Explanation of Responses:

* If the form is filed by more than one reporting person, see Instruction 4(b)(v).

** Intentional misstatements or omissions of facts constitute Federal Criminal Violations. See 18 U.S.C. 1001 and 15 U.S.C. 78ff(a).

- (1) Purchase under issuer's director stock purchase plan.
- (2) Includes shares acquired through dividend reinvestment and through purchases in the issuer's employee stock purchase plan.
- (3) Includes shares held in an IRA account which were previously reported separately.

Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, see Instruction 6 for procedure. Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB number. imes New Roman">The increase in cost of revenues-services in 2006 compared with 2005 resulted mainly from an increase in cost of content services, such as fees to content providers. This increase was also affected by an increase in outbound roaming activity, resulting in an increase in payments to international cellular operators.

The increase in cost of revenues-equipment in 2007 resulted primarily from a larger amount of handsets sold during 2007, which was partially offset by increased efficiency in handset procurement, as well as a decline in the cost of accessories sold during 2007.

The increase in cost of revenues-equipment in 2006, compared with 2005, resulted mainly from an increase in the average handset cost due to a larger number of more expensive and advanced handsets sold.

The increase in gross profit in 2007 resulted mainly from increases in airtime usage, revenues from content and value added services and revenues from roaming services. These increases were partially offset by the reduction in interconnect tariffs, the regulation in relation to calls ending in voicemail and the ongoing airtime price erosion.

The improvement in gross profit in 2006, compared with 2005, was due primarily to higher airtime usage, an increase in roaming activity and an increase in content services. This improvement was partially offset by the increase in our subsidizing of the cost of handsets sold.

Selling and marketing expenses and general and administrative expenses

| | Year Ended December 31, | | | Change | |
|-------------------------------------|-------------------------|-------|-------|------------------|------------------|
| | 2005 | 2006 | 2007 | 2006 vs. 2005 | 2007 vs. 2006 |
| | (In NIS millions) | | | | |
| Selling and marketing expenses | 623 | 656 | 685 | 5.3% | 4.4% |
| General and administrative expenses | 656 | 659 | 652 | 0.5% | (1.1%) |
| Total | 1,279 | 1,315 | 1,337 | 2.8% | 1.7% |

The increase in selling and marketing expenses in 2007 was due mainly to an increase in payroll expenses resulting from the expansion of our services and sales teams, as part of our strategy to constantly improve service level and customer satisfaction and in preparation for the implementation of number portability. The increase also resulted from an increase in customer retention expenses and marketing efforts, which included, among other things, innovative marketing campaigns. As a result of the expanded marketing of innovative new plans with a guaranteed income during 2007, we are required to defer sales commissions related to acquisition and retention of subscribers with guaranteed revenues and to recognize such commissions as intangible assets, to be amortized over the expected life of such subscribers' guaranteed revenues. We commenced deferring these commissions in the fourth quarter of 2007. The deferred sales commissions in the fourth quarter of 2007 amounted to approximately NIS 19 million. The effect of deferral of sales commissions offsets in part the increase in other selling and marketing expenses in 2007.

Selling and marketing expenses increased in 2006 compared with 2005 as a result of investments in customer services and an increase in sales commissions as a result of higher handsets sales and expansion of our sale channels, which were partially offset by a decrease in our advertising expenses due to a reduced advertising budget in 2006 compared with 2005.

General and administrative expenses decreased in 2007 as a result of a decrease in bad debts and doubtful accounts expenses, in data processing expenses and in depreciation expenses. These decreases were partially offset by an increase in salaries expenses related to our share incentive plan and in professional services expenses, partially due to our becoming a publicly traded company.

General and administrative expenses remained steady in 2006 compared with 2005, primarily due to our streamlining measures, which started at the end of 2005 and included the elimination of over 18% of non-customer facing positions during 2006. In addition, there were decreases in insurance premiums and professional services expenses, which were offset by an increase in a specific provision for bad debts.

Financial and other income (expenses), net

| | Year Ended December 31, | | |
|----------------------------------|-------------------------|-------|-------|
| | 2005 | 2006 | 2007 |
| | (In NIS millions) | | |
| Financial income (expenses), net | 24 | (155) | (156) |
| Other income (expenses), net | *(13) | *(6) | (3) |

* Restated due to initial implementation of a new Israeli Accounting Standard No. 27 (see note 2.U.2 to our consolidated financial statements included elsewhere in this annual report).

Financial expenses remained steady in 2007, compared with 2006, resulting primarily from an increase in interest and CPI linkage expenses associated with our debentures, due to the increase in our outstanding indebtedness following the issuance of our new series of debentures in October 2007 and the increased inflation rate of 2.8% in 2007 compared with deflation of 0.3% in 2006. This increase was offset by an increase in income from our hedging portfolio, constituting mainly gains from our CPI hedging transactions, a decrease in interest expenses related to our credit facility and an increase in interest income on our short term deposits.

The increase in financial expenses in 2006, compared with 2005, was due primarily to increased interest expenses as a result of the increase in our outstanding indebtedness following the issuance of our debentures in late 2005 and the first half of 2006, as well as the credit facility with a syndicate of Israeli and international banks arranged by Citibank that we entered into during the first quarter of 2006, raising a total of approximately NIS 3.6 billion. See “— Liquidity and Capital Resources — Debt service — Credit facility from bank syndicate.”

Interest and CPI linkage expenses associated with the principal amount of the debentures, and interest expenses resulting from the credit facility with the bank syndicate led by Citibank incurred during 2007 and 2006 were approximately NIS 238 million and NIS 179 million, respectively.

Income tax

| | Year Ended December 31, | | | Change | |
|------------|-------------------------|-------|------|------------------|------------------|
| | 2005 | 2006 | 2007 | 2006 vs. 2005 | 2007 vs. 2006 |
| | (In NIS millions) | | | | |
| Income tax | * 234 | * 314 | 309 | 34.2% | (1.6%) |

* Restated due to initial implementation of a new Israeli Accounting Standard No. 27 (see note 2.U.2 to our consolidated financial statements included elsewhere in this annual report).

Income tax in 2007 decreased by 1.6%, compared with 2006, resulting from the release of the additional tax provision in the amount of approximately NIS 72 million, of which NIS 55.5 million was recorded in 2006, and from a reduced income tax rate of 29% in 2007 compared with 31% in 2006. This decrease was partially offset by the increase in income before tax.

The increase in income tax in 2006 compared with 2005 was primarily due to an additional tax provision of NIS 55.5 million following a decision of the Israeli Supreme Court in a case to which we were not a party. On November 20, 2006, the Israeli Supreme Court overturned a previous ruling made by the Israeli District Court regarding the deductibility for tax purposes of financing expenses that might be attributed by the Israeli tax authorities to the financing of dividends. Following this ruling, we recorded an additional tax provision of NIS 55.5 million in 2006, based on the possibility that part of our financing expenses accrued in 2006 will not be recognized as a deductible expense for tax purposes. While we believe that we had reasons justifying the recognition of these expenses, or part of them, for tax purposes, as of the date of the financial statements for the year ended December 31, 2006, the level of certainty required in order to recognize these expenses did not exist.

The increase in income tax in 2006 was also due to a higher income before income tax, which was partially offset due to a lower income tax rate of 31% in 2006 compared with 34% in 2005.

Net income

| | Year Ended December 31, | | | Change | |
|------------|-------------------------|-------|------|------------------|------------------|
| | 2005 | 2006 | 2007 | 2006 vs. 2005 | 2007 vs. 2006 |
| | (In NIS millions) | | | | |
| Net income | * 531 | * 559 | 873 | 5.3% | 56.2% |

* Restated due to initial implementation of a new Israeli Accounting Standard No. 27 (see note 2.U.2 to our consolidated financial statements included elsewhere in this annual report).

The increase in net income in 2007 was due primarily to an increase of 7.6% in revenues and an increase of only 2.6% in total operating expenses, leading to an increase of 35.4% in income before taxes. The increase also resulted from a decrease of 1.6% in income tax, due to the release of the tax provision recorded in 2006 and the reduction in income tax rate.

The increase in net income in 2006 compared with 2005, was due primarily to a significant increase in revenues, which was partially offset by the increase in income tax and a significant increase in financial expenses as a result of our new capital structure.

U.S. GAAP Results

For the years ended December 31, 2005, 2006 and 2007, our net income in accordance with Israeli GAAP was NIS 531 million, NIS 559 million and NIS 873 million compared with NIS 491 million, NIS 494 million and NIS 869 (on a combined basis), respectively under U.S. GAAP. Note 28 to our consolidated financial statements summarizes the principal differences between Israeli and U.S. GAAP that affect our financial results. Our net income is not significantly different under U.S. GAAP from the results under Israeli GAAP due to the offsetting impact of some of the differences. The principal differences affecting our results of operations is:

Push-down accounting. Under U.S. GAAP, DIC's acquisition of our shares is treated as a purchase that requires a revaluation of our assets and liabilities, leading to increased amortization expense of intangible assets, offset by decreased depreciation expense of tangible assets under U.S. GAAP. In addition, we were required to push down certain DIC debt and the interest expense relating to such debt incurred to finance the acquisition until it

was repaid in early 2006, leading to increased financial expense under U.S. GAAP. Push-down accounting had a significant impact on our balance sheet under U.S. GAAP.

B. LIQUIDITY AND CAPITAL RESOURCES

General

Our liquidity requirements relate primarily to working capital requirements, debt service, capital expenditures for the expansion and improvement of our networks and payment of dividends. Until the end of 2005, these requirements had been funded largely through funds generated from operations and bank borrowings. However, in late 2005 and the first half of 2006, we raised significant additional capital by issuing two series of debentures in the aggregate principal amount of approximately NIS 2.0 billion (\$520 million) and by establishing a credit facility of \$350 million (voluntarily prepaid in full and terminated in March 2008). Our Board, at the request of our shareholders, determined to incur such debt, and pay dividends in excess of the amount of such debt with available cash and proceeds of the borrowings, to increase the leverage in our capital structure and improve our shareholders' expected rate of return on our equity. In addition, in October 2007, we issued two new series of debentures to the public in Israel, for a total principal amount of approximately NIS 1,072 million and in February 2008 we issued, in a private placement, additional debentures of these two new series, for a total principal amount of approximately NIS 574.8 million.

We believe that our financial reserves will be sufficient to fund our anticipated cash needs for working capital, capital expenditures and debt service for at least the next 12 months. Our future capital requirements will depend on many factors, including our rate of revenue growth, the timing and extent of spending to support marketing and subscriber retention efforts, the expansion of sales and marketing activities and the timing of introductions of new products and enhancements to existing products.

In February 2006, our Board of Directors adopted a policy to distribute each year at least 75% of our annual net income as determined under Israeli GAAP, subject to compliance with applicable law, our license and contractual obligations and so long as the distribution would not be detrimental to our cash needs or to any plans approved by our Board of Directors. See "Item 8. Financial Information – A. Consolidated Statements and Other Financial Information – Dividend Policy." It is possible that our Board of Directors' estimate of our cash needs will be incorrect, or that events could occur that could increase our cash needs beyond anticipated. If that occurs, we may not have sufficient cash to cover these needs as a result of prior dividend payments, and we would need to identify additional sources of financing, which could include equity or debt financing. We may not be able to obtain such financing on acceptable terms or at all.

Dividend payments

During 2007, we distributed cash dividends in the aggregate amount of NIS 655 million (\$170 million) based on net income and existing retained earnings. During 2006, we distributed cash dividends in the aggregate amount of NIS 3.83 billion (\$996 million) based on retained earnings accumulated since our inception. We did not distribute any dividends prior to 2006.

Debt service

Public debentures

In December 2005 and January 2006, we issued two series of debentures to institutional and other investors in private placements. In May 2006, we issued additional debentures of the existing two series. The debentures are listed on the Tel Aviv Stock Exchange. The debentures consist of NIS 1.065 billion (\$277 million) aggregate principal amount of Series A Debentures and approximately NIS 925 million (\$241 million) aggregate principal amount of Series B Debentures. The Series A Debentures bear interest at the rate of 5.0% per year, linked to the Israeli CPI. The principal is payable in nine semiannual payments commencing in July 2008, and the interest is payable semiannually commencing in July 2006. The Series B Debentures bear interest at the rate of 5.3% per year, linked to the Israeli CPI. The principal is payable in five annual payments commencing in January 2013, and the interest is payable annually commencing in January 2007.

The Series A and B debentures are unsecured and do not restrict our ability to issue additional debentures of any class or distribute dividends in the future. The Series A and B debentures contain standard terms and obligations including restriction on our ability to create liens on our assets, other than fixed liens on assets provided in connection with financing the purchase of such assets.

In October 2007 we issued two new series of debentures (Series C and Series D) to the public in Israel. The debentures are listed for trading on the Tel Aviv Stock Exchange.

The new Series C and D Debentures were issued for a total principal amount of NIS 245 million and approximately NIS 827 million, respectively. The Series C principal is payable in nine equal semiannual payments on March 1 and September 1, for each of the years 2009 through 2012 (inclusive) and on March 1, 2013. The interest on Series C debentures will be paid semiannually on March 1 and on September 1, for each of the years 2008 through 2012 (inclusive) and on March 1, 2013. The Series D principal is payable in five equal annual payments on July 1, for each of the years 2013 through 2017 (inclusive). The interest on Series D debentures will be paid annually on July 1, for each of the years 2008 through 2017 (inclusive). Series C and D debentures bear an annual interest of 4.60% and 5.19%, respectively and are linked (principal and interest) to the Israeli CPI for August 2007.

In February 2008 we issued, in a private placement, additional debentures of Series C in a principal amount of NIS 81 million and additional Series D Debentures in a principal amount of approximately NIS 493.8 million.

The Series C and D debentures are unsecured and do not restrict our ability to issue additional debentures of any class or distribute dividends in the future. The Series C and D debentures contain standard terms and obligations.

Credit facility from bank syndicate

In March 2006, we entered into an unsecured syndicated facility agreement with a number of Israeli and international banks arranged by Citibank N.A. and Citibank International plc, which provided for a term loan of \$280 million and a revolving credit facility of up to \$70 million. In April 2006, we converted part of the dollar based loan into a shekel based loan. In November 2007 we voluntarily prepaid a principal amount of

approximately \$140 million (comprising of \$85 million denominated in US\$ and approximately NIS 253 million denominated in NIS), representing approximately 50% of the balance of the loan and in March 2008 we voluntarily prepaid the balance of the loan (approximately \$140 million, comprising of \$85 million denominated in US\$ and approximately NIS 253 million denominated in NIS) and terminated the facility. As at December 31, 2007, the balance of the loan totaled approximately NIS 580 million (\$85 million denominated in US\$ and NIS 253 million denominated in NIS) and the revolving credit facility was not used.

Other credit facilities

As of December 31, 2007, there were no other credit facilities outstanding.

Capital expenditures

Our accrual capital expenditure in 2005, 2006 and 2007 amounted to NIS 747 million, NIS 521 million and NIS 573 million, respectively. Accrual capital expenditure is defined as investment in fixed assets and intangible assets, such as spectrum licenses, during a given period. For the periods under review, a key focus of our capital investment has been the introduction of our 1800MHz GSM/GPRS/EDGE network and the build out of our UMTS/HSPA network.

Cash flows from operating activities

Cash flows from operating activities increased by 11.3% in 2007 to NIS 1,644 million from NIS 1,477 million in 2006, due primarily to the increase in operating income.

In 2006, our cash flows from operating activities increased by 16.0%, to NIS 1,477 from NIS 1,272 million in 2005, due primarily to the increase in operating income.

Cash flows from investing activities

The net cash flows from operating activities is the main capital resource for our investment activities. In 2005, 2006 and 2007, our net cash used in investing activities amounted to NIS 619 million, NIS 633 million and NIS 571 million, respectively. The payments were primarily for the expansion of the technological network and information systems infrastructures.

Cash flows from financing activities

In 2007, the net cash used in financing activities amounted to NIS 218 million compared with NIS 2,560 in 2006.

During 2007 we voluntarily prepaid NIS 645 million of long-term loans and received net amount of NIS 1,066 million from the issuance of two new series of debentures in October 2007. Furthermore, during 2007, we paid cash dividends in the amount of NIS 639 million (excluding withholding tax for the last dividend distribution, which was paid subsequent to balance sheet date

The net cash used in financing activities during 2006 amounted to NIS 2,560 million, compared with net cash provided by financing activities of NIS 1,114 million during 2005.

During 2006 we received long-term loans in the amount of NIS 1.6 billion under the credit facility and repaid NIS 0.4 billion during the fourth quarter of 2006, and NIS 250 million was received as the result of the issuance of additional debentures of the same series issued in December 2005 and January 2006. Furthermore, we paid cash dividends during 2006 in the amount of NIS 3.83 billion.

In 2005, net cash provided by financing activities amounted to NIS 1,114 million, which was generated by the issue of our debentures of NIS 1.7 billion and offset by a repayment of NIS 592 million of bank loans, including NIS 533 million for long-term loans and NIS 59 million for short-term loans.

During 2006 and 2007, the average outstanding amount of long-term liabilities (long-term loans and debentures) was NIS 3.2 billion.

During 2005, the monthly average outstanding amount of short-term credit was NIS 50 million. For the same period, the average outstanding amount of long-term loans was NIS 544 million.

Working capital

Our working capital as of December 31, 2007 was NIS 771 million, compared with working capital of NIS 237 million as of December 31, 2006. The increase in working capital is mainly the result of the increase in cash and cash-equivalents, resulting mainly from the issuance of our two new series of debentures in October 2007, which was partially offset by an increase in our short-term credit.

Our working capital as of December 31, 2006 was NIS 237 million, compared with working capital of NIS 1,909 million as of December 31, 2005. The decline in working capital was the result of the decline in cash and cash-equivalents, resulting from the payment of cash dividends to our shareholders during 2006.

Trade receivables

Trade receivables consist of outstanding amounts due from customers, mainly for cellular services and handsets and accessories, net of the allowance for doubtful accounts. Most of our handset sales are made on an installment basis (generally, 36 monthly payments). Installments due in the twelve months following the balance sheet date are included in current trade receivables; the remaining installments are included in long-term receivables. As of December 31, 2007, net trade receivables amounted to NIS 1,385 million compared to NIS 1,242 million as at December 31, 2006. This increase was primarily due to the increase in our revenues. The current maturity of long-term receivables as of December 31, 2007 was NIS 626 million.

C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

[Not applicable.]

D. TREND INFORMATION

Trend information is included throughout the other sections of this Item 5.

E. OFF-BALANCE SHEET ARRANGEMENTS

There are no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

F. TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

Set forth below is a description of our contractual cash obligations, in millions of NIS, as of December 31, 2007.

| | Total | 2008 | 2009- 2011 | 2012-2013 | 2014 and Beyond |
|---|--------------|--------------|---------------|--------------|--------------------|
| Long-term debt obligations (including interest)(1)(2) | 4,684 | 537 | 1,663 | 879 | 1,605 |
| Capital (finance) lease obligations | — | — | — | — | — |
| Operating lease obligations | 1,626 | 243 | 596 | 230 | 557 |
| Purchase obligations | 235 | 235 | — | — | — |
| Other long-term liabilities reflected on our balance sheet under GAAP | — | — | — | — | — |
| Total | 6,545 | 1,015 | 2,259 | 1,109 | 2,162 |

Set forth below is a proforma table of our contractual obligations, in millions of NIS, to reflect the issuance of our additional debentures, Series C and D, in February 2008 and the voluntary prepayment of the balance of our loan under the credit facility in March 2008. Other parameters remain as presented as at December 31, 2007.

| | Total | 2008 | 2009- 2011 | 2012-2013 | 2014 and Beyond |
|---|--------------|--------------|---------------|--------------|--------------------|
| Long-term debt obligations (including interest)(1)(2) | 5,422 | 879 | 1,434 | 1,057 | 2,052 |
| Capital (finance) lease obligations | — | — | — | — | — |
| Operating lease obligations | 1,626 | 243 | 596 | 230 | 557 |
| Purchase obligations | 235 | 235 | — | — | — |
| Other long-term liabilities reflected on our balance sheet under GAAP | — | — | — | — | — |
| Total | 7,283 | 1,357 | 2,030 | 1,287 | 2,609 |

- (1) Interest on our credit facilities is calculated using two-month LIBOR plus a margin of 0.8% and two-month TELBOR plus a margin of 0.97%, using LIBOR and TELBOR in effect in November 2007. Because the interest rate under the credit facility is variable, actual payments may differ.
- (2) Interest does not include (a) payments that could be required under our interest-rate swap agreements; such payments will depend upon changes in interest rates and could vary significantly, or (b) any increase in interest that would be required based on increases in the Israeli CPI.

Application of Critical Accounting Policies and Use of Estimates

The preparation of our financial statements requires management to make estimates and assumptions that affect the amounts reflected in the consolidated financial statements and accompanying notes, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience, where applicable, and on other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual

results may differ from these estimates under different assumptions or conditions, and could have a material impact on our reported results.

In many cases, the accounting treatment of a particular transaction, event or activity is specifically dictated by accounting principles and does not require management's judgment in its application, while in other cases, management's judgment is required in the selection of the most appropriate alternative among the available accounting principles, that allow different accounting treatment for similar transactions.

81

We believe that the accounting policies discussed below are critical to our financial results and to the understanding of our historical and future performance, as these policies relate to the more significant areas involving management's estimates and assumptions. We consider an accounting estimate to be critical if: (1) it requires us to make assumptions because information was not available at the time or it included matters that were highly uncertain at the time we were making our estimate and (2) changes in the estimate or different estimates that we could have selected may have had a material impact on our financial condition or results of operations.

Revenue recognition

Nature of critical estimate items

As described in Note 2.L to our consolidated financial statements included elsewhere in this annual report, we recognize revenues from services as they are provided and revenues from sales of handsets and accessories upon delivery.

Assumptions / approach used

We recognize service revenues based upon minutes used, net of credits and adjustments for service discounts. As a result of the cutoff times of our multiple billing cycles each month, we are required to estimate the amount of service revenues earned during the period, but not yet billed, from the end of each billing cycle to the end of each reporting period. These estimates are primarily based on historical usage and billing patterns.

The accounting estimates used in the results of operations related to the recognition of revenue require us to make assumptions about possible future billing adjustments arising from disputes with subscribers and discounts not taken into consideration at the time of billing.

Effect if different assumptions used

Management believes that the provisions (relevant to revenue recognition) recorded for each reporting period represent its best estimate of future outcomes, but the actual outcomes could differ from the estimate selected. The impact of variances in actual performance versus the amounts recorded could have an adverse effect on the accounts receivable reported on the balance sheet and the results reported in the statements of operations, and could be material to our financial condition.

Long-lived assets – depreciation

Nature of critical estimate items

The cellular communications industry is capital intensive. The depreciation of operating assets constitutes a significant operating cost for us. We have substantial investments in tangible long-lived assets, primarily our communications networks.

Assumptions / approach used

Until December 31, 2006, we depreciated our network equipment by the straight-line method, on the basis of the estimated useful lives of the dominant asset within each group of assets, mainly over 6.7 years (15% per year). On January 1, 2007, a new Israeli accounting standard came into effect, pursuant to which we retroactively separated individual

components with estimated useful lives that are different from the entire network, mainly transmission equipment (such as fiber-optic cables) and infrastructures. The retroactive application of this depreciation of individual components had a material effect on our results of operations and financial position for all of the reported periods. See “—New Accounting Standards—Israeli Accounting Standard No. 27, “Property, plant and equipment”.” Leasehold improvements are depreciated over the shorter of their estimated useful lives or lease terms that are reasonably assured. We periodically review changes in our technology and industry conditions to determine adjustments to estimated remaining useful lives and depreciation rates. Such adjustments would affect depreciation prospectively.

Effect if different assumptions used

Changes in technology or changes in our intended use of these assets can cause the estimated period of use or the value of these assets to change. Actual economic lives may differ from estimated useful lives. Periodic reviews could result in a change in our assets’ depreciable lives, and therefore, in our depreciation expense in future periods.

Impairment of long-lived assets

Nature of critical estimate items

We review finite-lived long-lived assets, principally consisting of property, plant and equipment, and spectrum licenses for impairment based on the requirements of Israeli Accounting Standard No. 15, or whenever events or changes in circumstances indicate that their carrying values may not be recoverable through the present value of anticipated cash flows from the continued use of the asset, including those expected at the time of its future retirement and disposal. If necessary, we write down the assets to their estimated fair values.

Assumptions / approach used

In analyzing finite-lived long-lived assets for potential impairment, significant assumptions that are used in determining the discounted cash flows of the asset group include:

- cash flows attributed to the asset group;
- future cash flows for the asset group, including estimates of residual values, which incorporate our views of growth rates for the related business and anticipated future economic conditions; and
- period of time over which the assets will be held and used.

Effect if different assumptions used

The use of different estimates of assumptions within our discounted cash flow modes (e.g., growth rates, future economic conditions, estimates of residual values) could result in discounted cash flows that are lower than the current carrying value of an asset group, thereby requiring the need to compare the carrying value of the asset group to its fair value.

The use of different discount rates when determining the fair value of the asset group could result in different fair values, and impact any related impairment charges.

Since our incorporation, we have written down an aggregate amount of NIS 10 million of the value of our real estate property in Modi'in, Israel, which was reversed in December 2007, as a result of a periodic review of the value of the aforesaid asset, in accordance with Israeli Accounting Standard No. 15.

Accounts receivable - bad debt and allowance for doubtful accounts

Nature of critical estimate items

We maintain an allowance for doubtful accounts to reflect estimated losses resulting from the inability of certain subscribers to make required payments.

Assumptions / approach used

We regularly evaluate the adequacy of our allowance for doubtful accounts by taking into account variables such as past experience, age of the receivable balance and current economic conditions of the party owing the receivable balance. If the financial conditions of certain subscribers were to deteriorate, resulting in impairment in their ability to make payments, additional allowance for doubtful accounts may be required.

Effect if different assumptions used

We believe that our allowance for doubtful accounts is adequate to cover estimated losses in customer accounts receivable balances under current conditions. However, changes to the allowance for doubtful accounts may be necessary in the event that the financial condition of our customers improves or deteriorates.

Liabilities arising from litigation

We are involved in various claims and legal actions arising in the ordinary course of business. We make provisions for liabilities arising from litigation in accordance with SFAS No. 5, which requires us to provide for liabilities arising from litigation when the liabilities become probable and estimable. We continually evaluate our pending litigation to determine if any developments in the status of litigation require an accrual to be made. It is often difficult to accurately estimate the ultimate outcome of the litigation. These variables and others can affect the timing and amount we provide for certain litigation. Our accruals for legal claims are therefore subject to estimates made by us and our legal counsel, which are subject to change as the status of the legal cases develops over time. Such revision in our estimates of the potential liability could materially impact our financial condition, results of operations or liquidity.

Push-down accounting – for U.S. GAAP only

Following its acquisition in September 2005, DIC held a 94.5% controlling interest in our outstanding share capital, and 100% control of our voting rights. As a result, SEC Staff Accounting Bulletin Topic 5J, requires the acquisition by the parent company to be “pushed-down,” meaning the post-transaction financial statements of the acquired company should reflect a new basis of accounting. In accordance with Israeli GAAP, reflecting the September 2005 transaction through a new basis of accounting is not permitted.

The purchase price paid as a result of this transaction has been allocated to a proportionate amount of our underlying assets and liabilities based upon DIC's acquired interests in the respective fair market values of our assets and liabilities at the date of the

transaction. The excess of the purchase price over the identified assets and liabilities is considered as goodwill.

Goodwill and other identifiable assets are tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment losses are not reversed. Impairment is determined by assessing the recoverable amount of the Company. If the recoverable amount of the Company is less than the carrying amount, an impairment loss is recognized. Any future impairment which might be required, could materially impact our financial condition or results of operations.

Estimates were used in the course of the acquisition by DIC to determine the fair value of the assets and liabilities acquired.

The application of purchase accounting required that the total purchase price be allocated to the fair value of assets acquired and liabilities assumed based on their fair values at the acquisition date. The allocation process required an analysis of all such assets and liabilities including acquired contracts, customer relationships, licenses, contractual commitments and legal contingencies to identify and record the fair value of all assets acquired and liabilities assumed. In valuing acquired assets and assumed liabilities, fair values were based on, but were not limited to: future expected cash flows; current replacement cost for similar capacity for certain property, plant and equipment; market rate assumptions for contractual obligations; estimates of settlement costs for litigation and contingencies; and appropriate discount rates and growth rates. The approach to the estimation of the fair values of our intangible assets involved the following steps: preparation of discounted cash flow analyses; deduction of the fair values of tangible assets; determination of the fair value of identified significant intangible assets; reconciliation of the individual assets' returns with the weighted average cost of capital; and allocation of the excess purchase price over the fair value of the identifiable assets and liabilities acquired to goodwill.

Determining the particular asset economic lives for intangible assets and for tangible fixed assets involves the exercise of judgment and can materially affect the reported amounts for amortization of intangible assets and depreciation of tangible fixed assets.

Income taxes

We account for income taxes under Israeli Accounting Standard No. 19, "Taxes on Income." Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax assets and liabilities are classified as current or non-current items in accordance with the nature of the assets or liabilities to which they relate. When there are no underlying assets or liabilities, the deferred tax assets and liabilities are classified in accordance with the period of expected reversal. Income tax expenses represent the tax payable for the period and the changes during the period in deferred tax assets and liabilities.

To compute provisions for taxes, estimates need to be made. Estimates are also necessary to determine whether valuation allowances are required against deferred tax assets. These involve assessing the probabilities that deferred tax assets resulting from deductible temporary differences will be utilized. Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the complexity, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate adjustments to tax income and expense in future periods. We establish reasonable provisions for possible consequences of tax audits. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by ourselves and the tax authorities.

New Accounting Standards

Israeli Accounting Standard No. 26, "Inventory"

In August 2006, the Israel Accounting Standards Board published Israeli Accounting Standard No. 26, "Inventory." This standard provides guidelines for determining the cost of inventory and its subsequent recognition as an expense as well as for determining impairment in value of inventory written down to net realizable value of the inventory. This standard also provides guidelines regarding cost formulas used to allocate costs to various types of inventory. This standard applies to financial statements for periods beginning on or after January 1, 2007. Implementation of Standard No. 26 did not have a material effect on our results of operations and financial position.

Israeli Accounting Standard No. 27, "Property, plant and equipment"

In September 2006, the Israel Accounting Standards Board published Israeli Accounting Standard No. 27, "Property, plant and equipment." Standard No. 27 prescribes rules for the presentation, measurement and recognition of fixed assets and for the disclosure required in respect thereto. Standard No. 27 provides among other things the following:

Revaluation of assets

Standard No. 27 provides that a group of similar fixed asset items should be measured at cost net of accumulated depreciation, less impairment losses, or alternatively, at its revalued amount less accumulated depreciation, whereas an increase in the value of the asset to above its initial cost as a result of the revaluation will be directly included in shareholders' equity under a revaluation reserve.

Asset retirement obligations

Standard No. 27 provides, that upon the initial recognition of a fixed asset, the cost of the item should include all the costs expected to be incurred in respect of a liability to dismantle and remove the item and to restore the site on which it was located.

Components depreciation

Standard No. 27 provides that if an item of property, plant and equipment consists of several components with different estimated useful lives, the individual significant components should be depreciated over their individual useful lives.

Standard No. 27 applies to financial statements for periods beginning on January 1, 2007, and was adopted on a retroactive basis, except for asset retirement obligations, for which the initial adoption was in accordance with the provisions of Standard No. 27.

The initial implementation of Standard No. 27 had the following effects:

Asset retirement obligations

Implementation of Standard No. 27 resulted in the initial recognition of liabilities to dismantle and remove assets and to restore the site with respect to our cell sites, retail stores and general and administrative facilities, and accordingly increased our net book value of the fixed assets and our long-term liabilities due to the obligation for asset retirement. Also, there was a decrease in retained earnings as of January 1, 2007, in the amount of approximately NIS 5 million, net of related taxes. The additional cost will be recognized over the useful life of the asset. The obligation is recognized at fair value, and the accretion expense will be recognized over time as the discounted liability is accreted to its expected settlement value.

Components depreciation

Before adoption of Standard No. 27, we utilized group depreciation for our network and transmission equipment and depreciation had been calculated on the basis of the estimated useful life of the dominant asset within each group. Upon adoption of Standard No. 27, starting January 1, 2007, we retroactively separated individual components with estimated useful lives that are different from the entire network, mainly transmission equipment such as fiber-optic cables and infrastructure. The retroactive application of this components depreciation increased our retained earnings as of January 1, 2007, in the amount of approximately NIS 290 million. It is expected to have a significant effect on our results of operations for future periods.

Israeli Accounting Standard No. 29, "Adoption of International Financial Reporting Standards ("IFRS")"

In July 2006, the Israel Accounting Standards Board published Accounting Standard No. 29, "Adoption of International Financial Reporting Standards ("IFRS")", under which, we have to prepare our financial statements for periods beginning on and after January 1, 2008 according to IFRS. The standard permits early adoption for financial statements released after July 31, 2006.

In accordance with this standard, we are required to include in our annual financial statements for December 31, 2007, balance sheet data as at December 31, 2007 and statement of operations data for the year then ended, that have been prepared according to the recognition, measurement and presentation principles of IFRS. For details, see note 2.U.5 to our consolidated financial statements included elsewhere in this annual report.

Presented below is a description of the principal anticipated effects on our financial statements of the transition to IFRS, including the changes that may occur in our accounting policy as a result of this transition:

- In accordance with IFRS a provision should be created if as at balance sheet date it is more likely than not that a commitment will be fulfilled. In accordance with Israeli GAAP, we create a provision if it is probable that economic resources will be used to settle the liability.

- In accordance with IFRS, embedded derivatives are separated from hybrid instruments. The separated embedded derivatives are measured according to fair value at each balance sheet date, with the changes in fair value being recognized in the income statement for the period. Israeli GAAP does not require the separation of embedded derivatives from hybrid instruments.

Impact of Recently Issued U.S. GAAP Accounting Standards

In September 2006, the Financial Accounting Standards Board issued SFAS No. 157, "Fair Value Measurements". This Standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. The provisions of this standard are effective for us beginning January 1, 2008. The Financial Accounting Standards Board issued a Staff Position to defer the effective date of this standard for one year for all non financial assets and non financial liabilities, except for those items that are recognized or disclosed at fair value in the financial statements on a recurring basis. We do not expect the adoption of this standard will have material impact on our consolidated financial statements.

In February 2007, the Financial Accounting Standards Board issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This standard permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. The provisions of this standard are effective for us beginning January 1, 2008. We do not expect the adoption of this standard will have an impact on our consolidated financial statements.

In December 2007, the Financial Accounting Standards Board issued SFAS No. 141 (revised 2007), "Business Combinations". This standard establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non controlling interest in the acquiree and the goodwill acquired. This standard also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. This standard is effective for fiscal years beginning after December 15, 2008. Earlier adoption is prohibited. We are currently evaluating the potential impact, if any, of the adoption of this standard on our consolidated results of operations and financial condition.

In December 2007, the Financial Accounting Standards Board issued SFAS No. 160, "Non controlling Interests in Consolidated Financial Statements, an amendment of ARB No. 51". This standard requires that the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity; the amount of consolidated net income attributable to the parent and to the non-controlling interest be clearly identified and presented on the face of the consolidated statement of income; and changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently. This standard is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. We do not expect the adoption of this standard will have significant impact on our consolidated financial statement.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. DIRECTORS AND SENIOR MANAGEMENT

The following table sets forth information regarding our directors, executive officers and other key employees as of December 31, 2007:

| Name | Age | Position |
|----------------------------------|-----|---|
| Ami Erel (2), (3) | 60 | Chairman of the Board |
| Nochi Dankner (3) | 53 | Director |
| Isaac Manor | 66 | Director |
| Shay Livnat (2), (3) | 49 | Director |
| Raanan Cohen (1), (2), (4) | 40 | Director |
| Oren Lieder (1), (2) | 59 | Director |
| Avraham Bigger | 61 | Director |
| Rafi Bisker (2) (4) | 56 | Director |
| Shlomo Waxe (1), (2), (4) | 61 | Independent Director |
| Joseph Barnea (1), (2), (3), (4) | 72 | Independent / External Director |
| Ronit Baytel (1) | 40 | Independent / External Director |
| Amos Shapira | 58 | President and Chief Executive Officer |
| Tal Raz | 46 | Chief Financial Officer |
| Adi Cohen | 42 | Vice President of Marketing |
| Eliezer (Lipa) Ogman | 54 | Chief Technology Officer |
| Isaiah Rozenberg | 47 | Vice President of Engineering and Network Operation |
| Itamar Bartov | 45 | Vice President of Executive and Regulatory Affairs |
| Refael Poran | 59 | Vice President of Business Customers |
| Meir Barav | 50 | Vice President of Sales and Services |
| Ronit Ben-Basat | 40 | Vice President of Human Resources |
| Amos Maor | 44 | Vice President of Operations and Supply Chain |
| Liat Menahemi-Stadler | 41 | General Legal Counsel |
| Gil Ben-Itzhak | 42 | Controller |

(1) Member of our Audit Committee; As of February 2008, the Audit Committee consists of independent directors solely: Messrs. Barnea (chairman), Baytel and Waxe.

(2) Member of our Cost Analysis Committee.

(3) Member of our Option Committee. Mr. Barnea was appointed to the option committee in January 2008.

(4) Member of our Security Committee.

Explanation of Responses:

Ami Erel has served as Chairman of our Board of Directors since 2005. Mr. Erel has served as President and Chief Executive Officer of Discount Investment Corporation Ltd. since 2001. From March to December 2007, Mr. Erel also served as the Chief Executive Officer of NetVision Ltd., where he served prior to March 2007 and continues to serve from January 2008, as Chairman of the board of directors. From 1999 to 2001, he served as President of Elron Electronic Industries Ltd., where he continues to serve as a member of the Board of Directors and also served, until January 2007, as Chairman of the board of directors. From 1997 to 1999, he served as President and Chief Executive Officer of Bezeq – The Israeli Telecommunications Corporation Ltd. Mr. Erel also serves as the Chairman of the board of directors of Koor Industries Ltd. and as a member of the boards of directors of Makhteshim-Agan Industries Ltd., Shufersal Ltd., Property and Building Corporation Ltd. and other IDB group companies. Mr. Erel has served as the chairman of the executive committee of the Manufacturers Association of Israel since 2005. Mr. Erel holds a B.Sc. in electrical engineering from the Technion, Israel Institute of Technology.

89

Nochi Dankner has served as a member of our Board of Directors since 2005. Mr. Dankner currently serves as Chairman of the board of directors and Chief Executive Officer of IDB Holding Corporation Ltd. Mr. Dankner also serves as Chairman of the boards of directors of IDB Development Corporation Ltd., Discount Investment Corporation Ltd., Clal Industries and Investments Ltd., Ganden Holdings Ltd. and various private companies, and as a member of the boards of directors of Elron Electronic Industries Ltd., Clal Insurance Enterprises Holdings Ltd., Clal Insurance Company Ltd., Shufersal Ltd., Property and Building Corporation Ltd., American Israeli Paper Mills Ltd., Koor Industries Ltd., Makhteshim-Agan Industries Ltd. and various private companies. Mr. Dankner also serves as the Chairman of the IDB fund “For the Community” (a non-profit organization), as a member of “Matan-Your Way to Give” (a non-profit organization), as a member of the management committee of the Association of Friends of the Tel Aviv Sourasky Medical Center, and as a member of the board of trustees of Tel Aviv University. Mr. Dankner holds an L.L.B. and a B.A. in political science, both from Tel Aviv University.

Isaac Manor has served as a member of our Board of Directors since 2005. Mr. Manor has served as the Deputy Chairman of the board of directors of IDB Holding Corporation Ltd. since 2003. From 1976 to 2001, he served as Chief Executive Officer of companies in the automobile sector of the David Lubinsky group, the importer of Peugeot and Citroen automobiles to Israel, where he currently serves as the Chairman of the board of directors. Mr. Manor also serves as a member of the board of directors of IDB Development Corporation Ltd., Discount Investment Corporation Ltd., Clal Industries and Investments Ltd., Shufersal Ltd., Property and Building Corporation Ltd., American Israeli Paper Mills Ltd., Clal Insurance Enterprises Holdings Ltd., Union Bank of Israel Ltd., Koor Industries Ltd., Makhteshim-Agan Industries Ltd. and various private companies. Mr. Manor holds an executive M.B.A. from the Hebrew University.

Shay Livnat has served as a member of our Board of Directors since 2005. Mr. Livnat has served as the Chief Executive Officer of Zoe Holdings Ltd., a holding company that manages a diverse portfolio of international telecommunications operations and hi-tech companies, which was founded by him in 1988, since 2001. From 1988 to 1998, he served as Chief Executive Officer of Tashtit Ltd. Mr. Livnat also serves as a member of the boards of directors of IDB Development Corporation Ltd., Clal Industries and Investments Ltd., Clal Insurance Enterprises Holdings Ltd., Elron Electronic Industries Ltd. and various private companies. Mr. Livnat serves as a member of the executive committee of the University of Haifa. Mr. Livnat holds a B.A. in electrical engineering from Fairleigh Dickinson University in New Jersey, USA.

Raanan Cohen has served as a member of our Board of Directors since 2000. Mr. Cohen has served as Chief Executive Officer of Koor Industries Ltd. since July 2006. From 2004 to 2006, he served as Chief Executive Officer of Scailex Corporation Ltd.. Since 2001 he has served as Vice President of Discount Investment Corporation Ltd., having previously served, from 1999 to 2001, as executive assistant to the chief executive officer of Discount Investment Corporation Ltd. From 1997 to 1999, he was an associate at McKinsey & Company Inc., London. Mr. Cohen also serves as a member of the boards of directors of Makhteshim-Agan Industries Ltd., Property and Building Corporation Ltd. and various private companies.. Mr. Cohen is a member of the Israeli Bar Association and holds an L.L.B. and a B.A. in economics from Tel Aviv University and an M.B.A. in management from the J.L. Kellogg Graduate School of management of Northwestern University.

Oren Lieder has served as a member of our Board of Directors since 2005. Mr. Lieder has served as Senior Vice President and Chief Financial Officer of Discount Investment Corporation Ltd. since 2003. From 1997 to 2002, he served as the Chief Financial Officer of Bezeq – The Israeli Telecommunications Corporation Ltd. From 1989 to 1996, he served as Chief Financial Officer of Zim Israel Navigation Company Ltd. Mr. Lieder also serves as a member of the boards of directors of Ham-Let (Israel Canada) Ltd., Shufersal Ltd., Makhteshim-Agan Industries Ltd., Property and Building Corporation Ltd., Bayside Land Corporation Ltd. and various private companies. Mr. Lieder serves as a member of the board of trustees and investment committee of the University of Haifa. Mr. Lieder holds a B.A. in economics and statistics from the University of Haifa.

Avraham Bigger has served as a member of our Board of Directors since 2005. Mr. Bigger is the owner and managing director of three family-owned companies. Since October 2006, Mr. Bigger has served as the Chairman, and since January 2007 he has also served as Chief Executive Officer of Makhteshim-Agan Industries Ltd. From June 2003 to July 2007, Mr. Bigger served as the Chairman of the board of directors of Shufersal Ltd. Mr. Bigger also serves as the chairman of the boards of directors of various private companies; as the Deputy Chairman of the Caesarea Edmond Benjamin De Rothschild Foundation and the Caesarea Edmond Benjamin De Rothschild Development Corporation Ltd.; and as a member of the boards of directors of the First International Bank of Israel Ltd. and various private companies. Mr. Bigger holds a B.A. in economics and an M.B.A. from the Hebrew University.

Rafi Bisker has served as a member of our Board of Directors since 2006. Mr. Bisker currently serves as Chief Executive Officer of Ganden Real Estate Ltd., co-Chairman of Shufersal Ltd. and as the Chairman of Property and Building Corporation Ltd., Bayside Land Corporation Ltd. and various private companies. From 2000 to 2005, he served as Chief Executive Officer of Ganden Holdings Ltd. From 1989 to 1999, he served as Chief Executive Officer of Dankner Investments Ltd. Mr. Bisker also serves as a member of the boards of directors of IDB Holding Corporation Ltd., IDB Development Corporation Ltd., Discount Investment Corporation Ltd., Clal Industries and Investments Ltd., Koor Industries Ltd., Ganden Holdings Ltd., ISPRO The Israel Properties Rental Corporation Ltd., Mehadrin Ltd., and various private companies. Mr. Bisker holds a B.Sc. in civil engineering from the Technion, Israel Institute of Technology.

Shlomo Waxe has served as a member of our Board of Directors since 2006. Mr. Waxe has served as Director General of the Israel Association of Electronics and Software Industries since 2006. From 2002 to 2005, he worked in the field of communications management and consultancy. From 1999 to 2001, he served as Chief Executive Officer of Zeevi Communications Ltd. From 1997 to 1999, he served as a consultant to cellular communications projects in Sao Paulo, Brazil and in Northeast Brazil. From 1993 to 1997, he served as the Director General of Israel's Ministry of Communications. From 1990 to 1993, he served as commanding officer of the signal, electronics and computer corps of the Israel Defense Forces and he is a retired brigadier general. Mr. Waxe also serves as a member of the boards of directors of Tambour Ltd., C. Mer Industries Ltd. and Shrem, Fudim – Technologies Ltd. Mr. Waxe holds a B.A. in political science from the University of Haifa.

Joseph Barnea has served as a member of our Board of Directors since May 2007. Mr. Barnea is a retired businessman. He served as the Chief Executive Officer of Oxygen & Argon Works Ltd. from 1987 to 2005 and continued to serve as a member of its management until 2006. From 1985 to 1987, he served as the Chief Executive Officer of Telkoo Ltd.

From 1980 to 1985, he served as a Vice President of Elscint Medical Imaging Ltd. Mr. Barnea is a member of the Presidency of the Israeli Industrialists Association and until recently served as the Chairman of its Chemistry and Environment Association, and from 2005 a member of the boards of the Israeli Export Institute and the Israeli Standards Institute. From 2001 to 2004 he served as Chairman and President of the International Oxygen Manufacturers Association (IOMA) USA. He served as Deputy Commander of the signal, electronics and computer corps of the Israeli Defense Forces. Mr. Barnea holds a B.Sc. in electrical engineering from the Technion, Israel Institute of Technology and an M.Sc. in electrical engineering from Columbia University, New York, USA.

Ronit Baytel has served as a member of our Board of Directors since May 2007. Ms. Baytel is a director in the finance department of Ormat Technologies, Inc., a company listed on the NYSE, in charge of SOX internal controls in the preparation of financial statements and, tax and special projects. From 1998 to 2005 she served as senior manager at Kesselman & Kesselman, a certified public accountants firm in Israel, which is a member of the international PriceWaterhouseCoopers Accountants firm. Ms. Baytel is a certified public accountant and holds a B.A. in economics and accountancy from the Tel Aviv University and an M.B.A. from the Hebrew University.

Amos Shapira has served as our President and Chief Executive Officer since 2005. From 2003 to 2005, Mr. Shapira served as Chief Executive Officer of El Al Israel Airlines Ltd. From 1993 to 2003, he served as Chief Executive Officer of Hogla-Kimberly Ltd., a company owned by Kimberly-Clark USA. He joined the board of directors of Elron Electronic Industries Ltd. in 2006. Mr. Shapira holds an M.Sc. in industrial administration from the Technion, Israel Institute of Technology and a B.A. in economics from the University of Haifa.

Tal Raz has served as our Chief Financial Officer since 2005. From 2002 to 2005, Mr. Raz served as Chief Financial Officer of Elron Electronic Industries Ltd. From 2001 to 2002, he served as the President and Chief Executive Officer of Elbit Ltd. From 1997 to 2001, he served as Elbit's Chief Financial Officer, having previously served in the same capacity at Agentsoft Ltd. and Paul Winston Corporation. Prior to that, he was a senior auditor at Deloitte & Touche's New York office. Until January 2007, Mr. Raz served as a director of NetVision Ltd. He is a member of the steering committee of the Israeli CFO Forum and is a certified public accountant. He holds a B.A. in accounting and business administration and an M.B.A. in business administration, from the City University of New York.

Adi Cohen has served as our Vice President of Marketing since 2006. From 2003 to 2006, Mr. Cohen served as marketing manager of Shufersal Ltd. From 2002 to 2003, he served as Chief Executive Officer of ERN Israel Ltd. From 1998 to 2003, he served as marketing manager of Partner Communications Company Ltd. Mr. Cohen holds a B.A. in economics and an M.B.A., both from the Hebrew University.

Eliezer (Lipa) Ogman has served as our Chief Technology Officer since 2000. From 1997 to 2000, Mr. Ogman served as our Vice President of Engineering and Network Operation, and from 1994 to 1997 he served as manager of our network design department. Prior to joining us, he served in the signal, electronics and computer corps of the Israel Defense Forces, reaching the rank of lieutenant colonel. Mr. Ogman holds a B.Sc. in Electrical Engineering from the Technion, Israel Institute of Technology, an M.B.A. in business administration and an M.Sc. in electrical engineering from Tel Aviv University.

Isaiah Rozenberg has served as our Vice President of Engineering and Network Operation since 2005. From 2000 to 2005, Mr. Rozenberg served as manager of our radio and switch engineering department. Mr. Rozenberg holds a B.Sc. and an M.Sc. in electrical and electronics engineering from Ben-Gurion University of the Negev.

Itamar Bartov has served as our Vice President of Executive and Regulatory Affairs since 2005. From 2004 to 2005, Mr. Bartov served as Vice President of Customer Services of El Al Israel Airlines Ltd., and from 2002 to 2004 he served as El Al's Corporate Secretary. From 2000 to 2002, he served as the Israel Postal Authority's Vice President of Business Development in Overseas Commerce and from 1996 to 2000 he served as the Israel Postal Authority's Vice President of Planning and Control. From 1993 to 1996, he served as senior advisor to the Minister of Communications. Mr. Bartov holds an L.L.B. from the Hebrew University in Jerusalem.

Refael Poran has served as our Vice President of Business Customers since 2006. From 1992 to 2004, Mr. Poran served as Chief Executive Officer of Adanet Communications Ltd. From 2005 to 2006, he served as head of the information technology section of the Haifa Port Company Ltd. Mr. Poran holds a B.Sc. in electrical engineering from the Technion, Israel Institute of Technology.

Meir Barav has served as our Vice President of Sales and Services since 2005. From 2001 to 2005, Mr. Barav served as Vice President of Operations and Logistics of D.B.S. Satellite Services (1998) Ltd. From 1997 to 2000, he served as Vice President of Sales and Logistics of Strauss Ice Creams Ltd.. Mr. Barav holds a B.A. in economics and statistics from the Open University.

Ronit Ben-Basat has served as our Vice President of Human Resources since 2004. From 1999 to 2004, Ms. Ben-Basat served in various positions for Cisco Systems in Israel, Europe and San-Jose, California, as a senior human resources manager. From 1991 to 1999, she served as human resources and finance manager of LSI Logic. Ms. Ben-Basat holds a B.A. in social work and an M.Sc. in organizational development management, both from Tel Aviv University, and she also completed an executive M.B.A. program at Cisco Systems, through INSEAD, France and IMD, Switzerland.

Amos Maor has served as our Vice President of Operations and Supply Chain since 2004. From 2002 to 2004, Mr. Maor served as manager of Supply Chain of Elite Industries Ltd., and from 2000 to 2002, he served as manager of Elite's sales division headquarters. Mr. Maor holds a B.Sc. in industry and management engineering from the Technion, Israel Institute of Technology.

Liat Menahemi Stadler has served as our General Legal Counsel and Corporate Secretary since 2006. From 2000 to 2006, Ms. Menahemi Stadler served as head of the technology and general purchasing division of our legal department. She has been a member of our legal department since 1998. Ms. Menahemi Stadler holds an LL.B. and a B.A. in English and French language and literature, both from the University of Haifa.

Gil Ben-Itzhak has served as our Controller since 2006. From 2003 to 2006, Mr. Ben-Itzhak served as Chief Financial Officer of Paul Winston-Eurostar LLC in New York. From 2002 to 2003, he served as Chief Financial Officer of Elron Telesoft Ltd. and from 1996 to 2002, he served as Controller of Elbit Ltd. Mr. Ben-Itzhak is a certified public accountant and holds a B.A. in accounting and economics from the University of Haifa.

B. COMPENSATION

Executive Officer and Director Compensation

The aggregate direct compensation we paid to all our executive officers and directors as a group (25 persons) for 2007 was approximately NIS 21.3 million, of which approximately NIS 9.6 million relates to 2006 bonuses paid in 2007 and approximately NIS 2.1 million was set aside or accrued to provide for pension, retirement, severance or similar benefits. These amounts do not include expenses we incurred for other payments, including dues for professional and business associations, business travel and other expenses and benefits commonly reimbursed or paid by companies in Israel. In addition, we recorded the sum of approximately NIS 20.7 million in 2007, as a compensation cost related to the options granted to all our executive officers and the Chairman of the board of directors under the share incentive plan.

We pay no cash compensation to our directors who are affiliated with DIC for their services as directors, but we pay DIC NIS 2.0 million per year for management services. We pay Shlomo Waxe, our independent director, a monthly director's fee of \$3,000 plus Israeli value-added tax. Each of our two external directors are entitled to a director's fee in the amount of NIS 100,000 (approximately \$26,000) per year and NIS 3,000 (approximately \$780) per meeting, payable in accordance with the regulations promulgated under the Israeli Companies Law, as adjusted for changes in the Israeli CPI.

Employment Agreement of Amos Shapira

Mr. Amos Shapira, our President and Chief Executive Officer, is entitled to a gross monthly salary of NIS 120,000, linked to the Israeli CPI. He is also entitled to a company car, the use of a cellular phone and to reimbursement of incidental private expenses in the amount of NIS 9,000 per year. Mr. Shapira is entitled to a fixed bonus equal to six month's salary per year, in respect of which no social benefits are accrued. He received a one-time signing bonus of NIS 3.4 million and he is entitled to an annual bonus based on our annual profits, in an amount not to exceed NIS 2.8 million. Mr. Shapira is also entitled to participate in a share option plan, which was adopted in September 2006. Mr. Shapira's agreement contains provisions for vacation days, sick leave, managers' insurance and an education fund. The agreement is for an unspecified period of time and can be terminated by either party with advance notice of three months. Mr. Shapira will continue to receive his salary and benefits for a period of nine months after termination by either party, unless we terminate the agreement for cause. The aggregate monthly cost to us of Mr. Shapira's employment in 2007 amounted to approximately NIS 176,000 (approximately \$45,800). In addition, in 2007, we paid Mr. Shapira a bonus in the amount of NIS 3.5 million and recorded an aggregate yearly expense of NIS 5.4 million in relation to the options granted to Mr. Shapira under the share incentive plan.

C. BOARD PRACTICES

Corporate Governance Practices

We are incorporated in Israel and therefore are subject to various corporate governance practices under the Israeli Companies Law, 1999, or the Companies Law, relating to such matters as external directors, the audit committee and the internal auditor. These matters are in addition to the requirements of the New York Stock Exchange and other relevant provisions of U.S. securities laws. Under the New York Stock Exchange rules, a

foreign private issuer may generally follow its home country rules of corporate governance in lieu of the comparable New York Stock Exchange requirements, except for certain matters such as composition and responsibilities of the audit committee and the independence of its members. We follow the Companies Law, the relevant provisions of which are summarized in this annual report, and comply with the New York Stock Exchange requirement to solicit proxies from our shareholders in respect of each meeting of shareholders. For a summary of significant differences between our corporate governance practices, as a foreign private issuer and those required of U.S. domestic companies under NYSE Listing Standards, see our website at www.cellcom.co.il under "Investor Relations –Legal & Corporate". Under the Companies Law, our Board of Directors must determine the minimum number of directors having financial and accounting expertise, as defined in the regulations, that our Board of Directors should have. In determining the number of directors required to have such expertise, the Board of Directors must consider, among other things, the type and size of the company and the scope and complexity of its operations. Our Board of Directors has determined that we require at least two directors with the requisite financial and accounting expertise and that Messrs. Dankner, Erel, Lieder, Manor, Bigger and Cohen have such expertise. The Companies Law and the regulations promulgated thereunder also require that at least one of our External Directors has financial and accounting expertise and consider a person who is an audit committee independent financial expert according to a foreign law, to comply with that requirement. Our Board of Directors has determined that Ms. Ronit Baytel qualifies as an "audit committee financial expert" as defined by the SEC in Item 16 of Form 20-F.

Board of Directors and Officers

Our Board of Directors currently consists of eleven directors, including three independent directors under the rules of the Sarbanes-Oxley Act applicable to audit committee members, of which two also qualify as external directors under the Companies Law. Nine of our current directors, including the independent directors, were elected at our annual shareholders meeting held on May 2007. The external directors were appointed for an initial period of three years. Two additional directors, Messrs. Dankner and Manor, were appointed by DIC, as founding shareholder, in accordance with our license and articles of association's requirement that at least 20% of our directors be appointed by Israeli citizens and residents from among our founding shareholders. Our articles of association provide that we must have at least five directors.

Each director (other than external directors and directors required to be appointed by Israeli citizens and residents from among our founding shareholders) will hold office until the next annual general meeting of our shareholders following his or her election and until his or her successor shall be elected and qualified. The approval of at least a majority of the voting rights represented at a general meeting and voting on the matter is generally required to remove any of our directors from office (other than external directors and directors required to be appointed by Israeli citizens and residents from among our founding shareholders), provided that directors appointed by the Board of Directors may also be removed by the Board of Directors. A majority of our shareholders at a general meeting may elect directors or fill any vacancy, however created, in our Board of Directors (other than external directors and directors required to be appointed by Israeli citizens and residents from among our founding shareholders). In addition, directors, other than an external director or a director required to be appointed by Israeli citizens and residents from among our founding shareholders, may be appointed by a vote of a majority of the directors then in office.

Our articles of association provide, as allowed by Israeli law, that any director may, by written notice to us, appoint another person who is not a director to serve as an alternate director (subject to the approval of the chairman of the Board of Directors; and in the case of an appointment made by the chairman, such appointment shall be valid unless objected to by the majority of other directors) and may cancel such appointment. The term of appointment of an alternate director is unlimited in time and scope unless otherwise specified in the appointment notice, or until notice is given of the termination of the appointment. No director currently has appointed any other person as an alternate director. The Companies Law stipulates that a person who serves as a director may not serve as an alternate director except under very limited circumstances. An alternate director has the same responsibility as a director.

Each of our executive officers serves at the discretion of our Board of Directors and holds office until his or her successor is elected or until his or her earlier resignation or removal. There are no family relationships among any of our directors or executive officers.

External Directors

Qualifications of external directors

Companies incorporated under the laws of the State of Israel whose shares are listed on a stock exchange are required by the Companies Law to appoint at least two external directors. External directors are required to possess professional qualifications as set out in regulations promulgated under the Companies Law. The appointment of our external directors was approved by our shareholders in May 2007 . The Companies Law provides that a person may not be appointed as an external director if the person, or the person's relative, partner, employer or any entity under the person's control, has or had during the two years preceding the date of appointment any affiliation with the company or any entity controlling, controlled by or under common control with the company.

The term affiliation includes:

- an employment relationship;
- a business or professional relationship maintained on a regular basis;
- control; and
- service as an office holder, excluding service as a director in a private company prior to its initial public offering if such director was appointed in order to serve as an external director following the offering.

The term "office holder" is defined in the Companies Law as a director, general manager, chief business manager, deputy general manager, vice general manager, any other manager directly subordinate to the general manager or any other person assuming the responsibilities of any of the foregoing positions, without regard to such person's title. Each person listed above under "Item 6.A - Directors and Senior Management," except Gil Ben-Itzhak, is an office holder for this purpose.

No person may serve as an external director if the person's position or other business interests creates, or may create, a conflict of interest with the person's responsibilities as a director or may otherwise interfere with the person's ability to serve as a director. If at the

time an external director is appointed all current members of the board of directors are of the same gender, then that external director must be of the other gender.

Until the lapse of two years from termination of office, a company may not appoint an external director as an office holder and cannot employ or receive services from that person for pay, either directly or indirectly, including through a corporation controlled by that person.

Election of external directors

External directors are elected by a majority vote at a shareholders' meeting, provided that either:

- at least one-third of the shares of non-controlling shareholders voted at the meeting vote in favor of the election of the external director; or
- the total number of shares of non-controlling shareholders voted against the election of the external director does not exceed 1% of the aggregate voting rights in the company.

The initial term of an external director is three years and he or she may be reelected to one additional term of three years. Thereafter, he or she may be reelected by our shareholders for additional periods of up to three years each only if the audit committee and the board of directors confirm that, in light of the external director's expertise and special contribution to the work of the board of directors and its committees, the reelection for such additional period is beneficial to the company. An external director may only be removed by the same percentage of shareholders as is required for his or her election, or by a court, and then only if the external director ceases to meet the statutory qualifications or violates his or her duty of loyalty to the company. If an external directorship becomes vacant, a company's board of directors is required under the Companies Law to call a shareholders' meeting promptly to appoint a new external director.

Each committee of a company's board of directors that has the right to exercise a power delegated by the board of directors is required to include at least one external director, and the audit committee is required to include all of the external directors. An external director is entitled to compensation as provided in regulations adopted under the Companies Law and is otherwise prohibited from receiving any other compensation, directly or indirectly, in connection with services provided as an external director.

Israeli-Appointed Directors

Our license requires, and our articles of association provide, that at least 20% of our directors will be appointed and removed by shareholders who are Israeli citizens and Israeli residents from among our founding shareholders. If our Board of Directors is comprised of 14 directors or less, the Israeli shareholders will be entitled to appoint two directors, and if our Board of Directors is comprised of between 15 and 24 directors, the Israeli shareholders will be entitled to appoint three directors. Our articles of association provide that DIC, as founding shareholder, is responsible for complying with the requirement under our license that Israeli citizens and residents from among our founding shareholders hold at least 20% of our outstanding shares, and that so long as DIC so complies, it will be entitled to appoint and remove these directors.

Board Committees

Our Board of Directors has established an audit committee, cost analysis committee, option committee and a security committee.

Audit committee

Under the Companies Law, the board of directors of a public company must establish an audit committee. The audit committee must consist of at least three directors and must include all of the company's external directors. The audit committee may not include the chairman of the board, any director employed by the company or providing services to the company on an ongoing basis, a controlling shareholder or any of a controlling shareholder's relatives. The members of the audit committee are also required to meet the independence requirements established by the SEC in accordance with the requirements of the Sarbanes-Oxley Act, subject to the phase-in requirements described below.

Our audit committee provides assistance to our Board of Directors in fulfilling its legal and fiduciary obligations in matters involving our accounting, auditing, financial reporting and internal control functions by pre-approving the services performed by our independent accountants and reviewing their reports regarding our accounting practices and systems of internal control over financial reporting. The audit committee also oversees the audit efforts of our independent accountants and takes those actions as it deems necessary to satisfy itself that the accountants are independent of management. Under the Companies Law, the audit committee is required to identify deficiencies in the management of the company, including by consulting with the internal auditor or the independent accountants, and recommending remedial actions to the board of directors, and is responsible for reviewing and approving certain related party transactions, as described below. The audit committee may not approve such a related party transaction unless at the time of approval the two external directors were serving as members of the audit committee and at least one of them was present at the meeting at which the approval was granted.

As of February 2008, our audit committee is composed entirely of independent members (and includes all the external directors)- Messrs. Joseph Barnea (chairman), Shlomo Waxe and Ronit Baytel. Prior to February 2008 (and within 90 days of our initial public offering on February 9, 2007), our audit committee included said independent directors and also Oren Lieder (Chairman) and Raanan Cohen. Our board of directors determined Ms. Ronit Baytel to be qualified to serve as an "audit committee financial expert" under the Sarbanes Oxely Act and SEC rules.

Cost analysis committee

Our cost analysis committee reviews our costs and recommends ways to achieve cost efficiency in our activities to our Board of Directors. Our cost analysis committee consists of Messrs. Lieder (Chairman), Erel, Cohen, Livnat, Bisker, Waxe and Barnea.

Option committee

Our option committee administers the issuance of options under our 2006 Share Incentive Plan to our employees who are not office holders, as well as any actions and decisions necessary for the ongoing management of the plan. Our option committee consists of Messrs. Erel (Chairman), Dankner, Livnat and Barnea.

Security committee and observer

Our security committee, which we were required to appoint once we became a public company pursuant to our license, deals with matters concerning state security. Only directors who have the requisite security clearance by Israel's General Security Services may be members of this committee. The committee is required to be comprised of at least four members, including at least one external director. In addition, the Minister of Communications is entitled under our license to appoint a state employee with security clearance to act as an observer in all meetings of our Board of Directors and its committees. Such an observer was recently appointed. Our security committee consists of Messrs. Waxe, Bisker Cohen and Barnea.

Internal Auditor

Under the Companies Law, the board of directors of a public company must appoint an internal auditor nominated by the audit committee. The role of the internal auditor is to examine whether a company's actions comply with applicable law and orderly business procedure. Under the Companies Law, the internal auditor may not be an interested party or an office holder, or a relative of any of the foregoing, nor may the internal auditor be the company's independent accountant or its representative. An interested party is generally defined in the Companies Law as a 5% or greater shareholder, any person or entity who has the right to designate one director or more or the chief executive officer of the company or any person who serves as a director or as the chief executive officer. Our internal auditor is Mr. Eli Nir, CPA.

Approval of Specified Related Party Transactions under Israeli Law

Fiduciary duties of office holders

The Companies Law imposes a duty of care and a duty of loyalty on all office holders of a company. The duty of care requires an office holder to act with the degree of care with which a reasonable office holder in the same position would have acted under the same circumstances. The duty of care includes a duty to use reasonable means, in light of the circumstances, to obtain:

- information on the appropriateness of a given action brought for his or her approval or performed by virtue of his or her position; and
- all other important information pertaining to these actions.

The duty of loyalty of an office holder includes a duty to act in good faith and for the best interests of the company, including to:

- refrain from any conflict of interest between the performance of his or her duties in the company and his or her other duties or personal affairs;
- refrain from any activity that is competitive with the company;
- refrain from exploiting any business opportunity of the company to receive a personal gain for himself or herself or others; and

- disclose to the company any information or documents relating to the company's affairs which the office holder received as a result of his or her position as an office holder.

Personal interests of an office holder

The Companies Law requires that an office holder disclose any personal interest that he or she may have and all related material information known to him or her relating to any existing or proposed transaction by the company promptly and in any event no later than the first meeting of the board of directors at which such transaction is considered. If the transaction is an extraordinary transaction, the office holder must also disclose any personal interest held by the office holder's spouse, siblings, parents, grandparents, descendants, spouse's descendants and the spouses of any of these people.

Under the Companies Law, an extraordinary transaction is a transaction:

- other than in the ordinary course of business;
- that is not on market terms; or
- that is likely to have a material impact on the company's profitability, assets or liabilities.

Under the Companies Law, once an office holder complies with the above disclosure requirement, the transaction can be approved, provided that it is not adverse to the company's interest. A director who has a personal interest in a matter which is considered at a meeting of the board of directors or the audit committee will generally not be present at this meeting or vote on this matter unless a majority of the directors or members of the audit committee have a personal interest in the matter. If a majority of the directors have a personal interest in the matter, the matter also requires approval of the shareholders of the company. Under the Companies Law, unless the articles of association provide otherwise, a transaction with an office holder, or a transaction with a third party in which the office holder has a personal interest, requires approval by the board of directors. If it is an extraordinary transaction or an undertaking to indemnify or insure an office holder who is not a director, audit committee approval is required, as well. Arrangements regarding the compensation, indemnification or insurance of a director require the approval of the audit committee, board of directors and shareholders, in that order. Our articles of association provide that a non-extraordinary transaction with an office holder, or with a third party in which an office holder has a personal interest, may be approved by our Board of Directors, by our Audit Committee or, if the transaction involves the provision of our communications services and equipment or involves annual payments not exceeding NIS 250,000 per transaction, by our authorized signatories.

Personal interests of a controlling shareholder

Under the Companies Law, the disclosure requirements that apply to an office holder also apply to a controlling shareholder of a public company. A controlling shareholder is a shareholder who has the ability to direct the activities of a company, including a shareholder that owns 25% or more of the voting rights if no other shareholder owns more than 50% of the voting rights, but excluding a shareholder whose power derives solely from his or her position on the board of directors or any other position with the company. Accordingly, DIC, and entities and persons that directly or indirectly control DIC, are considered to be our

controlling shareholders. Extraordinary transactions with a controlling shareholder or in which a controlling shareholder has a personal interest, and the terms of compensation of a controlling shareholder or his or her relative, who is an employee or director, require the approval of the audit committee, the board of directors and a majority of the shareholders of the company. In addition, the shareholder approval must fulfill one of the following requirements:

- at least one-third of the shareholders who have no personal interest in the transaction and who vote on the matter must vote in favor of the transaction; or
- the shareholders who have no personal interest in the transaction who vote against the transaction may not represent more than 1% of the voting rights in the company.

Duties of shareholders

Under the Companies Law, a shareholder has a duty to refrain from abusing his or her power in the company and to act in good faith in exercising its rights in, and performing its obligations to the company and other shareholders, including, among other things, voting at general meetings of shareholders on the following matters:

- an amendment to the articles of association;
- an increase in the company's authorized share capital;
- a merger; and
- approval of related party transactions that require shareholder approval.

In addition, any controlling shareholder, any shareholder who knows that its vote can determine the outcome of a shareholders' vote and any shareholder who, under the company's articles of association, can appoint or prevent the appointment of an office holder or holds any other right in respect of the company, is required to act with fairness towards the company. The Companies Law does not describe the substance of this duty except to state that the remedies generally available upon a breach of contract will also apply in the event of a breach of the duty to act with fairness.

Approval of Private Placements

Under the Companies Law, a private placement of securities requires approval by the board of directors and the shareholders of the company if it will cause a person to become a controlling shareholder or if:

- the securities issued amount to 20% or more of the company's outstanding voting rights before the issuance;
- some or all of the consideration is other than cash or listed securities or the transaction is not on market terms; and
- the transaction will increase the relative holdings of a shareholder that holds 5% or more of the company's outstanding share capital or voting rights or that will cause any person to become, as a result of the issuance, a holder of more than 5% of the company's outstanding share capital or voting rights.

D. EMPLOYEES

Our ability to achieve our strategic goals largely depends on our employees. Consequently, we strive to recruit the most suitable candidates for each position, to give our employees the best training needed to qualify them for their tasks within our organization and aim to keep them satisfied while being productive and efficient. We implement a comprehensive review system that periodically analyzes our employees' performance in order to improve their performance and in order to enable us to properly compensate, retain and promote our best employees. Since we are committed to provide the best service to our subscribers, approximately 80% of our work force is engaged in customer facing positions.

During the second half of 2007, as part of our strategy to constantly improve service level and customer satisfaction and in preparation for the implementation of number portability, we enlarged our work force. Thereafter, we began to reduce the workforce recruited in preparation for number portability, while maintaining an enlarged customer service and improved level of service.

The numbers and breakdowns of our full-time equivalent employees as of the end of the past three years are set forth in the following table:

| Unit | Number of Full-Time Equivalent Positions | | |
|-----------------------------|--|--------------------|--------------------|
| | December 2005** | December 2006** | December 2007** |
| Management and headquarters | 39 | 32 | 34 |
| Human resources | 105 | 44 | 46 |
| Marketing | 86 | 73 | 74 |
| Customers* | 2,560 | 2,597 | 3,709 |
| Finance | 140 | 120 | 113 |
| Technologies | 898 | 700 | 654 |
| Total | 3,828 | 3,566 | 4,630 |

* Includes the customer facing units: business customers, sales and services, operations and supply chain. During 2006 some of the functions of some of the units above (such as security, purchasing and administration departments and logistic teams from other units) were transferred to the customer facing units.

**Including an estimated number of 265, 114 and 30 higher cost temporary workers, most of whom belonged to the Technologies unit at December 2005, 2006 and 2007, respectively.

Israeli labor laws govern the length of the workday, minimum wages for employees, procedures for hiring and dismissing employees, determination of severance pay, annual leave, sick days and other conditions of employment. Israeli law generally requires severance pay upon the retirement or death of an employee or termination of employment. In addition, as of January 2008, under an order issued by the Ministry of Industry, Commerce and Labor, all Israeli employers are obligated to contribute to a pension plan amounts equal to a certain percentage of the employee's wages, for all employees, after a certain minimum period of employment. We are complying with this obligation. For those of our employees who are entitled to a pension arrangement according to their employment agreement, we fund future severance pay obligations by contributing to managers' insurance or other pension arrangements in the amount of 8.3% of the employee's wages. We have no unfunded liability in respect of these employees. Under the new order, additional employees are entitled to contribution to a pension plan, which shall increase gradually until 2013 and up to 5% of the employee's wages, with additional identical contribution for severance pay. A provision in our financial reports covers severance pay to those employees who were not entitled to managers' insurance or other pension arrangements or for the balance between

future severance pay according to the law and the contribution for severance payment, made according to said order. Furthermore, we and our employees are required to make payments to the National Insurance Institute, which is similar to the U.S. Social Security Administration. Such amounts also include payments by the employee for health insurance. The total payments to the National Insurance Institute are equal to approximately 17.7% of an employee's wages (up to a specified amount), of which the employee contributes approximately 12% and the employer contributes approximately 5.7%.

We enter into personal employment agreements with our employees on either a monthly (in most cases, full-time positions) or hourly basis. Employment agreements with most of our employees are at will. Substantially all of our employees have signed non-disclosure and non-competition agreements, although the enforceability of non-competition agreements is limited under Israeli law.

Our employee compensation structure is aimed at encouraging and supporting employee performance towards enabling us to meet our strategic goals. Approximately 2,900 of our employees are entitled to performance-based incentives, which are granted mainly to customer-facing personnel, such as sales and service employees. Moreover, substantially all employees, with the exception of customer service representatives who are eligible to additional compensation based on individual performance, are entitled to an annual bonus based on our overall performance, subject to the discretion of our Board of Directors. We intend to pay these employees a yearly bonus for the year 2007 in an aggregate amount of approximately NIS 62 millions. We also contribute funds on behalf of some of our employees to an education fund.

We have entered into agreements with a number of manpower agencies and programming companies under which they provide us with temporary workers.

Our employees are not represented by any labor union. Since our inception, we have not experienced labor-related work stoppages and believe that our relations with our employees are good.

E. SHARE OWNERSHIP

As of February 29, 2008, one of our directors, Mr. Nochi Dankner may be deemed to beneficially own 56,650,000, or approximately 58.10%, of our ordinary shares. These ordinary shares are beneficially owned by DIC, of which Mr. Dankner is the Chairman of the board of directors. Mr. Dankner is also a controlling shareholder, the Chairman of the board of directors and Chief Executive Officer of IDB and the Chairman of the board of directors of IDB Development. Mr. Dankner and each of our other directors who are affiliated with IDB or DIC, disclaims beneficial ownership of such shares.

Except as described above, none of our executive officers or directors beneficially owns 1% or more of our outstanding ordinary shares.

2006 Share Incentive Plan

In September 2006, our Board of Directors approved an option plan for our employees, directors, consultants and sub-contractors and to those of our affiliates and our shareholders' affiliates. The plan has an initial pool of 2,500,000 options or restricted stock

units, or RSUs and is intended to qualify for capital gains tax treatment under Section 102 of the Israeli Income Tax Ordinance.

Under the plan, our Board of Directors (or an option committee to which such authority may be delegated by our Board of Directors) is authorized to determine the terms of the awards, including the identity of grantees, the number of options or RSUs granted, the vesting schedule and the exercise price.

The options / RSUs have a term of six years and vest in four equal installments on each of the first, second, third and fourth anniversary of the date of grant. Under the plan, unvested options / RSUs terminate immediately upon termination of employment or service. The plan defines acceleration events of options/ RSUs granted, including a merger, a consolidation, a sale of all or substantially all of our consolidated assets, or any reduction in share ownership by DIC and its affiliates to less than 50.01% of our outstanding share capital. The plan terminates upon the earlier of ten years from its adoption date or the termination of all outstanding options / RSUs pursuant to an acceleration event.

In October and November 2006, we granted options to purchase an aggregate of 2,414,143 ordinary shares at an exercise price of \$12.60 per share on the terms set forth above. Among those grants were options to purchase up to 450,000 ordinary shares to each of Mr. Ami Erel, our Chairman of the Board, and Mr. Amos Shapira, our Chief Executive Officer. The balance of those grants was made to our officers and senior employees. Distribution of cash dividends before the exercise of these options, reduces the exercise price of each option by an amount equal to the gross amount of the dividend per share distributed. In March 2007, we granted options to purchase an aggregate of 30,786 ordinary shares at an exercise price of \$12.60 per share to certain of our senior employees, under the terms of the plan.

As of December 31 2007, an aggregate of 2,396,896 ordinary shares are issuable upon exercise of options according to the terms above. However, the terms of the 2006 Share Incentive Plan provide for a net exercise mechanism, the result of which is to require us to issue a smaller number of ordinary shares than represented by the outstanding options. Unless the Board of Directors otherwise approves, the number of ordinary shares issuable by us upon the exercise of an option will represent a market value that is equal to the difference between the market price of the ordinary shares and the option exercise price of the exercised options, at the date of exercise.

In March 2007, we filed a registration statement on Form S-8 under the Securities Act covering all ordinary shares subject to outstanding options or issuable pursuant to our 2006 Share Incentive Plan. Shares registered under this Form S-8 registration statement are available for sale in the open market, subject to Rule 144 volume limitations applicable to affiliates, vesting restrictions or the contractual restrictions described below.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. MAJOR SHAREHOLDERS

The following table sets forth information regarding beneficial ownership of our shares as of February 29, 2008, by each person, or group of affiliated persons, known to us to be the beneficial owner of 5% or more of our outstanding shares.

In accordance with the rules of the SEC, beneficial ownership includes voting or investment power with respect to securities and includes any shares issuable pursuant to options that are exercisable within 60 days of February 29, 2008. Any shares issuable pursuant to options are deemed outstanding for computing the percentage of the person holding such options but are not outstanding for computing the percentage of any other person. The percentage of beneficial ownership for the following table is based on 97,504,721 ordinary shares outstanding as of February 29, 2008. To our knowledge, except as indicated in the footnotes to this table and pursuant to applicable community property laws, our major shareholders do not have different voting rights and the persons named in the table have sole voting and investment power with respect to all ordinary shares held by them.

| Name of Beneficial Owner | Shares Beneficially Owned | |
|--|---------------------------|---------|
| | Number | Percent |
| Discount Investment Corporation Ltd.* | 56,650,000 | 58.10% |
| Directors and executive officers as a group (21 persons)** | 57,089,392 | 58.55% |

*Includes 24,375,855 ordinary shares held by two wholly-owned subsidiaries of DIC (namely, PEC Israel Economic Corporation, a Maine corporation, and DIC Communication and Technology Ltd., an Israeli company) and 5,362,500 ordinary shares, representing 5.5% of our issued and outstanding shares, held by four shareholders whose voting rights are vested in DIC. DIC is a majority-owned subsidiary of IDB Development Corporation Ltd., or IDB Development, which in turn is a majority-owned subsidiary of IDB. IDB, IDB Development and DIC are public Israeli companies traded on the Tel Aviv Stock Exchange.

IDB is controlled as follows:

- Ganden Holdings Ltd., or Ganden, a private Israeli company controlled by Nochi Dankner (who is also the Chairman of the board of directors and Chief Executive Office of IDB, the Chairman of the board of directors of IDB Development and DIC and one of our directors) and his sister Shelly Bergman, holds, directly and through a wholly-owned subsidiary, approximately 52.04% of the outstanding shares of IDB;
- Shelly Bergman, through a wholly-owned company, holds approximately 4.23% of the outstanding shares of IDB;
- Avraham Livnat Ltd., or Livnat, a private company controlled by Avraham Livnat (one of whose sons, Zvi Livnat, is a director and Executive Vice President of IDB, a director and Deputy Chairman of the board of directors of IDB Development and a director of DIC, and another son, Shay Livnat, is one of our directors and a director of IDB Development) holds, directly and through a wholly-owned subsidiary, approximately 12.36% of the outstanding shares of IDB; and
- Manor Holdings BA Ltd., or Manor, a private company controlled by Ruth Manor (whose husband, Isaac Manor, is one of our directors a director and Deputy Chairman of the board of directors of IDB, and a director of IDB Development and DIC, and their son Dori Manor is a director of IDB, IDB

Development and DIC) holds, directly and through a majority-owned subsidiary, approximately 12.31% of the outstanding shares of IDB.

Subsidiaries of Ganden, Livnat and Manor have entered into a shareholders agreement with respect to shares of IDB held by these subsidiaries, constituting 31.02%, 10.34% and 10.34%, respectively, of the outstanding shares of IDB for the purpose of maintaining and exercising control of IDB as a group. Their additional holdings in IDB are not subject to the shareholders agreement. The term of the shareholders agreement expires in May 2023.

Most of the foregoing shares in IDB have been pledged to financial institutions as collateral for loans taken to finance the purchase of the shares. Upon certain events of default, these financial institutions may foreclose on the loans and assume ownership of or sell the shares.

Based on the foregoing, IDB and IDB Development (by reason of their control of DIC), Ganden, Manor and Livnat (by reason of their control of IDB) and Nochi Dankner, Shelly Bergman, Ruth Manor, and Avraham Livnat (by reason of their control of Ganden, Manor and Livnat, respectively) may be deemed to share with DIC the power to vote and dispose of our shares beneficially owned by DIC. Each of these entities (other than DIC) and persons disclaims beneficial ownership of such shares.

**Includes 439,392 shares issuable upon the exercise of stock options that are exercisable on, or within 60 days following, February 29, 2008. However, the terms of the 2006 Share Incentive Plan provide for a net exercise mechanism, the result of which is to require us to issue a smaller number of ordinary shares than represented by the outstanding options. Unless the Board of Directors otherwise approves, the number of ordinary shares issuable by us upon the exercise of an option will represent a market value that equals the difference between the market price of the ordinary shares and the option exercise price of the exercised options, at the date of exercise. Also includes the 56,650,000 shares held, directly or indirectly, by DIC, which may be deemed to be beneficially owned by Nochi Dankner by virtue of his control of IDB. Each of our directors who is affiliated with IDB or DIC disclaims beneficial ownership of such shares.

As of February 29, 2008, we had seven holders of record of our equity securities who are, to our knowledge, U.S. persons. In aggregate, these shareholders hold approximately 54.9% of our outstanding shares (excluding DIC's direct holdings, which are held on record by a U.S. person). One of the holders, PEC Israel Economic Corporation, a subsidiary of DIC, holds approximately 12.5% of our outstanding shares; this holding is included in DIC's beneficial ownership entry in the table above. The number of record holders in the United States is not representative of the number of beneficial holders nor is it representative of where such beneficial holders reside since approximately 69.5% of our ordinary shares were held of record by Cede & Co. on behalf of DIC (excluding its affiliates), brokers or other nominees.

Prior to September 2005, our initial principal shareholders were DIC, which indirectly held approximately 25% of our share capital, and BellSouth Corporation and the Safra brothers of Brazil, who indirectly held together approximately 69.5% of our share capital and held the voting rights in additional 5.5% of our share capital. DIC acquired the shares and voting rights of BellSouth and the Safra brothers in September 2005 and subsequently sold an aggregate of 16.0% of our share capital to financial investors in four transactions during 2006 and an additional approximately 19.5% of our share capital as part of our initial public offering in February 2007. Also as part of our initial public offering, Goldman Sachs International, then a 5% shareholder, sold 1% of our share capital. In September 2007 and January 2008, DIC sold additional 3% and approximately 3.4%, respectively, of our issued share capital to a financial institution which informed DIC at the time of its intention to place such shares for sale outside the United States to non-US investors

B. RELATED PARTY TRANSACTIONS

Agreements among Our Shareholders

In September 2005, DIC acquired the shares and voting rights in our company held indirectly by BellSouth and the Safra brothers. In 2006, DIC sold a portion of these shares in four transactions to six financial investors based on the price of the Safra transaction, with adjustments for dividends paid and certain additions to such price accrued during the period from the closing of the Safra transaction to the applicable sale transaction. The following summaries of the agreements between DIC and certain other shareholders relate only to provisions that survive the closing of our initial public offering.

Original 1997 shareholders agreement

Brian Greenspun, Daniel Steinmetz, Benjamin Steinmetz and Shlomo Piotrkowsky, who own, directly or indirectly, an aggregate of 5.5% of our outstanding ordinary shares, granted the voting rights in their shares to BellSouth and the Safra brothers. The voting rights were assigned to DIC in connection with its acquisition of our control in September 2005. These minority shareholders are restricted from transferring their shares without the prior written consent of DIC and subject to a right of first refusal in favor of DIC. Each of these minority shareholders is also committed not to compete, directly or indirectly, with our cellular communications business in Israel so long as he is a shareholder and for a period of one year thereafter.

Goldman Sachs 2006 share purchase agreement and shareholders agreement

In 2006, DIC sold 5% of our issued and outstanding share capital to Goldman Sachs International, an affiliate of Goldman Sachs & Co. In connection with this transaction, DIC undertook to cause us, subject to applicable law and contractual limitations, to adopt a dividend policy to distribute annually at least 75% of our annual net income, provided that any such distribution is not detrimental to our cash needs or to any plans authorized by our Board of Directors. The parties agreed that our Board of Directors would include at least seven directors, excluding external (independent) directors, with the chairman of our Board of Directors having a deciding vote on matters that are tied. For so long as DIC is our largest shareholder and holds at least 35% of our voting power, it was agreed that the parties would endeavor to cause the election of our chairman from among the directors nominated by the IDB group. The parties further agreed that they would use all their voting power to elect all nominees designated by the IDB group to our Board of Directors.

Any private transfer of shares by either party is subject to the transferee becoming a party to the shareholders agreement between the parties. The parties are prohibited from transferring their holdings to a person who is in direct competition with us in Israel, if such transfer may result in cancellation or revocation of any of our licenses, or to a person which is, or is controlled by, a resident or citizen of a country with which the State of Israel has no diplomatic relations or which is an adversary thereof. Goldman Sachs International agreed in principle that certain telecom holdings of the IDB group may be sold to us, subject to the conditions set forth in the agreement. We are not aware of any plan for such a transaction, which in any event would not be permitted by current regulatory restrictions.

As Goldman Sachs & Co. is no longer registered in our shareholders' register we do not know if it still holds any of our ordinary shares.

Migdal 2006 share purchase agreement

In 2006, DIC sold 4% of our outstanding ordinary shares to Migdal Insurance Company Ltd. and two of its affiliates, or the Migdal shareholders. As part of this transaction, DIC granted the Migdal shareholders (i) a tag along right, in the event it sells shares resulting in it no longer being a controlling shareholder and (ii) an adjustment mechanism, in the event that, prior to April 3, 2008, it sells shares at a price per share which is less than the price of \$14.71 per share paid by the Migdal shareholders (subject to adjustment for dividend distributions and other recapitalization events and a certain interest-like adjustment), according to which it will transfer to the Migdal shareholders, for no additional consideration, such number of shares that equals the price difference based on the lower price per share. In return, DIC has the right to force the Migdal shareholders to sell their shares in a transaction in which DIC sells all of its shares to a purchaser outside the IDB group.

As the Migdal shareholders are no longer registered in our shareholders' register we do not know if they still hold any of our ordinary shares.

Bank Leumi 2006 share purchase agreement and First International Bank 2006 share purchase agreement

In 2006, DIC sold 5% of our outstanding ordinary shares to Leumi and Co. Investment House Ltd. (an affiliate of Bank Leumi Le-Israel B.M.) and 2% of our outstanding shares to Stocofin (Israel) Ltd. (an affiliate of the First International Bank of Israel Ltd.). As part of these transactions, DIC undertook to cause us, subject to applicable law, our license and contractual limitations, to adopt a dividend policy to distribute annually at least 75% of our annual net income, provided that any such distribution is not detrimental to our cash needs or to any plans authorized by our Board of Directors. Furthermore, DIC granted these entities (i) a tag along right in the event it sells shares resulting in the purchaser becoming a controlling shareholder and (ii) an adjustment mechanism, in the event that, prior to May 29, 2008, it sells shares or we issue shares (subject to certain exceptions) at a price per share lower than the price per share paid by these entities (which was \$14.87 for Leumi and Co. Investment House Ltd. and \$14.20 for Stocofin (Israel) Ltd.) (subject to adjustment for dividend distributions and other recapitalization events and a certain interest-like adjustment), according to which it will transfer to such other parties, for no additional consideration, such number of shares that equals the price difference based on the lower price per share.

As Leumi and Co. Investment House Ltd. And Stocofin (Israel) Ltd. are no longer registered in our shareholders' register, we do not know if they still hold any of our ordinary shares.

Relationship with IDB

As part of the issuance of our debentures in December 2005, January 2006 and May 2006, we sold NIS 176.7 million aggregate principal amount of our Series A and Series B Debentures to investors who are members of the IDB group. The terms of participation of our affiliates in all of these transactions were the same as those of unaffiliated parties.

As part of the issuance of our debentures in October 2007, we sold NIS 15 million aggregate principal amount of our Series C and Series D Debentures to investors who are members of the IDB group. As part of the issuance of additional Series C and Series D debentures in February 2008 we sold approximately NIS 48 million aggregate principal

amount of Series C and Series D Debentures to investors who are members of the IDB group. The terms of participation of our affiliates in all of these transactions were the same as those of unaffiliated parties.

As of December 31, 2007, an aggregate amount of approximately NIS 142 million of our Series A, Series B, Series C and Series D Debentures were held by investors who are members of the IDB group and/or entities affiliated with IDB's principal shareholders or officers.

As of December 31, 2007, an aggregate of 1,024,861 of our ordinary shares (in addition to the holdings set forth in the Beneficial Owners' table above) were held by members of the public through, among others, provident funds, mutual funds, pension funds, exchange traded funds, insurance policies and unaffiliated third-party client accounts, which are managed by subsidiaries of IDB.

In October 2006, we entered into an agreement with DIC, to benefit from the experience that DIC has in telecommunications and in the Israeli market generally, pursuant to which DIC provides us with services in the areas of management, finance, business and accountancy in consideration of NIS 2.0 million plus VAT per year. Among the services included are consulting and assistance on managerial, economic and accounting issues, such as the preparation of an annual budget, strategic plans and central business processes for us. In addition, the provision of employees and officers of DIC and its affiliates to be directors of Cellcom is included in the agreement. This agreement is for a term of one year and is automatically renewed for one-year terms unless either party provides 60 days' prior notice to the contrary.

In December 2007, we entered into an agreement for the sale of real estate in Modi'in to Bayside, a public company controlled by IDB. The transaction was approved by our audit committee, board of directors and shareholders meeting. For a summary of the terms of the agreement, see "Item 4. Information on the Company – D. Property Plant and Equipment – Real Estate in Modi'in".

In the ordinary course of business, from time to time, we purchase, lease, sell and cooperate in the sale of goods and services, or otherwise engage in transactions with entities that are members of the IDB group and entities affiliated with IDB's principal shareholders or officers. We believe that all such transactions are on commercial terms comparable to those that we could obtain from unaffiliated parties.

Registration Rights Agreement

In 2006, we entered into a registration rights agreement with DIC, two wholly-owned subsidiaries of DIC which are shareholders and six other shareholders. For a summary of the terms of the agreement, see "Item 10. Additional Information – C. Material Contracts."

C. INTERESTS OF EXPERTS AND COUNSEL

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION

Consolidated Financial Statements

See Item 17.

Legal Proceedings

General

We are served from time to time with claims concerning various matters, including disputes with customers, commercial disputes with third parties with whom we do business and disputes with government entities, including local planning and building committees and the Ministry of Communications. The disputes with customers include purported class actions regarding claims such as alleged overcharging of tariffs and interconnection fees, misleading representations, unlawful rounding of tariffs and call units, providing services not in compliance with our license's requirements or with a subscriber's agreement. The following is a summary of our material litigation.

Two recent legislative changes, the adoption of the Class Actions Law and the 2005 amendment to the Consumer Protection Law, include provisions that expand the causes of action for which a class of litigants may bring suit, including with regard to damages incurred prior to the effective dates of the law and the amendment, reducing the minimal requirements for certification of a class action suit and broadening and loosening the qualifications to be the leading plaintiff in a class action lawsuit. These laws have increased and may increase further, the number of requests for certification of class action lawsuits against us and have increased and may increase further, our legal exposure as a result of such class action lawsuits and our legal costs in defending against such suits. See "Item 3. Key Information – D. Risk Factors—We are exposed to, and currently are engaged in, a variety of legal proceedings, including class action lawsuits."

All amounts noted below are nominal and, in cases where the claim is approved, will be adjusted to reflect changes in the Israeli CPI and statutory interest, from the date that each claim was filed.

Purported class actions

In September 2000, a purported class action lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa by one of our subscribers in connection with VAT charges in respect of insurance premiums and the provision of insurance services that were allegedly not provided in accordance with the law. If the lawsuit is certified as a class action, the amount of the claim is estimated by the plaintiff to be NIS 402 million. In February 2006, the motion for certification as a class action was denied. In March 2006, an appeal was filed with the Supreme Court challenging the dismissal. Based on advice of counsel, we believe that we have good defenses against the appeal. Accordingly, no provision has been included in our financial statements in respect of this claim.

In August 2001, a purported class action lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa by one of our subscribers in connection with our outgoing call tariffs on the "Talkman" (pre-paid) plan and the collection of a distribution fee for "Talkman"

calling cards. If the claim is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 135 million. In June 2004, the motion for certification as a class action was denied. In September 2004, this decision was appealed to the Israeli Supreme Court. In July, 2007, the Israeli Supreme Court accepted a petition filed by both parties with mutual consent, in light of the Israeli Class Action Law, 2006, to resubmit the purported class action lawsuit for consideration in the District Court of Tel Aviv-Jaffa. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. . Accordingly, no provision has been included in our financial statements in respect of this claim.

In August 2001, a purported class action lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa by one of our subscribers in connection with air time tariffs and subscriber fees that were allegedly collected not in accordance with the language of the agreement signed by our subscribers at the time of their joining our network. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 1.26 billion, plus punitive damages at a rate of not less than 100% of the amount of the judgment. In February 2004, the motion for certification as a class action was denied. In March 2004, this decision was appealed to the Israeli Supreme Court. In January 2006, the Supreme Court approved the plaintiff's motion to amend his complaint to reflect the amendment to the Consumer Protection Law and return to the District Court in order to examine the amendment's effect, if any, on the District Court ruling, which remains in effect. In October 2006, a separate motion was accepted allowing the plaintiff to further revise his complaint as a result of enactment of the Class Action Law. Based on advice of counsel, we believe we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been included in our financial statements in respect of this claim.

In December 2002, a purported class action lawsuit was filed against Pelephone and us in the District Court of Tel-Aviv-Jaffa in connection with our incoming call tariff to subscribers of other operators when calling our subscribers during the period before the regulation of interconnect fees. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 1.6 billion. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been included in our financial statements in respect of this claim.

In April 2003, a purported class action lawsuit was filed against us and two other cellular operators, with the District Court of Tel-Aviv-Jaffa in connection with our incoming SMS tariff to subscribers of other operators when sending SMS messages to our subscribers during the period before the regulation of SMS interconnect fees. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 90 million, without specifying the amount claimed from us. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision was included in our financial statements in respect of this claim.

In August 2003, a purported class action lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa (and later transferred to the District Court of the Central Region) by one of our subscribers in connection with our method of rounding the rates of calls, our method of linking rates of calls to the consumer price index and a certain rate that was approved by the Ministry of Communications in 1996 was unlawfully approved. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 150 million. Following the amendment to the Consumer Protection Law in December

2005, the plaintiff filed an amended statement of its claim in March 2006, to which we have replied. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been included in our financial statements in respect of this claim.

In August 2006, a purported class action lawsuit was filed against us and two other cellular operators in the District Court of Tel-Aviv–Jaffa by one of our subscribers in connection with sums allegedly unlawfully charged for a segment of a call that was not actually carried out. If the lawsuit is certified as a class action, the total amount claimed is estimated by the plaintiffs as exceeding NIS 100 million without specifying the amount claimed from us individually. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been made in our financial statements in respect of this claim. In November 2006 a similar purported class action was filed against us, two other cellular operators and two landline operators in the District Court of Tel-Aviv–Jaffa by four plaintiffs claiming to be subscribers of the three cellular operators. The latter was withdrawn in October 2007, by the plaintiffs, with regards to us and the other two cellular operators, following a procedural agreement reached between the plaintiffs in the latter lawsuit and the plaintiffs in former purported class action lawsuit (the two lawsuits will be heard together). Had the withdrawn lawsuit been certified as a class action, the amount claimed from us and each of the other cellular operators by the plaintiffs would have been approximately NIS 53 million (the amount claimed from all five defendants was estimated by the plaintiffs to be approximately NIS 159 million).

In January 2007, a purported class action lawsuit was filed against us, two other cellular operators and two landline operators in the District Court of Jerusalem by three plaintiffs claiming to be subscribers of some of the defendants, in connection with an alleged violation of the defendants' statutory duty to allow their subscribers to transfer with their number to another operator, thus, allegedly, causing monetary damage to the subscribers. In March 2007, the motion for certification as a class action was dismissed without prejudice and the lawsuit was dismissed with prejudice, following request of the plaintiffs to withdraw their claim. Had the lawsuit been certified as a class action, the total amount claimed was estimated by the plaintiffs to be at least NIS 10.6 billion.

In February 2007, a purported class action lawsuit was filed against us and two other cellular operators in the District Court of Tel-Aviv, by plaintiffs claiming to be subscribers of the three cellular operators, in connection with sums that were allegedly overcharged in breach of the cellular operators' licenses, based on charge units larger than the charge units we were allegedly authorized to charge under our licenses for calls initiated or received by the subscribers while abroad. If the lawsuit is certified as a class action, the total amount claimed from the cellular operators is estimated by the plaintiffs to be approximately NIS 449 million, of which approximately NIS 193.5 million is attributed to us. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been made in our financial statements in respect of this claim.

In April 2007, a purported class action lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa, by two plaintiffs claiming to be our subscribers, alleging that we unlawfully and in violation of our license raised our tariffs, in pricing plans that included a commitment to purchase certain services for a fixed period. The lawsuit was dismissed with

prejudice in February 2008. If the lawsuit had been certified as class action, the amount claimed would have been approximately NIS 230 million.

In May 2007, another purported class action lawsuit alleging claims of similar nature as the April 2007 purported class action, was filed against us in the same court, by two other plaintiffs claiming to be our subscribers. If the lawsuit is certified as class action, the amount claimed is approximately NIS 875 million. Based on advice of counsel, we believe that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been included in our financial statements in respect of this claim.

In September 2007, a purported class action lawsuit was filed against us and two other cellular operators in the District Court of Jerusalem, by three plaintiffs who claim to be subscribers of the defendants, alleging that the defendants charged their subscribers for SMS messages sent by them to subscribers who had disabled their ability to receive SMS messages and/or misled the senders by an indication on their cell phones that such messages were sent. If the claim is certified as a class action, the amount claimed from all three defendants is estimated by the plaintiffs to be approximately NIS 182 million, without specifying the amount claimed from us specifically. At this preliminary stage, before we have submitted our response, we believe, based on advice of counsel, that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.

In November 2007, a purported class action lawsuit was filed against us in the District Court of the Central Region, by a plaintiff claiming to be our subscriber, alleging we have charged our subscribers for content services without obtaining their specific consent, in a manner which complies with the provisions of our general license. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be approximately NIS 432 million. At this preliminary stage, before we have submitted our response, we believe, based on advice of counsel, that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.

In December 2007, a purported class action lawsuit was filed against us and two other cellular operators in the District Court of Tel Aviv-Jaffa, by plaintiffs who claim to be residing next to cell sites of the Defendants which the plaintiffs claim were built in violation of the law. The plaintiffs allege that the Defendants have created environmental hazards by unlawfully building cell sites and therefore demand that the defendants will compensate the public for damages (other than personal damages, such as depreciation of property and/or health related damages which are excluded from the purported class action), demolish existing unlawfully built cell sites and refrain from unlawfully building new cell sites. If the lawsuit is certified as a class action, the compensation claimed from the defendants (without any allocation of this amount among the defendants) is estimated by the plaintiffs to be NIS 1,000 million. At this preliminary stage, before we have submitted our response, we believe, based on advice of counsel, that we have good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.

In March 2008, a purported class action lawsuit was filed against us in the District Court of Central Region, by plaintiffs claiming to be our subscribers. The plaintiffs claim that we have unlawfully charged our subscribers for providing them with call details records. If the lawsuit is certified as a class action, the total amount claimed from us is estimated by

the plaintiffs to be approximately NIS 440 million. At this preliminary stage we are unable to assess the lawsuit's chances of success. Accordingly, no provision has been made in the financial statements in respect of this claim.

Commercial and other disputes

In April 2005, a lawsuit was filed against us in the District Court of Tel-Aviv-Jaffa by one of our former dealers and importers for the amount of NIS 28 million (reduced for court fee purposes from approximately NIS 38 million), alleging that we have breached an agreement between the parties. Based on advice of counsel, we believe that we have good defense against such claim. Accordingly, no provision has been made in our financial statements in respect of this claim.

In January 2007, a lawsuit was filed against us in an arbitration proceeding for the amount of approximately NIS 35 million by a company that purchased cellular services from us in order to sell the services to its customers, alleging, among other things, that we have breached our agreements with the plaintiff and making claims concerning our conduct. We reject all claims made by the plaintiff against us. Based on advice of counsel, we believe that we have good defense against such claim. Accordingly, no provision has been made in our financial statements in respect of this claim.

There is a dispute between the Ministry of Communications and us with respect to the payment of fees for GSM and UMTS frequencies. The amount in dispute as of December 31, 2007 is approximately NIS 69 million (including interest and CPI linkage differences). Until a final decision on this matter, we deposited about half of this amount with the Ministry of Communications. Based on advice of counsel, we believe that the method we apply is the lawful method. Accordingly, no provision was included in our financial statements in respect of the amount in dispute, including the amount we deposited. We have applied to the courts regarding this issue.

In December 2007, we were served with a petition filed with the Israeli High Court of Justice against the Ministry of Communications and another cellular operator, seeking to retroactively apply the amendment to the cellular operators' general license, effected September 2007, which prevents the cellular operators from offering subscribers calling plans using airtime charging units other than the basic airtime charging unit, or alternatively to retroactively cancel any charges which may be imposed on subscribers when transferring, before the lapse of a predetermined period, to calling plans based on the basic airtime charging unit. We and one other cellular operator were joined as formal respondents. The court has instructed only the Ministry of Communications to submit its response. In its recently submitted response, the Ministry of Communications opposes the petition. At this preliminary stage, before the court has decided to conduct a hearing and before we have submitted any response, we believe, based on advice of counsel, the court will not grant the remedies sought. Accordingly, no provision has been made in our financial statements in respect of this petition.

In a small number of instances, local planning and building committees that were sued for depreciation of property in accordance with Section 197 of the Planning and Building Law have attempted to join cellular operators as defendants to the claims, including us, despite the fact that the cellular operators (including us) in such cases did not provide indemnification letters to such planning and building committees. Based on advice of

counsel, we believe that we have good defenses against such claims. Accordingly, no provision has been included in our financial statements in respect of such claims.

Dividend Policy

In February 2006, our board of directors adopted a dividend policy to distribute each year at least 75% of our annual net income determined under Israeli GAAP, subject to applicable law, our license and our contractual obligations and provided that such distribution would not be detrimental to our cash needs or to any plans approved by our Board of Directors. In March 2007, our Board resolved to distribute dividends within the boundaries of the February 2006 dividend policy and until resolved otherwise, on a quarterly basis. Our Board will consider, among other factors, our expected results of operation, including changes in pricing and competition, planned capital expenditure for technological upgrades and changes in debt service needs, including due to changes in interest rates or currency exchange rates, in order to reach its conclusion that a distribution of dividends will not prevent us from satisfying our existing and foreseeable obligations as they become due. In addition, there is an agreement among the controlling shareholders of IDB, our ultimate parent company, to target a dividend distribution of at least 50% of its distributable gains each year. Dividend payments are not guaranteed and our Board of Directors may decide, in its absolute discretion, at any time and for any reason, not to pay dividends or to pay dividends at a ratio to net income that is less than that paid in the past. For example, our Board may determine that our cash needs for debt service, capital expenditures or operations may increase and that it would not be prudent to distribute dividends. Accordingly, shareholders should not expect that any particular amount will be distributed by us as dividends at any time, even if we have previously made dividend payments in such amount.

Our ability to pay dividends was previously subject to limitations under our credit facility, which was fully repaid and terminated in March 2008. Currently our ability to pay dividends is subject to the following limitations under Israeli law:

Israeli law provides that dividends may only be paid out of cumulative retained earnings or out of retained earnings over the prior two years, provided that there is no reasonable concern that the payment of the dividend will prevent us from satisfying our existing and foreseeable obligations as they become due. Further, our license requires that we and our 10% or more shareholders maintain at least \$200 million of combined shareholders' equity. DIC's shareholders' equity was over NIS 5 billion (over \$1.3 billion) at December 31, 2007.

We intend to declare dividends in NIS and convert them for payment in US\$ (where applicable) based upon the daily representative rate of exchange as published by the Bank of Israel prior to the distribution date.

Prior to 2006, we had not distributed dividends. In 2006, we distributed dividends in the amount of NIS 3.83 billion (\$996 million). In June 2007 we distributed a dividend in the amount of approximately NIS 198 million (\$51 million). In September 2007 we distributed a dividend in the amount of approximately NIS 201 million (\$52 million). In December 2007 we distributed a dividend in the amount of approximately NIS 256 million (\$67 million). The dividends distributed in 2006 constituted substantially all of our retained earnings from inception to December 31, 2005, and, for the first six months of 2006, substantially 75% of our net income in accordance with Israeli GAAP. The dividends distributed in respect of the first nine months of 2007 constituted approximately 95% of our net income in accordance

with Israeli GAAP for the nine months ended September 30, 2007, and were funded from net income and existing retained earnings.

On March 17, 2008 our board of directors declared a cash dividend for the fourth quarter of 2007 of NIS 1.78 per share, or approximately NIS 173 million in the aggregate, and a one-time extraordinary dividend for the year 2007 of NIS 5.40 per share, or approximately NIS 527 million in the aggregate. When taken together, the fourth quarter dividend and the one-time extraordinary dividend for 2007 amount to NIS 7.18 per share, or approximately NIS 700 million in the aggregate. The fourth quarter dividend and the one-time extraordinary dividend for the year 2007 will be funded out of a combination of net income for the fourth quarter and existing retained earnings at December 31, 2007. The one-time extraordinary dividend does not reflect any change to our dividend policy set out above. Further, the dividend per share that we will pay for the fourth quarter of 2007 does not reflect the level of dividends that will be paid for future quarterly periods, which can change at any time in accordance with the policy set out above.

B. SIGNIFICANT CHANGES

No significant change has occurred since December 31, 2007, except as otherwise disclosed in this annual report.

ITEM 9. THE OFFER AND LISTING

A. OFFER AND LISTING DETAILS

Trading in Israel

Our ordinary shares have traded on the Tel Aviv Stock Exchange under the symbol CEL since July 1, 2007. Our ordinary shares do not trade on any other trading market in Israel.

The following table sets forth, for the periods indicated, the reported high and low prices in NIS for our ordinary shares on the Tel Aviv Stock Exchange.

| | High NIS | Low NIS |
|-------------------|-------------|------------|
| Annually 2007 | 133.80 | 95.24 |
| Quarterly 2007 | | |
| Third Quarter | 110.77 | 95.24 |
| Fourth Quarter | 133.80 | 95.48 |
| Monthly 2007 | | |
| September | 102.40 | 95.24 |
| October | 103.29 | 95.48 |
| November | 121.50 | 100.93 |
| December | 133.80 | 119.60 |
| 2008 | | |
| January | 126.30 | 103.90 |
| February | 117.50 | 107.50 |

Explanation of Responses:

On March 13, 2008, the closing price per share of our Ordinary Shares on the TASE was NIS 111.6.

Trading in the United States

Our ordinary shares have traded on the New York Stock Exchange under the symbol CEL since February 6, 2007.

The following table sets forth, for the periods indicated, the high and low prices in \$ for our ordinary shares on The New York Stock Exchange.

| | High \$ | Low \$ |
|----------------|------------|-----------|
| Annually | | |
| 2007 | 34.11 | 16.81 |
| Quarterly | | |
| 2007 | | |
| Second Quarter | 25.34 | 16.81 |
| Third Quarter | 25.50 | 22.60 |
| Fourth Quarter | 34.11 | 23.52 |
| Monthly | | |
| 2007 | | |
| September | 24.46 | 23.16 |
| October | 25.91 | 23.52 |
| November | 32.40 | 25.24 |
| December | 34.11 | 29.98 |
| 2008 | | |
| January | 32.12 | 28.96 |
| February | 32.86 | 30.00 |

On March 13, 2008, the closing price per share of our Ordinary Shares on the NSYE was \$33.17.

B. PLAN OF DISTRIBUTION

Our ordinary shares are listed on the New York Stock Exchange and Tel Aviv Stock Exchange under the symbol “CEL”

D. SELLING SHAREHOLDERS

Not applicable.

E. DILUTION

Not applicable.

F. EXPENSES OF THE ISSUE

Not applicable.

ITEM 10. ADDITIONAL INFORMATION

A. SHARE CAPITAL

Not applicable.

B. MEMORANDUM AND ARTICLES OF ASSOCIATION

Objects and Purposes

Our registration number with the Israeli registrar of companies is 51-1930125. Our object is to engage, directly or indirectly, in any lawful undertaking or business whatsoever as determined by our Board of Directors, including, without limitation, as stipulated in our memorandum of association.

Transfer of Shares

Fully paid ordinary shares are issued in registered form and may be freely transferred unless the transfer is restricted or prohibited by our articles of association, applicable law, our licenses, the rules of the SEC or the rules of a stock exchange on which the shares are traded. The ownership or voting of ordinary shares by non-residents of Israel is not restricted in any way by our articles of association or the laws of the State of Israel, except for ownership by nationals of some countries that are, or have been, in a state of war with Israel.

According to our licenses, investors are prohibited from acquiring (alone or together with relatives or with other parties who collaborate on a regular basis) or transferring our shares, directly or indirectly (including a transfer by way of foreclosing on a pledge), in one transaction or a series of transactions, if such acquisition or transfer will result in a holding or transfer of 10% or more of any of our means of control, or from transferring any of our means of control if as a result of such transfer, control over our company will be transferred from one party to another, without the prior approval of the Ministry of Communications. Our specific licenses also require approval of the Minister of Communications before acquiring the ability to effect a significant influence over us. In this context, holding 25% of our means of control is presumed to confer significant influence. In addition, according to our licenses, if you hold more than 5% of our means of control, you may not hold, directly or indirectly, more than 5% of the means of control in Bezeq or another cellular operator in Israel (subject to certain exceptions) and may not serve as an office holder of one of our competitors, other than in specific circumstances and subject to the approval of the Ministry of Communications. For more details relating to these restrictions, please see "Item 4. Information on the Company – B. Business Overview – Government Regulations—Our Principal License" and our principal license, a convenience translation of which has been filed with the SEC. See "Item 19 – Exhibits". The holding and transfer restrictions under our licenses are posted on our website at www.cellcom.co.il under "Investor Relations –. Legal & Corporate"

Voting

Holders of our ordinary shares have one vote for each ordinary share held on all matters submitted to a vote of shareholders at a shareholder meeting. Shareholders may vote at shareholder meetings either in person, by proxy or by written ballot. Shareholder voting rights may be affected by the grant of special voting rights to the holders of a class of shares with preferential rights that may be authorized in the future. The Companies Law provides that a shareholder, in exercising his or her rights and performing his or her obligations toward the company and its other shareholders, must act in good faith and in a customary manner, and avoid abusing his or her power. This is required when voting at general meetings on matters such as changes to the articles of association, increasing the company's registered capital, mergers and approval of related party transactions. A shareholder also has a general duty to refrain from depriving any other shareholder of their rights as a shareholder. In addition, any controlling shareholder, any shareholder who knows that its vote can determine the outcome of a shareholder vote and any shareholder who, under the company's articles of association, can appoint or prevent the appointment of an office holder, is required to act with fairness towards the company. The Companies Law does not describe the substance of this duty, except to state that the remedies generally available upon a breach of contract will apply also in the event of a breach of the duty to act with fairness, and, to the best of our knowledge, there is no binding case law that addresses this subject directly. As required under our license, our articles of association provide that any holdings of our ordinary shares that contravene the holding or transfer restrictions contained in our license, which are summarized under “—Transfer of Shares” and “Item 4. Information on the Company – B. Business Overview - Government Regulations—Our Principal License,” will not be entitled to voting rights. In addition, our license requires that as a condition to voting at any meeting of shareholders, in person or by proxy, each shareholder must certify that its holdings of our shares do not contravene the restrictions contained in our license.

Election of Directors

Our ordinary shares do not have cumulative voting rights for the election of directors. Rather, under our articles of association our directors (other than external directors and directors appointed by Israeli citizens and residents from among our founding shareholders) are elected at a shareholders meeting by a simple majority of our ordinary shares. As a result, the holders of our ordinary shares that represent more than 50% of the voting power represented at a shareholder meeting have the power to elect any or all of our directors whose positions are being filled at that meeting, subject to the special approval requirements for external directors described under “Item 6.A – Directors and Senior Management—External Directors” and the right of DIC to directly appoint 20% of our directors described under “Item 6.A – Directors and Senior Management—Israeli-Appointed Directors.” Directors may also be appointed for office by our Board of Directors until the next annual general meeting of shareholders.

Dividend and Liquidation Rights

Our board of directors may declare a dividend to be paid to the holders of ordinary shares on a pro rata basis. Dividends may only be paid out of our profits and other surplus funds, as defined in the Companies Law, as of our most recent financial statement or as accrued over the past two years, whichever is higher, or, in the absence of such profits or surplus, with court approval. In any event, a dividend is permitted only if there is no reasonable concern that the payment of the dividend will prevent us from satisfying our

existing and foreseeable obligations as they become due. In the event of our liquidation, after satisfaction of liabilities to creditors, our assets will be distributed to the holders of ordinary shares on a pro rata basis. This right may be affected by the grant of preferential dividend or distribution rights to the holders of a class of shares with preferential rights that may be authorized in the future.

Shareholder Meetings

We are required to convene an annual general meeting of our shareholders once every calendar year within a period of not more than 15 months following the preceding annual general meeting. Our board of directors is required to convene a special general meeting of our shareholders at the request of two directors or one quarter of the members of our Board of Directors or at the request of one or more holders of 5% or more of our share capital and 1% of our voting power or the holder or holders of 5% or more of our voting power. All shareholder meetings require prior notice of at least 21 days, or up to 35 days if required by applicable law or regulation. We provide at least 40 day advance written notice, in accordance with the NYSE's rules. The chairperson of our Board of Directors presides over our general meetings. Subject to the provisions of the Companies Law and the regulations promulgated thereunder, shareholders entitled to participate and vote at general meetings are the shareholders of record on a date to be decided by the board of directors, which may be between four and 40 days prior to the date of the meeting.

Quorum

Our articles of association provide that the quorum required for any meeting of shareholders shall consist of at least two shareholders present, in person or by proxy or written ballot, who hold or represent between them at least one-third of the voting power of our issued share capital. A meeting adjourned for lack of a quorum generally is adjourned to the same day in the following week at the same time and place or, if not set forth in the notice to shareholders, to a time and place set by the chairman of the meeting with the consent of the holders of a majority of the voting power represented at the meeting and voting on the question of adjournment. At the reconvened meeting, the required quorum consists of at least two shareholders present, in person or by proxy or written ballot, unless the meeting was called pursuant to a request by our shareholders in which case the quorum required is the number of shareholders required to call the meeting as described under “—Shareholder Meetings.”

Resolutions

An ordinary resolution at a shareholders meeting requires approval by a simple majority of the voting rights represented at the meeting, in person, by proxy or written ballot, and voting on the resolution. Under the Companies Law, unless otherwise provided in the articles of association or applicable law, all resolutions of the shareholders require a simple majority. A resolution for the voluntary winding up of the company requires the approval by holders of 75% of the voting rights represented at the meeting, in person or by proxy or written ballot, and voting on the resolution.

Modification of Class Rights

The rights attached to any class, such as voting, liquidation and dividend rights, may be amended by written consent of holders of a majority of the issued shares of that class, or

by adoption of a resolution by a simple majority of the shares of that class represented at a separate class meeting.

Indemnification of Directors and Officers

Under the Companies Law, an Israeli company may not exempt an office holder from liability for breach of his duty of loyalty, but may exempt in advance an office holder from liability to the company, in whole or in part, for a breach of his or her duty of care (except in connection with distributions), provided the articles of association of the company allow it to do so. Our articles of association allow us to do so.

Our articles of association provide that, subject to the provisions of the Companies Law, we may enter into a contract for insurance against liability of any of our office holders with respect to each of the following:

- a breach of his or her duty of care to us or to another person;
- a breach of his or her duty of loyalty to us, provided that the office holder acted in good faith and had reasonable grounds to assume that his or her act would not prejudice our interests;
- a financial liability imposed upon him or her in favor of another person concerning an act performed in the capacity as an office holder.

We maintain a liability insurance policy for the benefit of our officers and directors.

Our articles of association provide that we may indemnify an office holder against:

- a financial liability imposed on or incurred by an office holder in favor of another person by any judgment, including a settlement or an arbitrator's award approved by a court concerning an act performed in the capacity as an office holder. Such indemnification may be approved (i) after the liability has been incurred or (ii) in advance, provided that the undertaking is limited to types of events which our Board of Directors deems to be foreseeable in light of our actual operations at the time of the undertaking and limited to an amount or criterion determined by our Board of Directors to be reasonable under the circumstances, and further provided that such events and amounts or criterion are set forth in the undertaking to indemnify;
- reasonable litigation expenses, including attorney's fees, incurred by the office holder as a result of an investigation or proceeding instituted against him or her by a competent authority, provided that such investigation or proceeding concluded without the filing of an indictment against him or her and either (A) concluded without the imposition of any financial liability in lieu of criminal proceedings or (B) concluded with the imposition of a financial liability in lieu of criminal proceedings but relates to a criminal offense that does not require proof of criminal intent; and
- reasonable litigation expenses, including attorneys' fees, incurred by the office holder or charged to him or her by a court, in proceedings instituted by us or on our behalf or by another person, or in a criminal indictment from which he or she was acquitted, or a criminal indictment in which he or she was

convicted for a criminal offense that does not require proof of intent, in each case relating to an act performed in his or her capacity as an office holder.

We have undertaken to indemnify our directors, officers and certain other employees for certain events listed in the indemnification letters given to them. Excluding reasonable litigation expenses, as described above, the aggregate amount payable to all directors and officers and other employees who may have been or will be given such indemnification letters is limited to the amounts we receive from our insurance policy plus 30% of our shareholders' equity as of December 31, 2001, or NIS 486 million, and to be adjusted by the Israeli CPI.

The Companies Law provides that a company may not exempt or indemnify an office holder, or enter into an insurance contract, which would provide coverage for any monetary liability incurred as a result of any of the following:

- a breach by the office holder of his or her duty of loyalty unless, with respect to insurance coverage or indemnification, the office holder acted in good faith and had a reasonable basis to believe that the act would not prejudice the company;
 - a breach by the office holder of his or her duty of care if the breach was done intentionally or recklessly;
 - any act or omission done with the intent to derive an illegal personal benefit; or
 - any fine or penalty levied against the office holder.

Under the Companies Law, any exemption of, indemnification of, or procurement of insurance coverage for, our office holders must be approved by our audit committee and our Board of Directors and, if the beneficiary is a director, by our shareholders.

Mergers and Acquisitions under Israeli Law

The Companies Law includes provisions that allow a merger transaction and requires that each company that is a party to a merger have the transaction approved by its board of directors and a vote of the majority of its shares at a shareholders meeting. For purposes of the shareholder vote, unless a court rules otherwise, the merger will not be deemed approved if a majority of the shares represented at the shareholders meeting that are held by parties other than the other party to the merger, or by any person who holds 25% or more of the shares or the right to appoint 25% or more of the directors of the other party, vote against the merger. Upon the request of a creditor of either party of the proposed merger, the court may delay or prevent the merger if it concludes that there exists a reasonable concern that as a result of the merger, the surviving company will be unable to satisfy the obligations of any of the parties to the merger. In addition, a merger may not be completed unless at least (i) 50 days have passed from the time that the requisite proposal for the merger has been filed by each party with the Israeli Registrar of Companies and (ii) 30 days have passed since the merger was approved by the shareholders of each party.

The Companies Law also provides that an acquisition of shares of a public company must be made by means of a special tender offer if as a result of the acquisition the purchaser would become a 25% or greater shareholder of the company and there is no existing 25% or

greater shareholder in the company. An acquisition of shares of a public company must also be made by means of a tender offer if as a result of the acquisition the purchaser would become a 45% or greater shareholder of the company and there is no existing 45% or greater shareholder in the company. These requirements do not apply if the acquisition (i) occurs in the context of a private placement by the company that received shareholder approval, (ii) was from a 25% shareholder of the company and resulted in the acquirer becoming a 25% shareholder of the company or (iii) was from a 45% shareholder of the company and resulted in the acquirer becoming a 45% shareholder of the company. The special tender offer must be extended to all shareholders but the offeror is not required to purchase shares representing more than 5% of the voting power attached to the company's outstanding shares, regardless of how many shares are tendered by shareholders. The special tender offer may be consummated only if (i) at least 5% of the voting power attached to the company's outstanding shares will be acquired by the offeror and (ii) the number of shares tendered in the offer exceeds the number of shares whose holders objected to the offer.

If, as a result of an acquisition of shares, the acquirer will hold more than 90% of a company's outstanding shares, the acquisition must be made by means of a tender offer for all of the outstanding shares. If less than 5% of the outstanding shares are not tendered in the tender offer, all the shares that the acquirer offered to purchase will be transferred to it. The law provides for appraisal rights if any shareholder files a request in court within three months following the consummation of a full tender offer. If more than 5% of the outstanding shares are not tendered in the tender offer, then the acquirer may not acquire shares in the tender offer that will cause his shareholding to exceed 90% of the outstanding shares.

Furthermore, Israeli tax considerations may make potential transactions unappealing to us or to our shareholders who are not exempt from Israeli income tax under Israeli law or an applicable tax treaty. For example, Israeli tax law does not recognize tax-free share exchanges to the same extent as U.S. tax law. With respect to mergers, Israeli tax law allows for tax deferral in certain circumstances but makes the deferral contingent on the fulfillment of numerous conditions, including a holding period of two years from the date of the transaction during which sales and dispositions of shares of the participating companies by certain shareholders are restricted. Moreover, with respect to certain share swap transactions, the tax deferral is limited in time, and when such time expires, tax then becomes payable even if no actual disposition of the shares has occurred. For information regarding Israeli tax on the sale of our shares, please see "Item 10.E - Taxation—Israeli Tax Considerations—Capital Gains Tax on Sales of Our Ordinary Shares."

Anti-Takeover Measures under Israeli Law

The Companies Law allows us to create and issue shares having rights different from those attached to our ordinary shares, including shares providing certain preferred or additional rights to voting, distributions or other matters and shares having preemptive rights. We do not have any authorized or issued shares other than ordinary shares. In the future, if we do create and issue a class of shares other than ordinary shares, such class of shares, depending on the specific rights that may be attached to them, may delay or prevent a takeover or otherwise prevent our shareholders from realizing a potential premium over the market value of their ordinary shares. The authorization of a new class of shares will require an amendment to our articles of association and to our memorandum, which requires the prior approval of a simple majority of our shares represented and voting at a shareholders meeting. Our articles of association provide that our Board of Directors may, at any time in its sole

discretion, adopt protective measures to prevent or delay a coercive takeover of us, including, without limitation, the adoption of a shareholder rights plan.

C. MATERIAL CONTRACTS

For a description of our material suppliers, see “Item 4. Information on the Company – B. Business Overview – Network and Technology”, “Item 4. Information on the Company – B. Business Overview – Customer Care” and “Item 4. Information on the Company – B. Business Overview - Services and Products.”

For a description of our debt agreements, see “Item 5. Operating and Financial Review and Prospects – B. Liquidity and Capital Resources – Debt Service.”

Registration Rights Agreement

Upon the sale of shares by DIC to Goldman Sachs International on March 15, 2006, we entered into a registration rights agreement with Goldman Sachs International, DIC and two other shareholders who are subsidiaries of DIC on customary terms and conditions. Upon the subsequent sales of shares by DIC to Migdal Insurance Company Ltd. and two of its affiliates, Leumi & Co. Investment House Ltd. (an affiliate of Bank Leumi Le-Israel Ltd), and Stocofin (Israel) Ltd. (an affiliate of the First International Bank of Israel Ltd.), these shareholders also joined the registration rights agreement. We refer to DIC, its two subsidiaries and these new shareholders as the registration rights holders. The shares eligible for registration under the agreement are ordinary shares held by the registration rights holders as of the respective dates they entered into the registration rights agreement and any additional ordinary shares such holders may thereafter acquire, so long as they are held by a registration rights holder or a “permitted transferee” (a person directly or indirectly controlling, controlled by or under common control with such registration rights holder) thereof. As of February 29, 2008, 51,287,500 ordinary shares, held by DIC are entitled to registration rights as well as any additional shares still held, if held, by the other shareholders who joined the agreement.

Commencing August 9, 2008, the registration rights holders are entitled to one demand registration per 12-month period, so long as such request is initiated by registration rights holders of at least 3.25% of the then outstanding registrable securities and the demand refers to a minimum of 3% of our then outstanding share capital, subject to customary deferral rights. In addition, in connection with any public offerings that we initiate in the future, if we propose to register any of our securities for our own account or for the account of any of our shareholders other than in a demand registration or in a registration relating solely to an incentive plan, the registration rights holders have piggyback rights to include their shares subject to customary underwriters’ cutback rights. In the case of a cut back, each registration rights holder that is not a member of the IDB group will be entitled to register registrable shares in an amount equal to its percentage holding of the aggregate number of registrable shares held by all registration rights holders wishing to participate in such registration, or, if such registration rights holder then holds more than 20% of its holdings as of the date it signed the registration rights agreement, registrable shares in an amount equal to twice its percentage holding of the aggregate number of registrable shares held by all registration rights holders wishing to participate in such registration. Members of the IDB group will be entitled to register a number of registrable shares equal to the aggregate number of registrable shares to be included in the registration, less the registrable shares of all the other registration rights holders being registered pursuant to the foregoing calculation.

All registration rights terminate, with respect to any individual registration rights holder, at such time as all registrable shares of such holder may be sold without registration pursuant to Rule 144 under the Securities Act during any three-month period. We are required to pay all expenses incurred in carrying out the above registrations, as well as the reasonable fees and expenses of one legal counsel for the selling registration rights holders, except for underwriter discounts and commissions with respect to the shares of such holders. The agreement provides for customary indemnification and contribution provisions. Our initial public offering on February 2007 was effected in accordance with the registration rights agreement, except that the selling shareholders agreed to bear the expenses of the offering.

Underwriting agreement

We entered into an underwriting agreement among Goldman, Sachs & Co., Citigroup Global Markets, Inc. and Deutsche Bank Securities, Inc., as the representatives of the underwriters, and DIC and Goldman Sachs International, as the selling shareholders, on February 5, 2007, with respect to the ordinary shares sold in our initial public offering.

We have agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act, and to contribute to payments the underwriters may be required to make in respect of such liabilities.

D. EXCHANGE CONTROLS

There are currently no Israeli currency control restrictions on payments of dividends or other distributions with respect to our ordinary shares or the proceeds from the sale of the shares, except for the obligation of Israeli residents to file reports with the Bank of Israel regarding certain transactions. However, legislation remains in effect pursuant to which currency controls can be imposed by administrative action at any time.

E. TAXATION

U.S. Federal Income Tax Considerations

The following is a general discussion of certain material U.S. federal income tax consequences of ownership and disposition of the Company's shares by a "U.S. holder" (as defined below). This discussion does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a holder in light of the holder's particular circumstances and does not address U.S. state, local and non-U.S. tax consequences. The discussion applies only to U.S. holders (as defined below) that hold the shares as capital assets for U.S. federal income tax purposes and it does not describe all of the tax consequences that may be relevant to holders subject to special rules, such as certain financial institutions, insurance companies, dealers and traders in securities or foreign currencies, persons holding the shares as part of a hedge, straddle, conversion transaction or other integrated transaction, persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar, partnerships or other entities classified as partnerships for U.S. federal income tax purposes, persons liable for the alternative minimum tax, tax-exempt organizations, or shareholders that own or are deemed to own 10% or more of the Company's voting power.

This discussion is based on the Internal Revenue Code of 1986, as amended, administrative pronouncements, judicial decision and final, temporary and proposed Treasury

regulations, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. Shareholders are urged to consult their own tax advisors regarding the U.S. federal, state, local and foreign tax consequences of purchasing, owning and disposing of shares in light of their particular circumstances.

The discussion below applies only to U.S. holders. As used herein, a “U.S. holder” is a beneficial owner of the Company’s shares that is, for U.S. federal tax purposes:

- a citizen or resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or any political subdivision thereof; or
 - an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds the shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and upon the activities of the entity. Partners or members of such entities should consult their tax advisors regarding the tax consequences of investments in the Company’s shares.

Taxation of Distributions

Distributions paid on the Company’s shares, other than certain pro rata distributions of ordinary shares, will be treated as a dividend to the extent paid out of current or accumulated earnings and profits (as determined under U.S. federal income tax principles). Since the Company does not maintain calculations of its earnings and profits under U.S. federal income tax principles, U.S. holders will generally be required to treat such distributions as taxable dividends. Subject to applicable limitations, dividends paid to certain non-corporate U.S. holders in taxable years beginning before January 1, 2011, will be taxable at a maximum rate of 15%. The amount of a dividend will include any amounts withheld by the Company or its paying agent in respect of Israeli taxes. The amount of the dividend will be treated as foreign source dividend income and will not be eligible for the dividends received deduction generally allowed to U.S. corporations under the Code.

Dividends paid in NIS will be included in a U.S. holder’s income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date of receipt of the dividend, regardless of whether the payment is in fact converted into U.S. dollars. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. holder generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. A U.S. holder may have foreign currency gain or loss if the holder does not convert the amount of such dividend into U.S. dollars on the date of its receipt. Such gain or loss would generally be treated as U.S. source ordinary income or loss.

Subject to applicable limitations that may vary depending upon a holder’s particular circumstances, Israeli taxes withheld from dividends at a rate not exceeding the rate provided by the U.S.-Israel income tax treaty will be creditable against the holder’s U.S. federal income tax liability. Israeli taxes withheld in excess of the rate allowed by the treaty will not be eligible for credit against a U.S. holder’s federal income tax liability. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. Instead of claiming a credit, a U.S. holder may, at the holder’s election, deduct the

otherwise creditable foreign taxes in computing the taxable income for the year, subject to generally applicable limitations under U.S. law. The rules governing foreign tax credits are complex and holders should consult their own tax advisors regarding the availability of foreign tax credits and the deductibility of foreign taxes in their particular circumstances.

Sale and Other Disposition of the Company's Shares

For U.S. federal income tax purposes, gain or loss realized on the sale or other disposition of shares will be capital gain or loss, and will be long-term capital gain or loss if the U.S. holder held the shares for more than one year. The amount of gain or loss will be equal to the difference between the tax basis in the shares disposed of and the amount realized on the disposition. Such gain or loss will generally be U.S. source gain or loss for foreign tax credit purposes.

Passive Foreign Investment Company Rule

The Company believes that it was not a "passive foreign investment company" for U.S. federal income tax purposes, or PFIC, for the taxable year of 2007. The Company also believes that it will not be a PFIC for the taxable year of 2008. However, since PFIC status depends upon the composition of a company's income and assets and the market value of its assets (including, among others, equity investments in less than 25%-owned entities) from time to time, there can be no assurance that the Company will not be considered a PFIC for any taxable year. If the Company were to be treated as a PFIC for any taxable year during which a U.S. holder held a share in the Company, certain adverse consequences could apply to the U.S. holder. Specifically, gain recognized by a U.S. holder on a sale or other disposition of a share would be allocated ratably over the U.S. holder's holding period for the share. The amounts allocated to the taxable year of the sale or other exchange and to any year before the Company became a PFIC would be taxed as ordinary income in the current year. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations, as appropriate, and an interest charge would be imposed on the amount allocated to such taxable year. Further, any distribution in excess of 125% of the average of the annual distributions received by the U.S. holder during the preceding three years or the U.S. holder's holding period, whichever is shorter, would be subject to taxation as described above. Certain elections may be available (including a mark-to-market election) to U.S. holders that may mitigate the adverse consequences resulting from PFIC status. In addition, if we were to be treated as a PFIC in a taxable year in which we pay a dividend or the prior taxable year, the 15% dividend rate discussed above with respect to dividends paid to certain non-corporate holders would not apply.

Information Reporting and Backup Withholding

Payment of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting and to backup withholding unless (i) the U.S. holder is a corporation or other exempt recipient or (ii) in the case of backup withholding, the U.S. holder provides a correct taxpayer identification number and certifies that the U.S. holder is not subject to backup withholding. The amount of any backup withholding from a payment to a U.S. holder will be allowed as a credit against the U.S. holder's U.S. federal income tax liability and may entitle the U.S. holder to a refund, provided that the required information is furnished to the Internal Revenue Service.

Israeli Tax Considerations

The following is a discussion of certain material Israeli tax consequences to purchasers of our ordinary shares. The discussion also contains a description of certain relevant material provisions of the current Israeli income tax structure applicable to companies in Israel, with special reference to its effect on us. To the extent that the discussion is based on new tax legislation that has not been subject to judicial or administrative interpretation, we cannot assure you that the appropriate tax authorities or the courts will accept the views expressed in this discussion.

This discussion applies to purchasers that will hold our ordinary shares as capital assets and does not address all of the tax consequences that may be relevant to purchasers of our ordinary shares in light of their particular circumstances or certain types of purchasers of our ordinary shares subject to special tax treatment. Because individual circumstances may differ, purchasers should consult their tax advisor to determine the applicability of the rules discussed below to them, including the application of Israeli or other tax laws. The discussion below is not intended, and should not be construed, as legal or professional tax advice and is not exhaustive of all possible tax considerations.

Taxation of Israeli Companies

General Corporate Tax Structure

Generally, Israeli companies are subject to corporate tax at the rate of 29% for the 2007 tax year and at the rate of 27% for the 2008 tax year, and are generally subject to capital gains tax at a rate of 25% on capital gains derived after January 1, 2003, other than capital gains from the sale of listed securities, which are generally subject to the corporate tax rate in effect (unless a company was not subject to the Inflationary Adjustments Law (see below) or certain regulations prior to the time of publication of a certain amendment to the Israeli tax laws (as further explained below) in which case the tax rate is 25%). Following an amendment to the Israeli Income Tax Ordinance [New Version], 1961, referred to as the Tax Ordinance, which came into effect on January 1, 2006, the corporate tax rate is scheduled to decrease as follows: 26% for the 2009 tax year and 25% for the 2010 tax year and thereafter.

Special Provisions Relating to Taxation under Inflationary Conditions

We are subject to the provisions of the Income Tax Law (Inflationary Adjustments), 1985, referred to as the Inflationary Adjustments Law, which attempts to overcome the problems presented to a traditional tax system by an economy undergoing rapid inflation. The Inflationary Adjustments Law is highly complex. The features that are material to us can be described as follows:

- When the value of a company's equity, as calculated under the Inflationary Adjustments Law, exceeds the depreciated cost of its fixed assets (as defined in the Inflationary Adjustments Law), a deduction from taxable income is permitted equal to the product of the excess multiplied by the applicable annual rate of inflation. The maximum deduction permitted in any single tax year is 70% of taxable income, with the unused portion permitted to be carried forward, linked to the increase in the Israeli CPI.

- If the depreciated cost of a company's fixed assets exceeds its equity, the product of the excess multiplied by the applicable annual rate of inflation is added to taxable income.
- Subject to certain limitations, depreciation deductions on fixed assets and losses carried forward are adjusted for inflation based on the increase in the Israeli CPI.

On February 26, 2008 the Israeli parliament approved an amendment to the Inflationary Adjustments Law which limits the applicability of such law, so that it will cease to apply after the 2007 tax year.

Capital Gains Tax on Sales of Our Ordinary Shares

Israeli law generally imposes a capital gains tax on the sale of any capital assets by residents of Israel, as defined for Israeli tax purposes, and on the sale of assets located in Israel, including shares in Israeli resident companies, by non-residents of Israel, unless a specific exemption is available or unless a tax treaty between Israel and the shareholder's country of residence provides otherwise. In calculating capital gain, the law distinguishes between real gain and inflationary surplus. The inflationary surplus is the portion of the total capital gain equal to the increase in the relevant asset's value that is attributable to the increase in the Israeli CPI between the date of purchase and the date of sale. The real gain is the excess of the total capital gain over the inflationary surplus. A non-resident that invests in taxable assets with foreign currency, or any individual that holds securities the price of which is stated in foreign currency, may elect to calculate the amount of inflationary surplus in that foreign currency.

Taxation of Israeli Residents

The tax rate applicable to real capital gains derived from the sale of shares, whether listed on a stock market or not, is 20% for Israeli individuals, unless such shareholder claims a deduction for financing expenses in connection with such shares, in which case the gain will generally be taxed at a rate of 25%. Additionally, if such shareholder is considered to be a significant shareholder at any time during the 12-month period preceding such sale, the tax rate will be 25%. For this purpose, a significant shareholder is one that holds, directly or indirectly, including with others, at least 10% of certain means of control in a company. Israeli companies are generally subject to the corporate tax rate (see above) on capital gains derived from the sale of shares listed on a stock market, unless such companies were not subject to the Inflationary Adjustments Law (or certain regulations) at the time of publication of a certain amendment to the Tax Ordinance that came into effect on January 1, 2006, in which case the applicable tax rate is generally 25%.

Taxation of Non-Israeli Residents

Non-Israeli residents are generally exempt from Israeli capital gains tax on any gains derived from the sale of shares of Israeli companies publicly traded on the Tel Aviv Stock Exchange or a recognized stock exchange outside of Israel (including the New York Stock Exchange), provided that such shareholders did not acquire their shares prior to the issuer's initial public offering, that the gains were not derived from a permanent establishment maintained by such shareholders in Israel and that such shareholders are not subject to the

Inflationary Adjustments Law. Shareholders that do not engage in activity in Israel generally should not be subject to such law. However, a non-Israeli corporation will not be entitled to the exemption from capital gains tax if an Israeli resident (i) has a controlling interest of 25% or more in such non-Israeli corporation or (ii) is the beneficiary of or is entitled to 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

In addition, under the Convention between the Government of the United States of America and the Government of Israel with respect to Taxes on Income, as amended, referred to as the U.S.-Israel tax treaty, the sale of our ordinary shares by a shareholder who qualifies as a resident of the United States within the meaning of the U.S.-Israel tax treaty and who is entitled to claim the benefits afforded to such person by the U.S.-Israel tax treaty, referred to as a treaty U.S. resident, and who holds its ordinary shares as a capital asset is also exempt from Israeli capital gains tax unless either (i) the treaty U.S. resident holds, directly or indirectly, shares representing 10% or more of our voting power during any part of the 12-month period preceding such sale or (ii) the capital gains arising from such sale are attributable to a permanent establishment of the treaty U.S. resident that is located in Israel. However, under the U.S.-Israel tax treaty, a treaty U.S. resident would be permitted to claim a credit for taxes paid in Israel against the U.S. federal income tax imposed on the sale, subject to the limitations in U.S. laws applicable to foreign tax credits. The U.S.-Israel tax treaty does not relate to U.S. state or local taxes.

Taxation of Dividends Paid on Our Ordinary Shares

Taxation of Israeli Residents

Israeli resident individuals are generally subject to Israeli income tax on the receipt of dividends paid on our ordinary shares at the rate of 20%, unless the recipient is a significant shareholder (as defined above) at any time during the 12-month period preceding the distribution in which case the applicable tax rate will be 25%. The company distributing the dividend is required to withhold tax at the source at the rate of 20%. Israeli resident companies are generally exempt from income tax on the receipt of dividends from another Israeli company, unless the source of such dividends is located outside of Israel in which case tax will generally apply at a rate of 25%.

Taxation of Non-Israeli Residents

Non-residents of Israel are generally subject to Israeli income tax on the receipt of dividends paid on our ordinary shares at the rate of 20% unless the recipient is a significant shareholder at any time during the 12-month period preceding the distribution in which case the applicable tax rate will be 25%. The company distributing the dividend is required to withhold tax at the source at the rate of 20%.

Under the U.S.-Israel tax treaty, the maximum rate of tax withheld in Israel on dividends paid to a holder of our ordinary shares who is a treaty U.S. resident is 25%. Furthermore, the maximum rate of withholding tax on dividends that are paid in certain circumstances to a U.S. corporation holding 10% or more of our outstanding voting power throughout the tax year in which the dividend is distributed as well as the previous tax year, is 12.5%.

A non-resident of Israel who has dividend income derived from or accrued in Israel, from which tax was withheld at source, is generally exempt from the duty to file tax returns

in Israel in respect of such income, provided such income was not derived from a business conducted in Israel by such non-Israeli resident.

G. STATEMENT BY EXPERTS

Not applicable.

H. DOCUMENTS ON DISPLAY

We are subject to the information reporting requirements of the Securities Exchange Act of 1934, as amended, referred to as the Exchange Act, applicable to foreign private issuers. As a foreign private issuer, we are exempt from certain rules and regulations under the Exchange Act prescribing the content of proxy statements, and our officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act, with respect to their purchase and sale of our ordinary shares. In addition, we are not required to file reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. However, we file annual reports with the SEC on Form 20-F containing financial statements audited by an independent accounting firm. We also furnish reports to the SEC on Form 6-K containing unaudited financial information for the first three quarters of each fiscal year and other material information, in accordance with the reporting requirements applicable to us as a dual listed company and as required due to our controlling shareholder's reporting obligations with respect to us. You may read and copy any document we file, including any exhibits, with the SEC without charge at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Copies of such material may be obtained by mail from the Public Reference Branch of the SEC at such address, at prescribed rates. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. Substantially all of our SEC filings are also available to the public at the SEC's website at <http://www.sec.gov> and as of July 2007 also at the TASE's website at <http://maya.tase.co.il> and at the Israeli Securities Authority at <http://www.magna.isa.gov.il>.

I. SUBSIDIARY INFORMATION

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the course of our normal operations, we are exposed to market risks including fluctuations in foreign currency exchange rates, interest rates and the Israeli CPI. We are exposed to currency risks primarily as a result of purchasing inventory and fixed assets mainly in U.S. dollars while almost all of our cash receipts are in NIS. A substantial amount of our cash payments are incurred in, or linked to, non-NIS currencies. In particular, in 2006 and 2007, such payments represented approximately 25% and 34% respectively, of total cash outflows. Also, we are exposed to interest rate risks through our bank and hedging instruments and to possible fluctuations in the Israeli CPI through our debentures.

In order to protect ourselves from fluctuations in foreign currency exchange rates, we have established a foreign currency hedging program. Under this program, we currently hedge part of our U.S. dollar liabilities, firm commitments and budgeted expenditures for the next 6 to 12 months using foreign currency forward exchange contracts and currency options. A foreign currency forward exchange contract is a contract whereby we agree to buy or sell a foreign currency at a predetermined exchange rate at a future date. A currency option is an option to buy or sell a foreign currency at a predetermined exchange rate at a future date. The exchange rate fluctuations that impact our foreign currency denominated financial liabilities, firm commitments and budgeted expenditures are intended to be offset by gains and losses on these hedging instruments.

The goal of our hedging program is to limit the impact of exchange rate fluctuations on our transactions denominated in U.S. dollars. We do not hold derivative financial instruments for trading purposes. Nevertheless, under Israeli GAAP, we are required to treat our hedges of budgeted expenditures for which there is no contractual commitment as though they were speculative investments. As a result, we are required to value these hedge positions at the end of each fiscal quarter and record a gain or loss equal to the difference in their market value from the last balance sheet date, without any reference to the change in value to the related budgeted expenditures. Accordingly, these differences could result in significant fluctuations in our reported net income.

Prior to the full repayment of our credit facility in March 2007, we protected ourselves from fluctuations in foreign currency rates in respect of our U.S. dollar long-term loans in the amount of \$85 million as of December 31, 2007, by utilizing compound foreign currency and interest swaps, throughout the entire period of the loan.

Also, as of December 31, 2007, we had four outstanding series of debentures, which are linked to the Israeli CPI, in an aggregate principal amount of approximately NIS 3.06 billion and during February 2008 we issued additional debentures in an aggregate principal amount of NIS 574.8 million. As of December 31, 2007, we had forward Israeli CPI / NIS transactions, in a total amount of NIS 1.8 billion, with an average maturity period of 10 (ten) months, in order to hedge our exposure to fluctuations in the Israeli CPI. We periodically review the possibility of entering into additional transactions in order to lower the exposure in respect of the debentures.

Set forth below is the composition of the derivative financial instruments at the following dates:

| | 2005 | | As of December 31 2006 | | 2007 | |
|---|-------------------|------------|---------------------------|------------|-----------|------------|
| | Par Value | Fair Value | Par Value | Fair Value | Par Value | Fair Value |
| | (In NIS millions) | | | | | |
| Forward contracts on exchange rate (mainly US\$– NIS) | 654 | 1 | 507 | (26) | 537 | (28) |
| Forward contracts on Israeli CPI rate | — | — | 500 | (15) | 1,800 | 24 |
| Options on the exchange rate (mainly US\$– NIS) | 925 | 4 | 659 | (1) | 530 | 1 |
| Compounded foreign currency and interest swap | — | — | 718 | (70) | 792 | (61) |
| | 1,579 | 5 | 2,384 | (112) | 3,659 | (64) |

Sensitivity information

Without taking into account our hedging instruments and based upon our debt outstanding as at December 31, 2007, fluctuations in foreign currency exchange rates, interest rates or the Israeli CPI would affect us as follows:

- an increase of 0.1% of the Israeli CPI would result in an increase of approximately NIS 3.1 million in our financial expenses;
 - a devaluation of the NIS against the U.S. dollar of 1.0% would increase our financial expenses by approximately NIS 5 million; and
- an increase in NIS interest rates of 100 basis points would increase our annual interest expense by approximately NIS 3 million (\$0.8 million). An increase in U.S. dollar interest rates of 100 basis points would increase our annual interest expense by approximately \$0.85 million.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

We did not receive any proceeds from our initial public offering on the NYSE.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our chief executive officer and chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as of December 31, 2007, have concluded that, as of such date, our disclosure controls and procedures were effective and ensured that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the company's principal executive and principal financial officers and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transaction and dispositions of the assets of the company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
 - Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting, as of December 31, 2007. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework.

Based on our assessment, management believes that as of December 31, 2007 our internal control over financial reporting is effective based on this criteria.

Our independent auditors have issued an audit report on the effectiveness of our internal control over financial reporting. This report is included in page F-2 of this Form 20-F.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

134

Our board of directors has determined that Messrs. Lieder, Cohen and Bigger and Ms. Baytel qualify as “audit committee financial experts” as defined in Item 16A of Form 20-F. Ms. Baytel qualifies as an independent director under the independence standards applicable to listed company audit committee members, pursuant to Rule 10A-3 under the Securities Exchange Act. See Item 16D below.

ITEM 16B. CODE OF ETHICS

Our Code of Ethics applies to all of our officers, directors and employees. Our Board of Directors amended our Code of Ethics during 2007 by updating and clarifying a number of matters, including: conflicts of interest between our employees and our vendors or customers, including the receipt of gifts; personal relationships between an employee and his or her or manager; the monitoring of employees’ use of our computer systems, and our privacy policy more generally; the window period for the sale or purchase of our securities; and reporting to the general counsel of general violations of laws, rules and regulations as well as the Code of Ethics. We have posted a copy of our updated Code of Ethics on our website at www.cellcom.co.il under “Investor Relations – About Cellcom – License & Other.”

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Somekh Chaikin, a member of KPMG International, has served as our independent auditors for 2006 and 2007. These accountants billed the following fees to us for professional services in each of those fiscal years:

| | 2007 | 2006 |
|------------------------|--------------------|-------|
| | (NIS in thousands) | |
| Audit Fees | 1,535 | 786 |
| Audit-Related Fees (1) | 872 | 3,600 |
| Tax Fees | 71 | 48 |
| Total | 2,478 | 4,434 |

(1) “Audit-related fees” includes mainly fees for services performed in connection with our registration statement on Form F-1 for our offering in February 2007. The registration statement expenses were reimbursed to the Company by the shareholders who sold shares during the offering.

“Audit Fees” are the aggregate fees billed for the audit of our annual financial statements. This category also includes services that generally the independent accountant provides, such as consents and assistance with and review of documents filed with the SEC. “Audit-Related Fees” are the aggregate fees billed for assurance and related services that are reasonably related to the performance of the audit and are not reported under Audit Fees. These fees include mainly accounting consultations regarding the accounting treatment of matters that occur in the regular course of business, implications of new accounting pronouncements and other accounting issues that occur from time to time. “Tax Fees” are the aggregate fees billed for professional services rendered for tax compliance, tax advice, other than in connection with the audit. Tax compliance involves preparation of original and amended tax returns, tax planning and tax advice.

Our Audit Committee has adopted a pre-approval policy for the engagement of our independent accountant to perform certain audit and non-audit services. Pursuant to this policy, which is designed to assure that such engagements do not impair the independence of our auditors, the audit committee pre-approves annually a catalog of specific audit and non-audit services in the categories of audit service, audit-related service and tax services that may be performed by our independent accountants, and the maximum pre-approved fees that

may be paid as compensation for each pre-approved service in those categories. Any proposed services exceeding the maximum pre-approved fees require specific approval by the Audit Committee.

The Audit Committee has delegated part of its pre-approval authority to the chairman of the Audit Committee, subject to ratification by the entire Audit Committee.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

In reliance upon exemptions for newly public companies under Rule 10A-3(b)(1)(iv) under the Exchange Act, until May 2007, one of the four members of our audit committee, Mr. Shlomo Waxe, was independent under the independence standards applicable to listed company audit committee members, pursuant to Rule 10A – 3 under the Securities Exchange Act. In May 2007 we appointed Mr. Barnea and Ms. Baytel, elected as external directors, who are also independent under such independence standards, to our audit committee. After these appointments and the resignation of Mr. Bigger from this committee, a majority of the members of our audit committee was independent. As of February 2008, following the resignation of Mr. Lieder and Mr. Cohen from this committee, the committee is composed entirely of independent members. We do not believe that our reliance on these exemptions has materially adversely affected the ability of our audit committee to act independently or to satisfy the other applicable requirements of Sarbanes-Oxley Act.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

None.

Report of Independent Registered Public Accounting Firm

To The Shareholders of
Cellcom Israel Ltd.

We have audited the accompanying consolidated balance sheets of Cellcom Israel Ltd. and subsidiaries (hereinafter – “the Company”) as of December 31, 2007 and 2006, and the related statements of income, changes in shareholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2007. We also have audited the Company’s internal control over financial reporting as of December 31, 2007, based on criteria established in “Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)”. The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

F-2

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with generally accepted accounting principles in Israel. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in "Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission".

Accounting principles generally accepted in Israel vary in certain significant respects from accounting principles generally accepted in the United States of America. Information related to the nature and effect of such differences is presented in Note 28 of the consolidated financial statements.

As explained in Note 2B(2) to the consolidated financial statements, the consolidated financial statements are presented in New Israeli Shekels, in conformity with accounting standards issued by the Israeli Accounting Board.

As discussed in Note 2U(2) to the consolidated financial statements, the Company retroactively adopted Israeli Accounting Standard No. 27, "Property, plant and equipment", as for all of the reporting periods.

The accompanying consolidated financial statements as of and for the year ended December 31, 2007 have been translated into United States dollars solely for the convenience of the reader. We have audited the translation and, in our opinion, the consolidated financial statements expressed in NIS have been translated into dollars on the basis set forth in Note 2C to the consolidated financial statements.

F-8

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 1 - General

A. Cellcom Israel Ltd. ("the Company") was incorporated in Israel on January 31, 1994. The Company commenced its operations on June 27, 1994, after receiving a license from the Ministry of Communications ("the MOC") to establish, operate and maintain a cellular mobile telephone system and provide cellular mobile telephone services in Israel. The Company began providing cellular mobile telephone services to the Israeli public on December 27, 1994. The initial license granted to the Company was for a period of 10 years and was thereafter extended until the year 2022.

On February 2007, the Company completed its initial public offering on the New York Stock Exchange ("NYSE"), of ordinary shares par value NIS 0.01 per share, in which Discount Investment Corporation Ltd. ("DIC") and Goldman Sachs International sold 20,000,000 of the Company's ordinary shares. Following completion of the initial public offering and registration of its ordinary shares for trading in the NYSE, the Company became a public company.

On July 1, 2007, the Company listed its ordinary shares, which are traded on the NYSE, on the Tel Aviv Stock Exchange ("TASE").

B. On April 23, 2006, Cellcom Fixed Line Communication L.P. a limited partnership 100%-owned, directly and indirectly, by Cellcom Israel Ltd. (hereinafter - "Cellcom Partnership") received a special general license from the Ministry of Communications for provision of land-line communications services. The license does not require Cellcom Partnership to provide a universal service. Cellcom Partnership focuses on offering services to the business sector.

Note 2 - Significant Accounting Policies

A. Basis of presentation

These financial statements are prepared in accordance with generally accepted accounting principles in Israel ("Israeli GAAP"), which differ in certain material respects from generally accepted accounting principles in the United States of America ("US GAAP") – see Note 28. The Company shall adopt International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standard Board ("IASB") for the period beginning of January 1, 2008 (see note 2U(5)).

B. Reporting principles

1. The functional currency of the Company is the local currency, New Israeli Shekels ("NIS"). The Company prepares and presents its financial statements in NIS. Transactions denominated in foreign currencies are recorded at the prevailing exchange rate at the time of the transactions.
2. Transition to nominal financial reporting in 2004.

Through December 31, 2003, the Company prepared its financial statements on the basis of historical cost adjusted for the changes in the general purchasing power of Israeli currency -NIS, based upon changes in the Israeli Consumer Price Index ("CPI"), in accordance with pronouncements of the Institute of Certified Public Accountants in Israel.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

B. Reporting principles (cont'd)

2. (cont'd)

With effect from January 1, 2004, the Company has adopted the provisions of Israel Accounting Standard No. 12 –“Discontinuance of Adjusting Financial Statements for Inflation” – of the Israel Accounting Standards Board and, pursuant thereto, the Company has discontinued, from that date, the adjustment of its financial statements for the effects of inflation in Israel.

The amounts adjusted for the effects of inflation in Israel, presented in the financial statements as of January 1, 2004, were used as the opening balances for the nominal financial reporting in the following periods. Accordingly, the amounts reported in these financial statements that relate to non-monetary assets (including the depreciation and amortization thereon) and equity items, which originate from the period that preceded January 1, 2004, are based on the adjusted-for-inflation data (based on the CPI for December 2003), as previously reported.

Amounts originating during periods subsequent to January 1, 2004 are included in the financial statements based on their nominal values.

The amounts of non-monetary assets do not necessarily represent realization value or current economic value, but only the reported amounts of such assets. In these financial statements, the term “cost” refers to cost in reported amounts.

3. Effect of changes in the CPI and in foreign currency exchange rates

Data regarding the CPI and currency exchange rates are as follows:

| | December 31, 2005 | December 31, 2006 | December 31, 2007 |
|--------------------------------|-------------------------|-------------------------|-------------------------|
| CPI (in points) | 185.1 | 184.9 | 191.2 |
| Exchange rate of U.S.\$ in NIS | 4.603 | 4.225 | 3.846 |
| | 2005 | 2006 | 2007 |
| CPI | 2.4% | (0.1%) | 3.4% |
| Exchange rate of U.S.\$ in NIS | 6.9% | (8.2%) | (9.0%) |

C. Convenience translation into U.S. dollars (“dollars” or “\$”)

For the convenience of the reader, the reported NIS figures as of December 31, 2007 and for the year then ended, have been presented in dollars, translated at the representative rate of exchange as of December 31, 2007 (NIS 3.846 = US\$ 1.00). The dollar amounts presented in these financial statements should not be construed as representing amounts that are receivable or payable in dollars or convertible into dollars, unless otherwise indicated.

D. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

These estimates are based on experience and historical data; however, actual results could differ from these estimates.

F-10

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

E. Principles of consolidation

These consolidated financial statements include consolidation of the financial statements of the Company and its fully owned subsidiaries: Cellcom Real Estate (2001) Ltd., Cellcom Holdings (2001) Ltd. and Cellcom Partnership. All inter-company transactions and balances were eliminated upon consolidation.

F. Cash and cash equivalents

Cash and cash equivalents include bank deposits, the initial deposit term of which did not exceed three months, and that are not restricted as to withdrawal or use.

G. Allowance for doubtful accounts

The financial statements include an allowance for doubtful accounts which properly reflects, in management's estimation, the potential loss from non-collection of accounts. The Company provides for doubtful accounts on the basis of its experience in collecting past debts, as well as on the basis of information on specific debtors in the hands of management of the Company.

H. Inventory

Inventory of cellular phone equipment and accessories and spare-parts are stated at the lower of cost or market value. Cost is determined by the moving average method; market value is determined using current replacement cost, less provisions for decline in value for slow moving inventory.

I. Property, plant and equipment

- (1) Property, plant and equipment are stated at cost, including direct costs necessary to prepare the asset for its intended use, and are measured at cost net of accumulated depreciation minus impairment losses.
- (2) Upon the initial recognition of property, plant and equipment, the Company includes in the cost of the asset all the costs it will be required to incur in respect of a liability to dismantle and remove the asset and to restore the site on which it was located.
- (3) See Note 20 for details regarding interest costs capitalized to property, plant and equipment.
- (4) Maintenance and repair costs are charged to expense as incurred. The cost of significant renewals and improvements is capitalized to the carrying amount of the respective fixed asset.
- (5) Depreciation is calculated using the straight-line method. If the property, plant and equipment consists of several components with different estimated useful lives, the individual significant components are depreciated over their individual useful lives. The annual depreciation rates are as follows:

| | % |
|------------------------------------|------|
| Network and transmission equipment | 5-20 |

| | |
|--------------------------------|-------|
| Control and testing equipment | 15-25 |
| Vehicles | 15 |
| Computers and hardware | 15-33 |
| Furniture and office equipment | 6-15 |

F-11

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

I. Property, plant and equipment (cont'd)

Leasehold improvements are depreciated over the shorter of their estimated useful lives or the expected lease terms.

See Note 2U(2) for the impact of the adoption of the Israeli Accounting Standard No. 27, "Property, plant and equipment", commencing January 1, 2007.

J. Impairment of assets

The Company reviews at each balance sheet date whether any events have occurred or changes in circumstances have taken place, that might indicate that there has been an impairment to the carrying value of all assets except inventory, tax assets and monetary assets.

When such indicators of impairment are present, the Company evaluates whether the carrying value of the asset in the Company's accounts can be recovered from the cash flows anticipated from that asset, and, if necessary, records an impairment provision up to the amount needed to adjust the carrying amount to the recoverable amount.

The recoverable value of an asset is determined according to the higher of the net selling price of the asset or its value in use to the Company. The value in use is determined according to the present value of anticipated cash flows from the continued use of the asset, including those expected at the time of its future retirement and disposal. In determining the value in use of an asset, the Company uses the best available estimates as to the conditions that will prevail during the remaining useful life of the asset. In determining the net selling price of an asset, management relies on estimates of the Company's experts.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

K. Intangible assets

Intangible assets consist of licenses, computer software costs and deferred expenses. As of January 1, 2007, the Company has implemented Israeli Accounting Standard No. 30 "Intangible Assets" ("Standard No. 30"). For the influence of the first time implementation of Standard No. 30, see note 2U(4).

- (1) Intangible assets are stated at cost, including direct costs necessary to prepare the asset for its intended use. A group of similar intangible assets are measured at cost net of accumulated amortization minus impairment losses.
- (2) The Company capitalizes certain costs incurred in connection with developing or obtaining internal use software in accordance with generally accepted accounting standards. Capitalized costs include direct development costs associated with internal use software, including internal direct labor costs and external costs of materials and services. These capitalized software costs are included in "intangible assets, net" in the consolidated balance sheets and are amortized on a straight-line basis over the period of their expected use. Costs incurred during the preliminary project stage, as well as maintenance and training costs, are expensed as incurred.
- (3) Deferred expenses in respect of commissions regarding the acquisition of new subscribers are recognized as intangible assets, if the costs can be measured reliably, incremental to the contract and directly attributable to

obtaining a specific subscriber. If the costs do not meet the aforementioned criteria, they are recognized immediately as expenses.

F-12

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

K. Intangible assets (cont'd)

(4) Amortization is calculated using the straight-line method. If the intangible assets consist of several components with different estimated useful lives, the individual significant components are amortized over their individual useful lives. The annual amortization rates are as follows:

| | % |
|---------------------|-----------------|
| Licenses | 5-6 (mainly 6%) |
| Information systems | 25 |
| Software | 25 |

Deferred costs are amortized over the expected life of the subscriber contractual relationship (mainly 18 months).

L.

Revenue recognition

Revenues from sales of handsets and accessories that are not contingent upon the delivery of additional products or services are recognized when products are delivered to and accepted by customers. Revenues from long-term credit arrangements (longer than one year) are recognized on the basis of the present value of future cash flows, discounted according to market interest rates at the time of the transaction. The difference between the original credit and its present value is recorded as interest income over the credit period.

Revenues derived from usage of the Company's networks, including airtime, interconnect and roaming revenues are recognized when the services are provided.

Prepaid wireless airtime sold to customers is recorded as deferred revenue prior to the commencement of services and is recognized when the airtime is used or expires.

Revenue is recorded net of value added taxes.

The Company offers enhanced services including voice mail, text and picture messaging, as well as downloadable wireless data applications, including ring tones, music, games, and other informational content. Generally, these enhanced features and data applications generate additional service revenues through monthly subscription fees or increased usage through utilization of the features and applications. Other optional services, such as equipment warranty plans are also provided for a monthly fee and are either sold separately or bundled and included in packaged rate plans. Revenues from enhanced features and optional services are recognized when earned.

Costs of revenues mainly include ongoing license fees, interconnection and roaming expenses, cell site leases, depreciation and amortization charges and technical repair and maintenance expenses directly related to services rendered.

On January 1, 2006, the Company adopted Israel Accounting Standard No. 25, "Revenue" ("Standard No. 25"). This standard prescribes recognition, measurement, presentation and disclosure criteria for revenues originating from the sale of goods purchased or manufactured by the seller, the provision of services, as well as revenues derived from the use of the seller's assets by others (interest income, royalties or dividends) and revenue arrangements with multiple

deliverables. Standard No. 25 is applicable to all transactions entered into on or after January 1, 2006.

F-13

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

L. Revenue recognition (cont'd)

In accordance with Standard No. 25, the main issue in regards to accounting for revenue is determining the timing of revenue recognition. Revenue from the sale of goods is recognized when all the following conditions have been satisfied: (a) the significant risks and rewards of ownership of the goods have been transferred to the buyer; (b) the seller retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold; (c) the amount of revenue can be measured reliably; (d) it is probable that the economic benefits associated with the transaction will flow to the seller; and (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

A clarification of Standard No. 25 was issued in February 2006: Clarification No. 8, "Reporting of Revenue on a Gross or Net Basis". According to the clarification, a company acting as an agent or an intermediary without bearing the risks and rewards resulting from the transaction, will present its revenue on a net basis (as a profit or a commission). However, a company that acts as a principal supplier and bears the risks and rewards resulting from the transaction will present its revenue on a gross basis, distinguishing the revenue from the related expenses. This classification and presentation of revenue on a gross or net basis was applied with retroactive effect for all of the reported periods.

The initial implementation of Standard No. 25 and the Clarification No. 8 did not have a material effect on the Company's results of operations and financial position.

M. Share-based payments

On January 1, 2006 the Company adopted Accounting Standard No. 24, "Share-Based Payments" ("Standard No. 24") of the Israel Accounting Standards Board. In accordance with the provisions of Standard No. 24, the Company recognizes share-based payment transactions in the financial statements, including transactions with employees or other parties that are settled by equity instruments, cash or intangible assets at their fair value.

The Company records as a salary expense, with a parallel increase in its shareholders' equity, the benefit that is created when it grants equity-settled options to employees, in accordance with the fair value of the options on the grant date, while using the Black & Scholes model. According to this policy, the benefit created is spread over the vesting period of the options on the basis of the Company's estimate regarding the number of options that will ultimately vest, adjusted for estimated forfeitures if any.

N. Advertising expenses

Advertising costs are expensed as incurred. Advertising expenses for the years ended December 31, 2005, 2006 and 2007 totaled NIS 118 million, NIS 96 million and NIS 121 million, respectively.

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

O. Capitalization of financing costs

Financing costs associated with the cost of constructing the wireless networks during the initial construction phase and the cost of acquiring the spectrum licenses until the beginning of their intended use are capitalized to the cost of such assets. The amount of financing costs eligible for capitalization is determined by applying a capitalization rate to the expenditures on the asset eligible for capitalization. The capitalization rate is the weighted average of the financing costs applicable to the borrowing and loans of the Company that are outstanding during the period, or the rate applicable to a borrowing specifically for the purpose of obtaining a specific asset. The amount of financing costs capitalized during the reported periods did not exceed the amount of financing costs incurred during these periods.

For the years ended December 31, 2007 and 2005 the Company did not capitalize financing costs. In 2006, the amount of financing costs capitalized to property, plant and equipment was NIS 4 million. The average annual capitalization rate during 2006 was 7.9%.

P. Deferred taxes

Deferred taxes are calculated on the basis of the liability method. Under this method, deferred taxes are computed in respect of temporary differences between the carrying value of assets and liabilities in the financial statements and their values for tax purposes.

Deferred taxes (asset or liability) are calculated at tax rates that are expected to be in effect when the temporary differences reverse, based on the tax rates and tax laws that were enacted or the enactment of which has been effectively completed, up to the balance sheet date.

In July 2004, the Israel Accounting Standards Board published Israeli Accounting Standard No. 19, "Taxes on Income" ("Standard No. 19"), which provides that a liability for deferred taxes is to be recorded for all temporary differences subject to tax, except for the temporary difference resulting from the initial recognition of goodwill and the temporary difference resulting from the initial recognition of an asset or a liability that has no effect on profit or loss. In addition, a deferred tax asset is to be recorded for all temporary differences that may be deducted, losses for tax purposes and tax benefits not yet utilized, if it is anticipated that there will be taxable income against which they can be offset. Standard No. 19 applies to financial statements for periods beginning on January 1, 2005. The transition to Standard No. 19 had no material effect on the Company's results of operations and financial position.

Q. Freestanding derivative financial instruments

The Company recognizes freestanding derivative financial instruments as either assets or liabilities in its balance sheets and measures those instruments at fair value. Accounting for changes in the fair value of a derivative depends on the intended use of the derivative and the resulting designation. For a foreign exchange derivative instrument designated as a cash flow hedge, the effective portion of the derivative is initially reported as a component of shareholders' equity as capital reserve and subsequently recognized into earnings as the hedged item affects earnings. The ineffective portion of the derivative is recognized in earnings immediately. For derivative instruments that are not designated as cash flow hedges, changes in fair value are recognized in earnings according to changes in their fair value.

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

Q. Freestanding derivative financial instruments (cont'd)

The Company formally documents all relationships between hedging instruments and hedged items and the risk management objective and strategy for each hedge transaction. At inception of the hedge and quarterly thereafter, the Company performs a correlation assessment to determine whether changes in the fair values or cash flows of the derivatives are deemed highly effective in offsetting changes in the fair values or cash flows of the hedged items. If at any time subsequent to the inception of the hedge, the correlation assessment indicates that the derivative is no longer highly effective as a hedge, the Company discontinues hedge accounting and recognizes all subsequent derivative gains and losses in the results of operations.

R. Financial instruments and concentration of credit risk

The carrying amounts of cash and cash equivalents, accounts receivable, accounts payable, and other current assets and liabilities are reasonable estimates of their fair value due to the short-term nature of these instruments. See Note 25C for the fair value of debentures (including current maturities).

Financial instruments that could potentially subject the Company to credit risks consist primarily of trade accounts receivables. Concentrations of credit risk with respect to these receivables are limited due to the composition of the subscriber base, which includes a large number of individuals and businesses.

As from January 1, 2006, the Company adopted Israeli Accounting Standard No. 22, "Financial Instruments: Disclosure and Presentation ("Standard No. 22"), which provides rules for presenting financial instruments in financial statements and specifies the proper disclosures required in respect thereto. Standard No. 22 provides the method for classifying financial instruments as financial liabilities and as shareholders' equity, for classifying the interest, dividends, losses and gains related thereto, and the criteria for offsetting financial assets and financial liabilities. Standard No. 22 was adopted on a prospective basis. The transition to Standard No. 22 resulted in the reclassification of deferred charges in respect of the issuance of debentures from intangible assets to a contra asset to the respective debentures.

S. Dividend declared subsequent to the balance sheet date

Dividends are recorded in the period they are declared. However, to the extent a dividend is declared in a subsequent period, but before the financial statements are issued, the amount subsequently declared is appropriated within shareholders' equity in the current reporting period, as a designated part of the retained earnings.

F-16

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

T. Earnings per share

The Company calculates earnings per share in accordance with the provisions of Israeli Accounting Standard No. 21, "Earnings per Share". Basic earnings per share is calculated by dividing the earnings or loss attributable to the ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. In order to calculate the diluted earnings per share, the Company adjusts the earnings or losses attributable to the ordinary shareholders, and the weighted average number of outstanding ordinary shares, in respect of the effects of all the dilutive potential ordinary shares. For all reported periods, there were no outstanding stock options except those that were dependent on a successful public offering of the Company's ordinary shares or warrants, or other potentially dilutive instruments. The options that were granted to the employees and Chairman of the board of directors of the Company during the year ended December 31, 2006 (see Note 17C) which were contingent upon completion of the Company's public offering are included in the calculation of diluted earnings per share from the date such shares were listed for trade (February 7, 2007). Regarding a stock split and an allotment of dividend shares - see Note 17B.

U. Effects of new Israeli Accounting Standards

1. Israeli Accounting Standard No 26, "Inventory" ("Standard No. 26")

In August 2006, the Israeli Accounting Standards Board published Standard No. 26. The Standard provides guidelines for determining the cost of inventory and its subsequent recognition as an expense as well as for determining impairments in the value of inventory written down to net realizable value. The Standard also provides guidelines regarding formulas used to allocate costs to various types of inventory. As of January 1, 2007, the Company has implemented Standard No. 26. Implementation of Standard No. 26 did not have a material effect on the Company's results of operations and financial position.

2. Israeli Accounting Standard No. 27, "Property, plant and equipment" ("Standard No. 27")

As of January 1, 2007, the Company has implemented Standard No. 27. The Standard prescribes rules for the presentation, measurement and recognition of property, plant and equipment and for the disclosure required in respect thereto. The Standard also provides for, among other things, the following:

Measurement after initial recognition of property, plant and equipment

Standard No. 27 provides that a group of similar property, plant and equipment shall be measured at cost net of accumulated depreciation minus impairment losses, or alternatively, at its revalued amount less accumulated depreciation, whereas an increase in the value of the asset above its initial cost as a result of the revaluation will be directly included in the shareholders' equity under a revaluation reserve.

Asset retirement obligations

Standard No. 27 provides, that upon the initial recognition of property, plant and equipment, the entity shall include in the cost of the asset all the costs it will be required to incur in respect of a liability to dismantle and remove the asset and to restore the site on which it was located.

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

U. Effect of new Israeli Accounting Standards (cont'd)

2. Israeli Accounting Standard No. 27, "Property, plant and equipment" (cont'd)

Component depreciation

Standard No. 27 provides that if property, plant and equipment consist of several components with different estimated useful lives, the individual significant components should be depreciated over their individual useful lives.

Standard No. 27 was applied to financial statements on January 1, 2007, and was implemented on a retroactive basis, except for asset retirement obligations for which the transition and provisions and the cumulative effect of Standard No.27 are described in the paragraph below.

The initial implementation of the Standard had the following effects:

Asset retirement obligations

Prior to the implementation of Standard No.27, upon the initial recognition of property, plant and equipment, the Company was not required and therefore did not include in its cost the initial estimate of costs for dismantling and removing the item and for restoring the site on which it was located, and therefore:

- (a) It measured the said liability as at January 1, 2007 in accordance with generally accepted accounting principles, at the amount of NIS 12 million.
- (b) It calculated the amount that would have been included in the cost of the asset on the date on which the liability was initially incurred by capitalizing the amount of the liability mentioned in item (a) above to the date on which the liability was initially incurred (hereinafter - the capitalized amount) at the amount of NIS 9 million. The liability was capitalized using the best estimate of the historical capitalization rates suitable to the risk that was relevant to that liability during the expired period; and,
- (c) It calculated the accumulated depreciation on the capitalized amount as at January 1, 2007 on the basis of the useful life of the asset as at that date at the amount of NIS 4 million;
- (d) It recorded a tax asset in the amount of NIS 2 million.
- (e) The difference between the amount that was charged to the asset in accordance with items (b) and (c) above, and the amount of the liability in accordance with item (a) above, and the tax asset in accordance with item (d) above, in the amount of NIS 5 million, was included in retained earnings as at January 1, 2007.

Implementation of the component method:

In accordance with the transitional provisions of the Standard, the financial statements were restated as a result of implementing the provisions of the Standard with respect to the separate calculation of depreciation for the various cost components of the network, mainly, transmission equipment and infrastructure. Accordingly, the depreciation rate of the network, which is used by the Company, has been changed from 15% to depreciation rates ranging between 5%-20%, according to the useful life of each item.

Note 2 - Significant Accounting Policies (cont'd)

U. Effect of new Israeli Accounting Standards (cont'd)

3. Israeli Accounting Standard No. 23, "The Accounting Treatment of Transactions between an Entity and the Controlling Interest Therein" ("Standard No. 23")

In December 2006 the Israel Accounting Standards Board published Accounting Standard No. 23 (hereinafter – Standard No. 23). Standard No. 23 replaces the main provisions of the Israeli Securities Regulations (with regard to Financial Statement Presentation of Transactions between a Company and its Controlling Shareholder). Standard No. 23 provides that assets (other than an intangible asset with no active market) and liabilities included in a transaction between the entity and its controlling shareholder shall be measured on the date of the transaction at fair value and that the difference between the fair value and the consideration from the transaction shall be included in shareholders' equity. A negative difference is considered to be a dividend, and therefore decreases the retained earnings. A positive difference is considered an additional investment by the controlling shareholder, and is presented as a separate item in the shareholders' equity "capital reserve resulting from transactions between an entity and the controlling interest".

Standard No. 23 discusses three issues relating to transactions between an entity and its controlling shareholder, as follows: the transfer of an asset to the entity by the controlling shareholder, or conversely, transfer of an asset from the entity to the controlling shareholder; the controlling shareholder assuming upon itself a liability of the entity to a third party, all or part, indemnification of the entity by the controlling shareholder in respect of an expense, and the controlling shareholder waiving the entity's debt to it, all or part; and loans that were granted to the controlling shareholder or loans that were received from the controlling shareholder. Standard No. 23 also provides the disclosure that is to be made in the financial statements regarding transactions between the entity and its controlling shareholder during the period.

Standard No. 23 applies to transactions between an entity and its controlling shareholder that are executed after January 1, 2007, and to a loan that was granted to a controlling shareholder or that was received from it before the date this Standard came into effect, as from the date the loan was granted or received.

Standard No. 23 was implemented by the Company as of January 1, 2007.

Implementation of Standard No. 23 did not have a material effect on the Company's results of operations and financial position.

4. Israeli Accounting Standard No. 30, "Intangible Assets" ("Standard No. 30")

As of January 1, 2007, the Company has implemented Standard No. 30. The Standard discusses the accounting treatment of intangible assets and defines how to measure the book value of these assets, as well as the disclosures that are required. The Standard has been initially implemented retroactively for all reported periods.

In accordance with the standard, the Company reclassified the costs of computer software and capitalized costs with regard to internally developed software, which are separable from their underlying asset, in the net amount of NIS 237 million as of December 31, 2006, from property, plant and equipment to intangible assets.

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

U. Effect of new Israeli Accounting Standards (cont'd)

5. Israeli Accounting Standard No. 29, "Adoption of International Financial Reporting Standards ("IFRS") ("Standard No. 29")"

In July 2006, the Israel Accounting Standards Board published Accounting Standard No. 29 ("Standard No. 29"). The Standard provides that entities subject to the Israeli Securities Law - 1968 that are required to report according to the regulations of this law are to prepare their financial statements for periods beginning as from January 1, 2008 according to International Financial Reporting Standards as issued by the International Accounting Standards Board (collectively "IFRS").

In accordance with Standard No. 29 the Company will adopt IFRS in 2008 as its primary basis of accounting and external financial reporting, based upon the requirements of IFRS 1, "First Time Adoption of International Financial Reporting Standards" ("IFRS 1"). Upon the adoption of IFRS in 2008 in accordance with IFRS 1, the Company will apply IFRS in effect as of December 31, 2008. In addition, the Company will consider otherwise available IFRS for early adoption as of December 31, 2008. The IFRS will be applied with retroactive application of such policies to its IFRS transition date of January 1, 2007 (i.e. the "comparative information").

In accordance with Standard No. 29, the Company is required to include in a note to these Israeli GAAP 2007 financial statements, a condensed balance sheet and income statement as of and for the year ended December 31, 2007, prepared according to the recognition, measurement and presentation principles of IFRS that are in effect or otherwise available for early adoption as of December 31, 2007. Standard No. 29 does not require that the presentation and disclosure of the 2007 IFRS information presented herein comply with the requirements of IFRS 1. Accordingly, the Company has not prepared the accompanying 2007 IFRS information in accordance with IFRS 1.

The tables and notes hereunder quantify and explain the significant differences between Israeli GAAP and IFRS as of and for the year ended December 31, 2007, based upon IFRS as of December 31, 2007, as applied by the Company. The IFRS that will be in effect and available for adoption in the Company's 2008 annual financial statement when the Company adopts IFRS in accordance with IFRS 1, may differ from the IFRS policies applied by the Company for purposes of the following 2007 disclosure. Accordingly, the accounting principles that will be applied in respect of the year ended December 31, 2007, may change upon the Company's adoption of IFRS in accordance with IFRS 1 in 2008.

Note 2 - Significant Accounting Policies (cont'd)

U. Effects of new Israeli Accounting Standards (cont'd)

5. Israeli Accounting Standard No. 29, "Adoption of International Financial Reporting Standards" (cont'd)

- A. In accordance with Israeli GAAP, no separation of embedded derivatives is required, as is required in accordance with IFRS, when the Company enters into commercial contracts (mainly for cell site leases) in which a foreign currency derivative instrument is "embedded" within the contract. This embedded derivative is separated from the host contract and carried at fair value in accordance with IFRS, when (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract and (2) a separate, stand-alone instrument with the same terms would qualify as a derivative instrument. The embedded foreign currency derivatives are marked to market each reporting period against net income. The effect of applying IFRS as at January 1, 2007 includes an increase in other receivables in the amount of NIS 10 million, an increase in deferred tax liabilities in the amount of NIS 3 million and an increase in retained earnings in the amount of NIS 7 million (net of tax). The effect of applying IFRS as at December 31, 2007 includes an increase in other receivables in the amount of NIS 14 million, an increase in deferred tax liabilities in the amount of NIS 4 million and an increase in retained earnings in the amount of NIS 10 million (net of tax). In addition, the cost of revenues increased in the amount of NIS 5 million, financing income increased in the amount of NIS 9 million, and tax expenses increased in the amount of NIS 1 million for the year ended December 31, 2007.
- B. In accordance with Israeli GAAP, deferred tax assets or liabilities were classified as current assets or current liabilities and non-current assets or non-current liabilities according to the classification of the assets or liabilities for which they were created. In accordance with IFRS, deferred tax assets are classified as non-current assets or non-current liabilities even if it is anticipated that they will be realized in the short term. Therefore, upon applying IFRS, short-term deferred tax assets as at January 1, 2007 and December 31, 2007 in the amount of NIS 60 million and NIS 51 million, respectively, were reclassified from the item of other receivables under current assets to the item of deferred tax liabilities under non-current liabilities.
- C. In accordance with Israeli GAAP, lands leased from the Israel Lands Administration ("ILA") are classified as property, plant and equipment and are not depreciated. In accordance with IFRS, when these lands are not considered owned by the Company, the lease payments are classified as long-term receivables and are amortized over the lease period, including the optional extension period if on the date of signing the lease agreement it was reasonably certain that the option will be exercised. Accordingly, as at January 1, 2007 the Company recorded an increase in long-term receivables in the amount of NIS 21 million, a decrease in property, plant and equipment in the amount of NIS 23 million, and a decrease in retained earnings in the amount of NIS 2 million. As at December 31, 2007 the Company recorded an increase in long-term receivables in the amount of NIS 30 million, a decrease in property, plant and equipment in the amount of NIS 33 million, and a decrease in retained earnings in the amount of NIS 3 million. The amortization of lease payments was reflected in an increase in amortization expense in the amount of NIS 1 million for the year ended December 31, 2007.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

U. Effects of new Israeli Accounting Standards (cont'd)

5. Israeli Accounting Standard No. 29, "Adoption of International Financial Reporting Standards" (cont'd)

D. See notes 2(U)2 and 2(U)4 regarding the adoption of Standard No. 27 and Standard No. 30 respectively.

E. In accordance with Israeli GAAP, current taxation liabilities were classified as other current liabilities. In accordance with IFRS, current taxation liabilities are presented as a separate item in current liabilities. Therefore, upon applying IFRS, current taxation liabilities as at January 1, 2007 and December 31, 2007 in the amount of NIS 117 million and NIS 122 million, respectively, were reclassified from the item of other current liabilities under current liabilities to the item of current taxation liabilities under current liabilities.

F. The deferred tax liability as presented hereunder has changed based on the aforementioned changes. The changes in the deferred taxes were calculated on the basis of tax rates that are expected to be in effect when the temporary differences reverse:

| | | January 1 2007 NIS millions | December 31 2007 NIS millions |
|------------------------------------|------|--------------------------------------|---|
| | Note | | |
| Property, plant and equipment, net | D | 105 | - |
| Other receivables | A | 3 | 4 |
| Deferred tax liabilities | B | (60) | (51) |
| | | 48 | (47) |

G. In accordance with Israeli GAAP, expenses recognized regarding share-based payment transactions were recorded against a capital reserve in the shareholders' equity. In accordance with IFRS, and on the basis of the accounting policy applied by the Company, the Company has reclassified this capital reserve to the retained earnings. Accordingly, the balance of the capital reserve decreased as of December 31, 2007 in the amount of NIS 29 million, and the retained earnings increased in the amount of NIS 29 million.

H. The effect of the aforementioned adjustments (net of tax) on the retained earnings:

| | | January 1 2007 NIS millions | December 31 2007 NIS millions |

Notes to the Financial Statements

Note 2 - Significant Accounting Policies (cont'd)

U. Effects of new Israeli Accounting Standards (cont'd)

5. Israeli Accounting Standard No. 29, "Adoption of International Financial Reporting Standards (cont'd)

I. In accordance with Israeli GAAP, a dividend declared subsequent to the balance sheet date and before the approval date of the financial statements was appropriated within shareholders' equity as a separate item "Dividend declared subsequent to balance sheet date" against a decrease in retained earnings. In accordance with IFRS, such a dividend only requires disclosure and does not require any equity reclassification. Accordingly, as at December 31, 2007 the balance of retained earnings increased and the dividend declared subsequent to the balance sheet date that is presented in shareholders' equity decreased by the amount of NIS 700 million.

J. In accordance with Israeli GAAP, gains and losses from the sale of property, plant and equipment net and other income / expenses were not included in operating income. In accordance with IFRS, these items are included in operating income. The effect of applying IFRS for the year ended December 31, 2007 is reflected in a reclassification of these items so as to be included in the operating income, in the amount of an expense of NIS 3 million.

Financial Instruments linked to the Israeli CPI:

A portion of the financial instruments held by the Company are linked to the Israeli CPI. The Company's management is of the opinion that based upon the position paper draft published by the Israeli Accounting Standards Board, there are several alternative options for the accounting treatment of financial instruments that are linked to the Israeli CPI. For the purpose of the preparation of this note, the Company has adopted the accounting treatment according to which the book value of the financial instrument and the payments derived from it are revaluated in each period according to the actual rate of change in the CPI, therefore negating the need for a reconciliation between the value of the financial instruments according to Israeli GAAP and their value according to IFRS guidelines. The issue of measurement of financial instruments that are linked to the Israeli CPI according to IFRS guidelines is under the consideration of the Israeli Accounting Standards Board, under which its' professional committee will approach the IFRIC, in order to receive their position on the issue.

Considering the aforementioned arguments, it is possible the final position regarding the measurement of the aforementioned financial instrument will be that the treatment implemented by the Company is not possible under IFRS guidelines and a different treatment, according to which the inflation expectations are taken into account in the measurement of the financial instrument, would be more appropriate (in that matter refer to clause AG7 and AG8 of IAS39). Should this be decided, the Company would be required to examine the said decision, in addition to its transitional instructions, on its financial statements and their accompanying notes, as presently reported and in the future, until the decision is made according to IFRS.

* Represents land that was leased from the Israel Lands Administration, a capital lease for the period of 49 years, commencing from November 2001.

** On December 31, 2006, the Company had a provision for the decline in value of land in the amount of NIS 10 millions. On December 10, 2007, the Company signed an agreement (containing generally accepted terms) for the sale of rights in the land to Bayside Land Corporation Ltd., which is controlled by the controlling shareholder of the Company, (the "Buyer") for the sum of NIS 39 million plus value added tax. The agreement was subject to all corporate approvals of both parties, as required under Israeli Companies Law and came into force only after these approvals were obtained subsequent to the balance sheet date, in February 2008.

The transfer of rights in the land to the Buyer is subject to the consent of the Israeli Land Authority ("ILA"). In case the ILA does not give its consent to the transfer of rights, each party will be entitled to terminate the agreement, in which case any sums previously paid or placed in escrow by the Buyer will be returned to the Buyer. In case the ILA demands consent fees and/or any other payment following a claim (if made) as to the Company's alleged failure to comply with the terms of the development and/or lease agreements signed with the ILA, the parties will contest such demands. If such demands are not revoked, the Company will bear their cost. The Company has the right to terminate the agreement, should such payment to ILA exceed 3% of the consideration plus value added tax, unless the parties or either of them, decides to pay the difference between the said 3% and the ILA's demands.

On December 31, 2007, as result of the agreement signed with the Buyer, the Company fully reversed the impairment provision in respect of the land that was previously made.

Notes to the Financial Statements

Note 13 - Long-term Loans from Banks (cont'd)

C. Credit facility agreement

In March 2006, the Company entered into an unsecured syndicated facility agreement with a number of Israeli and international banks arranged by Citibank N.A. and Citibank International plc, which provided for a term loan of \$280 million and a revolving credit facility of up to \$70 million. On April 10, 2006, the Company converted part of the outstanding dollar loan into a NIS loan. The Company repaid an amount of \$ 137.5 million (comprised of \$ 110 million on account of the term loan and \$ 27.5 million on account of the revolving credit facility) and the Company received in exchange an amount of NIS 633 million (comprised of a term loan in the amount of NIS 506 million and a revolving credit facility in the amount of NIS 127 million). In November 2007, the Company performed a voluntary partial prepayment of 50% of the outstanding term loan, in a principal amount of US\$ 140 million (comprising of approximately US\$ 85 million principal amount denominated in US\$ and approximately NIS 253 million principal amount denominated in NIS). As of December 31, 2007 the outstanding principal amount of the term loan is US\$ 140 million (comprising of approximately US\$ 85 million denominated in US\$ and approximately NIS 253 million denominated in NIS).

As of December 31, 2007, the average interest rate on the outstanding dollar loans was three-month LIBOR + 0.80% per year and the average interest rate on the outstanding NIS loans was three month TELBOR + 0.80% + 0.20% per year.

The loan agreement includes standard provisions with respect to voluntary prepayment, events of default, financial covenants and restrictive covenants. As of the balance sheet date the Company is in compliance with all of its debt covenants. Regarding the voluntary prepayment of the balance of the term loan and the termination thereof refer to note 27A.

C. Issuance of debentures

In December 2005, the Company issued NIS 1,037 millions principle amount debentures (Series A) to institutional investors at par value. The debentures are payable in nine equal semi-annual installments, on July 5 of each of the years 2008 through 2012 and on January 5 of each of the years 2009 through 2012. The debentures bear an annual interest of 5.00%. The interest is to be paid on January 5 of each of the years 2007 through 2012 and on July 5 of each of the years 2006 through 2012 for the six-month period ended on the day prior to each date as stated. Both the principal amount and interest are linked to the Israeli Consumer Price Index for November 2005.

In December 2005, the Company issued NIS 715 million principle amount debentures (Series B) to institutional investors at par value. The debentures are payable in five equal annual installments, on January 5 of each of the years 2013 through 2017. The debentures bear an annual interest of 5.30%. The interest is to be paid on January 5 of each of the years 2007 through 2017 for the twelve-month period ended on the day prior to each date as stated. Both the principal amount and interest are linked to the Israeli Consumer Price Index for November 2005.

On May 29, 2006, the Company issued to institutional investors additional Series A debentures in the aggregate principle amount of NIS 28 million, in exchange for consideration of NIS 29 million, and additional Series B debentures in the aggregate principle amount of NIS 210 million in exchange for consideration of NIS 221 million.

In October 2007, the Company issued debentures Series C to the public in the aggregate principle amount of NIS 245 million in exchange for a net consideration of NIS 244 million. The debentures are payable in nine semi-annual installments, on March 1 and September 1 of each of the years 2009 through 2012, and on March 1, 2013. The debentures bear an annual interest of 4.60%. The interest is to be paid in semi-annual installments on March 1 and September 1 of each of the years 2008 through 2012 and on March 1, 2013. Both the principal amount and interest are linked to the Israeli Consumer Price Index for August 2007.

In October 2007, the Company issued new debentures Series D to the public investors in the aggregate principle amount of NIS 827 million in exchange for a net consideration of NIS 823 million. The debentures are payable in five equal annual installments, on July 1 of each of the years 2013 through 2017. The debentures bear an annual interest of 5.19%. The interest is to be paid in annual installments on July 1 of each of the years 2008 through 2017. Both the principal amount and interest are linked to the Israeli Consumer Price Index for August 2007.

For information regarding a private placement to institutional investors, of additional debentures of Series C and D refer to Note 27B.

The debentures (series A, B, C & D) are listed on the Tel Aviv Stock Exchange and are not convertible.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 15 - Liability for Employee Severance Benefits, net

- A. The Company's liability for severance pay for its Israeli employees is calculated pursuant to Israeli severance pay law based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. After completing one full year of employment, the Company's Israeli employees are entitled to one month's salary for each year of employment or a portion thereof. The Company's liability is fully provided by monthly deposits with severance pay funds, insurance policies and by an accrual. For the majority of the Company employees the payments to the pension funds and insurance companies discharge the Company's obligation to the employees as required by the Severance Pay Law in connection with Section 14. Accumulated amounts in the pension funds and with the insurance companies are not under the control or administration of the Company, and accordingly, neither those amounts nor the corresponding accrual for severance pay are reflected in the balance sheet. The obligation of the Company, under law and labor agreements, for termination benefits to employees not covered by the aforementioned pension or insurance plans is NIS 2 millions and NIS 3 million as of December 31, 2006 and 2007 respectively as included in the balance sheet, under other long term liabilities.
- B. The severance pay expenses for the years ended December 31, 2005, 2006 and 2007 were approximately NIS 27 million, NIS 27 million and NIS 28 million, respectively.
- C. In January 2008, subsequent to the balance sheet date, under an order issued by the Ministry of Industry, Commerce and Labor, all Israeli employers are obligated to contribute to a pension plan amounts equal to a certain percentage of the employee's wages, for all employees, after a certain minimum period of employment. The Company is complying with this obligation. Under the new order, additional employees are entitled to contribution to a pension plan, which shall increase gradually until 2013 and up to 5% of the employee's wages, with additional identical contribution for severance pay. A provision in the Company's financial reports covers severance pay to those employees who were not entitled to managers' insurance or other pension arrangements or for the balance between future severance pay according to the law and the contribution for severance payment, made according to said order.

Note 16 - Commitments and Contingent Liabilities

A. Contingent liabilities

All sums indicated for the lawsuits below are as at the filing date thereof, unless specifically mentioned otherwise.

1. In December 2002, a purported class action lawsuit was filed against the Company and another cellular operator in the District Court of Tel-Aviv-Jaffa in connection with the Company's incoming call tariff to subscribers of other operators when calling the Company's subscribers during the period prior to the regulation of interconnect fees. If the lawsuit is certified as a class action, the amount claimed is NIS 1.6 billion. Based on advice of counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the financial statements in respect of this claim.

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

A. Contingent liabilities (cont'd)

2. In August 2001, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv-Jaffa by one of the Company's subscribers in connection with air time tariffs and subscriber fees that were allegedly collected not in accordance with the agreement of undertaking signed by the Company's subscribers at the time of joining the Company's network. If the lawsuit is certified as a class action, the amount claimed is NIS 1.26 billion plus punitive damages at a rate of not less than 100% of the amount of the judgment. In February 2004, the motion for certification as a class action was denied. In March 2004, this decision was appealed to the Israeli Supreme Court. In January 2006, the Supreme Court approved the plaintiff's motion to amend his complaint to reflect the amendment to the Consumer Protection Law and return to the District Court in order to examine the amendment's effect, if any, on the District Court ruling, which remains in effect. In October 2006, a separate motion was granted allowing the plaintiff to further revise his complaint, as a result of enactment of the Class Action Claims Law. Based on advice of counsel, management believes that the Company has good defenses against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company's financial statements in this respect.
3. In September 2000, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv-Jaffa by one of the Company's subscribers in connection with VAT charges in respect of warranty premiums and the provision of warranty services that were allegedly provided not in accordance with the law. If the lawsuit is certified as a class action, the amount of the claim is NIS 402 million. In February 2006, the motion for certification as a class action was denied. In March 2006, an appeal was filed with the Supreme Court challenging the dismissal. Based on advice of counsel, management believes that the Company has a good defense against the appeal. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.
4. In August 2001, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv-Jaffa by one of the Company's subscribers in connection with the Company outgoing call tariffs for the 'Talkman' (pre-paid) plan and the collection of a distribution fee for 'Talkman' calling cards. If the claim is certified as a class action, the amount claimed is NIS 135 million. In June 2004, the motion for certification as a class action was denied. In September 2004, this decision was appealed to the Israeli Supreme Court. In July 2007, pursuant to the appeal, the Israeli Supreme Court granted a petition filed by both parties with mutual consent, in light of the Israeli Class Action Law, 2006, to resubmit the purported class action lawsuit for consideration in the District Court of Tel Aviv-Jaffa. Based on advice of counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.

A. Contingent liabilities (cont'd)

5. A dispute exists between the Company and the Ministry of Communications with respect to the payment of fees for its use of the GSM and UMTS frequencies. The amount in dispute as at December 31, 2007, is approximately NIS 69 million (including interest and CPI linkage differences). Until a final decision on this matter, the Company has deposited approximately half of this amount with the Ministry of Communications. Based on advice of counsel, management believes that the method the Company applies in the calculation of the fees is the lawful method. Accordingly, no provision has been included in the Company's financial statements in respect of the amount in dispute. The amount the Company has deposited is refundable upon the favorable resolution of the dispute. The Company has applied to the courts regarding this issue.
6. In April 2003, a purported class action lawsuit was filed against two other cellular operators and the Company with the District Court of Tel-Aviv–Jaffa in connection with the Company's incoming SMS tariff to subscribers of other operators when sending SMS messages to the Company's subscribers during the period before the regulation of SMS interconnect fees. If the lawsuit is certified as a class action, the amount claimed is NIS 90 million, without the specification of the amount claimed from the Company. Based on advice of counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.
7. In August 2003, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv–Jaffa and later transferred to the District Court of Central Region by one of the Company's subscribers in connection with the Company method of rounding the rates of calls, the Company method of linking rates of calls to the consumer price index and that a certain rate that was approved by the Ministry of Communications in 1996 was unlawfully approved. If the lawsuit is certified as a class action, the amount claimed is NIS 150 million. In March 2006, the plaintiff filed an amended statement of its claim, following the amendment to the Consumer Protection Law in December 2005, to which the Company has replied. Based on advice of counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company financial statements in respect of this claim.
8. In January 2004, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv–Jaffa by one of its subscribers, with respect to the rates of calls made from the cellular voice mail using the "Boomerang" service through use of one of the marketing programs the Company offered to its subscribers. If the claim is certified as a class action, the amount claimed is NIS 10 million. Based on advice of counsel, management believes that the Company has a good defense against the certification of the claim as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.
9. In March 2005, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv–Jaffa by one of its subscribers alleging that the Company's marketing campaigns are misleading. In December 2007, the motion for certification as a class action and the lawsuit were denied. Had the lawsuit been certified as a class action, the total amount claimed was NIS 10 million.

Note 16 - Commitments and Contingent Liabilities (cont'd)

A. Contingent liabilities (cont'd)

10. In April 2005, a lawsuit was filed against the Company in the District Court of Tel-Aviv–Jaffa by one of the Company's former dealers and importers for the amount of NIS 28 million (reduced for court fee purposes from approximately NIS 38 million), alleging that the Company breached an agreement between the parties. Based on advice of counsel, management believes that the Company has a good defense against the lawsuit. Accordingly, no provision has been made in the Company financial statements in respect of this claim.
11. In October 2005, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv–Jaffa by one of its subscribers, alleging the Company has misled in regard to refunds, with respect to the use of air-time in various marketing plans. If the lawsuit is certified as a class action, the amount claimed is NIS 10 million. In November 2007, the motion for certification as a class action and the lawsuit were denied. In January 2008, subsequent to the balance sheet date, this decision was appealed to the Israeli Supreme Court. Based on advice of counsel, management believes that the Company has a good defense against the appeal. Accordingly, no provision has been made in the Company financial statements in respect of this claim.
12. The Company has undertaken to indemnify the Company's directors and officers, as well as certain other employees for certain events listed in the indemnifications letters given to them. The aggregate amount payable to all directors and officers and other employees who may have been or will be given identical indemnification letters is limited to the amounts the Company receives from the Company's insurance policy plus 30% of the Company's shareholders' equity as of December 31, 2001 or NIS 486 million, and to be adjusted by the Israeli CPI.
13. In August 2006, a purported class action lawsuit was filed against the Company and two other cellular operators in the District Court of Tel-Aviv–Jaffa by one of the Company's subscribers in connection with sums allegedly unlawfully charged for a segment of a call that was not actually carried out. If the lawsuit is certified as a class action, the total amount claimed is estimated by the plaintiffs as exceeding NIS 100 million, without specifying the amount claimed from the Company individually. Based on advice of counsel, management believes, that the Company has a good defense against the certification of the claim as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim. In November 2006 a similar purported class action was filed against the Company, two other cellular operators and two landline operators in the District Court of Tel-Aviv–Jaffa by four plaintiffs claiming to be subscribers of the three cellular operators. The latter was withdrawn in October 2007, by the plaintiffs, with regards to the Company and the other two cellular operators, following a procedural agreement reached between the plaintiffs in the latter lawsuit and the plaintiffs in former purported class action lawsuit (the two lawsuits will be heard together). Had the withdrawn lawsuit been certified as a class action, the amount claimed from the Company and each of the other cellular operators by the plaintiffs would have been approximately NIS 53 million (the amount claimed from all five defendants was estimated by the plaintiffs to be approximately NIS 159 million).

Note 16 - Commitments and Contingent Liabilities (cont'd)

A. Contingent liabilities (cont'd)

14. In November 2006, a purported class action lawsuit was filed against the Company, a third party that had provided services to customers of the Company (“the Supplier”) and other parties allegedly related to the supplier, in the District Court of Tel-Aviv–Jaffa by a subscriber of the Company. The lawsuit is in connection with sums allegedly charged by the Company in respect of content services of the Supplier without the subscriber’s consent. If the lawsuit is certified as a class action, the total amount claimed from the Company, the Supplier and other parties is estimated by the plaintiffs as approximately NIS 18 million, in addition to another NIS 10 million for mental anguish. Based on advice of counsel, management believes, that the Company has a good defense against the certification of the claim as a class action. Accordingly, no provision has been included in the Company’s financial statements in respect of this claim.
15. In January 2007 a lawsuit was filed against the Company in an arbitration proceeding for the amount of approximately NIS 35 million by a company (the “Plaintiff”) that purchased cellular services from the Company in order to sell the services to its customers, alleging, among other things, that the Company has breached agreements between the parties and making claims concerning the Company's conduct. The Company rejects all claims made by the Plaintiff against the Company. Based on advice of counsel, management believes, that the Company has a good defense against the claim. Accordingly, no provision has been made in the financial statements in respect of this claim.
16. In January 2007 a purported class action lawsuit was filed against the Company, two other cellular operators and two landline operators in the District Court of Jerusalem by three plaintiffs, claiming to be subscribers of some of the defendants, in connection with an alleged violation of the defendants' statutory duty to allow their subscribers to transfer with their number to another operator, thus, allegedly causing monetary damage to the subscribers. In March 2008, subsequent to balance sheet date, the motion for certification as a class action was dismissed without prejudice and the lawsuit was dismissed with prejudice, following request of the plaintiffs to withdraw their claim. Had the lawsuit been certified as a class action, the total amount claimed was estimated by the plaintiffs to be at least NIS 10.6 billion.
17. In February 2007, a purported class action was filed against the Company in the District Court of Tel-Aviv, by a plaintiff claiming to be a customer of the Company. The plaintiff claimed that the Company unlawfully collected VAT amounts from subscribers who are residents of Eilat. In May 2007, the motion for certification as a class action and the lawsuit were denied. Had the lawsuit been certified as a class action, the amount claimed from the Company was estimated by the plaintiff at approximately NIS 33 million

A. Contingent liabilities (cont'd)

18. In February 2007, a purported class action lawsuit was filed against the Company and two other cellular operators in the District Court of Tel-Aviv by plaintiffs claiming to be subscribers of the three cellular operators, in connection with amounts that were allegedly overcharged not in accordance with the cellular operators' licenses, based on charge units larger than the charge units the Company was allegedly authorized to charge under the Company's licenses for calls initiated or received by subscribers outside of Israel. If the lawsuit is certified as a class action, the total amount claimed from the cellular operators is estimated by the plaintiffs to be approximately NIS 449 million, of which approximately NIS 193 million is attributed to the Company. Based on advice of counsel, management believes that the Company has a good defense against the certification of the claim as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.
19. In April 2007, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv-Jaffa, by two plaintiffs who claim to be subscribers of the Company. The claim alleges that the Company, unlawfully and in violation of its license, raised its rates in pricing plans that include a commitment to purchase certain services for a fixed period. In February 2008, subsequent to the balance sheet date, the motion for certification as a class action and the lawsuit were denied. Had the lawsuit been certified as a class action, the amount claimed was estimated by the plaintiffs at approximately NIS 230 million.
20. In May 2007, a purported class action lawsuit was filed against the Company in the District Court of Tel-Aviv-Jaffa, by two plaintiffs who claim to be subscribers of the Company. The claim alleges that the Company, unlawfully and in violation of its license, raised its rates in pricing plans that include a commitment to purchase certain services for a fixed period. If the claim is recognized as a class action, the amount claimed is approximately NIS 875 million. Based on the advice of the Company's legal counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.
21. In May 2007, a purported class action lawsuit was filed against the Company and another cellular operator in Israel, in the District Court of Jerusalem, by plaintiffs who claim to be subscribers of the defendants. The claim alleges that the defendants charged the subscribers for calls initiated or received while in Israel, through a foreign cellular network, with roaming rates which are higher than those agreed in the defendants' pricing plans for local calls. If the claim is recognized as a class action, the amount claimed from the defendants is estimated by the plaintiffs as approximately NIS 34 million, of which the amount attributed to the Company is estimated to be approximately NIS 12 million. Based on the advice of the Company's legal counsel, management believes that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been included in the Company's financial statements in respect of this claim.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

A. Contingent liabilities (cont'd)

22. In September 2007, a purported class action lawsuit was filed against the Company and two other cellular operators in the District Court of Jerusalem, by three plaintiffs who claim to be subscribers of the defendants. The plaintiffs claim that the defendants charged their subscribers for SMS messages sent by them to subscribers who disabled their ability to receive SMS messages and/or misled the senders by an indication on their cell phones that such messages were sent. If the claim is certified as a class action, the amount claimed from all three defendants is estimated by the plaintiffs to be approximately NIS 182 million, without specifying the amount claimed from the Company specifically. At this preliminary stage, before the Company has submitted its response, management believes, based on the advice of the Company's legal counsel, that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.

23. In November 2007, a purported class action lawsuit was filed against the Company in the District Court of Central Region, by a plaintiff who claims to be a subscriber of the Company. The plaintiff claims that the Company charged its subscribers for content services without obtaining their specific consent, in a manner which complies with the provisions of its general license. If the lawsuit is certified as a class action, the amount claimed is estimated by the plaintiff to be NIS 432 million. At this preliminary stage, before the Company has submitted its response, management believes, based on the advice of the Company's legal counsel, that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.

24. In December 2007, the Company was served with a petition filed with the Israeli High Court of Justice against the Israeli Minister of Communications and another cellular operator. seeking to retroactively apply the amendment to cellular operators' general license, effected September 2007, which prevents the Company from offering subscribers calling plans using airtime charging units other than the basic airtime charging unit, or alternatively, to retroactively cancel any charges which may be imposed on subscribers when transferring, before the lapse of a predetermined period, to calling plans based on the basic airtime charging unit. The Company and one other cellular operator were joined as formal respondents. The court has instructed only the Ministry of Communications to submit its response. In its recently submitted response, the Ministry of Communications opposes the petition. At this preliminary stage, before the court has decided to conduct a hearing and before the Company has submitted any response, management believes, based of advice of counsel, the court will not grant the remedies sought. Accordingly, no provision has been made in the financial statements in respect of this claim. For additional details regarding the amendment to the general license refer to note 16.B.2.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

A. Contingent liabilities (cont'd)

25. In December 2007, a purported class action lawsuit was filed against the Company and two other cellular operators in the District Court of Tel Aviv, by plaintiffs who claim to be residing next to cell sites of the defendants which the plaintiffs claim were built in violation of the law. The plaintiffs allege that the defendants have created environmental hazards by unlawfully building cell sites and, therefore, demand that the defendants compensate the public for damages (other than personal damages, such as depreciation of property and/or health related damages which are excluded from the purported class action), demolish existing unlawfully built cell sites and refrain from unlawfully building new cell sites. If the lawsuit is certified as a class action, the compensation claimed from the defendants (without any allocation of this amount among the defendants) is estimated by the plaintiffs to be NIS 1 billion. At this preliminary stage, before the Company has submitted its response, management believes, based on the advice of the Company's legal counsel, that the Company has a good defense against the certification of the lawsuit as a class action. Accordingly, no provision has been made in the financial statements in respect of this claim.
26. In December 2007, a purported class action lawsuit was filed against the Company in the District Court of Central Region, by plaintiffs claiming to be the subscribers of the Company, in connection with sums the Company allegedly overcharged, when the Company raised its tariffs in certain calling plans. If the lawsuit is recognized as a class action, the amount claimed is estimated by the plaintiffs to be approximately NIS 44 million. At this preliminary stage, the Company is unable to assess the lawsuit's chances of success. Accordingly, no provision has been made in the financial statements in respect of this claim.
27. In February 2008, subsequent to balance sheet date, a purported class action lawsuit was filed against the Company in the District Court of Central Region, by plaintiffs claiming to be subscribers of the Company, in connection with sums the Company allegedly overcharged, when the Company raised its tariffs for SMS packages. If the lawsuit is recognized as a class action, the amount claimed is estimated by the plaintiffs to be approximately NIS 43 million. At this preliminary stage, the Company is unable to assess the lawsuit's chances of success. Accordingly, no provision has been made in the financial statements in respect of this claim.
28. In March 2008, subsequent to balance sheet date, a purported class action lawsuit was filed against the Company in the District Court of Central Region, by plaintiffs claiming to be the Company's subscribers. The plaintiffs claim that the Company has unlawfully charged its' subscribers for providing them with call details records. If the lawsuit is certified as a class action, the total amount claimed from the Company is estimated by the plaintiffs to be approximately NIS 440 million. At this preliminary stage the Company is unable to assess the lawsuit's chances of success. Accordingly, no provision has been made in the financial statements in respect of this claim.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

B. Effects of new legislation and standards

1. National Zoning Plan 36 is in the process of being revised. Current proposed changes would impose additional restrictions and/or requirements on the construction and operation of cell sites and could, if adopted, harm the Company's ability to construct new cell sites, make the process of obtaining building permits for the construction and operation of cell sites more cumbersome and costly and may delay the future deployment of the Company's network.

The draft Israeli Non-Ionizing Radiation Regulations approved by the Interior and Environmental Protection Committee of the Knesset in October 2007 includes additional restrictions in relation to the operation of cell sites and other facilities. If these restrictions are adopted in their current draft format, they will, among other things, limit the Company's ability to construct new sites and renew operating permits for a number of the Company's existing sites, specifically in residential areas.

In January 2006, the Planning and Building Law was amended by the Non-ionizing Radiation Law, to provide that as a condition for issuing a building permit for a cell site, the local Planning and Building committees must require letters of indemnification from the cellular companies, for possible depreciation claims under Section 197 of the Planning and Building Law, in accordance with the directives of the National Planning Council. National Planning Council guidelines issued in January 2006 have provided for a 100% indemnification undertaking by the cellular companies to the Planning and Building committees, in the form published by the council and allowing the indemnifying party to control the defense of the claim. These guidelines shall remain in effect until they are replaced with an amendment to the NZP 36. Some local planning and building committees have sought to join cellular operators, including the Company, as defendants in depreciation claims made against them even though indemnification letters were not provided. The Company was joined as defendants in a small number of cases.

To date, the Company has given over 150 indemnification letters not limited in sum in order to receive building permits and three undertakings to provide indemnification letters. In some of these instances, the Company has not yet constructed the cell sites. The Company expects that it will be required to continue to provide indemnification letters as the process of deploying the Company cell sites progresses.

The Company estimates that the changes referred to above may have the following impacts:

- (a) The Company estimates, based on the opinion of the Company legal advisors, that there are currently no legal grounds for indemnification with respect to sites established based on a permit issued under the NZP, prior to the entry of the aforementioned amendment. Attempts, which have yet to be decided, are being made to assert such grounds for legal claims.
- (b) As part of the Company's considerations for establishment of new cell sites, the Company will also examine the potential for a claim under Section 197. To the best of management's knowledge, at this point no court decision has been made indicating a decline in the value of property due to the construction of a cell site.

(c) The need to dismantle and remove existing sites, and the difficulties in establishing alternative sites, could have an adverse effect on the Company's results of operations.

F-44

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

B. Effects of new legislation and standards

1. (cont'd)

(d)The Company is unable to estimate the future impact of the indemnification requirement, as detailed in sections a and b. Despite this, if the Company shall be required to make substantial payments under the indemnity letters, it may have an adverse effect on the Company's financial results.

2. On December 5, 2004, certain changes to the Communications Regulations (Telecommunications and Broadcasting) (Payments for Interconnecting), 2000, provided for the following:

(a) A gradual decline in the rate of interconnection tariffs received from other cellular networks or from landline network operators, as follows: as of March 1, 2005, the rate of NIS 0.45 per minute will decrease to a maximum rate of NIS 0.32 per minute; as of March 1, 2006, to a maximum rate of NIS 0.29 per minute; as of March 1, 2007, to a maximum rate of NIS 0.26 per minute, and as of March 1, 2008, to a maximum rate of NIS 0.22 per minute.

(b) A decrease in the rate of interconnection tariffs received from international network operators, from the current rate of NIS 0.25 per minute, to a maximum rate of NIS 0.22 per minute, as of March 1, 2008.

(c) A decrease, as of March 1, 2005, in the rate of SMS interconnection tariffs received from other cellular operators from the rate of NIS 0.285 per message, to a maximum rate of NIS 0.05 per message, and an additional decrease to a maximum rate of NIS 0.025 per message as of March 1, 2006.

(d)The aforementioned tariffs in items a through c do not include Value Added Tax and linkage to the CPI, and they are annually updated, based on the annual change in the CPI, as of March 1, 2005, in accordance with the provisions of the aforementioned regulations.

In addition, on December 16, 2004, the Company's license was amended and therefore, commencing January 1, 2009, the basic airtime charging unit, including for interconnect purposes, will decrease from the current intervals of 12-second units to intervals of 1-second units. In September 2007, the Company's general license was amended preventing the Company from offering subscribers calling plans using airtime charging units other than the basic airtime charging unit set in the general license. These changes may result in a decrease in the Company's revenues. The Company has been taking steps to address the effects of the amended license and at this time is unable to assess the potential effect of the amendments to the Company's results of operations.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

B. Effects of new legislation and standards

3. As a result of an amendment to the Communications Law in March 2005, cellular and landline telephone operators were required to implement number portability by September 1, 2006. Despite efforts to introduce the requisite technology and coordinate the transition to number portability by September 1, 2006, no cellular or landline operator has implemented number portability by that date. Number portability was implemented in Israel in December 2007. Number portability permits cellular and landline network subscribers in Israel to change network operators (from one cellular operator to another and from one landline operator to another) without having to change their telephone numbers.

In May 2007, the Ministry of Communications notified its intention to impose monetary sanctions on telephony companies, including the Company, following non-implementation and operation of Number portability, as of September 1, 2006. The intended monetary sanction applicable to the Company for the period commencing September 1, 2006 and ending November 30, 2007, is approximately NIS 6 million. The Company has submitted its objection to the aforementioned intended sanctions, to the Ministry of Communications.

C. Commitments

1. The Company has commitments regarding the license it was granted in 1994, most of which are:
 - a. Not to pledge any of the assets used to execute the license without the advance consent of the Ministry of Communications.
 - b. To pay the State of Israel royalties equal to 2.5% of the Company's revenues generated from telecommunications services, less payments transferred to other license holders for interconnect fees or roaming services, sale of handsets and losses from bad debt. The rate of these royalties has decreased in recent years, from 4.5% in 2002, to 4% in 2003, to 3.5% in 2004 and 2005, to 3% in 2006 and to 2.5% in 2007. The royalty rate will continue to be reduced by 0.5% per year, until reaching a rate of 1%.
 - c. The Company's shareholders' joint equity, combined with the Company's equity, shall not amount to less than \$ 200 million. Regarding this stipulation, a shareholder holding less than 10% of the rights to the Company's equity is not taken into account.

The Company is in compliance with the above conditions.

2. In September 2005, the Company signed an agreement with Ericsson Israel Ltd. according to which the Company will acquire a UMTS radio access network and ancillary products and services. The Company is obligated to purchase maintenance services for 5 years from the launch of the system (until 2011) and the Company has an option to purchase additional maintenance services for 20 years from the launch of the Systems (until 2026), including all the required services for establishment and maintenance of the system (including receipt of updates and upgrades for the system). The Company agreed to purchase 60% of cell sites the Company purchases by September 2010 from Ericsson. The aggregate scope of the agreement is \$27.5 million payable over five years.

Under the agreement the parties generally have limited liability for direct damages of up to 40% of the value of the agreement.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

C. Commitments (cont'd)

3. Be'eri Printers provides the Company's printing supplies and invoices as well as the distribution, packaging and delivery of invoices and other mail to the postal service distribution centers. The Company entered into an agreement with Be'eri Printers - Limited Partnership and with Be'eri Technologies (1977) Ltd., or together Be'eri, for printing services in August 2003. Under the terms of the agreement, the Company committed to purchase from Be'eri a minimum monthly quantity of production and distribution services which may be reduced if the Company modifies its printed invoice delivery policy. The agreement is valid until July 2008.
4. As at December 31, 2007, the Company has commitments to purchase equipment for the communications' network and cellular telephone equipment, at an amount estimated at NIS 221 million.
5. Major operating lease and service agreements:
- a. Office buildings and warehouses – there are lease agreements for periods of up to 21 years and ten months.
 - b. Switching stations – there are lease agreements for switching station locations for periods of up to 12 years.
 - c. Cell sites – there are lease agreements for cell sites for periods of up to 28 years and eleven month.
 - d. Service centers, retail stores and stands – there are lease agreements for service and installation centers and stands for periods of up to 14 years and three months.
 - e. Transmission services for cell sites and switches.
 - f. Motor vehicles lease for a period of 3 years.

The anticipated annual lease payments under operating leases are as follows:

| | December 31 2007 NIS millions |
|---------------------|---|
| 2008 | 243 |
| 2009 | 228 |
| 2010 | 208 |
| 2011 | 160 |
| 2012 | 127 |
| 2013 and thereafter | 660 |

D. Liens and guarantees

As part of issuance of the Series A and B debentures (see Note 14), the Company committed not to create liens on its assets so long as the debentures have not been fully repaid, except for a fixed lien on assets for purposes of securing credit that will permit acquisition of those assets.

F-47

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 16 - Commitments and Contingent Liabilities (cont'd)

D. Liens and guarantees (cont'd)

The Company has given bank guarantees as follows:

- a. To the Government of Israel (to guarantee performance of the License) – U.S. \$10 million.
- b. To the Government of Israel (to guarantee performance of the License for Cellcom Fixed Line Communication L. P.) - NIS 10 million.
- c. To suppliers and government institutions – NIS 13 million.

Note 17 - Shareholders' Equity

| | December 31, 2007 | |
|--|-------------------|--------------------------|
| | Authorized | Issued and Paid-up |
| | NIS | NIS |
| Ordinary shares of NIS 0.01 par value each | 3,000,000 | 975,047 |
| | December 31, 2006 | |
| | Authorized | Issued and Paid-up |
| | NIS | NIS |
| Ordinary shares of NIS 0.01 par value each | 3,000,000 | 975,000 |

- A. On June 7, 2007, September 6, 2007 and December 3, 2007, the Company distributed to its shareholders a cash dividend in the amount of NIS 198 million, NIS 201 million and NIS 256 million, respectively.
- B. The earnings per share and the number of shares used in the calculation of earnings per share have been retroactively adjusted to reflect the increase in the authorized share capital, stock split and allotments of bonus shares discussed below in accordance with Israeli Standard No. 22.

On October 12, 2006, the shareholders' meeting of the Company resolved the following decisions regarding capital transactions:

- 1)

Explanation of Responses:

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 4

To reorganize the share capital so that each ordinary share of NIS 0.1 par value would be split into 10 ordinary shares of NIS 0.01 par value.

2) To increase the authorized share capital from 100,000,000 ordinary shares of NIS 0.01 par value to 300,000,000 ordinary shares of NIS 0.01 par value.

3) To allot 96,360,000 fully paid share dividend of NIS 0.01 par value to all shareholders, pro rata.

Following consummation of the above transactions, the Company had 97,500,000 issued and fully paid ordinary shares issued and outstanding.

F-48

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 17 - Shareholders' Equity (cont'd)

C. Share Based Incentive Plan

In September 2006, the Company's Board of Directors approved a share based incentive plan for employees, directors, consultants and sub-contractors and to those of the Company's affiliates and the shareholders' affiliates. The plan has an initial pool of 2,500,000 shares over which options and restricted stock units may be granted.

In October and November 2006, the Company granted options to purchase an aggregate of 2,414,143 ordinary shares at an exercise price of \$12.60 per share. Among those grants were options to purchase up to 450,000 ordinary shares granted to the Chairman of the Company's Board of Directors and an additional 450,000 options to the Company's Chief Executive Officer. The remainder of the option grants was made to other Company employees. Options not exercised within 6 years of the grant date, will expire.

In March 2007, the Company granted options to purchase an aggregate of 30,786 ordinary shares at an exercise price of \$12.60 per share to senior employees of the Company, under the terms of the plan.

As a result of a dividend adjustment mechanism, the exercise price for all options was adjusted to \$10.93 as of December 31, 2007.

In general, the options will vest in four equal installments on each of the first, second, third and fourth anniversary of the date of grant. As a result, the total value of the options granted in October - November 2006 and March 2007 will be expensed over the vesting period commencing on the date of completion of a public offering of the Company's ordinary shares. However, the vesting of options and restricted stock units will be accelerated upon the occurrence of certain events, including a merger, a consolidation, a sale of all or substantially all of the Company's consolidated assets, or a sale of the Company's ordinary shares held by DIC and its affiliates to a third party resulting in IDB holding less than 50.01% of the Company's then outstanding share capital.

The total compensation expense related to the options granted during October-November 2006 and March 2007 is approximately NIS 53 million, which will be recognized over the vesting period commencing on the date of completion of a public offering of the Company's ordinary shares (February 9, 2007). During the year ended December 31, 2007, approximately NIS 29 million was recognized as an expense.

The fair value of each option granted was estimated on the date of the grant using the Black & Scholes model, assuming a dividend yield of zero percent, due to a dividend protection feature, and using the following assumptions:

- weighted average expected life of the options of 4.25 years;
- risk free, annual interest rate of 5.01%, which represents the risk-free interest rate of zero-coupon U.S. Government Bonds; and
- expected average volatility of 26.69%, which represents a weighted average standard deviation rate for the stock prices of similar publicly traded companies.

F-49

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 17 - Shareholders' Equity (cont'd)

C. Share Based Incentive Plan (cont'd)

The changes in the balance of the options in 2007 were as follows:

| | Number of options | Weighted average of exercise price (US Dollars) |
|--|----------------------|---|
| Balance as at January 1, 2007 | 2,414,143 | 10.93 |
| Granted during the year | 30,786 | 10.93 |
| Forfeited during the year | (40,078) | - |
| Exercised during the year | *(7,955) | 30.18 |
| Total options outstanding as at December 31, 2007 | 2,396,896 | 10.93 |
| Total of exercisable options as at December 31, 2007 | 588,270 | 10.93 |

*In accordance with the net exercisable method, 4,721 ordinary shares were issued from the exercising of 7,955 options.

The weighted average of the remaining contractual life of options outstanding as at December 31, 2007, is 4 years and 10 months.

D. Dividend policy

The Company's board of directors adopted a dividend policy to distribute each year at least 75% of its annual net income, on a quarterly basis, determined under Israeli GAAP, subject to applicable law, the Company's license and the Company's contractual obligations and provided that such distribution would not be detrimental to the Company's cash needs or to any plans approved by the Company's Board of Directors. The Company's Board will consider, among other factors, the Company's expected results of operations, including changes in pricing and competition, planned capital expenditure for technological upgrades and changes in debt service needs including due to changes in interest rates or currency exchange rates in order to conclude reasonably that a distribution of dividends will not prevent the Company from satisfying the Company's existing and foreseeable obligations as they become due. In addition, there is an agreement among the controlling shareholders of IDB, the Company's ultimate parent company, to target a dividend distribution of at least 50% of its distributable gains each year. Dividend payments are not guaranteed and the Company's Board of Directors may decide, in its absolute discretion, at any time and for any reason, not to pay

dividends.

As a result of the voluntary full prepayment of the outstanding term loan under the Company's credit facility in March 2008, following which the credit facility was terminated, all limitations regarding the Company's ability to pay dividends, imposed by its credit facility, were revoked. In addition, Israeli law provides that dividends may only be paid out of cumulative retained earnings or out of retained earnings over the prior two years, provided that there is no reasonable concern that the payment of the dividend will prevent the Company from satisfying its existing and foreseeable obligations as they become due, and the Company's license requires that the Company and its 10% or more shareholders maintain at least \$ 200 million of combined shareholders' equity. DIC's shareholders' equity was NIS 5.197 billion (\$ 1.35 billion) at September 30, 2007 (unaudited).

F-52

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 24 - Income Tax

A. The Company is assessed for tax purposes on the basis of unconsolidated tax returns. The tax is computed on the basis of the Company's results in Israeli currency as determined for statutory purposes.

B. The Company is assessed for tax purposes according to the Income Tax Law (Adjustments for Inflation), 1985 (hereinafter "the Law"), the purpose of which is to measure the results for tax purposes on a real basis and to prevent taxation of inflationary profits. The adjustment of nominal profit for tax purposes is not necessarily the same as the adjustment according to opinions of the Israeli Accounting Standards Board and, as a result, differences occur between the income reported in the financial statements and the adjusted income for tax purposes.

C. On July 25, 2005, the Knesset passed the Law for Amendment of the Income Tax Ordinance (No. 147 and Temporary Order) ("Amendment 147"), which provides for an additional gradual reduction of the Corporate tax rates in the following manner: in 2006 the tax rate will be 31%, in 2007 the tax rate will be 29%, in 2008 the tax rate will be 27% and from 2009 the tax rate will be 26% and from 2010 onward the tax rate will be 25%. In addition, commencing from 2010, upon reduction of the Companies Tax rate to 25%, every real capital gain will be subject to tax at the rate of 25%.

D. Reconciliation of income tax expense:

A reconciliation of the theoretical tax expense computed on earnings before taxes at the statutory tax rate and the actual income tax provision is presented as follows:

| | Year ended December 31 | | |

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 24 - Income Tax (cont'd)

H. Losses for tax purposes

One of the Company's subsidiaries has a tax loss carry forward in the amount of NIS 11 million. The balances of the losses carried forward to the succeeding year are linked to the CPI. No deferred tax asset has been recorded in respect of these losses and deductions since utilization thereof is not anticipated.

The Company has final tax assessments up to and including the 2005 tax year. The Company's subsidiaries have not been assessed for tax purposes since their incorporation.

I. Court ruling regarding deductibility for tax purposes of financing expenses

On November 20, 2006, the Israeli Supreme Court overturned a previous ruling made by the Israeli District Court regarding the deductibility for tax purposes of financing expenses that might be attributed by the Israeli tax authorities to the financing of dividends. Following this ruling, the Company recorded in 2006 an additional tax provision of NIS 56 million, based on the possibility that part of the Company's financing expenses accrued in 2006 will not be recognized as a deductible expense for tax purposes. For tax purposes, as of the date of approval of the financial statements for the year ended December 31, 2006, the level of certainty required in order to recognize these expenses did not exist.

In October 2007, the Israeli Supreme Court issued two new rulings readdressing its previous ruling of November 2006 regarding the deductibility of financing expenses for tax purposes, that might be attributed by the Israeli Tax Authority to a financing of dividends. As a result of these rulings and based on the Company's legal counsels' opinion, the Company has released the aforesaid tax provision and reduced the income tax expenses for 2007 by NIS 56 million.

J. Taxation under Inflationary Conditions

On February 26, 2008, subsequent to the balance sheet date, the Income Tax Law (Inflationary Adjustments) (Amendment No. 20) (Restriction of Period of Application) – 2008 (“the Amendment”) was passed by the Knesset. According to the Amendment, the Adjustments Law will no longer be applicable subsequent to the 2007 Tax Year, except for the transitional provisions whose objectives are to prevent distortion of the taxation calculations.

In addition, according to the amendment, commencing 2008 tax year, the adjustment of income for the effects of inflation for tax purposes will no longer be calculated. Additionally, depreciation on protected assets and carryforward tax losses will no longer be linked to the Index, with these balances being adjusted to the Index through the end of the 2007 Tax Year, and linkage thereon ceasing from the 2008 Tax Year onwards.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 25 - Financial Instruments and Risk Management

A. Linkage terms of financial instruments

| | December 31, 2006 | | | December 31, 2007 | | |
|-------------|--|--|-----------------------------|--|--|-----------------------------|
| | In or linked to foreign currencies (mainly dollars) NIS millions | Linked to the Israeli CPI NIS millions | Unlinked NIS millions | In or linked to foreign currencies (mainly dollars) NIS millions | Linked to the Israeli CPI NIS millions | Unlinked NIS millions |
| Assets | 11 | 18 | 1,849 | 10 | 18 | 2,885 |
| Liabilities | 839 | 2,071 | 1,626 | 522 | 3,199 | 1,537 |

B. Derivative Financial Instruments

As part of its current activities, the Company is exposed to a variety of market risks, the main risks being exposure to changes in the exchange rate of the NIS to the US Dollar, changes in interest rates and inflationary risks. These risks and exposures are managed by the Company on a current basis with the aim of minimizing the impact of the fluctuations of the market factors on the results of its operations.

The Company executes transactions in derivative financial instruments for purposes of hedging its business results and cash flows. The Company enters into hedging transactions with banking institutions, including forward transactions and options in order to reduce the exposure stemming from supplier balances, long-term loans and commitments to purchase inventory and equipment.

The Company does not hold derivative financial instruments for trading or speculative purposes. The Company hedges future inventory purchases by specific hedging transactions and, accordingly, it defers the results of these transactions by recording them in a capital reserve that is reversed to the statement of income when the specific hedged inventory is issued to its customers. In the same manner, the Company hedges future property, plant and equipment purchases by specific hedging transactions, and accordingly defers the results of these transactions by recording them in a capital reserve that is reversed to the statement of income in correspondence with the depreciation of the specified property, plant and equipment. In addition, the Company has transactions that do not meet the criteria determined for classification thereof as hedging transactions in accordance with generally accepted accounting principles and, therefore, the results of these transactions are recorded in the Financial income/expenses on the statement of income on a current basis.

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 4

Set forth below is the composition of the derivative financial instruments at the following dates:

| | December 31, 2006 | | December 31, 2007 | |
|---|------------------------------|----------------------------------|------------------------------|----------------------------------|
| | Par value NIS millions | Fair value NIS millions | Par value NIS millions | Fair value NIS millions |
| Forward contracts on exchange rate (mainly dollar– NIS) | 507 | (26) | 537 | (28) |
| Forward contracts on Israeli CPI | 500 | (15) | 1,800 | 24 |
| Options on the exchange rate (mainly dollar– NIS) | 659 | (1) | 530 | 1 |
| Compounded foreign currency and interest swap | 718 | (70) | 792 | (61) |
| | 2,384 | (112) | 3,659 | (64) |

F-56

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 25 - Financial Instruments and Risk Management (cont'd)

B. Derivative Financial Instruments (cont'd)

Cash flow hedging instrument activity recorded within the shareholders' equity in the capital reserve, net of tax, was as follows:

| | December 31 | |
|---|-------------|----------|
| | 2006 | 2007 |
| | NIS | NIS |
| | millions | millions |
| Beginning accumulated derivative in capital reserve | 5 | (24) |
| Net (gain) loss reclassified to earnings | (1) | 19 |
| Net change in the revaluation of hedging transactions | (28) | (28) |
| Ending accumulated derivative in capital reserve | (24) | (33) |

The total unrealized fair value loss on cash flow hedges recorded within the shareholders' equity in the capital reserve and totaling NIS 23 million (net of tax NIS 17 million) is expected to be reclassified to earnings during the next 12 months (until December 31, 2008) due to settlement of the related contracts.

C. Fair value of financial instruments

The estimated fair values of financial instruments with a carrying value materially different from their fair value, based on quoted market prices or rates for the same or similar instruments, and the related carrying amounts are as follows:

| | December 31, 2006 | | December 31, 2007 | |
|----------------|-------------------|------------|-------------------|------------|
| | Book value | Fair value | Book value | Fair value |
| | NIS | NIS | NIS | NIS |
| | millions | millions | millions | millions |
| Debentures (1) | 1,989 | 2,056 | 2,983 | 3,237 |

(1) The fair value of the debentures is based upon their quoted market price as of the date of the balance sheet.

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 26 - Related and Interested Parties (cont'd)

B. Transactions with related and interested parties executed in the ordinary course of business at regular commercial terms:

| | Year ended December 31 | | |
|--|------------------------|-----------------|-----------------|
| | 2005 | 2006 | 2007 |
| | NIS millions | NIS millions | NIS millions |
| Expenses: | | | |
| Salaries and related expenses to related parties | * 17 | 3 | ** 16 |
| Professional services and other | 2 | 2 | 4 |

* For the year ended December 31, 2005, includes benefits and grants in respect of retirement in the total amount of NIS 11 million and a signing bonus in the total amount of NIS 3 million.

** Includes compensation expenses related to options granted that were recognized during the year ended December 31, 2007 in the total amount of NIS 11 million.

In connection with the registration of the Company's shares on the NYSE on February 9, 2007, selling shareholders (DIC and Goldman Sachs International) reimbursed the Company for all expenses incurred in connection with the said registration.

On December 2007, the Company signed an agreement for the sale of an asset to Bayside Land Corporation Ltd., which is controlled by the controlling shareholder of the Company. Refer to Note 8 for more details.

In the ordinary course of business, from time to time, the Company purchases, leases, sells and cooperates in the sale of goods and services or otherwise engages in transactions with entities that are members of the IDB group or other interested or related parties.

The Company has examined said transactions and believes them to be on commercial terms comparable to those that the Company could obtain from unaffiliated parties.

C. An agreement with DIC

In October 2006, the Company entered into an agreement with DIC pursuant to which DIC provides the Company with advisory services in the areas of management, finance, business and accountancy in consideration of NIS 2 million per year. This agreement is for a term of one year and is automatically renewed for one-year terms unless either party provides 60 days' prior notice to the contrary.

D. An agreement with Netvision 013 Barak

In July 2007, the Company entered into an agreement with Netvision 013 Barak ("Netvision") pursuant to which Netvision will provide the Company with interconnect and roaming services in the sum of approximately NIS 35 million per year. The agreement is for a term of two years.

Note 27 - Subsequent Events

A. On March 10, 2008, subsequent to the balance sheet date, the Company voluntarily prepaid the balance of the outstanding amounts under its credit facility, in a principal amount of \$140 million (comprising of \$85 million denominated in US\$ and approximately NIS 253 million denominated in NIS), following which, the credit facility was terminated. For more information refer to Note 13C.

F-58

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 27 - Subsequent Events (cont'd)

B. In February 2008, subsequent to the balance sheet date, the Company issued, in a private placement to institutional investors, additional debentures of Series C, in a principal amount of NIS 81 million and additional debentures of Series D debentures in a principal amount of approximately NIS 493.8 million, in exchange for a total consideration of NIS 600 million. For additional details in regards to the existing debentures refer to Note 14C.

C. On March 17, 2008, the Company's Board of Directors declared a cash dividend in the amount of NIS 7.18 per share, totaling approximately NIS 700 million, to be paid on April 14, 2008, to the shareholders of the Company of record at the end of the trading day in the NYSE on March 31, 2008. The dividend is presented under a separate item of shareholders' equity.

Note 28 - Material Differences between Israeli and US GAAP and their Effect on the Financial Statements

A. The effect of the differences between Israeli and US GAAP on the financial statements

As discussed in Note 2, the accompanying consolidated financial statements were prepared in accordance with Israeli generally accepted accounting principles ("Israeli GAAP"), which differ in certain significant respects from those generally accepted in the United States of America ("US GAAP"). Information related to the nature and effect of such differences is presented below.

Reconciliation of:

1. Israeli GAAP net income to net income according to US GAAP

| | Year ended December 31 | | |
|--|------------------------|----------|----------|
| | 2005 | 2006 | 2007 |
| | NIS | NIS | NIS |
| | millions | millions | millions |
| Net income as reported, according to Israeli GAAP | *531 | *559 | 873 |
| Temporary differences resulting from recognition of revenue arising from application of EITF 00-21 – Note 28C(4) | 14 | 5 | 1 |
| Depreciation of property, plant and equipment (*) | * - | * - | - |
| Embedded Derivatives – Note 28C(3) | 9 | (17) | 52 |
| AROs – Note 28C(5) | (2) | 2 | - |
| Amortization of rights in land- Note 28C(7) | - | (1) | (2) |
| Reversal of impairment previously made- Note 28C(7) | - | - | (10) |
| Push down accounting adjustments - Note 28C(2): | | | |
| Elimination of deferred revenue | (10) | - | - |

Explanation of Responses:

| | | | |
|--|------|-------|-------|
| Depreciation expenses of property, plant and equipment | 25 | 103 | 96 |
| Amortization expenses of intangible assets | (50) | (167) | (140) |
| Interest expenses on push down debt | (43) | (17) | - |
| Income tax effect of US GAAP adjustments | * 17 | * 27 | (1) |
| Net income according to US GAAP | 491 | 494 | 869 |

(*)As a result of the retroactive initial implementation of the new Israeli Standard No. 27, no differences remain between Israeli GAAP and US GAAP, relating to the depreciation methodology of property, plant and equipment for all periods presented (See Note 2U(2)).

4. Comprehensive income (loss)

Comprehensive income (loss) consists of the change, during the current period, in the Company's shareholders' equity that does not derive from shareholders' investments or from the distribution of earnings to shareholders.

Comprehensive income (loss) includes two components - net income and other comprehensive income. Net income is the income stated in the income statement while other comprehensive income includes the amounts that are recorded directly in shareholders' equity and that are not derived from transactions with shareholders recorded directly in shareholders' equity.

| | January 1 through September 21 2005 NIS millions | September 22 through December 31 2005 NIS millions | Year ended December 31 2006 NIS millions | Year ended December 31 2007 NIS millions |

| Balance of cash and cash equivalents at end of the period | 44 | 1,772 | 56 | 911 |

There is no difference between Israeli and US GAAP non cash investing and financing activities other than the effect of push-down accounting.

C. Differences between Israeli GAAP and US GAAP

1. Effect of inflation

In accordance with Israeli GAAP:

The Company, in accordance with Israeli GAAP, comprehensively included the effect of price level changes in the accompanying financial statements, through December 31, 2003. According to such Israeli accounting principles, the Company discontinued the adjustment for such changes as of January 1, 2004. The adjusted amounts included in the financial statements as at December 31, 2003 served as the starting point for the financial reporting at January 1, 2004.

In accordance with US GAAP:

Explanation of Responses:

US GAAP does not provide for recognition of the effects of price level changes and accordingly, the effects of such changes are generally excluded from amounts determined in conformity with US GAAP. However, in accordance with the guidance of the US Securities and Exchange Commission for the reporting requirements by foreign issuers, this difference between Israeli GAAP and US GAAP is not included in this reconciliation to US GAAP.

F-66

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 28 - Material Differences between Israeli and US GAAP and their Effect on the Financial Statements (cont'd)

C. Differences between Israeli GAAP and US GAAP (cont'd)

2. Push-down accounting

In accordance with Israeli GAAP:

Following the September 21, 2005 shareholders' transaction, DIC gained a 94.5% controlling interest in the Company's ordinary shares, and 100% control of the Company's voting rights. Under Israeli GAAP, the new basis of accounting in the Company that resulted from DIC's purchase and controlling interest is not pushed down to the financial statements of the Company.

In accordance with US GAAP:

In accordance with SEC Staff Accounting Bulletin Topic 5J, DIC's purchase accounting adjustments, determined in accordance with FAS 141, are "pushed-down" to the Company, meaning the US GAAP financial information presented in Note 27 reflects the new basis of accounting for the Company as of September 21, 2005.

In addition, short-term loans incurred by DIC as a result of its acquisition of the Company were pushed down to the Company's financial statements from the date of acquisition. The push-down debt has been classified as short-term on the DIC financial statements, and was repaid in full in January and March 2006 through dividend proceeds received from the Company. Interest expenses, including tax effects, on the push-down debt have been included in the Company's income statement based on the actual interest incurred by DIC and presented as a non-cash item in the accompanying statements of cash flows and as a capital contribution in the statement of shareholders' equity.

a. New basis of accounting:

The purchase price paid as a result of the transaction described above has been allocated to a proportionate amount of the Company's underlying assets and liabilities based upon DIC's acquired interests (69.5%) in the respective fair market values of assets and liabilities at the date of the transaction. The following summarizes the fair values attributable to the assets acquired and liabilities assumed as a result of DIC's acquisition of the Company. These values exclude the proportionate share of the historical cost basis attributable to the minority interest holders representing 5.5% of the Company and to the 25% that DIC acquired for no consideration as a founding shareholder, upon the Company formation in 1994.

F-67

Cellcom Israel Ltd. and Subsidiaries

Notes to the Financial Statements

Note 28 - Material Differences between Israeli and US GAAP and their Effect on the Financial Statements (cont'd)

C. Differences between Israeli GAAP and US GAAP (cont'd)

2. Push-down accounting (cont'd)

Allocation of 69.5% proportionate share acquired to major components of assets and liabilities acquired (NIS amounts in millions):

| | September 21 2005 NIS millions |
|---|--------------------------------------|
| Current assets | 1,051 |
| Property, plant and equipment | 1,338 |
| Other assets | 301 |
| Liabilities | (1,098) |
| Definite life intangible assets acquired licenses | 346 |
| Definite life intangible assets acquired customer base | 714 |
| Indefinite life brand name | 468 |
| Goodwill | 3,283 |
| Deferred taxes | (134) |
| Total cash consideration paid for equity interests, including direct acquisition cost. | 6,269 |

b. Primary changes to the balance sheet

The primary changes to the balance sheet as of the date of acquisition reflect the following push-down adjustments:

- (1) The reduction of the carrying value of property, plant and equipment, which have been recorded using the estimated replacement cost fair market value;
- (2) The recording of a value for brand name;
- (3) The recording of a value for customer base;
- (4) Adjustment to deferred tax assets resulting from the above changes;
- (5) The recording of a value for goodwill;
- (6) The recording NIS 2,970 millions of push-down debt;
- (7) The elimination of deferred revenue;
- (8) An increase to the shareholders equity in respect of these adjustments.

c. Primary changes to the income statement

The primary changes to the income statement as a result of the acquisition include:

Explanation of Responses:

- (1) A decrease in costs of revenue due to lower level of depreciation from the reduced depreciable base of property, plant and equipment;
- (2) An increase in costs of revenue due to amortization of the acquired customer base;
- (3) An increase in interest expenses resulting from the push-down debt;
- (4) A decrease in the deferred tax expenses resulting from the above adjustments.

2. Push-down accounting (cont'd)

Due to the impact of the changes resulting from the push-down accounting adjustments described above, the annual income statement and cash flows presentations separate the Company's results into two periods: (1) the period ending with the September 21, 2005 consummation of the acquisition transaction and (2) the period beginning after that date utilizing the new basis of accounting. The results are further separated by a heavy black line to indicate the effective date of the new basis of accounting. Similarly, the current and prior period amounts reported on the balance sheet are separated by a heavy black line to indicate the application of a new basis of accounting between the periods presented.

d. Brand names and goodwill

The new basis of accounting resulted in new recorded values for brand names and for goodwill as of September 21, 2005 to reflect their estimated fair values. Neither of these intangible assets is amortizable and they are therefore subject to annual impairment testing.

Pursuant to SFAS No. 142, goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of this Statement. The Company had established September 30 as its annual impairment testing date. An impairment test is also completed if events or changes in circumstances indicate that the assets might be impaired. In accordance with the annual impairment test performed during the fiscal year of 2007, no impairment of the recorded values was required.

e. Customer base

Upon adoption of push-down accounting, the new basis of accounting resulted in new recorded values for customer base as of September 21, 2005 to reflect their estimated fair values. The Company amortizes the customer base over 7 years according to the economic benefit expected from those customers each period.

The Company is required to perform impairment tests for long-lived assets in accordance with SFAS No. 144 "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144"), when the Company determines that indicators of impairment are present. Declines in market value of its business or the value of its customer base that may be incurred prospectively may also require additional impairment charges. No impairment of the recorded values was required.

Amortization expenses relating to customer base for the year ended December 31, 2006 and the year ended December 31, 2007 were NIS 167 million and NIS 140 million, respectively, the cumulative amortization expenses of customer base as of December 31, 2007 is NIS 357 million.

3. Embedded Derivatives

In accordance with Israeli GAAP:

No separation of embedded derivatives is required under Israeli GAAP.

In accordance with US GAAP:

The Company enters into commercial contracts (mainly for cell site leases) in which a foreign currency derivative instrument is “embedded” within the contract. This embedded derivative is separated from the host contract and carried at fair value when (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract and (2) a separate, stand-alone instrument with the same terms would qualify as a derivative instrument. The embedded foreign currency derivatives are marked to market each reporting period against net income.

4. Revenue recognition – free air time sold together with a handset

In accordance with Israeli GAAP:

The Company does not separately account for free monthly airtime given in connection with sales of handsets, and recognized the total consideration received in such transactions upon delivery of the handset to the subscriber.

In accordance with US GAAP:

Pursuant to Emerging Issues Task Force (“EITF”) No. 00-21, “Revenue Arrangements with Multiple Deliverables,” the Company determined that the sale of a handset with accompanying services constitutes a revenue arrangement with multiple deliverables. Accordingly, consideration received for handsets, up to their fair value, that is not contingent upon the delivery of additional items (such as the services), is recognized as equipment revenues upon the delivery of the equipment to the subscriber, when all revenue recognition criteria are met. Consideration for services is recognized as services revenues, when earned.

Based on EITF 00-21, the Company separately accounts for free minutes given in connection with the sales of handsets for transactions entered into from January 1, 2004. Consequently, the Company allocates a portion of the revenue generated from the sale of handsets to the free minutes given, based on the relative fair values of the minutes and handsets. The revenues associated with the free minutes are then recognized over the service period.

5. Asset Retirement Obligations

The Company is subject to asset retirement obligations associated with its cell site operating leases. These lease agreements contain clauses requiring the removal of equipment and the restoration of the leased site at the end of the lease term, creating asset retirement obligations.

Notes to the Financial Statements

All amounts are in millions except for share and per share data

Note 28 - Material Differences between Israeli and US GAAP and their Effect on the Financial Statements (cont'd)

C. Differences between Israeli GAAP and US GAAP (cont'd)

5. Asset Retirement Obligations (cont'd)

In accordance with Israeli GAAP:

Prior to 2007 the Company did not recognize a liability for asset retirement obligations associated with the retirement of tangible long lived assets as it is not required under Israeli GAAP.

Effective January 1, 2007, upon adoption of Standard No. 27, the Company recognized such liabilities.

In accordance with US GAAP:

The Company applied SFAS 143 "Accounting for Asset Retirement Obligations" ("SFAS 143"). SFAS 143 requires that an asset retirement obligation (ARO) associated with the retirement of a tangible long lived asset be recognized as a liability in the period in which it is incurred and becomes determinable, with an offsetting increase in the carrying amount of the associated asset. The cost of the tangible asset, including the initially recognized ARO, is depreciated such that the cost of the ARO is recognized over the useful life of the asset.

The ARO is recorded at fair value, and the accretion expense will be recognized over time as the discounted liability is accreted to its expected settlement value. The fair value of the ARO is measured using expected future cash out flows discounted at the Company's credit-adjusted risk-free interest rate.

6. Rights in land and impairment previously made

In accordance with Israeli GAAP:

Lands leased from the ILA are classified as Property, plant and equipment and are not depreciated.

In accordance with US GAAP:

Lease payments with regard to the aforementioned lands are classified as long-term receivables and are amortized over the lease period.

In accordance with Israeli GAAP:

Provisions previously made for the decline in value of land may be reversed if indicators are present that beneficial events have occurred or beneficial changes in circumstances have taken place, see Note 8A regarding reversal of previously made impairments during 2007.

In accordance with US GAAP:

Provisions for the decline in value cannot be reversed.

7. Recently adopted accounting standards

Effective January 1, 2007, the Company adopted provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48 ("FIN 48") "Accounting for Uncertain Tax Positions – An Interpretation of FASB Statement No. 109". FIN 48 addresses the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a threshold of more-likely-than-not for recognition and derecognizing of tax positions taken or expected to be taken in a tax return. FIN 48 also provides related guidance on measurement, classification, interest and penalties, and disclosure. There was no material effect on the financial statements resulting from adoption of FIN 48. As a result, the Company did not record any cumulative effect related to adopting FIN 48.
