1st Source offers a full line of on-line and mobile banking products which includes bill payment. As an added convenience, a strategically located Automated Teller Machine network serves our customers and supports the debit and credit card programs of the bank. Consumers also have the ability to obtain consumer loans, real estate loans and lines of credit in any of our banking centers or on-line. Finally, 1st Source offers a variety of financial planning, financial literacy and other consultative services to our customers.

Trust Services — 1st Source Bank provides a wide range of trust, investment, agency, and custodial services for individual, corporate, and not-for-profit clients. These services include the administration of estates and personal trusts, as well as the management of investment accounts for individuals, employee benefit plans, and charitable foundations.

Specialty Finance Group Services — 1st Source Bank, through its Specialty Finance Group, provides a broad range of comprehensive equipment loan and lease finance products addressing the financing needs of a broad array of companies. This group can be broken down into four areas: auto and light trucks; medium and heavy duty trucks; new and used aircraft; and construction equipment.

The auto and light truck division consists of financings to automobile rental and leasing companies, light truck rental and leasing companies, and special purpose vehicles. The auto and light truck finance receivables generally range from $100,000 to $20 million with fixed or variable interest rates and terms of one to five years.

The medium and heavy duty truck division provides financing for highway tractors and trailers and delivery trucks to the commercial trucking industry. Medium and heavy duty truck finance receivables generally range from $500,000 to $15 million with fixed or variable interest rates and terms of three to seven years.

Aircraft financing consists of financings for new and used general aviation aircraft (including helicopters) for private and corporate aircraft users, aircraft distributors and dealers, air charter operators, air cargo carriers, and other aircraft operators. We have for many years selectively entered the international aircraft markets, primarily Brazil and Mexico, on a limited basis where desirable aircraft financing opportunities exist for private and corporate aircraft users. Aircraft finance receivables generally range from $500,000 to $15 million with fixed or variable interest rates and terms of one to ten years.

Table of Contents

Construction equipment financing includes financing of equipment (i.e., asphalt and concrete plants, bulldozers, excavators, cranes, loaders, and trash and recycling equipment, etc.) to the construction industry. Construction equipment finance receivables generally range from $50,000 to $20 million with fixed or variable interest rates and terms of one to five years.

We also generate equipment rental income through the leasing of construction equipment, medium and heavy duty trucks, automobiles, and other equipment to clients through operating leases.

SPECIALTY FINANCE GROUP SUBSIDIARIES

The Specialty Finance Group also consists of separate wholly owned subsidiaries of 1st Source Bank which include: Michigan Transportation Finance Corporation, 1st Source Specialty Finance, Inc., SFG Aircraft, Inc., 1st Source Intermediate Holding, LLC, SFG Commercial Aircraft Leasing, Inc., and SFG Equipment Leasing Corporation I.

1ST SOURCE INSURANCE, INC.

1st Source Insurance, Inc. is a wholly owned subsidiary of 1st Source Bank that provides insurance products and services to individuals and businesses covering corporate and personal property, casualty insurance, and individual and group health and life insurance. 1st Source Insurance, Inc. has eight offices.

1ST SOURCE CORPORATION INVESTMENT ADVISORS, INC.

1st Source Corporation Investment Advisors, Inc. (Investment Advisors) is a wholly owned subsidiary of 1st Source Bank that provides investment advisory services for trust and investment clients of 1st Source Bank and to Wasatch Advisors, Inc., the investment advisor of the Wasatch Mutual Fund family. Investment Advisors is registered as an investment advisor with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Investment Advisors serves strictly in an advisory capacity and, as such, does not hold any client securities.

OTHER CONSOLIDATED SUBSIDIARIES

We have other subsidiaries that are not significant to the consolidated entity.

1ST SOURCE MASTER TRUST

Our unconsolidated subsidiary includes 1st Source Master Trust. This subsidiary was created for the purpose of issuing $57.00 million of trust preferred securities and lending the proceeds to 1st Source. We guarantee, on a limited basis, payments of distributions on the trust preferred securities and payments on redemption of the trust preferred securities.

COMPETITION

The activities in which we and the Bank engage in are highly competitive. Our businesses and the geographic markets we serve require us to compete with other banks, some of which are affiliated with large bank holding companies headquartered outside of our principal market. We generally compete on the basis of client service and responsiveness to client needs, available loan and deposit products, the rates of interest charged on loans and leases, the rates of interest paid for funds, other credit and service charges, the quality of services rendered, the convenience of banking facilities, and in the case of loans and leases to large commercial borrowers, relative lending limits.

In addition to competing with other banks within our primary service areas, the Bank also competes with other financial service companies, such as credit unions, industrial loan associations, securities firms, insurance companies, small loan companies, finance companies, mortgage companies, real estate investment trusts, certain governmental agencies, credit organizations, and other enterprises.

Additional competition for depositors’ funds comes from United States Government securities, private issuers of debt obligations, and suppliers of other investment alternatives for depositors. Many of our non-bank competitors are not subject to the same extensive Federal and State regulations that govern bank holding companies and banks. Such non-bank competitors may, as a result, have certain advantages over us in providing some services.

We compete against these financial institutions by being convenient to do business with, and by taking the time to listen and understand our clients’ needs. We deliver personalized, one-on-one banking through knowledgeable local members of the community always keeping the clients' best interest in mind while offering a full array of products and highly personalized services. We rely on our history and our reputation in northern Indiana dating back to 1863.

EMPLOYEES

At December 31, 2014, we had approximately 1,100 employees on a full-time equivalent basis. We provide a wide range of employee benefits and consider employee relations to be good.

4

Table of Contents

REGULATION AND SUPERVISION

General — 1st Source and the Bank are extensively regulated under Federal and State law. To the extent that the following information describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Any change in applicable laws or regulations may have a material effect on our business and our prospective business. Our operations may be affected by legislative changes and by the policies of various regulatory authorities. We are unable to predict the nature or the extent of the effects on our business and earnings that fiscal or monetary policies, economic controls, or new Federal or State legislation may have in the future.

We are a registered bank holding company under the Bank Holding Company Act of 1956 (BHCA) and, as such, we are subject to regulation, supervision, and examination by the Board of Governors of the Federal Reserve System (Federal Reserve). We are required to file annual reports with the Federal Reserve and to provide the Federal Reserve such additional information as it may require.

1st Source Bank, as an Indiana state bank and member of the Federal Reserve System, is supervised by the Indiana Department of Financial Institutions (DFI) and the Federal Reserve. As such, 1st Source Bank is regularly examined by and subject to regulations promulgated by the DFI and the Federal Reserve. Because the Federal Deposit Insurance Corporation (FDIC) provides deposit insurance to 1st Source Bank, we are also subject to supervision and regulation by the FDIC (even though the FDIC is not our primary Federal regulator).

Bank Holding Company Act — Under the BHCA, as amended, our activities are limited to business so closely related to banking, managing, or controlling banks as to be a proper incident thereto. We are also subject to capital requirements applied on a consolidated basis in a form substantially similar to those required of the Bank. The BHCA also requires a bank holding company to obtain approval from the Federal Reserve before (i) acquiring, or holding more than 5% voting interest in any bank or bank holding company, (ii) acquiring all or substantially all of the assets of another bank or bank holding company, or (iii) merging or consolidating with another bank holding company.

The BHCA also restricts non-bank activities to those which, by statute or by Federal Reserve regulation or order, have been identified as activities closely related to the business of banking or of managing or controlling banks. As discussed below, the Gramm-Leach-Bliley Act (GLBA), which was enacted in 1999, established a new type of bank holding company known as a “financial holding company” that has powers that are not otherwise available to bank holding companies.

The Federal Deposit Insurance Corporation Improvement Act of 1991 — The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) was adopted to supervise and regulate a wide variety of banking issues. In general, FDICIA provided for the recapitalization of the former Bank Insurance Fund, deposit insurance reform, including the implementation of risk-based deposit insurance premiums, the establishment of five capital levels for financial institutions (“well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized,” and “critically undercapitalized”) that would impose more scrutiny and restrictions on less capitalized institutions, along with a number of other supervisory and regulatory issues. At December 31, 2014, the Bank was categorized as “well capitalized,” meaning that our total risk-based capital ratio exceeded 10.00%, our Tier 1 risk-based capital ratio exceeded 6.00%, our leverage ratio exceeded 5.00%, and we are not subject to a regulatory order, agreement, or directive to meet and maintain a specific capital level for any capital measure.

FDIC Deposit Insurance Assessments —The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), which was signed into law on July 21, 2010, changes how the FDIC will calculate future deposit insurance premiums payable by insured depository institutions. The Dodd-Frank Act directs the FDIC to amend its assessment regulations so that future assessments will generally be based upon a depository institution’s average total consolidated assets minus the average tangible equity of the insured depository institution during the assessment period, whereas assessments were previously based on the amount of an institution’s insured deposits. The minimum deposit insurance fund rate will increase from 1.15% to 1.35% by September 30, 2020, and the cost of the increase will be borne by depository institutions with assets of $10 billion or more.

The Dodd-Frank Act also provides the FDIC with discretion to determine whether to pay rebates to insured depository institutions when its deposit insurance reserves exceed certain thresholds. Previously, the FDIC was required to give rebates to depository institutions equal to the excess once the reserve ratio exceeded 1.50%, and was required to rebate

50% of the excess over 1.35% but not more than 1.5% of insured deposits. The FDIC adopted a final rule on February 7, 2011 that implements these provisions of the Dodd-Frank Act.

Emergency Economic Stabilization Act of 2008 — The Emergency Economic Stabilization Act of 2008 (EESA) among other things, temporarily increased the standard maximum deposit insurance amount from $100,000 to $250,000. This temporary increase in the scope of deposit insurance coverage was originally set to expire on December 31, 2013, but the Dodd-Frank Act made this temporary increase permanent. Under the Troubled Asset Relief Program established by EESA, the U.S. Treasury Department (Treasury) announced a Capital Purchase Program (CPP). CPP was designed to encourage U.S. financial institutions to build capital to increase the flow of financing to U.S. businesses and consumers and support the U.S. economy. Under the program, Treasury could purchase up to $250 billion of senior preferred shares on standardized terms as described in the program's term sheet. The program was available to qualifying U.S. controlled banks, savings associations, and certain bank and savings and loan holding companies engaged only in financial activities that timely submitted applications to Treasury. EESA provided for Treasury to determine an applicant's eligibility to participate in the CPP after consulting with the appropriate federal banking agency.

Treasury approved 1st Source's application to participate in the CPP and on January 23, 2009, 1st Source issued to Treasury pursuant to the CPP preferred stock valued at $111.00 million and a warrant to acquire 837,947 shares of its common stock. The warrant was exercisable at any time during the ten-year period following issuance at an exercise price of $19.87 per share. On December 29, 2010, 1st Source redeemed all of the preferred stock issued to the Treasury under CPP for $111.68 million, which included accrued and unpaid dividends payable to Treasury on the preferred stock. On March 8, 2011, 1st Source repurchased the common stock warrant for $3.75 million.

Securities and Exchange Commission (SEC) and The NASDAQ Stock Market (NASDAQ) — We are under the jurisdiction of the SEC and certain state securities commissions for matters relating to the offering and sale of our securities and our investment advisory services. We are subject to the disclosure and regulatory requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, as administered by the SEC. We are listed on the NASDAQ Global Select Market under the trading symbol "SRCE," and we are subject to the rules of NASDAQ for listed companies.

Interstate Branching — Congress enacted the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (Interstate Act) to allow bank holding companies to expand, by acquiring existing banks, into all states, even those which had theretofore restricted entry. The legislation also authorized a bank to open de novo branches in other states, but only to the extent that the law of the bank's home state, as well as the law of the state where the branch was to be located, permitted an out-of-state bank to open a de novo branch. The Interstate Act also authorized, subject to future action by individual states, a bank holding company to convert its subsidiary banks located in different states under a single charter.

The Dodd-Frank Act amended the Interstate Act by expanding the authority of a state or national bank to open offices in other states. A state or national bank may now open a de novo branch in another state if the law of the state where the branch is to be located would permit a state bank chartered by that state to open the branch. This amendment repealed the restriction under the Interstate Act that permitted an out-of-state bank to open a de novo branch in another state only if the bank's home state and the state where the branch was to be located had each enacted reciprocal de novo interstate branching laws.

Gramm-Leach-Bliley Act of 1999 — The GLBA is intended to modernize the banking industry by removing barriers to affiliation among banks, insurance companies, the securities industry, and other financial service providers. It provides financial organizations with the flexibility of structuring such affiliations through a holding company structure or through a financial subsidiary of a bank, subject to certain limitations. The GLBA establishes a new type of bank holding company, known as a financial holding company, which may engage in an expanded list of activities that are "financial in nature," which include securities and insurance brokerage, securities underwriting, insurance underwriting, and merchant banking. The GLBA also sets forth a system of functional regulation that makes the Federal Reserve the "umbrella supervisor" for holding companies, while providing for the supervision of the holding company's subsidiaries by other Federal and state agencies. A bank holding company may not become a financial holding company if any of its subsidiary financial institutions are not well-capitalized or well-managed. Further, each bank subsidiary of the holding company must have received at least a satisfactory Community Reinvestment Act (CRA) rating. The GLBA also expands the types of financial activities a national bank may conduct through a

financial subsidiary, addresses state regulation of insurance, generally prohibits unitary thrift holding companies organized after May 4, 1999 from participating in new activities that are not financial in nature, provides privacy protection for nonpublic customer information of financial institutions, modernizes the Federal Home Loan Bank system, and makes miscellaneous regulatory improvements. The Federal Reserve and the Secretary of the Treasury must coordinate their supervision regarding approval of new financial activities to be conducted through a financial holding company or through a financial subsidiary of a bank. While the provisions of the GLBA regarding activities that may be conducted through a financial subsidiary directly apply only to national banks, those provisions indirectly apply to state-chartered banks. In addition, the Bank is subject to other provisions of the GLBA, including those relating to CRA and privacy, regardless of whether we elect to become a financial holding company or to conduct activities through a financial subsidiary. We do not currently intend to file notice with the Board to become a financial holding company or to engage in expanded financial activities through a financial subsidiary.

Table of Contents

Financial Privacy — In accordance with the GLBA, Federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about customers to nonaffiliated third parties. These limitations require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a nonaffiliated third party. The privacy provisions of the GLBA affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. We are also subject to various state laws that generally require us to notify any customer whose personal financial information may have been released to an unauthorized person as the result of a breach of our data security policies and procedures.

USA Patriot Act of 2001 — The USA Patriot Act of 2001 (USA Patriot Act) was signed into law following the terrorist attacks of September 11, 2001. The USA Patriot Act is comprehensive anti-terrorism legislation that, among other things, substantially broadened the scope of anti-money laundering laws and regulations by imposing significant new compliance and due diligence obligations on financial institutions.

The regulations adopted by the Treasury under the USA Patriot Act require financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering, and terrorist financing. Additionally, the regulations require that we, upon request from the appropriate Federal regulatory agency, provide records related to anti-money laundering, perform due diligence of private banking and correspondent accounts, establish standards for verifying customer identity, and perform other related duties.

Failure of a financial institution to comply with the USA Patriot Act's requirements could have serious legal and reputational consequences for the institution.

Regulations Governing Capital Adequacy — The Federal bank regulatory agencies use capital adequacy guidelines in their examination and regulation of bank holding companies and banks. If capital falls below the minimum levels established by these guidelines, a bank holding company or bank will be required to submit an acceptable plan for achieving compliance with the capital guidelines and will be subject to denial of applications and appropriate supervisory enforcement actions. The various regulatory capital requirements that we are subject to are disclosed in Part II, Item 8, Financial Statements and Supplementary Data — Note 20 of the Notes to Consolidated Financial Statements.

Community Reinvestment Act — The Community Reinvestment Act of 1977 requires that, in connection with examinations of financial institutions within their jurisdiction, the Federal banking regulators must evaluate the record of the financial institutions in meeting the credit needs of their local communities, including low and moderate income neighborhoods, consistent with the safe and sound operation of those banks. Federal banking regulators are required to consider a financial institution's performance in these areas as they review applications filed by the institution to engage in mergers or acquisitions or to open a branch or facility.

Regulations Governing Extensions of Credit — 1st Source Bank is subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to 1st Source or our subsidiaries, or investments in our securities and on the use of our securities as collateral for loans to any borrowers. These regulations and restrictions may limit our ability to obtain funds from the Bank for our cash needs, including funds for acquisitions and for payment of dividends, interest and operating expenses. Further, the BHCA, certain regulations of the Federal Reserve, state laws and many other Federal laws govern the extensions of credit and generally prohibit a bank from extending credit, engaging in a lease or sale of property, or furnishing services to a customer on the condition that the customer obtain additional services from the bank's holding company or from one of its subsidiaries.

1st Source Bank is also subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to executive officers, directors, principal shareholders, or any related interest of such persons. Extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, and subject to credit underwriting procedures that are at least as stringent as those prevailing at the time for comparable transactions with non affiliates, and (ii) must not involve more than the normal risk of repayment or present other unfavorable features. The Bank is also subject to certain lending limits and restrictions on overdrafts to such persons.

Reserve Requirements — The Federal Reserve requires all depository institutions to maintain reserves against their transaction account deposits. For 2015, the Bank must maintain reserves of 3.00% against net transaction accounts greater than $14.50 million and up to $103.60 million (subject to adjustment by the Federal Reserve) and reserves of

10.00% must be maintained against that portion of net transaction accounts in excess of $103.60 million. These amounts are indexed to inflation and adjusted annually by the Federal Reserve.

Dividends — The ability of the Bank to pay dividends is limited by state and Federal laws and regulations that require 1st Source Bank to obtain the prior approval of the DFI and the Federal Reserve Bank of Chicago before paying a dividend that, together with other dividends it has paid during a calendar year, would exceed the sum of its net income for the year to date combined with its retained net income for the previous two years. The amount of dividends the Bank may pay may also be limited by certain covenant agreements and by the principles of prudent bank management. See Part II, Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities for further discussion of dividend limitations.

Table of Contents

Monetary Policy and Economic Control — The commercial banking business in which we engage is affected not only by general economic conditions, but also by the monetary policies of the Federal Reserve. Changes in the discount rate on member bank borrowing, availability of borrowing at the “discount window,” open market operations, the imposition of changes in reserve requirements against member banks’ deposits and assets of foreign branches, and the imposition of, and changes in, reserve requirements against certain borrowings by banks and their affiliates are some of the instruments of monetary policy available to the Federal Reserve. These monetary policies are used in varying combinations to influence overall growth and distributions of bank loans, investments, and deposits, and such use may affect interest rates charged on loans and leases or paid on deposits. The monetary policies of the Federal Reserve have had a significant effect on the operating results of commercial banks and are expected to do so in the future. The monetary policies of the Federal Reserve are influenced by various factors, including economic growth, inflation, unemployment, short-term and long-term changes in the international trade balance, and in the fiscal policies of the U.S. Government. Future monetary policies and the effect of such policies on our future business and earnings, and the effect on the future business and earnings of the Bank cannot be predicted.

Sarbanes-Oxley Act of 2002 — The Sarbanes-Oxley Act of 2002 (SOA) includes provisions intended to enhance corporate responsibility and protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws, and which increase penalties for accounting and auditing improprieties at public traded companies. The SOA generally applies to all companies that file or are required to file periodic reports with the SEC under the Exchange Act.

Among other things, the SOA creates the Public Company Accounting Oversight Board as an independent body subject to SEC supervision with responsibility for setting auditing, quality control, and ethical standards for auditors of public companies. The SOA also requires public companies to make faster and more-extensive financial disclosures, requires the chief executive officer and the chief financial officer of public companies to provide signed certifications as to the accuracy and completeness of financial information filed with the SEC, and provides enhanced criminal and civil penalties for violations of the Federal securities laws.

The SOA also addresses functions and responsibilities of audit committees of public companies. The statute, by mandating certain stock exchange listing rules, makes the audit committee directly responsible for the appointment, compensation, and oversight of the work of the company’s outside auditor, and requires the auditor to report directly to the audit committee. The SOA authorizes each audit committee to engage independent counsel and other advisors, and requires a public company to provide the appropriate funding, as determined by its audit committee, to pay the company’s auditors and any advisors that its audit committee retains. The SOA also requires public companies to prepare an internal control report and assessment by management, along with an attestation to this report prepared by the company’s independent registered public accounting firm, in their annual reports to stockholders.

Secure and Fair Enforcement for Mortgage Licensing Act — The Secure and Fair Enforcement for Mortgage Licensing Act of 2008 (S.A.F.E. Act) establishes a nationwide licensing and registration system for mortgage loan originators. The S.A.F.E. Act requires an employee of a bank, savings association or credit union and certain of their subsidiaries that are regulated by a federal banking agency (agency-regulated institutions) who acts as a residential mortgage loan originator to register with the Nationwide Mortgage Licensing System and Registry (NMLS), obtain a unique identifier, and maintain this registration.

The federal banking agencies adopted a final rule in 2010 to implement these provisions. The final rule requires, among other things, that a loan originator submit to the NMLS certain information concerning his or her personal history and experience, undergo an FBI criminal background check, and authorize the NMLS to obtain information related to any administrative, civil, or criminal findings by any governmental agency regarding the loan originator.

Consumer Financial Protection Laws — 1st Source Bank is subject to a number of federal and state consumer financial protection laws and regulations that extensively govern its transactions with consumers. These laws include the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Truth in Lending Act, the Truth in Savings Act, the Electronic Funds Transfer Act, the Expedited Funds Availability Act, the Home Mortgage Disclosure Act, the Fair Housing Act, the Real Estate Settlement Procedures Act, the Fair Debt Collection Practices Act, and the Service Members Civil Relief Act. 1st Source Bank must also comply with applicable state usury laws and other laws prohibiting unfair and deceptive acts and practices. These laws, among other things, require disclosures of the cost of

credit and the terms of deposit accounts, prohibit discrimination in credit transactions, regulate the use of credit report information, restrict the Bank's ability to raise interest rates and subject the Bank to substantial regulatory oversight. Violations of these laws may expose us to liability from potential lawsuits brought by affected customers. Federal bank regulators, state attorneys general and state and local consumer protection agencies may also seek to enforce these consumer financial protection laws, in which case we may be subject to regulatory sanctions, civil money penalties, and customer rescission rights. Failure to comply with these laws may also cause the Federal Reserve or DFI to deny approval of any applications we may file to engage in merger and acquisition transactions with other financial institutions.

Table of Contents

Dodd-Frank Wall Street Reform and Consumer Protection Act — The Dodd-Frank Act, which was signed into law in 2010, significantly changes the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes provisions affecting large and small financial institutions alike, including several provisions that will profoundly affect how community banks, thrifts, and small bank and thrift holding companies will be regulated in the future. Among other things, these provisions abolish the Office of Thrift Supervision and transfer its functions to the other federal banking agencies, relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, and impose new capital requirements on bank and thrift holding companies. The Dodd-Frank Act also includes several corporate governance provisions that apply to all public companies, not just financial institutions. These include provisions mandating certain disclosures regarding executive compensation and provisions addressing proxy access by shareholders.

The Dodd-Frank Act also establishes the Consumer Financial Protection Bureau (CFPB) as an independent entity within the Federal Reserve. In July 2011, the CFPB assumed primary responsibility for administering substantially all of the consumer compliance regulations, including Regulation Z issued under the Truth in Lending Act and Regulation X issued under the Real Estate Settlement Procedures Act, formerly administered by other federal agencies. The CFPB also has the authority to promulgate consumer protection regulations that will apply to all entities, including banks, that offer consumer financial services or products. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting, among other things, originator compensation, minimum repayment standards, and pre-payment penalties.

The Dodd-Frank Act contains numerous other provisions affecting financial institutions of all types, including some that may affect our business in substantial and unpredictable ways. We have incurred higher operating costs in complying with the Dodd -Frank Act, and we expect that these higher costs will continue for the foreseeable future. Our management continues to monitor the ongoing implementation of the Dodd-Frank Act and as new regulations are issued, will assess their effect on our business, financial condition, and results of operations.

The Volcker Rule — The Dodd-Frank act prohibits banks and their affiliates from engaging in proprietary trading and from investing and sponsoring hedge funds and private equity funds. The statutory provision implementing these restrictions is commonly called the "Volcker Rule." To implement the Volcker Rule, federal regulators issued final rules in December 2013 that were to become effective April 2014. The Federal Reserve subsequently issued an order extending the period that institutions have to conform their activities to the requirements of the Volcker Rule to July 21, 2015. These final rules exempt 1st Source Bank, as a bank with less than $10 billion in total consolidated assets that does not engage in any covered activities other than trading in certain government, agency, state or municipal obligations, from any significant compliance obligations under the Volcker Rule. We are continuing to evaluate the effects of the Volcker Rules on our business, but we do not currently anticipate that the Volcker rule will have a material effect on our business, financial condition and results of operations.

Capital Standards — In July 2013, the Federal Reserve and other federal banking agencies approved final rules implementing the Basel Committee on Banking Supervision's capital guidelines for all U.S. banks and for bank holding companies with greater than $500 million in assets. Under these final rules, minimum requirements will increase for both the quantity and quality of capital held by 1st Source and the Bank. The rules include a new common equity Tier 1 capital ratio of 4.5%, a minimum Tier 1 capital ratio of 6.0%, a total capital ratio of 8.0%, and a minimum leverage ratio of 4.0%. The final rules also require a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do not maintain the required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in dividends or used for stock repurchases and on the payment of discretionary bonuses to senior executive management. The capital buffer requirement will be phased in over three years beginning in 2016. The capital buffer requirement effectively raises the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5%, and the total capital ratio to 10.5% on a fully phased-in basis.

The final rules also increase the required capital for certain categories of assets, including higher-risk construction real estate loans and certain exposures related to securitizations. The final rules do not, however, adopt the changes in the proposed rule to the risk weights assigned to certain mortgage loan assets. The final rules instead adopt the risk

weights for residential mortgages under the existing general risk-based capital rules, which assign a risk weight of either 50% (for most first-lien exposures) or 100% for other residential mortgage exposures. Similarly, the final rules do not adopt the proposed rule's elimination of Tier 1 treatment of trust preferred securities for banking organizations with less than $15 billion in assets as of December 31, 2010. Instead, the final rules permit these banking organizations to retain non-qualifying Tier 1 capital trust preferred securities issued prior to May 19, 2010, subject generally to a limit of 25% of Tier 1 capital.

These new minimum capital ratios will become effective for us on January 1, 2015 and will be fully phased-in on January 1, 2019. Management believes that, as of December 31, 2014, 1st Source and 1st Source Bank would meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis as if such requirements were currently in effect.

Table of Contents

Pending Legislation — Because of concerns relating to competitiveness and the safety and soundness of the banking industry, Congress often considers a number of wide-ranging proposals for altering the structure, regulation, and competitive relationships of the nation's financial institutions. We cannot predict whether or in what form any proposals will be adopted or the extent to which our business may be affected.

Item 1A. Risk Factors.

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that we believe affect us are described below. See "Forward Looking Statements" under Item 7 of this report for a discussion of other important factors that can affect our business.

Credit Risks

We are subject to credit risks relating to our loan and lease portfolios — We have certain lending policies and procedures in place that are designed to optimize loan and lease income within an acceptable level of risk. Our management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing our management with frequent reports related to loan and lease production, loan quality, concentrations of credit, loan and lease delinquencies, and nonperforming and potential problem loans and leases. Diversification in the loan and lease portfolios is a means of managing risk associated with fluctuations and economic conditions.

We maintain an independent loan review department that reviews and validates the credit risk program on a periodic basis. Results of these reviews are presented to our management. The loan and lease review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as our policies and procedures.

Commercial and commercial real estate loans generally involve higher credit risks than residential real estate and consumer loans. Because payments on loans secured by commercial real estate or equipment are often dependent upon the successful operation and management of the underlying assets, repayment of such loans may be influenced to a great extent by conditions in the market or the economy. We seek to minimize these risks through our underwriting standards. We obtain financial information and perform credit risk analysis on our customers. Credit criteria may include, but are not limited to, assessments of income, cash flows, collateral, and net worth; asset ownership; bank and trade credit references; credit bureau reports; and operational history.

Commercial real estate or equipment loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and generate positive cash flows. Our management examines current and projected cash flows of the borrower to determine the ability of the borrower to repay their obligations as agreed. Underwriting standards are designed to promote relationship banking rather than transactional banking. Most commercial and industrial loans are secured by the assets being financed or other business assets; however, some loans may be made on an unsecured basis. Our credit policy sets different maximum exposure limits both by business sector and our current and historical relationship and previous experience with each customer.

We offer both fixed-rate and adjustable-rate consumer mortgage loans secured by properties, substantially all of which are located in our primary market area. Adjustable-rate mortgage loans help reduce our exposure to changes in interest rates; however, during periods of rising interest rates, the risk of default on adjustable-rate mortgage loans may increase as a result of repricing and the increased payments required from the borrower. Additionally, some residential mortgages are sold into the secondary market and serviced by our principal banking subsidiary, 1st Source Bank.

Consumer loans are primarily all other non-real estate loans to individuals in our regional market area. Consumer loans can entail risk, particularly in the case of loans that are unsecured or secured by rapidly depreciating assets. In these cases, any repossessed collateral may not provide an adequate source of repayment of the outstanding loan balance. The remaining deficiency often does not warrant further substantial collection efforts against the borrower beyond obtaining a deficiency judgment. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness, or personal bankruptcy.

The 1st Source Specialty Finance Group loan and lease portfolio consists of commercial loans and leases secured by construction and transportation equipment, including aircraft, autos, trucks, and vans. Finance receivables for this Group generally provide for monthly payments and may include prepayment penalty provisions.

Our construction and transportation related businesses could be adversely affected by slowdowns in the economy. Clients who rely on the use of assets financed through the Specialty Finance Group to produce income could be negatively affected, and we could experience substantial loan and lease losses. By the nature of the businesses these clients operate in, we could be adversely affected by rapid increases and decreases of fuel costs. Since some of the relationships in these industries are large, a slowdown could have a significant adverse impact on our performance.

Table of Contents

Our construction and transportation related businesses could be adversely impacted by the negative effects caused by high fuel costs, terrorist and other potential attacks, and other destabilizing events. These factors could contribute to the deterioration of the quality of our loan and lease portfolio, as they could have a negative impact on the travel and transportation sensitive businesses for which our specialty finance businesses provide financing.

In addition, our leasing and equipment financing activity is subject to the risk of cyclical downturns, industry concentration and clumping, and other adverse economic developments affecting these industries and markets. This area of lending, with transportation in particular, is dependent upon general economic conditions and the strength of the travel, construction, and transportation industries.

Our reserve for loan and lease losses may prove to be insufficient to absorb probable losses in our loan and lease portfolio — In the financial services industry, there is always a risk that certain borrowers may not repay borrowings. The determination of the appropriate level of the reserve for loan and lease losses inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which may undergo material changes. Our reserve for loan and lease losses may not be sufficient to cover the loan and lease losses that we may actually incur. If we experience defaults by borrowers in any of our businesses, our earnings could be negatively affected. Changes in local economic conditions could adversely affect credit quality, particularly in our local business loan and lease portfolio. Changes in national or international economic conditions could also adversely affect the quality of our loan and lease portfolio and negate, to some extent, the benefits of national or international diversification through our Specialty Finance Group’s portfolio. In addition, bank regulatory agencies periodically review our reserve for loan and lease losses and may require an increase in the provision for loan and lease losses or the recognition of further loan or lease charge-offs based upon their judgments, which may be different from ours.

The soundness of other financial institutions could adversely affect us — Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose us to credit risk in the event of a default by our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the credit or derivative exposure due us. Any such losses could have a material adverse effect on our financial condition and results of operations.

Market Risks

Fluctuations or continued stagnation in interest rates could reduce our profitability and affect the value of our assets — Like other financial institutions, we are subject to interest rate risk. Our primary source of income is net interest income, which is the difference between interest earned on loans and leases and investments, and interest paid on deposits and borrowings. We expect that we will periodically experience imbalances in the interest rate sensitivities of our assets and liabilities and the relationships of various interest rates to each other. Over any defined period of time, our interest-earning assets may be more sensitive to changes in market interest rates than our interest-bearing liabilities, or vice-versa. In addition, the individual market interest rates underlying our loan and lease and deposit products may not change to the same degree over a given time period. In any event, if market interest rates should move contrary to our position, earnings may be negatively affected. In addition, loan and lease volume and quality and deposit volume and mix can be affected by market interest rates as can the businesses of our clients. Changes in levels of market interest rates could have a material adverse effect on our net interest spread, asset quality, origination volume, and overall profitability.

Market interest rates are beyond our control, and they fluctuate in response to general economic conditions and the policies of various governmental and regulatory agencies, in particular, the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, may negatively affect our ability to originate loans and leases, the value of our assets and our ability to realize gains from the sale of our assets, all of which ultimately could affect our earnings.

Adverse changes in economic conditions could impair our financial condition and results of operations — We are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, political issues, legislative and regulatory changes,

fluctuations in both debt and equity capital markets, broad trends in industry and finance, unemployment, and the strength of the U.S. economy and the local economies in which we operate, all of which are beyond our control. A deterioration in economic conditions could result in an increase in loan delinquencies and non-performing assets, decreases in loan collateral values and a decrease in demand for our products and services.

Changes in economic conditions may negatively impact the fees generated by our wealth management and trust business — Wealth management and trust fees are largely based on the size of client relationships and the market value of assets held under management. Changes in general economic conditions and in the financial and securities markets may negatively impact the value of our clients' wealth management accounts and the market value of assets held under management. Market declines, reductions in the value of our clients' accounts, and the loss of wealth management clients may negatively impact the fees generated by our wealth management and trust business and could have an adverse effect on our business, financial condition and results of operations.

Table of Contents

Liquidity Risks

We could experience an unexpected inability to obtain needed liquidity — Liquidity measures the ability to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits, and to take advantage of interest rate market opportunities and is essential to a financial institution's business. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets, and its access to alternative sources of funds. We seek to ensure our funding needs are met by maintaining a level of liquidity through asset and liability management. If we become unable to obtain funds when needed, it could have a material adverse effect on our business, financial condition, and results of operations. Additionally, under Indiana law governing the collateralization of public fund deposits, the Indiana Board for Depositories determines which financial institutions are required to pledge collateral based on the strength of their financial ratings. We have been informed that no collateral is required for our public fund deposits. However, the Board of Depositories could alter this requirement in the future and adversely impact our liquidity.

We rely on dividends from our subsidiaries — Our parent company, 1st Source Corporation, receives substantially all of its revenue from dividends from our subsidiaries. These dividends are the principal source of funds to pay dividends on our common stock and interest and principal on our debt. Various federal and/or state laws and regulations limit the amount of dividends that our subsidiaries may pay to our parent company. In the event our subsidiaries are unable to pay dividends to our parent company, we may not be able to service debt, pay obligations or pay dividends on our common stock. The inability to receive dividends from our subsidiaries could have a material adverse effect on our business, financial condition and results of operations.

Operational Risks

We are dependent upon the services of our management team — Our future success and profitability is substantially dependent upon our management and the banking abilities of our senior executives. We believe that our future results will also depend in part upon our ability to attract and retain highly skilled and qualified management. We are especially dependent on a limited number of key management personnel, many of whom do not have employment agreements with us. The loss of the chief executive officer and other senior management and key personnel could have a material adverse impact on our operations because other officers may not have the experience and expertise to readily replace these individuals. Many of these senior officers have primary contact with our clients and are important in maintaining personalized relationships with our client base. The unexpected loss of services of one or more of these key employees could have a material adverse effect on our operations and possibly result in reduced revenues if we were unable to find suitable replacements promptly. Competition for senior personnel is intense, and we may not be successful in attracting and retaining such personnel. Changes in key personnel and their responsibilities may be disruptive to our businesses and could have a material adverse effect on our businesses, financial condition, and results of operations.

Technology security breaches — Information security risks have increased due to the sophistication and activities of organized crime, hackers, terrorists and other external parties and the use of online, telephone, and mobile banking channels by clients. Any compromise of our security could deter our clients from using our banking services. We rely on security systems to provide the protection and authentication necessary to effect secure transmission of data against damage by theft, fire, power loss, telecommunications failure or similar catastrophic event, as well as from security breaches, denial of service attacks, viruses, worms, and other disruptive problems caused by hackers. Computer break-ins, phishing and other disruptions of customer or vendor systems could also jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure. We maintain a cyber insurance policy that is designed to cover a majority of loss resulting from cyber security breaches. These precautions may not protect our systems from compromises or breaches of our security measures that could result in damage to our reputation and business.

We depend on the services of a variety of third party vendors to meet data processing and communication needs and we have contracted with third parties to run their proprietary software on our behalf. While we perform reviews of security controls instituted by the vendor in accordance with industry standards and institute our own internal security controls, we rely on continued maintenance of the controls by the outside party to safeguard our customer data.

Additionally, we issue debit cards which are susceptible to compromise at the point of sale via the physical terminal through which transactions are processed and by other means of hacking. The security and integrity of these transactions are dependent upon the retailers' vigilance and willingness to invest in technology and upgrades. Issuing debit cards to our clients exposes us to potential losses which, in the event of a data breach at one or more major retailers may adversely affect our business, financial condition, and results of operations.

We continually encounter technological change — The financial services industry is constantly undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better service clients and reduce costs. Our future success depends, in part, upon our ability to address the needs of our clients by using technology to provide products and services that will satisfy client demands, as well as create additional efficiencies within our operations. Many of our large competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services quickly or be successful in marketing these products and services to our clients. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

Our accounting estimates and risk management processes rely on analytical and forecasting models — The processes we use to estimate our probable loan losses and to measure the fair value of financial instruments, as well as the processes used to estimate the effects of changing interest rates and other market measures on our financial condition and results of operations, depends upon the use of analytical and forecasting models. These models reflect assumptions that may not be accurate, particularly in times of market stress or other unforeseen circumstances. Even if these assumptions are adequate, the models may prove to be inadequate or inaccurate because of other flaws in their design or their implementation. If the models we use for interest rate risk and asset-liability management are inadequate, we may incur increased or unexpected losses upon changes in market interest rates or other market measures. If the models we use for determining our probable loan losses are inadequate, the reserve for loan and lease losses may not be sufficient to support future charge-offs. If the models we use to measure the fair value of financial instruments is inadequate, the fair value of such financial instruments may fluctuate unexpectedly or may not accurately reflect what we could realize upon sale or settlement of such financial instruments. Any such failure in our analytical or forecasting models could have a material adverse effect on our business, financial condition and results of operations.

We have opened new banking centers — We are selectively expanding our banking center network within our market footprint. Executing this expansion requires a significant investment in both financial and personnel resources. Lower than expected loan and deposit growth can decrease anticipated revenues and net income generated by those banking centers, which could have a material adverse effect on our business, financial condition and results of operations.

Legal/Compliance Risks

We are subject to extensive government regulation and supervision — Our operations are subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not security holders. These regulations affect our lending practices, capital structure, investment practices, dividend policy and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible change. Changes to statutes, regulations or regulatory policies, including changes in interpretation or implementation of statutes, regulation or policies, could affect us in substantial and unpredictable ways. Such changes could subject us to additional costs and limit the types of financial services and products we may offer. Failure to comply with laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputation damage, which could have a material adverse effect on our business, financial condition and results of operations. While we have policies and procedures designed to prevent any such violations, there can be no assurance that such violations will not occur.

Changes in accounting standards could impact reported earnings — Current accounting and tax rules, standards, policies and interpretations influence the methods by which financial institutions conduct business, implement strategic initiatives and tax compliance, and govern financial reporting and disclosures. These laws, regulations, rules, standards, policies and interpretations are constantly evolving and may change significantly over time. Events that may not have a direct impact on us, such as bankruptcy of major U.S. companies, have resulted in legislators, regulators, and authoritative bodies, such as the Financial Accounting Standards Board, the Securities and Exchange Commission, the Public Company Accounting Oversight Board and various taxing authorities, responding by adopting and/or proposing substantive revision to laws, regulations, rules, standards, policies and interpretations. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur

in the future. A change in accounting standards may adversely affect our reported financial condition and results of operations.

Substantial ownership concentration — Our directors, executive officers and 1st Source Bank, as trustee, collectively hold a significant ownership concentration of our common shares. Due to this significant level of ownership among our affiliates, our directors, executive officers, and 1st Source Bank, as trustee, may be able to influence the outcome of director elections or impact significant transactions, such as mergers or acquisitions, or any other matter that might otherwise be favored by other stockholders.

Table of Contents

Reputational Risks

Competition from other financial services providers could adversely impact our results of operations — The banking and financial services business is highly competitive. We face competition in making loans and leases, attracting deposits and providing insurance, investment, trust, and other financial services. Increased competition in the banking and financial services businesses may reduce our market share, impair our growth or cause the prices we charge for our services to decline. Our results of operations may be adversely impacted in future periods depending upon the level and nature of competition we encounter in our various market areas.

Managing reputational risk is important to attracting and maintaining customers, investors, and employees — Threats to our reputation can come from many sources, including adverse sentiment about financial institutions generally, unethical practices, employee misconduct, failure to deliver minimum standards of service or quality, compliance deficiencies, and questionable or fraudulent activities of our customers. We have policies and procedures in place that seek to protect our reputation and promote ethical conduct. Nonetheless, negative publicity may arise regarding our business, employees, or customers, with or without merit, and could result in the loss of customers, investors, and employees; costly litigation; a decline in revenues; and increased government regulation.

Item 1B. Unresolved Staff Comments.

None

Item 2. Properties.

Our headquarters building is located in downtown South Bend, Indiana. The building is part of a larger complex, including a 300-room hotel and a 500-car parking garage. In December 2010, we entered into a new 10.5 year lease on our headquarters building which became effective January 1, 2011. As of December 31, 2014, 1st Source leases approximately 69% of the office space in this complex.

At December 31, 2014, we also owned property and/or buildings on which 58 of 1st Source Bank's 80 banking centers were located, including the facilities in Allen, Elkhart, Fulton, Huntington, Kosciusko, LaPorte, Marshall, Porter, Pulaski, St. Joseph, Starke, Tippecanoe, Wells, and Whitley Counties in the State of Indiana and Berrien, Cass, and Kalamazoo Counties in the State of Michigan, as well as an operations center and our former headquarters building, which is utilized for additional business operations. The Bank leases additional property and/or buildings to and from third parties under lease agreements negotiated at arms-length.

We refurbished six banking centers and opened three new ones in our Fort Wayne, Indiana region during the last two years. This work marked the completion of an $8 million investment in that market.

Item 3. Legal Proceedings.

As previously reported, 1st Source Bank, as the trustee (the "Trustee") of the Morris Family Trusts for Ernestine M. Raclin, Chairman Emeritus of the Company, and other beneficiaries, requested approval of the Probate Court of St. Joseph County Indiana to divide the Morris Family Trusts into four separate family trust lines. The Trustee also sought other relief regarding the trusts including approving its accounts. The action was taken in light of possible changes in tax laws and for financial and estate planning purposes, including the possible divesture of some 1st Source Corporation common stock owned by the Trusts. Shares at issue in the probate action held by the Morris Family Trusts represent approximately 21% of the outstanding common stock of the Company. 1st Source Bank has served as Trustee continuously since 1985.

The four family trust lines correspond to the four children of Mrs. Raclin. (Mrs. Raclin's daughter, Carmen is the wife of Christopher J. Murphy III, the Chairman of the Board and Chief Executive Officer of the Company.) In a response filed on September 28, 2012, two of the siblings and their respective children filed a joint answer to the Trustee's petition and a counter-petition setting forth their objection to the Trustee's proposed division of the Morris Family Trusts into four family trust lines. They also sought affirmative relief, alleging that the Trustee has breached its duties by, among other things, acquiring an inappropriate and unreasonably high concentration in common stock of the Company in 1971 and, for decades thereafter, failing to prudently, impartially and timely diversify the assets of the Morris Family Trusts uninfluenced by the impact on the Company or its executives.

The relief sought includes removal of the Trustee, unspecified damages and payment by 1st Source Bank of all fees, costs and expenses incurred by the Trustee for, among other things, all matters related to the preparation and prosecution of the probate action. Mrs. Raclin, the two remaining siblings and their children, respectively, filed their

joint answer to the petition indicating their previous and ongoing support for the Trustee's acquisition of and continuing investment in the common stock of the Company. The Company believes there is no basis for the relief requested in the objection and counter-petition. The Trustee is defending the matter vigorously. The Board of Directors of the Company has formed a special committee of independent directors that actively monitors the progress of the matter.

Table of Contents

1st Source and our subsidiaries are involved in various other legal proceedings incidental to the conduct of our businesses. Our management does not expect that the outcome of any such proceedings will have a material adverse effect on our consolidated financial position or results of operations.

Item 4. Mine Safety Disclosures.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is traded on the NASDAQ Global Select Market under the symbol "SRCE." The following table sets forth for each quarter the high and low sales prices for our common stock, as reported by NASDAQ, and the cash dividends paid per share for each quarter.

	2014 Sales Price		Cash Dividends	2013 Sales Price		Cash Dividends
Common Stock Prices (quarter ended)	High	Low	Paid	High	Low	Paid
March 31	$32.60	$27.56	$ 0.17	$24.79	$21.88	$ 0.17
June 30	33.21	28.76	0.18	25.25	22.65	0.17
September 30	31.92	27.80	0.18	28.82	23.87	0.17
December 31	35.22	28.00	0.18	32.92	25.64	0.17

As of February 13, 2015, there were 879 holders of record of 1st Source common stock.

Comparison of Five Year Cumulative Total Return*

Among 1st Source, Morningstar Market Weighted NASDAQ Index** and Peer Group Index***

* Assumes $100 invested on December 31, 2009, in 1st Source Corporation common stock, NASDAQ market index, and peer group index.

** The Morningstar Weighted NASDAQ Index Return is calculated using all companies which trade as NASD Capital Markets, NASD Global Markets or NASD Global Select. It includes both domestic and foreign companies. The index is weighted by the then current shares outstanding and assumes dividends reinvested. The return is calculated on a monthly basis.

*** The peer group is a market-capitalization-weighted stock index of 48 banking companies in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

NOTE: Total return assumes reinvestment of dividends.

Table of Contents

The following table shows our share repurchase activity during the three months ended December 31, 2014.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs*	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased Under the Plans or Programs
October 01 - 31, 2014	—	$—	—	1,981,452
November 01 - 30, 2014	—	—	—	1,981,452
December 01 - 31, 2014	—	—	—	1,981,452

*1st Source maintains a stock repurchase plan that was authorized by the Board of Directors on July 24, 2014. This authorization superseded any prior repurchase authorizations. Under the terms of the plan, 1st Source may repurchase up to 2,000,000 shares of its common stock from time to time to mitigate the potential dilutive effects of stock-based incentive plans and other potential uses of common stock for corporate purposes. Since the inception of the plan, 1st Source has repurchased a total of 18,548 shares.

Federal laws and regulations contain restrictions on the ability of 1st Source and the Bank to pay dividends. For information regarding restrictions on dividends, see Part I, Item 1, Business - Regulation and Supervision - Dividends and Part II, Item 8, Financial Statements and Supplementary Data - Note 20 of the Notes to Consolidated Financial Statements.

Item 6. Selected Financial Data.

The following table shows selected financial data and should be read in conjunction with our Consolidated Financial Statements and the accompanying notes presented elsewhere herein.

(Dollars in thousands, except per share amounts)	2014		2013		2012		2011		2010	
Interest income	$178,554		$179,585		$182,085		$187,523		$200,626	
Interest expense	18,225		22,768		30,309		39,123		53,129	
Net interest income	160,329		156,817		151,776		148,400		147,497	
Provision for loan and lease losses	3,733		772		5,752		3,129		19,207	
Net interest income after provision for loan and lease losses	156,596		156,045		146,024		145,271		128,290

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The purpose of this analysis is to provide the reader with information relevant to understanding and assessing our results of operations for each of the past three years and financial condition for each of the past two years. In order to fully appreciate this analysis the reader is encouraged to review the consolidated financial statements and statistical data presented in this document.

Table of Contents

FORWARD-LOOKING STATEMENTS

This report, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements. Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. Words such as "believe," "contemplate," "seek," "estimate," "plan," "project," "anticipate," "possible," "assume," "expect," "intend," "continue," "remain," "will," "should," "indicate," "would," "may" and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Forward-looking statements provide current expectations or forecasts of future events and are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date.

All written or oral forward-looking statements that are made by or attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise, or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made. We have expressed our expectations, beliefs, and projections in good faith and we believe they have a reasonable basis. However, we make no assurances that our expectations, beliefs, or projections will be achieved or accomplished. The results or outcomes indicated by our forward-looking statements may not be realized due to a variety of factors, including, without limitation, the following:

- Local, regional, national, and international economic conditions and the impact they may have on us and our clients and our assessment of that impact.
- Changes in the level of nonperforming assets and charge-offs.
- Changes in estimates of future cash reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements.
- The effects of and changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve Board.
- Inflation, interest rate, securities market, and monetary fluctuations.
- Political instability.
- Acts of war or terrorism.
- Substantial changes in the cost of fuel.
- The timely development and acceptance of new products and services and perceived overall value of these products and services by others.
- Changes in consumer spending, borrowings, and savings habits.
- Changes in the financial performance and/or condition of our borrowers.
- Technological changes.
- Acquisitions and integration of acquired businesses.
- The ability to increase market share and control expenses.
- Changes in the competitive environment among bank holding companies.
- The effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities, and insurance) with which we and our subsidiaries must comply.
- The effect of changes in accounting policies and practices and auditing requirements, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board, and other accounting standard setters.
- Changes in our organization, compensation, and benefit plans.
- The costs and effects of legal and regulatory developments including the resolution of legal proceedings or regulatory or other governmental inquires and the results of regulatory examinations or reviews.
- Greater than expected costs or difficulties related to the integration of new products and lines of business.
- Our success at managing the risks described in Item 1A. Risk Factors.

17

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) and follow general practices within the industries in which we operate. Application of these principles requires management to make estimates or judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates or judgments reflect management's view of the most appropriate manner in which to record and report our overall financial performance. Because these estimates or judgments are based on current circumstances, they may change over time or prove to be inaccurate based on actual experience. As such, changes in these estimates, judgments, and/or assumptions may have a significant impact on our financial statements. All accounting policies are important, and all policies described in Part II, Item 8, Financial Statements and Supplementary Data, Note 1 (Note 1), should be reviewed for a greater understanding of how our financial performance is recorded and reported.

We have identified the following three policies as being critical because they require management to make particularly difficult, subjective, and/or complex estimates or judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These policies relate to the determination of the reserve for loan and lease losses, fair value measurements, and the valuation of mortgage servicing rights. Management believes it has used the best information available to make the estimations or judgments necessary to value the related assets and liabilities. Actual performance that differs from estimates or judgments and future changes in the key variables could change future valuations and impact net income. Management has reviewed the application of these policies with the Audit Committee of the Board of Directors. Following is a discussion of the areas we view as our most critical accounting policies.

Reserve for Loan and Lease Losses — The reserve for loan and lease losses represents management's estimate of probable losses inherent in the loan and lease portfolio and the establishment of a reserve that is sufficient to absorb those losses. In determining an appropriate reserve, management makes numerous judgments, assumptions, and estimates based on continuous review of the loan and lease portfolio, estimates of client performance, collateral values, and disposition, as well as historical loss rates and expected cash flows. In assessing these factors, management benefits from a lengthy organizational history and experience with credit decisions and related outcomes. Nonetheless, if management's underlying assumptions prove to be inaccurate, the reserve for loan and lease losses would have to be adjusted. Our accounting policy related to the reserve is disclosed in Note 1 under the heading "Reserve for Loan and Lease Losses."

Fair Value Measurements — We use fair value measurements to record certain financial instruments and to determine fair value disclosures. Available-for-sale securities, trading account securities, mortgage loans held for sale, and interest rate swap agreements are financial instruments recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other financial assets on a nonrecurring basis. These nonrecurring fair value adjustments typically involve write-downs of, or specific reserves against, individual assets. GAAP establishes a three-level hierarchy for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used in the measurement are observable or unobservable. Observable inputs reflect market-driven or market-based information obtained from independent sources, while unobservable inputs reflect our estimates about market data. The degree of management judgment involved in determining the fair value of a financial instrument is dependent upon the availability of quoted market prices or observable market data. For financial instruments that trade actively and have quoted market prices or observable market data, there is minimal subjectivity involved in measuring fair value. When observable market prices and data are not fully available, management judgment is necessary to estimate fair value. In addition, changes in the market conditions may reduce the availability of quoted prices or observable data. For example, reduced liquidity in the capital markets or changes in secondary market activities could result in observable market inputs becoming unavailable. Therefore, when market data is not available, we use valuation techniques that require more management judgment to estimate the appropriate fair value measurement. Fair value is discussed further in Note 1 under the heading "Fair Value Measurements" and in Note 21, "Fair Value Measurements."

Mortgage Servicing Rights Valuation — We recognize as assets the rights to service mortgage loans for others, known as mortgage servicing rights (MSRs), whether the servicing rights are acquired through purchases or through originated loans. MSRs do not trade in an active open market with readily observable market prices. Although sales of MSRs do occur, the precise terms and conditions may not be readily available. As such, the value of MSRs is established and valued using discounted cash flow modeling techniques which require management to make estimates regarding future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. The estimated rates of mortgage loan prepayments are the most significant factors driving the value of MSRs. Increases in mortgage loan prepayments reduce estimated future net servicing cash flows because the life of the underlying loan is reduced. In determining the fair value of the MSRs, mortgage interest rates (which are used to determine prepayment rates), and discount rates are held constant over the estimated life of the portfolio. Estimated mortgage loan prepayment rates are derived from a third-party model and adjusted to reflect our actual prepayment experience. MSRs are carried at the lower of amortized cost or fair value. The values of these assets are sensitive to changes in the assumptions used and readily available market pricing does not exist. The valuation of MSRs is discussed further in Note 21, “Fair Value Measurements.”

Table of Contents

EARNINGS SUMMARY

Net income in 2014 was $58.07 million, up from $54.96 million in 2013 and up from $49.63 million in 2012. Diluted net income per common share was $2.39 in 2014, $2.23 in 2013, and $2.02 in 2012. Return on average total assets was 1.21% in 2014 compared to 1.19% in 2013, and 1.11% in 2012. Return on average common shareholders' equity was 9.65% in 2014 versus 9.55% in 2013, and 9.10% in 2012.

Net income in 2014, as compared to 2013, was positively impacted by a $3.51 million or 2.24% increase in net interest income and a $2.61 million or 9.01% decrease in income tax expense, which was offset by a $2.96 million or 383.55% increase in provision for loan and lease losses. Net income in 2013 was positively impacted by a $5.04 million or 3.32% increase in net interest income and $4.98 million or 86.58% decrease in provision for loan and lease losses over 2012, which was offset by a $3.98 million or 4.90% decrease in noninterest income and a $2.94 million or 11.28% increase in income tax expense.

Dividends paid on common stock in 2014 amounted to $0.71 per share, compared to $0.68 per share in 2013, and $0.66 per share in 2012. The level of earnings reinvested and dividend payouts are determined by the Board of Directors based on management's assessment of future growth opportunities and the level of capital necessary to support them.

Net Interest Income — Our primary source of earnings is net interest income, the difference between income on earning assets and the cost of funds supporting those assets. Significant categories of earning assets are loans and securities while deposits and borrowings represent the major portion of interest-bearing liabilities. For purposes of the following discussion, comparison of net interest income is done on a tax equivalent basis, which provides a common basis for comparing yields on earning assets exempt from federal income taxes to those which are fully taxable.

Net interest margin (the ratio of net interest income to average earning assets) is significantly affected by movements in interest rates and changes in the mix of earning assets and the liabilities that fund those assets. Net interest margin on a fully taxable equivalent basis was 3.59% in 2014, compared to 3.67% in 2013 and 3.69% in 2012. The decreased margins in 2014 and 2013 reflect lower yields on earning assets offset by a decline in funding costs. Net interest income was $160.33 million for 2014, compared to $156.82 million for 2013 and $151.78 million for 2012. Tax-equivalent net interest income totaled $162.17 million for 2014, up $3.53 million from the $158.64 million reported in 2013. Tax-equivalent net interest income for 2013 was up $4.80 million from the $153.84 million reported for 2012.

During 2014, average earning assets increased $187.72 million while average interest-bearing liabilities increased $109.03 million over the comparable period in 2013. The yield on average earning assets decreased 19 basis points to 4.00% for 2014 from 4.19% for 2013 due to the reduction in loan and investment yields in the current interest rate environment. Total cost of average interest-bearing liabilities decreased 15 basis points to 0.54% during 2014 from 0.69% in 2013 as liabilities were impacted by rate re-pricing on maturing certificates of deposit and the continued change in deposit mix. The result was a decrease of 8 basis points to net interest spread, or the difference between interest income on earning assets and expense on interest-bearing liabilities.

The largest contributor to the decrease in the yield on average earning assets in 2014 was the 27 basis point decrease in the loan and lease portfolio yield. Average net loans and leases increased $206.05 million or 6.00% in 2014 from 2013 while the yield decreased to 4.42%.

During 2014, the tax-equivalent yield on securities available for sale decreased 9 basis points to 2.18% while the average balance decreased $18.78 million. Average mortgages held for sale increased $3.57 million during 2014 and the yield increased 19 basis points. Average other investments, which include federal funds sold, time deposits with other banks, Federal Reserve Bank excess balances, Federal Reserve Bank and Federal Home Loan Bank (FHLB) stock and commercial paper decreased $3.12 million during 2014 while the yield increased 35 basis points. The increase in yield was primarily a result of lower outstanding balances at higher rates.

Average interest-bearing deposits increased $5.51 million during 2014 while the effective rate paid on those deposits decreased 17 basis points. Average noninterest-bearing demand deposits increased $71.72 million during 2014. Average short-term borrowings increased $108.57 million during 2014 while the effective rate paid increased 7 basis points. Average long-term debt decreased $5.05 million during 2014 as the effective rate increased 89 basis points. The increase in effective rate was primarily a result of higher rates on mandatorily redeemable securities, offset by

lower effective rates on FHLB borrowings.

Table of Contents

The following table provides an analysis of net interest income and illustrates interest income earned and interest expense charged for each major component of interest earning assets and the interest bearing liabilities. Yields/rates are computed on a tax-equivalent basis, using a 35% rate. Nonaccrual loans and leases are included in the average loan and lease balance outstanding.

(Dollars in thousands)	2014 Average Balance	Interest Income/Expense	Yield/Rate	2013 Average Balance	Interest Income/Expense	Yield/Rate	2012 Average Balance	Interest Income/Expense	Yield/Rate
ASSETS

Interest bearing deposits	$456	$(5,729)	$(5,273)
Short-term borrowings	12	30	42
Subordinated notes	(2,134)	(130)	(2,264)
Long-term debt and mandatorily redeemable securities	835	(881)	(46)
Total interest bearing liabilities	$(831)	$(6,710)	$(7,541)
Net interest income	$10,168	$(5,369)	$4,799

Noninterest Income — Noninterest income increased slightly in 2014 from 2013 following a $3.98 million or 4.90% decrease in 2013 over 2012. The following table shows noninterest income for the most recent three years ended December 31.

(Dollars in thousands)	2014	2013	2012
Noninterest income:			
Trust fees	$18,511	$17,383	$16,498
Service charges on deposit accounts	8,684	9,177	10,418
Debit card income	9,585	8,882	8,389
Mortgage banking income	5,381	5,944	8,357
Insurance commissions	5,556	5,492	5,494
Equipment rental income	17,156	16,229	18,796

Gains (losses) on investment securities available-for-sale	963	(168)	282
Other income	12,051	14,273	12,958
Total noninterest income	$77,887	$77,212	$81,192

Table of Contents

Trust fees (which include investment management fees, estate administration fees, mutual fund fees, annuity fees, and fiduciary fees) increased by $1.13 million or 6.49% in 2014 from 2013 compared to an increase of $0.89 million or 5.36% in 2013 over 2012. Trust fees are largely based on the size of client relationships and the market value of assets under management. The market value of trust assets under management at December 31, 2014 and 2013 was $3.95 billion and $3.80 billion, respectively. At December 31, 2014, these trust assets were comprised of $2.40 billion of personal and agency trusts and estate administration assets, $1.10 billion of employee benefit plan assets, $345.75 million of individual retirement accounts, and $108.24 million of custody assets. The increase in trust fees in 2014 and 2013 was primarily a result of an increase in the market values of investments held in the trust accounts of clients.
Service charges on deposit accounts decreased $0.49 million or 5.37% in 2014 from 2013 compared to a decrease of $1.24 million or 11.91% in 2013 from 2012. The decline in service charges on deposit accounts in 2014 and 2013 was primarily due to lower volumes of nonsufficient fund transactions.
Debit card income increased $0.70 million or 7.91% in 2014 from 2013 compared to an increase of $0.49 million or 5.88% in 2013 from 2012. The increase in 2014 was primarily the result of an increase in the amount of debit card transactions. The increase in 2013 was the result of increased transaction fees coupled with an increase in the amount of debit card transactions.
Mortgage banking income decreased $0.56 million or 9.47% in 2014 over 2013, compared to a decrease of $2.41 million or 28.87% in 2013 over 2012. We had no MSR impairment in 2014 or 2013 compared to $0.24 million in valuation recovery adjustments in 2012. During 2014, 2013 and 2012, we determined that no permanent write-down was necessary for previously recorded impairment on MSRs. During 2014, mortgage banking income was negatively impacted by decreased gains on loan sales due to reduced profit margins offset by lower MSR amortization expense and higher secondary market loan production volumes. Mortgage banking income was negatively impacted by lower loan production volumes in 2013 as compared to 2012.
Insurance commissions increased slightly in 2014 from 2013 and were flat in 2013 compared to 2012.
Equipment rental income generated from operating leases increased by $0.93 million or 5.71% during 2014 from 2013 compared to a decrease of $2.57 million or 13.66% during 2013 from 2012. The average equipment rental portfolio increased 5.55% in 2014 over 2013 as the result of improving market conditions for equipment finance. The average equipment rental portfolio decreased 15.31% in 2013 over 2012 due to decreased demand, resulting in lower rental income. In addition, new leases were at lower rates due to market conditions including lower rates and increased competition.
Sales of investment securities available-for-sale resulted in gains of $0.96 million for the year ended 2014 compared to losses of $0.17 million for the year ended 2013 and gains of $0.28 million for the year ended 2012. During 2014, gains were the result of a sale of a marketable equity security. The loss in 2013 related to an investment portfolio loss on an adjustable rate security. The gain in 2012 resulted from gains on the sale of corporate equity and agency securities.
Other income decreased $2.22 million or 15.57% in 2014 from 2013 compared to an increase of $1.32 million or 10.15% in 2013 from 2012. The decrease in 2014 was mainly the result of losses on partnership investments, lower monogram fund income, dividend income and customer swap fees offset by higher mutual fund income. The increase in 2013 was mainly attributable to the collection of fees on previously charged off loans in addition to higher mutual fund income and dividend income.
Noninterest Expense — Noninterest expense increased slightly in 2014 over 2013 following a $2.22 million or 1.47% decrease in 2013 from 2012. The following table shows Noninterest expense for the recent three years ended December 31.

(Dollars in thousands)	2014	2013	2012
Noninterest expense:			
Salaries and employee benefits	$80,488	$79,783	$82,599
Net occupancy expense	9,311	8,700	7,819
Furniture and equipment expense	17,657	16,895	15,406
Depreciation — leased equipment	13,893	13,055	15,202
Professional fees	5,046	5,321	6,083

Supplies and communications	5,589	5,690	5,701
FDIC and other insurance	3,384	3,462	3,602
Business development and marketing expense	6,049	4,938	4,232
Loan and lease collection and repossession expense	1,102	4,030	5,772
Other expense	7,521	7,440	5,120
Total noninterest expense	$150,040	$149,314	$151,536

Total salaries and employee benefits increased $0.71 million or 0.88% in 2014 from 2013, following a $2.82 million or 3.41% decrease in 2013 from 2012.

Table of Contents

Employee salaries increased $0.53 million or 0.83% in 2014 from 2013 compared to a decrease of $2.36 million of 3.56% in 2013 from 2012. The increase in 2014 was a result of higher base salaries offset by lower producer commissions. Higher base salary expense was primarily due to more full time equivalent employees as a result of opening three new banking centers and increases from the annual performance raises. Producer commissions were lower due to decreased residential mortgage loan production volumes. The decrease in 2013 was primarily due to lower base salaries and producer commissions. Lower base salary expense was mainly due to fewer full time equivalent employees offset by increases from the annual performance raises. Loan producer commissions were lower due to decreased residential mortgage loan production volumes.

Employee benefits increased slightly in 2014 from 2013, compared to a decrease of $0.46 million or 2.80% in 2013 from 2012. The decrease in 2013 was primarily due to fewer full time equivalent employees, offset by higher group insurance costs.

Occupancy expense increased $0.61 million or 7.02% in 2014 from 2013, compared to an increase of $0.88 million or 11.27% in 2013 from 2012. The higher expense in 2014 was mainly due to higher snow removal services and real estate taxes. The higher expense in 2013 was mainly due to the receipt of real estate tax refunds in 2012, higher depreciation on buildings as a result of branch remodeling in 2013, and new branches opened during 2013.

Furniture and equipment expense, including depreciation, grew by $0.76 million or 4.51% in 2014 from 2013 compared to an increase of $1.49 million or 9.67% in 2013 from 2012. The higher expense during 2014 was in the areas of computer processing charges and equipment repair. Additionally, in 2014, purchases of furniture and equipment increased due to renovations of six existing banking centers and the opening of three new banking centers. The higher expense in 2013 was in the areas of equipment depreciation, computer processing charges and software maintenance.

Depreciation on equipment owned under operating leases increased $0.84 million or 6.42% in 2014 from 2013, following a $2.15 million or 14.12% decrease in 2013 from 2012. In 2014 and 2013, depreciation on equipment owned under operating leases changed in conjunction with the change in equipment rental income.

Professional fees declined $0.28 million or 5.17% in 2014 from 2013, compared to a $0.76 million or 12.53% decrease in 2013 from 2012. The decrease in 2014 and 2013 was primarily due to the reduced utilization of consulting services.

Supplies and communications expense decreased slightly in 2014 from 2013, and were flat in 2013 from 2012.

FDIC and other insurance expense was flat in 2014 from 2013 and flat in 2013 from 2012.

Business development and marketing expense increased $1.11 million or 22.50% in 2014 from 2013 compared to a $0.71 million or 16.68% increase in 2013 from 2012. The higher expense in 2014 was the result of increased charitable contributions and increased retail marketing. The higher expense in 2013 was the result of increased charitable contributions. Charitable contributions were $1.46 million in 2014 compared to $0.50 million in 2013.

Loan and lease collection and repossession expenses decreased $2.93 million or 72.66% in 2014 from 2013 compared to a decrease of $1.74 million or 30.18% in 2013 from 2012. Loan and lease collection and repossession expense was lower in 2014 mainly due to reduced repurchased mortgage loan losses as a result of fewer loan repurchase requests and gains on the sale of other real estate and repossessions. The decrease in 2013 was mainly due to a reduction in the average repossessions outstanding and reduced valuation adjustments as credit quality slowly improved.

Other expenses were flat in 2014 as compared to 2013 and increased $2.32 million or 45.31% in 2013 from 2012. The increase in 2013 was mainly due to the gain on the sale of the corporate headquarters' parking garage that occurred in 2012, a previously reported trustee matter, and a higher provision on unfunded loan commitments.

Income Taxes — 1st Source recognized income tax expense in 2014 of $26.37 million, compared to $28.99 million in 2013, and $26.05 million in 2012. The effective tax rate in 2014 was 31.23% compared to 34.53% in 2013, and 34.42% in 2012. The provision for income taxes included a one-time benefit of $3.30 million for the twelve months ended December 31, 2014 which resulted in a lower effective tax rate for 2014 compared to 2013 and 2012. These benefits were the result of a reduction in uncertain tax positions due to settlements with taxing authorities and the lapse of the applicable statute of limitations.

Effective January 1, 2014, the Indiana Financial Institutions Tax (FIT) rate decreased from 8.5% to 8.0% and will continue to decrease by 0.5% each of the next three years. As a result of the change, we decreased the carrying value

of certain state deferred tax assets. The impact of the change was not material and was recorded in the financial statements during the second quarter of 2013. Additionally, on March 25, 2014, FIT tax rate decreases from 6.5% in 2018 to 4.9% in 2023 were enacted. These further decreases did not have an impact on our deferred taxes and as a result, no amount was recorded in our financial statements for this rate change. For a detailed analysis of 1st Source's income taxes see Part II, Item 8, Financial Statements and Supplementary Data — Note 17 of the Notes to Consolidated Financial Statements.

Table of Contents

FINANCIAL CONDITION

Loan and Lease Portfolio — The following table shows 1st Source's loan and lease distribution at the end of each of the last five years as of December 31.

(Dollars in thousands)	2014	2013	2012	2011	2010
Commercial and agricultural loans	$710,758	$679,492	$639,069	$545,570	$530,228
Auto and light truck	397,902	391,649	396,602	378,604	326,340
Medium and heavy duty truck	247,153	237,854	213,547	217,157	232,984
Aircraft financing	727,665	738,133	696,479	620,782	614,357
Construction equipment financing	399,940	333,088	278,974	261,204	285,634
Commercial real estate	616,587	583,997	554,968	545,457	594,729
Residential real estate	445,759	460,981	438,641	423,606	390,951
Consumer loans	142,810	124,130	109,273	98,163	95,400
Total loans and leases	$3,688,574	$3,549,324	$3,327,553	$3,090,543	$3,070,623

At December 31, 2014, 10.0% of total loans and leases were concentrated with auto rental and leasing.

Loans and leases, net of unearned discount, at December 31, 2014, were $3.69 billion and were 76.43% of total assets, compared to $3.55 billion and 75.15% of total assets at December 31, 2013. Average loans and leases, net of unearned discount, increased $206.05 million or 6.00% and increased $224.45 million or 6.99% in 2014 and 2013, respectively.

Commercial and agricultural lending, excluding those loans secured by real estate, increased $31.27 million or 4.60% in 2014 over 2013. Commercial and agricultural lending outstandings were $710.76 million and $679.49 million at December 31, 2014 and December 31, 2013, respectively. This increase was mainly attributed to an improved economy in our target markets, resulting in greater line of credit usage and the financing of increased capital expenditures by our clients. In 2014, we also grew our business client base.

Auto and light truck loans increased $6.25 million or 1.60% in 2014 over 2013. At December 31, 2014, auto and light truck loans had outstandings of $397.90 million and $391.65 million at December 31, 2013. This increase was primarily attributable to the expansion of financing with many existing clients and an increase in client base offset by selective credit pruning and client consolidations during the year.

Medium and heavy duty truck loans and leases grew by $9.30 million or 3.91% in 2014. Medium and heavy duty truck financing at December 31, 2014 and 2013 had outstandings of $247.15 million and $237.85 million, respectively. Most of the increase at December 31, 2014 from December 31, 2013 can be attributed to clients reacting to their aging equipment by normalizing their replacement policies. Consequently, demand has increased as the trucking industry acquired new equipment.

Aircraft financing at year-end 2014 decreased $10.47 million or 1.42% from year-end 2013. Aircraft financing at December 31, 2014 and 2013 had outstandings of $727.67 million and $738.13 million, respectively. The decrease was mainly due to paydowns in our foreign loan outstandings.

Construction equipment financing increased $66.85 million or 20.07% in 2014 compared to 2013. Construction equipment financing at December 31, 2014 had outstandings of $399.94 million, compared to outstandings of $333.09 million at December 31, 2013. The increase in this category was primarily due to a continued gradual improvement in the construction industry and the need to replace older equipment in addition to increases in equipment rental.

Commercial loans secured by real estate, the majority of which is owner occupied, increased $32.59 million or 5.58% in 2014 over 2013. Commercial loans secured by real estate outstanding at December 31, 2014 were $616.59 million and $584.00 million at December 31, 2013. The increase was mainly due to general improvements in the business economy within our markets.

Residential real estate loans were $445.76 million at December 31, 2014 and $460.98 million at December 31, 2013. Residential real estate loans decreased $15.22 million or 3.30% in 2014 from 2013. The decrease in residential real estate loans was primarily due to a softening in residential refinance demand, limited purchase mortgage activity and anemic new home construction activity.

Consumer loans increased $18.68 million or 15.05% in 2014 over 2013. Consumer loans outstanding at December 31, 2014, were $142.81 million and $124.13 million at December 31, 2013. The increase during 2014 was due to higher demand in auto, personal loans, home equity and other personal line of credit loans as a result of favorable interest

rates.

24

Table of Contents

The following table shows the maturities of loans and leases in the categories of commercial and agriculture, auto and light truck, medium and heavy duty truck, aircraft and construction equipment outstanding as of December 31, 2014.

(Dollars in thousands)	0-1 Year	1-5 Years	Over 5 Years	Total
Commercial and agricultural loans	$386,863	$274,106	$49,789	$710,758
Auto and light truck	162,463	234,596	843	397,902
Medium and heavy duty truck	77,078	166,453	3,622	247,153
Aircraft financing	177,639	467,190	82,836	727,665
Construction equipment financing	108,673	270,801	20,466	399,940
Total	$912,716	$1,413,146	$157,556	$2,483,418

The following table shows amounts due after one year are also classified according to the sensitivity to changes in interest rates.

Rate Sensitivity (Dollars in thousands)	Fixed Rate	Variable Rate	Total
1 – 5 Years	$918,530	$494,616	$1,413,146
Over 5 Years	39,935	117,621	157,556
Total	$958,465	$612,237	$1,570,702

During 2014, approximately 88% of the Bank’s residential mortgage originations were sold into the secondary market. Mortgage loans held for sale were $13.60 million at December 31, 2014 and were $6.08 million at December 31, 2013. Although 1st Source Bank is participating in the U.S. Treasury Making Home Affordable programs, we do not feel it has a material effect on our financial condition or results of operations.

1st Source Bank sells residential mortgage loans to Fannie Mae as well as FHA-insured and VA-guaranteed loans in Ginnie Mae mortgage-backed securities. Additionally, we have sold loans on a service released basis to various other financial institutions in recent years. The agreements under which we sell these mortgage loans contain various representations and warranties regarding the acceptability of loans for purchase. On occasion, we may be asked to indemnify the loan purchaser for credit losses on loans that were later deemed ineligible for purchase or we may be asked to repurchase a loan. Both circumstances are collectively referred to as “repurchases.” Within the industry, repurchase demands had been increasing during prior years but did slow during 2014. While we believe the loans we have underwritten and sold to these entities have met or exceeded applicable transaction parameters, we must acknowledge the trend of mortgage insurance rescissions and speculative repurchase requests.

Our liability for repurchases, included in accrued expenses and other liabilities on the Statements of Financial Condition, was $1.72 million and $2.46 million as of December 31, 2014 and 2013, respectively. Our expense for repurchase losses, included in loan and lease collection and repossession expense on the Statements of Income, was $(0.27) million in 2014 compared to $1.99 million in 2013 and $2.05 million in 2012. The mortgage repurchase liability represents our best estimate of the loss that we may incur. The estimate is based on specific loan repurchase requests and a historical loss ratio with respect to origination dollar volume. Because the level of mortgage loan repurchase losses are dependent on economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, the level of liability for mortgage loan repurchase losses is difficult to estimate and requires considerable management judgment.

CREDIT EXPERIENCE

Reserve for Loan and Lease Losses — Our reserve for loan and lease losses is provided for by direct charges to operations. Losses on loans and leases are charged against the reserve and likewise, recoveries during the period for prior losses are credited to the reserve. Our management evaluates the reserve quarterly, reviewing all loans and leases over a fixed-dollar amount ($100,000) where the internal credit quality grade is at or below a predetermined classification, actual and anticipated loss experience, current economic events in specific industries, and other pertinent factors including general economic conditions. Determination of the reserve is inherently subjective as it requires significant estimates, including the amounts and timing of expected future cash flows or fair value of collateral on collateral-dependent impaired loans and leases, estimated losses on pools of homogeneous loans and leases based on historical loss experience, and consideration of environmental factors, principally economic risk and concentration risk, all of which may be susceptible to significant and unforeseen changes. We review the status of the loan and lease portfolio to identify borrowers that might develop financial problems in order to aid borrowers in the

handling of their accounts and to mitigate losses. See Part II, Item 8, Financial Statements and Supplementary Data — Note 1 of the Notes to Consolidated Financial Statements for additional information on management's evaluation of the reserve for loan and lease losses.

The reserve for loan and lease loss methodology has been consistently applied for several years, with enhancements instituted periodically. Reserve ratios are reviewed quarterly and revised periodically to reflect recent loss history and to incorporate current risks and trends which may not be recognized in historical data. As we update our historical charge-off analysis, we review the look-back periods for each business loan portfolio.

Table of Contents

During 2014, the medium-term portion of the look-back period was six years given that 2009 through 2014 losses were considerably impacted by the severe recession. Although the recession began in December 2007, its financial consequences were not recognized in the loan portfolios until 2009. We gave the greatest weight to this recent six year period in our calculation, as we feel it is most consistent with our current expectations for 2015. Furthermore, we perform a thorough analysis of charge-offs, non-performing asset levels, special attention outstandings and delinquency in order to review portfolio trends and other factors, including specific industry risks and economic conditions, which may have an impact on the reserves and reserve ratios applied to various portfolios. We adjust the calculated historical based ratio as a result of our analysis of environmental factors, principally economic risk and concentration risk. Key economic factors affecting our portfolios are growth in gross domestic product, unemployment rates, housing market trends, commodity prices, inflation and global economic and political issues. Concentration risk is impacted primarily by geographic concentration in Northern Indiana and Southwestern Lower Michigan in our business banking and commercial real estate portfolios and by collateral concentration in our specialty finance portfolios.

Weaknesses overseas could negatively impact the U.S. recovery, as could geopolitical events. Current concerns include the weak EU economies and deflationary pressures, the recessionary pressures in Japan and Brazil and the resultant decline in value of the real, the continued slowdown in China, and the geopolitical threats to the Russian economy as a result of the crisis in the Ukraine as well as the economic decline due to Russia’s significant dependence on oil. We include a factor in our loss ratios for global risk, as we are increasingly aware of the threat that global concerns may affect our customers. While we are unable to determine with any precision the impact of global economic and political issues on 1st Source Bank’s loan portfolios, we feel the risks are real and significant. We believe there is a risk of negative consequences for our borrowers that would affect their ability to repay their financial obligations. Therefore, we continue to include a factor for global risk in our analysis for 2014.

Another area of concern continues to be our aircraft portfolio where we have collateral concentration and a sizable foreign exposure. The aircraft industry was among the sectors affected most by the sluggish economy. We have seen some evidence that depressed private jet markets have stabilized. As the U.S. economy slowly improves, the industry is likely to benefit and we should see a decrease in the fleet of unsold pre-owned aircraft which will result is further strengthening of values. Nevertheless, we remain concerned about the prolonged low prices for several models. We also have foreign exposure in this portfolio, particularly in Brazil and Mexico. The recession in Brazil and the currency fluctuations are having a negative impact on our clients’ cost of paying dollar denominated debts and, as a result, we have experienced increasing delinquency in this portfolio and we continue to experience higher default rates in this portfolio than in our other lending segments. We reassessed our ratios, which were established based on the higher and more volatile loss histories and pronounced exposure to global risks, and believe our reserve ratios remain appropriate.

We experienced ongoing improvement in the medium and heavy duty truck portfolio. We recognized sizable losses during 2009 and the first half of 2010; however, since then we have had no charge-offs. Current favorable conditions with lower oil prices and growth in GDP, manufacturing and jobs bode well for the industry. Industry concerns include the worsening driver shortage, unresolved infrastructure funding issues and increased regulation. Nevertheless, the underlying industry fundamentals are expected to remain relatively stable. As a result, we maintained our risk factors at levels consistent with last year.

Our construction equipment portfolio is characterized by increasing outstanding loan balances and improved credit quality in 2014. The construction industry, which was hard hit during the recession, is positioned to benefit from an improving economy, buoyed by growth in private non-residential construction. We are talking to our larger customers with exposure to the energy sector and anticipate some negative repercussions for some of our borrowers as a result of the significant decline in oil prices, but the Bank’s exposure to this segment is limited. Historically, 1st Source has experienced less volatility in this portfolio than the industry as losses have been mitigated by appropriate underwriting and the advantage of strong collateral values due to the global market for used construction equipment. The underlying risk has not changed significantly for this portfolio; our reserve factors are similar to last year.

The auto and light truck portfolio outstanding loan balances remained relatively stable for the past three years, with normal seasonal fluctuations. Used cars held their values better than we anticipated in 2014. Industry growth is

projected to be accompanied by increasing rental rates and used auto sales are expected to remain strong. As a result, we did not change the reserve ratio for the auto portfolio.

There are several industries represented in the commercial and agricultural portfolio. The outlook for the business banking portfolio is guardedly optimistic. While recent economic news indicates improvement, exemplified by lower unemployment and increased consumer and small business confidence, we remain mindful of uncertainties and risks. In general, the decline in oil prices will be good for businesses and individuals in our local market. However, the decline in commodities prices, particularly corn and soybeans, will negatively impact the crop sector of our agriculture portfolio. We anticipate some of our borrowers will be unable to repay their lines of credit in full, resulting in carry-over debt. Overall, we are experiencing trends of generally improving credit quality, with low delinquencies and fewer accounts in Special Attention than this time last year. We have reviewed the calculated loss ratios and the environmental factors and concentration issues affecting these portfolios and incorporated minor adjustments to the reserve ratios as deemed appropriate.

Table of Contents

Similar to the commercial portfolio, our commercial real estate loans are concentrated in our local market with local customers, with over fifty percent of the Bank's exposure being owner occupied facilities where we are the primary relationship bank for our customers. Nevertheless, we were not immune to the dramatic declines in real estate values following the great recession, similar to other U.S. markets and we experienced losses from 2009 through 2011. Furthermore, our recent portfolio growth has been in the more risky non-owner occupied sector, principally the hotel industry. Our recent loss history is favorable; however, as a result of our growth in more risky sectors, we are maintaining the reserve ratios established last year.

The reserve for loan and lease losses at December 31, 2014, totaled $85.07 million and was 2.31% of loans and leases, compared to $83.51 million or 2.35% of loans and leases at December 31, 2013 and $83.31 million or 2.50% of loans and leases at December 31, 2012. It is our opinion that the reserve for loan and lease losses was appropriate to absorb probable losses inherent in the loan and lease portfolio as of December 31, 2014.

Charge-offs for loan and lease losses were $6.03 million for 2014, compared to $3.83 million for 2013 and $7.64 million for 2012. Charge-offs increased in 2014 as a result of a sizable charge-off on a commercial relationship. Charge-offs decreased in 2013 due to a decrease in average nonperforming loans and leases reflecting a slowly improving economy. In 2013, the largest loss was on an aircraft account. The provision for loan and lease losses was $3.73 million for 2014, compared to $0.77 million for 2013 and $5.75 million for 2012.

The following table summarizes our loan and lease loss experience for each of the last five years ended December 31.

(Dollars in thousands)	2014	2013	2012	2011	2010
Amounts of loans and leases outstanding at end of period	$3,688,574	$3,549,324	$3,327,553	$3,090,543	$3,070,623
Average amount of net loans and leases outstanding during period	$3,639,985	$3,433,938	$3,209,490	$3,078,581	$3,109,508
Balance of reserve for loan and lease losses at beginning of period	$83,505	$83,311	$81,644	$86,874	$88,236
Charge-offs:					
Commercial and agricultural loans	5,007	538	524	1,667	4,000
Auto and light truck	42	226	3,754	105	490
Medium and heavy duty truck	—	57	41	241	2,403
Aircraft financing	—	1,308	600	4,681	6,507
Construction equipment financing	4	88	120	853	2,372
Commercial real estate	99	170	471	3,120	6,219
Residential real estate	46	316	594	282	486
Consumer loans	833	1,125	1,532	1,640	1,629
Total charge-offs	6,031	3,828	7,636	12,589	24,106
Recoveries:					
Commercial and agricultural loans	929	468	484	1,923	1,612

Consumer loans	298	333	407	456	662
Total recoveries	3,861	3,250	3,551	4,230	3,537
Net charge-offs	2,170	578	4,085	8,359	20,569
Provision for loan and lease losses	3,733	772	5,752	3,129	19,207
Balance at end of period	$85,068	$83,505	$83,311	$81,644	$86,874
Ratio of net charge-offs to average net loans and leases outstanding	0.06 %	0.02 %	0.13 %	0.27 %	0.66 %

Ratio of reserve for loan and lease losses to net loans and leases outstanding end of period	2.31 %	2.35 %	2.50 %	2.64 %	2.83 %
Coverage ratio of reserve for loan and lease losses to nonperforming loans and leases	239.07 %	225.73 %	226.03 %	143.49 %	115.50 %

Table of Contents

The following table shows net charge-offs (recoveries) as a percentage of average loans and leases by portfolio type:

	2014	2013	2012	2011	2010
Commercial and agricultural loans	0.58 %	0.01 %	0.01 %	(0.05)%	0.44 %
Auto and light truck	(0.30)	0.02	0.85	(0.01)	0.14
Medium and heavy duty truck	(0.06)	(0.19)	(0.53)	0.09	0.87
Aircraft financing	(0.03)	0.06	(0.02)	0.61	0.96
Construction equipment financing	(0.14)	(0.08)	(0.05)	0.20	0.67
Commercial real estate	(0.04)	(0.08)	0.05	0.49	1.05
Residential real estate	(0.01)	0.07	0.13	0.06	0.11
Consumer loans	0.41	0.67	1.08	1.24	0.95
Total net charge-offs to average portfolio loans and leases	0.06 %	0.02 %	0.13 %	0.27 %	0.66 %

The reserve for loan and lease losses has been allocated according to the amount deemed necessary to provide for the estimated probable losses that have been incurred within the categories of loans and leases set forth in the table below. The following table shows the amount of such components of the reserve at December 31 and the ratio of such loan and lease categories to total outstanding loan and lease balances.

	2014		2013		2012		2011		2010

Nonperforming Assets — Nonperforming assets include loans past due over 90 days, nonaccrual loans, other real estate, former bank premises held for sale, repossessions and other nonperforming assets we own. Our policy is to discontinue the accrual of interest on loans and leases where principal or interest is past due and remains unpaid for 90 days or more, or when an individual analysis of a borrower's credit worthiness indicates a credit should be placed on nonperforming status, except for residential mortgage loans, which are placed on nonaccrual at the time the loan is placed in foreclosure and consumer loans that are both well secured and in the process of collection.

Nonperforming assets amounted to $42.48 million at December 31, 2014, compared to $46.75 million at December 31, 2013, and $42.27 million at December 31, 2012. During 2014, interest income on nonaccrual loans and leases would have increased by approximately $3.03 million compared to $2.93 million in 2013 if these loans and

leases had earned interest at their full contractual rate.

Nonperforming assets at December 31, 2014 decreased from December 31, 2013, mainly due to decreases in nonaccrual loans and leases and the sale of other real estate. The decrease in nonaccrual loans and leases occurred primarily in the auto and light truck and the commercial real estate portfolios, offset by increases in commercial and agricultural loans and aircraft financing.

Table of Contents

Nonperforming assets at December 31 (Dollars in thousands)	2014	2013	2012	2011	2010
Loans past due over 90 days	$981	$287	$442	$460	$361
Nonaccrual loans and leases:

Total nonperforming assets	$42,480	$46,746	$45,267	$72,476	$88,712
Nonperforming loans and leases to loans and leases, net of unearned discount	0.96 %	1.04 %	1.11 %	1.84 %	2.45 %
Nonperforming assets to loans and leases and operating leases, net of unearned discount	1.13 %	1.29 %	1.25 %	2.28 %	2.81 %

Potential Problem Loans — Potential problem loans consist of loans that are performing but for which management has concerns about the ability of a borrower to continue to comply with repayment terms because of the borrower's potential operating or financial difficulties. Management monitors these loans closely and reviews their performance on a regular basis. As of December 31, 2014 and 2013, we had $16.18 million and $4.33 million, respectively, in loans of this type which are not included in either of the non-accrual or 90 days past due loan categories. At December 31, 2014, potential problem loans consisted of three foreign aircraft credit relationships. Weakness in these companies' operating performance and payment patterns has caused us to heighten attention given to these credits.

Foreign Outstandings — Our foreign loan and lease outstandings, all denominated in U.S. dollars except for one loan denominated in Euros at December 31, 2013, which was not significant, were $224.51 million and $270.30 million as of December 31, 2014 and 2013, respectively. Foreign loans and leases are in aircraft financing. Loan and lease outstandings to borrowers in Brazil and Mexico were $105.39 million and $100.76 million as of December 31, 2014, respectively, compared to $142.79 million and $77.96 million as of December 31, 2013, respectively. Outstanding balances to borrowers in other countries were insignificant.

INVESTMENT PORTFOLIO

The amortized cost of securities at year-end 2014 decreased from 2013, following a decrease from year-end 2012 to year-end 2013. The amortized cost of securities at December 31, 2014 was $776.06 million or 16.07% of total assets, compared to $822.16 million or 17.41% of total assets at December 31, 2013.

Table of Contents

The following table shows the amortized cost of securities available-for-sale as of December 31.

(Dollars in thousands)	2014	2013	2012
U.S. Treasury and Federal agencies securities	$371,878	$394,558	$410,983
U.S. States and political subdivisions securities	121,510	120,416	100,055
Mortgage-backed securities — Federal agencies	248,299	273,495	301,136
Corporate debt securities	31,677	30,828	30,897
Foreign government and other securities	800	700	3,700
Marketable equity securities	1,893	2,166	2,368
Total investment securities available-for-sale	$776,057	$822,163	$849,139

Yields on tax-exempt obligations are calculated on a fully tax equivalent basis assuming a 35% tax rate. The following table shows the maturities of securities available-for-sale at December 31, 2014, at the amortized costs and weighted average yields of such securities.

(Dollars in thousands)	Amount	Yield	
U.S. Treasury and Federal agencies securities			
Under 1 year	$15,501	2.27	%
1 – 5 years	356,377	1.53

1 – 5 years	600	1.98	
5 – 10 years	—	—	
Over 10 years	—	—	
Total Foreign government and other securities	800	1.80	
Mortgage-backed securities — Federal agencies	248,299	2.43	
Marketable equity securities	1,893	6.74	
Total investment securities available-for-sale	$776,057	2.21	%

At December 31, 2014, the residential mortgage-backed securities we held consisted primarily of GNMA, FNMA and FHLMC pass-through certificates (Government Sponsored Enterprise, GSEs). The type of loans underlying the securities were all conforming loans at the time of issuance. The underlying GSE backing these mortgage-backed securities are rated Aaa or AA+ from the rating agencies. At December 31, 2014, the vintage of the underlying loans comprising our securities are: 24% in the years 2013 and 2014; 40% in the years 2011 and 2012; 25% in the years 2009 and 2010; and 11% in years 2008 and prior.

Table of Contents

DEPOSITS

The following table shows the average daily amounts of deposits and rates paid on such deposits.

	2014		2013		2012	
(Dollars in thousands)	Amount	Rate	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	$762,050	— %	$690,326	— %	$616,426	— %
Interest bearing demand deposits	1,296,929	0.12	1,234,145	0.13	1,151,617	0.16
Savings deposits	710,216	0.08	691,942	0.09	656,245	0.14
Time deposits	1,008,548	0.91	1,084,096	1.33	1,149,923	1.66
Total deposits	$3,777,743		$3,700,509		$3,574,211	

See Part II, Item 8, Financial Statements and Supplementary Data — Note 10 of the Notes to Consolidated Financial Statements for additional information on deposits.

SHORT-TERM BORROWINGS

The following table shows the distribution of our short-term borrowings and the weighted average interest rates thereon at the end of each of the last three years. Also provided are the maximum amount of borrowings and the average amount of borrowings, as well as weighted average interest rates for the last three years.

(Dollars in thousands)	Federal Funds Purchased and Securities Repurchase Agreements	Commercial Paper	Other Short-Term Borrowings	Total Borrowings
2014				
Balance at December 31, 2014	$138,843	$11,778	$95,201	$245,822
Maximum amount outstanding at any month-end	230,075	17,245	155,573	402,893
Average amount outstanding	143,270	13,137	106,970	263,377
Weighted average interest rate during the year	0.15 %	0.26 %	0.27 %	0.21 %
Weighted average interest rate for outstanding amounts at December 31, 2014	0.13 %	0.27 %	0.29 %	0.20 %
2013				
Balance at December 31, 2013	$181,120	$10,814	$122,197	$314,131
Maximum amount outstanding at any month-end	181,120	16,552	122,197	319,869
Average amount outstanding	121,294	9,035	24,475	154,804
Weighted average interest rate during the year	0.11 %	0.22 %	0.22 %	0.14 %
Weighted average interest rate for outstanding amounts at December 31, 2013	0.17 %	0.24 %	0.28 %	0.22 %
2012				
Balance at December 31, 2012	$158,680	$3,469	$7,039	$169,188
Maximum amount outstanding at any month-end	189,150	10,114	11,531	210,795
Average amount outstanding	121,495	6,739	9,703	137,937
Weighted average interest rate during the year	0.13 %	0.21 %	— %	0.12 %
Weighted average interest rate for outstanding amounts at December 31, 2012	0.20 %	0.22 %	— %	0.19 %

LIQUIDITY

Core Deposits — Our major source of investable funds is provided by stable core deposits consisting of all interest bearing and noninterest bearing deposits, excluding brokered certificates of deposit and certain certificates of deposit over $250,000 based on established FDIC insured deposits. In 2014, average core deposits equaled 74.85% of average total assets, compared to 78.35% in 2013 and 77.32% in 2012. The effective rate of core deposits in 2014 was 0.28%, compared to 0.43% in 2013 and 0.58% in 2012.

Average noninterest bearing core deposits increased 10.39% in 2014 compared to an increase of 11.99% in 2013. These represented 21.18% of total core deposits in 2014, compared to 19.12% in 2013, and 17.82% in 2012.

Table of Contents

Purchased Funds — We use purchased funds to supplement core deposits, which include certain certificates of deposit over $250,000, brokered certificates of deposit, over-night borrowings, securities sold under agreements to repurchase, commercial paper, and other short-term borrowings. Purchased funds are raised from customers seeking short-term investments and are used to manage the Bank’s interest rate sensitivity. During 2014, our reliance on purchased funds increased to 9.23% of average total assets from 5.31% in 2013.

Shareholders’ Equity — Average shareholders’ equity equated to 12.52% of average total assets in 2014, compared to 12.49% in 2013. Shareholders’ equity was 12.72% of total assets at year-end 2014, compared to 12.39% at year-end 2013. We include unrealized gains (losses) on available-for-sale securities, net of income taxes, in accumulated other comprehensive income (loss) which is a component of shareholders’ equity. While regulatory capital adequacy ratios exclude unrealized gains (losses), it does impact our equity as reported in the audited financial statements. The unrealized gains (losses) on available-for-sale securities, net of income taxes, were $9.41 million and $6.58 million at December 31, 2014 and 2013, respectively.

Other Liquidity — Under Indiana law governing the collateralization of public fund deposits, the Indiana Board of Depositories determines which financial institutions are required to pledge collateral based on the strength of their financial ratings. We have been informed that no collateral is required for our public fund deposits. However, the Board of Depositories could alter this requirement in the future and adversely impact our liquidity. Our potential liquidity exposure if we must pledge collateral is approximately $548 million.

Liquidity Risk Management — The Bank’s liquidity is monitored and closely managed by the Asset/Liability Management Committee (ALCO), whose members are comprised of the Bank’s senior management. Asset and liability management includes the management of interest rate sensitivity and the maintenance of an adequate liquidity position. The purpose of interest rate sensitivity management is to stabilize net interest income during periods of changing interest rates.

Liquidity management is the process by which the Bank ensures that adequate liquid funds are available to meet financial commitments on a timely basis. Financial institutions must maintain liquidity to meet day-to-day requirements of depositors and borrowers, take advantage of market opportunities and provide a cushion against unforeseen needs.

Liquidity of the Bank is derived primarily from core deposits, principal payments received on loans, the sale and maturity of investment securities, net cash provided by operating activities, and access to other funding sources. The most stable source of liability-funded liquidity is deposit growth and retention of the core deposit base. The principal source of asset-funded liquidity is available-for-sale investment securities, cash and due from banks, overnight investments, securities purchased under agreements to resell, and loans and interest bearing deposits with other banks maturing within one year. Additionally, liquidity is provided by repurchase agreements, and the ability to borrow from the Federal Reserve Bank (FRB) and the Federal Home Loan Bank (FHLB).

The Bank’s liquidity strategy is guided by internal policies and the Interagency Policy Statement on Funding and Liquidity Risk Management. Internal guidelines consist of:

(i) Available Liquidity (sum of short term borrowing capacity) greater than $500 million;
(ii) Liquidity Ratio (total of net cash, short term investments and unpledged marketable assets divided by the sum of net deposits and short term liabilities) greater than 15%;
(iii) Dependency Ratio (net potentially volatile liabilities minus short term investments divided by total earning assets minus short term investments) less than 15%; and
(iv) Loans to Deposits Ratio less than 100%

At December 31, 2014, we were in compliance with the foregoing internal policies and regulatory guidelines.

The Bank also maintains a contingency funding plan that assesses the liquidity needs under various scenarios of market conditions, asset growth and credit rating downgrades. The plan includes liquidity stress testing which measures various sources and uses of funds under the different scenarios. The contingency plan provides for ongoing monitoring of unused borrowing capacity and available sources of contingent liquidity to prepare for unexpected liquidity needs and to cover unanticipated events that could affect liquidity.

We have borrowing sources available to supplement deposits and meet our funding needs. 1st Source Bank has established relationships with several banks to provide short term borrowings in the form of federal funds purchased.

While at December 31, 2014 there was $10.50 million outstanding, we could borrow approximately $254.50 million in additional funds for a short time from these banks on a collective basis. As of December 31, 2014, we had $128.58 million outstanding in FHLB advances and could borrow an additional $79.34 million. We also had $377.16 million available to borrow from the FRB with no amounts outstanding as of December 31, 2014.

Table of Contents

Interest Rate Risk Management — ALCO monitors and manages the relationship of earning assets to interest bearing liabilities and the responsiveness of asset yields, interest expense, and interest margins to changes in market interest rates. In the normal course of business, we face ongoing interest rate risks and uncertainties. We may utilize interest rate swaps to partially manage the primary market exposures associated with the interest rate risk related to underlying assets, liabilities, and anticipated transactions.

A hypothetical change in net interest income was modeled by calculating an immediate 200 basis point (2.00%) and 100 basis point (1.00%) increase and a 100 basis point (1.00%) decrease in interest rates across all maturities. The following table shows the aggregate hypothetical impact to pre-tax net interest income.

	Percentage Change in Net Interest Income			
	December 31, 2014		December 31, 2013	
Basis Point Interest Rate Change	12 Months	24 Months	12 Months	24 Months
Up 200	1.12%	8.15%	(0.81)%	3.36%
Up 100	(0.23)%	3.50%	(1.36)%	0.73%
Down 100	(1.94)%	(6.11)%	(1.18)%	(4.45)%

The earnings simulation model excludes the earnings dynamics related to how fee income and noninterest expense may be affected by changes in interest rates. Actual results may differ materially from those projected. The use of this methodology to quantify the market risk of the balance sheet should not be construed as an endorsement of its accuracy or the accuracy of the related assumptions.

At December 31, 2014 and 2013, the impact of these hypothetical fluctuations in interest rates on our derivative holdings was not significant, and, as such, separate disclosure is not presented. We manage the interest rate risk related to mortgage loan commitments by entering into contracts for future delivery of loans with outside parties. See Part II, Item 8, Financial Statements and Supplementary Data — Note 18 of the Notes to Consolidated Financial Statements.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

In the ordinary course of operations, we enter into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises and equipment. The following table summarizes our significant fixed, determinable, and estimated contractual obligations, by payment date, at December 31, 2014, except for obligations associated with short-term borrowing arrangements. Payments for borrowings do not include interest. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

The following table shows contractual obligation payments by period.

(Dollars in thousands)	Note	0 – 1 Year	1 – 3 Years	3 – 5 Years	Over 5 Years	Indeterminate maturity	Total
Deposits without stated maturity	—	$2,824,935	$—	$—	$—	$—	$2,824,935
Certificates of deposit	10	437,478	356,422	164,156	19,869	—	977,925
Long-term debt	11	1,068	32,467	1,526	5,493	15,678	56,232
Subordinated notes	12	—	—	—	58,764	—	58,764
Operating leases	18	3,162	5,335	4,450	3,123	—	16,070
Purchase obligations	—	22,793	2,563	1,584	1,080	—	28,020
Total contractual obligations		$3,289,436	$396,787	$171,716	$88,329	$15,678	$3,961,946

We routinely enter into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination of the contract. We have made a diligent effort to estimate such payments and penalties, where applicable. Additionally, where necessary, we have made reasonable estimates as to certain purchase obligations as of December 31, 2014. Our management has used the best information available to make the estimations necessary to value the related purchase obligations. Our management is not aware of any additional commitments or contingent liabilities which may have a material adverse impact on our liquidity or capital resources at year-end 2014.

We also enter into derivative contracts under which we are required to either receive cash from, or pay cash to, counterparties depending on changes in interest rates. Derivative contracts are carried at fair value on the consolidated balance sheet with the fair value representing the net present value of expected future cash receipts or payments based on market interest rates as of the balance sheet date. The fair value of the contracts changes daily as market interest rates change. Because the derivative assets and liabilities recorded on the balance sheet at December 31, 2014 do not necessarily represent the amounts that may ultimately be paid under these contracts, these assets and liabilities are not included in the table of contractual obligations presented above.

Table of Contents

Assets under management and assets under custody are held in fiduciary or custodial capacity for our clients. In accordance with U.S. generally accepted accounting principles, these assets are not included on our balance sheet. We are also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our clients. These financial instruments include commitments to extend credit and standby letters of credit. Further discussion of these commitments is included in Part II, Item 8, Financial Statements and Supplementary Data — Note 18 of the Notes to Consolidated Financial Statements.

QUARTERLY RESULTS OF OPERATIONS

The following table sets forth unaudited consolidated selected quarterly statement of operations data for the years ended December 31, 2014 and 2013.

Three Months Ended (Dollars in thousands, except per share amounts)	March 31	June 30	September 30	December 31
2014				
Interest income	$43,355	$44,850	$45,152	$45,196
Interest expense	4,737	4,688	4,442	4,357
Net interest income	38,618	40,162	40,710	40,839
Provision for (recovery of) loan and lease losses	804	2,543	1,206	(820)
Gains on investment securities available-for-sale	963	—	—	—
Income before income taxes	21,239	22,416	21,243	19,544
Net income	13,632	14,494	14,947	14,996
Diluted net income per common share	0.55	0.59	0.62	0.62
2013				
Interest income	$43,878	$44,611	$46,966	$44,130
Interest expense	6,124	5,740	5,808	5,096
Net interest income	37,754	38,871	41,158	39,034
Provision for (recovery of) loan and lease losses	757	1,293	(419)	(859)
Losses on investment securities available-for-sale	—	—	(28)	(140)
Income before income taxes	19,395	21,955	23,305	19,288
Net income	12,404	13,942	14,896	13,716
Diluted net income per common share	0.50	0.56	0.60	0.56

Net income was $15.00 million for the fourth quarter of 2014, compared to the $13.72 million of net income reported for the fourth quarter of 2013. Diluted net income per common share for the fourth quarter of 2014 amounted to $0.62, compared to $0.56 per common share reported in the fourth quarter of 2013.

The net interest margin was 3.61% for the fourth quarter of 2014 versus 3.59% for the same period in 2013. Tax-equivalent net interest income was $41.29 million for the fourth quarter of 2014, up 4.53% from 2013's fourth quarter.

Our recovery of provision for loan and lease losses was $(0.82) million in the fourth quarter of 2014 compared to a recovery of provision for loan and lease losses of $(0.86) million in the fourth quarter of 2013. Net charge-offs were $1.51 million for the fourth quarter 2014, compared to net charge-offs of $0.14 million a year ago.

Noninterest income for the fourth quarter of 2014 was $19.88 million, compared to $17.99 million for the fourth quarter of 2013. Noninterest expense for the fourth quarter of 2014 was $41.99 million and was $38.59 million in the fourth quarter 2013.

The provision for income taxes included a one-time benefit of $2.12 million for the fourth quarter of 2014 which resulted in a lower effective tax rate. This benefit was the result of a reduction in uncertain tax positions due to settlements with taxing authorities and the lapse of the applicable statute of limitations.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of 1st Source Corporation

We have audited 1st Source Corporation's (the “Company's”) internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). 1st Source Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, 1st Source Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014 based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of 1st Source Corporation as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders’ equity and cash flows for each of the three years in the period ended December 31, 2014 and our report dated February 20, 2015 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of 1st Source Corporation

We have audited the accompanying consolidated statements of financial condition of 1st Source Corporation (“the Company”) as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders’ equity, and cash flows for each of the three years in the period ended December 31, 2014. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion

on these financial statements based on our audits.
We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of 1st Source Corporation at December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.
We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), 1st Source Corporation's internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria) and our report dated February 20, 2015 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Accounting Policies

1st Source Corporation is a bank holding company headquartered in South Bend, Indiana that provides, through its subsidiaries (collectively referred to as "1st Source" or "the Company"), a broad array of financial products and services. 1st Source Bank ("Bank"), its banking subsidiary, offers commercial and consumer banking services, trust and investment management services, and insurance to individual and business clients in Indiana and Michigan. The following is a summary of significant accounting policies followed in the preparation of the consolidated financial statements.

Basis of Presentation — The financial statements consolidate 1st Source and its subsidiaries (principally the Bank). All significant intercompany balances and transactions have been eliminated. For purposes of the parent company only financial information presented in Note 22, investments in subsidiaries are carried at equity in the underlying net assets.

Use of Estimates in the Preparation of Financial Statements — Financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) require the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Business Combinations — Business combinations are accounted for under the purchase method of accounting. Under the purchase method, assets and liabilities of the business acquired are recorded at their estimated fair values as of the date of acquisition with any excess of the cost of the acquisition over the fair value of the net tangible and intangible assets acquired recorded as goodwill. Results of operations of the acquired business are included in the income statement from the date of acquisition.

Cash Flows — For purposes of the consolidated and parent company only statements of cash flows, the Company considers cash and due from banks, federal funds sold and interest bearing deposits with other banks with original maturities of three months or less as cash and cash equivalents.

Securities — Securities that the Company has the ability and positive intent to hold to maturity are classified as investment securities held-to-maturity. Held-to-maturity investment securities, when present, are carried at amortized cost. As of December 31, 2014 and 2013, the Company held no securities classified as held-to-maturity. Securities that may be sold in response to, or in anticipation of, changes in interest rates and resulting prepayment risk, or for other factors, are classified as available-for-sale and are carried at fair value. Unrealized gains and losses on these securities are reported, net of applicable taxes, as a separate component of accumulated other comprehensive income (loss) in shareholders' equity.

The initial indication of other-than-temporary impairment (OTTI) for both debt and equity securities is a decline in fair value below amortized cost. Quarterly, any impaired securities are analyzed on a qualitative and quantitative basis in determining OTTI. Declines in the fair value of available-for-sale debt securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income. In estimating OTTI impairment losses, the Company considers among other things, (i) the length of time and the extent to which fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) whether it is more likely than not that the Company will not have to sell any such securities before an anticipated recovery of cost.

Debt and equity securities that are purchased and held principally for the purpose of selling them in the near term are classified as trading account securities and are carried at fair value with unrealized gains and losses reported in earnings. Realized gains and losses on the sales of all securities are reported in earnings and computed using the specific identification cost basis.

Other investments consist of shares of Federal Home Loan Bank of Indianapolis (FHLBI) and Federal Reserve Bank stock. As restricted member stocks, these investments are carried at cost. Both cash and stock dividends received on the stocks are reported as income. Quarterly, the Company reviews its investment in FHLBI for impairment. Factors considered in determining impairment are: history of dividend payments; determination of cause for any net loss;

adequacy of capital; and review of the most recent financial statements. As of December 31, 2014 and 2013, it was determined that the Company's investment in FHLBI stock is appropriately valued at cost, which equates to par value. In addition, other investments include interest bearing deposits with other banks with original maturities of greater than three months. These investments are in denominations, including accrued interest, that are fully insured by the FDIC.

Loans and Leases — Loans are stated at the principal amount outstanding, net of unamortized deferred loan origination fees and costs and net of unearned income. Interest income is accrued as earned based on unpaid principal balances. Origination fees and direct loan and lease origination costs are deferred and the net amount amortized to interest income over the estimated life of the related loan or lease. Loan commitment fees are deferred and amortized into other income over the commitment period.

Direct financing leases are carried at the aggregate of lease payments plus estimated residual value of the leased property, net of unamortized deferred lease origination fees and costs and unearned income. Interest income on direct financing leases is recognized over the term of the lease to achieve a constant periodic rate of return on the outstanding investment.

Table of Contents

The accrual of interest on loans and leases is discontinued when a loan or lease becomes contractually delinquent for 90 days, or when an individual analysis of a borrower's credit worthiness indicates a credit should be placed on nonperforming status, except for residential mortgage loans and consumer loans that are well secured and in the process of collection. Residential mortgage loans are placed on nonaccrual at the time the loan is placed in foreclosure. When interest accruals are discontinued, interest credited to income in the current year is reversed and interest accrued in the prior year is charged to the reserve for loan and lease losses. However, in some cases, the Company may elect to continue the accrual of interest when the net realizable value of collateral is sufficient to cover the principal and accrued interest. When a loan or lease is classified as nonaccrual and the future collectibility of the recorded loan or lease balance is doubtful, collections on interest and principal are applied as a reduction to principal outstanding. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured, which is typically evidenced by a sustained repayment performance of at least six months.

A loan or lease is considered impaired, based on current information and events, if it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. Interest on impaired loans and leases, which are not classified as nonaccrual, is recognized on the accrual basis. The Company evaluates loans and leases exceeding $100,000 for impairment and establishes a specific reserve as a component of the reserve for loan and lease losses when it is probable all amounts due will not be collected pursuant to the contractual terms of the loan or lease and the recorded investment in the loan or lease exceeds its fair value.

Loans and leases that have been modified and economic concessions have been granted to borrowers who have experienced financial difficulties are considered a troubled debt restructuring (TDR) and, by definition, are deemed an impaired loan. These concessions typically result from the Company's loss mitigation activities and may include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Certain TDRs are classified as nonperforming at the time of restructuring and typically are returned to performing status after considering the borrower's sustained repayment performance for a reasonable period of at least six months.

When the Company modifies loans and leases in a TDR, it evaluates any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan or lease agreement, or uses the current fair value of the collateral, less selling costs for collateral dependent loans. If the Company determines that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through a reserve for loan and lease losses estimate or a charge-off to the reserve for loan and lease losses. In periods subsequent to modification, the Company evaluates all TDRs, including those that have payment defaults, for possible impairment and recognizes impairment through the reserve for loan and lease losses.

The Company sells mortgage loans to the Government National Mortgage Association (GNMA) in the normal course of business and retains the servicing rights. The GNMA programs under which the loans are sold allow the Company to repurchase individual delinquent loans that meet certain criteria from the securitized loan pool. At its option, and without GNMA's prior authorization, the Company may repurchase a delinquent loan for an amount equal to 100% of the remaining principal balance on the loan. Once the Company has the unconditional ability to repurchase a delinquent loan, the Company is deemed to have regained effective control over the loan and the Company is required to recognize the loan on its balance sheet and record an offsetting liability, regardless of its intent to repurchase the loan. At December 31, 2014 and 2013, residential real estate portfolio loans included $5.20 million and $6.73 million, respectively, of loans available for repurchase under the GNMA optional repurchase programs with the offsetting liability recorded within other short-term borrowings.

Mortgage Banking Activities — Loans held for sale are composed of performing one-to-four family residential mortgage loans originated for resale. Mortgage loans originated with the intent to sell are carried at fair value.

The Company recognizes the rights to service mortgage loans for others as separate assets, whether the servicing rights are acquired through a separate purchase or through the sale of originated loans with servicing rights retained. The Company allocates a portion of the total proceeds of a mortgage loan to servicing rights based on the relative fair value. These assets are amortized as reductions of mortgage servicing fee income over the estimated servicing period

in proportion to the estimated servicing income to be received. Gains and losses on the sale of MSRs are recognized in Noninterest Income on the Statements of Income in the period in which such rights are sold.

MSRs are evaluated for impairment at each reporting date. For purposes of impairment measurement, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. If temporary impairment exists within a tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced through a recovery of income.

Table of Contents

MSRs are also reviewed for other-than-temporary impairment. Other-than-temporary impairment exists when recoverability of a recorded valuation allowance is determined to be remote considering historical and projected interest rates, prepayments, and loan pay-off activity. When this situation occurs, the unrecoverable portion of the valuation allowance is applied as a direct write-down to the carrying value of the MSRs. Unlike a valuation allowance, a direct write-down permanently reduces the carrying value of the MSRs and the valuation allowance, precluding subsequent recoveries.

As part of mortgage banking operations, the Company enters into commitments to originate loans whereby the interest rate on these loans is determined prior to funding ("rate lock commitments"). Similar to loans held for sale, the fair value of rate lock commitments is subject to change primarily due to changes in interest rates. Under the Company's risk management policy, these fair values are hedged primarily by selling forward contracts on agency securities. The rate lock commitments on mortgage loans intended to be sold and the related hedging instruments are recorded at fair value with changes in fair value recorded in current earnings.

Reserve for Loan and Lease Losses — The reserve for loan and lease losses is maintained at a level believed to be appropriate by the Company to absorb probable losses inherent in the loan and lease portfolio. The determination of the reserve requires significant judgment reflecting the Company's best estimate of probable loan and lease losses related to specifically identified impaired loans and leases as well as probable losses in the remainder of the various loan and lease portfolios. For purposes of determining the reserve, the Company has segmented loans and leases into classes based on the associated risk within these segments. The Company has determined that eight classes exist within the loan and lease portfolio. The methodology for assessing the appropriateness of the reserve consists of several key elements, which include: specific reserves for impaired loans, formula reserves for each business lending division portfolio including percentage allocations for special attention loans and leases not deemed impaired, and reserves for pooled homogenous loans and leases. The Company's evaluation is based upon a continuing review of these portfolios, estimates of customer performance, collateral values and dispositions, and assessments of economic and geopolitical events, all of which are subject to judgment and will change.

Specific reserves are established for certain business and specialty finance credits based on a regular analysis of special attention loans and leases. This analysis is performed by the Credit Policy Committee (CPC), the Loan Review Department, Credit Administration, and the Loan Workout Departments. The specific reserves are based on an analysis of underlying collateral values, cash flow considerations and, if applicable, guarantor capacity. Sources for determining collateral values include appraisals, evaluations, auction values and industry guides. Generally, for loans secured by commercial real estate and dependent on cash flows from the underlying collateral to service the debt, a new appraisal is obtained at the time the credit is deemed to be impaired. For non-income producing commercial real estate, an appraisal or evaluation is ordered depending on an analysis of the underlying factors, including an assessment of the overall credit worthiness of the borrower, the value of non-real estate collateral supporting the transaction and the date of the most recent existing appraisal or evaluation. An evaluation may be performed in lieu of obtaining a new appraisal for less complex transactions secured by local market properties. Values based on evaluations are discounted more heavily than those determined by appraisals when calculating loan impairment. Appraisals, evaluations and industry guides are used to determine aircraft values. Appraisals, industry guides and auction values are used to determine construction equipment, truck and auto values.

The formula reserves determined for each business lending division portfolio are calculated quarterly by applying loss factors to outstanding loans and leases based upon a review of historical loss experience and qualitative factors, which include but are not limited to, economic trends, current market risk assessment by industry, recent loss experience in particular segments of the portfolios, movement in equipment values collateralizing specialized industry portfolios, concentrations of credit, delinquencies, trends in volume, experience and depth of relationship managers and division management, and the effects of changes in lending policies and practices, including changes in quality of the loan and lease origination, servicing and risk management processes. Special attention loans and leases without specific reserves receive a higher percentage allocation ratio than credits not considered special attention.

Pooled loans and leases are smaller credits and are homogenous in nature, such as consumer credits and residential mortgages. Pooled loan and lease loss reserves are based on historical net charge-offs, adjusted for delinquencies, the effects of lending practices and programs and current economic conditions, and current trends in the geographic

markets which the Company serves.

A comprehensive analysis of the reserve is performed on a quarterly basis by reviewing all loans and leases over a fixed dollar amount ($100,000) where the internal credit quality grade is at or below a predetermined classification. Although the Company determines the amount of each element of the reserve separately and relies on this process as an important credit management tool, the entire reserve is available for the entire loan and lease portfolio. The actual amount of losses incurred can vary significantly from the estimated amounts both positively and negatively. The Company's methodology includes several factors intended to minimize the difference between estimated and actual losses. These factors allow the Company to adjust its estimate of losses based on the most recent information available.

Table of Contents

Impaired loans are reviewed quarterly to assess the probability of being able to collect the portion considered impaired. When a review and analysis of the underlying credit and collateral indicates ultimate collection is improbable, the deficiency is charged-off and deducted from the reserve. Loans and leases, which are deemed uncollectible or have a low likelihood of collection, are charged-off and deducted from the reserve, while recoveries of amounts previously charged-off are credited to the reserve. A (recovery of) provision for loan and lease losses is credited or charged to operations based on the Company's periodic evaluation of the factors previously mentioned, as well as other pertinent factors.

Equipment Owned Under Operating Leases — The Company finances various types of construction equipment, medium and heavy duty trucks, automobiles and other equipment under leases classified as operating leases. The equipment underlying the operating leases is reported at cost, net of accumulated depreciation, in the Statements of Financial Condition. These operating lease arrangements require the lessee to make a fixed monthly rental payment over a specified lease term generally ranging from three to seven years. Revenue consists of the contractual lease payments and is recognized on a straight-line basis over the lease term and reported as noninterest income. Leased assets are being depreciated on a straight-line method over the lease term to the estimate of the equipment's fair market value at lease termination, also referred to as "residual" value. The depreciation of these operating lease assets is reported as Noninterest Expense on the Statements of Income. For automobile leases, fair value is based upon published industry market guides. For other equipment leases, fair value may be based upon observable market prices, third-party valuations, or prices received on sales of similar assets at the end of the lease term. These residual values are reviewed periodically to ensure the recorded amount does not exceed the fair market value at the lease termination. At the end of the lease, the operating lease asset is either purchased by the lessee or returned to the Company.

Other Real Estate — Other real estate acquired through partial or total satisfaction of nonperforming loans is included in Other Assets and recorded at fair value less anticipated selling costs based upon the property's appraised value at the date of transfer, with any difference between the fair value of the property less cost to sell, and the carrying value of the loan charged to the reserve for loan losses or other income, if a positive adjustment. Other real estate also includes bank premises qualifying as held for sale. Bank premises are transferred at fair value less anticipated selling costs. Subsequent fair value write-downs or write-ups, to the extent of previous write-downs, property maintenance costs, and gains or losses recognized upon the sale of other real estate are recognized in Noninterest Expense on the Statements of Income. Gains or losses resulting from the sale of other real estate are recognized on the date of sale. As of December 31, 2014 and 2013, other real estate had carrying values of $1.74 million and $5.49 million, respectively, and is included in Other Assets in the Statements of Financial Condition.

Repossessed Assets — Repossessed assets may include fixtures and equipment, inventory and receivables, aircraft, construction equipment, and vehicles acquired from business banking and specialty finance activities. Repossessed assets are included in Other Assets at fair value of the equipment or vehicle less estimated selling costs. At the time of repossession, the recorded amount of the loan or lease is written down to the fair value of the equipment or vehicle by a charge to the reserve for loan and lease losses or other income, if a positive adjustment. Subsequent fair value write-downs or write-ups, to the extent of previous write-downs, equipment maintenance costs, and gains or losses recognized upon the sale of repossessions are recognized in Noninterest Expense on the Statements of Income. Gains or losses resulting from the sale of repossessed assets are recognized on the date of sale. Repossessed assets totaled $5.16 million and $4.26 million, as of December 31, 2014 and 2013, respectively, and are included in Other Assets in the Statements of Financial Condition.

Premises and Equipment — Premises and equipment are stated at cost, less accumulated depreciation and amortization. The provision for depreciation is computed by the straight-line method, primarily with useful lives ranging from three to 31.5 years. Maintenance and repairs are charged to expense as incurred, while improvements, which extend the useful life, are capitalized and depreciated over the estimated remaining life.

Goodwill and Intangibles — Goodwill represents the excess of the cost of businesses acquired over the fair value of the net assets acquired. Other intangible assets represent purchased assets that also lack physical substance but can be distinguished from goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset, or liability. Goodwill is reviewed for impairment at least annually or on an interim basis if an event occurs or circumstances change that would more likely

than not reduce the carrying amount. Goodwill is allocated into two reporting units. Fair value for each reporting unit is estimated using stock price multiples or revenue multiples. Intangible assets that have finite lives are amortized over their estimated useful lives and are subject to impairment testing. All of the Company's other intangible assets have finite lives and are amortized on a straight-line basis over varying periods not exceeding eleven years. The Company performed the required annual impairment test of goodwill during the fourth quarter of 2014 and determined that no impairment exists.

Partnership Investment — The Company accounts for its investments in partnerships for which it owns three percent or more of the partnership on the equity method. The partnerships in which the Company has investments account for their investments at fair value. As a result, the Company's investments in these partnerships reflect the underlying fair value of the partnerships' investments. The Company accounts for its investments in partnerships of which it owns less than three percent at the lower of cost or fair value. Investments in partnerships are included in Other Assets in the Statements of Financial Condition. The balances as of December 31, 2014 and 2013 were $2.78 million and $4.28 million, respectively.

Short-Term Borrowings — Short-term borrowings consist of Federal funds purchased, securities sold under agreements to repurchase, commercial paper, Federal Home Loan Bank notes, and borrowings from non-affiliated banks. Federal funds purchased, securities sold under agreements to repurchase, and other short-term borrowings mature within one to 365 days of the transaction date. Commercial paper matures within seven to 270 days. Other short-term borrowings in the Statements of Financial Condition include the Company's liability related to mortgage loans available for repurchase under GNMA optional repurchase programs.
Securities purchased under agreements to resell and securities sold under agreements to repurchase are treated as collateralized financing transactions and are recorded at the amounts at which the securities were acquired or sold plus accrued interest. The fair value of collateral either received from or provided to a third party is continually monitored and additional collateral obtained or requested to be returned to the Company as deemed appropriate.
Trust Fees — Trust fees are recognized on the accrual basis.
Income Taxes — 1st Source and its subsidiaries file a consolidated Federal income tax return. The provision for incomes taxes is based upon income in the consolidated financial statements, rather than amounts reported on the income tax return. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance, if needed, reduces deferred tax assets to the expected amount most likely to be realized. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. Although realization is not assured, the Company believes it is more likely than not that all of the deferred tax assets will be realized.
Positions taken in the tax returns may be subject to challenge by the taxing authorities upon examination. Uncertain tax positions are initially recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are both initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the tax authority, assuming full knowledge of the position and all relevant facts. The Company provides for interest and, in some cases, penalties on tax positions that may be challenged by the taxing authorities. Interest expense is recognized beginning in the first period that such interest would begin accruing. Penalties are recognized in the period that the Company claims the position in the tax return. Interest and penalties on income tax uncertainties are classified within Income Tax Expense in the Statements of Income.
Net Income Per Common Share — Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding. Diluted earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding, plus the dilutive effect of outstanding stock options, stock warrants and nonvested stock-based compensation awards.
Stock-Based Employee Compensation — The Company recognizes stock-based compensation as compensation cost in the Statements of Income based on their fair values on the measurement date, which, for its purposes, is the date of grant. The Company accounts for stock-based compensation using the modified prospective transition method.
Segment Information — 1st Source has one principal business segment, commercial banking. While our chief decision makers monitor the revenue streams of various products and services, the identifiable segments' operations are managed and financial performance is evaluated on a company-wide basis. Accordingly, all of the Company's financial service operations are considered to be aggregated in one reportable operating segment.
Derivative Financial Instruments — The Company occasionally enters into derivative financial instruments as part of its interest rate risk and foreign currency risk management strategies. These derivative financial instruments consist primarily of interest rate swaps and foreign currency forward contracts. All derivative instruments are recorded on the Statements of Financial Condition, as either an asset or liability, at their fair value. The accounting for the gain or loss resulting from the change in fair value depends on the intended use of the derivative. For a derivative used to hedge changes in fair value of a recognized asset or liability, or an unrecognized firm commitment, the gain or loss on the

derivative will be recognized in earnings together with the offsetting loss or gain on the hedged item. This results in an earnings impact only to the extent that the hedge is ineffective in achieving offsetting changes in fair value. If it is determined that the derivative instrument is not highly effective as a hedge, hedge accounting is discontinued and the adjustment to fair value of the derivative instrument is recorded in earnings. For a derivative used to hedge changes in cash flows associated with forecasted transactions, the gain or loss on the effective portion of the derivative will be deferred, and reported as accumulated other comprehensive income, a component of shareholders' equity, until such time the hedged transaction affects earnings. For derivative instruments not accounted for as hedges, changes in fair value are recognized in noninterest income/expense. Deferred gains and losses from derivatives that are terminated and were in a cash flow hedge are amortized over the shorter of the original remaining term of the derivative or the remaining life of the underlying asset or liability.

Table of Contents

Fair Value Measurements — The Company records certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Securities available for sale, trading securities, mortgage loans held for sale, and derivative instruments are carried at fair value on a recurring basis. Fair value measurements are also utilized to determine the initial value of certain assets and liabilities, to perform impairment assessments, and for disclosure purposes. The Company uses quoted market prices and observable inputs to the maximum extent possible when measuring fair value. In the absence of quoted market prices, various valuation techniques are utilized to measure fair value. When possible, observable market data for identical or similar financial instruments are used in the valuation. When market data is not available, fair value is determined using valuation models that incorporate management's estimates of the assumptions a market participant would use in pricing the asset or liability.

Fair value measurements are classified within one of three levels based on the observability of the inputs used to determine fair value, as follows:

Level 1 — The valuation is based on quoted prices in active markets for identical instruments.

Level 2 — The valuation is based on observable inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 — The valuation is based on unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the instrument. Level 3 valuations are typically performed using pricing models, discounted cash flow methodologies, or similar techniques that incorporate management's own estimates of assumptions that market participants would use in pricing the instrument, or valuations that require significant management judgment or estimation.

Reclassifications — Certain amounts in the prior periods consolidated financial statements have been reclassified to conform with the current year presentation. These reclassifications had no effect on total assets, shareholders' equity or net income as previously reported.

Note 2 — Recent Accounting Pronouncements

Troubled Debt Restructurings by Creditors: In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-14 "Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Classification of Certain Government Guaranteed Mortgage Loans upon Foreclosure." ASU 2014-14 requires that a mortgage loan be derecognized and a separate other receivable be recognized upon foreclosure if certain conditions are met. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. ASU 2014-14 is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2014. The amendments can be applied using either a prospective transition method or a modified retrospective transition method. Early adoption is permitted. The Company adopted ASU 2014-14 on January 1, 2015 and it did not have an impact on its accounting and disclosures.

Share Based Payments: In June 2014, the FASB issued ASU No. 2014-12 "Compensation - Stock Compensation (Topic 718) - Accounting for Share Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." ASU 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for interim and annual periods beginning after December 15, 2015. The amendments can be applied prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented and to all new or modified awards thereafter. Early adoption is permitted. The Company has determined that ASU 2014-12 will not have an impact on its accounting and disclosures.

Repurchase to Maturity Transactions, Repurchase Financings and Disclosures: In June 2014, the FASB issued ASU No. 2014-11 "Transfers and Servicing (Topic 860) - Repurchase to Maturity Transactions, Repurchase Financings, and Disclosures." ASU 2014-11 aligns the accounting for repurchase to maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. ASU 2014-11 is effective for the first

interim or annual period beginning after December 15, 2014. In addition the disclosure of certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. Early adoption is prohibited. The Company adopted ASU 2014-11 on January 1, 2015 and it did not have a material impact on its accounting and disclosures.

Table of Contents

Revenue from Contracts with Customers: In May 2014, the FASB issued ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)." The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this Update recognized at the date of initial application. Early application is not permitted. The Company is assessing the impact of ASU 2014-09 on its accounting and disclosures.

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure: In January 2014, the FASB issued ASU No. 2014-04 "Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure." ASU 2014-04 clarifies when an in substance repossession or foreclosure occurs and requires interim and annual disclosures of the amount of foreclosed residential real estate property and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. ASU 2014-04 is effective either on a modified retrospective transition method or a prospective transition method for interim and annual periods beginning after December 15, 2014. Early adoption is permitted. The Company adopted ASU 2014-04 on January 1, 2015 and it did not have a material impact on its disclosures.

Accounting for Investments in Qualified Affordable Housing Projects: In January 2014, the FASB issued ASU No. 2014-01 "Investments - Equity method and Joint Ventures (Topic 323) - Accounting for Investments in Qualified Affordable Housing Projects." ASU 2014-01 allows investors to use the proportional amortization method to account for investments in limited liability entities that manage or invest in affordable housing projects that qualify for low-income housing tax credits if certain conditions are met. ASU 2014-01 is effective retrospectively for interim and annual periods in fiscal years that begin after December 15, 2014. Early adoption is permitted. The Company adopted ASU 2014-01 on January 1, 2015 and it did not have a material impact on its accounting and disclosures for affordable housing projects.

Note 3 — Investment Securities

The following table shows investment securities available-for-sale.

(Dollars in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2014				
U.S. Treasury and Federal agencies securities	$371,878	$ 3,593	$ (1,968)	$373,503
U.S. States and political subdivisions securities	121,510	3,392	(214)	124,688
Mortgage-backed securities - Federal agencies	248,299	5,490	(781)	253,008
Corporate debt securities	31,677	281	(26)	31,932
Foreign government and other securities	800	11	—	811
Total debt securities	774,164	12,767	(2,989)	783,942
Marketable equity securities	1,893	5,285	(2)	7,176
Total investment securities available-for-sale	$776,057	$ 18,052	$ (2,991)	$791,118
December 31, 2013				
U.S. Treasury and Federal agencies securities	$394,558	$ 5,008	$ (4,527)	$395,039
U.S. States and political subdivisions securities	120,416	3,670	(847)	123,239
Mortgage-backed securities - Federal agencies	273,495	5,148	(3,563)	275,080
Corporate debt securities	30,828	241	(4)	31,065
Foreign government and other securities	700	9	—	709
Total debt securities	819,997	14,076	(8,941)	825,132
Marketable equity securities	2,166	5,404	(2)	7,568
Total investment securities available-for-sale	$822,163	$ 19,480	$ (8,943)	$832,700

At December 31, 2014, the residential mortgage-backed securities held by the Company consisted primarily of GNMA, FNMA and FHLMC pass-through certificates which are guaranteed by those respective agencies of the

United States government (Government Sponsored Enterprise, GSEs).

Table of Contents

The following table shows the contractual maturities of investments in securities available-for-sale at December 31, 2014. Expected maturities will differ from contractual maturities, because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	$28,513	$28,892
Due after one year through five years	451,001	455,126
Due after five years through ten years	44,139	44,644
Due after ten years	2,212	2,272
Mortgage-backed securities	248,299	253,008
Total debt securities available-for-sale	$774,164	$783,942

The following table shows the gross realized gains and losses on sale of securities from the securities available-for-sale portfolio, including marketable equity securities.

(Dollars in thousands)	2014	2013	2012
Gross realized gains	$963	$903	$282
Gross realized losses	—	(1,071)	—
Net realized gains (losses)	$963	$(168)	$282

The following table summarizes gross unrealized losses and fair value by investment category and age.

	Less than 12 Months		12 months or Longer		Total	
(Dollars in thousands)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2014						
U.S. Treasury and Federal agencies securities	$54,944	$(148)	$115,195	$(1,820)	$170,139	$(1,968)
U.S. States and political subdivisions securities	16,805	(112)	8,333	(102)	25,138	(214)
Mortgage-backed securities - Federal agencies	21,754	(62)	32,781	(719)	54,535	(781)
Corporate debt securities	3,072	(26)	—	—	3,072	(26)
Foreign government and other securities	—	—	—	—	—	—
Total debt securities	96,575	(348)	156,309	(2,641)	252,884	(2,989)
Marketable equity securities	—	—	3	(2)	3	(2)
Total temporarily impaired available-for-sale securities	$96,575	$(348)	$156,312	$(2,643)	$252,887	$(2,991)
December 31, 2013						
U.S. Treasury and Federal agencies securities	$153,868	$(4,404)	$15,085	$(123)	$168,953	$(4,527)
U.S. States and political subdivisions securities	37,115	(814)	1,419	(33)	38,534	(847)
Mortgage-backed securities - Federal agencies	99,488	(3,099)	5,352	(464)	104,840	(3,563)
Corporate debt securities	6,332	(4)	—	—	6,332	(4)
Foreign government and other securities	—	—	—	—	—	—
Total debt securities	296,803	(8,321)	21,856	(620)	318,659	(8,941)
Marketable equity securities	—	—	4	(2)	4	(2)
Total temporarily impaired available-for-sale securities	$296,803	$(8,321)	$21,860	$(622)	$318,663	$(8,943)

There were no OTTI write-downs in 2014, 2013 or 2012.

At December 31, 2014, the Company does not have the intent to sell any of the available-for-sale securities in the table above and believes that it is more likely than not that it will not have to sell any such securities before an anticipated recovery of cost. The unrealized losses on debt securities are due to market volatility. The fair value is expected to recover on all debt securities as they approach their maturity date or repricing date or if market yields for such investments decline. The Company does not believe any of the securities are impaired due to reasons of credit

quality.
At December 31, 2014 and 2013, investment securities with carrying values of $231.50 million and $237.42 million, respectively, were pledged as collateral for security repurchase agreements and for other purposes.

Table of Contents

Note 4 — Loan and Lease Financings

Total loans and leases outstanding were recorded net of unearned income and deferred loan fees and costs at December 31, 2014 and 2013, and totaled $3.69 billion and $3.55 billion, respectively. At December 31, 2014 and 2013, net deferred loan and lease costs were $4.00 million and $3.81 million, respectively.

The loan and lease portfolio includes direct financing leases, which are included in auto and light truck, medium and heavy duty truck, aircraft financing, and construction equipment financing on the Statements of Financial Condition.

The following table shows the summary of the gross investment in lease financing and the components of the investment in lease financing at December 31, 2014 and 2013.

(Dollars in thousands)	2014	2013
Direct finance leases:		
Rentals receivable	$234,772	$245,207
Estimated residual value of leased assets	13,458	12,537
Gross investment in lease financing	248,230	257,744
Unearned income	(37,356)	(38,946)
Net investment in lease financing	$210,874	$218,798

At December 31, 2014, the direct financing minimum future lease payments receivable for each of the years 2015 through 2019 were $48.18 million, $41.22 million, $38.29 million, $32.85 million, and $25.14 million, respectively.

In the ordinary course of business, the Company has extended loans to certain directors, executive officers, and principal shareholders of equity securities of 1st Source and to their affiliates. In the opinion of management, these loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with persons not related to the Company and did not involve more than the normal risk of collectability, or present other unfavorable features. The loans are consistent with sound banking practices and within applicable regulatory and lending limitations. The aggregate dollar amounts of these loans were $27.93 million and $17.96 million at December 31, 2014 and 2013, respectively. During 2014, $12.36 million of new loans and other additions were made and repayments and other reductions totaled $2.39 million.

The Company evaluates loans and leases for credit quality at least annually but more frequently if certain circumstances occur (such as material new information which becomes available and indicates a potential change in credit risk). The Company uses two methods to assess credit risk: loan or lease credit quality grades and credit risk classifications. The purpose of the loan or lease credit quality grade is to document the degree of risk associated with individual credits as well as inform management of the degree of risk in the portfolio taken as a whole. Credit risk classifications are used to categorize loans by degree of risk and to designate individual or committee approval authorities for higher risk credits at the time of origination. Credit risk classifications include categories for: Acceptable, Marginal, Special Attention, Special Risk, Restricted by Policy, Regulated and Prohibited by Law.

All loans and leases, except residential real estate loans and consumer loans, are assigned credit quality grades on a scale from 1 to 12 with grade 1 representing superior credit quality. The criteria used to assign grades to extensions of credit that exhibit potential problems or well-defined weaknesses are primarily based upon the degree of risk and the likelihood of orderly repayment, and their effect on our safety and soundness. Loans or leases graded 7 or weaker are considered “special attention” credits and, as such, relationships in excess of $100,000 are reviewed quarterly as part of management’s evaluation of the appropriateness of the reserve for loan and lease losses. Grade 7 credits are defined as “watch” and contain greater than average credit risk and are monitored to limit our exposure to increased risk; grade 8 credits are “special mention” and, following regulatory guidelines, are defined as having potential weaknesses that deserve management’s close attention. Credits that exhibit well-defined weaknesses and a distinct possibility of loss are considered ‘‘classified’’ and are graded 9 through 12 corresponding to the regulatory definitions of “substandard” (grades 9 and 10) and the more severe ‘‘doubtful’’ (grade 11) and ‘‘loss’’ (grade 12).

Table of Contents

The following table shows the credit quality grades of the recorded investment in loans and leases, segregated by class.

	Credit Quality Grades		
(Dollars in thousands)	1-6	7-12	Total
December 31, 2014			
Commercial and agricultural loans	$683,169	$27,589	$710,758
Auto and light truck	380,425	17,477	397,902
Medium and heavy duty truck	243,798	3,355	247,153
Aircraft financing	691,018	36,647	727,665
Construction equipment financing	393,965	5,975	399,940

Total	$2,985,162	$114,843	$3,100,005
December 31, 2013			
Commercial and agricultural loans	$652,620	$26,872	$679,492
Auto and light truck	378,392	13,257	391,649
Medium and heavy duty truck	235,465	2,389	237,854
Aircraft financing	704,997	33,136	738,133
Construction equipment financing	325,849	7,239	333,088
Commercial real estate	557,692	26,305	583,997
Total	$2,855,015	$109,198	$2,964,213

For residential real estate and consumer loans, credit quality is based on the aging status of the loan and by payment activity. The following table shows the recorded investment in residential real estate and consumer loans by performing or nonperforming status. Nonperforming loans are those loans which are on nonaccrual status or are 90 days or more past due.

(Dollars in thousands)	Performing	Nonperforming	Total
December 31, 2014			
Residential real estate	$442,918	$2,841	$445,759
Consumer	142,476	334	142,810
Total	$585,394	$3,175	$588,569
December 31, 2013			
Residential real estate	$458,385	$2,596	$460,981
Consumer	123,663	467	124,130
Total	$582,048	$3,063	$585,111

Table of Contents

The following table shows the recorded investment of loans and leases, segregated by class, with delinquency aging and nonaccrual status.

(Dollars in thousands)	Current	30-59 Days Past Due	60-89 Days Past Due	90 Days or More Past Due and Accruing	Total Accruing Loans	Nonaccrual	Total Financing Receivables

The following table shows the number of loans and leases classified as troubled debt restructuring (TDR) during 2014, 2013 and 2012, segregated by class, as well as the recorded investment as of December 31. The classification between nonperforming and performing is shown at the time of modification. Modification programs focused on extending maturity dates or modifying payment patterns with most TDRs experiencing a combination of concessions. The modifications did not result in the contractual forgiveness of principal or interest. There were three modifications during 2014, two modifications during 2013, and no modifications during 2012 that resulted in an interest rate reduction below market rate. Consequently, the financial impact of the modifications was immaterial.

(Dollars in thousands)	2014 Number of Modifications	2014 Recorded Investment	2013 Number of Modifications	2013 Recorded Investment	2012 Number of Modifications	2012 Recorded Investment
Performing TDRs:

Table of Contents

The following table shows the number of troubled debt restructured loans and leases which had payment defaults within twelve months following modification during the years ended December 31, 2014, 2013 and 2012, segregated by class, as well as the recorded investment as of December 31. The classification between nonperforming and performing is shown at the time of modification. Default occurs when a loan or lease is 90 days or more past due under the modified terms or transferred to nonaccrual.

Note 6 — Operating Leases

Operating lease equipment at December 31, 2014 and 2013 was $74.14 million and $60.97 million, respectively, net of accumulated depreciation of $29.62 million and $26.99 million, respectively.

The minimum future lease rental payments due from clients on operating lease equipment at December 31, 2014, totaled $54.87 million, of which $17.24 million is due in 2015, $14.62 million in 2016, $10.93 million in 2017, $7.35 million in 2018, $3.82 million in 2019, and $0.91 million thereafter. Depreciation expense related to operating lease equipment for the years ended December 31, 2014, 2013 and 2012 was $13.89 million, $13.06 million and $15.20 million, respectively.

Note 7 — Premises and Equipment

The following table shows premises and equipment as of December 31.

(Dollars in thousands)	2014	2013
Land	$15,785	$14,029
Buildings and improvements	51,412	48,149
Furniture and equipment	36,737	37,564
Total premises and equipment	103,934	99,742
Accumulated depreciation and amortization	(53,606)	(53,112)
Net premises and equipment	$50,328	$46,630

Depreciation and amortization of properties and equipment totaled $4.75 million in 2014, $4.73 million in 2013, and $4.24 million in 2012.

During 2014, the Company recorded long-lived asset impairment charges totaling $275,000. The impairment was recorded as a result of an appraisal on a building and was recognized in Other Expense on the Statements of Income.

Note 8 — Mortgage Servicing Rights

The unpaid principal balance of residential mortgage loans serviced for third parties was $825.17 million at December 31, 2014, compared to $839.26 million at December 31, 2013, and $921.20 million at December 31, 2012. Amortization expense on MSRs is expected to total $0.84 million, $0.70 million, $0.57 million, $0.47 million, and $0.39 million in 2015, 2016, 2017, 2018 and 2019, respectively. Projected amortization excludes the impact of future asset additions or disposals.

The following table shows changes in the carrying value of MSRs and the associated valuation allowance.

(Dollars in thousands)	2014	2013
Mortgage servicing rights:		
Balance at beginning of year	$4,844	$4,645
Additions	1,167	1,770
Amortization	(1,278)	(1,571)
Sales	—	—
Carrying value before valuation allowance at end of year	4,733	4,844
Valuation allowance:		
Balance at beginning of year	—	—
Impairment recoveries	—	—
Balance at end of year	$—	$—
Net carrying value of mortgage servicing rights at end of year	$4,733	$4,844
Fair value of mortgage servicing rights at end of year	$6,979	$8,127

At December 31, 2014, the fair value of MSRs exceeded the carrying value reported in the Statements of Financial Condition by $2.25 million. This difference represents increases in the fair value of certain MSRs that could not be recorded above cost basis.

Funds held in trust at 1st Source for the payment of principal, interest, taxes and insurance premiums applicable to mortgage loans being serviced for others, were approximately $14.74 million and $12.27 million at December 31, 2014 and December 31, 2013, respectively. Mortgage loan contractual servicing fees, including late fees and ancillary income, were $3.01 million, $3.21 million, and $3.63 million for 2014, 2013, and 2012, respectively. Mortgage loan contractual servicing fees are included in Mortgage Banking Income on the Statements of Income.

55

Table of Contents

Note 9 — Intangible Assets and Goodwill

At December 31, 2014, intangible assets consisted of goodwill of $83.68 million and other intangible assets of $1.69 million, which was net of accumulated amortization of $8.13 million. At December 31, 2013, intangible assets consisted of goodwill of $83.68 million and other intangible assets of $2.66 million, which was net of accumulated amortization of $7.16 million. Intangible asset amortization was $0.97 million, $1.16 million, and $1.32 million for 2014, 2013, and 2012, respectively. Amortization on other intangible assets is expected to total $0.70 million, $0.58 million, $0.36 million, and $0.05 million in 2015, 2016, 2017, and 2018, respectively.

The following table shows a summary of core deposit intangible and other intangible assets as of December 31.

(Dollars in thousands)	2014	2013
Core deposit intangibles:		
Gross carrying amount	$9,566	$9,566
Less: accumulated amortization	(7,888)	(6,947)
Net carrying amount	$1,678	$2,619
Other intangibles:		
Gross carrying amount	$254	$254
Less: accumulated amortization	(241)	(209)
Net carrying amount	$13	$45

Note 10 — Deposits

The aggregate amount of certificates of deposit of $250,000 or more and other time deposits of $250,000 or more outstanding at December 31, 2014 and 2013 was $295.42 million and $178.39 million, respectively.

The following table shows the amount of certificates of deposit of $250,000 or more and other time deposits of $250,000 or more outstanding at December 31, 2014, by time remaining until maturity.

(Dollars in thousands)	
Under 3 months	$111,366
4 – 6 months	54,745
7 – 12 months	16,760
Over 12 months	112,552
Total	$295,423

The following table shows scheduled maturities of time deposits, including both private and public funds, at December 31, 2014.

(Dollars in thousands)	
2015	$437,478
2016	169,782
2017	186,640
2018	137,284
2019	26,872
Thereafter	19,869
Total	$977,925

Note 11 — Borrowed Funds and Mandatorily Redeemable Securities

The following table shows the details of long-term debt and mandatorily redeemable securities as of December 31, 2014 and 2013.

(Dollars in thousands)	2014	2013
Federal Home Loan Bank borrowings (1.10% – 6.54%)	$38,582	$42,512
Mandatorily redeemable securities	15,678	14,072
Other long-term debt	1,972	1,751
Total long-term debt and mandatorily redeemable securities	$56,232	$58,335

Annual maturities of long-term debt outstanding at December 31, 2014, for the next five years and thereafter beginning in 2015, are as follows (in thousands): $1,068; $6,224; $26,243; $808; $718; and $21,171.

Table of Contents

At December 31, 2014, the Federal Home Loan Bank borrowings represented a source of funding for community economic development activities, agricultural loans and general funding for the bank and consisted of 18 fixed rate notes with maturities ranging from 2016 to 2024. These notes were collateralized by $48.23 million of certain real estate loans.

Mandatorily redeemable securities as of December 31, 2014 and 2013, of $15.68 million and $14.07 million, respectively reflected the “book value” shares under the 1st Source Executive Incentive Plan. See Note 16 - Employee Stock Benefit Plans for additional information. Dividends paid on these shares and changes in book value per share are recorded as other interest expense. Total interest expense recorded for 2014, 2013, and 2012 was $1.47 million, $1.00 million, and $1.11 million, respectively.

The following table shows the details of short-term borrowings as of December 31, 2014 and 2013.

	2014		2013	
(Dollars in thousands)	Amount	Weighted Average Rate	Amount	Weighted Average Rate
Federal funds purchased	$10,500	0.50 %	$63,500	0.34 %
Security repurchase agreements	128,343	0.10	117,620	0.08
Commercial paper	11,778	0.27	10,814	0.24
Other short-term borrowings	95,201	0.29	122,197	0.28
Total short-term borrowings	$245,822		$314,131	

Note 12 — Subordinated Notes

The Company sponsors one trust, 1st Source Master Trust (Capital Trust) of which 100% of the common equity is owned by the Company. The Capital Trust was formed in 2007 for the purpose of issuing corporation-obligated mandatorily redeemable capital securities (the capital securities) to third-party investors and investing the proceeds from the sale of the capital securities solely in junior subordinated debenture securities of the Company (the subordinated notes). The subordinated notes held by the Capital Trust are the sole assets of the Capital Trust. The Capital Trust qualifies as a variable interest entity for which the Company is not the primary beneficiary and therefore reported in the financial statements as an unconsolidated subsidiary. The junior subordinated debentures are reflected as subordinated notes in the Statements of Financial Condition with the corresponding interest distributions reflected as Interest Expense in the Statements of Income. The common shares issued by the Capital Trust are included in Other Assets in the Statements of Financial Condition.

Distributions on the capital securities issued by the Capital Trust are payable quarterly at a rate per annum equal to the interest rate being earned by the Capital Trust on the subordinated notes held by the Capital Trust. The capital securities are subject to mandatory redemption, in whole or in part, upon repayment of the subordinated notes. The Company has entered into agreements which, taken collectively, fully and unconditionally guarantee the capital securities subject to the terms of each of the guarantees. The capital securities held by the Capital Trust qualify as Tier 1 capital under Federal Reserve Board guidelines.

The following table shows subordinated notes at December 31, 2014.

(Dollars in thousands)	Amount of Subordinated Notes	Interest Rate	Maturity Date
June 2007 issuance (1)	$41,238	7.22 %	6/15/2037
August 2007 issuance (2)	17,526	7.10 %	9/15/2037
Total	$58,764		

(1) Fixed rate through life of debt.

(2) Fixed rate through September 15, 2017 then LIBOR +1.48% through remaining life of debt.

Note 13 — Earnings Per Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities

include non-vested restricted stock awards. Non-vested restricted stock awards are considered participating securities to the extent the holders of these securities receive non-forfeitable dividends at the same rate as holders of common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method.

Table of Contents

Stock options, where the exercise price was greater than the average market price of the common shares, were excluded from the computation of diluted earnings per common share because the result would have been antidilutive. No stock options were considered antidilutive as of December 31, 2014, 2013 and 2012.
The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share for the three years ending December 31.

(Dollars in thousands - except per share amounts)	2014	2013	2012
Distributed earnings allocated to common stock	$17,091	$16,563	$16,027
Undistributed earnings allocated to common stock	40,249	37,673	32,923
Net earnings allocated to common stock	57,340	54,236	48,950
Net earnings allocated to participating securities	729	722	683
Net income allocated to common stock and participating securities	$58,069	$54,958	$49,633
Weighted average shares outstanding for basic earnings per common share	24,031,608	24,344,623	24,267,471
Dilutive effect of stock compensation	—	586	9,857
Weighted average shares outstanding for diluted earnings per common share	24,031,608	24,345,209	24,277,328
Basic earnings per common share	$2.39	$2.23	$2.02
Diluted earnings per common share	$2.39	$2.23	$2.02

Note 14 — Accumulated Other Comprehensive Income

The following table presents reclassifications out of accumulated other comprehensive income related to unrealized gains and losses on available-for-sale securities for the two years ending December 31.

(Dollars in thousands)	2014	2013	Affected Line Item in the Statements of Income
Realized gains (losses) included in net income	$963	$(168)	Gains (losses) on investment securities available-for-sale
	963	(168)	Income before income taxes
Tax effect	(361)	63	Income tax expense
Net of tax	$602	$(105)	Net income

Note 15 — Employee Benefit Plans

The 1st Source Corporation Employee Stock Ownership and Profit Sharing Plan (as amended, the “Plan”) includes an employee stock ownership component, which is designed to invest in and hold 1st Source common stock, and a 401(k) plan component, which holds all Plan assets not invested in 1st Source common stock. The Plan encourages diversification of investments with opportunities to change investment elections and contribution levels.
Employees are eligible to participate in the Plan the first of the month following 90 days of employment. The Company matches dollar for dollar on the first 4% of deferred compensation, plus 50 cents on the dollar of the next 2% deferrals. The Company will also contribute to the Plan an amount designated as a fixed 2% employer contribution. The amount of fixed contribution is equal to two percent of the participant’s eligible compensation. Additionally, each year the Company may, in its sole discretion, make a discretionary profit sharing contribution. As of December 31, 2014 and 2013, there were 1,308,041 and 1,399,533 shares, respectively, of 1st Source Corporation common stock held in relation to employee benefit plans.
The Company contributions are allocated among the participants on the basis of compensation. Each participant’s account is credited with cash and/or shares of 1st Source common stock based on that participant’s compensation earned during the year. After completing 5 years of service in which they worked at least 1,000 hours per year, a participant will be completely vested in the Company's contribution. An employee is always 100% vested in their deferral. Plan participants are entitled to receive distributions from their Plan accounts upon termination of service, retirement, or death.

Contribution expense for the years ended December 31, 2014, 2013, and 2012, amounted to $4.32 million, $4.38 million, and $4.52 million, respectively.

In addition to the 1st Source Corporation Employee Stock Ownership and Profit Sharing Plan, the Company provides a limited health care and life insurance benefit for some of its retired employees. Effective March 31, 2009, the Company amended the plan so that no new retirees would be covered by the plan. The amendment will have no effect on the coverage for retirees covered at the time of the amendment. Prior to amendment, all full-time employees became eligible for these retiree benefits upon reaching age 55 with 20 years of credited service. The retiree medical plan pays a stated percentage of eligible medical expenses reduced by any deductibles and payments made by government programs and other group coverage. The lifetime maximum benefit payable under the medical plan is $15,000 and for life insurance is $3,000.

Table of Contents

The Company's net periodic post retirement benefit cost (recovery) recognized in the Statements of Income for the years ended December 31, 2014, 2013 and 2012, amounted to $(0.05) million, $(0.04) million, and $(0.01) million, respectively. The accrued post retirement benefit cost was not material at December 31, 2014, 2013, and 2012.

Note 16 — Stock Based Compensation

As of December 31, 2014, the Company had four active stock-based employee compensation plans. These plans include three executive stock award plans, the Executive Incentive Plan (EIP), the Restricted Stock Award Plan (RSAP), the 1998 Performance Compensation Plan (PCP); and the Employee Stock Purchase Plan (ESPP). The 2011 Stock Option Plan was approved by the shareholders on April 21, 2011 but the Company had not made any grants through December 31, 2014. These stock-based employee compensation plans were established to help retain and motivate key employees. All of the plans have been approved by the shareholders of 1st Source Corporation. The Executive Compensation and Human Resources Committee (the "Committee") of the 1st Source Corporation Board of Directors has sole authority to select the employees, establish the awards to be issued, and approve the terms and conditions of each award under the stock-based compensation plans.

Stock-based compensation to employees is recognized as compensation cost in the Statements of Income based on their fair values on the measurement date, which, for 1st Source, is the date of grant. Stock-based compensation expense is recognized ratably over the requisite service period for all awards. The total fair value of share awards vested was $3.66 million during 2014, $1.97 million in 2013, and $4.30 million in 2012.

The following table shows the combined summary of activity regarding active stock option and stock award plans.

		Non-Vested Stock Awards Outstanding		Stock Options Outstanding	
	Shares Available for Grant	Number of Shares	Weighted-Average Grant-Date Fair Value	Number of Shares	Weighted-Average Exercise Price
Balance, January 1, 2012	2,320,492	530,848	$ 18.76	22,000	$ 12.04
Shares authorized - 2012 EIP	76,815	—	—	—	—
Shares authorized - 1998 Performance Compensation Plan	2,302	—	—	—	—
Granted	(98,617)	98,617	21.95	—	—
Stock options exercised	—	—	—	(14,500)	12.04

Balance, December 31, 2014	2,247,264	400,032	$ 22.66	—	$ —

Stock Option Plans — Incentive stock option plans include the 2001 Stock Option Plan (the “2001 Plan”) and the 2011 Stock Option Plan (the “2011 Plan”). The 2001 Plan was terminated, except for outstanding options, after the 2011 Plan was approved by the shareholders. During 2013, all remaining shares available for issuance upon exercise from previous grants under the 2001 Plan were exercised. No additional grants will be made under the 2001 Plan. There were 2,000,000 shares available for issuance under the 2011 Plan.

Table of Contents

Each award from all plans is evidenced by an award agreement that specifies the option price, the duration of the option, the number of shares to which the option pertains, and such other provisions as the Committee determines. The option price is equal to the fair market value of a share of 1st Source Corporation's common stock on the date of grant. Options granted expire at such time as the Committee determines at the date of grant and in no event does the exercise period exceed a maximum of ten years. Upon merger, consolidation, or other corporate consolidation in which 1st Source Corporation is not the surviving corporation, as defined in the plans, all outstanding options immediately vest. There were zero, 7,500 and 14,500 stock options exercised during 2014, 2013 and 2012, respectively. All shares issued in connection with stock option exercises and non-vested stock awards are issued from available treasury stock. No stock-based compensation expense related to stock options was recognized in 2014, 2013 or 2012.

The fair value of each option on the date of grant is estimated using the Black-Scholes option pricing model. Expected volatility is based on the historical volatility estimated over a period equal to the expected life of the options. In estimating the fair value of stock options under the Black-Scholes valuation model, separate groups of employees that have similar historical exercise behavior are considered separately. The expected life of the options granted is derived based on past experience and represents the period of time that options granted are expected to be outstanding.

Stock Award Plans — Incentive stock award plans include the EIP, the PCP and the RSAP. The EIP is administered by the Committee. Awards under the EIP and PCP include "book value" shares and "market value" shares of common stock. These shares are awarded annually based on weighted performance criteria and generally vest over a period of five years. The EIP book value shares may only be sold to 1st Source and such sale is mandatory in the event of death, retirement, disability, or termination of employment. The RSAP is designed for key employees. Awards under the RSAP are made to employees recommended by the Chief Executive Officer and approved by the Committee. Shares granted under the RSAP vest over two to ten years and vesting is based upon meeting certain various criteria, including continued employment with 1st Source.

Stock-based compensation expense relating to the EIP, PCP and RSAP totaled $3.18 million in 2014, $2.90 million in 2013, and $2.07 million in 2012. The total income tax benefit recognized in the accompanying Statements of Income related to stock-based compensation was $1.20 million in 2014, $1.10 million in 2013, and $0.78 million in 2012. Unrecognized stock-based compensation expense related to non-vested stock awards (EIP/PCP/RSAP) was $6.37 million at December 31, 2014. At such date, the weighted-average period over which this unrecognized expense was expected to be recognized was 3.12 years.

The fair value of non-vested stock awards for the purposes of recognizing stock-based compensation expense is market price of the stock on the measurement date, which, for the Company's purposes is the date of the award.

Employee Stock Purchase Plan — The Company offers an ESPP for substantially all employees with at least two years of service on the effective date of an offering under the plan. Eligible employees may elect to purchase any dollar amount of stock, so long as such amount does not exceed 25% of their base rate of pay and the aggregate stock accrual rate for all offerings does not exceed $25,000 in any calendar year. The purchase price for shares offered is the lower of the closing market bid price for the offering date or the average market bid price for the five business days preceding the offering date. The purchase price and discount to the actual market closing price on the offering date for the 2014, 2013, and 2012 offerings were $30.39 (0.88%), $24.32 (1.82%), and $20.54 (0.15%), respectively. Payment for the stock is made through payroll deductions over the offering period, and employees may discontinue the deductions at any time and exercise the option or take the funds out of the program. The most recent offering began June 2, 2014 and runs through May 31, 2016, with $148,228 in stock value to be purchased at $30.39 per share.

Note 17 — Income Taxes

The following table shows the composition of income tax expense.

Year Ended December 31 (Dollars in thousands)	2014	2013	2012
Current:			
Federal	$20,999	$28,634	$30,041
State	1,034	2,298	3,647
Total current	22,033	30,932	33,688
Deferred:			
Federal	4,022	(2,337)	(7,087)

State	319	390	(554)
Total deferred	4,341	(1,947)	(7,641)
Total provision	$26,374	$28,985	$26,047

Table of Contents

The following table shows the reasons for the difference between income tax expense and the amount computed by applying the statutory federal income tax rate (35%) to income before income taxes.

Year Ended December 31 (Dollars in thousands)	2014 Amount	2014 Percent of Pretax Income	2013 Amount	2013 Percent of Pretax Income	2012 Amount	2012 Percent of Pretax Income
Statutory federal income tax	$29,555	35.0 %	$29,380	35.0 %	$26,488	35.0 %
(Decrease) increase in income taxes resulting from:						
Tax-exempt interest income	(1,236)	(1.5)	(1,219)	(1.5)	(1,370)	(1.8)
State taxes, net of federal income tax benefit	2,300	2.7	1,747	2.1	2,010	2.7
Reduction in uncertain tax positions	(3,300)	(3.9)	—	—	—	—
Other	(945)	(1.1)	(923)	(1.1)	(1,081)	(1.5)
Total	$26,374	31.2 %	$28,985	34.5 %	$26,047	34.4 %

The tax expense (benefit) related to gains (losses) on investment securities available-for-sale for the years 2014, 2013, and 2012 was approximately $361,000, $(63,000), and $108,000, respectively.

The following table shows the composition of deferred tax assets and liabilities as of December 31, 2014 and 2013.

(Dollars in thousands)	2014	2013
Deferred tax assets:		
Reserve for loan and lease losses	$33,088	$32,545
Accruals for employee benefits	3,346	4,153
Other	1,079	2,243
Total deferred tax assets	37,513	38,941
Deferred tax liabilities:		
Differing depreciable bases in premises and leased equipment	24,506	22,296
Net unrealized gains on securities available-for-sale	5,654	3,956
Differing bases in assets related to acquisitions	5,160	4,725
Mortgage servicing	1,644	1,588
Capitalized loan costs	1,437	816
Prepaid expenses	1,035	931
Other	443	956
Total deferred tax liabilities	39,879	35,268
Net deferred tax (liability) asset	$(2,366)	$3,673

No valuation allowance for deferred tax assets was recorded at December 31, 2014 and 2013 as the Company believes it is more likely than not that all of the deferred tax assets will be realized.

The following table shows a reconciliation of the beginning and ending amounts of unrecognized tax benefits.

(Dollars in thousands)	2014	2013	2012
Balance, beginning of year	$4,611	$4,068	$3,387
Additions based on tax positions related to the current year	66	484	704
Additions for tax positions of prior years	592	1,118	1,471
Reductions for tax positions of prior years	(553)	—	(49)
Reductions due to lapse in statute of limitations	(1,650)	(1,059)	(1,445)
Settlements	(3,066)	—	—
Balance, end of year	$—	$4,611	$4,068

There were no unrecognized tax benefits that would affect the effective tax rate if recognized at December 31, 2014 and the total amount of unrecognized tax benefits that would affect the effective tax rate if recognized was $2.62 million at December 31, 2013 and $2.02 million at December 31, 2012. Interest and penalties are recognized through the income tax provision. For the years 2014, 2013 and 2012, the Company recognized approximately $(0.69) million, $0.14 million and $(0.02) million in interest, net of tax effect, and penalties, respectively. There were no accrued

interest and penalties at December 31, 2014 and interest and penalties of approximately $0.69 million and $0.55 million were accrued at December 31, 2013 and 2012, respectively.

Table of Contents

Tax years that remain open and subject to audit include the federal 2011-2014 years and the Indiana 2013-2014 years. Additionally, during 2014 the Company reached a state tax settlement for the 2010-2013 years and as a result recorded a reduction of unrecognized tax benefits in the amount of $2.93 million that affected the effective tax rate and increased earnings in the amount of $2.12 million. The Company does not anticipate a significant change in the amount of uncertain tax positions within the next 12 months.

Note 18 — Contingent Liabilities, Commitments, and Financial Instruments with Off-Balance-Sheet Risk

Contingent Liabilities —1st Source and its subsidiaries are defendants in various legal proceedings arising in the normal course of business. In the opinion of management, based upon present information including the advice of legal counsel, the ultimate resolution of these proceedings will not have a material effect on the Company’s consolidated financial position or results of operations.

1st Source Bank sells residential mortgage loans to Fannie Mae as well as FHA-insured and VA-guaranteed loans in Ginnie Mae mortgage-backed securities. Additionally, the Bank has sold loans on a service released basis to various other financial institutions in recent years. The agreements under which the Bank sells these mortgage loans contain various representations and warranties regarding the acceptability of loans for purchase. On occasion, the Bank may be required to indemnify the loan purchaser for credit losses on loans that were later deemed ineligible for purchase or may be required to repurchase a loan. Both circumstances are collectively referred to as “repurchases.”

The Company’s liability for repurchases, included in accrued expenses and other liabilities on the Statements of Financial Condition, was $1.72 million and $2.46 million as of December 31, 2014 and 2013, respectively. The mortgage repurchase liability represents the Company’s best estimate of the loss that it may incur. The estimate is based on specific loan repurchase requests and a historical loss ratio with respect to origination dollar volume. Because the level of mortgage loan repurchase losses are dependent on economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, the level of liability for mortgage loan repurchase losses is difficult to estimate and requires considerable management judgment.

Commitments — 1st Source and its subsidiaries are obligated under operating leases for certain office premises and equipment. Future minimum rental commitments for all noncancellable operating leases total approximately, $3.16 million in 2015, $2.82 million in 2016, $2.52 million in 2017, $2.27 million in 2018, $2.18 million in 2019, and $3.12 million, thereafter. As of December 31, 2014, future minimum rentals to be received under noncancellable subleases totaled $2.25 million.

The following table shows rental expense of office premises and equipment and related sublease income.

Year Ended December 31 (Dollars in thousands)	2014	2013	2012
Gross rental expense	$3,799	$3,875	$3,787
Sublease rental income	(878)	(910)	(878)
Net rental expense	$2,921	$2,965	$2,909

Financial Instruments with Off-Balance-Sheet Risk —To meet the financing needs of our clients, 1st Source and its subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans, and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

The Company’s exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and standby letters of credit is represented by the dollar amount of those instruments. The Company uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company grants mortgage loan commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan commitments is managed by entering into contracts for future deliveries of loans.

Standby letters of credit are conditional commitments issued to guarantee the performance of a client to a third party. The credit risk involved in and collateral obtained when issuing standby letters of credit are essentially the same as

those involved in extending loan commitments to clients. Standby letters of credit totaled $26.94 million and $19.27 million at December 31, 2014 and 2013, respectively. Standby letters of credit generally have terms ranging from six months to one year.

Note 19 — Derivative Financial Instruments

Commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments. See Note 18 for further information.

Table of Contents

The Company has certain interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which the Company enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each transaction, the Company agrees to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Company agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate. Because the terms of the swaps with the customers and the other financial institution offset each other, with the only difference being counterparty credit risk, changes in the fair value of the underlying derivative contracts are not materially different and do not significantly impact the Company's results of operations. The following table shows the amounts of non-hedging derivative financial instruments at December 31, 2014 and 2013.

		Asset derivatives		Liability derivatives	
(Dollars in thousands)	Notional or contractual amount	Statement of Financial Condition classification	Fair value	Statement of Financial Condition classification	Fair value
Interest rate swap contracts	$459,508	Other assets	$9,125	Other liabilities	$9,302
Loan commitments	11,109	Mortgages held for sale	2	N/A	—
Forward contracts - mortgage loan	19,800	N/A	—	Mortgages held for sale	142
Total - December 31, 2014	$490,417		$9,127		$9,444
Interest rate swap contracts	$462,790	Other assets	$9,894	Other liabilities	$10,087
Loan commitments	7,878	Mortgages held for sale	12	N/A	—
Forward contracts - mortgage loan	10,600	Mortgages held for sale	121	N/A	—
Forward contracts - foreign exchange	1,308	N/A	—	Other assets	7
Total - December 31, 2013	$482,576		$10,027		$10,094

The following table shows the amounts included in the Statements of Income for non-hedging derivative financial instruments at December 31, 2014, 2013 and 2012.

		Gain (loss)		
(Dollars in thousands)	Statement of Income classification	2014	2013	2012
Interest rate swap contracts	Other expense	$16	$124	$131
Interest rate swap contracts	Other income	357	716	721
Loan commitments	Mortgage banking income	(10)	(208)	31
Forward contracts - mortgage loan	Mortgage banking income	(263)	154	185
Forward contracts - foreign exchange	Other income	79	(7)	—
Total		$179	$779	$1,068

The following table shows the offsetting of financial assets and derivative assets at December 31, 2014 and 2013.

Gross Amounts Not Offset in the Statement of

(Dollars in thousands)	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Assets Presented in the Statement of Financial Condition	Financial Condition		
				Financial Instruments	Cash Collateral Received	Net Amount
December 31, 2014						
Interest rate swaps	$ 9,492	$ 367	$ 9,125	$—	$—	$ 9,125
December 31, 2013						
Interest rate swaps	$ 10,511	$ 617	$ 9,894	$—	$—	$ 9,894

Table of Contents

The following table shows the offsetting of financial liabilities and derivative liabilities at December 31, 2014 and 2013.

(Dollars in thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Liabilities Presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		
				Financial Instruments	Cash Collateral Pledged	Net Amount
December 31, 2014						
Interest rate swaps	$9,669	$367	$9,302	$—	$9,018	$284
Repurchase agreements	128,343	—	128,343	128,343	—	—
Total	$138,012	$367	$137,645	$128,343	$9,018	$284
December 31, 2013						
Interest rate swaps	$10,704	$617	$10,087	$—	$8,409	$1,678
Repurchase agreements	117,620	—	117,620	117,620	—	—
Total	$128,324	$617	$127,707	$117,620	$8,409	$1,678

If a default in performance of any obligation of a repurchase agreement occurs, each party will set-off property held in respect of transactions against obligations owing in respect of any other transactions.

Note 20 — Regulatory Matters

The Company is subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a material effect on the Company’s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classification are subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios of total capital and Tier I capital to risk-weighted assets and of Tier I capital to average assets. The Company believes that it meets all capital adequacy requirements to which it is subject.

The most recent notification from the Federal bank regulators categorized 1st Source Bank, the largest of its subsidiaries, as “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized” the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table below. There are no conditions or events since that notification that the Company believes will have changed the institution’s category.

Table of Contents

As discussed in Note 12, the capital securities held by the Capital Trusts qualify as Tier 1 capital under Federal Reserve Board guidelines. The following table shows the actual and required capital amounts and ratios for 1st Source Corporation and 1st Source Bank as of December 31, 2014 and 2013.

	Actual			Minimum Capital Adequacy			To Be Well Capitalized Under Prompt Corrective Action Provisions		
(Dollars in thousands)	Amount	Ratio		Amount	Ratio		Amount	Ratio	
2014									
Total Capital (to Risk-Weighted Assets):									
1st Source Corporation	$629,023	15.89	%	$316,704	8.00	%	$395,880	10.00	%
1st Source Bank	598,038	15.15	%	315,886	8.00	%	394,857	10.00	%
Tier I Capital (to Risk-Weighted Assets):									
1st Source Corporation	576,692	14.57	%	158,352	4.00	%	237,528	6.00	%
1st Source Bank	548,094	13.88	%	157,943	4.00	%	236,914	6.00	%
Tier I Capital (to Average Assets):									
1st Source Corporation	576,692	12.16	%	189,718	4.00	%	237,147	5.00	%
1st Source Bank	548,094	11.57	%	189,412	4.00	%	236,765	5.00	%
2013									
Total Capital (to Risk-Weighted Assets):									
1st Source Corporation	$599,603	15.86	%	$302,409	8.00	%	$378,011	10.00	%
1st Source Bank	566,307	15.01	%	301,783	8.00	%	377,229	10.00	%
Tier I Capital (to Risk-Weighted Assets):									
1st Source Corporation	549,441	14.54	%	151,205	4.00	%	226,807	6.00	%
1st Source Bank	518,230	13.74	%	150,892	4.00	%	226,338	6.00	%
Tier I Capital (to Average Assets):									
1st Source Corporation	549,441	12.08	%	182,008	4.00	%	227,510	5.00	%
1st Source Bank	518,230	11.41	%	181,726	4.00	%	227,157	5.00	%

The Bank was not required to maintain noninterest bearing cash balances with the Federal Reserve Bank as of December 31, 2014 and 2013.

Dividends that may be paid by a subsidiary bank to the parent company are subject to certain legal and regulatory limitations and also may be affected by capital needs, as well as other factors.

Due to the Company’s mortgage activities, 1st Source Bank is required to maintain minimum net worth capital requirements established by various governmental agencies. 1st Source Bank’s net worth requirements are governed by the Department of Housing and Urban Development and GNMA. As of December 31, 2014, 1st Source Bank met its minimum net worth capital requirements.

Note 21 — Fair Value Measurements

The Company determines the fair values of its financial instruments based on the fair value hierarchy, which requires an entity to maximize the use of quoted prices and observable inputs and to minimize the use of unobservable inputs when measuring fair value. The Company elected fair value accounting for mortgages held for sale. The Company believes the election for mortgages held for sale (which are economically hedged with free-standing derivatives) will reduce certain timing differences and better match changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets. At December 31, 2014 and 2013, all mortgages held for sale are carried at fair value.

Table of Contents

The following table shows the differences between fair value carrying amount of mortgages held for sale measured at fair value and the aggregate unpaid principal amount the Company is contractually entitled to receive at maturity on December 31, 2014 and 2013.

(Dollars in thousands)	Fair value carrying amount	Aggregate unpaid principal	Excess of fair value carrying amount over (under) unpaid principal	
December 31, 2014				
Mortgages held for sale reported at fair value:				
Total Loans	$13,604	$13,526	$78	(1)
December 31, 2013				
Mortgages held for sale reported at fair value:				
Total Loans	$6,079	$5,974	$105	(1)

(1)The excess of fair value carrying amount over (under) unpaid principal is included in mortgage banking income and includes changes in fair value at and subsequent to funding and gains and losses on the related loan commitment prior to funding.

Financial Instruments on Recurring Basis:

The following is a description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis:

Investment securities available for sale are valued primarily by a third party pricing agent. Prices supplied by the independent pricing agent, as well as their pricing methodologies and assumptions, are reviewed by the Company for reasonableness and to ensure such prices are aligned with market levels. In general, the Company’s investment securities do not possess a complex structure that could introduce greater valuation risk. The portfolio mainly consists of traditional investments including U.S. Treasury and Federal agencies securities, federal agency mortgage pass-through securities, and general obligation and revenue municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. On a quarterly basis, prices supplied by the pricing agent are validated by comparison to prices obtained from other third party sources for a material portion of the portfolio.

The valuation policy and procedures for Level 3 fair value measurements of available for sale debt securities are decided through collaboration between management of the Corporate Accounting and Funds Management departments. The changes in fair value measurement for Level 3 securities are analyzed on a periodic basis under a collaborative framework with the aforementioned departments. The methodology and variables used for input are derived from the combination of observable and unobservable inputs. The unobservable inputs are determined through internal assumptions that may vary from period to period due to external factors, such as market movement and credit rating adjustments.

Both the market and income valuation approaches are implemented using the following types of inputs:

- U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
- Government-sponsored agency debt securities and corporate bonds are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs, are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Since some securities are not traded daily and due to other grouping limitations, active

market quotes are often obtained using benchmarking for like securities. Local direct placement municipal securities, with very little market activity, are priced using an appropriate market yield curve which incorporates a credit spread assumption.

- Marketable equity (common) securities are primarily priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Trading account securities are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Table of Contents

Mortgages held for sale and the related loan commitments and forward contracts (hedges) are valued using a market value approach and utilizing an appropriate current market yield and a loan commitment closing rate based on historical analysis.
Interest rate swap positions, both assets and liabilities, are valued by a third party pricing agent using an income approach and utilizing models that use as their basis readily observable market parameters. This valuation process considers various factors including interest rate yield curves, time value and volatility factors. Validation of third party agent valuations is accomplished by comparing those values to the Company's swap counterparty valuations.
Management believes an adjustment is required to "mid-market" valuations for derivatives tied to its performing loan portfolio to recognize the imprecision and related exposure inherent in the process of estimating expected credit losses as well as velocity of deterioration evident with systemic risks imbedded in these portfolios.
The following table shows the balance of assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
December 31, 2014				
Assets:

Table of Contents

The following table shows the changes in Level 3 assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	U.S. States and political subdivisions securities	Foreign government and other securities	Investment securities available-for-sale
Beginning balance January 1, 2014	$5,498	$—	$5,498
Total gains or losses (realized/unrealized):			
Included in earnings	—	—	—
Included in other comprehensive income	(99)	6	(93)
Purchases	2,635	—	2,635
Issuances	—	—	—
Sales	—	—	—
Settlements	—	—	—
Maturities	(1,568)	(100)	(1,668)
Transfers into Level 3	—	905	905
Transfers out of Level 3	—	—	—
Ending balance December 31, 2014	$6,466	$811	$7,277
Beginning balance January 1, 2013	$7,701	$—	$7,701
Total gains or losses (realized/unrealized):			
Included in earnings	(140)	—	(140)
Included in other comprehensive income	566	—	566
Purchases	2,200	—	2,200
Issuances	—	—	—
Sales	(2,000)	—	(2,000)
Settlements	—	—	—
Maturities	(2,829)	—	(2,829)
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Ending balance December 31, 2013	$5,498	$—	$5,498

There were no gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held at December 31, 2014 or 2013. No transfers between Level 1 and 2 occurred during 2014 or 2013. One transfer between Level 2 and 3 occurred during 2014 and no transfers between Level 2 and 3 occurred during 2013. A foreign government debt security was transferred from Level 2 to Level 3 during 2014 due to the Company's periodic review of valuation methodologies and inputs. The Company determined that the observable inputs used in determining fair value warranted a transfer to Level 3 as the unobservable inputs were deemed to be significant to the overall fair value measurement.

The following table shows the valuation methodology and unobservable inputs for Level 3 assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Fair value	Valuation Methodology	Unobservable Inputs	Range of Inputs
December 31, 2014				
Investment securities available-for-sale				
Direct placement municipal securities	$6,466	Discounted cash flows	Credit spread assumption	0.99% - 2.08%
Foreign government	$811	Discounted cash flows	Market yield assumption	0.25% - 1.31%

December 31, 2013				
Investment securities available-for-sale				
Direct placement municipal securities	$5,498	Discounted cash flows	Credit spread assumption	0.90% - 1.52%

Table of Contents

The sensitivity to changes in the unobservable inputs and their impact on the fair value measurement can be significant. The significant unobservable input for direct placement municipal securities are the credit spread assumptions used to determine the fair value measure. An increase (decrease) in the estimated spread assumption of the market will decrease (increase) the fair value measure of the securities. The significant unobservable input for foreign government securities are the market yield assumptions. The market yield assumption is negatively correlated to the fair value measure. An increase (decrease) in the determined market yield assumption will decrease (increase) the fair value measurement.

Financial Instruments on Non-recurring Basis:

The Company may be required, from time to time, to measure certain other financial assets at fair value on a non-recurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or impairment charges of individual assets.

The Credit Policy Committee (CPC), a management committee, is responsible for overseeing the valuation processes and procedures for Level 3 measurements of impaired loans, other real estate and repossessions. The CPC reviews these assets on a quarterly basis to determine the accuracy of the observable inputs, generally third party appraisals, auction values, values derived from trade publications and data submitted by the borrower, and the appropriateness of the unobservable inputs, generally discounts due to current market conditions and collection issues. The CPC establishes discounts based on asset type and valuation source; deviations from the standard are documented. The discounts are reviewed periodically, annually at a minimum, to determine they remain appropriate. Consideration is given to current trends in market values for the asset categories and gain and losses on sales of similar assets. The Loan and Funds Management Committee of the Board of Directors is responsible for overseeing the CPC.

Discounts vary depending on the nature of the assets and the source of value. Aircraft are generally valued using quarterly trade publications adjusted for engine time, condition, maintenance programs, discounted by 10%. Likewise, autos are valued using current auction values, discounted by 10%; medium and heavy duty trucks are valued using trade publications and auction values, discounted by 15%. Construction equipment is generally valued using trade publications and auction values, discounted by 20%. Real estate is valued based on appraisals or evaluations, discounted by 20% at a minimum with higher discounts for property in poor condition or property with characteristics which may make it more difficult to market. Commercial loans subject to borrowing base certificates are generally discounted by 20% for receivables and 40-75% for inventory with higher discounts when monthly borrowing base certificates are not required or received.

Impaired loans and related write-downs are based on the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are reviewed quarterly and estimated using customized discounting criteria, appraisals and dealer and trade magazine quotes which are used in a market valuation approach. In accordance with fair value measurements, only impaired loans for which a reserve for loan loss has been established based on the fair value of collateral require classification in the fair value hierarchy. As a result, only a portion of the Company's impaired loans are classified in the fair value hierarchy.

Partnership investments and the adjustments to fair value primarily result from application of lower of cost or fair value accounting. The partnership investments are priced using financial statements provided by the partnerships. Quantitative unobservable inputs are not reasonably available for reporting purposes.

The Company has established MSRs valuation policies and procedures based on industry standards and to ensure valuation methodologies are consistent and verifiable. MSRs and related adjustments to fair value result from application of lower of cost or fair value accounting. For purposes of impairment, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. The fair value of each tranche of the servicing portfolio is estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. Prepayment rates and discount rates are derived through a third party pricing agent. Changes in the most significant inputs, including prepayment rates and discount rates, are compared to the changes in the fair value measurements and appropriate resolution is made. A fair value analysis is also obtained from an independent third party agent and compared to the internal valuation for reasonableness. MSRs do not trade in an active, open market with readily observable prices and though sales of MSRs do occur, precise terms and conditions typically are not

readily available and the characteristics of the Company’s servicing portfolio may differ from those of any servicing portfolios that do trade.

Other real estate is based on the lower of cost or fair value of the underlying collateral less expected selling costs. Collateral values are estimated primarily using appraisals and reflect a market value approach. Fair values are reviewed quarterly and new appraisals are obtained annually. Repossessions are similarly valued.

For assets measured at fair value on a nonrecurring basis the following represents impairment charges (recoveries) recognized on these assets during the year ended December 31, 2014 and 2013, respectively: impaired loans - $4.49 million and $0.00 million; partnership investments - $0.29 million and $(0.42) million; MSRs - $0.00 million and $0.00 million; repossessions - $0.73 million and $0.02 million, and other real estate - $0.17 million and $0.34 million.

Table of Contents

The following table shows the carrying value of assets measured at fair value on a non-recurring basis.

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
December 31, 2014				
Impaired loans - collateral based	$—	$—	$1,007	$1,007
Accrued income and other assets (partnership investments)	—	—	1,343	1,343
Accrued income and other assets (mortgage servicing rights)	—	—	4,733	4,733
Accrued income and other assets (repossessions)	—	—	5,156	5,156
Accrued income and other assets (other real estate)	—	—	1,735	1,735
Total	$—	$—	$13,974	$13,974
