The Company financed \$49,000 in certain capital expenditures through short-term borrowings and the execution of capital leases during the first three months of 2007. There were no such expenditures during the first three months of 2008.

See Notes to Condensed Consolidated Financial Statements.

Table of Contents

**L. B. FOSTER COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

1. FINANCIAL STATEMENTS

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all estimates and adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. However, actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year ended December 31, 2008. Amounts included in the balance sheet as of December 31, 2007 were derived from our audited balance sheet. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2007.

2. NEW ACCOUNTING PRINCIPLES

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, Including an Amendment of SFAS No. 115, (SFAS 159). SFAS 159 permits entities to measure eligible financial assets, financial liabilities and firm commitments at fair value, on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting principles generally accepted in the United States. The fair value measurement election is irrevocable and subsequent changes in fair value must be recorded in earnings. The Company already records derivative contracts at fair value in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended (SFAS 133). The adoption of SFAS 159 on January 1, 2008 had no impact on the Company as management did not elect the fair value option for any other financial instruments or certain other assets and liabilities.

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations, (SFAS 141R) which replaces SFAS No. 141. SFAS 141R retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first fiscal year beginning after December 15, 2008. The Company will adopt the provisions of this standard beginning January 1, 2009.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of SFAS No. 133, (SFAS 161). SFAS 161 requires enhanced disclosures about an entity's derivative and hedging activities, including (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for under SFAS 133, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. This standard is effective for fiscal years beginning after December 15, 2008. As SFAS 161 only requires enhanced disclosures, this standard will have no impact on the Company's financial position or results of operations when it is adopted on January 1, 2009.

3. FAIR VALUE MEASUREMENTS

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accounting principles generally accepted in the United States, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, rather it applies under existing accounting pronouncements that require or permit fair value measurements. The Company adopted SFAS 157 on January 1, 2008. The adoption of this standard did not impact our financial position or result of operations, as the Company had previously determined the fair value of these instruments in a manner consistent with the requirements of SFAS 157.

SFAS 157 applies to all assets and liabilities that are being measured and reported on a fair value basis. This standard discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow) and the cost approach (cost to replace the service capacity of an asset or

replacement cost). SFAS 157 enables readers of financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair

Table of Contents

values. The standard requires that each asset and liability carried at fair value be classified into one of the following categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

Included within cash and cash equivalents are our investments in tax-free money market funds with municipal bond issuances as the underlying securities all of which maintain AAA credit ratings. At March 31, 2008, the fair value of these investments was approximately \$115,512,000. The Company determined the fair values of these investments based on quoted market prices. As prescribed by the SFAS 157 levels listed above, the Company recognized the fair value of its investments as a Level 1 valuation.

At March 31, 2008, the fair value of our derivative liabilities was approximately \$52,000 (see note 16). The Company determined the fair values of its derivative financial instrument positions, consisting of foreign currency exchange contracts, based on other observable inputs. As prescribed by the SFAS 157 levels listed above, the Company recognized the fair value of our derivative liabilities as a Level 2 valuation.

4. ACCOUNTS RECEIVABLE

Credit is extended based upon an evaluation of the customer's financial condition and, generally, collateral is not required. Credit terms are consistent with industry standards and practices. Trade accounts receivable at March 31, 2008 and December 31, 2007 have been reduced by an allowance for doubtful accounts of (\$1,199,000) and (\$1,504,000), respectively. Bad debt (recovery) expense was (\$5,000) and \$125,000 for the three-month periods ended March 31, 2008 and 2007, respectively.

5. INVENTORIES

Inventories of the Company at March 31, 2008 and December 31, 2007 are summarized in the following table:

<i>(in thousands)</i>	March 31, 2008	December 31, 2007
Finished goods	\$ 93,913	\$ 92,962
Work-in-process	4,057	5,121
Raw materials	15,525	16,786
 Total inventories at current costs	 113,495	 114,869
Less:		
LIFO reserve	(8,898)	(8,605)
Inventory valuation reserve	(3,892)	(3,817)
	 \$ 100,705	 \$ 102,447

Inventories of the Company are generally valued at the lower of last-in, first-out (LIFO) cost or market. Other inventories of the Company are valued at average cost or market, whichever is lower. An actual valuation of inventory under the LIFO method is made at the end of each year based on the inventory levels and costs at that time.

Accordingly, interim LIFO calculations are based on management's estimates of expected year-end levels and costs.

6. PROPERTY HELD FOR RESALE

In December 2007, the Company entered into a preliminary agreement to sell approximately 63 acres of real estate located in Houston, TX used primarily by the Company's Tubular Products segment and reclassified these assets as property held for resale under SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets. The sales price of the real estate was approximately \$6,500,000. This transaction closed on March 3, 2008 and the Company received net proceeds of approximately \$6,130,000 and recorded a gain of \$1,486,000.

Table of Contents**7. SALE-LEASEBACK**

On March 3, 2008 pursuant to the sale of property noted in footnote 6, the Company entered into a sale-leaseback transaction with the purchaser of the Houston, TX real estate for approximately 20 acres of the real estate and certain other assets for a ten year term at a monthly rental rate of \$1,000 per acre with annual 3% increases. The lease is a net lease with the Company being responsible for taxes, maintenance, insurance and utilities. The Company will use the leased property for its threaded product operations.

This lease is being accounted for as an operating lease with an interest rate of 5.25% for the transaction. The transaction qualifies as a sale-leaseback under applicable guidance, including SFAS No. 98, Accounting for Leases, and the Company recorded as a deferred gain the present value of the minimum lease payments of the operating lease, \$2,146,000. This deferred gain will be amortized over the life of the lease, 120 months.

8. RETIREMENT PLANS

The Company has four plans together covering all hourly and salaried employees, specifically two defined benefit plans (one active / one frozen) and two defined contribution plans. Employees are eligible to participate under these specific plans based on their employment classification. The Company's funding to the defined benefit and defined contribution plans is governed by the Employee Retirement Income Security Act of 1974 (ERISA), applicable plan policy and investment guidelines. The Company policy is to contribute at least the minimum funding required by ERISA.

Defined Benefit Plans

Net periodic pension costs for both the active plan and frozen plan for the three months ended March 31, 2008 and 2007 are as follows:

<i>(in thousands)</i>	Three Months Ended March 31,	
	2008	2007
Service cost	\$ 5	\$ 6
Interest cost	63	55
Expected return on plan assets	(72)	(65)
Prior service cost	2	2
Transition asset		(2)
Recognized net actuarial loss	13	13
Net periodic benefit cost	\$ 11	\$ 9

The Company expects to contribute \$311,200 to the defined benefit plans in 2008. Contributions through March 31, 2008 were \$120,600.

Defined Contribution Plans

The Company has a defined contribution plan that covers all non-union hourly and all salaried employees. This plan permits both pretax and after-tax employee contributions. Participants can now contribute, subject to statutory limitations, between 1% and 75% of eligible pre-tax pay and between 1% and 100% of eligible after-tax pay.

The Company matches 100% of the first 1% of deferred eligible compensation and up to 50% of the next 6%, based on years of service, of deferred eligible compensation, for a total maximum potential match of 4%. The Company may also make discretionary contributions to the Plan.

The expense associated with this plan for the three months ended March 31 was \$438,000 in 2008 and \$457,000 in 2007.

The Company also has a defined contribution plan for union hourly employees with contributions made by both the participants and the Company based on various formulas. The expense associated with this active plan for the three months ended March 31, 2008 and 2007 was \$8,000 and \$11,000, respectively.

Table of Contents**9. DISCONTINUED OPERATIONS**

In February 2006, the Company sold substantially all of the assets of its Geotechnical division for \$4,000,000 plus the net asset value of the fixed assets, inventory, work in progress and prepaid items, resulting in a gain of approximately \$3,005,000. The operations of the division qualified as a component of an entity under SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets and thus, were reclassified as discontinued for all periods presented. Future expenses related to this business are expected to be immaterial.

Net sales and income from discontinued operations were as follows:

(in thousands)	Three Months Ended March 31,	
	2008	2007
Net sales	\$	\$
Income from discontinued operations	\$	\$12
Income tax expense		4
Income from discontinued operations, net of tax	\$	\$ 8

10. BORROWINGS

On May 5, 2005, the Company entered into the Amended and Restated Revolving Credit and Security Agreement (Agreement) with a syndicate of three banks led by PNC Bank, N.A. The Agreement provided for a revolving credit facility of up to \$60,000,000 in borrowings to support the Company's working capital and other liquidity requirements. In September 2005, the Company's maximum credit line was increased to \$75,000,000 under a first amendment to the Agreement. The Company's maximum credit line was increased again to \$90,000,000 in July 2007 under a fourth amendment to the Agreement, which also extended the expiration of the Agreement to May 2011. The revolving credit facility is secured by substantially all of the trade receivables and inventory owned by the Company. Revolving credit facility availability under the Agreement is limited by the amount of eligible accounts receivable and inventory, applied against certain advance rates, and are limited to 85% of eligible receivables and 60% of eligible inventory. Additionally, the fourth amendment established a \$20,000,000 term loan that was immediately applied to pay down existing amounts outstanding on the revolving credit facility. The term loan is being amortized on a term of seven years with a balloon payment on the remaining outstanding principal due at the maturity of the Agreement, May 2011. If average availability should fall below \$10,000,000 over a 30-day period, the loans become immediately secured by a lien on the Company's equipment that is not encumbered by other liens.

Prior to February 2007, borrowings under the credit facility bore interest at either the base rate or the LIBOR rate plus or minus an applicable spread based on the fixed charge coverage ratio. The base rate was equal to the greater of (a) PNC Bank's base commercial lending rate or (b) the Federal Funds Rate plus .50%. The base rate spread ranged from negative 1.00% to a positive .50%, and the LIBOR spread ranged from 1.50% to 2.50%. In February 2007, the Company entered into a third amendment to the Agreement under which revolving credit facility borrowings placed in LIBOR contracts are priced at prevailing LIBOR rates, plus 1.25%. Borrowings placed in other tranches are priced at the prevailing prime rate, minus 1.00%. The term loan base rate spread is fixed at minus 0.75% and the LIBOR spread is fixed at plus 1.50%.

The third amendment also permits the Company to use various additional debt instruments to finance capital expenditures, outside of borrowings under the Agreement, limited to an additional \$10,000,000, and increases the Company's permitted annual capital expenditures to \$12,000,000. Under the amended Agreement, the Company maintains dominion over its cash at all times, as long as excess availability stays over \$5,000,000 and there is no uncured event of default.

The Agreement includes financial covenants requiring a minimum level for the fixed charge coverage ratio and a maximum level for the consolidated capital expenditures. The Agreement also includes a minimum net worth

covenant and restricts investments, indebtedness, and the sale of certain assets. As of March 31, 2008 the Company was in compliance with all the agreement's covenants.

At March 31, 2008 there were no outstanding borrowings under the revolving credit facility. Also at March 31, 2008, the Company had \$18,333,000 outstanding under the term loan and approximately \$73,357,000 in unused borrowing commitment.

Table of Contents**11. EARNINGS PER COMMON SHARE**

The following table sets forth the computation of basic and diluted earnings per common share:

(in thousands, except earnings per share)	Three Months Ended March 31,	
	2008	2007

Basic earnings per common share	\$ 0.57	\$ 0.29
Diluted earnings per common share:		
Continuing operations	\$ 0.57	\$ 0.28
Discontinued operations		
Diluted earnings per common share	\$ 0.57	\$ 0.28

12. STOCK-BASED COMPENSATION**Stock Option Awards**

The Company recorded stock compensation expense of \$29,000 and \$31,000 for the three month periods ending March 31, 2008 and 2007, respectively. The related deferred tax benefits were \$11,000 and \$12,000, respectively. At March 31, 2008, there was \$101,000 of compensation expense related to nonvested awards which is expected to be recognized over a weighted-average period of 0.9 years. At March 31, 2007, there was \$206,000 of compensation

expense related to nonvested awards which was expected to be recognized over a weighted-average period of 1.9 years.

There were no stock options granted during the first quarter of 2008 or 2007.

At March 31, 2008 and 2007, common stock options outstanding under the Plans had option prices ranging from \$2.75 to \$14.77, with a weighted average exercise price of \$5.85 and \$5.20 per share, respectively.

The weighted average remaining contractual life of the stock options outstanding at March 31, 2008 and 2007 are 5.3 years and 5.1 years.

Options exercised during the three month periods ended March 31, 2008 and 2007 totaled 99,380 and 29,750 shares, respectively. The weighted average exercise price per share of the options exercised during the three month periods

Table of Contents

ended March 31, 2008 and 2007 were \$4.67 and \$5.18, respectively. The total intrinsic value of options exercised during the three month periods ended March 31, 2008 and 2007 were \$3,898,000 and \$607,000, respectively. A summary of the option activity as of March 31, 2008 is presented below.

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2008	349,900	\$ 5.52	4.3	
Granted				
Canceled				
Exercised	(99,380)	4.67		
Outstanding at March 31, 2008	250,520	\$ 5.85	4.3	\$9,321,849
Exercisable at March 31, 2008	217,070	\$ 5.06	3.9	\$8,248,660

Shares issued as a result of stock option exercises generally are authorized but previously unissued common stock.

Restricted Stock Awards

For the three months ended March 31, 2008, the Company granted approximately 19,000 shares of restricted stock. There were no restricted stock awards granted for the three months ended March 31, 2007.

The 2005 - 2007 Three Year Incentive Plan

The Company granted, pursuant to the 2006 Omnibus Plan, as amended, approximately 11,000 fully-vested shares during the three months ended March 31, 2008 in lieu of cash. These shares are not voluntarily transferable until May 1, 2010. The weighted average fair value of these restricted stock awards was \$43.91 per share.

Performance Unit Awards

Under the 2008 - 2010 Three Year Incentive Plan pursuant to the 2006 Omnibus Plan, as amended, the Company granted approximately 23,000 performance units during the three months ended March 31, 2008. These awards can be earned based upon the Company's performance relative to performance measures as defined in the plan. These awards are subject to forfeiture, can not be transferred until March 6, 2012 and will be converted into common stock of the Company based on conversion multiples as defined in the underlying plan. The weighted average fair value of these restricted stock awards was \$43.91 per share.

Other Long-term Awards

The Company granted approximately 8,000 nonvested shares during the three months ended March 31, 2008. These shares are time-vested, forfeitable and can not be exercised until March 6, 2012. The weighted average fair value of these restricted stock awards was \$43.91 per share.

The Company recorded compensation expense of \$135,000 for the three month period ending March 31, 2008 relative to the awards granted pursuant to the Performance Unit Awards and the Other Long-term Awards. Shares issued as a result of restricted stock awards generally are authorized but previously unissued common stock.

13. COMMITMENTS AND CONTINGENT LIABILITIES

The Company is subject to laws and regulations relating to the protection of the environment, and the Company's efforts to comply with environmental regulations may have an adverse effect on its future earnings. In the opinion of management, compliance with the present environmental protection laws will not have a material adverse effect on the financial condition, results of operations, cash flows, competitive position, or capital expenditures of the Company. The Company is subject to legal proceedings and claims that arise in the ordinary course of its business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect the financial

condition

11

Table of Contents

or liquidity of the Company. The resolution, in any reporting period, of one or more of these matters could have a material effect on the Company's results of operations for that period.

In the second quarter of 2004, a gas company filed a complaint against the Company in Allegheny County, PA, alleging that in 1989 the Company had applied epoxy coating on 25,000 feet of pipe and that, as a result of inadequate surface preparation of the pipe, the coating had blistered and deteriorated. The Company does not believe that the gas company's alleged problems are the Company's responsibility. Although no assurances can be given, the Company believes that it has meritorious defenses to such claims and will vigorously defend against such a suit.

At March 31, 2008 the Company had outstanding letters of credit of approximately \$3,988,000.

14. BUSINESS SEGMENTS

The Company is organized and evaluated by product group, which is the basis for identifying reportable segments. The Company is engaged in the manufacture, fabrication and distribution of rail, construction and tubular products. The following table illustrates revenues and profits of the Company by segment:

(in thousands)	Three Months Ended,			
	March 31, 2008		March 31, 2007	
	Net Sales	Segment Profit	Net Sales	Segment Profit
Rail products	\$46,191	\$2,556	\$ 63,200	\$2,013
Construction products	39,986	2,908	41,365	2,491
Tubular products	7,264	1,021	6,101	994
Total	\$93,441	\$6,485	\$110,666	\$5,498

Segment profits, as shown above, include internal cost of capital charges for assets used in the segment at a rate of, generally, 1% per month. There has been no change in the measurement of segment profit from December 31, 2007. The following table provides a reconciliation of reportable segment net profit to the Company's consolidated total:

(in thousands)	Three Months Ended	
	March 31, 2008	March 31, 2007
Income for reportable segments	\$ 6,485	\$ 5,498
Cost of capital for reportable segments	4,474	4,872
Interest expense	(555)	(1,222)
Gain on sale of DM&E investment	2,022	
Gain on sale of property	1,486	
Interest income	815	2
Other (expense) income	(151)	256
Corporate expense and other unallocated charges	(4,704)	(4,581)
Income from continuing operations before income taxes	\$ 9,872	\$ 4,825

Table of Contents**15. COMPREHENSIVE INCOME**

Comprehensive income represents net income plus certain stockholders' equity changes not reflected in the Condensed Consolidated Statements of Operations. The components of comprehensive income, net of tax, were as follows:

(in thousands)	Three Months Ended March 31,	
	2008	2007
Net income	\$6,306	\$3,100
Unrealized derivative gains (losses) on cash flow hedges	76	(39)
Comprehensive income	\$6,382	\$3,061

16. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

The Company does not purchase or hold any derivative financial instruments for trading purposes. The Company uses derivative financial instruments to manage interest rate exposure on variable-rate debt, primarily by using interest rate collars and variable interest rate swaps. The Company's primary source of variable-rate debt comes from its revolving credit agreement.

At contract inception, the Company designates its derivative instruments as hedges. The Company recognizes all derivative instruments on the balance sheet at fair value. Fluctuations in the fair values of derivative instruments designated as cash flow hedges are recorded in accumulated other comprehensive income and reclassified into earnings as the underlying hedged items affect earnings. To the extent that a change in interest rate derivative does not perfectly offset the change in value of the interest rate being hedged, the ineffective portion is recognized in earnings immediately.

The Company is not subject to significant exposures to changes in foreign currency exchange rates. The Company will, however, manage its exposure to changes in foreign currency exchange rates on firm sale and purchase commitments by entering into foreign currency forward contracts. The Company's risk management objective is to reduce its exposure to the effects of changes in exchange rates on these transactions over the duration of the transactions.

During 2006, the Company entered into commitments to sell Canadian funds based on the anticipated receipt of Canadian funds from the sale of certain rail commencing in the second quarter of 2007 through the third quarter of 2008. The fair value of these instruments was a liability of \$52,000 and \$172,000 as of March 31, 2008 and December 31, 2007, respectively. The liability is recorded in Other Accrued Liabilities. During the first quarter of 2008, one of these Canadian dollar denominated commitments matured for a realized loss of approximately \$87,000.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

General

L. B. Foster Company is a leading manufacturer, fabricator and distributor of products for rail, construction, utility and energy markets. The Company is comprised of three business segments: Rail products, Construction products and Tubular products.

Recent Developments

In March 2008, we negotiated the renewal of the collective bargaining agreement with our Bedford, PA workforce represented by the Shopmen's Local Union number 527. This agreement, covering approximately 40 employees, expires in March 2011.

Critical Accounting Policies

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. When more than one accounting principle, or method of its application, is generally accepted, management selects the principle or method that is appropriate in the Company's specific circumstances. Application of these accounting principles requires management to make estimates about the future resolution of existing uncertainties. As a result, actual results could differ from these estimates. In preparing these financial statements, management has made its best estimates and judgments of the amounts and disclosures included in the financial statements giving due regard to materiality. There have been no material changes in the Company's policies or estimates since December 31, 2007. For more information regarding the Company's critical accounting policies, please see the Management's Discussion & Analysis of Financial Condition and Results of Operations in Form 10-K for the year ended December 31, 2007.

New Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accounting principles generally accepted in the United States, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, rather it applies under existing accounting pronouncements that require or permit fair value measurements. The Company adopted SFAS 157 on January 1, 2008. The adoption of this standard did not impact our financial position or result of operations, as the Company had previously determined the fair value of these instruments in a manner consistent with the requirements of SFAS 157.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, Including an Amendment of SFAS No. 115, (SFAS 159). SFAS 159 permits entities to measure eligible financial assets, financial liabilities and firm commitments at fair value, on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting principles generally accepted in the United States. The fair value measurement election is irrevocable and subsequent changes in fair value must be recorded in earnings. The Company already records derivative contracts at fair value in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended (SFAS 133). The adoption of SFAS 159 on January 1, 2008 had no impact on the Company as management did not elect the fair value option for any other financial instruments or certain other assets and liabilities.

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations, (SFAS 141R) which replaces SFAS No. 141. SFAS 141R retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first fiscal year beginning after December 15, 2008. The Company will adopt the provisions of this standard beginning January 1, 2009.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS No. 133, (SFAS 161). SFAS 161 requires enhanced disclosures about an entity's derivative and

hedging activities, including (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for under SFAS 133, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. This standard is effective for fiscal years

Table of Contents

beginning after December 15, 2008. As SFAS 161 only requires enhanced disclosures, this standard will have no impact on the Company's financial position or results of operations when it is adopted on January 1, 2009.

Total Gross Profit	16.7%	12.8%

First Quarter 2008 Results of Operations

Income from continuing operations and net income for the first quarter of 2008 was \$6.3 million (\$0.57 per diluted share) on net sales of \$93.4 million. This compares favorably to income from continuing operations and net income for the first quarter of 2007 which was \$3.1 million (\$0.28 per diluted share) on net sales of \$110.7 million.

Table of Contents

Income from continuing operations and net income for the first quarter of 2008 included a pre-tax gain of \$2.0 million related to the receipt of escrow proceeds from a favorable working capital adjustment pursuant to the sale of the our investment in the DM&E railroad. Also included in the first quarter of 2008 was a pre-tax gain of \$1.5 million on the sale and lease-back of our threaded products facility located in Houston, TX.

Sales decreased by \$17.2 million, or 15.6%, compared to the prior year first quarter. While the energy, rail and construction markets we serve should continue to be strong throughout 2008, our year-over-year comparative sales levels will continue to be challenged by a return to single-shift volume levels at our pipe coating facility in Birmingham, AL; reduced concrete tie production and sales at our Grand Island, NE and Tucson, AZ plants due to diminished demand by the UPRR; and reductions in sales across various divisions to the DM&E railroad.

Rail Products sales decreased 26.9% to \$46.2 million due mainly to decreases in rail distribution, transit products and track panels. While sales of scrap and reroll increased over the prior year period, these increases only partially offset a large decrease in our rail distribution project work. The reduced volume of rail project work was due to several prior year period projects not being replaced with new contracts during the first quarter of 2008 and our decision to limit our use of foreign suppliers. Our Transit Products division sales have decreased due to a critical supplier's production delays. Our track panel plant in Pueblo, CO has ended its operations due to the loss of its contract with its main customer. Reductions in the volume of orders for concrete ties had a negative impact at our Grand Island, NE and our Spokane, WA facilities. Offsetting these decreases are sales increases at our Allegheny Rail Products division (ARP) and our Tucson, AZ concrete tie plant. The increases at our ARP facility in Pueblo, CO are due to larger orders from Class 1 railroads while our Tucson, AZ facility increased production over the prior year period due to this facility not producing meaningful quantities until the third quarter of 2007.

Construction products sales decreased to \$40.0 million, a 3.3% reduction from the prior year period, primarily due to decreased piling sales. The decrease in piling sales was due to a decline in our pipe piling sales as compared to the prior year and, to a lesser extent, customer-related shipping delays. Partially offsetting this was an increase in sales from our Fabricated Products division. Our Tubular products sales increased 19.1% to \$7.3 million in comparison to the first quarter of 2007. During the first quarter of 2008 our coated pipe facility benefited from residual shipments relating to prior year production.

Our gross profit margin increased 3.9 percentage points to 16.7% compared to last year's first quarter. Rail products profit margin improved 4.7 percentage points to 15.4%. The poor productivity experienced in the 2007 first quarter at our Tucson, AZ concrete tie facility due to concrete mix design and operational issues has largely been corrected. Our ARP division also drove margin improvement due principally to plant process improvements and volume increases. Construction products gross profit margin increased to 19.1%, an increase of 2.7 percentage points from the prior year period due to improvement in all areas except for our Fabricated Products division. Our Concrete Buildings division showed improved manufacturing variances, while our Piling division benefitted from improved manufacturing variances and a material costs recovery related to a prior year sale that was previously returned by a customer. Despite the improvement in sales, our Tubular Products segment was negatively impacted due to higher material costs. Selling and administrative expenses increased 11.5% from the same prior year period due to increases in employee related costs and benefit expenses including salaries. Interest expense decreased 54.6% from the prior year period due principally to reduced borrowings resulting from improved cash flows from operations during 2007. We recognized pre-tax gains of \$2.0 million and \$1.5 million from the aforementioned receipt of DM&E escrow proceeds and the sale-leaseback of our Houston, TX threaded products facility, respectively. We generated interest income of \$0.8 million during the first quarter of 2008 from our investments in short-term, tax free mutual funds. Other income decreased \$0.4 million in the first quarter of 2008 compared to the prior year period due to the elimination of dividend income from the DM&E. Income taxes from continuing operations in the first quarter were recorded at approximately 36.1% which is consistent with the prior year period of 35.9%.

Table of Contents**Liquidity and Capital Resources**

The Company's capitalization is as follows:

	March 31, 2008	December 31, 2007
Debt:		
<i>In millions</i>		
Term Loan, due May 2011	\$ 18.3	\$ 19.0
Capital Leases and Interim Lease Financing	11.3	12.1
Other (primarily revenue bonds)	3.1	3.1
Total Debt	32.7	34.2
Equity	222.1	213.8
Total Capitalization	\$254.8	\$ 248.0

Working capital increased \$8.6 million to \$209.3 million at March 31, 2008 compared to \$200.6 million at December 31, 2007. A \$7.6 million decrease in trade accounts receivable was offset by a \$13.6 million overall decrease in trade accounts payable. The decrease in trade accounts receivable is attributable to the reduced sales activity during the first quarter of 2008 compared to the prior year quarter. Our Piling division was the primary driver of the change with a trade accounts receivable decrease of \$6.8 million and a corresponding trade accounts payable decrease of \$10.0 million.

The Company's liquidity needs arise from seasonal working capital requirements, capital expenditures, acquisitions and debt service obligations.

The following table summarizes the year-to-date impact of these items:

	March 31, 2008	2007
<i>(In millions)</i>		
Liquidity needs:		
Working capital and other assets and liabilities	(\$14.2)	(\$12.7)
Capital expenditures	(2.1)	(1.5)
Scheduled repayments of long-term debt	(0.7)	
Scheduled repayments of other long-term debt	(0.8)	(0.8)
Cash interest paid	(0.5)	(1.1)
Net liquidity requirements	(18.3)	(16.1)
Liquidity sources:		
Internally generated cash flows before interest paid	5.4	6.1
Proceeds from the sale of DM&E investment	2.0	
Proceeds from asset sales	6.5	
Credit facility activity		11.7
Equity transactions	0.5	0.4

Net liquidity sources	14.4	18.2
Net Change in Cash	(\$3.9)	\$ 2.1

Capital expenditures were \$2.1 million for the first three months of 2008 compared to \$1.5 million for the same 2007 period. Spending in the 2008 and 2007 periods were primarily for maintenance capital, productivity improvement spending at our manufacturing facilities and information technology enhancements. We anticipate total capital spending in 2008 will be less than \$8.0 million and funded by cash flow from operations.

We routinely review our portfolio of businesses and contemplate potential acquisitions and dispositions from time to time. We continue to assess a number of options for the use of the proceeds received from the sale of our investment in the DM&E including, but not limited to, debt reduction, strategic acquisitions, organic reinvestment in the existing business, share repurchases and other general corporate purposes. We currently have these funds invested in short-term, tax free mutual funds.

Table of Contents

We have a revolving credit agreement which expires in May 2011 and provides for up to \$90.0 million in borrowings to support our working capital and other liquidity requirements. Borrowings under this agreement are secured by substantially all the trade receivables and inventory owned by us, and are limited to 85% of eligible receivables and 60% of eligible inventory. Additionally, the revolving credit agreement provided for a \$20.0 million term loan that was immediately applied to pay down existing drawings on the revolving credit facility. If average availability should fall below \$10.0 million over a 30-day period, the loans become immediately secured by a lien on the Company's equipment that is not encumbered by other liens.

Prior to February 2007, borrowings under the credit facility bore interest at rates based upon either the base rate or LIBOR plus or minus applicable margins. The base rate was equal to the higher of (a) PNC Bank's base commercial lending rate or (b) the Federal Funds Rate plus .50%. The base rate spread ranged from a minus 1.00% to a plus 0.50%, and the LIBOR spread ranged from 1.50% to 2.50%. Effective in February 2007, under the third amendment to the credit facility, for borrowings under the revolving credit facility the base rate spread is fixed at minus 1.00% and the LIBOR spread is fixed at plus 1.25%. The term loan base rate spread is fixed at minus 0.75% and the LIBOR spread is fixed at plus 1.50%. Under the credit agreement, we maintain dominion over our cash at all times, as long as excess availability stays over \$5.0 million and there is no uncured event of default.

There were no revolving credit facility borrowings at March 31, 2008 and December 31, 2007. At March 31, 2008, remaining available borrowings under this facility were approximately \$73.4 million. The outstanding amount of the term loan at March 31, 2008 was approximately \$18.3 million of which approximately \$15.5 million was classified as noncurrent. Outstanding letters of credit at March 31, 2008 were approximately \$4.0 million. The letters of credit have expiration dates ranging from August 2008 to May 2010. Management believes its internal and external sources of funds are adequate to meet anticipated needs for the foreseeable future.

The credit agreement includes financial covenants requiring a minimum level for the fixed charge coverage ratio and a maximum level for consolidated capital expenditures. The credit agreement also includes a minimum net worth covenant and restricts certain investments, indebtedness, and the sale of certain assets. As of March 31, 2008 we were in compliance with all the credit agreement's covenants.

Off-Balance Sheet Arrangements

The Company's off-balance sheet arrangements include operating leases, purchase obligations and standby letters of credit. A schedule of the Company's required payments under financial instruments and other commitments as of December 31, 2007 is included in the Liquidity and Capital Resources section of the Company's 2007 Annual Report filed on Form 10-K. There have been no significant changes to the Company's contractual obligations relative to the information presented in the Form 10-K. These arrangements provide the Company with increased flexibility relative to the utilization and investment of cash resources.

Dakota, Minnesota & Eastern Railroad

During the fourth quarter of 2007, we sold our investment in the Dakota, Minnesota & Eastern Railroad (DM&E). At the time of the closing of this transaction, we fully reserved approximately \$2.1 million of the proceeds which were being held in escrow, until the completion of all post-closing transactions, to secure certain of the DM&E's obligations. This amount was fully reserved due to the uncertainty surrounding the amount of any future payout as well as the timing of such payout.

During the first quarter of 2008, upon completion of the buyer's working capital audit, the applicable proceeds were released from escrow. We recognized a pre-tax gain of approximately \$2.0 million related to the receipt of these proceeds.

For more information regarding the sale of our investment in the DM&E, please see our Management's Discussion & Analysis of Financial Condition and Results of Operations in Form 10-K for the year ended December 31, 2007.

Table of Contents**Outlook**

Our CXT Rail division is dependent on the Union Pacific Railroad (UPRR) for a significant portion of its business. Our agreement with the UPRR provides for the UPRR's purchase of concrete ties from our Grand Island, NE facility through 2010 and our Tucson, AZ facility through 2012. While the UPRR will continue to purchase concrete ties under this agreement, we believe total concrete ties purchased by the UPRR in 2008 will be approximately 40% fewer than 2007 purchase levels. While we believe that the UPRR purchasing level for concrete ties will improve beyond 2008, we have taken certain steps to mitigate this loss of business by reducing the workforce at both of our facilities and other efficiency efforts including extending the cure times of the concrete ties. In addition, both of these facilities are actively pursuing sales opportunities to other third parties.

Our ARP facilities in Niles, OH and Pueblo, CO have contract renewals currently pending with certain Class 1 railroads which account for a significant portion of this division's business. If we are unable to successfully renew these contracts, our results of operations and financial position could be negatively impacted.

Certain of our operating groups sold, from time to time, to the DM&E both railroad and construction related materials. As a result of the merger agreement, certain of this business may be provided to the DM&E directly from other suppliers through existing CP relationships. The total amount of revenues associated for the year ended December 31, 2007 was approximately \$18.7 million. While these revenues generated lower than typical gross profit margins, the Company may not be able to successfully mitigate the impact of this potential loss of business.

We have made a strategic decision to limit our use of foreign suppliers for our new rail distribution division as we believe that the long-term impact of this decision will deliver positive impacts to our results of operations and financial position. Additionally, there have been more significant increases in the prices of these products from our international suppliers. Due to this decision, the short-term impact will reduce the sales recorded by our rail distribution division and negatively impact our results of operations and financial position.

Our primary customer for track panels produced at our Pueblo, CO facility has not renewed its contract. The total amount of revenues associated with this contract for the year ended December 31, 2007 was approximately \$12.0 million. We do not believe that the loss of this contract will have a material, adverse impact on our results of operations or our financial position. We expect that substantially all remaining inventory and plant equipment from this location will be utilized by other operating groups within the Company.

Although backlog is not necessarily indicative of future operating results, total Company backlog from continuing operations at March 31, 2008, was approximately \$173.7 million. The following table provides the backlog from continuing operations by business segment:

(In thousands)	March 31, 2008	Backlog December 31, 2007	March 31, 2007
Rail Products	\$ 57,410	\$ 61,597	\$105,992
Construction Products	110,215	70,342	75,075
Tubular Products	6,035	6,375	14,715
Total from Continuing Operations	\$173,660	\$138,314	\$195,782

We continue to evaluate the overall performance of our operations. A decision to down-size or terminate an existing operation could have a material adverse effect on near-term earnings but would not be expected to have a material adverse effect on the financial condition of the Company.

Market Risk and Risk Management Policies

The Company does not purchase or hold any derivative financial instruments for trading purposes. The Company uses derivative financial instruments to manage interest rate exposure on variable-rate debt, primarily by using interest rate collars and variable interest rate swaps. The Company's primary source of variable-rate debt comes from its revolving credit agreement.

At contract inception, the Company designates its derivative instruments as hedges. The Company recognizes all derivative instruments on the balance sheet at fair value. Fluctuations in the fair values of derivative instruments designated as cash flow hedges are recorded in accumulated other comprehensive income and reclassified into earnings

Table of Contents

as the underlying hedged items affect earnings. To the extent that a change in interest rate derivative does not perfectly offset the change in value of the interest rate being hedged, the ineffective portion is recognized in earnings immediately.

The Company is not subject to significant exposures to changes in foreign currency exchange rates. The Company will, however, manage its exposure to changes in foreign currency exchange rates on firm sale and purchase commitments by entering into foreign currency forward contracts. The Company's risk management objective is to reduce its exposure to the effects of changes in exchange rates on these transactions over the duration of the transactions.

During 2006, the Company entered into commitments to sell Canadian funds based on the anticipated receipt of Canadian funds from the sale of certain rail commencing in the second quarter of 2007 through the third quarter of 2008. The fair value of these instruments was a liability of \$0.1 million and \$0.2 million as of March 31, 2008 and December 31, 2007, respectively. The liability is recorded in Other Accrued Liabilities. During the first quarter of 2008, one of these Canadian dollar denominated commitments matured for a realized loss of approximately \$0.1 million.

Forward-Looking Statements

Statements relating to the value of the Company's share of potential future contingent payments related to the DM&E merger agreement with the Canadian Pacific Railway Limited (CP) are forward-looking statements and are subject to numerous contingencies and risk factors. The CP has stated that it may take several years for it to determine whether to construct the PRB expansion.

Our businesses could be affected adversely by significant changes in the price of steel, concrete, and other raw materials or the availability of existing and new piling and rail products. Our operating results may also be affected negatively by adverse weather conditions.

A substantial portion of our operations are heavily dependent on governmental funding of infrastructure projects. Many of these projects have Buy America or Buy American provisions. Significant changes in the level of government funding of these projects could have a favorable or unfavorable impact on our operating results. Additionally, government actions concerning Buy America provisions, taxation, tariffs, the environment, or other matters could impact our operating results.

A significant portion of our Construction segment net sales and profits were related to the purchase and resale of products procured from Chaparral Steel Company, previously our primary supplier of steel sheet piling and bearing pile. In September 2007, Gerdau Ameristeel Corporation acquired Chaparral. If we are unable to continue to distribute the products of Gerdau Ameristeel Corporation, our results of operations and financial position could be adversely affected. The Company does not believe there will be an effect on our existing relationship.

The Company cautions readers that various factors could cause the actual results of the Company to differ materially from those indicated by forward-looking statements made from time to time in news releases, reports, proxy statements, registration statements and other written communications (including the preceding sections of this Management's Discussion and Analysis), as well as oral statements, such as references made to the future profitability, made from time to time by representatives of the Company. For a discussion of some of the specific risk factors, that may cause such differences, see the Company's Form 10-K for the year ended December 31, 2007.

Except for historical information, matters discussed in such oral and written communications are forward-looking statements that involve risks and uncertainties, including but not limited to general business conditions, the availability of material from major suppliers, labor disputes, the impact of competition, the seasonality of the Company's business, the adequacy of internal and external sources of funds to meet financing needs, the Company's ability to curb its working capital requirements, taxes, inflation and governmental regulations. Sentences containing words such as believes, intends, anticipates, expects, or will generally should be considered forward-looking statements.

Table of Contents

Item 3. **QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

See the Market Risk and Risk Management Policies section under Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. **CONTROLS AND PROCEDURES**

- a) L. B. Foster Company (the Company) carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) under the Securities and Exchange Act of 1934, as amended). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to timely alert them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.
- b) There have been no significant changes in the Company's internal controls over financial reporting that occurred in the period covered by this report that have materially affected or are likely to materially affect the Company's internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. **LEGAL PROCEEDINGS**

See Note 13, Commitments and Contingent Liabilities, to the Condensed Consolidated Financial Statements.

Item 1A. **RISK FACTORS**

There has not been any material change in the risk factors disclosure from that contained in the Company's 10-K for the year ended December 31, 2007.

Item 5. **OTHER INFORMATION**

None.
