Dear

SHAREHOLDER:

Once again, I am pleased to write that during the period covered by this report your Nuveen California Fund continued to meet its objective of providing attractive monthly income free from federal income taxes and, where applicable, state income taxes. Detailed information on your Fund's performance can be found in the Portfolio Managers' Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy -- see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by a seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. We thank you for choosing us as a partner as you work toward that goal.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Managers'
COMMENTS

Portfolio managers Bill Fitzgerald and Scott Romans review U.S. and state economic conditions, key investment strategies, and the recent performance of the Funds. A 15-year veteran of Nuveen, Bill has managed NCP and NCO since 1991, NQC since 1992, NUC since 1993, and NCA and NVC since 1998. Scott, who has three years of investment experience at Nuveen, joined Bill in managing these Funds in January 2003.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

Generally, the underlying economic and market conditions have not changed significantly since our last shareholder report dated August 31, 2002. We believe the most influential factors shaping the U.S. economy and the municipal market continued to be the slow pace of economic growth and interest rates that remained at 40-year lows. At the same time, continued geopolitical uncertainty, centering on the situation in Iraq and the ongoing threat of terrorism, also had an economic impact during this reporting period, particularly in terms of investor sentiment.

In the municipal market, the sluggish economic recovery and general lack of inflationary pressures created conditions that helped many bonds perform well during much of the period ended February 28, 2003. In calendar year 2002, municipal supply nationwide established a new record of \$357 billion, an increase of 25% over 2001. Issuance remained high during January and February 2003, up 23% over the same period in 2002. Demand for municipal bonds stayed strong over most of this reporting period, as institutional investors, including traditional municipal bond purchasers such as property/casualty insurance companies were active buyers in the municipal market.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN CALIFORNIA?

Municipal supply continued to be very strong in California during 2002, with \$50 billion of new bonds, an increase of 50% over 2001. Issuance in the first two months of 2003 totaled \$11.5 billion, up 136% over January-February 2002. This dramatic increase in supply has largely been driven by shortfalls in the state budget, and the low level of interest rates. In November 2002, the state completed the issuance of nearly \$12 billion in electric power bonds. The proceeds from this issue were used to repay the \$6.3 billion loan from California's general fund that financed purchases for the state's investor-owned utilities during the power crisis in 2001.

While the proceeds from the power bonds helped to mitigate an eroding credit outlook, California still faces significant budget problems, due chiefly to increased expenditures and revenue shortfalls resulting from income tax collections that fell below projections. In December 2002, Governor Gray Davis announced a projected budget deficit for the combined fiscal years 2003-2004 of \$35 billion, the highest in the nation. This announcement prompted both Standard & Poor's and Fitch to downgrade the state's credit rating to A/A from A+/AA, respectively. In February 2003, as

2

it became apparent that progress toward closing the budget gap was moving very slowly, Moody's also downgraded the state to A2 from A1.

Job growth in the state during 2002 was negligible, with gains posted by the government and wholesale/retail trade sectors largely offset by losses in manufacturing and business services. Although the state economy continues to benefit from diversity, we think a solid recovery in California remains largely dependent on increases in business spending as well as on a strong global recovery, since exports - mainly to Asia, Canada, and Mexico - represent 12% of the state's economy. Aided by a generally solid residential real estate market, the economy of southern California continued to be relatively stable compared with that of the northern half of the state, where the downturn in technology continued to restrain economic growth.

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

At the present time, California appears to be at a low point in the credit cycle, with the pace of economic improvement to be determined by the pace of progress in addressing state budget issues. We believe that the current determination to address the deficit seems to be greater than in the past, but it may take two to three years for the governor and legislature to find a resolution for the imbalance between California's revenues and expenditures.

HOW DID THESE FUNDS PERFORM OVER THE TWELVE MONTHS ENDED FEBRUARY 28, 2003?

Individual results for the Funds, as well as for appropriate benchmarks, are presented in the accompanying table.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended February 28, 2003, four of the six Funds in this report outperformed the unleveraged, unmanaged Lehman Brothers California Tax-Free Bond Index and the Lipper peer group average. Much of the outperformance relative to the Lehman Index is attributable to the fact that these Nuveen Funds had relatively long durations,⁴ which helped them perform well in the generally declining interest rate environment that characterized much of the twelve-month period.

Two of the Funds did not perform as well. The total return of NCA over the twelve-month period was affected by its relatively short duration, which was 7.59 as of February 28, 2003. By comparison, the duration of the Lehman Index was 8.57 as of the same date. Just as relatively long durations can be beneficial during falling interest rate environments, a Fund with a shorter duration may not perform as well as longer duration Funds under those market conditions. The Fund underperformed relative to its Lipper peer group primarily because, unlike most of the Lipper peer group, it is unleveraged. Leveraging is a process that can provide additional income for a Fund's common shareholders and help a Fund's net asset value appreciate when short-term rates are falling - as they were during much of the twelve-month

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers California Tax-Exempt Bond Index, an unleveraged index comprising a broad range of investment-grade California municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen California Funds are compared with the average annualized return of the 25 funds in the Lipper California Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a combined federal and state income tax rate of 36.5%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. With the exception of NCA, which is unleveraged, references to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

3

period. Conversely, leveraging will increase a Fund's net asset value volatility if short-term interest rates rise.

The performance of NUC was impacted by the poor performance of several holdings within its portfolio. For example, the Fund held \$6.2 million (par value) of bonds backed by United Air Lines that were issued to support a cargo facility at Los Angeles International Airport. Over the past year, the market value of most airline-backed bonds fell, due in part to a decline in passenger volume and in part to the market's expectation of a bankruptcy filing by United, which took place in December 2002. NUC's holding depreciated 70% over the twelve-month period, costing the Fund approximately 45 basis points in total return performance.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

NCA's portfolio and income stream remained strong over the reporting period. As of February 28, 2003, this Fund had provided shareholders with 56 consecutive months of steady or increasing dividends.

As short-term interest rates remained at historically low levels, the dividend-paying capabilities of the other five Funds in this report benefited from their use of leverage. As already noted, leverage is a strategy that can enhance the dividends paid to common shareholders. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends. During the twelve months ended February 28, 2003, the short-term interest rate environment enabled us to implement two dividend increases in both NVC and NUC. NCP, NCO, and NQC all continued to pay steady, attractive monthly dividends, marking 26 consecutive months of stable dividends

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

for NCP and NCO and 38 months for NQC.

Over the course of the twelve-month period, the share prices of all six Funds were affected by a general weakening of bond prices during the fourth quarter of 2002, although we saw some recovery by February 2003. Overall, however, the share price of each of these Funds finished February 2003 below the level of a year earlier and all six Funds were trading at discounts to their net asset values as of February 28, 2003.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE PERIOD ENDED FEBRUARY 28, 2003?

Over this reporting period, our strategic focus for all of the Funds continued to be on diversifying the portfolios, enhancing call protection, and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Given the recent steepness of the municipal yield curve, we concentrated on finding value in the long-intermediate part of the curve (i.e., bonds that mature about 15 to 20 years from now). In many cases, bonds in this part of the curve were offering yields similar to those of longer bonds but, in our opinion, had less inherent interest rate risk. The purchase of these long-intermediate bonds helped to moderate the durations of most of the Funds, making their portfolios less sensitive to interest rate changes while still allowing them to provide competitive yields and returns. In both NCA and NUC, which already had relatively short durations, the addition of bonds from the 15- to 20-year part of the yield curve led to a modest lengthening of their durations.

Given the slow economic growth over the reporting period, we also were taking into consideration scenarios in which interest rates could stay relatively low for a number of months. We believe

4

that structuring the portfolios with bonds offering maturities of 15 to 20 years helps to prepare the Funds for this eventuality as well.

We sold out of a number of positions in California GOs in March 2001, with the exception of some shorter-maturity bonds that we believed were not at risk. Recently, however, we have begun to rebuild small positions in these bonds in several of the Funds because we believe these bonds represent an opportunity to add attractive yields at favorable prices.

Over the past year, the heavy issuance in the California market provided us with increased opportunities to negotiate and obtain the types of bond structures that we favor, especially as we worked to reduce the Funds' durations against the risk of rising inflation or interest rates. We also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. From a sector perspective, our portfolios continued to hold positions in healthcare bonds, which were the top performing group among the Lehman revenue sectors for the twelve months ended February 28, 2003. We believe that credit spreads in this sector have been wider than warranted, representing an opportunity to purchase bonds that can support and potentially enhance the Funds' yields. We also maintained positions in public power bonds, especially those issued by municipal entities with their own power plants and distribution systems. Such entities have actually benefited from the increased cost of energy, which we believe could continue to rise through 2003, and these bonds have performed relatively well. Based on a general improvement in the credit quality of corporate bonds, the Funds also continue to hold some

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

industrial development sector securities.

In the prevalent geopolitical and economic climate, we believed that maintaining strong credit quality remained a vital requirement. As of February 28, 2003, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 50% to 82%. In general, our weightings in higher quality and insured bonds benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE NUVEEN CALIFORNIA FUNDS IN PARTICULAR?

Our outlook for these markets remains generally positive. We continue to believe the U.S. economy is slowly heading for an eventual recovery, but one that may be less robust than some originally anticipated. Inflation and interest rates should remain relatively low over the near term, although inflation could be temporarily impacted by war-induced increases in oil prices.

In the municipal market, we think new issuance volume nationally will remain strong as issuers continue to take advantage of the low rate environment. Given California's current budget deficit and the state's continued need for spending on infrastructure and education, we expect to see significant issuance of new municipal debt in the state. Over coming months, we will continue to closely monitor the budgetary situation in California to assess the potential effect of the balancing process on the state's cities, counties, and agencies and to watch for any further impact on the state's credit rating.

5

Over the next two years, we also will keep a close eye on call exposure. As of February 28, 2003, the percentage of bonds eligible for calls during 2003 and 2004 ranged from 12% in NCA, NQC and NVC to 14% in NCO and 21% in NUC and NCP. NUC, which marked its tenth anniversary in November 2001, continues to work its way through the increased call exposure typically associated with reaching this point in a Fund's lifecycle. Introduced in 1989, NCP underwent a period of significant calls during the rising interest rate environment of 1998-1999, at which time we found the greatest value in discounted bonds with short call dates. Now that interest rates have declined dramatically, these bonds are at a premium. While such bonds are now increasingly priced to their call dates, we think it is unlikely that they will actually be called from NCP's portfolio because in most cases the bonds' relatively low coupon rates would not make it economical for issuers to do so. The number of actual calls in each of these Funds will depend largely on market interest rates over this time, and continued strong supply in the California market should help us enhance the call positions of these Funds during this period.

In coming months, we will be closely watching several areas of the market, including progress toward resolution of the California budget deficit, the credit environment in the state, and the direction of interest rates and inflation. We expect the state budget issue to be resolved very slowly, and we think in the long run this represents an opportunity to add uninsured California GOs to our portfolios. Because we believe the credit environment could continue to be difficult, credit will remain a primary focus in selecting specific issues, with a continued move toward higher quality securities. In our opinion, the most significant risk to fixed income investments could be a rise in inflation or interest rates, and we will continue to moderate the Funds' durations through the purchase of suitable bonds in the long-intermediate part of the yield curve. In general, we plan to remain focused on strategies that can

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

add value for our shareholders and provide support for the Funds' long-term dividend-payment capabilities.

On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc. filed for federal bankruptcy protection. In December 2002, the Adviser determined that it was likely United would not remain current on its interest payment obligations with respect to these bonds and thus stopped accruing interest. At the same time, accrued interest dating back to October 1, 2002 was written off. On April 1, 2003, UAL failed to meet its interest payment obligation.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The California Funds (the "Funds") covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen California Municipal Value Fund, Inc. (NCA), Nuveen California Performance Plus Municipal Fund, Inc. (NCP), Nuveen California Municipal Market Opportunity Fund, Inc. (NCO), Nuveen California Investment Quality Municipal Fund, Inc. (NQC), Nuveen California Select Quality Municipal Fund, Inc. (NVC) and Nuveen California Quality Income Municipal Fund, Inc. (NUC).

Each Fund seeks to provide current income exempt from both regular federal and California state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within the state of California. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors of the Funds or its designee may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At February 28, 2003, California Value (NCA), California Performance Plus (NCP), California Opportunity (NCO) and California Quality Income (NUC) had outstanding when-issued purchase commitments of \$4,066,316, \$6,130,680, \$4,087,120 and \$7,152,460, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and California state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common Shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

California Value (NCA) is not authorized to issue Preferred shares. The Funds below have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in more than one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	CALIFORNIA PERFORMANCE PLUS (NCP)	CALIFORNIA OPPORTUNITY (NCO)	CALIFORNIA INVESTMENT QUALITY (NQC)	CALIFORNIA SELECT QUALITY (NVC)	CA

=====					

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended February 28, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At February 28, 2003, the cost of investments were as follows:

	CALIFORNIA VALUE (NCA)	CALIFORNIA PERFORMANCE PLUS (NCP)	CALIFORNIA OPPORTUNITY (NCO)	CALIFORNIA INVESTMENT QUALITY (NQC)	CALIFORNIA SELECTION QUALITY (NVC)
Cost of investments	\$232,954,375	\$280,886,959	\$178,988,662	\$300,304,279	\$506,216,1

Gross unrealized appreciation and gross unrealized depreciation on investments at February 28, 2003, were as follows:

	CALIFORNIA VALUE (NCA)	CALIFORNIA PERFORMANCE PLUS (NCP)	CALIFORNIA OPPORTUNITY (NCO)	CALIFORNIA INVESTMENT QUALITY (NQC)	CALIFORNIA SELECTION QUALITY (NVC)
Gross unrealized:					
Appreciation	\$21,389,036	\$24,901,263	\$16,924,130	\$22,691,704	\$36,736,0

Distributions from net long-term capital gains	--	1,560,412	862,522	353,541	4,672,900

* Ordinary income consists of taxable market discount income and net short-term capital gains, if any.

The following Funds have elected to defer net realized losses from investments incurred from November 1, 2001 through August 31, 2002 ("post-October losses") in accordance with Federal income tax regulations. The following post-October losses are treated as having arisen in the following year:

	CALIFORNIA PERFORMANCE PLUS (NCP)	CALIFORNIA OPPORTUNITY (NCO)
	\$1,264,054	\$926,607

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-30D

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Funds' (excluding California Value (NCA)) investment management agreements with Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES)	MANAGEMENT FEE
For the first \$125 million	.6500%
For the next \$125 million	.6375
For the next \$250 million	.6250
For the next \$500 million	.6125
For the next \$1 billion	.6000
For the next \$3 billion	.5875
For net assets over \$5 billion	.5750

Under California Value's (NCA) investment management agreement with the Adviser, the Fund pays an annual management fee, payable monthly of .35 of 1% of the average daily net assets of the Fund, as well as 4.125% of the gross interest income of the Fund.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser.

6. SUBSEQUENT EVENT - DISTRIBUTIONS TO COMMON SHAREHOLDERS

The Funds declared Common share dividend distributions from their tax-exempt net investment income which were paid on April 1, 2003, to shareholders of record on March 15, 2003, as follows:

	CALIFORNIA VALUE (NCA)	CALIFORNIA PERFORMANCE PLUS (NCP)	CALIFORNIA OPPORTUNITY (NCO)	CALIFORNIA INVESTMENT QUALITY (NQC)	CALIFORNIA SELECTED QUALITY (N)

NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account

shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Directors without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six-month period ended February 28, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
