

ARCHER DANIELS MIDLAND CO  
Form 10-Q  
February 09, 2009

---

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D. C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended December 31, 2008

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 1-44  
ARCHER-DANIELS-MIDLAND COMPANY  
(Exact name of registrant as specified in its charter)

Delaware  
(State or other jurisdiction of  
incorporation or organization)

41-0129150  
(I. R. S. Employer  
Identification No.)

4666 Faries Parkway Box 1470  
Decatur, Illinois  
(Address of principal executive offices)

62525  
(Zip Code)

(217) 424-5200  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer   
Non-accelerated Filer

Accelerated Filer   
Smaller reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange

Act). Yes  No .

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock, no par value – 641,889,521 shares  
(January 31, 2009)

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements  
(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these statements do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the quarter and six months ended December 31, 2008 are not necessarily indicative of the results that may be expected for the year ending June 30, 2009. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2008.

Last-in, First-out (LIFO) Inventories

Interim period LIFO calculations are based on interim period costs and management's estimates of year-end inventory levels. Because the availability and price of agricultural commodity-based LIFO inventories are unpredictable due to factors such as weather, government farm programs and policies, and changes in global demand, quantities of LIFO-based inventories at interim periods may vary significantly from management's estimates of year-end inventory levels.

Note 2. New Accounting Standards

During December 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 141(R), Business Combinations (SFAS 141(R)) and SFAS No. 160, Accounting and Reporting of Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160). SFAS 141(R) replaces SFAS 141, Business Combinations. SFAS 141(R) and SFAS 160 will change the financial accounting and reporting of business combination transactions and noncontrolling (or minority) interests in consolidated financial statements. SFAS 141(R) requires recognizing, with certain exceptions, 100 percent of the fair values of assets acquired, liabilities assumed, and noncontrolling interests in acquisitions of less than a 100 percent controlling interest when the acquisition constitutes a change in control of the acquired entity; measuring acquirer shares issued and contingent consideration arrangements in connection with a business combination at fair value on the acquisition date with subsequent changes in fair value reflected in earnings; and expensing as incurred acquisition-related transaction costs. SFAS 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It also amends the consolidation procedures of Accounting Research Bulletin No. 51, Consolidated Financial Statements (ARB 51) for consistency with the requirements of SFAS 141(R). The Company will be required to adopt SFAS 141(R) for business combination transactions for which the acquisition date is on or after July 1, 2009. The Company will also be required to adopt SFAS 160 on July 1, 2009. The Company has not yet assessed the impact of the adoption of these standards on its financial statements.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

Note 2. New Accounting Standards (Continued)

During March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 expands and disaggregates the disclosure requirements of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133). The disclosure provisions of SFAS 161 apply to all entities with derivative instruments subject to SFAS 133 and also apply to related hedged items, bifurcated derivatives, and nonderivative instruments that are designated and qualify as hedging instruments. SFAS 161 requires an entity with derivatives to disclose how and why it uses derivative instruments; how derivative instruments and related hedged items are accounted for under SFAS 133; and how derivative instruments and related hedged items affect the entity's financial position, financial performance, and cash flows. Entities must provide tabular disclosures of the location, by line item, of amounts of gains and losses reported in the statement of earnings. The Company will be required to adopt SFAS 161 on January 1, 2009. The adoption of this standard will require expanded disclosure in the notes to the Company's consolidated financial statements but will not impact financial results.

During May 2008, the FASB issued FASB Staff Position (FSP) APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement) (FSP APB 14-1). FSP APB 14-1 addresses the accounting for convertible debt securities that, upon conversion, may be settled by the issuer fully or partially in cash. Currently, most forms of convertible debt securities are treated solely as debt. Under this FSP, issuers of convertible debt securities within its scope must separate these securities into two accounting components; a debt component, representing the issuer's contractual obligation to pay principal and interest; and an equity component, representing the holder's option to convert the debt security into equity of the issuer or, if the issuer so elects, an equivalent amount of cash. The Company will be required to adopt FSP APB 14-1 on July 1, 2009 in connection with its outstanding convertible debt and must apply it retrospectively to all past periods presented, even if the instrument has matured, converted, or otherwise been extinguished as of the FSP's effective date. The Company has not yet assessed the impact of the adoption of this standard on its financial statements.

During June 2008, the FASB issued FSP Emerging Issues Task Force (EITF) 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities (FSP EITF 03-6-1). FSP EITF 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS) under the two-class method. The FSP clarifies that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders and are considered to be participating securities. As such, the issuing entity is required to apply the two-class method of computing basic and diluted EPS. The Company will be required to adopt FSP EITF 03-6-1 on July 1, 2009 and has not yet assessed the impact of the adoption of this standard on the Company's financial statements.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

Note 2. New Accounting Standards (Continued)

During December 2008, the FASB issued FSP FAS 132(R)-1, Employers' Disclosures about Postretirement Benefit Plan Assets – an amendment of FASB Statement No. 132(R) (FAS 132(R)-1). FAS 132(R)-1 expands the disclosure requirements of SFAS No. 132(R), Employers' Disclosures about Pensions and Other Postretirement Benefits (SFAS 132(R)). The disclosure provisions of SFAS 132(R)-1 apply to entities that are subject to the disclosure requirements of SFAS 132(R). SFAS 132(R)-1 requires entities to disclose investment policies and strategies, major categories of plan assets, fair value measurements for each major category of plan assets segregated by fair value hierarchy level as defined in SFAS 157, Fair Value Measurements (SFAS 157), the effect of fair value measurements using Level 3 inputs on changes in plan assets for the period, and significant concentrations of risk within plan assets. The Company will be required to adopt SFAS 132(R)-1 on June 30, 2010. The adoption of this standard will require expanded disclosure in the notes to the Company's consolidated financial statements but will not impact financial results.

Note 3. Fair Value Measurements

Effective July 1, 2008, the Company adopted SFAS 157, which establishes a framework for measuring fair value and clarifies the definition of fair value within that framework. SFAS 157 defines fair value as an exit price, which is the price that would be received for an asset or paid to transfer a liability in the Company's principal or most advantageous market for the asset or liability, in an orderly transaction between market participants on the measurement date. The fair value hierarchy established in SFAS 157 generally requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability and are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the entity's own assumptions based on market data and the entity's judgments about the assumptions that market participants would use in pricing the asset or liability, and are to be developed based on the best information available in the circumstances. In October 2008, the FASB issued FSP FAS 157-3, Determining the Fair Value of a Financial Asset in a Market That Is Not Active, which clarifies that when an active market does not exist it may be appropriate to use unobservable inputs to determine fair value. The Company determines the fair market value of certain of its inventories of agricultural commodities, derivative contracts, and marketable securities based on the fair value definition and hierarchy levels established in SFAS 157. SFAS 157 establishes three levels within its hierarchy that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 1 assets and liabilities include exchange-traded derivative contracts, U.S. treasury securities and certain publicly traded equity securities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data.

## Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

## Note 3. Fair Value Measurements (Continued)

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities. In evaluating the significance of fair value inputs, the Company generally classifies assets or liabilities as Level 3 when their fair value is determined using unobservable inputs that individually, or when aggregated with other unobservable inputs, represent more than 10% of the fair value of the assets or liabilities. Judgment is required in evaluating both quantitative and qualitative factors in the determination of significance for purposes of fair value level classification. Level 3 amounts can include assets and liabilities whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as assets and liabilities for which the determination of fair value requires significant management judgment or estimation.

The following table sets forth, by level, the Company's assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2008. Pursuant to FSP FAS 157-2 Effective Date of FASB Statement No. 157, the Company will delay the adoption of SFAS 157 for its nonfinancial assets and liabilities that are recognized on a nonrecurring basis, including goodwill, other intangible assets, and asset retirement obligations to July 1, 2009. In many cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of input that is a significant component of the fair value measurement determines the placement of the entire fair value measurement in the hierarchy. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels.

	Fair Value Measurements at December 31, 2008				Total
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		
	(In millions)

-------------------	----	-------	----	-------	----	-----	----	-------

---

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

Note 3. Fair Value Measurements (Continued)

The Company uses the market approach valuation technique to measure the majority of its assets and liabilities carried at fair value. Estimated fair market values for inventories carried at market are based on exchange-quoted prices, adjusted for differences in local markets, broker or dealer quotations, or market transactions in either listed or OTC markets. In such cases, the inventory is classified in Level 2. Certain inventories may require management judgment or estimation for a significant component of the fair value amount. In such cases, the inventory is classified as Level 3. Changes in the fair market value of inventories are recognized in the consolidated statements of earnings as a component of cost of products sold.

The Company's derivative contracts that are measured at fair value include forward commodity purchase and sale contracts, exchange-traded commodity futures and option contracts, and OTC instruments related primarily to agricultural commodities, energy, and foreign currencies. Exchange-traded futures and options contracts are valued based on unadjusted quoted prices in active markets and are classified in Level 1. The majority of the Company's exchange-traded futures and options contracts are cash settled on a daily basis and, therefore, are not included in this table. Fair value for forward commodity purchase and sale contracts is estimated based on exchange-quoted prices adjusted for differences in local markets. These differences are generally valued using inputs from broker or dealer quotations or market transactions in either the listed or OTC markets. When observable inputs are available for substantially the full term of the asset or liability, the derivative contracts are classified in Level 2. When unobservable inputs have a significant impact on the measurement of fair value, the contract's fair value is classified in Level 3. Based on historical experience with the Company's suppliers and customers, the Company's own credit risk, and the Company's knowledge of current market conditions, the Company does not view nonperformance risk to be a significant input to fair value for the majority of its forward commodity purchase and sale contracts. However, in situations when the Company believes the nonperformance risk to be a significant input, the Company records estimated fair value adjustments, and classifies the contracts in Level 3 in the fair value hierarchy. Changes in the fair market value of commodity-related derivatives are recognized in the consolidated statements of earnings as a component of cost of products sold. Changes in the fair market value of foreign currency-related derivatives are recognized in the consolidated statements of earnings as a component of net sales and other operating income, cost of products sold, and other (income)expense-net. The effective portions of changes in the fair market value of derivatives designated as cash flow hedges are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income.

The Company's available-for-sale securities are comprised of U.S. Treasury securities, obligations of U.S. government agencies, corporate and municipal debt securities, and equity investments. U.S. Treasury securities and certain publicly traded equity investments are valued using quoted market prices and are classified in Level 1. U.S. government agency obligations, corporate and municipal debt securities and certain equity investments are valued using third-party pricing services and substantially all are classified as Level 2. Security values that are determined using pricing models are classified in Level 3. Unrealized changes in the fair market value of available-for-sale marketable securities are recognized in the consolidated balance sheets as a component of accumulated other comprehensive income.

The Company's assessment of the significance of a particular input to a fair value measurement requires judgment and may affect the classification of assets and liabilities within the fair value hierarchy.

Ending balance, December 31, 2008	\$ 314	\$ 18	\$ 12	\$ 344

\*Includes unrealized gains of \$33 million attributable to the change in Level 3 derivative assets still held at December 31, 2008 and unrealized losses of \$56 million attributable to the change in Level 3 inventories carried at market still held at December 31, 2008.

## Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

## Note 4. Debt and Financing Arrangements

The Company has outstanding \$1.2 billion principal amount of convertible senior notes (the Notes) due in 2014. As of December 31, 2008, none of the conditions permitting conversion of the Notes had been satisfied. Therefore, no share amounts related to the conversion of the Notes or exercise of the warrants sold in connection with the issuance of the Notes were included in diluted average shares outstanding.

The Company also has outstanding \$1.75 billion principal amount of Equity Units (the Units) due in 2011. The Units are a combination of (a) debt and (b) forward purchase contracts for the holder to purchase the Company's common stock. The forward purchase contracts issued in connection with the Units will be settled for the Company's common stock on June 1, 2011. Until settlement of the forward purchase contracts, the shares of stock underlying each forward purchase contract are not outstanding. The forward purchase contracts will only be included in the computation of diluted earnings per share to the extent they are dilutive. As of December 31, 2008, the forward purchase contracts were not considered dilutive and therefore were not included in the computation of diluted earnings per share.

For further information on the Notes and Units, refer to Note 7 "Debt and Financing Arrangements" in the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2008.

## Note 5. Comprehensive Income

The components of comprehensive income, net of related tax, are as follows:

## Note 7. Postretirement Plans

SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (SFAS 158), requires companies to measure plan assets and benefit obligations as of the end of the fiscal year instead of a date up to three months prior to the end of the fiscal year. The Company adopted the measurement provisions of SFAS 158 as of July 1, 2008. The Company previously measured plan assets and pension and other postretirement benefit obligations at March 31 of each year. As a result of adopting the measurement date provisions of SFAS 158, the Company recorded an additional three months of pension and other postretirement benefit obligations as of July 1, 2008, which resulted in a \$13 million decrease in retained earnings, a \$1 million increase in accumulated other comprehensive income, and a \$19 million increase in pension and postretirement benefit obligations.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

Note 8. Segment Information

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other.

The Oilseeds Processing segment includes activities related to the crushing and origination of oilseeds such as soybeans, cottonseed, sunflower seeds, canola, peanuts, and flaxseed into vegetable oils and protein meals principally for the food and feed industries. In addition, oilseeds and oilseed products may be processed internally or resold into the marketplace as raw materials for other processing. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in chemicals, paints, and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Oilseeds Processing includes activities related to the production of natural health and nutrition products and the production of other specialty food and feed ingredients. This segment also includes activities related to the Company's interests in unconsolidated affiliates in Asia, principally Wilmar International Limited.

The Corn Processing segment includes activities related to the production of sweeteners, starches, dextrose, and syrups primarily for the food and beverage industry as well as activities related to the production, by fermentation, of bioproducts such as ethanol, amino acids, and other food, feed and industrial products.

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, barley, and edible beans, and resells or processes these commodities primarily as food and feed ingredients for the agricultural processing industry. Agricultural Services' grain sourcing and transportation network provides reliable and efficient services to the Company's agricultural processing operations. Also included in Agricultural Services are the activities of A.C. Toepfer International, a global merchandiser of agricultural commodities and processed products.

Other includes the Company's remaining processing operations, consisting of activities related to processing agricultural commodities into products such as wheat into wheat flour, cocoa into chocolate and cocoa products, barley into malt and sugarcane into sugar and ethanol. The Company sold its malt operations on July 31, 2008. Other also includes financial activities related to banking, captive insurance, private equity fund investments, and futures commission merchant activities.

Intersegment sales have been recorded at amounts approximating market. Operating profit for each segment is based on net sales less identifiable operating expenses, including an interest charge related to working capital usage. Also included in segment operating profit are equity in earnings of affiliates based on the equity method of accounting. General corporate expenses, investment income, unallocated interest expense, marketable securities transactions, FIFO to LIFO inventory adjustments and minority interest eliminations have been excluded from segment operations and classified as Corporate.

For detailed information regarding the Company's reportable segments, see Note 14 to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended June 30, 2008.

Archer-Daniels-Midland Company

Notes to Consolidated Financial Statements (Continued)  
(Unaudited)

Note 9. Investment in Affiliate

The Company has a 23% ownership interest in Gruma S.A.B. de C.V. (Gruma), one of the world's leading producers and marketers of corn flour and tortillas. The carrying value of the Company's investment in Gruma is \$254 million as of December 31, 2008.

On October 28, 2008, Gruma publicly announced that it had \$788 million of unrealized mark-to-market losses on currency derivative instruments which mature between 2008 and 2011. Gruma stated it is not subject to margin calls on these instruments. Additionally, Gruma disclosed that it also had \$276 million of derivative losses on instruments which were subject to margin calls with another of the various counterparties with whom Gruma contracted such instruments (the "Counterparty"). Gruma's announcement states that it has entered into a release with the Counterparty in settlement of amounts due under these derivative instruments.

On November 13, 2008, Gruma announced it had obtained a credit line that allows it to satisfy its payment obligations related to its currency derivative instruments maturing in 2008. Gruma stated it will use part of this credit line to satisfy its commitments arising from the currency derivative instruments that had margin calls, which Gruma had agreed to pay by November 25, 2008. Gruma stated it is still working to meet, to the satisfaction of all parties, its obligations under the derivative instruments maturing in 2009, 2010, and 2011, which instruments are not subject to margin calls. Gruma stated on October 28, 2008 that its results have been affected by the non-cash charges resulting from the mark-to-market changes in the value of its currency derivative instruments and it expects that such fluctuations in value may continue.

On December 16, 2008, Gruma filed a Form 6-K with the United States Securities and Exchange Commission which contained details regarding its foreign currency derivative instruments, including notional amounts, losses as of September 30, 2008, and a sensitivity analysis which specified additional potential losses assuming a hypothetical 10% depreciation in the value of the underlying assets.

The Company employs the equity method of accounting for its investment in Gruma, and records its share of Gruma's reported financial results on a one-quarter lag basis. \$291 million of Gruma's derivative loss existed as of September 30, 2008, and is reflected in Gruma's reported net loss of Ps. 1.7 billion (US \$165 million) for the quarter ended September 30, 2008 and the Company recorded its share of this loss in its results for the quarter ended December 31, 2008. Based on Gruma's disclosures and filings dated October 13, 2008, October 28, 2008 and December 16, 2008; fluctuations in foreign currency exchange rates between September 30, 2008 and December 31, 2008; and the Company's assumptions regarding Mexican income tax impacts, the Company expects Gruma to record additional losses in its quarter-ended December 31, 2008 financial results. The Company estimates its share of Gruma's derivative losses for the quarter-ended December 31, 2008 to result in a non-cash charge of between \$80 million and \$110 million, after income tax, in the Company's third quarter. In addition, based on Gruma's public disclosures and the sensitivity analysis contained in Gruma's Form 6-K filed December 16, 2008, the Company may report additional losses in future reporting periods.

The Company has evaluated the carrying value of its investment in Gruma as of December 31, 2008 in light of Gruma's announcements, and does not consider its investment in Gruma to be other-than-temporarily impaired. The Company based its evaluation on Gruma's public disclosures about its currency derivative losses and its expected

future cash flows, and the Company's knowledge of Gruma's business. The Company's evaluation required the use of assumptions and management judgment, including forecasts of Gruma's future operating results and impacts resulting from its derivative positions. If different assumptions and judgment had been applied, the conclusion could have differed.

The Company has no present obligation to provide funding to Gruma.

---

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Company Overview

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other.

The Oilseeds Processing segment includes activities related to the origination and crushing of oilseeds such as soybeans, cottonseed, sunflower seeds, canola, peanuts, and flaxseed into vegetable oils and protein meals principally for the food and feed industries. In addition, oilseeds and oilseed products may be processed internally or resold into the marketplace as raw materials for other processing. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in chemicals, paints, and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed protein meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Oilseeds Processing includes activities related to the production of natural health and nutrition products and the production of other specialty food and feed ingredients. This segment also includes activities related to the Company's interests in unconsolidated affiliates in Asia, principally Wilmar International Limited.

The Corn Processing segment includes activities related to the production of sweeteners, starches, dextrose, and syrups primarily for the food and beverage industry as well as activities related to the production, by fermentation, of bioproducts such as ethanol, amino acids, and other food, feed and industrial products.

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, barley, and edible beans, and resells or processes these commodities primarily as food and feed ingredients for the agricultural processing industry. Agricultural Services' grain sourcing and transportation network provides reliable and efficient services to the Company's agricultural processing operations. Also included in Agricultural Services are the activities of A.C. Toepfer International, a global merchant of agricultural commodities and processed products.

Other includes the Company's remaining processing operations, consisting of activities related to processing agricultural commodities into products such as wheat into wheat flour, cocoa into chocolate and cocoa products, barley into malt, and sugarcane into sugar and ethanol. The Company sold its malt operations on July 31, 2008. Other also includes financial activities related to banking, captive insurance, private equity fund investments, and futures commission merchant activities.

### Operating Performance Indicators

The Company is exposed to certain risks inherent to an agricultural-based commodity business. These risks are further described in Item 1A, "Risk Factors" included in the Company's annual report on Form 10-K for the year ended June 30, 2008.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The Company's Oilseeds Processing, Agricultural Services, and wheat processing operations are principally agricultural commodity-based businesses where changes in selling prices move in relationship to changes in prices of the commodity-based agricultural raw materials. Therefore, changes in agricultural commodity prices have relatively equal impacts on both net sales and cost of products sold. As a result, changes in gross profit of these businesses do not necessarily correspond to the changes in net sales amounts.

The Company's Corn Processing operations and certain other food and animal feed processing operations also utilize agricultural commodities (or products derived from agricultural commodities) as raw materials. In these operations, agricultural commodity market price changes can result in significant fluctuations in cost of products sold, and such price changes cannot necessarily be passed directly through to the selling price of the finished products.

The Company conducts its business in many countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. Fluctuations in the exchange rates of foreign currencies, primarily the Euro, British pound, and Canadian dollar, as compared to the U.S. dollar will result in corresponding fluctuations in the U.S. dollar value of revenues and expenses reported by the Company. The impact of these currency exchange rate changes, where significant, is discussed below.

The Company measures the performance of its business segments using key operating statistics such as segment operating profit, return on fixed capital investment, return on equity and return on net assets. The Company's operating results can vary significantly due to changes in unpredictable factors such as fluctuations in energy prices, weather conditions, crop plantings, government programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. Due to these unpredictable factors, the Company does not provide forward-looking information in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Three Months Ended December 31, 2008 Compared to Three Months Ended December 31, 2007

Net earnings for the quarter increased due principally to decreased LIFO inventory valuation reserves resulting from a decline in commodity costs during the current quarter, partially offset by decreased segment operating profits.

As an agricultural-based commodity business, the Company is subject to a variety of market factors which affect the Company's operating results. This quarter, the Company experienced impacts resulting from the later than normal U.S. harvest, decreased exports of U.S. agricultural products, declining market prices for many agricultural commodities, and generally weaker global economic conditions. An increase in global production of agricultural products and the anticipation of weakening future demand contributed to the decline in agricultural commodity market prices this quarter. Volatility in the commodity and freight markets remained relatively high, and continued to create enhanced profit opportunities for the Company. Net corn costs increased, due principally to lower by-product credits and the impact from the Company's corn hedging activity. Additionally, ethanol margins decreased sharply as lower demand for gasoline, decreased gasoline prices, and excess ethanol industry capacity negatively impacted ethanol selling prices.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Analysis of Statements of Earnings

Net sales and other operating income increased 1% to \$16.7 billion for the quarter, reflecting increased average selling prices, decreased sales volumes and foreign currency translation impacts. A \$2.3 billion increase due to higher average selling prices was offset by a \$1.7 billion decrease due to lower sales volumes and a \$0.5 billion decrease due to foreign exchange translation.

Net sales and other operating income by segment for the quarter are as follows:

	Three Months Ended		
	December 31,		Change
	2008	2007	
	(In millions)		
<b>Oilseeds Processing</b>			
Crushing & Origination	\$ 2,982	\$ 3,280	\$ (298)

Transportation	79	54	25
Total Agricultural Services	8,141	8,233	(92)
<b>Other</b>			
Wheat, Cocoa, Malt, and Sugar	1,353	1,303	50
Financial	30	22	8
Total Other	1,383	1,325	58
Total	\$ 16,673	\$ 16,496	\$ 177

Oilseeds Processing sales were relatively unchanged at \$5.3 billion. Higher average selling prices of vegetable oils and biodiesel were offset by lower sales volumes of protein meal and merchandised oilseeds. Corn Processing sales increased 10% to \$1.9 billion due to higher average selling prices of sweeteners and starches and higher sales volumes of bioproducts partially offset by lower sales volumes of sweeteners and starches and lower average selling prices of bioproducts. Agricultural Services sales decreased 1% to \$8.1 billion, due principally to lower sales volumes of grain partially offset by higher average selling prices. Other sales increased 4% to \$1.4 billion primarily due to higher average selling prices of wheat flour and cocoa products.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Cost of products sold was unchanged at \$15.5 billion reflecting decreased sales volumes, a \$0.5 billion impact from foreign currency translation and decreased LIFO inventory reserves partially offset by increased agricultural commodity costs. Manufacturing expenses increased \$43 million primarily due to higher chemical, energy and fuel costs.

Selling, general and administrative expenses were relatively unchanged at \$337 million due principally to increased provisions for doubtful accounts offset by lower employee-related costs and the impact of foreign currency translation.

Other (income) expense-net decreased \$124 million due principally to decreased equity in earnings of affiliates, decreased gains on sales of assets and marketable securities, increased net interest expense and increased minority interest eliminations.

Operating profit by segment for the quarter is as follows:

	Three Months Ended December 31,			
	2008	2007		Change
	(In millions)

Corporate	11	(270)		281
<b>Earnings Before Income Taxes</b>	<b>\$ 826</b>	<b>\$ 685</b>	<b>\$</b>	<b>141</b>

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profit increased \$100 million for the quarter. Crushing and origination results increased \$46 million for the quarter due principally to improved crushing margins, including favorable risk management results, and higher origination margins, partially offset by lower fertilizer sales volumes and margins. Refining, packaging, biodiesel and other results increased \$40 million for the quarter. Biodiesel results increased for the quarter primarily related to the start up of a new facility in Brazil and favorable impacts from derivatives used to economically hedge future sales commitments in Europe. Refining, packaging, biodiesel and other results also improved due to recent increases in selling prices for many key products and the absence of asset abandonment charges of \$15 million included in the quarter ended December 31, 2007. Asia results increased \$14 million for the quarter due to increased earnings related to equity investments, principally Wilmar International Limited.

Corn Processing operating profit decreased \$246 million for the quarter. Sweetener and starches operating profit decreased \$10 million for the quarter due principally to higher net corn costs and increased manufacturing costs, partially offset by higher average selling prices. Bioproducts operating profit decreased \$236 million for the quarter due principally to a significant decline in ethanol margins resulting from higher net corn costs and increased manufacturing costs, lower average selling prices, and the write-down of ethanol inventory to market. Net corn costs increased, due principally to lower by-product credits and the impact from the Company's corn hedging activity.

Agricultural Services operating profit increased \$147 million for the quarter due principally to improved global merchandising and handling margins resulting from opportunities created by volatile commodity and freight market conditions. In addition, income from storage and drying increased for the quarter. Transportation results increased for the quarter due principally to higher barge freight rates.

Other operating profit decreased \$141 million for the quarter. Wheat, cocoa, malt and sugar operating profits decreased \$27 million for the quarter due principally to lower equity earnings from the Company's investment in Gruma S.A.B. de C.V. related primarily to foreign currency derivative losses (see Note 9 to Consolidated Financial Statements), partially offset by improved wheat and cocoa processing margins. Financial operating profits decreased \$114 million for the quarter primarily due to increased captive insurance loss provisions, decreased interest income of the Company's futures commission merchant operations and decreased gains from sales of marketable securities.

Corporate results increased \$281 million for the quarter due principally to a reduction in LIFO inventory reserves of \$123 million for the quarter ended December 31, 2008 compared to increased LIFO inventory reserves of \$225 million for the quarter ended December 31, 2007. Corporate unallocated interest was a net expense of \$32 million for the quarter compared to net income of \$38 million in the prior year. Corporate interest expense increased due principally to additional long-term debt borrowings and decreased interest income, partially offset by increased capitalized interest on capital projects.

Income taxes increased due principally to higher pretax earnings. The Company's effective tax rate for the quarter is 29.2% as compared to 30.9% in the prior year's quarter. The decrease in the Company's effective tax rate is primarily due to changes in the geographic mix of pretax earnings.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Six Months Ended December 31, 2008 Compared to Six Months Ended December 31, 2007

Net earnings for the six months increased due principally to decreased LIFO inventory valuation reserves resulting from a decline in commodity costs during the current six month period, and increased segment operating profits.

As an agricultural-based commodity business, the Company is subject to a variety of market factors which affect the Company's operating results. Shifting global sources of grain supplies, continuing commodity and freight market volatility, decreased exports of U.S. agricultural products and the delayed U.S. harvest created enhanced profit opportunities for the Company. An increase in global production of agricultural products and the anticipation of weakening future demand contributed to the decline in agricultural commodity market prices. Biodiesel markets continue to develop, particularly in South America, and contributed to an increase in demand for refined and crude vegetable oils. Compared to last year, market prices for corn increased sharply resulting in higher raw material costs which negatively impacted ethanol margins and were only partially passed on in the form of increased selling prices for sweeteners and starches. Additionally, ethanol margins decreased as lower demand for gasoline, decreased gasoline prices, and excess ethanol industry capacity limited the Company's ability to increase ethanol selling prices. Higher chemical, energy and fuel costs negatively impacted the Company's manufacturing costs.

Analysis of Statements of Earnings

Net sales and other operating income increased 29% to \$ 37.8 billion for the six months, reflecting increased average selling prices and decreased sales volumes. A \$10 billion increase due to higher average selling prices was partially offset by a \$1.6 billion decrease due to lower sales volumes.

---

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Net sales and other operating income by segment for the six months are as follows:

	Six Months Ended December 31,		Change
	2008	2007	
	(In millions)		
<b>Oilseeds Processing</b>			
Crushing & Origination	\$ 7,865	\$ 6,088	\$ 1,777
Refining, Packaging, Biodiesel & Other	5,108	3,686	1,422
Asia	95	91	4
<b>Total Oilseeds Processing</b>	<b>13,068</b>	<b>9,865</b>	<b>3,203</b>
<b>Corn Processing</b>			
Sweeteners and Starches	1,983	1,625	358
Bioproducts	2,111	1,579	532
<b>Total Corn Processing</b>	<b>4,094</b>	<b>3,204</b>	<b>890</b>
<b>Agricultural Services</b>			
Merchandising & Handling	17,558	13,659	3,899
Transportation	152	114	38
<b>Total Agricultural Services</b>	<b>17,710</b>	<b>13,773</b>	<b>3,937</b>
<b>Other</b>			
Wheat, Cocoa, Malt, and Sugar	2,903	2,436	467
Financial	58	46	12
<b>Total Other</b>	<b>2,961</b>	<b>2,482</b>	<b>479</b>
<b>Total</b>	<b>\$ 37,833</b>	<b>\$ 29,324</b>	<b>\$ 8,509</b>

Oilseeds Processing sales increased 32% to \$13.1 billion due principally to higher average selling prices resulting primarily from increases in underlying commodity costs. Sales quantities of biodiesel also increased due principally to the start up of a new facility in Brazil. Corn Processing sales increased 28% to \$4.1 billion. Sweeteners and starches sales increased due principally to higher average selling prices. Bioproducts sales increased primarily as a result of increased sales volumes and higher average selling prices of ethanol and lysine. Agricultural Services sales increased 29% to \$17.7 billion due primarily to increased underlying commodity costs, partially offset by decreased sales volumes. Other sales increased 19% to \$3.0 billion primarily due to higher average selling prices of wheat flour and cocoa products, partially offset by decreased sales volumes.

Cost of products sold increased 27% to \$34.8 billion due principally to increased agricultural commodity costs, partially offset by decreased sales volumes and decreased LIFO inventory reserves. Manufacturing expenses increased \$235 million primarily due to increased chemical, energy and fuel costs.

Selling, general and administrative expenses increased 8% to \$746 million due principally to increased provisions for doubtful accounts offset by lower employee-related costs, and to a lesser extent, the impact of foreign currency translation.

Other (income) expense-net decreased \$159 million due principally to decreased gains on sales of assets and marketable securities, increased interest expense, decreased investment income and increased minority interest eliminations.

---

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Operating profit by segment for the six months is as follows:

	Six Months Ended December 31,		Change
	2008	2007	
	(In millions)		
<b>Oilseeds Processing</b>

Oilseeds Processing operating profit increased \$401 million to \$829 million. Crushing and origination results increased \$254 million to \$526 million due principally to improved crushing margins, including favorable impacts from raw material positioning and risk management results. In addition, higher origination margins were partially offset by lower fertilizer sales volumes and margins. Refining, packaging, biodiesel and other results increased \$84 million to \$192 million. Biodiesel results increased primarily due to the start up of a new facility in Brazil and favorable impacts from derivatives used to hedge future sales commitments in Europe. Refining, packaging, biodiesel and other results also improved due to increased selling prices and the absence of asset abandonment charges of \$18 million included in the six months ended December 31, 2007. Asia results increased \$63 million to \$111 million due to increased earnings related to equity investments, principally Wilmar International Limited.

Corn Processing operating profit decreased \$381 million to \$147 million. Sweetener and starches operating profit decreased \$112 million due principally to sharply higher net corn costs and increased manufacturing costs, partially offset by higher average selling prices. Bioproducts operating profit decreased \$269 million due principally to a significant decline in ethanol margins resulting from sharply higher net corn costs, increased manufacturing costs,

lower average selling prices and the write-down of ethanol inventory to market.

---

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Agricultural Services operating profit increased \$346 million to \$890 million due principally to improved global merchandising and handling margins resulting from opportunities created by volatile commodity and freight market conditions, global shifts in the sources of grain supplies and the delayed U.S. harvest. Transportation results increased due principally to higher barge freight rates.

Other operating profit decreased \$127 million to \$125 million. Wheat, cocoa, malt and sugar operating profit increased \$38 million to \$154 million due principally to improved wheat and cocoa processing margins partially offset by lower equity earnings from the Company's investment in Gruma S.A.B. de C.V. related primarily to foreign currency derivative losses (See Note 9 to Consolidated Financial Statements). Financial operating profit decreased \$165 million primarily due to increased captive insurance loss provisions, decreased interest income of the Company's futures commission merchant operations and decreased gains from sales of marketable securities.

Corporate results increased \$750 million to \$329 million due principally to LIFO credits of \$576 million compared to LIFO charges of \$307 million in the prior year. Corporate unallocated interest decreased \$132 million primarily related to increased interest expense and decreased interest income, partially offset by increased capitalized interest on construction projects.

Income taxes increased due principally to higher pretax earnings. The Company's effective tax rate for the six months is 29.5% as compared to 31.4% in the prior year's six months. The decrease in the Company's effective tax rate is primarily due to changes in the geographic mix of pretax earnings.

Liquidity and Capital Resources

A Company objective is to have sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural-based commodity business.

At December 31, 2008, the Company had \$3.4 billion of cash, cash equivalents, and short-term marketable securities and a current ratio, defined as current assets divided by current liabilities, of 2.0 to 1. Included in working capital is \$5.3 billion of readily marketable commodity inventories. Cash provided by operating activities totaled \$5.9 billion for the quarter compared to \$2.9 billion of cash used in operations the same quarter last year. This change was primarily due to a decrease in working capital requirements principally related to decreased market prices and, to a lesser extent, decreased quantities of agricultural commodity inventories, and decreased receivables. Cash used in financing activities was \$2.9 billion compared to cash generated by financing activities of \$4.3 billion the same quarter last year due principally to changes in short-term borrowing requirements. Net short-term borrowings decreased primarily as a result of decreased working capital requirements.

At December 31, 2008, the Company had lines of credit totaling \$6.3 billion, of which \$5.7 billion was unused. Of the Company's total lines of credit, \$4.2 billion support a commercial paper borrowing facility, against which there were no borrowings at December 31, 2008.

Capital resources remained strong as reflected by the increase in the Company's net worth from \$13.5 billion to \$13.7 billion. The Company's ratio of long-term debt to total capital (the sum of the Company's long-term debt and shareholders' equity) was 36% at December 31, 2008 and at June 30, 2008. This ratio is a measure of the Company's long-term liquidity and is an indicator of financial flexibility.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)

Contractual Obligations and Commercial Commitments

The Company's purchase obligations as of December 31, 2008 were \$13.0 billion. As of December 31, 2008, the Company expects to make payments related to purchase obligations of \$11.7 billion within the next twelve months, principally related to obligations to purchase agricultural commodity inventories. There were no other material changes in the Company's contractual obligations and off balance sheet arrangements during the six months ended December 31, 2008.

Critical Accounting Policies

There were no material changes in the Company's critical accounting policies during the six months ended December 31, 2008.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in: commodity prices as they relate to the Company's net commodity position; marketable equity security prices; foreign currency exchange rates; and interest rates. Significant changes in market risk sensitive instruments and positions for the quarter ended December 31, 2008 are described below. There were no material changes during the quarter in the Company's potential loss arising from changes in marketable equity securities, foreign currency exchange rates, and interest rates.

For detailed information regarding the Company's market risk sensitive instruments and positions, see Item 7A, "Quantitative and Qualitative disclosures About Market Risk" included in the Company's annual report on Form 10-K for the year ended June 30, 2008.

Commodities

The availability and price of agricultural commodities are subject to wide fluctuations due to unpredictable factors such as weather, plantings, global government farm programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. A sensitivity analysis has been prepared to estimate the Company's exposure to market risk of its commodity position. The Company's daily net commodity position consists of inventories, related purchase and sale contracts, and exchange-traded futures and exchange-traded and over-the-counter option contracts, including those used to hedge portions of production requirements. The fair value of such position is a summation of the fair values calculated for each commodity by valuing each net position at quoted futures prices. Market risk is estimated as the potential loss in fair value resulting from a hypothetical ten percent adverse change in such prices. Actual results may differ.

Long/(Short)	Six Months Ended December 31, 2008		Year Ended June 30, 2008	
	Fair Value	Market Risk	Fair Value	Market Risk
	(in millions)			
Highest position	\$ 300	\$ 30	\$ 1,260	\$ 126

Edgar Filing: ARCHER DANIELS MIDLAND CO - Form 10-Q

Lowest position	(1,457)	(146)	(915)	(92)
Average position	(564)	(56)	251	25

The decrease in fair value of the average position was principally the result of a decrease in quantities underlying the daily net commodity position.

---

#### ITEM 4. CONTROLS AND PROCEDURES

As of December 31, 2008, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rules 13a – 15(e) and 15d – 15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and (b) accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. There was no change in the Company's internal controls over financial reporting during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

#### PART II – OTHER INFORMATION

##### ITEM 1. LEGAL PROCEEDINGS

###### Environmental Matters

The United States Environmental Protection Agency (USEPA) and the Missouri Department of Natural Resources have initiated a criminal investigation of the wastewater discharge practices at one of the Company's barge facilities in Missouri. Since February 2008, several employees at the facility have received grand jury subpoenas relating to wastewater discharges from the facility. The Company has been cooperating with the investigation. On January 14, 2009, USEPA advised the Company that it intends to seek an indictment. The Company does not yet have enough information to reasonably estimate any penalty that may be imposed if any enforcement action is brought.

The Company is involved in approximately twenty administrative and judicial proceedings in which it has been identified as a potentially responsible party (PRP) under the federal Superfund law and its state analogs for the study and cleanup of sites contaminated by material discharged into the environment. In all of these matters there are numerous PRPs. Due to various factors, such as the required level of remediation and participation in the cleanup effort by others, the Company's future cleanup costs at these sites cannot be reasonably estimated.

In management's opinion, these proceedings will not, either individually or in the aggregate, have a material adverse effect on the Company's financial condition or results of operations.

##### ITEM 1A. RISK FACTORS

There were no material changes in the Company's risk factors during the three months ended December 31, 2008.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

## Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (2)	Number of Shares Remaining that May be Purchased Under the Program (2)
October 1, 2008 to October 31, 2008	99	\$ 22.11	99	71,346,952
November 1, 2008 to November 30, 2008	3,443	25.70	7	71,346,945
December 1, 2008 to December 31, 2008	2,424	27.97	133	71,346,812
Total	5,966	\$ 26.56	239	71,346,812

(1) Total shares purchased represents those shares purchased as part of the Company's publicly announced share repurchase program described below, shares received as payment of the exercise price for stock option exercises, and shares received as payment of the withholding taxes on vested restricted stock grants.

(2) On November 4, 2004, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2005 and ending December 31, 2009.

## ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Annual Meeting of Stockholders was held on November 6, 2008. Proxies for the Annual Meeting were solicited pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended. There was no solicitation in opposition to the Board of Director nominees as listed in the proxy statement and all nominees were elected as follows:

Nominee	Shares Cast For	Shares Withheld
G. W. Buckley	515,829,297	13,352,798
M. H. Carter	498,209,657	30,972,438
V. F. Haynes	445,888,045	83,294,050
A. Maciel	445,671,372	83,510,723
P. J. Moore	495,597,875	33,584,220
M. B. Mulrone	479,532,079	49,650,016
T. F. O'Neill	445,823,050	83,359,045
K. R. Westbrook	441,607,808	87,574,287
P. A. Woertz	499,412,236	29,769,859

The Stockholder's Proposal No. 1 (Code of Conduct Regarding Global Human Rights Standards) was defeated as follows:

For	Against	Abstain
93,496,621	313,997,695	45,949,002

The appointment of Ernst & Young LLP as independent accountants was ratified at the meeting by the following votes:

For	Against	Abstain
519,885,318	8,098,016	1,198,761

## ITEM 5. OTHER INFORMATION

Effective on February 5, 2009, the Company's Board of Directors approved the following amendments to the Company's Bylaws: (i) an amendment to Section 1.4(c) to require that proponents of stockholder proposals disclose to the Company their derivative and other interests in the Company's equity securities; (ii) amendments to Section 2.8 to (a) clarify the Governance Committee's role in determining the materiality of a director's potential conflict of interest and (b) recognize the independence requirements of the New York Stock Exchange; and (iii) an amendment to Section 6.7 to clarify that the indemnification and other rights set forth in Article VI vest as of the commencement of service.

The full text of the Company's Bylaws, as amended, is included as Exhibit 3(ii) to this quarterly report on Form 10-Q and is incorporated into this Item 5 by reference.

ITEM 6. EXHIBITS

- (3)(i) Composite Certificate of Incorporation, as amended, filed on November 13, 2001 as Exhibit 3(i) to Form 10-Q for the quarter ended September 30, 2001 (File No. 1-44), is incorporated herein by reference.
  - (ii) Bylaws, as amended.
  - 10(i) The Archer-Daniels-Midland Company Amended and Restated Stock Unit Plan for Nonemployee Directors.
  - (ii) ADM Deferred Compensation Plan for Selected Management Employees I (As amended through January 1, 2009).
  - (iii) ADM Deferred Compensation Plan for Selected Management Employees II (As Amended and Restated Effective January 1, 2009).
  - (iv) ADM Supplemental Retirement Plan (As Amended and Restated Effective January 1, 2009).
  - (v) Archer-Daniels Midland Company Amended and Restated 2002 Incentive Compensation Plan.
  - (31.1) Certification of Chief Executive Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a) of the Securities Exchange Act, as amended.
  - (31.2) Certification of Chief Financial Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a) of the Securities Exchange Act, as amended.
  - (32.1) Certification of Chief Executive Officer pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
  - (32.2) Certification of Chief Financial Officer pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
-

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
