2. A BRIEF DESCRIPTION OF THE PROPERTIES OF CLAIMANT AND EACH OF ITS SUBSIDIARY PUBLIC UTILITY COMPANIES USED FOR THE GENERATION, TRANSMISSION, AND DISTRIBUTION OF ELECTRIC ENERGY FOR SALE, OR FOR THE PRODUCTION, TRANSMISSION, AND DISTRIBUTION OF NATURAL OR MANUFACTURED GAS, INDICATING THE LOCATION OF PRINCIPAL GENERATING PLANTS, TRANSMISSION LINES, PRODUCING FIELDS, GAS MANUFACTURING PLANTS, AND ELECTRIC AND GAS DISTRIBUTION FACILITIES, INCLUDING ALL SUCH PROPERTIES WHICH ARE OUTSIDE THE STATE IN WHICH CLAIMANT AND ITS SUBSIDIARIES ARE ORGANIZED AND ALL TRANSMISSION OR PIPELINES WHICH DELIVER OR RECEIVE ELECTRIC ENERGY OR GAS AT THE BORDERS OF SUCH STATE.

IDACORP, Inc. (Company) owns no property used in the generation, transmission, or distribution of electricity or for the production, transmission and distribution of natural or manufactured gas. IDACORP, Inc. has no public utility subsidiaries that own properties used in the production, transmission and distribution of natural or manufactured gas.

Idaho Power Company ("IPC") is an electric public utility engaged in the generation, purchase, transmission, distribution and sale of electric energy in an approximately 20,000-square-mile area in southern Idaho and eastern Oregon, with an estimated population of 883,000. IPC is the only public utility subsidiary of IDACORP, Inc. that owns properties used in the generation, transmission or distribution of electric energy. IPC holds franchises in approximately 71 cities in Idaho and nine cities in Oregon, and holds certificates from the respective public utility regulatory authorities to serve all or a portion of 25 counties in Idaho and three counties in Oregon. As of December 31, 2003, IPC supplied electric energy to approximately 427,000 general business customers and had 1,713 full-time employees.

IPC's system includes 15 hydroelectric generating plants located in southern Idaho and two located in eastern Oregon (see Company's Annual Report on Form 10-K file number 1-3198 for more information). IPC also owns one gas-fired plant located in Idaho and shares ownership in three coal-fired generating plants located in Wyoming, Oregon and Nevada.

IPC owns approximately 4,655 miles of high voltage transmission lines; 22 step-up transmission substations located at power plants; 18 transmission substations; 7 transmission switching stations; and 208 energized distribution substations. These facilities are located in Idaho, Oregon, Wyoming, Nevada and Montana.

IPC's generating facilities are interconnected through its integrated transmission system and are operated on a coordinated basis to achieve maximum load-carrying capability and reliability. Through its connections with the Bonneville Power Administration, and other utilities, IPC has access to all the major electric systems in the West.
