**Trina Solar Announces the Closing of Over-Allotment of
675,000 American Depositary Shares**

CHANGZHOU, China, August 17, 2009 /PRNewswire-Asia-FirstCall via COMTEX/ Trina Solar Limited (NYSE: TSL) (Trina Solar or the Company), a leading integrated manufacturer of solar photovoltaic products from the production of ingots, wafers and cells to the assembly of photovoltaic, or PV, modules, announced today that it closed the sale of an additional 675,000 American depositary shares, or ADSs, each representing 100 ordinary shares of the Company, on August 17, 2009, following the exercise in full by the underwriters of their over-allotment option in connection with the Company's recently-closed follow-on public offering.

With the sale of the additional 675,000 ADSs to the underwriters, 5,175,000 ADSs in total have been sold in connection with the Company's follow-on public offering. The Company received aggregate net proceeds of approximately \$142.5 million, after deducting underwriting discounts and commissions, which includes net proceeds of approximately \$18.6 million from the sale of the 675,000 ADSs pursuant to the over-allotment option.

Goldman Sachs (Asia) L.L.C. and Credit Suisse Securities (USA) LLC acted as joint bookrunners for the offering, and Piper Jaffray & Co acted as a co-manager for the offering.

This press release does not constitute an offer to sell, or the solicitation of an offer to buy, securities, and does not constitute an offer, solicitation or sale in any jurisdiction in which such offer, solicitation or sale would be unlawful. Copies of the prospectus supplement and the accompanying prospectus may be obtained from Goldman, Sachs & Co., Attention: Prospectus Department, 85 Broad Street, New York, NY, 10004, telephone: (866) 471-2526, facsimile: +1-212-902-9316, or Credit Suisse Securities (USA) LLC, Attention: Prospectus Department, One Madison Avenue, New York, NY 10010, telephone: (800) 221-1037.

About Trina Solar Limited

Trina Solar Limited (NYSE: TSL) is a well recognized manufacturer of high quality modules and has a long history as a solar PV pioneer since it was founded in 1997 as a system installation company. Trina Solar is one of the few PV manufacturers that have developed a vertically integrated business model from the production of monocrystalline and multicrystalline silicon ingots, wafers and cells to the assembly of high quality modules. Trina Solar's products provide reliable and environmentally-friendly electric power for a growing variety of end-user applications worldwide.

Exhibit 99.2

Trina Solar Announces Second Quarter 2009 Results

Changzhou, China August 17, 2009 Trina Solar Limited (TSL) (Trina Solar or the Company), a leading integrated manufacturer of solar photovoltaic (PV) products from the production of ingots, wafers and cells to the assembly of PV modules, today announced its financial results for the second quarter ended June 30, 2009.

Second Quarter 2009 Financial and Operating Highlights

Solar module shipments were approximately 64 MW, representing an increase of 30.9% sequentially and 34.3% year-over-year.

Total net revenues were \$150.0 million, representing an increase of 13.5% sequentially and a decrease of 26.5% year-over-year.

Gross margin was 27.4%, compared to 17.2% sequentially and 23.2% year-over-year.

Operating income and operating margin were \$18.6 million and 12.4%, respectively, compared to \$6.8 million and 5.2%, respectively, in the first quarter of 2009. Operating income includes a \$5.0 million write-off of accounts receivable.

Net income was \$18.9 million, which included a foreign currency exchange gain of \$13.7 million, compared to a net loss of \$10.6 million in the first quarter of 2009.

Earnings per fully-diluted ADS was \$0.71

We are very pleased with our performance in the second quarter and especially encouraged by the success of the recent follow-on public offering which demonstrates the market's confidence in Trina Solar and its leading high-quality low-cost positioning, said Jifan Gao, Chairman and CEO of Trina Solar. We see market confidence returning to the PV sector due the strong government commitment to support clean energy technologies and an improvement in financing conditions. With greater visibility and a pickup in demand in the market we have therefore committed to capacity expansion by the end of the year in order to further leverage the benefits of our fully integrated business model.

Recent Business Highlights

During the second quarter of 2009, the Company

increased its market share in growing PV markets such as the Benelux market, reflecting a diversification strategy that includes over 20 established and emerging PV markets, such as Greece, the Czech Republic, Australia and the United States.

maintained strong sales to project system integrators, which currently represent more than half of the Company's total sales.

received continued strong support from established, multinational customers in Spain, Italy and Belgium who are also actively developing projects in Europe, North America and China.

submitted eight project proposals involving approximately 20 MW of projects for national and provincial subsidy programs in the PRC.

Subsequent to the second quarter of 2009, the Company

Announced a sales agreement in July 2009 to supply PROINSO with up to 25 MW and 50 MW of PV modules in 2009 and 2010, respectively, to be used for solar projects in the United States and major European markets.

Borrowed approximately \$80 million in loans in July 2009 due on June 30, 2010 from a domestic bank to support its East Campus capacity expansion project.

Completed a follow-on public offering in August 2009 of 5,175,000 American depositary shares (ADSs), each representing 100 ordinary shares of the Company.

Selected by Renewable Ventures, a Fotowatio Company, to supply modules for a two-MW PV project for Colorado State University in Fort Collins, Colorado.

Net Revenues

Trina Solar's net revenues in the second quarter of 2009 were \$150.0 million, an increase of 13.5% sequentially and a decrease of 26.5% year-over-year, due to decline in module average selling price. Total shipments were 63.9 MW, compared to 48.8 MW in the first quarter of 2009 and 47.6 MW in the second quarter of 2008. The sequential increase in total shipments was primarily due to improved demand conditions in major European markets, improved customer access to PV system purchase financings and increasing number of government incentive programs for solar energy projects in Europe, North America and Asia. Net revenues, include approximately \$1.6 million of non-module income.

Gross Profit and Margin

Gross profit in the second quarter of 2009 was \$41.2 million, compared to \$22.7 million in the first quarter of 2009 and \$47.4 million in the second quarter of 2008. Gross margin was 27.4% in the second quarter of 2009, compared to 17.2% in the first quarter of 2009 and 23.2% in the second quarter of 2008. The sequential and year-over-year improvements were due primarily to lower average silicon purchase prices. The Company continued to focus its efforts on reducing its manufacturing cost per watt through ongoing efficiency gains linked to improved supply chain management, including second sourcing options. Additional yield enhancements were achieved from manufacturing techniques involving proprietary process in our ingot, wafer, cell and module value areas, and higher cell conversion efficiencies.

Operating Expense, Income and Margin

Operating expenses in the second quarter of 2009 were \$22.5 million. The Company's operating expenses accounted for 15.0% of net revenues in the second quarter of 2009, an increase from 12.0% in the first quarter of 2009 and an increase from 8.9% in the second quarter of 2008. The sequential increase as a percentage of revenue was primarily due to a \$5.0 million write-off of accounts receivable. Operating expenses in the second quarter of 2009 included \$0.9 million in share-based compensation expenses, compared to \$1.0 million in the first quarter of 2009 and \$1.0 million in the second quarter of 2008.

Operating income in the second quarter of 2009 was \$18.6 million, compared to \$6.8 million in the first quarter of 2009 and \$29.1 million in the second quarter of 2008. Operating margin was 12.4% in the second quarter of 2009, compared to 5.2% in the first quarter of 2009 and 14.3% in the second quarter of 2008.

Net Interest Expense

Net interest expense in the second quarter of 2009 was \$5.8 million, compared to \$5.4 million in the first quarter of 2009 and \$5.1 million in the second quarter of 2008 due to a decrease in interest income.

Foreign Currency Exchange

Foreign currency exchange gain was \$13.7 million in the second quarter of 2009, compared to a \$7.6 million loss in the first quarter of 2009 and a \$6.1 million loss in the second quarter of 2008. This gain was primarily due to the appreciation of the Euro against the US dollar in the second quarter, the effect of which was partially reduced by the Company's utilization of foreign currency forward contracts to hedge its foreign currency risk exposure.

The Company continued foreign currency hedging during the second quarter of 2009 using foreign currency forward contracts between the Euro and the US dollar, with the goal of mitigating, to some extent, the effects of exchange rate volatility.

Net Income and EPS

Net income was \$18.9 million in the second quarter of 2009, an increase from a \$10.6 million loss in the first quarter of 2009 and a \$17.1 million profit in the second quarter of 2008. Net income includes the impact of the approximate \$5.0 million accounts receivable write-off and a foreign currency exchange gain of \$13.7 million.

Net margin was 12.6% in the second quarter of 2009, compared to negative 8.0% in the first quarter of 2009 and 8.4% in the second quarter of 2008.

Earnings per fully diluted ADS were \$0.71. The combined effects of the accounts receivable write-off and the foreign currency exchange gain, was approximately \$0.30 per fully diluted ADS.

Financial Condition

As of June 30, 2009, the Company had \$203.9 million in cash and cash equivalents, and restricted cash. The Company's working capital balance was \$126.8 million. Total bank borrowings stood at \$300.9 million, of which \$33.1 million were long-term borrowings. Shareholders' equity was \$443.2 million as of June 30, 2009, compared to \$423.4 million as of March 31, 2008.

As result of the sequential increase in net revenues and prudent cashflow management, the Company achieved positive net operating cashflow and positive net cashflow in the second quarter.

Subsequent Events

In August 2009, Trina Solar completed its follow-on public offering of 5,175,000 ADSs. The completed offering includes an exercised option to purchase an additional 675,000 ADSs by the underwriters. The Company received aggregate net proceeds of approximately \$142 million, after deducting underwriting discounts and commissions.

The Company intends to use the net proceeds from the offering to repurchase up to \$30 million of its 4.00% convertible senior notes due 2013 and to fund facilities expansion and other general corporate purposes. The Company's management will retain broad discretion over the use of proceeds, and the Company may ultimately use the proceeds for different purposes.

In July 2009, the Company borrowed approximately \$80 million in loans due on June 30, 2010 from a domestic bank to support its East Campus capacity expansion project. The loans bear an average annual interest rate of 5.23%, payable monthly, and are dominated in Euros, U.S. dollars and Renminbi. The loans are expected to become a part of a five-year project financing arrangement that the Company is finalizing with domestic banks.

As of July 31, 2009, the Company's total credit lines increased to approximately \$676 million, which includes approximately \$230 million of unused available credit line.

Third Quarter and Full Year Guidance

For the third quarter of 2009, the Company expects to ship between 90 MW to 110 MW of PV modules. The Company believes gross margin for the third quarter of 2009 will likely be between 23.5% and 26.5%.

For the full year of 2009 the Company reiterates the guidance for total PV module shipments between 350 MW to 400 MW, representing an increase of 74% to 99% from 2008.

Operations and Business Outlook

Module Cost Reduction

In the second quarter of 2009, the Company's non-silicon manufacturing cost for its multicrystalline modules decreased approximately \$0.06 to \$0.73 per watt. The Company expects multicrystalline modules to comprise approximately 70% of its production in 2009. For the full year 2009, the Company reiterates expectations to reduce its manufacturing costs by between 15% to 20% through a combination of technology and manufacturing process improvements together with supply chain and logistics management initiatives currently under testing or development.

Sales and Marketing

As a result of the Company's expanding global sales activities, Mr. Sean Tzou, Chief Operation Officer of the Company, will also assume responsibilities as the Head of Global Sales and Marketing. Mr. Arturo Herrero will become Vice President of Special Key Accounts and continue to report to Mr. Tzou and will be supported by sales and marketing. This structure will enable Mr. Herrero to focus on a growing number of key customer accounts in new and existing markets, further enhancing the Company's sales and marketing efforts.

Silicon Procurement

The Company maintains a diversified feedstock procurement strategy consisting of short, medium and long-term supply contracts, which include agreements entered into in the second quarter of 2007. The Company will continue to maintain competitive silicon costs relative to the current market prices. Several of the Company's long-term contracts contain price adjustment clauses that are closely linked to the prevailing market price. The Company continues to renegotiate other medium-term and long-term contracts in an effort to achieve favorable pricing and payment terms relative to current market conditions.

Cell Technology and Product Development Update

Through its research and development and technology transfer, the Company continues to improve its cell manufacturing processes to meet its previously announced 2009 conversion efficiency targets of 18.5% and 17.5% for its monocrystalline and multicrystalline commercial product lines, respectively. Based on recent on-site laboratory test production, the Company has achieved monocrystalline cell efficiencies of up to 18.6% by leveraging advanced passivation and metallization techniques involved in the PV manufacturing process.

In addition to improving its module output and low manufacturing cost platform efficiencies, the Company's technology roadmap includes further enhancement of its Building Integrated PV (BIPV) module product lines, as well as targeted application products offering architecturally friendly design advantages and others for industry-specific use applications.

Cell and Module Capacity

Through yield increases achieved from improved cell conversion efficiency rates, improved production efficiencies and manufacturing line enhancements, the Company is on target to increase its annualized in-house production capacities of PV cells and modules from the current 400 MW to approximately 450 MW by the end of September 2009. Furthermore, the Company expects to increase approximately 150 MW of additional capacity as part of its new East Campus capacity expansion initiative, achieving a total annualized cell and module production capacity of 600 MW by the end of 2009.

Conference Call

The Company will host a conference call at 6:00 p.m. ET on August 17, 2009, to discuss the results for the quarter ended June 30, 2008. Joining Jifan Gao, Chairman and CEO of Trina Solar, will be Terry Wang, Chief Financial Officer, Sean Tzou, Chief Operating Officer, Arturo Herrero, Vice President, Special Key Accounts, and Thomas Young, Director of Investor Relations. Supplemental information will be made available on the Investors Section of the Trina Solar's website at <http://www.trinasolar.com>.

To participate in the conference call, please dial the following number five to ten minutes prior to the scheduled conference call time: 1(800)884-2382. International callers should dial +1(660)422-4933. The conference ID for the call is 2323-3489.

If you are unable to participate in the call at this time, a replay will be available on August 17 at 10:00 p.m. ET, through August 24, at 11:59 p.m. ET. To access the replay, dial 1(800)642-1687, international callers should dial +1(706)645-9291, and enter the conference ID 2323-3489.

This conference call will be broadcast live over the Internet and can be accessed by all interested parties on Trina Solar's website at <http://www.trinasolar.com>. To listen to the live webcast, please go to Trina Solar's website at least fifteen minutes prior to the start of the call to register, download, and install any necessary audio software. For those unable to participate during the live broadcast, a replay will be available shortly after the call on Trina Solar's website for 90 days.
