- (1) Senior floating-rate interests (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate ( LIBOR ) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate ) and the certificate of deposit ( CD ) rate or other base lending rates used by commercial lenders.
- (2) This Senior Loan will settle after July 31, 2011, at which time the interest rate will be determined.
- (3) Represents a payment-in-kind security which may pay all or a portion of interest in additional par.
- (4) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.
- (5) Weighted average fixed-rate coupon that changes/updates monthly.
- (6) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At July 31, 2011, the aggregate value of these securities is \$3,886,043 or 1.1% of the Fund's net assets.
- (7) Adjustable rate mortgage security. Rate shown is the rate at July 31, 2011.
- (8) Security (or a portion thereof) has been pledged to cover collateral requirements on open financial contracts.
- (9) Variable rate security. The stated interest rate represents the rate in effect at July 31, 2011.
- (10) Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933.
- (11) Inflation-linked security whose principal is adjusted for inflation based on changes in a designated inflation index or inflation rate for the applicable country. Interest is calculated based on the inflation-adjusted principal.
- (12) Represents a structured security whose market value and interest rate are linked to the performance of the underlying security.
- (13) Non-income producing.

Edgar Filing: Eaton Vance Short Duration Diversified Income Fund - Form N-Q

- (14) Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale.
- (15) Amount is less than 0.05%.
- (16) Affiliated investment company available to Eaton Vance portfolios and funds which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of July 31, 2011. Net income allocated from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended July 31, 2011 was \$10,327.

\* If the Fund is the seller of credit protection, the notional amount is the maximum potential amount of future payments the Fund could be required to make if a credit event, as defined in the credit default swap agreement, were to occur. At July 31, 2011, such maximum potential amount for all open credit default swaps in which the Fund is the seller was \$13,901,000.

\*\* The contract annual fixed rate represents the fixed rate of interest received by the Fund (as a seller of protection) or paid by the Fund (as a buyer of protection) annually on the notional amount of the credit default swap contract.

\*\*\* Current market annual fixed rates, utilized in determining the net unrealized appreciation or depreciation as of period end, serve as an indicator of the market's perception of the current status of the payment/performance risk associated with the credit derivative. The current market annual fixed rate of a particular reference entity reflects the cost, as quoted by the pricing vendor, of selling protection against default of that entity as of period end and may include upfront payments required to be made to enter into the agreement. The higher the fixed rate, the greater the market perceived risk of a credit event involving the reference entity. A rate identified as Defaulted indicates a credit event has occurred for the reference entity.

(1) Upfront payment is exchanged with the counterparty as a result of the standardized trading coupon.

TRY - New Turkish Lira

The Fund pays interest on the currency received and receives interest on the currency delivered. At the termination date, the notional amount of the currency received will be exchanged for the notional amount of the currency delivered.

At July 31, 2011, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

In the normal course of pursuing its investment objectives and its use of derivatives, the Fund is subject to the following risks:

**Commodity Risk:** The Fund invests in commodities-linked derivative investments, including commodity futures contracts and options thereon and forward commodity contracts, that provide exposure to the investment returns of certain commodities. Commodities-linked derivative investments are used to enhance return.

**Credit Risk:** The Fund enters into credit default swap contracts to manage its credit risk, to gain a particular exposure to credit risk, or to enhance return.

**Foreign Exchange Risk:** The Fund engages in forward foreign currency exchange contracts, currency options and cross currency swaps to enhance return or to hedge against fluctuations in currency exchange rates. It also enters into forward foreign currency exchange contracts to hedge the currency risks of investments it anticipates purchasing and/or as a substitute for the purchase or sale of securities or currencies.

Edgar Filing: Eaton Vance Short Duration Diversified Income Fund - Form N-Q

Interest Rate Risk: The Fund utilizes various interest rate derivatives including futures, interest rate swaps and cross-currency swaps to enhance return, to change the overall duration of the portfolio, or to hedge against fluctuations in securities prices due to interest rates.

The fair value of derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) by risk exposure at July 31, 2011 was as follows:

<b>Risk</b>	<b>Derivative</b>	<b>Fair Value</b>	
		<b>Asset Derivatives</b>	<b>Liability Derivatives</b>

		<b>\$ 535,204</b>	<b>\$ (413,718)</b>

\* Amount represents cumulative unrealized appreciation or (depreciation) on futures contracts in the Futures Contracts table above.

The cost and unrealized appreciation (depreciation) of investments of the Fund at July 31, 2011, as determined on a federal income tax basis, were as follows:

<b>Aggregate cost</b>	<b>\$ 449,817,840</b>
Gross unrealized appreciation	\$ 22,850,748
Gross unrealized depreciation	(4,962,142)

**Net unrealized appreciation**

**\$ 17,888,606**

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

\* Transfers are reflected at the value of the securities at the beginning of the period. Transfers from Level 2 to Level 3 were due to a reduction in the availability of significant observable inputs in determining the fair value of investments.

At July 31, 2011, the value of investments transferred between Level 1 and Level 2, if any, during the fiscal year to date then ended was not significant.

For information on the Fund's policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund's most recent financial statements included in its semiannual or annual report to shareholders.

**Item 2. Controls and Procedures**

(a) It is the conclusion of the registrant's principal executive officer and principal financial officer that the effectiveness of the registrant's current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the registrant on this Form N-Q has been recorded, processed, summarized and reported within the time period specified in the Commission's rules and forms and that the information required to be disclosed by the registrant on this Form N-Q has been accumulated and communicated to the registrant's principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.

(b) There have been no changes in the registrant's internal controls over financial reporting during the fiscal quarter for which the report is being filed that have materially affected, or are reasonably likely to materially affect the registrant's internal control over financial reporting.
