# All or part of the security is held as collateral for options written. As of September 30, 2006, the value of securities held as collateral was \$20,831,354.

ADR □ American Depositary Receipt.

Security Valuation □ Securities traded on an exchange are valued at the last sales price on the primary exchange or market on which they are traded. Fixed income securities not listed on an exchange or security market are valued by independent pricing services based on bid prices which consider such factors as coupons, maturities, credit ratings, liquidity, specific terms and features, and the US Treasury yield curve or are valued by J. & W. Seligman & Co. Incorporated (the "Manager") based on quotations provided by primary market makers in such securities. Equity securities not listed on an exchange or security market, or equity securities for which there is no last sales price, are valued at the mean of the most recent bid and asked prices or are valued by the Manager based on quotations provided by primary market makers in such securities. Securities for which market quotations are not readily available (or are otherwise no longer valid or reliable) are valued at fair value determined in accordance with procedures approved by the Board of Directors. This can occur in the event of, among other things, natural disasters, acts of terrorism, market disruptions, intra-day trading halts, and extreme market volatility. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value or the price that may be realized upon the actual sale of the security. Short-term holdings maturing in more than 60 days are valued at current market quotations. Short-term holdings maturing in 60 days or less are valued at amortized cost.
