Comments from the Chief Executive Officer:

Jaime Rivera, Chief Executive Officer of Bladex, stated, "The second quarter saw continued progress with respect to our client, product, and portfolio strategies.

We are working in an environment that plays to Bladex's strengths. Although overall economic growth levels are not as robust as we had envisioned, trade flows are benefiting from strong commodity prices and from policies geared towards promoting foreign trade as one of the cornerstones of economic growth. With the completion of the CAFTA negotiations, and with the ongoing talks among the United States, the European Community and several countries in the Region, we are now more confident than ever about our strategic premise calling for increased business opportunities for Bladex.

The second quarter highlights for Bladex were the following:

First, the obligors under our rescheduled credit portfolio in Argentina met all of their US\$18.7 million in principal payments due. In addition, the Bank received US\$19.6 million in prepayments, a reflection of the improving liquidity and, in some cases, improved balance sheet strength of some of our clients in the country.

Second, the Bank's new client coverage model is yielding results. Disbursements in the second quarter totaled US\$1.2 billion, 41%, or US\$343 million, above the levels of the first quarter. We were thus able to grow the credit portfolio by 2%, in spite of significant reductions in our stock of non-trade portfolio.

Third, we are encouraged by the continued increase in deposit balances, which have risen 64% to US\$841 million in the last year.

Fourth, Bladex took action on the capital management front. The increased common dividend, the special dividend, and the stock repurchase program announced on August 5, 2004, comprise a balanced package designed with the long-term interests of the Bank and its shareholders in mind.

The second quarter showed the initial results of our new product deployment strategy, as we booked US\$43.4 million of new country risk guarantee transactions. Continued work along the new product front holds the key to operating earnings growth. With all other issues addressed, operating earnings growth has now become the principal priority of the Bank." Mr. Rivera concluded.

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the environment in which Bladex is working playing to Bladex's strengths, the ability of Bladex to do business under specific market conditions, the improving liquidity of Bladex's clients in Argentina and the ability of Bladex to withstand volatility in its markets. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: a decline in the willingness of international lenders and depositors to provide funding to the Bank, causing a contraction of the Bank's credit portfolio, adverse economic or political developments in the Region, particularly in Argentina or Brazil, which could increase the level of impaired loans in the Bank's loan portfolio and, if sufficiently severe, result in the Bank's allowance for probable credit losses being insufficient to cover losses in the portfolio, unanticipated developments with respect to international banking transactions (including among other things, interest rate spreads and competitive conditions), a change in the Bank's credit ratings, events in Argentina and Brazil or other countries in the Region unfolding in a manner that is detrimental to the Bank, or which might result in adequate liquidity being unavailable to the Bank, or the Bank's operations being less profitable than anticipated.
