.....

- [] Fee paid previously by written preliminary materials.
- [] Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2), and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration statement number, or the Form or Schedule and the date of its filing.

(1) Amount Previously Paid:

(2) Form, Schedule or Registration Statement No.:

(3) Filing Party:

(4) Date Filed:

Commencing April 20, 2012, Terex Corporation sent the following communication to certain stockholders

RE Terex Corporation (“Terex”) 2012 Proxy Statement

In an effort to assist your review of Terex’s 2012 Proxy Statement, Terex would like to call the following information to your attention.

Terex’s executive compensation program is based on the following core principles: (i) stockholder engagement; (ii) pay for performance; (iii) stockholder alignment; and (iv) balance between short term and long term compensation and competitive with peers.

Terex has embraced the spirit of stockholder engagement contained in Dodd-Frank by attempting to engage all of its stockholders on its executive compensation practices and not simply hold a “Say-on-Pay” vote. In 2011, Terex held a stockholder forum (live and via the Internet) on compensation matters prior to its annual meeting of stockholders giving all stockholders the ability to ask questions of the Compensation Committee’s chairperson and provide feedback on Terex’s executive compensation program. This year, in an effort to better understand the thoughts of Terex’s stockholders, the Compensation Committee Chairman and one of the Compensation Committee members met with seven of Terex’s largest stockholders (accounting for approximately 23% of Terex’s outstanding shares) in the first quarter of 2012 to discuss Terex’s executive compensation program. Terex will be hosting a stockholder forum on compensation again this year prior to its annual meeting in a further effort to engage with its stockholders on compensation matters.

The paragraph above and the bullet points below demonstrate the Compensation Committee’s commitment to the compensation program’s core principles. Key highlights include the following:

- Strong correlation between Terex’s after-tax return on invested capital and the compensation paid or provided to Mr. De Feo during the last five fiscal years. (see page 21 of Terex’s Proxy to see the strong correlation)

- Strong correlation between Terex’s total stockholder return and the total realized compensation of Mr. De Feo during the last five fiscal years. (see page 22 of Terex’s Proxy to see the strong correlation)

- While annual net sales in 2011 increased approximately \$2.1 billion versus 2010, or approximately 33% excluding acquisitions, and results from continuing operations improved by approximately \$250 million in 2011 versus 2010, as 2011 operating results were below Terex’s expectations, bonus payouts for 2011 were below the bonus target amount. Mr. De Feo and the Committee agreed that his target bonus opportunity for 2012 would be reduced from 200% of base salary to 125% of base salary.

- The long-term compensation awards granted in 2011 to the Named Executive Officers were granted exclusively in equity, with Messrs. De Feo’s and Widman’s award being approximately 85% performance-based.

- Approximately \$7.8 million in stock awards were forfeited in 2011 and 2012 by Mr. De Feo and approximately \$4.9 million in stock awards were forfeited in 2011 and 2012 by the other Named Executive Officers as a result of Terex’s failure to achieve performance targets set by the Compensation Committee.

In 2012, Terex’s stock has substantially recovered from its decline in 2011 and had a total stockholder return of 66.5% in the first quarter of 2012. This resulted in Terex having the highest total stockholder return of its peer group of 29 companies during this period. Please see Exhibit A attached to this memorandum.
