FORWARD-LOOKING STATEMENTS

This Form 10-K, chiefly in Items 1, 1A, 3, 5, 7 and 8, contains certain forward-looking statements that are subject to numerous assumptions, risks or uncertainties. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. Some of the forward-looking statements can be identified by the use of forward-looking words such as "anticipates", "believes", "expects", "estimates", "intends", "plans", "seeks", "could", "may", "should", "will", or the negative version of those words or other comparable terminology. Such forward-looking statements relate to: expectations concerning market and other conditions and their effect on future premiums, revenues, earning and investment activities; recoverability of asset values; mortality and the adequacy of reserves for environmental pollution.

Actual results could differ materially from those contained in or implied by such forward-looking statements for a variety of factors including:

- changes in economic conditions, including interest rates, performance and volatility of securities markets, and the availability of capital;
- trends in persistency, mortality and morbidity;
- regulatory actions;
- changes in regulatory and legal environments;
- tax law changes;
- changes in laws governing retirement savings vehicles;

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

- cost of environmental clean-up at former manufacturing sites operated by the Company's predecessor;
- availability of reinsurance and ability of reinsurers to pay their obligations;
- results of acquisitions;
- competitive pressures; and
- changes in debt and claims paying ratings.

Forward-looking statements included in this Form 10-K are made only as of the date of this report and under Section 27A of The Securities Act and Section 21E of the Exchange Act; we do not have any obligation to update any forward-looking statement to reflect subsequent events or circumstances.

PART I

ITEM 1

Business

Please refer to "Forward-Looking Statements" following the index in front of this Form 10-K.

Acquisition Proposal

Great American Financial Resources, Inc. ("GAFRI" or "the Company"), which was incorporated as a Delaware corporation in 1987, is an 81%-owned subsidiary of American Financial Group, Inc. ("AFG"). On February 22, 2007, AFG proposed a merger transaction that would increase its ownership of GAFRI to 100%. GAFRI's Board of Directors has formed a special committee to consider the proposal. For additional information on the proposal, see Note Q to the Financial Statements.

Introduction

GAFRI is a holding company that markets retirement products, primarily fixed, indexed and variable annuities, and various forms of supplemental insurance through its subsidiaries listed below. GAFRI and its insurance subsidiaries employed approximately 1,000 people (primarily in Cincinnati, Ohio, Austin, Texas and Mission, Kansas) as of February 1, 2007. SEC filings, news releases, GAFRI's Code of Ethics applicable to directors, officers and employees and other information may be accessed free of charge through GAFRI's Internet site at: www.gafri.com. Information on GAFRI's Internet site is not part of this Form 10-K.

GAFRI's primary insurance subsidiaries include Great American Life Insurance Company ("GALIC"), Annuity Investors Life Insurance Company ("AILIC"), Loyal American Life Insurance Company, United Teacher Associates Insurance Company ("UTA"), Continental General Insurance Company ("CGIC") and Central Reserve Life Insurance Company ("CRLIC"). All of these companies sell their products through independent producers; CGIC and CRLIC also have a captive agency force comprised of approximately 300 agents.

Following is certain information concerning these subsidiaries (dollars in millions).

<u>Company</u>	<u>Year Acquired</u>	<u>AM Best Rating</u>	<u>Headquarters</u>	<u>GAAP</u>		<u>Statutory</u>		<u>Policies in Force</u>	<u>Principal Products</u>

1

Acquisition of Subsidiaries

In August 2006, GAFRI acquired all of the outstanding shares of Ceres Group, Inc. for approximately \$204 million. See Note D to the Financial Statements. In connection with this acquisition, Ceres' insurance subsidiaries (i) exited the major medical insurance business by reinsuring all of its in-force medical business to an unaffiliated insurance company and (ii) reinsured 50% of the reserves of its in-force Medicare supplement and other supplementary health business to an unaffiliated reinsurer. GAFRI expects the retained Ceres business to generate about \$150 million in statutory premiums in 2007. Following the acquisition, Ceres distributed \$60 million to GAFRI. GAFRI expects that Ceres' insurance subsidiaries will have the capability to potentially pay up to \$50 million of additional dividends in 2007, subject to regulatory approval. The Company believes that the ultimate impact of these transactions will be to reduce GAFRI's investment in Ceres to approximately \$100 million.

In January 2006, GAFRI acquired the fixed annuity business written by Old Standard Life Insurance Company through a reinsurance transaction. As part of the transaction, GAFRI also acquired the stock of Old West Annuity and

Life Insurance Company. In total, the transaction resulted in an increase of approximately \$280 million in both annuity benefits accumulated and cash and investments.

Sale of Subsidiary

In January 2006, GAFRI sold its subsidiary, Great American Life Assurance Company of Puerto Rico ("GA-PR"). See "Discontinued Puerto Rican Insurance Operations". The tables above exclude information on GA-PR.

Annuities

GAFRI's principal annuity products are Flexible Premium Deferred Annuities ("FPDAs") and Single Premium Deferred Annuities ("SPDAs"). Annuities are long-term retirement savings instruments that benefit from income accruing on a tax-deferred basis. The issuer of the annuity collects premiums, credits interest or earnings on the policy and pays out a benefit upon death, surrender or annuitization. FPDAs are characterized by premium payments that are flexible in both amount and timing as determined by the policyholder and generally made through payroll deductions. SPDAs are generally issued in exchange for a one-time lump-sum premium payment.

Annuity contracts are generally classified as either fixed rate (including indexed) or variable. With a traditional fixed rate annuity, the Company seeks to maintain a desired

spread between the yield on its investment portfolio and the rate it credits. GAFRI accomplishes this by: (i) offering crediting rates that it has the option to change after any initial guarantee period (subject to minimum interest rate guarantees); (ii) designing annuity products that encourage persistency and (iii) maintaining an appropriate matching of assets and liabilities.

During 2006 GAFRI sold nearly \$700 million in indexed-annuities, almost nine times the amount sold in 2005. This growth reflects the success of new products introduced in mid-2005 and agent recruitment. An indexed-annuity provides policyholders with a crediting rate tied, in part, to performance of an existing market index ("index credit"), while protecting against the related downside risk through a guarantee of principal (excluding surrender charges). Policyholders generally receive index credits on their policy anniversary based on the performance of a market index, generally the S&P 500. Index credits vary by the strategy selected by the policyholder, and may be changed on their anniversary. GAFRI offers many index strategies, including (i) "participation rates" whereby the index credits are based upon a percentage of the annual appreciation in the market index, (ii) "caps" whereby the index credit is based upon appreciation in the market index limited to a maximum percentage, (iii) "asset fees" whereby the index credit is based upon the annual appreciation of the market index, less a stated percentage of the indexed amount. These may be adjusted on policy anniversaries as market conditions change. GAFRI purchases call options to provide for index credits that would be payable to policyholders on their next anniversary. The amount paid for these options depends on the participation rates, caps, asset fees, the level of current interest rates, market volatility, and targeted spreads.

In addition to traditional fixed rate annuities and indexed-annuities, GAFRI offers variable annuities. With a variable annuity, the earnings credited to the policy vary based on the investment results of the underlying investment options chosen by the policyholder, generally without any guarantee of principal except in the case of death of the insured. Premiums directed to the underlying investment options maintained in separate accounts are invested in funds managed by various independent investment managers. GAFRI earns a fee on amounts deposited into separate accounts. Subject to contractual provisions, policyholders may also choose to direct all or a portion of their premiums to various fixed rate options, in which case GAFRI earns a spread on amounts deposited.

2

The majority of GAFRI's flexible premium deferred annuities are sold in the qualified markets under sections 403(b), 457 and 401(k) of the Internal Revenue Code. In the 403(b) and 457 markets, schools, government agencies and

certain other not-for-profit organizations may allow employees to save for retirement through contributions made on a before-tax basis. GAFRI's 403(b) operations sell annuities primarily to teachers in the kindergarten through twelfth grade (K-12) market. In the 401(k) market, both for-profit and not-for-profit organizations may establish qualified retirement plans where employees are eligible to save for retirement through contributions made primarily on a before-tax basis. For federal income tax purposes, before-tax contributions and earnings are not included in the employee's taxable income until amounts are withdrawn.

GAFRI sells its fixed rate annuities primarily through a network of 200 managing general agents ("MGAs") who, in turn, direct approximately 2,800 actively producing independent agents. The top 15 MGAs accounted for approximately one-half of GAFRI's fixed rate annuity premiums in 2006. No one MGA represented more than 10% of total fixed annuity premiums in 2006.

In recent years, the Company has offered its variable annuity as an ancillary product solely through its 403(b) and 401(k) sales channels. Nearly one-half of GAFRI's variable annuity sales in 2006 were made through the Company's wholly-owned subsidiary, Great American Advisors, Inc. ("GAA"). GAA is a broker/dealer licensed in all 50 states to sell stocks, bonds, options, mutual funds and variable insurance contracts through independent representatives and financial institutions. GAA also acts as the principal underwriter and distributor for the Company's variable annuity products.

GAFRI is licensed to sell its fixed annuity products in all 50 states; it is licensed to sell its variable products in all states except New York and Vermont. In 2006, no individual state accounted for more than 10% of GAFRI's annuity premiums other than California (14%) and Washington (13%). At December 31, 2006, GAFRI had approximately 385,000 annuity policies in force.

For additional information on GAFRI's annuity operations, see Items 7 and 7A and Note E to the Financial Statements.

Supplemental Insurance

UTA offers a variety of supplemental insurance products and annuities through independent agents. UTA's principal health products include coverage for Medicare supplement, cancer and long-term care. UTA utilizes endorsements from various state retired teachers associations to sell some of its products.

Loyal American Life Insurance Company offers a variety of supplemental health and life products. The principal products sold by Loyal include cancer, accidental injury, short-term disability and hospital indemnity. Together, UTA and Loyal employ approximately 240 people in Austin.

CGIC and CRLIC offer Medicare supplement and other supplemental insurance products for individuals age 55 and over through independent agents and a captive agency force. These companies employ approximately 130 people primarily in Mission.

For additional information on GAFRI's Supplemental Insurance Operations, see Item 7 and Note E to the Financial Statements.

Life Operations

Although GAFRI's life operations no longer issue new life insurance policies, it continues to service and accept renewal premiums on its in-force block of approximately 180,000 policies and \$30 billion gross (\$9 billion net) of life insurance in force.

Discontinued Puerto Rican Insurance Operations

In January 2006, GAFRI completed the sale of its subsidiary GA-PR for approximately \$37.5 million in cash. During 2005, GAFRI received dividends from GA-PR totaling \$100 million. GAFRI acquired GA-PR in 1997 for approximately \$50 million. There was no material after-tax gain or loss on the sale. For additional information on GA-PR, see Note C to the Financial Statements.

3

Former Manufacturing Operations

The Company's balance sheet includes a liability of approximately \$13.4 million at December 31, 2006 for the estimated future costs of environmental clean-up activities at certain sites from the Company's former manufacturing operations as well as third-party sites. See Note M to the Financial Statements.

Investments

Investments comprise almost 85% of the Company's assets (excluding variable annuity separate account assets) and are the principal source of income. See Items 7 and 7A and Note F to the Financial Statements for more information on the Company's investment portfolio.

Competition

The Company's principal insurance subsidiaries ("Insurance Companies") operate in highly competitive markets. They compete with other insurers and financial institutions based on many factors, including: (i) ratings; (ii) financial strength; (iii) reputation; (iv) service to policyholders and agents; (v) product design (including interest rates credited, index participation and premium rates charged); (vi) commissions; and (vii) number of school districts in which a company has approval to sell. Since most policies are marketed and distributed through independent agents, the Insurance Companies must also compete for agents.

No single insurer dominates the markets in which the Insurance Companies compete. Competitors include: (i) individual insurers and insurance groups; (ii) mutual funds; and (iii) other financial institutions. In a broader sense, GAFRI's Insurance Companies compete for retirement savings with a variety of financial institutions offering a full range of financial services. Financial institutions have demonstrated a growing interest in marketing investment and savings products other than traditional deposit accounts.

Sales of annuities, including renewal premiums, are affected by many factors, including: (i) competitive annuity products and rates; (ii) the general level and volatility of interest rates, and the shape of the yield curve; (iii) the favorable tax treatment of annuities; (iv) commissions paid to agents; (v) services offered; (vi) ratings from independent insurance rating agencies; (vii) other alternative investments; (viii) performance and volatility of the equity markets; (ix) media coverage of annuities; (x) regulatory developments regarding suitability and the sales process; and (xi) general economic conditions.

Regulation

The Insurance Companies are subject to comprehensive regulation under the insurance laws of their states of domicile and the other states in which they operate. These laws, in general, require approval of the particular insurance regulators prior to certain actions such as the payment of dividends in excess of statutory limitations, (see Note N to the Financial Statements), continuing service arrangements with affiliates and certain other transactions. Regulation and supervision are administered by a state insurance commissioner who has broad statutory powers with respect to granting and revoking licenses, approving forms of insurance contracts and determining types and amounts of business that may be conducted in light of the financial strength and size of the particular company.

State insurance departments periodically examine the business and accounts of the Insurance Companies and require such companies to submit detailed annual financial statements prepared in accordance with statutory requirements. State insurance laws also regulate the character of each insurance company's investments, reinsurance and security deposits.

Many of the Company's other subsidiaries are subject to regulation by various state, federal and other regulatory authorities. Insurance agency subsidiaries are regulated by state insurance departments. GAA is subject to the rules of the Securities and Exchange Commission, the National Association of Securities Dealers, Inc. and the securities laws of the states in which it transacts business. AILIC's variable separate accounts and variable annuity products are subject to the rules and regulations of the Securities and Exchange Commission. In addition, AILIC's variable annuity products are subject to the "Blue Sky" laws of the states in which its products are sold.

The regulatory framework under which the Insurance Companies operate continues to evolve. One of the National Association of Insurance Commissioner's ("NAIC") major roles is to develop model laws and regulations affecting insurance company operations and encourage uniform regulation through the adoption of such model laws in all states. As part of the overall insurance regulatory process, the NAIC forms numerous task forces to review, analyze

4

and recommend changes to a variety of areas affecting both the operating and financial aspects of insurance companies.

Uncertainties

GAFRI's businesses are subject to various uncertainties, including regulatory, legislative, environmental, and tax law developments. While it is not possible to predict what changes will come in these areas, some could possibly have a material impact on GAFRI and its businesses. See "Item 1A" below and "Item 7 - Uncertainties."

ITEM 1A

Risk Factors

Following is a discussion of the most significant risk factors to investors in GAFRI securities. Several of these factors will be impacted if AFG's proposed merger transaction with GAFRI is completed. See Note Q to the Financial Statements for further discussion.

Intense competition could adversely affect GAFRI's profitability

. GAFRI's Insurance Companies compete with individual insurers and insurance groups, mutual funds and other financial institutions. Some of GAFRI's competitors have more capital and greater resources than GAFRI, and may offer a broader range of products and lower prices than GAFRI offers. If competition limits GAFRI's ability to write new or renewal business at adequate rates, its results of operations could be adversely affected.

GAFRI's premiums could be negatively affected if it is not able to attract and retain independent agents.

GAFRI's reliance on the independent agency market makes it vulnerable to a reduction in the amount of business written by agents. Many of GAFRI's competitors also rely significantly on the independent agency market. Accordingly, GAFRI must compete with other insurance carriers for independent agents' business. Some

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

of its competitors offer a wider variety of products, lower price for insurance coverage or higher commissions. Loss of a substantial portion of the business that GAFRI writes through independent agents could adversely affect GAFRI's premiums and profitability.

GAFRI is subject to comprehensive regulation and its ability to earn profits may be restricted by these regulations.

GAFRI is subject to comprehensive regulation by government agencies in the states where its insurance company subsidiaries are domiciled and where these subsidiaries issue policies and handle claims. GAFRI must obtain prior approval for certain corporate actions. The regulations may limit GAFRI's ability to obtain rate increases or to take other actions designed to increase GAFRI's profitability.

GAFRI makes no assurance that existing insurance-related laws and regulations will not become more restrictive in the future or that new restrictive laws will not be enacted. GAFRI, therefore, cannot predict the potential effects of these laws and regulations. The costs of compliance or the failure to comply with existing or future regulations could harm GAFRI's financial results and its reputation with customers. See "Item 1 - Regulation" and "Item 7 - Uncertainties" for further discussion.

As a holding company, GAFRI is dependent on the results of operations of its insurance company subsidiaries to meet its obligations and pay future dividends.

GAFRI is a holding company and a legal entity separate and distinct from its insurance company subsidiaries. As a holding company without significant operations of its own, GAFRI's principal sources of funds are dividends and other distributions from its insurance company subsidiaries. As discussed in "Item 1-Regulation", state insurance laws limit the ability of insurance companies to pay dividends or other distributions and require insurance companies to maintain specified levels of statutory capital and surplus. GAFRI's rights to participate in any distribution of assets of its insurance company subsidiaries are subject to prior claims of policyholders and creditors (except to the extent that its rights, if any, as a creditor are recognized). Consequently, GAFRI's ability to pay debts, expenses and cash dividends to its shareholders may be limited.

GAFRI's failure to maintain a commercially acceptable insurance financial strength rating could negatively affect its ability to compete successfully.

As discussed under "Management's Discussion and Analysis - Independent Ratings," financial strength ratings are an important factor in establishing the competitive position of insurance companies and may be expected to have an effect on an insurance company's sales. A downgrade in GAFRI's insurers' claims-paying and financial strength ratings could significantly reduce GAFRI's business volumes, adversely impact GAFRI's ability to access the capital markets and increase GAFRI's borrowing costs.

5

Variations from the actuarial assumptions used to establish certain assets and liabilities in GAFRI's annuity and supplemental insurance business could negatively impact GAFRI's financial results.

The earnings on certain products sold by GAFRI's annuity, supplemental insurance and run-off life businesses depend significantly upon the extent to which actual experience is consistent with the assumptions used in setting reserves and establishing and amortizing deferred policy acquisition costs ("DPAC"). These assumptions relate to investment yields (and spreads over fixed annuity crediting rates), mortality, surrenders, annuitizations and, on some policies, morbidity. Developing such assumptions is complex and involves information obtained from company-specific and industry-wide data, as well as general economic information. These assumptions, and therefore GAFRI's results of operations, could be negatively impacted by changes in any of the factors listed above.

Adverse securities market conditions can have significant negative effects on GAFRI's investment portfolio.

GAFRI's results of operations depend in part on the performance of its invested assets. As of December 31, 2006, 88% of GAFRI's investment portfolio was invested in fixed maturity securities and 2% in equity securities. Certain risks are inherent in connection with fixed maturity securities including loss upon default and price volatility in reaction to changes in interest rates and general market factors. See Item

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

7A, "Quantitative and Qualitative Disclosures about Market Risk - Fixed Maturity Portfolio."

GAFRI cannot predict whether and the extent to which industry sectors in which it maintains investments may suffer losses as a result of potential decreased commercial and economic activity, or how any such decrease might impact the stock price of companies within the affected industry sectors or their ability to pay interest or principal on their securities, or how the value of any underlying collateral might be affected.

Investment returns are an important part of GAFRI's overall profitability. Accordingly, adverse fluctuations in the fixed income or equity markets could adversely impact GAFRI's profitability, financial condition or cash flows.

Certain stockholders exercise substantial control over GAFRI's affairs.

As of December 31, 2006, AFG owned approximately 81% of GAFRI's outstanding common stock. As a result, AFG has the ability to exercise substantial control over the election of GAFRI's board of directors and significantly influences GAFRI's corporate actions.

The price of GAFRI common stock may fluctuate significantly, which may make it difficult for holders to resell common stock when they want or at a price they find attractive.

The price of GAFRI's common stock as listed on the New York Stock Exchange ("NYSE") constantly changes. Since January 1, 2005, GAFRI's common stock has traded at prices ranging between \$14.79 and \$24.35. It is expected that the market price of GAFRI's common stock will continue to fluctuate. GAFRI's common stock price can fluctuate as a result of a variety of factors, many of which are beyond its control. These factors include:

- lack of significant public "float";
- actual or anticipated variations in quarterly operating results;
- ratings agency actions;
- recommendations by securities analysts;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving GAFRI or its competitors;
- operating and stock price performance of other companies that investors deem comparable to GAFRI;
- news reports relating to trends, concerns and other issues in GAFRI's lines of business;
- material regulatory changes; and
- actual or anticipated changes in the dividends paid on GAFRI common stock.

General market fluctuations, industry factors and general economic and political conditions and events, economic slowdowns or recessions, interest rate changes, or credit loss trends, could also cause GAFRI's stock price to decrease regardless of its operating results.

The stock market in general has experienced in the past, and may experience in the future, extreme volatility that has often been unrelated to the operating performance of a particular company. These broad market fluctuations may adversely affect the market price of GAFRI's common stock.

GAFRI is subject to proposed tax law changes.

Recent federal budget proposals have contained several measures related to retirement and savings accounts. In addition, the Department of the Treasury has proposed certain changes to the regulations governing 403(b) annuities. There are also a number of proposals being explored for reform of the federal income tax system.

6

GAFRI cannot predict the long-term likelihood or final form of any tax reform legislation or the impact on the Company and its business. See "Item 7 - Uncertainties" for further discussion.

GAFRI is subject to proposed state and local regulatory changes.

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Various competitors, schools and other entities have proposed measures that would restrict product designs and the number of companies qualified to sell annuities to teachers. Widespread acceptance of these measures could negatively impact GAFRI's 403(b) annuity operations. See "Item 7 - Uncertainties" for further discussion.

ITEM 2

Properties

GAFRI and GALIC rent office space in Cincinnati, Ohio totaling approximately 145,000 square feet under leases expiring in 2011. Several of the Company's subsidiaries lease marketing and administrative offices in locations throughout the United States.

GAFRI owns a building in Austin, Texas totaling approximately 40,000 square feet which is used by UTA for its own operations.

Ceres leases approximately 122,000 square feet in Cleveland, Ohio under a lease that expires in 2016. As a result of the consolidation of operations and the sale of the major medical insurance operation, this space will be largely vacant beginning in the first quarter of 2007. The Company is actively seeking to sublease the space.

GAFRI owns a building in Mission, Kansas totaling 45,000 square feet that is used by Continental General and Central Reserve Life for their operations. GAFRI owns a building in Omaha, Nebraska totaling approximately 61,400 square feet. GAFRI expects to complete the sale of that building in March 2007.

Management believes that its corporate offices are generally well maintained and adequate for the Company's present needs. However, significant growth or consolidation of operations could result in additional office space requirements.

GAFRI owns facilities related to its former manufacturing operations totaling approximately 150,000 square feet in North Adams, Massachusetts and 60,000 square feet in Longwood, Florida. The facility located in North Adams, Massachusetts is vacant and expected to be demolished later this year. The Longwood, Florida facility is currently being leased to companies using it for manufacturing operations.

GAFRI also owns and operates certain real estate investments, comprised primarily of hotels and marinas. See Note F to the Financial Statements.

ITEM 3

Please refer to "Forward-Looking Statements" following the index in front of this Form 10-K.

Legal Proceedings

Federal and state laws and regulations, including the Federal Comprehensive Environmental Response, Compensation, and Liability Act and similar state laws, impose liability on the Company, as the successor to Sprague Technologies, Inc., for the investigation and clean-up of hazardous substances disposed of or spilled by its former manufacturing operations at facilities still owned by the Company, and facilities transferred in connection with the sales of certain operations, as well as at disposal sites operated by third parties. In addition, the Company has indemnified the purchasers of its former operations for the cost of such activities. For additional information, see Item 7 - "Critical Accounting Policies" and Note M to the Financial Statements.

GAFRI is subject to other litigation and arbitration in the normal course of business. GAFRI is not a party to any material pending litigation or arbitration.

7

PART II

Please refer to "Forward-Looking Statements" following the index in front of this Form 10-K.

ITEM 5

Market for Registrant's Common Equity,

Related Stockholder Matters and Issuer Purchases of Equity Securities

GAFRI's Common Stock is listed and traded principally on the NYSE under the symbol GFR. On February 1, 2007, there were approximately 4,200 holders of record of Common Stock. The following table sets forth the range of high and low sales prices for the Common Stock on the NYSE Composite Tape.

	<u>2006</u>		<u>2005</u>	
	<u>High</u>	<u>Low</u>	<u>High</u>	<u>Low</u>
First quarter	\$23.50	\$19.00	\$17.60	\$15.18
Second quarter	24.35	19.15	20.86	14.79
Third quarter	21.25	18.52	22.34	18.15
Fourth quarter	24.00	20.77	22.20	18.15

The Company paid annual common dividends of \$0.10 per share in 2006 and 2005. Although no future dividend policy has been determined, management believes the Company will continue to have the capability to pay similar dividend amounts.

PERFORMANCE GRAPH

The following graph compares the cumulative total stockholder return on our common stock with the cumulative total return of the Standard & Poor's ("S&P") 500 Stock Index and the S&P Insurance (Life/Health) Index (S&P Life). (Assumes \$100 invested on December 31, 2001 in our common stock and the two indexes, including reinvestment of dividends.)

8

Under GAFRI's stockholder-approved Stock Option Plan, 194,523 shares of GAFRI Common Stock were tendered in connection with the exercise of stock options for a total of 236,479 shares in the fourth quarter of 2006 (1,938 at an average market price of \$23.29 in October; 73,761 at an average market price of \$23.27 in November; and 118,824 at an average market price of \$23.65 in December).

At February 1, 2007, approximately 81% of GAFRI's Common Stock was beneficially owned by AFG. See Note Q to the Financial Statements for information regarding AFG's proposed merger transaction with GAFRI.

Equity Compensation Plan Information

The following reflects certain information about shares of GAFRI Common Stock authorized for issuance (at December 31, 2006) under equity compensation plans.

<u>Equity compensation plans</u>	Number of securities to be issued upon exercise of <u>outstanding options</u>	Weighted-average exercise price of <u>outstanding options</u>	Number of securities available for future issuance under equity compensation plans (excluding securities <u>reflected in column (a)</u>)
	(a)	(b)	(c)
Approved by shareholders	3,049,980	\$17.50	2,485,508 (1)
Not approved by shareholders	309,476	\$17.67	2,660,847 (2)

1. Includes options exercisable into 1.7 million shares available for issuance under GAFRI's Stock Option Plans for employees and directors, 0.8 million shares issuable under GAFRI's Employee Stock Purchase Plan and 43,869 shares issuable under GAFRI's Non-employee Directors' Compensation Plan.
2. Represents shares issuable under GAFRI's Deferred Compensation Plan (0.2 million shares), Agent Stock Purchase Plan (0.9 million shares), Agent Stock Option Plan (1.2 million shares) and GAFRI's Bonus Plan (0.4 million shares).

Under the GAFRI Deferred Compensation Plan, certain highly compensated employees of GAFRI and its subsidiaries may defer a portion of their annual salary and/or bonus. Participants may elect to have the value of deferrals (i) earn a fixed rate of interest set annually by the Board of Directors or a committee thereof, or (ii) fluctuate based on the market value of GAFRI Common Stock, as adjusted to reflect stock splits, distributions, dividends, and a 7-1/2% match to participant deferrals.

Under the Agent Stock Purchase Plan, selected agents are able to utilize commissions earned from the sale of insurance products issued by the Company's subsidiaries to purchase GAFRI Common Stock at 92.5% of the fair market value. The Plan provides that up to 1,000,000 shares of GAFRI Common Stock may be issued.

Under the Agent Stock Option Plan, selected agents are able to earn options to purchase GAFRI Common Stock based on production requirements. The options have an exercise price equal to the fair market value of GAFRI Common Stock at the time of grant. The options include vesting provisions based on quality of production. The Plan provides that up to 1,500,000 shares of GAFRI Common Stock may be issued upon the exercise of options.

Under GAFRI's Bonus Plan covering the majority of the Company's officers, participants may be required to receive 25% of their annual bonus in the form of GAFRI Common Stock. The Bonus Plan provides for the issuance of up to 500,000 shares of GAFRI Common Stock as partial payment of annual bonuses.

ITEM 6

Selected Financial Data

The following financial data has been summarized from, and should be read in conjunction with, the Company's Consolidated Financial Statements and "Management's Discussion and Analysis of Financial Condition and Results of Operations." GA-PR's results of operations and the results and gains on the sales of the Chatham Bars Inn (sold in June 2006) and the Driskill Hotel (sold in October 2005) are reflected as discontinued for all periods presented below. The data includes the acquisitions of the Ceres Group, Inc. in August 2006, Old West Annuity and Life Insurance Company in January 2006, the fixed annuity blocks of business written by Old Standard Life Insurance Company and National Health Insurance Company in January 2006 and May 2004, respectively, and Manhattan National Life Insurance Company in June 2002 (in millions, except per share amounts).

GENERAL

Following is a discussion and analysis of the financial statements and other statistical data that management believes will enhance the understanding of the financial condition and results of operations of Great American Financial Resources, Inc. ("GAFRI" or "the Company"). This discussion should be read in conjunction with the financial statements beginning on page F-1.

GAFRI and its subsidiary, AAG Holding Company, Inc., are organized as holding companies with nearly all of their operations being conducted by their subsidiaries. These companies, however, have continuing expenditures for administrative expenses, corporate services and for the payment of interest and principal on borrowings and stockholder dividends.

Through the operations of its insurance subsidiaries, GAFRI is engaged in the sale of retirement annuities and various forms of supplemental insurance products.

OVERVIEW**Financial Condition**

GAFRI has significantly strengthened its capital and liquidity over the last several years. Since December 31, 2002, stockholders' equity (excluding unrealized gains) grew by more than \$376 million (56%) to \$1.0 billion and its debt to capital ratio decreased from more than 36% to approximately 20%; in addition, the statutory adjusted capital of GAFRI's largest insurance subsidiary increased \$260 million (54%) to \$746 million.

Asset-Liability Management

Interest Rate Risk

To monitor interest rate risk, GAFRI devotes extensive effort to evaluating the potential impact of changes in interest rates on cash flows and duration of assets and liabilities. Activities include the projection of business in force under many different interest rate scenarios, including non-parallel shifts in interest rates, to examine the impact of changes in both the level of interest rates and the shape of the yield curve. At least quarterly, GAFRI determines the duration of its assets and liabilities to help manage differences. A smaller difference in the duration of assets and liabilities indicates less exposure to the risk of changes in interest rates.

At the same time, perfectly matched durations can often be overly risk-averse, resulting in less than optimal profits and added exposure to the risk of falling interest rates. The merit of a modest amount of mismatch depends on current market conditions. At December 31, 2006, the duration of GAFRI's assets and liabilities were 5.3 years and 5.4 years, respectively.

11

At December 31, 2006, the fair value of GAFRI's fixed maturity portfolio was approximately 0.2% higher than its book value. If interest rates were to immediately increase 50 basis points from levels at December 31, 2006, GAFRI estimates that the fair value of the Company's fixed maturity portfolio would be approximately 2.5% lower than its book value. Under this scenario, higher than expected surrenders would have very little impact on the liquidity, earnings or capital of GAFRI or its subsidiaries.

GAFRI seeks to earn a stable and appropriate spread between investment income and interest credited on its fixed annuity products. Adverse experience on investments may cause spreads to be reduced. Alternatively, if GAFRI seeks to maintain spreads, crediting rates may not be competitive in the marketplace, which could result in adverse policy surrender experience and the need to liquidate a portion of the investment portfolio at a loss, or use funds from new sales in order to fund cash surrender value benefits.

Provided interest rates continue to gradually return to levels that are more typical from a long-term perspective, GAFRI does not view the near-term risk relating to spreads over the next twelve months as being material. Management believes that the impact of the probable range of interest rate changes over the next twelve months will be mitigated by the Company's asset-liability management strategies, flexibility in adjusting policy crediting rate levels and protection afforded by policy surrender charges. The interest rate scenarios that could have a higher negative impact on earnings are those in which there is a substantial, relatively rapid increase or decrease in interest rates that is then sustained over a long period. Management does not believe these scenarios are likely.

Fixed Annuities

GAFRI's traditional fixed annuity reserves comprise approximately 70% of the Company's total insurance reserves. GAFRI may adjust renewal crediting rates on its deferred annuities monthly or quarterly, subject to guaranteed minimum interest rates ("GMIR") ranging from 1% to 4% and other contractual guarantees. The higher minimums apply to in-force blocks of older products that are no longer marketed. Many annuity insurance customers have the right to surrender their policies at account value less a surrender charge that grades to zero over periods that generally range from 5 to 10 years from policy issue date. In some cases, policyholders can only gain the benefit of a higher-tier accumulation rate upon death, or if they annuitize rather than surrender. In other cases, a market value adjustment may also apply. Due to GAFRI's ability to change crediting rates to reflect investment experience on the majority of its traditional annuity products, the underlying assets are assumed to be a good balance for the interest rate risk inherent in these liabilities. The Company believes this assumption is appropriate for probable movements in interest rates over the next 12 months.

GAFRI believes that its exposure to interest rate risk, particularly a rising interest rate environment, is mitigated by the nature of its annuity business. The Company's primary strategic business is in the flexible premium, teachers'

403(b) market. Historically, this market has proven to be less interest rate and lapse sensitive than other annuity markets, as demonstrated in the persistency table below, which illustrates GALIC's annual persistency rates for its major fixed annuity product groups over the past five years. Persistency rates reflect the proportion of reserves maintained by the Company and not paid out in the form of surrenders, annuitizations or death benefits during the applicable year

:

<u>Product Group</u>	<u>Persistency Rates</u>				
	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>	<u>2002</u>
Flexible premium	92%	92%	94%	94%	92%
Single premium*	87	87	88	89	90

* Excludes surrenders on recently acquired closed blocks of business.

Persistency rates are affected by many of the same factors that affect annuity sales. Although the stock market and interest rate environment affect persistency in the Company's fixed rate annuities, management believes that its persistency rate has benefited from the low interest rate environment and the two-tier design of certain of its in-force products. Two account values are maintained for two-tier annuities - the annuitization (or upper-tier) value and the surrender (or lower-tier) value. The annuitization value is paid upon a policyholder's death or election to annuitize (withdraw funds in a series of periodic payments for at least the minimum number of years specified in the policy). If a lump-sum payment is chosen by the policyholder, the surrender value is paid in most circumstances. GALIC's two-tier annuities are particularly attractive to policyholders that intend to accumulate funds to provide retirement income since the annuitization value is often accumulated at a higher interest rate.

12

Moreover, due to the two-tier nature of many of its annuity products, GAFRI has significant surrender charge protection, averaging approximately 10% of the annuitization value. While the Company continues to receive premiums on in-force two-tier annuities, it no longer sells this type of annuity. (For additional information on risks associated with GAFRI's two-tier annuities, see Note O to the Financial Statements.) In total, nearly 75% of the Company's annuity reserves had a surrender charge of 5% or greater at December 31, 2006, and nearly 35% had a surrender charge of 10% or greater. While it is likely that persistency will decrease (i) as more policies begin to emerge out of their surrender charge period and (ii) in a rising interest rate environment, the Company believes it should not experience surrender rates that will have a material impact on its financial condition.

Interest rates have generally been low in recent years. Should interest rates remain at December 31, 2006 levels, the average earned rate of return on GAFRI's annuity investment portfolios will decline. Declining portfolio yields may cause the spreads between investment portfolio yields and the interest rate credited to policyholders to narrow, as GAFRI's ability to manage spreads can become limited by GMIRs on its fixed annuity policies. The GMIRs on annuity policies range from 1% to 4%, with a weighted average guaranteed rate of approximately 3.4%. The following table provides detail of the differences between the current interest rates being credited to policyholders and the respective GMIRs at the end of 2006. As of December 31, 2006, new policies are being issued with a GMIR of 3%.

<u>GMIR Range</u>	<u>Average GMIR</u>	<u>Weighted Average Credited Rate</u>	<u>Difference</u>	<u>Percent of Total Reserves</u>
Less than 3%	2.31%	3.28%	0.97%	9.8%
3.00%-3.99%	3.01%	3.66%	0.65%	43.5%
4.00% and greater	<u>4.01</u>	<u>4.06</u>	<u>0.05</u>	<u>46.7</u>
	%	%	%	
	<u>3.41</u>	<u>3.81</u>	<u>0.40</u>	<u>100.0</u>
	%	%	%	

The maturity structure and call provisions of a portion of GAFRI's investment asset portfolio are constructed to afford some protection against erosion of investment portfolio yields during periods of declining interest rates. GAFRI devotes extensive effort to evaluating the risks associated with falling interest rates by simulating asset and liability cash flows for a wide range of interest rate scenarios. GAFRI seeks to manage these exposures by maintaining a suitable maturity structure and by limiting its exposure to call risk in its investment portfolios. For a discussion of GAFRI's investment in mortgage-backed securities, see "Investments."

Indexed-Annuities

Indexed-annuities comprised nearly 9% of the Company's insurance reserves at December 31, 2006. Indexed-annuities have interest rate risk similar to other fixed annuities. They have contractually guaranteed minimum surrender values, the majority of the asset portfolio backing them is invested in fixed income securities similar to other fixed deferred annuities, and GAFRI seeks to earn a spread on those fixed income assets. GAFRI purchases index options, which hedges the policyholders' index participation, minimizing equity market risk.

Variable Annuities

Variable annuity policyholders may choose to invest a portion of their funds in a "fixed" option; these fixed funds represented less than 2% of GAFRI's total insurance reserves at December 31, 2006, and have interest rate risk similar to other fixed annuities. (For additional information on risks associated with GAFRI's variable annuities, see Note O to the Financial Statements.)

The Company believes its exposure to interest rate risk will not result in a material impact on capital, earnings, operations or liquidity. In the unlikely event that a material impact occurs, GAFRI believes that it has adequate resources to meet its liquidity or capital needs (see "Liquidity and Capital Resources").

CRITICAL ACCOUNTING POLICIES

Significant accounting policies are described in Note B to the Financial Statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that can have a significant effect on amounts reported in the financial statements. As more information becomes known, these estimates and assumptions could change and thus impact amounts reported in the future. Management believes that the following items are the areas where

the degree of judgment required to determine amounts recorded in the financial statements make the accounting policies critical:

- The recoverability of unamortized insurance acquisition costs;
- The establishment of insurance reserves;
- The determination of "other than temporary" impairments on investments; and
- Environmental reserves with respect to GAFRI's former manufacturing operations.

Recoverability of Unamortized Insurance Acquisition Costs and Establishment of Insurance Reserves

The carrying value of certain assets (primarily deferred policy acquisition costs ("DPAC")), liabilities for excess deaths and annuitization reserves ("EDAR") and unearned revenues ("UREV") are based, in part, upon assumed interest rates and investment spreads, surrenders, annuitizations, renewal premiums and mortality. Actual results have varied from these assumptions in the past and have caused these accounting estimates to change (see "Results of Operations - Insurance Acquisition Expenses"), and could cause the Company's accounting estimates to change in the future. The Company performs an in-depth review of its assumptions and tests for recoverability on an annual basis as well as more limited reviews on a quarterly basis. If necessary, DPAC, UREV and EDAR balances may be adjusted ("unlocked") up or down based on new assumptions.

Approximately 40% of GAFRI's fixed annuity liabilities at December 31, 2006, were two-tier in nature in that policyholders can receive a higher amount if they die or if they annuitize rather than surrender their policy, even if the surrender charge period has expired. For these policies, reserves are recorded at their lower-tier value plus additional reserves for (i) accrued persistency and premium bonuses and (ii) excess benefits expected to be paid on future deaths and annuitizations that require payment of the upper-tier value. The liability for EDAR (approximately \$200 million at December 31, 2006) is accrued for and modified using assumptions consistent with those used in determining DPAC and DPAC amortization. Actual experience and changes in actuarial assumptions and tests for recoverability have caused GAFRI's accounting estimates to change in the past and could cause the Company's accounting estimates to change in the future (see "Results of Operations - Annuity Benefits," "Item 7A - Annuity Contracts" and Note O to the Financial Statements).

GAFRI's variable annuity separate account assets and liabilities have equity market risk in that a sustained, significant change in the stock market could impact (i) variable annuity fees earned by GAFRI, since such fees are based on the market value of the underlying funds, and (ii) the carrying value of related DPAC. Furthermore, certain variable policies have features that provide for guaranteed minimum death benefits in excess of GAFRI's separate account liabilities. A sustained, significant decrease in the stock market, combined with an increase in the amount of death benefits or certain other withdrawals, could materially impact DPAC and liabilities. Variations in actual equity market performance from previous assumptions have caused these accounting estimates to change in the past (see "Results of Operations - Insurance Acquisition Expenses" and Note O to the Financial Statements).

Determination of "Other Than Temporary" Impairments on Investments

The Company performs an in-depth review of its investments on a quarterly basis (see "Liquidity and Capital Resources - Investments," "Results of Operations - Realized Gains (Losses)", and "Item 7A - Fixed Maturity Portfolio").

Environmental Reserves

The Company's balance sheet includes a liability of approximately \$13.4 million for the estimated future costs of environmental clean-up activities at certain sites from the Company's former manufacturing operations as well as third-party sites. The Company performs an in-depth review of this reserve on an annual basis as well as more limited reviews on a quarterly basis. The primary risk in setting this reserve is that the actual future costs will be greater than the assumed costs. See Note M to the Financial Statements.

The Company believes its exposure to the risks referred to above, including interest rate and market risk, will not result in a material impact on capital, earnings, operations or liquidity at either the holding company or subsidiary level. In the unlikely event that a material impact occurs, GAFRI believes that it has adequate resources to meet its liquidity and capital needs (see "Liquidity and Capital Resources").

14

LIQUIDITY AND CAPITAL RESOURCES

Ratios

GAFRI's consolidated debt to capital ratio is shown below (dollars in millions). For purposes of this calculation, consolidated debt includes long-term debt and payable to subsidiary trusts; capital represents the sum of consolidated debt and stockholders' equity (excluding unrealized gains on fixed maturity securities).

	<u>December 31,</u>				
	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>	<u>2002</u>
Consolidated Debt	\$ 273	\$ 342	\$ 363	\$ 369	\$ 393
Stockholders' Equity	<u>1,064</u>	<u>949</u>	<u>895</u>	<u>805</u>	<u>689</u>
Total Capital	<u>\$1,337</u>	<u>\$1,291</u>	<u>\$1,258</u>	<u>\$1,174</u>	<u>\$1,082</u>
Consolidated Debt to Capital	20.4%	26.5%	28.9%	31.4%	36.3%

The National Association of Insurance Commissioners' ("NAIC") risk-based capital ("RBC") formula determines the amount of capital that an insurance company needs to ensure that it has an acceptable expectation of not becoming financially impaired. At December 31, 2006, the capital ratio of GAFRI's principal insurance subsidiary was 6.8 times its authorized control level RBC compared to 5.7 times at December 31, 2002.

Sources and Uses of Funds

Parent Holding Company Liquidity

To pay interest and principal on borrowings and other holding company costs, GAFRI (parent) and AAG Holding use primarily capital distributions from Great American Life Insurance Company ("GALIC") and newly acquired Ceres Group, Inc., bank borrowings and cash and investments on hand. Capital distributions from GAFRI's insurance subsidiaries are subject to regulatory restrictions relating to statutory surplus and earnings. The maximum amount of dividends payable by GALIC and Ceres' subsidiaries in 2007 without prior regulatory approval is \$121 million and \$19 million, respectively. In 2006, GALIC paid \$147.7 million in dividends to GAFRI.

In March 2006, the Company replaced its existing credit agreement with a \$500 million five-year credit facility shared with its parent company, American Financial Group, Inc. Under terms of the agreement, GAFRI may borrow up to \$175 million with the ability to borrow up to \$200 million, conditioned on AFG not borrowing in excess of \$300 million. No amounts were outstanding under this agreement at December 31, 2006. Amounts borrowed bear interest at

rates ranging from 0.5% to 1.25% over LIBOR based on AFG's credit rating; the current rate would be 0.75% over LIBOR. Under a currently effective shelf registration, GAFRI and AAG Holding can issue up to \$250 million in additional equity or debt securities. See Note Q to the Financial Statements for information relating to AFG's proposed merger transaction with GAFRI.

On August 7, 2006, GAFRI (parent) acquired all of the outstanding shares of Ceres for \$204.4 million in cash. To fund the acquisition, GAFRI used cash on hand and borrowings under its bank line. Following the acquisition and the concurrent reinsurance transactions, Ceres distributed \$60 million to GAFRI. GAFRI used a portion of the distribution to repay all amounts borrowed under its bank line in connection with the acquisition. GAFRI expects that Ceres' insurance subsidiaries will have the capability to potentially pay up to \$50 million of additional dividends in 2007, subject to regulatory approval.

In 2006, GAFRI repurchased \$68.5 million principal amount of its 6-7/8% Senior Notes for \$70.8 million. In the fourth quarter of 2005, GAFRI repurchased \$20.8 million of its 8-7/8% preferred securities for \$22.6 million in cash.

GAFRI believes that it has sufficient resources to meet its liquidity requirements.

Subsidiary Liquidity

The liquidity requirements of GAFRI's insurance subsidiaries relate primarily to the liabilities associated with their products as well as operating costs and expenses, and the payments of dividends and taxes to GAFRI. Historically, cash flows from maturities of bonds held in the investment portfolio, premiums and investment income have far exceeded the funds needed to meet these requirements without forcing the sale of investments or requiring contributions from GAFRI. Funds received in excess of cash requirements are generally invested in additional marketable securities. In addition, the insurance subsidiaries generally hold an adequate amount of highly liquid, short-term investments.

15

In GAFRI's annuity business, where profitability is largely dependent on earning a "spread" between invested assets and annuity liabilities, the duration of investments is generally maintained close to that of liabilities. With declining rates, GAFRI receives some protection due to the ability to lower crediting rates, subject to guaranteed minimums. In a rising interest rate environment, significant protection from withdrawals exists in the form of temporary and permanent surrender charges on GAFRI's annuity products. Annuity surrenders (after surrender fees) totaled approximately \$856 million in 2006 compared to \$625 million and \$562 million in 2005 and 2004, respectively. Management believes the increase in surrenders is due to (i) expected surrenders from recent acquisitions of blocks of annuity business; (ii) the higher interest rate environment; and (iii) policies coming out of their surrender charge periods.

In recent years, the Company's insurance subsidiaries have entered into several reinsurance transactions in connection with (i) the sale of Great American Life Assurance Company of Puerto Rico ("GA-PR"), (ii) the acquisition of Ceres, and (iii) certain of its life and supplemental insurance operations. These transactions provided additional capital and liquidity and were entered into in the normal course of business in order to exit certain lines, fund acquisitions and transfer risk. The Company may enter into additional reinsurance transactions in the future.

GAFRI believes its insurance subsidiaries maintain sufficient liquidity to pay claims and benefits, operating expenses, dividends and tax payments, as well as meet commitments in the event of unforeseen events such as reserve deficiencies, inadequate premium rates or reinsurer insolvencies.

Contractual Obligations

The following table shows an estimate of payments to be made for insurance liabilities, as well as for material contractual obligations (in millions):

-	<u>Total</u>	<u>2007</u>	<u>2008-2009</u>	<u>2010-2011</u>	<u>Thereafter</u>
-					
Insurance Liabilities	\$10,871.4	\$1,255.9	\$2,205.4	\$1,996.8	\$5,413.3
Long term debt	273.1	22.1(1)	31.7	0.1	219.2
Interest on long term debt	440.0	19.2	33.4	32.3	355.1
Operating Leases	<u>49.7</u>	<u>4.9</u>	<u>10.1</u>	<u>9.9</u>	<u>24.8</u>
 Total	 <u>\$11,634.2</u>	 <u>\$1,302.1</u>	 <u>\$2,280.6</u>	 <u>\$2,039.1</u>	 <u>\$6,012.4</u>

(1) Includes the retirement of approximately \$22 million of the Company's 8-7/8% notes. (See Note Q to the Financial Statements).

Reserve projections for insurance liabilities in the table above include anticipated cash benefit payments only. The projections were based on historical patterns and expected trends and do not include any impact for future earnings or additional premiums. GAFRI expects operating cash flows to be sufficient to meet these obligations.

GAFRI has no material contractual purchase obligations or other long-term liabilities at December 31, 2006.

Independent Ratings

The Company's principal insurance subsidiaries ("Insurance Companies") are rated by A.M. Best, Fitch, and Standard & Poor's. Management believes that the ratings assigned by independent insurance rating agencies are important because agents, potential policyholders and school districts often use a company's rating as an initial screening device in considering annuity products. Management believes that (i) a rating in the "A" category by A.M. Best is necessary to successfully market tax-deferred annuities to public education employees and other not-for-profit groups; and (ii) a rating in the "A" category by at least one rating agency is necessary to successfully compete in other annuity markets. GAFRI's insurance entities also compete in markets other than the sale of tax-deferred annuities. Ratings are an important competitive factor; management believes that these entities can successfully compete in these markets with their respective ratings.

GAFRI's operations could be materially and adversely affected by ratings downgrades. In connection with recent reviews by independent rating agencies, management indicated that it intends to maintain lower ratios of debt to capital than it has in recent years and intends to maintain the capital of its significant insurance subsidiaries at levels currently indicated by the rating agencies as appropriate for the current ratings. Items that could adversely affect capital levels include (i) an extended period of low interest rates and a resulting significant narrowing of annuity "spread" (the difference between earnings received by the Company on its investments less the amount credited to policyholders' annuity

accounts); (ii) investment impairments; (iii) a sustained decrease in the stock market; (iv) adverse mortality or morbidity; (v) changes in capital levels associated with current rating agency requirements; and (vi) higher than planned dividends paid due to liquidity needs by GAFRI and AAG Holding.

Following are the Company's ratings as of December 31, 2006:

	<u>A.M. Best</u>	<u>Fitch</u>	<u>Standard & Poor's</u>
GALIC*	A (Excellent)	A+ (Strong)	A- (Strong)
AILIC	A (Excellent)	A+ (Strong)	A- (Strong)
Loyal	A (Excellent)	A+ (Strong)	Not rated
UTA	A- (Excellent)	Not rated	Not rated
CGIC	B++(Good)	A (Strong)	Not rated
CRLIC	B++(Good)	A (Strong)	Not rated

*GALIC is rated A3 (good financial security) by Moody's.

GALIC received a positive outlook from Moody's. All of the other ratings carry a "stable" outlook. In evaluating a company, independent rating agencies review such factors as the company's: (i) capital adequacy; (ii) profitability; (iii) leverage and liquidity; (iv) book of business; (v) quality and estimated market value of assets; (vi) adequacy of policy reserves; (vii) experience and competency of management; (viii) operating profile; and (ix) risk management.

Investments

State insurance laws restrict the types and amounts of investments that are permissible for life insurers. These restrictions are designed to ensure the safety and liquidity of insurers' investment portfolios.

Investments comprise approximately 85% of the Company's assets (excluding variable annuity assets) and are the principal source of income. Fixed income investments (consisting of fixed maturity investments, policy loans, mortgage loans and short-term investments), comprised 97% of its investment portfolio at December 31, 2006. GAFRI generally invests in securities having intermediate-term maturities with an objective of optimizing interest yields while maintaining an appropriate relationship of maturities between GAFRI's assets and expected liabilities.

The NAIC assigns quality ratings to publicly traded as well as privately placed securities. At December 31, 2006, 94% of GAFRI's Insurance Companies' fixed maturity portfolio was comprised of investment grade bonds (NAIC rating of "1" or "2"). Management believes that a high quality investment portfolio is more likely to generate a stable and predictable investment return. The following table shows the Insurance Companies' fixed maturity portfolio at fair value by NAIC designation (and comparable Standard & Poor's Corporation rating).

<u>NAIC Rating</u>	<u>Comparable S&P Rating</u>	<u>Insurance Companies Investment Portfolio</u>	
		<u>2006</u>	<u>2005</u>
1	AAA, AA, A	75%	75%
2	BBB	<u>19</u>	<u>19</u>

	Total investment grade	<u>94</u>	<u>94</u>
3	BB	2	3
4	B	3	3
5	CCC, CC, C	1	*
6	D	<u>*</u>	<u>*</u>
	Total non-investment grade	<u>6</u>	<u>6</u>
	Total fixed maturities	<u>100</u>	<u>100</u>
		%	%

*less than one-half of 1%

At December 31, 2006, the mortgage-backed securities ("MBSs") portfolio represented approximately 25% of the Insurance Companies' investments. MBSs are subject to significant prepayment risk due to the fact that, in periods of declining interest rates, mortgages may be repaid more rapidly than scheduled as borrowers refinance higher rate mortgages to take advantage of the lower current rates.

17

Substantially all of the Insurance Companies' MBSs are rated "AAA" at December 31, 2006. The market in which these securities trade is highly liquid. Aside from the interest rate risk referred to above, GAFRI does not believe a material risk (relative to earnings or liquidity) is inherent in holding such investments.

The table below (dollars in millions) summarizes the unrealized gains and losses on available for sale securities by dollar amount at December 31, 2006. Approximately \$111.9 million of "Fixed Maturities" and \$20.4 million of "Equity Securities" had no unrealized gains/or losses at December 31, 2006.

	Aggregate Fair <u>Value</u>	Aggregate Amortized <u>Cost</u>	Aggregate Unrealized <u>Gain(Loss)</u>	Fair Value as % of Cost <u>Basis</u>
Fixed maturities with unrealized gains (997 issues*)	\$4,160.3	\$4,048.9	\$111.4	102.8%
Fixed maturities with unrealized losses (764 issues**):				
Investment grade, with losses for < 1 year (330 issues)	2,173.2	2,194.8	(21.6)	99.0%

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Investment grade, with losses for > 1 year (371 issues)	2,490.1	2,559.2	(69.1)	97.3%
Non-investment grade, with losses for <1 year (40 issues)	76.6	77.7	(1.1)	98.6%
Non-investment grade, with losses for >1 year (23 issues)	108.4	111.8	(3.4)	97.0%
Equity securities with unrealized gains (52 issues)	197.8	171.4	26.4	115.4%
Equity securities with unrealized losses (7 issues):				
For <1 year (6 issues)	19.7	21.6	(1.9)	91.2%
For >1 year (1 issues)	<u>0.5</u>	<u>0.6</u>	<u>(0.1)</u>	<u>83.3</u>
)	%	
Total	<u>\$9,226.6</u>	<u>\$9,186.0</u>	<u>\$ 40.6</u>	<u>100.4</u>
			%	

* 92% of these investments are rated investment grade; includes 1 issue with individual gains exceeding \$2 million

**96% of these investments are rated investment grade; no issues had individual losses exceeding \$2 million

For information regarding concentration of unrealized losses by type or industry, see Note F to the Financial Statements.

The table below sets forth the scheduled maturities of available for sale fixed maturity securities at December 31, 2006, based on their fair values. Asset-backed securities and other securities with sinking funds are reported at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

<u>Maturity</u>	Securities with Unrealized <u>Gains</u>	Securities with Unrealized <u>Losses</u>
*	*	*
One year or less	3%	3%
After one year through five years	24	8
After five years through ten years	44	42
After ten years	<u>12</u>	<u>8</u>
	83	61
Mortgage-backed securities	<u>17</u>	<u>39</u>

100

100

%

%

*Excludes \$112 million of fixed maturities with no unrealized gains and losses.

When a decline in the fair value of a specific investment is considered to be "other than temporary," a provision for impairment is charged to earnings (accounted for as a realized loss) and the cost basis of that investment is reduced. The determination of whether unrealized losses are "other than temporary" requires judgment based on subjective as well as objective factors.

18

Factors considered and resources used by management include:

- a. whether the unrealized loss is credit-driven or a result of changes in market interest rates,
- b. the extent to which fair value is less than cost basis,
- c. historical operating, balance sheet and cash flow data contained in issuer SEC filings and news releases,
- d. near-term prospects for improvement in the issuer and/or its industry,
- e. third party research and credit rating reports,
- f. internally generated financial models and forecasts,
- g. discussions with issuer management, and
- h. ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in fair value.

Based on its analysis of the factors enumerated above, management believes that (i) GAFRI will recover its cost basis in the securities with unrealized losses and (ii) GAFRI has the ability and intent to hold the securities until they mature or recover in value. Although GAFRI has the ability to continue holding its investments with unrealized losses, its intent to hold them may change due to deterioration in the issuers' creditworthiness, decisions to lessen exposure to a

particular issuer or industry, asset/liability management decisions, market movements, changes in views about appropriate asset allocation or the desire to offset taxable realized gains. Should GAFRI's ability or intent change with regard to a particular security, a charge for impairment would likely be required. While it is not possible to accurately predict if or when a specific security will become impaired, charges for other than temporary impairment could be material to results of operations in a future period. Management believes it is not likely that future impairment charges will have a significant effect on GAFRI's liquidity.

GAFRI realized aggregate losses of \$7.6 million during 2006 on \$252 million in sales of fixed maturity securities (eight issues/issuers) that had individual unrealized losses greater than \$500,000 at December 31, 2005. These securities were "AAA" rated mortgage-backed securities, three of which increased in fair value by an aggregate of \$0.7 million and five of which decreased in fair value by an aggregate of \$3.0 million from year-end 2005 to the sale date.

Uncertainties

GAFRI's businesses are subject to various uncertainties, including regulatory, legislative, environmental, and tax developments. While it is not possible to predict what changes will come in these areas, some could possibly have a material impact on GAFRI and its businesses. Also see Note M to the Financial Statements.

Over the last several years there have been an increasing number of proposals to either change the methods by which insurance companies are regulated, change the amount of capital required by insurance companies, or increase the amount of regulation imposed under the existing regulatory framework. For example, the National Association of Insurance Commissioners recently revised the suitability in annuity transactions model regulation to apply to all purchasers regardless of age. Previously, the annuity suitability model regulation only applied to purchasers age 65 and older. The Company cannot predict what specific regulations will be adopted or if an entirely new regulatory framework will be implemented or the impact on the Company and its business.

Reinsurance

In the normal course of business, GAFRI's insurance subsidiaries cede reinsurance to other companies under various reinsurance agreements to diversify risk and limit maximum exposure. To the extent that any reinsuring companies are unable to meet obligations under agreements covering reinsurance ceded, GAFRI's insurance subsidiaries would remain liable. GAFRI reviews the financial condition of its reinsurers and monitors the amount of reinsurance it has with each company. At December 31, 2006, approximately 65% of the Company's total face amount of life insurance in force was reinsured. Substantially all of GAFRI's reinsurance is with companies having an A.M. Best rating in the A category. GAFRI's largest reinsurer accounts for nearly 60% of the Company's reinsurance in force and is rated A+ by A.M. Best. GAFRI's second largest reinsurer accounts for nearly 35% of GAFRI's reinsurance in force and is rated A by A.M. Best.

Proposed Tax Law Changes

The most recent federal budget proposal again contained several tax reform measures related to retirement and savings accounts. One such proposal would consolidate 401(k), 403(b) and government employee 457 plans into a single plan. Another proposal would create "lifetime savings accounts" that would allow tax-free savings without restrictions on withdrawals. The Company does not expect these measures to be adopted in 2007.

The Department of the Treasury has proposed certain changes to the regulations governing 403(b) annuities. These changes include new restrictions on transfers and the imposition of additional obligations on employers, including school districts. The Company expects that the final regulations will come close to the proposed changes, and will become effective in 2008. These changes may cause employers to reduce the number of 403(b) annuity providers that have access to employees. To remain competitive in a changed environment, the Company is preparing to offer increased services to help employers meet their additional obligations.

In 2005 and 2006, there were a number of proposals being explored for reform of the federal income tax system. Some proposals would have a significant adverse impact on the Company and its business. GAFRI does not expect those proposals to be adopted in 2007.

GAFRI cannot predict the long-term likelihood or final form of any tax reform legislation or the impact on the Company and its business.

Proposed State and Local Regulatory Changes

Various competitors, schools and other entities have proposed measures that would restrict product designs and the number of companies qualified to sell annuities to teachers. In addition, certain school districts have proposed charging policy fees to annuity providers. While efforts in these areas have been largely unsuccessful to date, widespread acceptance of such measures could

negatively impact GAFRI's 403(b) annuity operations to the extent the Company's access to school districts is limited or reduced, and to the extent policy fees are not recovered by GAFRI.

RESULTS OF OPERATIONS

General

The following table shows GAFRI's net earnings and diluted earnings per share as stated in the Consolidated Income Statement as well as the after-tax effect of other items included in these GAAP measures that are listed below to assist investors in analyzing their impact on the trend in operating results (in millions, except per share amounts):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Net Income	\$98.9	\$69.9	\$101.8
Significant after-tax items included in net income			
Gains on sales of discontinued hotels	31.6	10.7	-
Discontinued hotel operations	(0.6)	3.6	2.9
Discontinued Puerto Rican operations	-	19.6	14.5
Unlocking charge and write-off of DPAC	-	(19.1)	-
Charge relating to former manufacturing operations	-	(6.2)	-
Realized gains (losses)	(8.8)	(0.7)	32.9

Diluted per share amounts:

Net Income	\$2.06	\$1.47	\$2.15
Significant after-tax items included in net income			
Gains on sales of discontinued hotels	0.66	0.22	-
Discontinued hotel operations	(0.01)	0.08	0.06
Discontinued Puerto Rican operations	-	0.41	0.30
Unlocking charge and write-off of DPAC	-	(0.40)	-
Charge relating to former manufacturing operations	-	(0.13)	-
Realized gains (losses)	(0.18)	(0.01)	0.69

Gains on Sales of Discontinued Hotels and Discontinued Hotel Operations

See Item 7 - "Results of Operations - Real Estate Operations - Discontinued" and Note F to the Financial Statements for discussion.

Discontinued Puerto Rican Operations

See Item 7 - "Results of Operations - Discontinued Operations" and Note C to the Financial Statements for discussion.

20

Unlocking Charge and Write-off of Deferred Policy Acquisition Costs ("DPAC") (Included in Benefits to Policyholders and Insurance Acquisition Expenses)

See Item 7 - "Results of Operations - Annuity Benefits" and "Results of Operations - Insurance Acquisition Expenses" for discussion.

Charge Relating to Former Manufacturing Operations (Included in Other Expenses)

See Item 7 - "Results of Operations - Other Expenses" and Note M to the Financial Statements for discussion.

Realized Gains (Losses)

See Item 7 - "Results of Operations - Realized Gains (Losses)" for discussion.

Annuity Premiums

The following table summarizes GAFRI's annuity sales (in millions).

	<u>2006</u>	<u>2005</u>	<u>2004</u>
403(b) Fixed and Indexed-Annuities:			
First Year	\$ 55	\$ 40	\$ 34

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Renewal	138	131	122
Single Sum	<u>251</u>	<u>77</u>	<u>103</u>
Subtotal	444	248	259
Non-403(b) Fixed Annuities	335	440	401
Non-403(b) Indexed-Annuities	510	69	2
Variable Annuities	<u>87</u>	<u>92</u>	<u>105</u>
Total Annuity Premiums	<u>\$1,376</u>	<u>\$849</u>	<u>\$767</u>

Statutory annuity premiums in 2006 were 62% higher than in 2005. Premiums in 2005 included approximately \$100 million of traditional fixed annuity premiums received in January 2005 from policyholders of an unaffiliated company in rehabilitation who chose to transfer their funds to GAFRI. Excluding the \$100 million, GAFRI's premiums in 2006 were 84% higher than in 2005, due primarily to higher fixed indexed-annuity sales and higher sales of traditional annuities in GAFRI's 403(b) segment.

Life, Accident and Health Premiums and Benefits

The following table summarizes GAFRI's life, accident and health premiums and benefits as shown in the Consolidated Income Statement (in millions).

	<u>2006</u>	<u>2005</u>	<u>2004</u>
<u>Premiums</u>			
Supplemental insurance operations (1)			
First year	\$ 49	\$ 48	\$ 54
Renewal	265	210	186
Life operations (in run-off)	<u>35</u>	<u>38</u>	<u>41</u>
	<u>\$349</u>	<u>\$296</u>	<u>\$281</u>
<u>Benefits</u>			
Supplemental insurance operations	\$238	\$199	\$184
Life operations (in run-off)	<u>44</u>	<u>50</u>	<u>49</u>
	<u>\$282</u>	<u>\$249</u>	<u>\$233</u>

Ratio of Supplemental benefits to Supplemental premiums	76%	77%	77%
---	-----	-----	-----

1. 2006 includes premiums from Ceres' subsidiaries since their acquisition in August 2006.

Excluding the effect of the acquisition of Ceres, GAFRI's supplemental insurance operations reflect lower first year premiums, higher lapses and higher loss experience in 2006. The acquisition broadens GAFRI's distribution in both the independent agent and captive agent channels.

Net Investment Income

Net investment income increased \$43.9 million (8%) in 2006 compared to the same period in 2005 due primarily to an increase in average invested assets of approximately \$575 million (6%). Net investment income primarily related to the early redemption of certain investments was approximately \$11 million and \$15 million in 2006 and 2005, respectively. The increase in assets reflects internal growth as well as acquisitions. See Note D to the Financial Statements.

Net investment income increased \$33.6 million (6%) in 2005 compared to 2004. An increase in average invested assets of nearly \$700 million (8%), due primarily to internal growth as well as the acquisition of a block of business in May 2004 (See Note D to the Financial Statements) was partially offset by a lower yield on GAFRI's investment portfolio.

21

The yield earned on GAFRI's investment portfolio, excluding real estate investments and realized gains, was 6.0%, 6.0% and 6.1% in 2006, 2005 and 2004, respectively.

Realized Gains (Losses)

Investments

Realized gains (losses) on investments included provisions for other than temporary impairment on securities as follows: \$17.6 million, \$16.9 million and \$13.4 million for the years ended 2006, 2005 and 2004, respectively. See Note F to the Financial Statements.

In 2004, GAFRI received common and preferred shares equivalent to 1.7 million shares of National City Corporation in exchange for its ownership interest in Provident Financial Group and realized a \$41.5 million pre-tax gain on the transaction.

Goodwill Impairment

Goodwill impairment reflects a 2006 pre-tax charge of \$4.2 million and a 2004 pre-tax charge of \$4.0 million related to an insurance agency subsidiary. See Note G to the Financial Statements.

Retirement of Debt

Loss on retirement of debt in 2006 reflects pre-tax losses on repurchases of \$68.5 million principal amount of the Company's 6-7/8% Senior Notes for \$70.8 million in cash. In addition, in connection with the repurchases, GAFRI paid \$2.0 million to effectively terminate the portion of an interest rate swap that covered the repurchased debt; this amount is included in loss on retirement of debt in the Consolidated Income Statement.

Loss on retirement of debt in 2005 and 2004 reflects pre-tax losses on repurchases of \$20.8 million and \$27.2 million principal amount of the Company's 8-7/8% trust preferred securities.

Other Income

Other income increased \$25.7 million (31%) in 2006 compared to the same period in 2005. The increases reflect higher administrative cost reimbursements received from reinsurers (resulting from the acquisition of Ceres) and higher income on GAFRI's continuing real estate operations (see below). 2006 also includes a payment received from Palm Beach County, Florida in exchange for the imposition of certain limitations on future development of a marina owned by the Company.

Other income increased \$11.8 million (17%) in 2005 compared to 2004 due to increased real estate revenues primarily as a result of the acquisition of new properties.

Real Estate Operations - Continuing

GAFRI is engaged in a variety of real estate operations including hotels and marinas. Revenues and expenses of these operations are included in GAFRI's Consolidated Income Statement as shown below (in millions).

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Other income	\$32.4(1)	\$24.6	\$12.5
Other expenses:			
Operating expenses	22.0	17.8	9.8
Depreciation	3.3	2.7	1.6
Other	1.2	2.9	1.0

1. Includes \$4.9 million of income resulting from a March 2006 payment received from Palm Beach County, Florida in exchange for the imposition of certain limitations on future development of a marina owned by the Company.

Real Estate Operations - Discontinued

On June 2, 2006, GAFRI sold Chatham Bars Inn, a resort hotel located on Cape Cod, Massachusetts, for a price of \$166 million. After sales expenses, contingencies and the write-off of certain deferred acquisition costs on annuities associated with the gain recognition, the Company recognized a pre-tax gain of approximately \$48.7 million (\$31.6 million after-tax, or \$0.66 per diluted share).

In October 2005, GAFRI sold its hotel operations in Austin, Texas for \$53 million. After sales expenses, profit sharing payments and the write-off of certain deferred acquisition costs associated with the gain recognition, the Company recognized a pre-tax gain of approximately \$16.5 million (\$10.7 million after-tax, or \$0.22 per diluted share).

22

Annuity Benefits

Annuity benefits reflect amounts accrued on annuity policyholders' funds accumulated. On its deferred annuities (annuities in the accumulation phase), GAFRI generally credits interest to policyholders' accounts at their current stated interest rates. Furthermore, for "two-tier" deferred annuities (annuities under which a higher amount can be credited to the policyholder if a policy is annuitized rather than

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

surrendered), GAFRI accrues additional reserves for (i) persistency and premium bonuses and (ii) excess benefits expected to be paid for future deaths and annuitizations ("EDAR"). Changes in crediting rates, actual surrender, death and annuitization experience or modifications in actuarial assumptions can affect these additional reserves.

Annuity benefits increased \$4.5 million (1%) in 2006 compared to 2005. Excluding the 2005 "unlocking" amount discussed below, annuity benefits in 2006 were 5% higher than in 2005 reflecting higher annuity reserves due to internal growth and the acquisition of \$280 million of reserves in January 2006, partially offset by lower average effective crediting rates.

In the fourth quarter of 2006, GAFRI conducted its annual review of the actual results and future assumptions underlying its annuity operations, including assumptions related to future interest rates and persistency. There were no significant unlockings deemed necessary. In 2005, primarily as a result of the continuing low interest rate environment, the Company "unlocked" the actuarial assumptions related to its annuity business in force and recorded a pre-tax charge of approximately \$11.6 million to EDAR related to that business. In 2004, GAFRI recorded a pre-tax charge to EDAR of approximately \$5 million due to trends in actual experience. Management believes that significant changes in projected investment yields could result in charges (or credits) to earnings in the period the projections are modified.

Insurance Acquisition Expenses

Insurance acquisition expenses include amortization of DPAC as well as a portion of commissions on sales of insurance products. Insurance acquisition expenses also include amortization of the present value of future profits of businesses acquired. Increases in insurance acquisition expenses in 2006 and 2005 reflect growth in the Company's businesses as well as the items discussed below.

As a result of the 2006 annual review of actual results and future assumptions discussed above in "Annuity Benefits", no significant "unlockings" were deemed necessary. In 2005, the Company recorded net charges to insurance acquisition expenses of \$4.2 million primarily related to spread narrowing partially offset by the expected improved future persistency related to the Company's annuities, due to the impact of the current interest rate environment. In addition, in 2005 GAFRI recorded a \$13.6 million write-off of DPAC due to an unexpected increase in mortality in GAFRI's run-off life operations.

Insurance acquisition expenses in 2004 included \$5.1 million of net favorable unlockings relating to trends in actual experience (\$7.7 million of positive DPAC unlocking, partially offset by \$2.6 million of negative unearned revenue unlocking).

The vast majority of GAFRI's DPAC asset relates to its fixed annuity, variable annuity and life insurance lines of business. Continued spread compression, decreases in the stock market and adverse mortality could lead to further write-offs of DPAC in the future.

Interest and Debt Expenses

The decrease in interest and debt expenses in 2006 compared to 2005 and 2004 reflects the Company's repurchases of debt. In 2006, GAFRI repurchased \$68.5 million of the Company's 6-7/8% Senior Notes; in the fourth quarter of 2005, GAFRI repurchased \$20.8 million principal amount of its 8-7/8% preferred securities. The effect of these repurchases was partially offset by a higher effective interest rate on the Company's floating rate debt.

Other Expenses

Other expenses increased \$17.5 million (13%) in 2006 compared to 2005. The increase reflects the acquisitions in 2006 (See Note D to the Financial Statements), higher real estate expenses on GAFRI's continuing real estate operations, and higher expenses in the Company's supplemental lines of business.

Other expenses increased \$9.5 million (8%) in 2005 compared to 2004 due primarily to the \$9.5 million charge relating to the Company's former manufacturing operations (See Note M to the Financial Statements).

23

Income Taxes

The effective tax rate on GAFRI's continuing operations approximated 34% - 35% in each year from 2004 - 2006. See Note B, Note C and Note K to the Financial Statements for additional information on income taxes.

Discontinued Puerto Rican Operations

In January 2006, GAFRI completed the sale of its subsidiary, GA-PR, for approximately \$37.5 million in cash. There was no material after-tax gain or loss on the sale. During 2005, GA-PR paid dividends totaling \$100 million to GAFRI. See Note C to the Financial Statements.

Cumulative Effect of Accounting Change

In 2004, GAFRI recorded an after-tax charge of \$2.2 million resulting from the implementation of Statement of Position ("SOP") 03-1. The most significant effect to GAFRI is a change in accounting for assets and liabilities related to two-tier annuities and persistency bonuses. As a result of adopting the SOP, unamortized insurance acquisition costs increased by \$50 million and annuity benefits accumulated increased by \$54 million.

RECENT ACCOUNTING STANDARDS

The following accounting standards are to be implemented by GAFRI in 2007.

Accounting

<u>Standard</u>	<u>Subject of Standard (Year of Implementation)</u>
SOP 05-1	Accounting for Modifications of Insurance Contracts (2007)
FIN 48	Accounting for Uncertainty in Income Taxes

SOP 05-1, "Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts," provides guidance on accounting for deferred policy acquisition costs on certain internal replacements of insurance and investment contracts. SOP 05-1 defines an internal replacement as a modification in product benefits, features, rights or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. The SOP is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. The impact on GAFRI's financial statements of implementing this standard is not expected to be material. However, future implementation of any plan involving modification or exchanges of annuity and supplemental insurance contracts could result in the write-off of a portion of deferred policy acquisition costs.

FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes (an interpretation of FASB Statement No. 109)" ("FIN 48") is effective for fiscal years beginning after December 15, 2006. For more information on FIN 48, See Income Taxes in Note B to the Financial Statements.

ITEM 7A

Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the potential economic loss arising from adverse changes in the fair value of financial instruments. GAFRI's exposures to market risk relate primarily to its fixed maturity investment portfolio and annuity contracts which are exposed to interest rate risk and, to a lesser extent, equity price risk. In addition, a portion of GAFRI's long-term debt is also exposed to interest rate risk.

Fixed Maturity Portfolio

The fair value of GAFRI's fixed maturity portfolio is directly impacted by changes in market interest rates. GAFRI's fixed maturity portfolio is comprised of substantially all fixed rate investments with primarily short-term and intermediate-term maturities. This practice is designed to allow flexibility in reacting to fluctuations of interest rates. GAFRI's portfolio is managed with an attempt to achieve an adequate risk-adjusted return while maintaining sufficient liquidity to meet policyholder obligations. GAFRI attempts to align the duration of invested assets to the projected cash flows of policyholder liabilities.

The following table provides information at December 31, 2006 and 2005, about GAFRI's "available-for-sale" fixed maturity investments that are sensitive to interest rate risk. These tables show (dollars in millions) principal cash flows and related weighted-average interest rates by expected maturity date for each of the five subsequent years and for all years thereafter. Callable bonds and notes are included based on call date or maturity date depending upon which date produces the most conservative yield. MBSs and

24

sinking fund issues are included based on maturity year adjusted for expected payment patterns. Actual cash flows may differ from those expected.

	<u>December 31, 2006</u>		<u>December 31, 2005</u>		
	<u>Principal Cash Flows</u>	<u>Rate</u>		<u>Principal Cash Flows</u>	<u>Rate</u>
2007	\$ 395	6.1%	2006	\$ 349	5.9%
2008	451	6.3	2007	344	6.9
2009	397	6.3	2008	397	6.8
2010	458	6.4	2009	417	6.5
2011	724	6.0	2010	563	6.4
Thereafter	<u>6,683</u>	5.8	Thereafter	<u>6,773</u>	5.7
Total	<u>\$9,108</u>	5.9%	Total	<u>\$8,843</u>	5.9%

Fair Value	<u>\$9,121</u>	Fair Value	<u>\$8,930</u>
------------	----------------	------------	----------------

Annuity Contracts

Substantially all of GAFRI's fixed rate annuity contracts permit GAFRI to change crediting rates (subject to minimum interest rate guarantees as determined by applicable law) enabling management to react to changes in market interest rates. In late 2003, GAFRI began issuing products with guaranteed minimum crediting rate of less than 3% in states where required approvals have been received. At December 31, 2006, approximately 10% of annuity benefits accumulated related to policies with a minimum crediting rate of less than 3%. The remaining balance was split almost evenly between policies with minimum guarantee rates of 3% and 4%. Actuarial assumptions used to estimate DPAC and certain annuity liabilities, as well as GAFRI's ability to maintain spread, could be impacted if the current interest rate environment continues for an extended period, or if increases in interest rates cause policyholder behavior to differ significantly from current expectations.

Projected payments in each of the next five years and for all years thereafter on GAFRI's fixed annuity liabilities at December 31 are as follows (dollars in millions):

	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>	<u>Fifth</u>	<u>Thereafter</u>	<u>Total</u>	<u>Fair Value</u>
2006	\$1,016	\$1,085	\$ 971	\$934	\$933	\$4,518	\$9,457	\$8,969
2005	\$ 907	\$ 945	\$1,013	\$897	\$880	\$3,775	\$8,417	\$8,060

At December 31, 2006, the average stated crediting rate on the in-force block of GAFRI's principal fixed annuity products was approximately 3.8%. The current stated crediting rates (excluding bonus interest) on new sales of GAFRI's fixed annuity products generally range from 3.0% to 4.0%. GAFRI estimates that its effective weighted-average crediting rate on its in-force business over the next five years will approximate 3.6%. This rate reflects actuarial assumptions as to: (i) expected investment spreads; (ii) deaths; (iii) annuitizations; (iv) surrenders; and (v) renewal premiums. Actual experience and changes in actuarial assumptions may result in different effective crediting rates than those above.

GAFRI's indexed-annuities represented nearly 9% of GAFRI's insurance reserves at December 31, 2006. These annuities provide policyholders with a crediting rate tied, in part, to the performance of an existing stock market index. GAFRI attempts to mitigate the risk in the index-based component of these products through the purchase of call options on the appropriate index. The Company's strategy is designed so that an increase in the liabilities due to an increase in the market index will be generally offset by unrealized and realized gains on the call options purchased by the Company. Under SFAS No. 133, both the index-based component of the annuities and the related call options are considered derivatives and marked to market through current earnings as annuity benefits. Adjusting these derivatives to market value had a net effect of less than 1% of annuity benefits in 2006 and 2005.

25

Long-Term Debt

The following table shows scheduled principal payments on fixed rate long-term debt (including the subsidiary trust securities) of GAFRI and related weighted-average interest rates for the next five years and for all years thereafter (in millions):

	<u>December 31, 2006</u>			<u>December 31, 2005</u>	
	Scheduled Principal Payments	Rate		Scheduled Principal Payments	Rate
2007 through 2011	\$ 53.9(1)	8.5%	2006 through 2010	\$ 49.0	7.4%
Thereafter	<u>219.2</u>	7.5%	Thereafter	<u>241.3</u>	7.5%
Total	<u>\$273.1</u>	7.8%	Total	<u>\$290.3</u>	7.7%
Fair Value	<u>\$256.9</u>		Fair Value	<u>\$297.0</u>	

(1) Includes the retirement of approximately \$22 million of the Company's 8-7/8% notes (see Note Q to the Financial Statements).

ITEM 9A

Evaluation of Disclosure Controls and Procedures

GAFRI's chief executive officer and chief financial officer, with the participation of management, have evaluated GAFRI's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rule 13a-14(c)) as of a date within 90 days prior to filing this report. Based on the evaluation, they concluded that the controls and procedures are effective. During the fourth quarter of 2006, there have been no changes in GAFRI's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, GAFRI's internal controls over financial reporting. During the fourth quarter of 2006, modifications were made to the controls of certain of GAFRI's information systems to modify the procedures with respect to emergency access by programmers. During the quarter, modifications were made to certain procedures with respect to the quarterly financial statement close process at the Company's operations in Austin, Texas. However, the related business processes and procedures did not materially change as a result of the modifications and, accordingly, management does not believe such changes are likely to materially affect GAFRI's internal controls over financial reporting.

26

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

GAFRI's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Securities Exchange Act Rules 13a-15(f). Under the supervision and with the participation of management, including GAFRI's principal executive officer and principal financial officer, GAFRI conducted an evaluation of the effectiveness of internal control over financial reporting as of December 31, 2006, based on the criteria set forth in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In conducting GAFRI's evaluation of the effectiveness of its internal control over financial reporting, GAFRI has excluded the 2006 acquisition of Ceres Group, Inc. This acquisition constituted less than 6% of total assets as of December 31, 2006 and less than 7% of total revenues and less than 5% of net earnings for the year then ended. Refer to Note D to the consolidated financial statements for further discussion of this acquisition.

There are inherent limitations to the effectiveness of any system of internal controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective internal controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based on GAFRI's evaluation, management concluded that internal control over financial reporting was effective as of December 31, 2006. Management's assessment of the effectiveness of internal control over financial reporting as of December 31, 2006, has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is set forth on the following page.

27

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Board of Directors and Stockholders

Great American Financial Resources, Inc.

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that Great American Financial Resources, Inc. (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Great American Financial Resources, Inc.'s management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally

accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Ceres Group, Inc., which is included in the 2006 consolidated financial statements of Great American Financial Resources, Inc. and constituted less than 6% of total assets as of December 31, 2006, and less than 7% of total revenues and less than 5% of net earnings for the year then ended. Management did not assess the effectiveness of internal control over financial reporting at this entity because the Company acquired this entity during 2006. Our audit of internal control over financial reporting of Great American Financial Resources, Inc. also did not include an evaluation of the internal control over financial reporting of this acquired entity.

In our opinion, management's assessment that Great American Financial Resources, Inc. maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Great American Financial Resources, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Great American Financial Resources, Inc. as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2006, and our report dated February 27, 2007 expressed an unqualified opinion thereon.

Cincinnati, Ohio

February 27, 2007

28

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Great American Financial Resources, Inc.

We have audited the accompanying consolidated balance sheets of Great American Financial Resources, Inc. (the Company) and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2006. Our audits also included the financial statement schedules listed in the Index at Item 15(a). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Great American Financial Resources, Inc. and subsidiaries at December 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

As discussed in Note B to the consolidated financial statements, in connection with implementing new accounting standards, the Company changed its methods of accounting for stock-based compensation in 2006 and certain non-traditional long duration insurance contracts and separate accounts in 2004.

We also have audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Great American Financial Resources, Inc.'s internal control over financial reporting as of December 31, 2006, based upon criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2007 expressed an unqualified opinion thereon.

A. DESCRIPTION OF THE COMPANY

Great American Financial Resources, Inc. ("GAFRI" or "the Company"), through its subsidiaries, markets fixed, indexed and variable annuities, and various forms of supplemental insurance through independent agents. To a lesser extent, the Company also markets certain of its supplemental insurance products through a captive agency force.

American Financial Group, Inc. ("AFG") and its subsidiaries owned 81% of GAFRI's Common Stock at December 31, 2006. See Note Q to the Financial Statements for information regarding AFG's proposed merger transaction with GAFRI.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements include the accounts of GAFRI and its subsidiaries. Certain reclassifications have been made to prior years to conform to the current year's presentation. Acquisitions and sales of subsidiaries have resulted in certain differences in the financial statements and have affected comparability between years. All significant intercompany balances and transactions have been eliminated. All acquisitions have been treated as purchases. The results of operations of companies since their formation or acquisition are included in the consolidated financial statements.

The preparation of the financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Changes in circumstances could cause actual results to differ materially from those estimates.

Investments

Fixed maturity securities and equity securities classified as "available-for-sale" are reported at fair value with unrealized gains and losses reported as a separate component of stockholders' equity. Fixed maturities classified as "trading" are reported at fair value with changes in unrealized holding gains or

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

losses during the period included in investment income. Short-term investments are carried at cost; mortgage loans on real estate are carried at the unpaid principal balance adjusted for any unamortized premium or discounts; and policy loans are carried at the aggregate unpaid balance. Premiums and discounts on fixed maturity securities are amortized using the interest method; mortgage-backed securities are amortized over a period based on estimated future principal payments, including prepayments. Prepayment assumptions are reviewed periodically and adjusted to reflect actual prepayments and changes in expectations.

Gains or losses on securities are determined on the specific identification basis. When a decline in the value of a specific investment is considered to be other than temporary, a provision for impairment is charged to earnings (included in realized gains (losses) on investments) and the cost basis of that investment is reduced.

Derivatives

Derivatives included in GAFRI's balance sheet are recorded at fair value and consist primarily of (i) the interest component of certain life reinsurance contracts (included in other liabilities), (ii) interest rate swaps (included in long-term debt), (iii) the equity-based component of certain indexed-annuity products (included in annuity benefits accumulated), and (iv) related call options (included in other assets) designed to be consistent with the characteristics of the liabilities and used to mitigate the risk embedded in those indexed-annuity products. Changes in the fair value of derivatives are included in current earnings.

F-6

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

The terms of the interest rate swaps match those of the debt; therefore, the swaps are considered to be (and are accounted for as) 100% effective fair value hedges. Both the swaps and the hedged debt are adjusted for changes in fair value by offsetting amounts. Accordingly, since the swaps are included with long-term debt in the Balance Sheet, the only effect on GAFRI's financial statements is that the interest expense on the hedged debt is recorded based on the variable rate.

Goodwill

Goodwill represents the excess of cost of subsidiaries over GAFRI's equity in their underlying net assets. Goodwill is not amortized, but is subject to an impairment test at least annually. Goodwill is included in "Other assets" in the Balance Sheet.

Reinsurance

In the normal course of business, GAFRI's insurance subsidiaries cede business to other companies under various reinsurance agreements to diversify risk and limit maximum exposure. These transactions may also provide a source of additional capital and liquidity. GAFRI remains obligated for amounts ceded in the event that the reinsurers do not meet their obligations. GAFRI reviews the financial condition of its reinsurers and monitors the amount of reinsurance it has with each company.

Under certain of these agreements, GAFRI's insurance subsidiaries cede life insurance policies to a third party on a funds withheld basis whereby GAFRI retains the assets (securities) associated with the reinsurance contracts. Interest is credited to the reinsurer based on the actual investment performance of the retained assets. These reinsurance contracts are considered to contain embedded derivatives (that must be adjusted to fair value) because the yield on the payables is based on specific blocks of the ceding companies' assets, rather than the overall creditworthiness of the ceding company. GAFRI determined that changes in the fair value of the underlying portfolios of fixed maturity securities is an appropriate measure of the value of the embedded derivative. GAFRI classifies the securities related to

these transactions as "trading." The adjustment to fair value on the embedded derivatives offsets the investment income recorded on the adjustment to fair value of the related trading portfolios.

Insurance Acquisition Costs and Expenses

Unamortized insurance acquisition costs consist of deferred policy acquisition costs ("DPAC") and the present value of future profits on business in force ("PVFP" or "VOBA") of acquired insurance companies.

Insurance acquisition expenses in the income statement reflect primarily the amortization of DPAC and VOBA. In addition, certain commission costs are expensed as paid and included in insurance acquisition expenses. All other uncapitalized acquisition costs such as marketing and underwriting expenses are included in "Other expenses" in the Income Statement.

Deferred Policy Acquisition Costs ("DPAC")

Policy acquisition costs (principally commissions, advertising, underwriting, policy issuance and sales expenses that vary with and are primarily related to the production of new business) are deferred to the extent that such costs are deemed recoverable. DPAC also includes capitalized costs associated with sales inducements offered to fixed annuity policyholders such as enhanced interest rates and premium and persistency bonuses.

DPAC related to annuities and universal life insurance products is deferred to the extent deemed recoverable and amortized, with interest, in relation to the present value of actual and expected gross profits on the policies. Expected gross profits consist principally of estimated future investment margin (estimated future net investment income less interest credited on policyholder funds) and surrender, mortality, and other life and variable annuity policy charges, less death and annuitization benefits in excess of account balances and estimated future policy administration expenses.

To the extent that realized gains and losses result in adjustments to the amortization of DPAC related to annuities, such adjustments are reflected as components of realized gains. DPAC related to annuities is also adjusted, net of tax, for the change in amortization that would have been recorded if the unrealized gains (losses) from securities had actually been realized. This adjustment is included in unrealized gains on marketable securities, a component of "Accumulated other comprehensive income, net" in the stockholders' equity section of the Balance Sheet.

F-7

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

DPAC related to traditional life and health insurance is amortized over the expected premium paying period of the related policies, in proportion to the ratio of annual premium revenues to total anticipated premium revenues. Such anticipated premium revenues were estimated using the same assumptions used for computing liabilities for future policy benefits.

Life and health insurance contracts are reviewed periodically using actuarial assumptions revised based on actual and anticipated experience, to determine if there is a potential premium deficiency. If any such deficiency exists, it is recognized by a charge to income and a reduction in unamortized acquisition costs.

Present Value of Future Profits ("PVFP")

) Insurance acquisition costs include the PVFP on business in force of acquired insurance companies, which represents the portion of the costs to acquire such companies that is allocated to the value of the right to receive future cash flows from insurance contracts existing at the date of acquisition.

The PVFP is amortized with interest in relation to expected gross profits of the acquired policies for annuities and universal life products and in relation to the premium paying period for traditional life and health insurance products.

Annuity Benefits Accumulated

Annuity receipts and benefit payments are recorded as increases or decreases in "annuity benefits accumulated" rather than as revenue and expense. Increases in this liability for interest credited are charged to expense and decreases for surrender charges are credited to other income.

As a result of the 2004 implementation of Statement of Position ("SOP") 03-1, "Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Contracts", reserves for two-tier annuities (annuities with different stated account values depending on whether a policyholder annuitizes, dies or surrenders) are now recorded at the lower-tier value plus additional reserves for (i) accrued persistency and premium bonuses; and (ii) excess benefits expected to be paid on future deaths and annuitizations ("EDAR") that require payment of the upper-tier value. The liability for EDAR is accrued for and modified using assumptions consistent with those used in determining DPAC and DPAC amortization, except that accruals are in relation to the present value of total expected assessments. Total expected assessments consist principally of estimated future investment margin, surrender, mortality, and other life and variable annuity policy charges, and unearned revenues once they are recognized as income. Prior to the adoption of the SOP, reserves for two-tier annuities were generally recorded at the lower-tier value plus the EDAR reserve.

Reserves for traditional single-tier fixed annuities are generally recorded at the stated annuitization value. Reserves for indexed-annuities are recorded at a value reflecting the fixed guarantees in the product plus the fair value of the equity participation in the contract.

Unearned Revenue

Policy charges that represent fees for future services are deferred as unearned revenue and recognized as income using the same assumptions and estimated gross profits used to amortize DPAC.

Life, Accident and Health Reserves

Liabilities for future policy benefits under traditional life, accident and health policies are computed using the net level premium method. Computations are based on the original projections of investment yields, mortality, morbidity and surrenders and include provisions for unfavorable deviations. Reserves established for accident and health claims are modified as necessary to reflect actual experience and developing trends.

The liability for future policy benefits for interest sensitive life and universal life policies is equal to the sum of the accumulated fund balances under such policies.

Variable Annuity Assets and Liabilities

Separate accounts related to variable annuities represent the fair value of deposits invested in underlying investment funds on which GAFRI earns a fee. Investment funds are selected and may be changed only by the policyholder, who retains investment risk.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

GAFRI's variable annuity contracts contain a guaranteed minimum death benefit ("GMDB") to be paid if the policyholder dies before the annuity payout period commences. In periods of declining equity markets, the GMDB may exceed the value of the policyholder's account. A GMDB liability is established for future excess death benefits using assumptions together with a range of reasonably possible scenarios for investment fund performance that are consistent with DPAC capitalization and amortization assumptions.

Life, Accident and Health Premiums and Benefits

For traditional life, accident and health products, premiums are recognized as revenue when legally collectible from policyholders. Policy reserves have been established in a manner that allocates policy benefits and expenses on a basis consistent with the recognition of related premiums and generally results in the recognition of profits over the premium paying period of the policies.

For interest sensitive life and universal life products, premiums are recorded in a policyholder account, which is reflected as a liability. Revenue is recognized as amounts are assessed against the policyholder account for mortality coverage and contract expenses. Surrender benefits reduce the account value. Death benefits are expensed when incurred, net of the account value.

Payable to Subsidiary Trusts

Two wholly-owned subsidiary trusts were formed to issue preferred securities and, in turn, purchase a like amount of subordinated debt from their parent company. Interest and principal payments from the parent fund the respective trust obligations. Accordingly, the subordinated debt due to the trusts is shown as "Long-term debt" in the Balance Sheet, and the related interest expense is included in "Interest and debt expenses" in the Income Statement.

Income Taxes

Under a tax agreement with AFG that became effective in 2006, GAFRI and its subsidiaries in the consolidated tax return group generally pay or recover taxes based on each subsidiary's contribution to amounts due under AFG's consolidated return. The tax allocation agreements with AFG have not impacted the recognition of income tax expense and income tax payable in GAFRI's financial statements. If the AFG tax group utilizes any of GAFRI's net operating losses or deductions that originated prior to GAFRI's entering AFG's consolidated tax group, AFG will pay to GAFRI an amount equal to the benefit received.

Deferred income tax assets and liabilities are determined based on differences between financial reporting and tax basis and are measured using enacted tax rates. The Company recognizes deferred tax assets if it is more likely than not that a benefit will be realized. Current and deferred tax assets and liabilities of companies in AFG's consolidated tax group are aggregated with other amounts receivable from or payable to affiliates. Current and deferred tax assets and liabilities of companies not in AFG's consolidated tax group are shown in "Other liabilities" in the Balance Sheet.

FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes (an interpretation of FASB Statement No. 109)" ("FIN 48") is effective for fiscal years beginning after December 15, 2006. FIN 48 sets forth criteria for recognition and measurement of tax positions taken or expected to be taken in a tax return. FIN 48 requires that companies recognize the impact of a tax position if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest, penalties, accounting in interim periods and disclosure. Management is currently evaluating the impact of adopting this interpretation and anticipates that it will not have a significant impact on GAFRI's results of operations or financial condition.

Stock-Based Compensation

Effective January 1, 2006, GAFRI implemented Statement of Financial Accounting Standards ("SFAS") No. 123(R), "Share-Based Payment" using the modified prospective method under which prior year amounts are not restated. Under SFAS No. 123(R), companies must recognize compensation expense for all new share-based awards (including employee stock options), and the nonvested portions of prior awards, based on their calculated "fair value" at the date of grant. Beginning in 2006, all share-based grants are recognized as compensation expense over the vesting period. GAFRI uses the Black-Scholes pricing model to measure the fair value of its stock options.

F-9

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

Prior to the implementation of SFAS No. 123(R), GAFRI accounted for stock options and other stock-based compensation plans using the intrinsic value method prescribed by Accounting Principles Board Opinion ("APB") No. 25, "Accounting for Stock Issued to Employees." Under this method, no compensation expense for stock option grants was recognized because options were granted at exercise prices equal to the fair value of the shares at the dates of grant. See Note J to the Financial Statements for further information on stock options.

Benefit Plans

Prior to July 1, 2006, the Company maintained a defined contribution plan that combined a retirement plan and 401(k) plan. Effective that date, the Company's plan was merged with a similar plan sponsored by AFG. As a result, Company employees who meet the eligibility requirements participate in that plan. At the discretion of the GAFRI Board of Directors, GAFRI makes all contributions to the retirement fund portion of the Plan and matches a percentage of employee contributions to the savings fund. Employees are permitted to direct the investment of all contributions to independently managed investment securities as well as funds comprised of GAFRI and AFG securities. Company contributions are expensed in the year for which they are declared.

GAFRI and certain of its subsidiaries provide certain benefits to eligible retirees. The projected future cost of providing these benefits is expensed over the period the employees earn such benefits.

Earnings Per Share

Basic earnings per share is calculated using the weighted-average number of shares of common stock outstanding during the period. The calculation of diluted earnings per share includes the following dilutive effect of common stock options: 2006 - 0.7 million shares, 2005 - 0.5 million shares and 2004 - 0.2 million shares.

Statement of Cash Flows

For cash flow purposes, "investing activities" are defined as making and collecting loans and acquiring and disposing of debt or equity instruments and property and equipment. "Financing activities" include annuity receipts, benefits and withdrawals and obtaining resources from owners and providing them with a return on their investments. All other activities are considered "operating." Short-term investments having original maturities of three months or less when purchased are considered to be cash equivalents for purposes of the financial statements.

Fair Value of Financial Instruments

Methods and assumptions used in estimating fair values are described in Note O to the financial statements. These fair values represent point-in-time estimates of value that might not be particularly

relevant in predicting GAFRI's future earnings or cash flows.

C. DISCONTINUED OPERATIONS

On June 2, 2006, GAFRI sold Chatham Bars Inn, a resort hotel located on Cape Cod, Massachusetts, for \$166 million, and recognized an after-tax gain of approximately \$31.6 million (\$0.66 per diluted share). GAFRI sold the Driskill Hotel in October 2005 for \$53 million, and recognized an after-tax gain of approximately \$10.7 million (\$0.22 per diluted share). The operating results and the gains on sales of these properties are included in discontinued operations in the Consolidated Income Statement. Balance Sheet amounts prior to the hotel sales have not been reclassified.

F-10

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

A summary of the hotel operations sold follows (in millions):

Operations:	<u>December 31,</u>		
	<u>2006</u>	<u>2005</u>	<u>2004</u>
Real estate revenues	\$3.9	\$37.3	\$38.4
Real estate expenses	<u>4.8</u>	<u>31.9</u>	<u>33.9</u>
Pre-tax earnings (loss)	(0.9)	5.4	4.5
Benefit (provision) for income taxes	<u>0.3</u>	<u>(1.8)</u>	<u>(1.6)</u>
))	
Net earnings (loss) from discontinued hotel operations	(<u>\$0.6</u>)	<u>\$ 3.6</u>	<u>\$ 2.9</u>

In January 2006, GAFRI sold Great American Life Assurance Company of Puerto Rico ("GA-PR") for \$37.5 million in cash. In connection with the sale, a \$7.9 million letter of credit was established to provide for potential liabilities. Prior to the sale, in December 2005, GA-PR reinsured approximately two-thirds of its in-force business with the buyer for \$60 million. During 2005, GA-PR paid dividends totaling \$100 million to GAFRI.

GA-PR's results are reflected as discontinued for all periods presented in the Consolidated Income Statement; Balance Sheet amounts have not been reclassified. The carrying amount of the major classes of GA-PR's assets and liabilities and a summary of the discontinued operations follow (in millions):

Assets:	<u>2005</u>	<u>2004</u>
---------	-------------	-------------

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Cash and investments	\$207.7	\$233.1
Unamortized insurance acquisition costs ("DPAC")	21.8	75.7
Liabilities:		
Insurance reserves	\$181.0	\$165.7
Equity excluding unrealized gains	\$ 39.4	\$121.0
Operations:		
Premiums	\$ 74.6	\$ 70.7
Investment income	11.5	11.2
Realized gains	4.7	0.3
Pre-tax earnings	\$ 13.1	\$ 15.5
Benefit (provision) for income taxes	<u>6.5</u>	<u>(1.0)</u>
)	
Net earnings from discontinued operations	<u>\$ 19.6</u>	<u>\$ 14.5</u>

The decrease in cash and investments in 2005 reflects the dividends paid by GA-PR to GAFRI. The decrease in DPAC in 2005 reflects the reinsurance transaction prior to the sale.

Included in net earnings from discontinued operations in 2005 is a deferred tax benefit of \$5.0 million related to the excess of tax basis over financial reporting basis of GAFRI's investment in GA-PR common stock; also included are certain expenses attributable to the sale and a pre-tax charge of \$2.0 million reflecting the difference between estimated sales price and GAFRI's financial reporting basis in GA-PR.

D. ACQUISITIONS

On August 7, 2006, GAFRI (parent) acquired all of the outstanding shares of Ceres Group, Inc. for approximately \$204 million in cash (excluding approximately \$8 million of direct transaction costs), using cash on hand and borrowings under its bank line of credit. Prior to the acquisition, Ceres (through its two primary insurance subsidiaries, Continental General Insurance Company ("CGIC") and Central Reserve Life Insurance Company ("CRLIC")) sold health and life insurance products through two primary business segments and had assets of approximately \$770 million at December 31, 2005. Its senior segment includes Medicare supplement and other senior health, life and annuity products for individuals age 55 and over. Its medical segment included major medical health insurance for individuals, families, associations and small businesses.

In connection with the acquisition, Ceres' insurance subsidiaries entered into a reinsurance agreement under which all of Ceres' medical business was ceded to an unaffiliated company. In addition, immediately prior to the completion of the acquisition, half of Ceres' in-force senior business was ceded to an unaffiliated company. Ceres' insurance subsidiaries received pre-tax ceding commissions totaling \$64 million in connection with the reinsurance transactions. Also prior to the acquisition, the insurance subsidiaries paid dividends totaling \$68 million to Ceres. Following the acquisition, Ceres distributed \$60 million to GAFRI. GAFRI used a portion of the distribution to repay all amounts borrowed under its bank line in connection with the acquisition. The operating results of Ceres are reflected in the accompanying financial statements since the date of acquisition.

GAFRI views this acquisition as (i) an effective use of its excess capital and (ii) a source of premium and earnings diversification. In addition, GAFRI believes the acquisition of Ceres strengthens its Medicare Supplement operations by placing GAFRI in the top 10 in the U.S. in terms of Medicare Supplement premiums and by broadening its distribution capabilities through Ceres' captive agency force; these factors contributed to the goodwill created in this acquisition. None of the goodwill is deductible for income tax purposes.

The acquisition has been accounted for using the purchase method of accounting in accordance with SFAS No. 141, "Business Combinations". The following table presents the preliminary allocations of the aggregate purchase price for the Ceres acquisition based on their estimated fair values. Such amounts are subject to change upon finalizing valuations.

The following table summarizes the estimated fair values of assets acquired and liabilities assumed at the date of acquisition (in millions):

Cash paid to Ceres shareholders	\$204.4
Direct acquisition costs (paid by Ceres)	7.7
Direct acquisition costs (paid by GAFRI)	<u>0.5</u>
Total purchase price (including direct acquisition costs)	<u>\$212.6</u>
Allocation of purchase price:	
Cash and investments	\$347.5
Present value of future profits acquired ("PVFP")	60.8
Reinsurance recoverable	413.7
Goodwill	7.5
Other assets	54.3
Insurance liabilities	(619.2)
Other liabilities	<u>(52.0)</u>
Total purchase price (including direct acquisition costs)	<u>\$212.6</u>

Pro forma results of operations for the year ended December 31, 2006, assuming the acquisition of Ceres had taken place at the beginning of 2006, would not differ significantly from actual reported results.

In January 2006, GAFRI acquired, through a reinsurance transaction, the fixed annuity block written by Old Standard Life Insurance Company. See Note N to the Financial Statements. As part of the assets received in the reinsurance transaction, GAFRI also acquired the stock of Old West Annuity and Life Insurance Company. In total, the transaction resulted in an increase of approximately \$280 million in both annuity benefits accumulated and cash and investments, including a payment (negative ceding commission) from the seller of approximately \$9 million.

In 2004, GAFRI acquired the fixed annuity block of business of National Health Insurance Company ("NHIC"). See Note N to the Financial Statements. At the date of acquisition, the block consisted of approximately 33,000 policies with GAAP reserves of approximately \$765 million.

F-12

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

E. SEGMENTS OF OPERATIONS

GAFRI manages its business as four segments: (i) annuity operations; (ii) supplemental insurance; (iii) life operations; and (iv) corporate and other, which includes holding company assets and costs as well as interest and other debt expenses.

Revenue from GAFRI's annuity operations consist primarily of investment income as well as operating revenues from its real estate investments. GAFRI's annuity products are sold through independent agents primarily to employees of primary and secondary educational institutions and in the non-qualified markets. GAFRI is engaged in a variety of real estate operations including hotels and marinas.

GAFRI's supplemental insurance businesses (United Teacher Associates Insurance Company ("UTA"), Loyal American Life Insurance Company, CGIC and CRLIC) primarily offer a variety of Medicare supplement and limited benefit policies to supplement primary health insurance and other insurance coverage. These products are offered through independent agents and, to a lesser extent, captive agents.

Traditional term and universal life insurance products had been marketed through national marketing organizations. In 2004, GAFRI suspended new sales of these life insurance products due to inadequate volume and returns. The Company continues to service its in-force block of these policies.

"Corporate and other" consists primarily of GAFRI (parent) and AAG Holding (intermediate holding company) and includes interest expense.

* Less than \$50 thousand.

At December 31, 2006, gross unrealized losses in the 2006 table above relate to 764 securities with no single unrealized loss in excess of \$1.4 million. Investment grade securities (as determined by nationally recognized rating

agencies) represented about 95% and 96% of the total unrealized loss and fair value, respectively. Of the mortgage-backed securities, more than 98% of the unrealized loss relates to AAA rated securities. Management believes that GAFRI will recover its cost basis in the securities having unrealized losses at December 31, 2006. GAFRI has the ability and intent to hold such securities until they fully recover or mature.

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

The table below sets forth the scheduled maturities of GAFRI's fixed maturity investments as of December 31, 2006. Asset-backed securities and other securities with sinking funds are reported at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers. The average maturity of GAFRI's fixed maturity investments was approximately seven and one-half years at December 31, 2006. Mortgage-backed securities had an average life of approximately seven years at December 31, 2006.

<u>Maturity</u>	<u>Amortized Cost</u>	<u>Fair Value</u>	
		<u>Amount</u>	<u>%</u>
One year or less	\$ 313.4	\$ 314.3	3%

	<u>\$9,104.3</u>	<u>\$9,120.5</u>	<u>100</u>

%

Certain risks are inherent in connection with fixed maturity securities, including loss upon default, price volatility in reaction to changes in interest rates, and general market factors and risks associated with reinvestment of proceeds due to prepayments or redemptions in a period of declining interest rates.

At December 31, 2006, GAFRI had no single investment in excess of 10% of stockholders' equity except for certain investments guaranteed by the U.S. Government or government agencies.

Realized gains (losses) and changes in unrealized appreciation (depreciation) on fixed maturity, equity security and other investments are summarized as follows (in millions):

Unrealized Gains on Marketable Securities, Net

In addition to adjusting securities considered available-for-sale to fair value, SFAS 115, "Accounting for Certain Investments in Debt and Equity Securities," requires that certain other balance sheet amounts be adjusted to the extent that unrealized gains and losses from securities would result in adjustments had these gains or losses actually been realized. The following table shows the components of the unrealized gain (loss) on marketable securities (included in accumulated other comprehensive income on the Balance Sheet) and its effect on various balance sheet captions (in millions).

	Unadjusted Asset (Liability)	Effect of SFAS 115	Adjusted Asset (Liability)
<u>2006</u>			
Fixed maturities	\$9,104.3	\$ 16.2	\$9,120.5

Unrealized gains \$ 61.2

Real Estate

A portion of GAFRI's investment portfolio has historically been comprised of certain real estate investments. These real estate investments are generally acquired with the intention of owning and operating them for a long-term holding period. The table below summarizes the real estate investments in GAFRI's portfolio at December 31, 2006.

<u>Property</u>	<u>Description</u>
Sailfish Marina - Palm Beach Shores, FL	Marina, Hotel and Restaurant
Mountain View Grand - Whitefield, NH (65% owned)*	Resort Hotel
Charleston Harbor Resort - Charleston, SC (50% owned)*	Marina and Hotel
Bay Bridge Marina - Chesapeake Bay, MD (65% owned)*	Marina
Skipjack Marina - Georgetown, MD	Marina
Undeveloped land - Mount Dora, FL	4.3 Acres
Undeveloped land - Mason, OH	6.1 Acres

* The remaining interests in these properties are owned by a subsidiary of AFG.

In total, these real estate investments had a carrying value at December 31, 2006 of approximately \$78 million (net of \$10 million of accumulated depreciation) and operating cash flows of approximately \$10.4 million in 2006. At December 31, 2005, real estate investments had a carrying value of approximately \$118 million (net of \$27 million of accumulated depreciation) and operating cash flows of approximately \$15.8 million in 2005.

In June 2006, GAFRI completed the sale of the Chatham Bars Inn on Cape Cod, Massachusetts for \$166 million and recorded an after-tax gain of approximately \$31.6 million. Included in mortgage loans at December 31, 2006 is an \$86 million mortgage loan issued in connection with the sale of Chatham Bars Inn.

F-17

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

In October 2005, GAFRI completed the sale of the Driskill Hotel in Austin, Texas for \$53 million and recorded an after-tax gain of approximately \$10.7 million.

From time-to-time, GAFRI may decide to sell or market for sale selected real estate investments. These decisions are based on factors impacting the operations and value of specific properties or real estate investments in general. No assurance can be given as to the outcome of any marketing of these investments, including the sales price. GAFRI may decide to purchase and/or sell additional real estate investments in the future.

Major categories of net investment income were as follows (in millions):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Fixed maturities*	\$598.6	\$556.9	\$521.0
Other	<u>7.4</u>	<u>6.0</u>	<u>5.9</u>
Total investment income	606.0	562.9	526.9
Investment expenses	<u>(4.9)</u>	<u>(5.7)</u>	<u>(3.3)</u>
Net investment income	<u>\$601.1</u>	<u>\$557.2</u>	<u>\$523.6</u>

* Includes income on fixed maturities, mortgage loans, policy loans and short-term investments.

GAFRI's investment portfolio is managed by a subsidiary of AFG. Investment expenses included investment management charges from this subsidiary amounting to \$3.9 million in 2006, \$4.9 million in 2005 and \$3.9 million in 2004.

G. GOODWILL

In the fourth quarter of 2006, GAFRI completed its annual impairment test which resulted in a goodwill impairment charge of \$4.2 million related to an insurance agency subsidiary in the fixed annuity segment. A review for impairment was prompted by a decrease in estimated future earnings from this agency, based on a reduction in forecasted revenues. Fair value of the agency was estimated using the present value of expected future cash flows.

Changes in the carrying value of goodwill during 2005 and 2006, by reporting segment, are presented in the following table (in millions):

	Fixed <u>Annuity</u>	Supplemental <u>Insurance</u>	<u>Total</u>
Balance at January 1, 2005	\$ 9.6	\$4.4	\$14.0
Additional goodwill	<u>1.0</u>	<u>-</u>	<u>1.0</u>
(a) Balance at December 31, 2005	10.6	4.4	15.0
Goodwill from acquisitions	-	5.3(b)	5.3
Goodwill impairment in 2006	(4.2)(c)	-	(4.2)
Other	<u>(0.2)</u>	<u>-</u>	<u>(0.2)</u>

Balance at December 31, 2006)	<u>\$ 6.2</u>)	<u>\$15.9</u>
------------------------------	---	---------------	---	---------------

-
- a. Subsidiary purchase accounting adjustment.
b. Relates primarily to the purchase of Ceres in August 2006.
c. Relates to insurance agency subsidiary.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

H. UNAMORTIZED INSURANCE ACQUISITION COSTS

Unamortized insurance acquisition costs consisted of the following at December 31 (in millions):

	<u>2006</u>	<u>2005</u>
Deferred policy acquisition costs ("DPAC")	\$742.9	\$726.1
Policyholder sales inducements	109.4	73.0
Unrealized DPAC adjustment	(1.2)	(17.3)
Present value of future profits acquired ("PVFP")	<u>95.0</u>	<u>54.1</u>
	<u>\$946.1</u>	<u>\$835.9</u>

The unrealized DPAC adjustment reflects the change in DPAC assuming the unrealized gains on securities had actually been realized (see Note B to the Financial Statements).

During 2006, 2005 and 2004, the Company capitalized \$52.9 million, \$18.7 million and \$9.6 million relating to sales inducements offered to annuity policyholders and amortized \$16.5 million, \$9.3 million and \$7.7 million, respectively.

A progression of GAFRI's present value of future profits acquired is as follows (in millions):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Beginning PVFP balance	\$ 54.1	\$ 72.7	\$ 57.9
Net additions	64.8	0.8	22.2
Reduction due to reinsurance	(14.9)	(9.9)	-

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Interest accrued	3.0	3.7	3.5
Amortization	(12.0)	(11.5)	(9.2)
Amortization - GA-PR (discontinued operations)	-	(1.5)	(1.7)
Other	<u>-</u>	<u>(0.2)</u>	<u>-</u>
)		
Ending PVFP Balance	<u>\$95.0</u>	<u>\$ 54.1</u>	<u>\$ 72.7</u>
PVFP gross (original) carrying amount	\$165.5	\$136.6	\$145.9
Accumulated amortization, net of interest accrued	(70.5)	(61.5)	(53.7)
Accumulated amortization (discontinued operations)	<u>-</u>	<u>(21.0)</u>	<u>(19.5)</u>
))	
Total PVFP	<u>\$ 95.0</u>	<u>\$ 54.1</u>	<u>\$ 72.7</u>

The interest accrual rates used for PVFP range from 4% to 6%. During each of the next five years, the PVFP is expected to decrease at a rate of approximately one-eighth of the balance at the beginning of each respective year.

I. LONG-TERM DEBT

Long-term debt consisted of the following at December 31, (in millions):

	<u>2006</u>	<u>2005</u>
Direct obligations of GAFRI	\$ 0.8	\$ 1.0
Obligations of AAG Holding (guaranteed by GAFRI):		
7-1/2% Senior Debentures due 2033	112.5	112.5
6-7/8% Senior Notes due 2008	31.5	100.0
7-1/4% Senior Debentures due 2034	<u>86.3</u>	<u>86.3</u>
	<u>231.1</u>	<u>299.8</u>
Payable to Subsidiary Trusts:		
AAG Holding 8-7/8% Subordinated Debentures due 2027*	22.0	22.0
AAG Holding 7.35% Subordinated Debentures due 2033	<u>20.0</u>	<u>20.0</u>

<u>42.0</u>	<u>42.0</u>
<u>\$273.1</u>	<u>\$341.8</u>

* Called for redemption in 2007 (see Note Q to the Financial Statements).

To achieve its desired balance between fixed and variable rate debt, GAFRI entered into interest rate swaps, which effectively convert its 6-7/8% Senior Notes to a floating rate of 3-month LIBOR plus 2.9% (effective rate of approximately 8.3% and 7.4% at December 31, 2006 and 2005, respectively).

F-19

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

In 2006, GAFRI repurchased \$68.5 million principal amount of its 6-7/8% Senior Notes for \$70.8 million in cash. In connection with the repurchase, GAFRI paid an additional \$2.0 million to effectively terminate the portion of the interest rate swap that covered the repurchased debt; the cost to terminate the portion of the swap is included in the loss on retirement of debt in the Consolidated Income Statement.

In March 2006, the Company replaced its existing \$165 million bank credit agreement with a \$500 million five-year revolving credit facility shared with AFG. Under terms of the agreement, GAFRI may borrow up to \$175 million with the ability to borrow up to \$200 million, conditioned on AFG not borrowing in excess of \$300 million. AFG has agreed with GAFRI not to borrow more than \$325 million under the credit facility and has agreed to guarantee amounts borrowed by GAFRI. Amounts borrowed bear interest at rates ranging from 0.5% to 1.25% over LIBOR based on AFG's credit rating. No amounts were borrowed under these agreements at December 31, 2006 or December 31, 2005.

At December 31, 2006, GAFRI had virtually no scheduled principal payments on debt for the next five years other than AAG Holding's Senior Notes due in 2008. See Note Q to the Financial Statements for information regarding the redemption of the Company's 8-7/8% trust preferred securities.

Cash interest payments, net of swap interest received, were \$21.1 million, \$26.7 million, and \$27.4 million in 2006, 2005 and 2004, respectively.

J. STOCKHOLDERS' EQUITY

GAFRI's dividend paying capability is limited by certain customary debt covenants to amounts based on cumulative earnings and losses, debt ratios and other items.

At December 31, 2006, there were 6.2 million shares of GAFRI Common Stock reserved for issuance under GAFRI's stock option plans. Options are granted with an exercise price equal to the market price of GAFRI Common Stock at the date of grant. Options generally become exercisable at the rate of 20% per year commencing one year after grant and generally expire ten years after the date of grant. Data for stock options issued under GAFRI's stock option plans is presented below:

	<u>Shares</u>	<u>Average Exercise Price</u>	<u>Average Remaining Contractual Term</u>	<u>Average Intrinsic Value (in millions)</u>
Outstanding at January 1, 2006	3,371,755	\$17.12		
Granted	660,441	\$19.54		
Exercised	(577,014)	\$17.19		
Forfeited/Cancelled	<u>(95,726)</u>	\$19.26		
)			
Outstanding at December 31, 2006	<u>3,359,456</u>	\$17.52	6.0 years	\$18.7
Options exercisable at December 31, 2006	<u>1,935,988</u>	\$17.64	4.6 years	\$10.6
Options available for grant at December 31, 2006	<u>2,810,347</u>			

The total intrinsic value of options exercised during 2006, 2005 and 2004 was \$2.8 million, \$4.8 million and \$0.3 million, respectively. During 2006, GAFRI received \$4.7 million from the exercise of stock options. The total tax benefit realized from the exercises was \$0.5 million.

GAFRI uses the Black-Scholes option-pricing model to calculate the "fair value" of its option grants. GAFRI began using the SEC's simplified method of calculating expected term with its 2006 grants. The fair value of options granted in 2006, 2005 and 2004 was \$6.38 per share, \$5.28 per share and \$4.63 per share, respectively, based on the following assumptions: dividend yield of less than 1%; expected volatility of 20% (due to limited trading volume of GAFRI's common stock, implied volatility of a peer group's publicly traded options was used); risk-free interest rate of 4.6% in 2006, 4.3% in 2005 and 3.7% in 2004; and expected option life of 6.5 years for 2006 and 7.5 years for 2005 and 2004.

F-20

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

GAFRI's total stock compensation expense for 2006 was \$2.2 million. Related tax benefits totaled \$0.4 million for the year. As of December 31, 2006, there was a total of \$5.6 million of total unrecognized compensation expense related to nonvested stock options granted under GAFRI's plan. That cost is expected to be recognized over a weighted average of 3.3 years.

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

The following table illustrates the effect on net income (in millions) and earnings per share for the years ended 2005 and 2004, had compensation cost been recognized and determined based on the "fair values" at grant dates consistent with the methods used beginning in 2006.

	<u>2005</u>	<u>2004</u>
Net income, as reported	\$69.9	\$101.8
Pro forma stock option expense, net of tax	<u>(2.2)</u>	<u>(2.3)</u>
))
Adjusted net income	<u>\$67.7</u>	<u>\$99.5</u>
Earnings per share (as reported):		
Basic	\$1.48	\$2.16
Diluted	\$1.47	\$2.15
Earning per share (adjusted):		
Basic	\$1.44	\$2.11
Diluted	\$1.42	\$2.10

The Company is authorized to issue 25,000,000 shares of Preferred Stock, par value \$1.00 per share.

Comprehensive income is defined as all changes in Stockholders' Equity except those arising from transactions with shareholders. Comprehensive income includes net income and other comprehensive income, which consists of changes in net unrealized gains or losses on available for sale securities. The components of accumulated other comprehensive income (loss) were as follows (in millions):

	<u>2006</u>			<u>2005</u>			<u>2004</u>		
	<u>Pre-tax</u>	<u>Taxes</u>	<u>Net</u>	<u>Pre-tax</u>	<u>Taxes</u>	<u>Net</u>	<u>Pre-tax</u>	<u>Taxes</u>	<u>Net</u>

Amounts applicable to accounting change	<u>-</u>	<u>-</u>	<u>1.2</u>
Provision for income tax as shown in Consolidated Income Statement	<u>\$ 35.7</u>	<u>\$18.2</u>	<u>\$46.1</u>

(a)\$46.9 million current and (\$11.2) million deferred.

At December 31, 2006, GAFRI had net operating loss carryforwards ("NOL") for federal income tax purposes of approximately \$9.6 million, which are scheduled to expire primarily in 2021. In addition, GAFRI had net capital loss carryforwards for federal income tax purposes of approximately \$2.7 million, which are scheduled to expire in 2008.

The significant components of deferred tax assets and liabilities, excluding the effects of unrealized gains and losses on marketable securities, included in the Consolidated Balance Sheet were as follows (in millions):

	<u>December 31,</u>	
	<u>2006</u>	<u>2005</u>
Deferred tax assets:		
Net operating/capital loss carryforwards	\$ 4.3	\$ 1.6
Valuation Allowance	(3.3)	-
Investment securities	16.8	26.2
Policyholder liabilities	121.6	73.5
Unearned revenue	36.3	41.8
Other	15.6	23.0
Deferred tax liabilities:		
Unamortized insurance acquisition costs	(263.1)	(248.6)

The American Jobs Creation Act of 2004 ("American Jobs Creation Act") allowed a deduction of 85% of repatriated qualified foreign earnings received as dividends in 2005. GAFRI's subsidiaries paid dividends of \$91.8 million that qualified for this special tax treatment. As a result of deferred taxes previously accrued on these earnings, GAFRI only had to record additional income tax expense of \$0.8 million in 2005 as a result of the payments of these dividends. Cash tax allocation payments, net of reimbursements, to AFG were \$30 million, \$24 million and \$18 million in 2006, 2005 and 2004, respectively.

The increase in the valuation allowance in 2006 relates to the net operating loss carryforward of an acquired subsidiary.

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

The likelihood of realizing this asset (due to certain Internal Revenue Code limitations) will be reviewed periodically; any adjustments required to the valuation allowance will be made in the period when the developments on which they are based become known.

L. LEASES

Future minimum lease payments, net of sublease revenues, under operating leases having initial or remaining non-cancelable lease terms in excess of one year at December 31, 2006 are payable as follows: 2007 - \$4.6 million; 2008 - \$4.9 million; 2009 - \$4.8 million; 2010 - \$4.7 million; 2011 - \$4.8 million; 2012 and beyond- \$9.6 million.

Rental expense for operating leases, net of sublease revenues, was \$3.6 million, \$5.2 million and \$7.4 million in 2006, 2005 and 2004, respectively.

M. CONTINGENCIES

The Company's balance sheet includes a liability of approximately \$13.4 million at December 31, 2006 and \$15 million at December 31, 2005 for the estimated future costs of environmental clean-up activities at certain sites from the Company's former manufacturing operations as well as third-party sites. The Company performs an in-depth review of this reserve on an annual basis as well as more limited reviews on a quarterly basis. For the annual review, the Company receives written reports from consultants responsible for each of the sites, which provide a range of estimated future costs. These reports are then used as a starting point to arrive at management's best estimate of the total future costs. On a quarterly basis, Company personnel review information on each of the involved sites to determine whether any events have occurred that have caused information on the estimated future costs to be materially different than those estimated at the prior year-end. Variances can be caused by changes in the extent of the environmental problem or the costs of remediation. From year-to-year, estimates of future costs have varied as more complete knowledge of the extent of clean-up costs have been obtained.

The Company's results of operations included charges to increase environmental reserves by \$9.5 million in 2005 and \$2.0 million in 2004.

Federal and state laws and regulations, including the Federal Comprehensive Environmental Response, Compensation, and Liability Act and similar state laws, impose liability on the Company, as the successor to Sprague Technologies, Inc., for the investigation and clean-up of hazardous substances disposed of or spilled by its former manufacturing operations at facilities still owned by the Company, and facilities transferred in connection with the sales of certain operations, as well as at disposal sites operated by third parties. In addition, the Company has indemnified the purchasers of its former operations for the cost of such activities. At several sites, the Company is conducting clean-up activities of soil and ground water contamination in accordance with consent agreements between the Company and state environmental agencies. At one site, the Company is performing a remedial investigation feasibility study under an administrative order by consent with federal regulators. The Company has also conducted or is aware of investigations at a number of other locations of its former operations that have disclosed environmental contamination that could cause the Company to incur additional investigative, remedial and legal costs. The Company has also been identified by state and federal regulators as a potentially responsible party at a number of other disposal sites.

Based on the consultants review, the Company believes the remaining cost of environmental work at all sites to range from a low estimate of \$7.6 million to a high estimate of \$43.3 million. A significant portion of the known costs are associated with long-term remediation and monitoring. Management believes that reserves recorded are sufficient in

all material respects to satisfy the known liabilities and that the ultimate cost will not, individually, or in the aggregate, have a material adverse effect on the financial condition or results of operations of GAFRI. However, the regulatory standards for clean-up are continually evolving and may impose more stringent requirements. In addition, many of the environmental investigations at the Company's former operating locations and third-party sites are still preliminary and, where clean-up plans have been proposed, they have not yet received full approval from the relevant regulatory agencies.

F-23

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

Further, the presence of Company-generated wastes at third-party disposal sites exposes the Company to joint and several liability for the potential additional costs of cleaning up wastes generated by others. Accordingly, there can be no assurance that the costs of environmental clean-up for the Company may not be significantly higher in future years, possibly necessitating additional charges.

There are certain other claims involving the Company, including claims relating to the generation, disposal or release into the environment of allegedly hazardous substances. In management's opinion, the outcomes of these claims will not, individually or in the aggregate, have a material adverse effect on the Company's financial condition.

N. STATUTORY INFORMATION; RESTRICTIONS ON TRANSFERS OF FUNDS AND ASSETS OF SUBSIDIARIES

Insurance companies are required to file financial statements with state insurance regulatory authorities prepared on an accounting basis prescribed or permitted by such authorities (statutory basis). Certain statutory amounts for GALIC, GAFRI's primary insurance subsidiary, were as follows (in millions):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Capital and surplus*	\$643.8	\$638.0	\$577.9
Asset valuation reserve (AVR)	88.3	84.6	69.9
Interest maintenance reserve	-	10.1	19.0
Pre-tax income from operations	\$ 83.3	\$149.8	\$ 90.5
Net income	120.9	147.8	81.0

* Does not include approximately \$90 million of capital and surplus and AVR of Ceres' insurance subsidiaries.

Dividends that can be paid by GAFRI's insurance subsidiaries without prior approval of regulatory authorities are subject to restrictions relating to capital and surplus and statutory net income. Based on these restrictions, GALIC and Ceres subsidiaries may pay dividends of \$121 million and \$19 million, respectively, in 2006 without prior approval. In 2006, GALIC paid \$147.7 million in dividends.

For statutory purposes, the acquisitions of the fixed annuity block of business of Old Standard and NHIC were recorded as reinsurance transactions under which GAFRI was paid negative ceding commissions of \$9 million and \$38 million, respectively, to assume the blocks of business.

Securities owned by insurance subsidiaries having a carrying value of \$70 million at December 31, 2006 were on deposit as required by regulatory authorities.

O. ADDITIONAL INFORMATION

Related Party Transactions

In order to take advantage of operational efficiencies, GAFRI shares certain information technology services with AFG. GAFRI paid approximately \$2 million, \$3 million and \$2 million in 2006, 2005 and 2004, respectively, to AFG for these services.

Fair Value of Financial Instruments

The following table shows the carrying value and estimated fair value of GAFRI's financial instruments at December 31 (in millions):

	2006		2005	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
<u>Assets</u>				
Fixed maturity investments	\$9,396.9	\$9,396.9	\$9,202.0	\$9,202.0
Equity securities	238.4	238.4	191.4	191.4
<u>Liabilities</u>				
Annuity benefits accumulated	\$9,456.7	\$8,969.0	\$8,417.3	\$8,059.8
Long term debt	273.1	279.9	341.8	350.0
Stockholders' equity	\$1,074.0	\$1,096.5	\$1,006.7	\$ 937.6

F-24

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

Fair values are based on prices quoted in the most active market for each security. If quoted prices are not available, fair value is estimated based on discounted cash flow models, fair value of comparable securities or similar methods. The fair value of the liability for annuities in the payout phase is assumed to be the present value of the anticipated cash flows, discounted at current interest rates. Fair value of annuities in the accumulation phase is assumed to be the policyholders' cash surrender amount. Fair value of stockholders' equity is based on the quoted market price of GAFRI's Common Stock.

Pension Plan

The Company has a defined benefit pension plan (the "Plan") covering former U.S. employees of its discontinued manufacturing operations. Amounts included in GAFRI's financial statements related to the Plan are immaterial. Pension benefits are based upon past service with the Company and compensation levels. Contributions are made by the Company in amounts necessary to satisfy requirements of the Employee Retirement Income Security Act.

Fixed Annuities

At December 31, 2006, GAFRI had a liability for EDAR of approximately \$200 million to cover the excess benefits above the lower-tier value. The net amount at risk associated with these benefits was approximately \$440 million and the weighted average attained age of contract holders was 63 years old at December 31, 2006. During 2006, GAFRI expensed \$24.0 million for excess death and annuitization benefits, which is included in "Annuity benefits" on the Consolidated Income Statement and paid \$28.7 million associated with those benefits.

Variable Annuities

At December 31, 2006, the aggregate guaranteed minimum death benefit value (assuming every variable annuity policyholder died on those dates) exceeded the fair value of the underlying variable annuities by \$59 million, compared to \$83 million at December 31, 2005. This benefit is on all of GAFRI's variable annuity policies. Death benefits paid in excess of the variable annuity account balances were \$0.4 million, \$0.8 million and \$1.3 million for 2006, 2005 and 2004, respectively. The weighted average age of these policyholders was 50 years old at December 31, 2006.

Accident and Health Reserves

The following table provides an analysis of changes in the liability for unpaid claims included in GAFRI's accident and health reserves over the past three years on a GAAP basis (in millions):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Gross balance at beginning of period	\$102.9	\$100.6	\$102.0
Reserves on business acquired or sold, net	<u>101.3</u>	<u>30.2</u>	<u>-</u>
Adjusted gross balance	204.2	130.8	102.0
Less: reserves ceded (including business acquired)	<u>(94.9)</u>	<u>(54.6)</u>	<u>(45.5)</u>
)))
Adjusted net balance	109.3	76.2	56.5
Provision for benefits occurring in the current year, net of reinsurance	187.1	165.9	151.1
Decrease in provision for benefits of prior year, net of reinsurance (a)	<u>(3.9)</u>	<u>(5.1)</u>	<u>(9.2)</u>
)))

Edgar Filing: GREAT AMERICAN FINANCIAL RESOURCES INC - Form 10-K

Total benefits incurred	183.2	160.8	141.9
Payments for losses, net of reinsurance			
Current Year	(135.0)	(116.3)	(113.5)
Prior Year	<u>(52.7)</u>	<u>(35.5)</u>	<u>(38.9)</u>
)))
Total payments	(187.7)	(151.8)	(152.4)
Net balance at end of period	104.8	85.2	46.0
Plus: reserves ceded	<u>87.4</u>	<u>17.7</u>	<u>54.6</u>
Gross unpaid accident and health claims included in life, accident, and health reserves in the Balance Sheet	<u>\$192.2</u>	<u>\$102.9</u>	<u>\$100.6</u>

a. The decrease in provision for benefits of prior years is primarily due to better claims development than anticipated.

F-25

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

Reinsurance

The Company has reinsured approximately \$23 billion in face amount of life insurance, excluding GA-PR, as of December 31, 2006 and 2005 respectively. Life premiums ceded, excluding GA-PR, were \$65 million, \$68 million and \$86 million for 2006, 2005 and 2004, respectively.

Condensed Consolidating Information

GAFRI has guaranteed all of the outstanding debt of AAG Holding and the preferred securities of the Trusts. Condensed consolidating financial statements for GAFRI are as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

P. QUARTERLY FINANCIAL DATA (Unaudited)

Quarterly results necessarily rely heavily on estimates. These estimates and certain other factors, such as the seasonal nature of the Company's hotel operations and the discretionary sales of assets, cause the quarterly results not to be necessarily indicative of results for longer periods of time. The quarterly results also include certain significant items as discussed in Item 7 - "Results of Operations." The following table represents quarterly results of operations for the years ended December 31, 2006 and 2005 (in millions, except per share data).

<u>2006</u>	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>	<u>Total Year</u>
Realized gains (losses)	\$ 0.4	(\$ 9.3)	(\$ 3.0)	(\$ 1.7)	(\$ 13.6)
Total revenues	249.4	237.6	271.8	285.2	1,044.0

GREAT AMERICAN FINANCIAL RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - Continued

Q. SUBSEQUENT EVENTS (Unaudited)

On January 25, 2007 GAFRI announced that it had called for redemption of all of its 8-7/8% trust preferred securities. The preferred securities will be redeemed on March 1, 2007 at a price of \$1,055.74, which includes accrued and unpaid dividends of \$11.34 per security. There are currently \$75 million principal amount outstanding, including approximately \$53 million owned by the Company and one of its subsidiaries. The Company expects to record a pre-tax charge of approximately \$1 million on this transaction. The funds for this redemption will come from amounts borrowed under the Company's bank credit agreement.

On February 22, 2007, AFG proposed a merger transaction that would increase its ownership of GAFRI to 100%. Under the proposed merger transaction, GAFRI will acquire for cash all of the outstanding shares not currently held by AFG at a price of \$23.50 per share for an aggregate amount of approximately \$215 million. The GAFRI Board of Directors has formed a special committee comprised of independent directors for the purpose of considering the proposal from AFG. The special committee will review and evaluate AFG's offer and make a recommendation to the GAFRI board.

F-33

PART III

The information required by the following Items will be included in GAFRI's definitive Proxy Statement for the 2007 Annual Meeting of Stockholders which will be filed with the Securities and Exchange Commission within 120 days of the Company's fiscal year-end and is herein incorporated by reference:

ITEM 10 Directors and Executive Officers of the Registrant and Corporate Governance

ITEM 11 Executive Compensation

ITEM 12 Security Ownership of Certain Beneficial Owners and Management and
Related Stockholder Matters

(See Item 5 "Market for Registrant's Common Equity and Related Stockholder Matters
and Issuer Purchases of Equity Securities")

ITEM 13 Certain Relationships and Related Transactions, and Director Independence

ITEM 14 Principal Accountant Fees and Services

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) Documents filed as part of this Report:

1. Financial Statements are Included in Part II, Item 8.

2. Financial Statement Schedules:

Selected Quarterly Financial Data is included in Note P to the Consolidated Financial
Statements.

Schedules filed herewith:

<u>For 2006, 2005 and 2004</u>	<u>Page</u>
II - Condensed Financial Information of Registrant	S-2
III - Supplementary Insurance Information	S-4

All other schedules for which provisions are made in the applicable regulation of the
Securities and Exchange Commission have been omitted as they are not applicable, not
required, or the information required thereby is set forth in the Financial Statements or the
notes thereto.
