## INTRODUCTION

As used in this Form SD, the term "Company," except as otherwise indicated by the context, means Lincoln Electric Holdings, Inc. and its wholly-owned and majority-owned subsidiaries for which it has a controlling interest. The Company's product portfolio is primarily grouped into welding consumables which include consumable electrodes, fluxes and brazing products and equipment consisting of arc welding power sources, wire feeding systems, robotic welding packages, fume extraction equipment, CNC plasma and oxy-fuel cutting systems.

The Company has, through wholly-owned subsidiaries or joint ventures, manufacturing facilities located in the United States, Brazil, Canada, China, Colombia, France, Germany, India, Indonesia, Italy, Mexico, the Netherlands, Poland, Portugal, Russia, Turkey, the United Kingdom and Venezuela. The principal raw materials essential to the Company's business are steel, electronic components, engines, brass, copper, silver, aluminum alloys and various chemicals, all of which are normally available for purchase in the open market.

The Company's Conflict Mineral Policy can be viewed on the its website at [www.lincolnelectric.com](http://www.lincolnelectric.com).

## SECTION 1 - CONFLICT MINERALS DISCLOSURE

The Company has conducted a good faith investigation in connection with the products it manufactured or contracted to be manufactured in the period from January 1 to December 31, 2013, to determine whether its products contain certain conflict minerals and their derivatives, including tin, tantalum, tungsten and gold which are commonly termed "3TG" (here forward "Conflict Minerals") and whether the Conflict Minerals are necessary to the functionality or production of any of these products. As part of this investigation, the Company has conducted a good faith inquiry of its suppliers to determine whether any Conflict Minerals contained within its products originated in the Democratic Republic of the Congo or its surrounding areas (the "Covered Countries") or were from recycled or scrapped sources. For the Company's product groups defined above, corporate supply chain management and research and development in conjunction with local management reviewed the Company's purchased raw materials and components. The purchased raw materials and components determined to contain Conflict Minerals were reviewed to determine the supplier(s) of the purchased item. Local management engaged identified suppliers, inquiring as to the purchased item's country of origin, including whether any of their downstream suppliers are obtaining materials from the Covered Countries.

Refer to Exhibit 1.01 - Conflict Minerals Report incorporated herein for further detail on the Company's designed due diligence procedures and efforts in determining the origin of its products. This Form SD, including incorporated exhibits, can be obtained from the Company's website at [www.lincolnelectric.com](http://www.lincolnelectric.com).

## SECTION 2 - EXHIBITS

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

---
