Item 2.02. Results of Operation	ons and Financial Condition	

On February 27, 2007, Federated Department Stores, Inc. ("Federated") issued a press release announcing Federated's financial condition and results of operations as of and for the 14 and 53 weeks ended February 3, 2007. The full text of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

The press release referred to above contains certain non-GAAP financial measures of diluted earnings per share from continuing operations, excluding May Company merger integration costs and related inventory valuation adjustments and the gains on the sale of credit card receivables. Management believes that diluted earnings per share from continuing operations, excluding May Company merger integration costs and related inventory valuation adjustments and the gains on the sale of credit card receivables, is a useful measure in evaluating Federated's ability to generate earnings from continuing operations and that providing such measure will allow investors to more readily compare the earnings referred to in the press release to the earnings provided by Federated in past and future periods. Management believes that excluding May Company merger integration costs and related inventory valuation

adjustments and the gains on the sale of credit card receivables from these calculations is particularly useful where the amount of such items are not consistent in the periods presented. However, the reader is cautioned that any non-GAAP financial measures provided by Federated are provided in addition to, and not as an alternative for, Federated's reported results prepared in accordance with GAAP. Certain items that may have a significant impact on Federated's financial position, results of operations and cash flows must be considered when assessing Federated's actual financial condition and performance regardless of whether these items are included in these non-GAAP financial measures. Additionally, the methods used by Federated to calculate its non-GAAP financial measures may differ significantly from methods used by other companies to compute similar measures. As a result, any non-GAAP financial measures provided by Federated may not be comparable to similar measures provided by other companies.
