ITEM 5. OTHER EVENTS.

The Registrant, DUSA Pharmaceuticals, Inc. ("DUSA") reports that it held a conference call today to update its shareholders on the company's research and development program advancements, particularly that the United States Food and Drug Administration completed its review of three Investigational New Drug applications allowing initiation of clinical trials using LEVULAN(R) Photodynamic Therapy ("PDT") for the treatment of onychomycosis (nail fungus), warts, and Barrett's esophagus. In addition, the Company reported that independent investigators have reported positive long-term results in a pilot study using LEVULAN(R) PDT following balloon angioplasty to inhibit arterial restenosis.

Except for historical information, this report and exhibit contain certain

forward-looking statements that involve known and unknown risks and uncertainties, which may cause actual results to differ materially from any future results, performance or achievements expressed or implied by the statements made. These forward-looking statements relate to beliefs regarding confirmation of feasibility of LEVULAN(R) PDT programs and that continued progress will add value to the Company; expectations concerning the conduct, goals, enrollment rates and results of clinical trials; and intention to begin new trials. Such risks and uncertainties include, but are not limited to, regulatory requirements, results of clinical trials, development and supply of light devices, market risks, and other risks identified in DUSA's SEC filings from time to time.
