Forward Looking Statements

Safe Harbor statement under the Private Securities Litigation Reform Act of 1995: This Form 10-Q contains forward-looking statements that are subject to risks and uncertainties, including, but not limited to; changes in economic conditions in our market areas, changes in policies by regulatory agencies, the impact of competitive loan products, loan demand risks, fluctuations in interest rates and operating results and other risks detailed from time to time in our filings with the Securities and Exchange Commission. We caution readers not to place undue reliance on forward-looking statements. We do not undertake and specifically disclaim any obligation to revise any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. These risks could cause our actual results for 2001 and beyond to differ materially from those expressed in any forward-looking statements by, or on behalf of, us.

As used throughout this report, the terms we, our or Company refer to ITLA Capital Corporation and its consolidated subsidiaries.

Table of Contents**ITLA CAPITAL CORPORATION AND SUBSIDIARIES****NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****NOTE 1 BASIS OF PRESENTATION**

The unaudited consolidated financial statements of ITLA Capital Corporation (the Company) included herein reflect all normal recurring adjustments which are, in the opinion of management, necessary to present fairly the results of operations and financial position of the Company, as of and for the interim period indicated. The unaudited consolidated financial statements include the accounts of ITLA Capital and its subsidiaries, Imperial Capital Bank (the Bank) and Imperial Capital Real Estate Investment Trust (Imperial Capital REIT), ITLA Capital Statutory Trust I (Trust I) and ITLA Capital Statutory Trust II (Trust II). All intercompany transactions and balances have been eliminated. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. The results of operations for the three and nine months ended September 30, 2001 are not necessarily indicative of the results of operations for the remainder of the year.

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our annual report on Form 10-K for the year ended December 31, 2000.

NOTE 2 EARNINGS PER SHARE

Basic Earnings Per Share (Basic EPS) is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted Earnings Per Share (Diluted EPS) reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock which shared in the Company's earnings.

The following is a reconciliation of the calculation of Basic EPS and Diluted EPS.

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	Net Income	Weighted- Average Shares Outstanding	Per Share Amount	Net Income	Weighted- Average Shares Outstanding	Per Share Amount
(in thousands, except per share data)						
2001						
Basic EPS	\$4,039	6,277	\$ 0.64	\$13,471	6,542	\$ 2.06
Effect of dilutive stock options		231	(0.02)		235	(0.07)
Diluted EPS	\$4,039	6,508	\$ 0.62	\$13,471	6,777	\$ 1.99
2000						
Basic EPS	\$4,623	6,976	\$ 0.66	\$13,460	7,126	\$ 1.89
Effect of dilutive stock options		134	(0.01)		124	(0.03)
Diluted EPS	\$4,623	7,110	\$ 0.65	\$13,460	7,250	\$ 1.86

Table of Contents**NOTE 3 COMPREHENSIVE INCOME**

Comprehensive income, which encompasses net income and the net change in unrealized gains (losses) on investment securities available for sale, is presented below:

	(in thousands)			
Net income	\$4,039	\$4,623	\$13,471	\$13,460
Other comprehensive (loss) income:				
Unrealized (loss) gain on investment securities available for sale, net of tax benefit of \$18 and net tax expense \$71 for the three months ended September 30, 2001 and 2000, and net of tax benefit of \$65 and tax expense of \$70 for the nine months ended September 30, 2001 and 2000, respectively	(27)	107	(97)	105
Less: reclassification adjustment for gains included in net income, net of tax benefit of \$579 in 2000				(833)
Comprehensive income	\$4,012	\$4,730	\$13,374	\$12,732

NOTE 4 IMPAIRED LOANS RECEIVABLE

As of September 30, 2001 and December 31, 2000, the recorded investment in impaired real estate loans and impaired real estate loans held in trust was \$26.3 million and \$18.9 million, respectively. The average recorded investment in impaired loans was \$28.3 million for the three months ended September 30, 2001 and \$9.5 million for the same period last year. The average recorded investment in impaired loans was \$26.3 million for the nine months ended September 30, 2001 and \$13.7 million for the same period last year. Interest income recognized on impaired loans totaled \$33,000 and \$45,000 for the three and nine months ended September 30, 2001 as compared to none and \$355,000 for the same periods last year.

NOTE 5 GUARANTEED PREFERRED BENEFICIAL INTERESTS IN COMPANY S JUNIOR SUBORDINATED DEFERRABLE INTEREST DEBENTURES

The Company has two wholly-owned trust subsidiaries, Trust I and Trust II, which issued \$14.0 million of 10.60% cumulative trust preferred securities and \$15.0 million of 10.20% cumulative trust preferred securities, respectively, (referred to collectively as the Trust Preferred securities.) ITLA Capital has fully and unconditionally guaranteed the Trust Preferred securities along with all obligations of each trust under their respective trust agreements. Each trust was formed for the exclusive purpose of issuing their respective Trust Preferred securities and common securities and using the proceeds to acquire ITLA Capital s junior subordinated deferrable interest debentures. Trust I acquired an aggregate principal amount of \$14.4 million of ITLA Capital s 10.60% junior subordinated deferrable interest debentures due September 7, 2030 and Trust II acquired an aggregate principal amount of \$15.5 million of ITLA Capital s 10.20% junior subordinated deferrable interest debentures due February 22, 2031. The sole assets of each trust are the debentures it holds. Each of the debentures is redeemable, in whole or in part, at ITLA Capital s option on or after ten years after issuance, at declining premiums to maturity. The Company used the proceeds from the debentures for general corporate purposes, including an aggregate of \$28.0 million in capital contributions to the Bank to support future growth.

Table of Contents

The costs associated with the Trust Preferred securities issuance have been capitalized and are being amortized using a method that approximates the interest method over a period of ten years. The distributions payable on the Trust Preferred securities are reflected as Minority interest in income of subsidiary in the Consolidated Statements of Income. The Trust preferred securities are reflected on the Consolidated Statement of Financial Condition as Guaranteed Preferred Beneficial Interests in the Company's Junior Subordinated Deferrable Interest Debentures.

NOTE 6 SUBSEQUENT EVENT

On November 2, 2001, we announced a definite agreement and plan of merger with The Asahi Bank, LTD.-Japan (ABLJ) and its subsidiary, Asahi Bank of California (ABC) to acquire ABC by merger for approximately \$6 million subject to certain closing adjustments. The completion of the merger is subject to approval by the Federal Deposit Insurance Corporation and the California Department of Financial Institutions. At September 30, 2001, Asahi Bank had total assets of approximately \$80.0 million, including \$40.0 million of commercial real estate and business loans and \$40.0 million of cash and securities. It is expected that the excess liquidity on the current balance will be returned to ABLJ in the form of distributions of excess capital which will result in approximately \$40.0 million of assets being acquired through merger into our Bank. This transaction is expected to close during the first quarter of 2002.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to identify the major factors that influenced the financial condition and results of operations for the three months and nine months ended September 30, 2001.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2001 Compared to Three Months Ended September 30, 2000

General

Consolidated net income totaled \$4.0 million for the three months ended September 30, 2001 compared to \$4.6 million for the same period last year. The decrease in net income was primarily due to increases in noninterest expense and the expense associated with our Trust Preferred securities partially offset by an increase in net interest income. Diluted EPS was \$0.62 for the three months ended September 30, 2001 compared to \$0.65 for the same period last year, a decrease of 4.6%.

The return on average assets was 1.18% for the three months ended September 30, 2001 compared to 1.44% for the same period last year. The return on average shareholders' equity was 11.86% for the three months ended September 30, 2001, compared to 14.03% for the same period last year.

Total loan production was \$138.2 million for the three months ended September 30, 2001, consisting of the origination and/or purchase of \$101.7 million of commercial real estate loans, \$12.7 million of residential real estate loans and \$23.8 million of franchise loans. Loan production during the same period last year totaled \$122.0 million, consisting of the origination and/or purchase of \$113.4 million of commercial real estate loans and \$8.6 million of residential real estate loans.

Table of Contents**Net Interest Income and Margin**

The following table presents, for the three months ended September 30, 2001 and 2000, our condensed average balance sheet information, together with interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities. Average balances are computed using daily average balances. Nonaccrual loans are included in loans receivable.

	<u> </u>	<u> </u>	<u> </u>
Total increase (decrease) in interest expense	702	(3,939)	(3,237)
	<u> </u>	<u> </u>	<u> </u>
Increase (decrease) in net interest income	\$ 1,619	\$(1,289)	\$ 330
	<u> </u>	<u> </u>	<u> </u>

Total interest income decreased \$2.9 million to \$29.6 million in the third quarter of 2001 compared to \$32.5 million for the same period last year. The net decrease in interest income was due primarily to lower yields on interest earning assets partially offset by a higher average outstanding balance of interest-earning assets.

The average balance of real estate loans was \$1.1 billion for the three months ended September 30, 2001 as compared to \$955.9 million for the same period last year. This increase was primarily due to increases in real estate loans secured by income producing properties and construction loans. Loans secured by income producing properties and construction loans had an average balance of \$981.9 million during the quarter ended September 30, 2001 compared to \$832.0 million during the same period last year. The average balance of purchased single family residential mortgages remained relatively unchanged at \$126.5 million during the quarter ended September 30, 2001, compared to \$123.9 million in the same period in the prior year. Purchased single family residential mortgages are not presently expected to materially increase as a percentage of our total assets. The average balance of real estate loans held in trust was \$183.0 million for the three months ended September 30, 2001 as compared to \$240.6 million for the same period last year. This decrease was due to loan prepayments and principal amortization.

The average yield earned on real estate loans decreased 170 basis points to 9.11% in the quarter ended September 30, 2001 as compared to 10.81% in the same period last year. The decrease in the yield on real estate loans was primarily due to the repricing of variable rate loans at lower interest rates resulting from the general decline in market interest rates. Our commercial real estate loan portfolio is primarily comprised of adjustable rate mortgages indexed to the six month LIBOR.

Table of Contents

Approximately 90.5% of our real estate loan portfolio (including real estate loans held in trust) are adjustable rate mortgages at September 30, 2001. These adjustable rate mortgages generally reprice on a quarterly basis and approximately \$1.1 billion or 94.9% of our real estate loan portfolio contain interest rate floors, below which the loans' contractual interest rate may not adjust. At September 30, 2001, the weighted average floor interest rate of these loans was 9.0%. At that date, approximately \$905.8 million or 81.4% of those loans were at the floor interest rate, approximately \$50.1 million or 4.5% were within 50 basis points of their floor interest rate, and approximately \$70.3 million or 6.3% were greater than 50 but less than 100 basis points from their floor interest rate. As market interest rates decline and the loans reprice, more of our portfolio will reach the floor interest rate and no longer reprice downward; however, these loans may be more susceptible to prepayment. We expect, due to the interest rate floors in our loan contracts, that the rate of decline in the yield on our adjustable rate loans due to falling interest rates may be less significant during the remainder of 2001, as compared to the nine months ended September 30, 2001.

Total interest expense decreased by \$3.3 million to \$15.2 million in the third quarter of 2001, compared to \$18.5 million for the same period last year. This decrease was primarily attributable to lower interest rates paid on all interest bearing liabilities and a lower average balance on our Collateralized Mortgage Obligations (CMO s) partially offset by higher average balances on deposit accounts and Federal Home Loan Bank (FHLB) advances.

Our cost of funds decreased to 5.11% during the three month period ended September 30, 2001, compared to 6.52% for the same period last year. This decrease in funding costs was due primarily to lower rates being paid on the CMO s and deposit accounts as compared to the same period last year due to the general decline in market interest rates. We expect the cost of funds of our deposit accounts to decline during the remainder of 2001, as our certificates of deposit issued at higher market interest rates mature and are replaced with certificates that bear interest at current market rates. Approximately \$364.6 million, or 39.1% of our deposit accounts consist of certificates of deposit that will mature within the next three months. The average rate paid on the CMO s was 4.36% during the three months ended September 30, 2001 compared to 7.89% for the same period last year. The average balance of deposit accounts increased \$6.2 million to \$918.6 million for the three months ended September 30, 2001, compared to \$912.4 million for the same period last year. The average balance of the CMO s was \$128.5 million during the third quarter of 2001, compared to \$186.4 million for the same period last year. FHLB advances averaged \$135.9 million in the current quarter, compared to \$27.0 million for the same period last year.

Net interest margin decreased to 4.22% for the three months ended September 30, 2001 as compared to 4.41% for the same period last year primarily due to the 150 basis point decrease in the yield on total average interest-earning assets partially offset by the 141 basis point decrease in cost of funds.

Provision for Loan Losses

Management periodically assesses the adequacy of the allowance for loan losses by reference to many factors which may be weighted differently at various times depending on prevailing conditions. These factors include, among other elements;

- general portfolio trends relative to asset and portfolio size;
- asset categories;
- credit and geographic concentrations;
- delinquency trends and nonaccrual loan levels;
- historical loss experience; and
- risks associated with changes in economic, social and business conditions.

Table of Contents

Accordingly, the calculation of the adequacy of the allowance for loan losses is not based solely on the level of nonperforming assets. Management believes that the allowance for loan losses as of September 30, 2001 was adequate to absorb the known and inherent risks of loss in the loan portfolio at that date. While management believes the estimates and assumptions used in its determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. In addition, the determination of the amount of the Bank's allowance for loan losses is subject to review by the Bank's regulators, as part of the routine examination process, which may result in the establishment of additional reserves based upon their judgment of information available to them at the time of their examination.

The consolidated provision for loan losses totaled \$1.5 million for both the third quarter of 2001 and 2000. The current period provision for loan losses was recorded to provide for reserves based on the aggregate amount of nonperforming loans and other loans of concern, which has declined in total since December 31, 2000, and also reflects the reallocation of \$2.7 million of allowance for loan losses from the Imperial Capital REIT to the Bank, as actual loan losses related to real estate loans held in trust have been negligible, and this loan portfolio has decreased due to principal payments. The allowance for loan losses was 1.88% of total real estate loans and real estate loans held in trust at September 30, 2001 as compared to 2.12% at December 31, 2000. During the quarter ended September 30, 2001, the Company had net loan charge-offs of \$4.0 million compared to \$213,000 for the same period last year. The current period charge-offs represent the adjustment to current market value of three loans originated by the Company's former mortgage banking subsidiary, ITLA Funding Corporation, in 1998, for the commercial mortgage backed securitization market. These loans were retained by the Bank when the secondary market for this product type collapsed due to the currency crisis experienced in October 1998. See also Financial Condition Credit Risk .

Noninterest Expense

Noninterest expense totaled \$5.7 million for the three months ended September 30, 2001, compared to \$5.0 million for the same period last year. Compensation and benefits expense totaled \$3.0 million during the three months ended September 30, 2001, compared to \$2.3 million for the same period last year. The increase in compensation and benefits expense was primarily due to additions made to retail and wholesale loan origination sales and support staff.

For the three months ended September 30, 2001, our ratio of consolidated general and administrative expense to average assets, on an annualized basis, increased to 1.67% compared to 1.57% for the same period last year. Our efficiency ratio, (excluding real estate owned expense), which is defined as general and administrative expenses as a percentage of net interest income and noninterest income was 38.69% for the quarter ended September 30, 2001, compared to 35.03% for the same period last year.

Minority Interest in Income of Subsidiary

Minority interest in income of subsidiary, consisting of accrued distributions payable on our Trust Preferred securities, was \$799,000 during the three month period ended September 30, 2001 as compared to \$99,000 for the same period last year, during which we first issued our Trust Preferred securities. See Note 5 to the unaudited Consolidated Financial Statements for further information.

Table of Contents

Nine Months Ended September 30, 2001 Compared to Nine Months Ended September 30, 2000

General

Consolidated net income remained relatively unchanged at \$13.5 million for the nine months ended September 30, 2001 compared to the same period last year. Although net income remained relatively unchanged in 2001 compared to 2000, the increases in net income due to higher net interest income, lower provisions for loan losses, and lower income tax expense were offset by decreases in income due to lower noninterest income and an increase in the expense associated with our Trust Preferred securities. Diluted EPS increased 7.0% to \$1.99 for the nine months ended September 30, 2001, compared to \$1.86 for the same period last year.

The return on average assets was 1.32% for the nine months ended September 30, 2001, compared to 1.48% for the same period last year. The return on average shareholders' equity was 13.20% for the nine months ended September 30, 2001, compared to 13.95% for the same period last year.

Total loan production was \$385.6 million for the nine months ended September 30, 2001, consisting of the origination and/or purchase of \$301.8 million of commercial real estate loans, \$30.5 million of residential real estate loans and \$53.3 million of franchise loans. Loan production during the same period last year totaled \$226.5 million, consisting of the origination and/or acquisition of \$165.2 million of commercial real estate loans and \$61.3 million of residential real estate loans. Additionally, during the same period last year, we acquired \$250.5 million of commercial real estate loans when we purchased the ICCMAC Multifamily and Commercial Trust 1999-1 (ICCMAC Trust).

Table of Contents**Net Interest Income and Margin**

The following table presents, for the nine months ended September 30, 2001 and 2000, our condensed average balance sheet information, together with interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities. Average balances are computed using daily average balances. Nonaccrual loans are included in loans receivable.

For the Nine Months Ended September 30,

Table of Contents

The following table sets forth a summary of the changes in interest income and interest expense resulting from changes in average interest-earning asset and interest-bearing liability balances and changes in average interest rates. The change in interest due to both volume and rate has been allocated to change due to volume and rate in proportion to the relationship of absolute dollar amounts of each.

	For the Nine Months Ended September 30, 2001 and 2000 Increase (Decrease) Due to:		
	Volume	Rate	Total
	(In thousands)		
Interest and fees earned from:			
Real estate loans	\$ 10,268	\$ (6,748)	\$ 3,520
Real estate loans held in trust	1,596	(1,078)	518
Cash and investments	(627)	(686)	(1,313)
	<u> </u>	<u> </u>	<u> </u>
Total increase (decrease) in interest income	\$ 11,237	(8,512)	\$ 2,725
	<u> </u>	<u> </u>	<u> </u>
Interest paid on:			
Deposit accounts	2,575	(1,156)	1,419
Collateralized mortgage obligations	333	(2,617)	(2,284)
FHLB advances	2,082	(168)	1,914
	<u> </u>	<u> </u>	<u> </u>
Total increase (decrease) in interest expense	4,990	(3,941)	1,049
	<u> </u>	<u> </u>	<u> </u>
Increase (decrease) in net interest income	\$ 6,247	\$ (4,571)	\$ 1,676
	<u> </u>	<u> </u>	<u> </u>

Total interest income increased \$2.7 million to \$93.3 million in the nine months ended September 30, 2001, compared to \$90.6 million for the same period last year due to increases in the average balance of real estate loans and real estate loans held in trust. These increases in interest income were primarily offset by decreases resulting from lower yields on interest earning assets and to a lesser extent, the decline in the average balance of cash and investment securities.

The average balance of real estate loans increased to \$1.1 billion during the nine months ended September 30, 2001 as compared to \$955.7 million for the same period last year. This increase was primarily due to growth in real estate loans secured by income producing properties, construction loans and purchased single family residential mortgages. Loans secured by income producing properties and construction loans had an average balance of \$967.1 million during the nine months ended September 30, 2001, compared to \$848.1 million during the same period last year. The average balance of purchased single family residential mortgages was \$132.3 million during the nine months ended September 30, 2001, compared to \$107.6 million during the same period in the prior year. Purchased single family residential mortgages are not presently expected to materially increase as a percentage of our current total assets.

The average balance of real estate loans held in trust was \$195.7 million for the nine months ended September 30, 2001 as compared to \$169.4 million for the same period last year. This increase was primarily due to the timing of the acquisition of the ICCMAC Trust which occurred during the last week of the prior year's first quarter.

The average yield earned on real estate loans decreased 94 basis points to 9.59% for the nine months ended September 30, 2001 as compared to 10.53% in the same period in the prior year. The decrease in the yield on real estate loans was primarily due to the repricing of variable rate loans at lower interest rates and the reduced yield earned on current period loan production, both resulting from the general decline in market interest rates. Our commercial real estate loan portfolio and current loan production is primarily comprised of adjustable rate mortgages indexed to the six month LIBOR.

Table of Contents

Total interest expense increased by \$1.0 million to \$50.8 million in the nine months ended September 30, 2001, compared to \$49.7 million for the same period last year. This increase was primarily attributable to increases in the average balance of interest bearing liabilities, which was partially offset by an overall decrease in interest rates.

The average balance of deposit accounts increased \$59.2 million to \$964.6 million for the nine months ended September 30, 2001 compared to \$905.4 million for the same period last year. The average rate paid on deposit accounts was 5.84% for the nine months ended September 30, 2001, compared to 6.01% for the same period last year. FHLB advances averaged \$87.1 million for the nine months ended September 30, 2001, compared to \$30.7 million for the same period last year. The average rate paid on FHLB advances was 4.94% for the nine months ended September 30, 2001, compared to 5.67% for the same period last year. The average balance of our CMO s was \$141.3 million during the nine months ended September 30, 2001, compared to \$132.5 million for the same period last year. The average rate paid on our CMO s was 5.11% during the nine months ended September 30, 2001 compared to 7.89% for the same period last year. Our cost of funds decreased to 5.69% for the nine month period ended September 30, 2001, compared to 6.23% for the same period last year. This decrease in funding costs was due to lower rates paid on CMO s, deposit accounts and FHLB advances, reflecting the general decline in market interest rates.

Net interest margin decreased to 4.17% for the nine months ended September 30, 2001 as compared to 4.51% for the same period last year primarily due to the 87 basis point decrease in the yield on total average interest earning assets, partially offset by a 54 basis point decrease in cost of funds.

Provision for Loan Losses

The provision for loan losses totaled \$2.5 million in the nine months ended September 30, 2001, compared to \$3.3 million for the same period in the prior year. The provision for loan losses was recorded to provide for reserves based on the aggregate amount of nonperforming loans and other loans of concern, which has declined by \$37.3 million since December 31, 2000.

Noninterest Income

Noninterest income totaled \$804,000 for the nine months ended September 30, 2001, compared to \$1.9 million for the same period last year. The previous year s noninterest income included a \$1.4 million gain on sale of investment securities available for sale.

Noninterest Expense

Noninterest expense remained relatively constant at \$16.9 million for the nine months ended September 30, 2001 and 2000, respectively. The previous year s noninterest expense included a \$1.4 million nonrecurring charge relating to the consolidation of the Bank s headquarters with ITLA Capital s headquarters in La Jolla, California. Compensation and benefits expense totaled \$8.9 million during the nine months ended September 30, 2001, compared to \$7.2 million for the same period last year. The increase in compensation and benefits expense was primarily due to additions made to the retail and wholesale loan originations sales and support staff. Full time equivalent associates averaged 131 during the nine month period ended September 30, 2001, compared to 115 for the same period last year.

Table of Contents

For the nine months ended September 30, 2001, our ratio of consolidated general and administrative expense to average assets, on an annualized basis, decreased to 1.61% compared to 1.69% for the same period last year. Our efficiency ratio (excluding real estate operations), which is defined as general and administrative expenses as a percentage of net interest income and noninterest income, was 38.25% for the nine months ended September 30, 2001 compared to 35.91% for the same period last year.

Minority Interest in Income of Subsidiary

Minority interest in income of subsidiary, which consists of accrued distributions payable on our Trust Preferred securities, was \$2.2 million during the nine month period ended September 30, 2001 as compared to \$99,000 for the same period last year, during which we first issued our trust preferred securities. See Note 5 to the unaudited Consolidated Financial Statements for further information.

FINANCIAL CONDITION

Total assets increased \$17.4 million to \$1.43 billion at September 30, 2001 as compared to \$1.42 billion at December 31, 2000. At September 30, 2001, real estate loans, net totaled \$1.1 billion, including approximately \$48.0 million of franchise loans. During the nine months ended September 30, 2001, the Bank's loan portfolio increased \$66.7 million and cash and cash equivalents increased by \$21.3 million. Other real estate owned increased \$4.5 million to \$6.8 million at September 30, 2001, compared to \$2.3 million at December 31, 2000 primarily due to the foreclosure of two commercial properties during the current quarter. These increases were partially offset by a \$42.8 million decrease in investment securities available for sale and a \$36.0 million decrease in real estate loans held in trust. Total deposit accounts, which are concentrated in time certificates, decreased to \$932.2 million at September 30, 2001 as compared to \$1.02 billion at December 31, 2000. We managed an overall decline in our deposit liabilities while retaining a majority of the deposit accounts which matured by replacing higher cost deposits with lower cost FHLB advances. Management believes that a significant portion of deposits will remain with us upon maturity based on our historical experience regarding retention of deposits. CMO's decreased \$38.4 million to \$123.4 million at September 30, 2001 compared to \$161.9 million at December 31, 2000. The decreases in deposit accounts and CMO's were offset by an increase in FHLB advances, which increased \$125.6 million to \$204.9 million at September 30, 2001, compared to \$79.3 million at December 31, 2000.

Table of Contents**CREDIT RISK****Nonperforming Assets, Other Loans of Concern and Allowance for Loan Losses**

The following table sets forth our nonperforming assets by category, accruing loans past due 90 days or more and troubled debt restructurings as of the dates indicated.

	<u>September 30, 2001</u>	<u>December 31, 2000</u>
	(dollars in thousands)	
Nonaccrual loans:		
Real estate (1)	\$ 13,424	\$ 9,430
Construction	11,490	8,712
	<u>24,914</u>	<u>18,142</u>
Other real estate owned, net	6,803	2,250
	<u>31,717</u>	<u>20,392</u>
Total nonperforming assets		
Accruing loans past due 90 days or more with respect to principal or interest		9,765
Performing troubled debt restructurings	3,700	3,002
	<u>\$ 35,417</u>	<u>\$ 33,159</u>
Nonaccrual loans to total real estate loans and real estate loans held in trust	1.91%	1.42%
Allowance for loan losses to nonaccrual loans	98.83%	149.85%
Nonperforming assets to total assets	2.21%	1.44%

(1) Includes one loan with a net book balance of \$220,000 at September 30, 2001 and one loan with a net book of \$1.4 million at December 31, 2000 that are nonperforming troubled debt restructurings.

At September 30, 2001, other real estate owned consisted of six income producing properties totaling \$6.4 million and nine single family residential properties totaling \$423,000.

As of September 30, 2001 and December 31, 2000, other loans of concern totaled \$26.9 million and \$70.9 million, respectively. Other loans of concern consist of loans with respect to which known information concerning possible credit problems with the borrowers or the cash flows of the properties securing the respective loans has caused management to be concerned about the ability of the borrowers to comply with present loan repayment terms, which may result in the future inclusion of such loans in the nonaccrual category. The decrease in other loans of concern for the nine months ended September 30, 2001 was primarily due to \$16.0 million of loans being paid-off, \$18.0 million of loans being upgraded due to improving conditions and \$14.3 million of loans migrating to nonaccrual status, partially offset by \$4.3 million of new other loans of concern.

Table of Contents

The following table provides certain information with respect to our allowance for loan losses, including charge-offs, recoveries and selected ratios for the periods indicated.

	For Nine Months Ended September 30, 2001	For the Year Ended December 31, 2000
	(dollars in thousands)	
Balance at beginning of period	\$27,186	\$19,895
Provision for loan losses	2,450	4,775
Addition due to purchase of the ICCMAC Trust		4,614
Charge-offs:		
Real estate loans	(2,827)	(1,489)
Construction loans	(2,235)	(1,000)
Total charge-offs	(5,062)	(2,489)
Recoveries:		
Real estate loans	49	391
Total recoveries	49	391
Net charge-offs	(5,013)	(2,098)
Balance at end of period	\$24,623	\$27,186
Allowance for loan losses as a percentage of real estate loans and loans held in trust, net	1.88%	2.12%

Liquidity

Liquidity refers to our ability to maintain cash flow adequate to fund operations and meet obligations and other commitments on a timely basis, including the payment of maturing deposits and the origination or purchase of new real estate loans. We maintain a cash and investment securities portfolio designed to satisfy operating liquidity requirements while preserving capital and maximizing yield. As of September 30, 2001, we held approximately \$92.3 million of cash and cash equivalents (consisting primarily of short-term investments with original maturities of 90 days or less) and \$3.5 million of investment securities classified as available for sale. Short-term fixed income investments classified as cash equivalents consisted of interest-bearing deposits at financial institutions, government money market funds and short-term government agency securities, while investment securities available for sale consisted primarily of fixed income instruments which were rated AAA or equivalent by nationally recognized rating agencies. As of September 30, 2001 and December 31, 2000, the Bank's liquidity ratios were 10.2% and 11.7%, respectively. In addition, our liquidity position is supported by a credit facility with the Federal Home Loan Bank of San Francisco. As of September 30, 2001, we had remaining available borrowing capacity under this credit facility of \$144.6 million, net of the \$7.6 million of additional Federal Home Loan Bank Stock that we would be required to purchase to support those additional borrowings, and \$30.0 million of unused federal funds credit facilities under established lines of credit with two banks.

Table of Contents

Capital Resources

As of September 30, 2001, the Bank's Leverage (Core), Tier I and Total Risk-Based capital ratios were 10.2%, 10.9% and 12.2%, respectively. These ratios were 9.1%, 10.4% and 11.6%, respectively, as of December 31, 2000. The increase in capital ratios from December 31, 2000 to September 30, 2001 was due primarily to the Bank's net income of \$10.2 million. The minimum regulatory requirement for Leverage (Core), Tier I and Total Risk-Based capital are 4.0%, 4.0% and 8.0%, respectively. As of September 30, 2001, the Bank's capital position was designated as "well capitalized" for regulatory purposes.

At September 30, 2001, shareholders' equity totaled \$134.9 million or 9.4 percent of total assets. The Company continued to repurchase shares of its common stock in the open market during the third quarter of 2001. During the third quarter of 2001, the Company repurchased 212,000 shares of common stock at an average price of \$18.67 per share. For the nine months ending September 30, 2001, the Company repurchased 724,000 shares of common stock at an average price of \$18.13 per share. Since beginning share repurchases in April of 1997, the Company has repurchased a total of 1,987,519 shares or approximately 24 percent of the outstanding shares of common stock, returning approximately \$31.9 million of capital to its shareholders at an average price of \$16.03 per share. Through our stock repurchase program, 100 percent of the Company's secondary public offering, which raised \$22.6 million in April of 1996 has been retired along with returning to our shareholders approximately \$9.3 million of proceeds from the Company's initial public offering completed in October 1995. The Company's book value per share of common stock was \$22.70 as of September 30, 2001, as compared to \$20.05 as of December 31, 2000, and \$19.25 as of September 30, 2000.

ITEM 3: MARKET RISK

Our estimated sensitivity to interest rate risk, as measured by the estimated interest earnings sensitivity profile and the interest sensitivity gap analysis, has not materially changed from the information disclosed in our annual report on Form 10-K for the year ended December 31, 2000.
