### FIRST TRUST/FIDAC MORTGAGE INCOME FUND JULY 31, 2005

#### 1. VALUATION AND INVESTMENT PRACTICES

##### A. PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of the First Trust/FIDAC Mortgage Income Fund (the "Fund") is computed based upon the value of the Fund's portfolio securities and other assets. The NAV is determined as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. The Fund calculates NAV per Common Share by subtracting the Fund's liabilities (including accrued expenses, dividends payable and all borrowings of the Fund) from the Fund's Managed Assets (the value of the securities and other investments the Fund holds plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of Common Shares outstanding.

The Fund's investments are valued daily at market value or, in the absence of market value with respect to any portfolio securities, at fair value according to procedures adopted by the Fund's Board of Trustees. Securities for which market quotations are readily available are valued at market value, which is currently determined using the last reported sale price or, if no sales are reported (as in the case of some securities traded over-the-counter), the last reported bid price, except that certain U.S. government securities are valued at the mean between the last reported bid and asked prices. The Fund will value Mortgage-Backed Securities ("MBS") and other debt securities not traded in an organized market on the basis of valuations provided by dealers or by an independent pricing service, approved by the Board of Trustees, which uses information with respect to transactions in such securities, quotations from dealers, market transactions for comparable securities, various relationships between securities and yield to maturity in determining value. Debt securities having a remaining maturity of sixty days or less when purchased and debt securities originally purchased with maturities in excess of sixty days but which currently have maturities of sixty days or less are valued at cost adjusted for amortization of premiums and accretion of discounts. In the event that market quotations are not readily available, the pricing service does not provide a valuation for a particular security, or the valuations are deemed unreliable, or if events occurring after the close of the principal markets for particular securities (e.g., domestic debt and foreign securities), but before the Fund values its assets, would materially affect NAV, First Trust Advisors L.P. ("First Trust") may use a fair value method to value the Fund's securities and investments. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Fund's Board of Trustees, and in accordance with the provisions of the Investment Company Act of 1940.

The Fund values exchange-traded options and other derivative contracts at the closing price on the exchange on which they are principally traded, or if not traded, or no closing price is available, at the mean between the last bid and

## Edgar Filing: FIRST TRUST/FIDAC MORTGAGE INCOME FUND - Form N-Q

asked prices.

### B. OPTION CONTRACTS:

COVERED CALL OPTIONS. The Fund may enter into hedging and strategic transactions to seek to reduce interest rate risk arising from any use of financial leverage by the Fund, to facilitate portfolio management and to mitigate risks, including interest rate and credit risks.

Options the Fund writes (sells) will either be exercised, expire or be cancelled pursuant to a closing transaction. If the price of the underlying security exceeds the option's exercise price, it is likely that the option holder will exercise the option. If an option written (sold) by the Fund is exercised, the Fund would be obligated to deliver the underlying security to the option holder upon payment of the exercise price. In this case, the option premium received by the Fund will be added to the amount realized on the sale of the security for purposes of determining gain or loss. If the price of the underlying security is less than the option's exercise price, the call option will likely expire without being exercised. The option premium will be treated as short-term capital gain on the expiration date of the option. The Fund may also elect to close out its position in an option prior to its expiration by purchasing an option of the same option series as the option written (sold) by the Fund.

These options give the option holder the right, but not the obligation, to purchase a security from the Fund at the strike price on or prior to the option's expiration date. The ability to successfully implement the Fund's investment strategy depends on the ability of Fixed Income Discount Advisory Company ("FIDAC" or the "Sub-Advisor") to predict pertinent market movements, which cannot be assured. Thus, the use of options may require the Fund to sell portfolio securities at inopportune times or for prices other than current market value, may limit the amount of appreciation the Fund can realize on an investment, or may cause the Fund to hold a security that it might otherwise sell. As the writer (seller) of a covered option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the option above the sum of the premium and the strike price of the option, but has retained the risk of loss should the price of the underlying security decline. The writer (seller) of an option has no control over the time when it may be required to fulfill its obligation as a writer (seller) of the option. Once an option writer (seller) has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

C. SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date; interest income is not accrued until settlement date. The Fund instructs the custodian to segregate assets of the Fund with a current value at least equal to the amount of its when-issued purchase commitments.

D. REVERSE REPURCHASE AGREEMENTS:

A reverse repurchase agreement, although structured as a sale and repurchase obligation, acts as a financing under which the Fund will effectively pledge its assets as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the reverse repurchase agreement, the Fund will be required to repay the loan and correspondingly receive back its collateral. While used as collateral, the assets continue to pay principal and interest which are for the benefit of the Fund.
