Management's Discussion and Analysis of Financial Condition and Results of Operations Performance Summary

BOK Financial Corporation ("the Company") reported net income of \$88.1 million or \$1.35 per diluted share for the second quarter of 2017, compared to \$65.8 million or \$1.00 per diluted share for the second quarter of 2016 and \$88.4 million or \$1.35 per diluted share for the first quarter of 2017.

Highlights of the second quarter of 2017 included:

Net interest revenue totaled \$205.2 million for the second quarter of 2017, up from \$182.6 million in the second quarter of 2016 and \$201.2 million in the first quarter of 2017. The increase in net interest revenue over the prior year was driven by both improving yields and growth in average earning assets. Net interest margin was 2.89 percent for the second quarter of 2017. Net interest margin was 2.63 percent for the second quarter of 2016 and 2.81 percent for the first quarter of 2017. Average earning assets were \$29.2 billion for the second quarter of 2017 and \$28.8 billion for the second quarter of 2016.

Fees and commissions revenue totaled \$177.5 million for the second quarter of 2017, a \$2.7 million decrease compared to the second quarter of 2016. Growth in fiduciary and asset management revenue was offset by lower brokerage and trading revenue and mortgage banking revenue. Fees and commissions revenue increased \$13.1 million over the first quarter of 2017. Growth in mortgage banking revenue, fiduciary and asset management revenue and transaction card revenue were partially offset by a decrease in brokerage and trading revenue.

Other operating expense for the second quarter of 2017 totaled \$250.9 million, largely unchanged compared to the second quarter of 2016. Personnel expense increased \$4.5 million, primarily due to an increase in the probability that certain performance-based equity awards will vest. Non-personnel expense decreased \$5.0 million. Deposit insurance expense decreased primarily due to \$5.1 million in credits received during the second quarter of 2017 related to revision of certain inputs to the assessment calculation filed in previous periods. Operating expenses increased \$6.2 million over the previous quarter. Personnel expense was up \$7.3 million and non-personnel expense decreased \$1.1 million.

Income tax expense was \$47.7 million or 34.9 percent of net income before taxes for the second quarter of 2017, compared to \$30.5 million or 31.5 percent in the second quarter of 2016 and \$38.1 million or 30.1 percent in the first quarter of 2017. Excluding the effect of a new accounting standard that requires the tax effect of vested equity compensation to be recorded in income tax expense, the effective tax rate would be 33.7 percent of net income before taxes for the second quarter of 2017 and 33.2 percent for the first quarter of 2017.

No provision for credit losses was recorded in the second quarter of 2017 or the first quarter of 2017. A \$20.0 million provision for credit losses was recorded in the second quarter of 2016. Gross charge-offs were \$2.9 million in the second quarter of 2016 and \$2.2 million in the first quarter of 2017. Recoveries were \$1.2 million in the second quarter of 2017, compared to \$1.4 million in the second quarter of 2016 and \$2.9 million in the second quarter of 2017.

The combined allowance for credit losses totaled \$256 million or 1.49 percent of outstanding loans at June 30, 2017, compared to \$258 million or 1.52 percent of outstanding loans at March 31, 2017.

Nonperforming assets that are not guaranteed by U.S. government agencies totaled \$276 million or 1.62 percent of outstanding loans and repossessed assets at June 30, 2017 and \$240 million or 1.43 percent of outstanding loans and repossessed assets at March 31, 2017. The increase in nonperforming assets was primarily due to an increase in nonaccruing healthcare and energy loans.

Average loans were largely unchanged compared to the previous quarter. Period-end outstanding loan balances were \$17.2 billion at June 30, 2017, an increase of \$192 million over March 31, 2017.

Average deposits decreased \$277 million compared to the previous quarter. Growth in demand deposit balances was offset by a decrease in interest-bearing transaction account balances and time deposits. Period-end deposits were \$22.3 billion at June 30, 2017, a \$259 million decrease compared to March 31, 2017.

The Company's common equity Tier 1 ratio was 11.76% at June 30, 2017. In addition, the Company's Tier 1 capital ratio was 11.76%, total capital ratio was 13.36% and leverage ratio was 9.27% at June 30, 2017. The Company's common equity Tier 1 ratio was 11.59% at March 31, 2017. In addition, the Company's Tier 1 capital ratio was 11.59%, total capital ratio was 13.25% and leverage ratio was 8.89% at March 31, 2017.

The Company paid a regular quarterly cash dividend of \$29 million or \$0.44 per common share during the

second quarter of 2017. On July 25, 2017, the board of directors approved a regular quarterly cash dividend of \$0.44 per common share payable on or about August 25, 2017 to shareholders of record as of August 11, 2017. Results of Operations

Net Interest Revenue and Net Interest Margin

Net interest revenue is the interest earned on debt securities, loans and other interest-earning assets less interest paid for interest-bearing deposits and other borrowings. The net interest margin is calculated by dividing tax-equivalent net interest revenue by average interest-earning assets. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. Net interest margin is typically greater than net interest spread due to interest income earned on assets funded by non-interest bearing liabilities such as demand deposits and equity.

Net interest revenue totaled \$205.2 million for the second quarter of 2017, up from \$182.6 million in the second quarter of 2016 and \$201.2 million in the first quarter of 2017. Net interest margin was 2.89 percent for the second quarter of 2017, 2.63 percent for the second quarter of 2016 and 2.81 percent for the first quarter of 2017.

Tax-equivalent net interest revenue increased \$22.6 million over the second quarter of 2016. Table 1 shows the effect on net interest revenue from changes in average balances and interest rates for various types of earning assets and interest-bearing liabilities. Changes in interest rates and yields increased net interest revenue by \$13.1 million. The benefit of an increase in short-term interest rates on the floating-rate earning assets was partially offset by higher borrowing costs. Tax-equivalent net interest revenue increased \$9.4 million primarily due to the growth in average balances of loans and trading securities.

The tax-equivalent yield on earning assets was 3.30 percent for the second quarter of 2017, up 39 basis points over the second quarter of 2016, primarily due to increases in short-term interest rates resulting from three 25 basis point increases in the federal funds rate by the Federal Reserve since the second quarter of 2016. Loan yields increased 45 basis points to 4.03 percent. The yield on interest-bearing cash and cash equivalents increased 53 basis points. The available for sale securities portfolio yield was up 7 basis points to 2.11 percent. Funding costs were up 22 basis points over the second quarter of 2016. Growth in the cost of interest-bearing deposits was limited to 7 basis points by a lack of market pricing pressure. The cost of other borrowed funds increased 50 basis points. The cost of the subordinated debt was up 403 basis points as lower variable rate debt was replaced in the second quarter of 2016 by higher fixed rate debt. The benefit to net interest margin from earning assets funded by non-interest bearing liabilities was 22 basis points for the second quarter of 2017, up 9 basis points over the second quarter of 2016. Average non-interest bearing deposits comprised 29% of total liabilities and equity for the second quarter of 2017, up from 26% for the second quarter of 2016.

Average earning assets for the second quarter of 2017 increased \$424 million or 1 percent over the second quarter of 2016, including \$495 million related to the Mobank acquisition. Average loans, net of allowance for loan losses, increased \$860 million due primarily to growth in commercial, consumer and commercial real estate loans and included \$495 million related to the Mobank acquisition. The average balance of trading securities increased \$218 million primarily due to the addition of a new group in the third quarter of 2016 that trades in U.S. agency residential mortgage-backed securities. The average balance of fair value option securities held as an economic hedge of our mortgage servicing rights increased \$108 million. The average balance of available for sale securities decreased \$506 million. The average balance of residential mortgage loans held for sale decreased \$156 million and the investment

securities portfolio balance decreased \$63 million.

Average deposits increased \$1.6 billion over the second quarter of 2016, including \$547 million from the Mobank acquisition in the fourth quarter of 2016. Demand deposit balances grew by \$1.2 billion, including \$265 million from Mobank. Interest-bearing transaction account balances increased \$497 million, including \$282 million from Mobank. This growth was partially offset by a \$93 million decrease in average time deposits. Savings account balances also grew over the prior year. Average borrowed funds decreased \$695 million compared to the second quarter of 2016, primarily due to decreased borrowings from the Federal Home Loan Banks and lower average repurchase agreement balances. The average balance of subordinated debentures decreased \$88 million.

- 2 -

Net interest margin increased 8 basis points over the first quarter of 2017. The yield on average earning assets increased 15 basis points. The loan portfolio yield increased by 15 basis points primarily due to increases in the 30 day and 90 day LIBOR. The yield on the available for sale securities portfolio increased 6 basis points. The yield on interest-bearing cash and cash equivalents increased 22 basis points. Funding costs were 0.63 percent, up 11 basis points over the prior quarter. The benefit to net interest margin from earning assets funded by non-interest bearing liabilities increased 4 basis points over the prior quarter.

Average earning assets decreased \$359 million compared to the first quarter of 2017. The average balance of the available for sale securities portfolio decreased \$183 million. The average balance of fair value option securities held as an economic hedge of our mortgage servicing rights increased \$60 million. Average trading securities portfolio balances decreased \$124 million and interest-bearing cash and cash equivalents balances decreased \$80 million. Average deposits decreased \$277 million compared to the previous quarter. Interest-bearing transaction account balances decreased \$480 million and time deposit balances decreased \$55 million, partially offset by a \$237 million increase in demand deposit balances. The average balance of borrowed funds decreased \$254 million compared to the first quarter of 2017 primarily due to decreased borrowings from the Federal Home Loan Banks and lower average repurchase agreement balances.

Our overall objective is to manage the Company's balance sheet to be relatively neutral to changes in interest rates as is further described in the Market Risk section of this report. Approximately 81% of our commercial and commercial real estate loan portfolios are either variable rate or fixed rate that will reprice within one year. These loans are funded primarily by deposit accounts that are either non-interest bearing, or that reprice more slowly than the loans. The result is a balance sheet that would be asset sensitive, which means that assets generally reprice more quickly than liabilities. One of the strategies that we use to manage toward a relative rate-neutral position is to purchase fixed-rate residential mortgage-backed securities issued primarily by U.S. government agencies and fund them with market-rate-sensitive liabilities. The liability-sensitive nature of this strategy provides an offset to the asset-sensitive characteristics of our loan portfolio. We also may use derivative instruments to manage our interest rate risk.

The effectiveness of these strategies is reflected in the overall change in net interest revenue due to changes in interest rates as shown in Table 1 and in the interest rate sensitivity projections as shown in the Market Risk section of this report.

Other Operating Revenue

Other operating revenue was \$182.3 million for the second quarter of 2017, a \$3.3 million decrease compared to the second quarter of 2016 and a \$12.0 million increase over the first quarter of 2017. Fees and commissions revenue decreased \$2.7 million compared to the second quarter of 2016 and increased \$13.1 million over the prior quarter. The change in the fair value of mortgage servicing rights, net of economic hedges, decreased other operating revenue by \$1.7 million in the second quarter of 2017, decreased other operating revenue by \$1.2 million in the second quarter of 2017, decreased other operating revenue by \$1.2 million in the second quarter of 2016 and increased other operating revenue \$266 thousand in the first quarter of 2017.

Fees and commissions revenue

Diversified sources of fees and commissions revenue are a significant part of our business strategy and represented 46 percent of total revenue for the second quarter of 2017, excluding provision for credit losses and gains and losses on other assets, securities and derivatives and the change in the fair value of mortgage servicing rights. We believe that a variety of fee revenue sources provides an offset to changes in interest rates, values in the equity markets, commodity prices and consumer spending, all of which can be volatile. As an example of this strength, many of the economic factors that cause net interest revenue compression such as falling interest rates may also drive growth in our mortgage banking revenue. We expect growth in other operating revenue to come through offering new products and services and by further development of our presence in other markets. However, current and future economic conditions, regulatory constraints, increased competition and saturation in our existing markets could affect the rate of future increases.

Brokerage and trading revenue, which includes revenues from trading, customer hedging, retail brokerage and investment banking, decreased \$7.8 million or 20 percent compared to the second quarter of 2016.

- 5 -

Trading revenue includes net realized and unrealized gains primarily related to sales of U.S. government securities, residential mortgage-backed securities guaranteed by U.S. government agencies and municipal securities to institutional customers and related derivative instruments. Trading revenue was \$10.1 million for the second quarter of 2017, a \$2.2 million or 18 percent decrease compared to the second quarter of 2016. Lower volumes of U.S. agency residential mortgage-backed and municipal securities sold to our institutional customers due to anticipation of future interest increase, was offset by the addition of a new group in the third quarter of 2016 that trades in U.S. government agency residential mortgage-backed securities and related to-be-announced derivatives. The addition of this group added \$1.4 million of net interest revenue and \$2.1 million of trading revenue in the second quarter. This new group increased our trading securities portfolio by \$359 million and receivable for unsettled trades by \$111 million at June 30, 2017.

Customer hedging revenue is based primarily on realized and unrealized changes in the fair value of derivative contracts held for customer risk management programs. As more fully discussed under Customer Derivative Programs in Note 3 of the Consolidated Financial Statements, we offer commodity, interest rate, foreign exchange and equity derivatives to our customers. Customer hedging revenue totaled \$11.6 million for the second quarter of 2017, a \$1.9 million or 14 percent decrease compared to the second quarter of 2016 primarily attributed to energy and mortgage banking customers.

Revenue earned from retail brokerage transactions decreased \$740 thousand or 11 percent compared to the second quarter of 2016 to \$6.0 million. Retail brokerage revenue includes fees and commissions earned on sales of fixed income securities, annuities, mutual funds and other financial instruments to retail customers. Revenue is primarily based on the volume of customer transactions and applicable commission rate for each product type. Trading volume decreased in the second quarter of 2017, primarily due to the impact of the implementation of the new Department of Labor ("DOL") fiduciary rule. New regulation issued by the DOL amended the definition of investment advice under the Employee Retirement Income Security Act ("ERISA"). The new rule is designed to provide better protection to plans, participants, beneficiaries and individual retirement account ("IRA") owners against conflicts of interest, imprudence and disloyalty.

Investment banking revenue, which includes fees earned upon completion of underwriting and financial advisory services and loan syndication fees, totaled \$4.0 million for the second quarter of 2017, a \$2.9 million or 42 percent decrease compared to the second quarter of 2016. Investment banking revenue is primarily related to the timing and volume of completed transactions.

Brokerage and trading revenue decreased \$1.9 million compared to the first quarter of 2017, primarily due to a \$1.0 million decrease in trading revenue and an \$862 thousand decrease in retail brokerage fees. Customer hedging revenue was unchanged compared to the prior quarter. Increased hedging activity from our mortgage banking customers was offset by a decreased volume of energy contracts.

Transaction card revenue depends largely on the volume and amount of transactions processed, the number of TransFund automated teller machine ("ATM") locations and the number of merchants served. Excluding the impact of a customer early termination fee received in the second quarter of 2016, transaction card revenue for the second quarter of 2017 increased \$1.5 million or 5 percent over the second quarter of 2016. Revenues from the processing of transactions on behalf of the members of our TransFund electronic funds transfer ("EFT") network totaled \$18.1 million, up \$1.0 million or 6% over the prior year. Merchant services fees totaled \$12.1 million, a \$373 thousand or 3 percent increase from increased transaction activity. Revenue from interchange fees paid by merchants for transactions processed from debit cards issued by the Company totaled \$5.1 million, an increase of \$133 thousand or 3 percent over the second quarter of 2016.

Transaction card revenue increased \$3.2 million over the prior quarter, primarily due to a seasonal increase in transaction volumes on our TransFund EFT network and a full quarter's impact of expansion into the Arizona market.

Revenue from processing transactions on behalf of merchants and check card revenue also increased over the prior quarter.

Fiduciary and asset management revenue is earned through managing or holding of assets for customers and executing transactions or providing related services. Approximately 80 percent of fiduciary and asset management revenue is primarily based on the fair value of assets. Rates applied to asset values vary based on the nature of the relationship. Fiduciary relationships and managed asset relationships generally have higher fee rates than non-fiduciary and/or managed relationships.

- 6 -

Fiduciary and asset management revenue grew by \$7.0 million or 20 percent over the second quarter of 2016, primarily due to growth in assets under management, improved pricing discipline and decreased fee waivers. We earn fees as administrator to and investment adviser for the Cavanal Hill Funds, a diversified, open-ended investment company established as a business trust under the Investment Company Act of 1940. The Bank is custodian and Cavanal Hill Distributors, Inc. is distributor for the Cavanal Hill Funds. Products of the Cavanal Hill Funds are offered to customers, employee benefit plans, trusts and the general public in the ordinary course of business. Prior to the recent increases in short-term market interest rates as a result of the Federal Reserve's federal funds rate increases, we voluntarily waived \$1.8 million of administration fees on the Cavanal Hill money market funds in order to maintain positive yields on these funds in the second quarter of 2016. We waived \$445 thousand of fees in the first quarter of 2017. No fees were waived in the second quarter of 2017.

Fiduciary and asset management revenue increased \$3.2 million over the first quarter of 2017, primarily due to an annual assessment of tax preparation fees, growth in assets under management and decreased fee waivers.

A distribution of assets under management or administration and related fiduciary and asset management revenue follows:

Table 3 Assets Under Management or Administration

	Three Month	ns Ended

Fiduciary and asset management revenue includes asset-based and other fees associated with the

assets.

1

² Annualized revenue divided by period-end balance.

A summary of changes in assets under management or administration for the three months ended June 30, 2017 and 2016 follows:

Table 4 -- Changes in Assets Under Management or Administration

Three Months Ended						
June 30,						
2017	2016					
\$77,418,956	\$71,869,013					
(918,076)	377,244					
1,310,882	755,259					
	June 30, 2017 \$77,418,956 (918,076)					

Ending balance \$77,811,762 \$73,001,516

- 7 -

Deposit service charges and fees were \$23.4 million for the second quarter of 2017, an increase of \$736 thousand or 3 percent over the second quarter of 2016. Commercial account service charge revenue totaled \$11.8 million, up \$705 thousand or 6 percent. Overdraft fees were \$9.8 million, largely unchanged compared to the second quarter of 2016. Service charges on deposit accounts with a standard monthly fee were \$1.7 million, an increase of \$109 thousand or 7 percent. Deposit service charges and fees increased \$324 thousand over the prior quarter primarily due to an increase in commercial account service charge revenue and a seasonal increase in overdraft fee volumes.

Mortgage banking revenue decreased \$4.6 million or 13 percent compared to the second quarter of 2016. Mortgage production revenue decreased \$5.2 million. Mortgage loan production volumes decreased \$998 million, including a \$581 million decrease related to the Company's strategic decision to exit the correspondent lending channel during the third quarter of 2016. Production volumes in the Home Direct online and retail channel both decreased compared to the prior year as average primary mortgage interest rates were up 39 basis points over the second quarter of 2016. Gains on sale margins increased 56 basis points over the prior year. The margin increase was primarily due to exiting the correspondent lending channel, the lowest margin of our three sales channels, partially offset by a decrease in margins from our Home Direct online origination channel. Mortgage servicing revenue was up \$638 thousand or 4 percent over the second quarter of 2016. The outstanding principal balance of mortgage loans serviced for others totaled \$22.1 billion, an increase of \$917 million or 4 percent.

Mortgage banking revenue increased \$5.1 million over the first quarter of 2017. Mortgage production revenue increased \$5.3 million. Production volume increased \$109 million in response to lower average primary mortgage interest rates and normal seasonality. Gains on sale margin improved due to increased retail margins and improved hedging performance. Revenue from mortgage loan servicing decreased \$212 thousand compared to the prior quarter.

Net gains on other assets, securities and derivatives

Other net gains totaled \$6.1 million in the second quarter of 2017, due to the sale of a merchant banking investment. Other net gains totaled \$3.6 million in the first quarter of 2017 related to holdings of two consolidated private equity funds and the sale of certain merchant banking investments. The sales of merchant banking investments included a consolidated entity that reduced goodwill by \$2.7 million, identifiable intangible assets by \$4.6 million and other assets by \$5.6 million.

As discussed in the Market Risk section following, the fair value of our mortgage servicing rights ("MSRs") changes in response to changes in primary mortgage loan rates and other assumptions. We attempt to mitigate the earnings volatility caused by changes in the fair value of MSRs by designating certain financial instruments as an economic hedge. Changes in the fair value of these instruments are generally expected to partially offset changes in the fair value of MSRs.

The net economic benefit of the changes in fair value of mortgage servicing rights and related economic hedges was \$247 thousand in the second quarter of 2017, including a \$6.9 million decrease in the fair value of the mortgage servicing rights, a \$5.2 million increase in the fair value of securities and derivative contracts held as an economic hedge and \$2.0 million of related net interest revenue.

The net economic benefit of changes in the fair value of mortgage servicing rights and related economic hedges was \$110 thousand for the second quarter of 2016. The fair value of mortgage servicing rights decreased \$16.3 million. The fair value of securities and interest rate derivative contracts held as an economic hedge increased \$15.0 million. Net interest earned on securities held as an economic hedge was \$1.3 million.

The net economic benefit of changes in the fair value of mortgage servicing rights and related economic hedges was \$1.5 million for the first quarter of 2017. The fair value of mortgage servicing rights increased by \$1.9 million. The fair value of securities and interest rate derivative contracts held as an economic hedge decreased by \$1.6 million.

Table 6 - Gain (Loss) on Mortgage Servicing Rights (In thousands)

	Three M	Ionths En	ded
	June 30, 2017	Mar. 31, 2017	June 30, 2016
Gain (loss) on mortgage hedge derivative contracts, net	\$3,241	\$(450)	\$10,766
Gain (loss) on fair value option securities, net	1,984	(1,140)	4,279
Gain (loss) on economic hedge of mortgage servicing rights, net	5,225	(1,590)	15,045

Other Operating Expense

Other operating expense for the second quarter of 2017 totaled \$250.9 million, largely unchanged compared to the second quarter of 2016. Personnel expense increased \$4.5 million or 3 percent. Non-personnel expense decreased \$5.0 million or 4 percent compared to the prior year.

Other operating expense increased \$6.2 million over previous quarter. Personnel expense was up \$7.3 million, primarily due to changes in assumptions for the vesting of certain performance-based equity awards. Non-personnel expense decreased \$1.1 million. Deposit insurance expense decreased primarily due to \$5.1 million in credits received during the second quarter of 2017 related to the revision of certain inputs to the assessment calculation filed in previous periods. Data processing and communication expense increased \$1.4 million and net losses and operating expenses of repossessed assets increased \$1.3 million.

The discussion following excludes the impact of these items.
