Form 10-Q/A
March 09, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q/A
(Amendment No. 1)

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-16463

PEABODY ENERGY CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

13-4004153

(State or other jurisdiction of incorporation or
organization)

(I.R.S. Employer Identification No.)

701 Market Street, St. Louis, Missouri

63101-1826

(Address of principal executive offices)

(Zip Code)

(314) 342-3400

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐

Smaller reporting company ☐

(Do not check if a smaller reporting
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

There were 18.5 million shares of the registrant's common stock (par value of \$0.01 per share) outstanding at October 30, 2015.

EXPLANATORY NOTE

Peabody Energy Corporation (“Peabody” or “the Company”) is filing this Amendment No. 1 on Form 10-Q/A (the “Amendment”) to amend its Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2015 (the “Original Form 10-Q”) originally filed on November 9, 2015. The Company is filing this Amendment to address comments received from the Staff (the “Staff”) of the Securities and Exchange Commission (the “SEC”) in connection with the Staff’s review of Peabody’s Registration Statement on Form S-3 filed upon the expiration of the Company’s existing Registration Statement on Form S-3, into which the Original Form 10-Q was incorporated by reference and which was the subject of the Staff’s comments.

In response to the Staff’s comments, the Company has amended its Original Form 10-Q to include additional information contained in Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations. Specifically, the Company has included in the section entitled “Liquidity and Capital Resources” additional detail regarding (i) certain financial covenants contained in the Company’s 2013 Credit Facility and its compliance with such covenants at September 30, 2015; (ii) sources of earnings and adjustments allowable under the Company’s 2013 Credit Facility to be included with its operating results for purposes of determining financial covenant compliance; and (iii) the impact of non-compliance with the Company’s financial covenants on its business, financial condition and results of operations that were previously disclosed in Part II, Item 1A. Risk Factors of the Original Form 10-Q. The Company has also updated Part II, Item 1A. Risk Factors in the Amendment to clarify the conditions under which non-compliance with its financial covenants is possible.

In addition, the Company is including in this Amendment updated certifications from its Chief Executive Officer and Chief Financial Officer as required by Sections 302 and 906 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1, and 31.2, and 32.1 and 32.2, respectively.

Except as described above, this Amendment does not otherwise revise, restate, modify or update any information included in the Original Form 10-Q. Additionally, this Amendment does not reflect events occurring after the period covered by the Original Form 10-Q. Accordingly, this Amendment should be read in conjunction with the Original Form 10-Q and with Peabody’s other filings with the SEC prior to the time of the filing of the Original Form 10-Q.

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) Basis of Presentation

The condensed consolidated financial statements include the accounts of Peabody Energy Corporation (the Company) and its affiliates. Interests in subsidiaries controlled by the Company are consolidated and any outside shareholder interests are reflected as noncontrolling interests, except when the Company has an undivided interest in an unincorporated joint venture. In those cases, the Company includes its proportionate share in the assets, liabilities, revenues and expenses of the jointly controlled entities within each applicable line item of the unaudited condensed consolidated financial statements. All intercompany transactions, profits and balances have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform with the 2015 presentation.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. In the opinion of management, these financial statements reflect all normal, recurring adjustments necessary for a fair presentation. Balance sheet information presented herein as of December 31, 2014 has been derived from the Company's audited consolidated balance sheet at that date. The Company's results of operations for the three and nine months ended September 30, 2015 are not necessarily indicative of the results that may be expected for future quarters or for the year ending December 31, 2015.

Pursuant to the authorization provided at a special meeting of the Company's stockholders held on September 16, 2015, the Company completed a 1-for-15 reverse stock split of the shares of the Company's common stock on September 30, 2015 (the Reverse Stock Split). As a result of the Reverse Stock Split, every 15 shares of issued and outstanding common stock were combined into one issued and outstanding share of Common Stock, without any change in the par value per share. No fractional shares were issued as a result of the Reverse Stock Split and any fractional shares that would otherwise have resulted from the Reverse Stock Split were paid in cash. The Reverse Stock Split reduced the number of shares of common stock outstanding from approximately 278 million shares to approximately 19 million shares. The number of authorized shares of common stock was also decreased from 800 million shares to 53.3 million shares. The Company's common stock began trading on a reverse stock split-adjusted basis on the New York Stock Exchange on October 1, 2015. All share and per share data included in this report has been retroactively restated to reflect the Reverse Stock Split. Since the par value of the common stock remained at \$0.01 per share, the value for "Common stock" recorded to the Company's condensed consolidated balance sheets has been retroactively reduced to reflect the par value of restated outstanding shares, with a corresponding increase to "Additional paid-in capital."

The Company has classified items within discontinued operations in the unaudited condensed consolidated financial statements for disposals (by sale or otherwise) that have occurred prior to January 1, 2015 when the operations and cash flows of a disposed component of the Company were eliminated from the ongoing operations of the Company as a result of the disposal and the Company no longer had any significant continuing involvement in the operation of that component.

(2) Newly Adopted Accounting Standards and Accounting Standards Not Yet Implemented

Newly Adopted Accounting Standards

Discontinued Operations. In April 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance that raised the threshold for disposals to qualify as discontinued operations to a disposal of a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. Such a strategic shift may include the disposal of (1) a major geographical area of operations, (2) a major line of business, (3) a major equity method investment or (4) other major parts of an entity. Provided that the major strategic shift criterion is met, the new guidance does allow entities to have significant continuing involvement and continuing cash flows with the discontinued operation, unlike prior U.S. GAAP. The new standard also requires additional disclosures for discontinued operations and new

disclosures for individually material disposal transactions that do not meet the definition of a discontinued operation. The new guidance became effective prospectively for disposals that occur in interim and annual periods beginning on or after December 31, 2014 (January 1, 2015 for the Company). The adoption of the guidance beginning January 1, 2015 had no material effect on the Company's results of operations, financial condition, cash flows or financial statement presentation at that time. The ultimate impact on the Company's financial statements will depend on any prospective disposal activity.

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Accounting Standards Not Yet Implemented

Revenue Recognition. In May 2014, the FASB issued a comprehensive revenue recognition standard that will supersede nearly all existing revenue recognition guidance under U.S. GAAP. The new standard provides a single principles-based, five-step model to be applied to all contracts with customers, which steps are to (1) identify the contract(s) with the customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract and (5) recognize revenue when each performance obligation is satisfied. More specifically, revenue will be recognized when promised goods or services are transferred to the customer in an amount that reflects the consideration expected in exchange for those goods or services. The standard also requires entities to disclose sufficient qualitative and quantitative information to enable financial statement users to understand the nature, amount, timing and uncertainty of revenues and cash flows arising from contracts with customers.

Under the originally issued standard, the new guidance will be effective for interim and annual periods beginning after December 15, 2016 (January 1, 2017 for the Company). On July 9, 2015, the FASB decided to delay the effective date of the new revenue recognition standard by one year with early adoption permitted, but not before the original effective date. The standard allows for either a full retrospective adoption or a modified retrospective adoption. The Company is in the process of evaluating the impact that the adoption of this guidance will have on its results of operations, financial condition, cash flows and financial statement presentation.

Going Concern. In August 2014, the FASB issued disclosure guidance that requires management to evaluate, at each annual and interim reporting period, whether substantial doubt exists about an entity's ability to continue as a going concern and, if applicable, to provide related disclosures. As outlined by that guidance, substantial doubt about an entity's ability to continue as a going concern exists when relevant conditions and events, considered in the aggregate, indicate that it is probable that an entity will be unable to meet its obligations as they become due within one year after the date that the financial statements are issued (or are available to be issued). The new guidance will be effective for annual reporting periods ending after December 15, 2016 (the year ending December 31, 2016 for the Company) and interim periods thereafter, with early adoption permitted.

Deferred Financing Costs. On April 7, 2015, the FASB issued accounting guidance that requires deferred financing costs to be presented as a direct reduction from the related debt liability in the financial statements rather than as a separately recognized asset, as is the current requirement under U.S. GAAP. Under the new guidance, amortization of such costs will continue to be reported as interest expense. In August 2015, an update was issued that clarified that debt issuance costs associated with line-of-credit arrangements may continue to be reported as an asset. The new guidance will be effective for interim and annual periods beginning after December 15, 2015 (January 1, 2016 for the Company) and must be adopted on a retrospective basis. While the Company does not anticipate an impact to its results of operations, financial condition or cash flows in connection with the adoption of the guidance, there will be an impact on the presentation of the Company's condensed consolidated balance sheets. More specifically, the Company's condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014 includes \$75.9 million and \$64.7 million, respectively, of deferred financing cost assets (excluding \$20.9 million and \$14.0 million, respectively, related to line-of-credit arrangements) that would, under the new guidance, be presented as a direct reduction to liabilities.

(3) Asset Impairment

The following costs are reflected in "Asset impairment" in the unaudited condensed consolidated statement of operations for the nine months ended September 30, 2015:

Australian Metallurgical	Australian Thermal	Corporate and Other	Consolidated
-----------------------------	-----------------------	------------------------	--------------

Mining Mining
(Dollars in millions)

Asset impairment charges:				
Long-lived assets	\$527.0	\$8.2	\$182.2	\$717.4
Equity method investments	—	—	183.4	183.4
Total	\$527.0	\$8.2	\$365.6	\$900.8

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Australian Metallurgical and Thermal Mining

The Company generally does not view short-term declines in metallurgical and thermal coal prices in the markets in which it sells its products as an indicator of impairment. However, due to the severity of the decline in seaborne metallurgical and thermal coal pricing observed during the first half of 2015 and other adverse market conditions noted during that period that drove an unfavorable change in the expected timing of eventual seaborne market rebalancing, the Company concluded that indicators of impairment existed surrounding its Australian mining platform as of June 30, 2015. Accordingly, the Company reviewed its Australian mining assets for recoverability at that date. Based on that review, the Company determined that the carrying values of three of its active mines that produce metallurgical coal were not recoverable and correspondingly recognized an aggregate impairment charge of \$230.5 million to write those assets down from their carrying value to their estimated fair value in the second quarter. Also during the second quarter of 2015, the Company reviewed its portfolio of mining tenements and surface lands to identify non-strategic assets that could be monetized. In connection with that review, certain of such assets were deemed to meet held-for-sale accounting criteria or were otherwise deemed more likely to generate cash flows through divestiture rather than development, with the long-term plans for certain adjacent assets also consequently affected. Accordingly, the Company recognized an aggregate impairment charge of \$304.7 million to write down the targeted divestiture assets and abandoned assets from their carrying value to their estimated fair value.

Corporate and Other

Long-lived Assets. In connection with a similar review of the Company's asset portfolio conducted during the second quarter of 2015 to identify non-strategic domestic assets that could be monetized, the Company identified non-strategic, non-coal-supplying assets as held-for-sale rather than held-for-use as of June 30, 2015. Accordingly, the Company recognized an impairment charge of \$182.2 million to write the assets down from their carrying value to estimated fair value.

Equity Method Investments. Due to the impairment indicators noted above surrounding the Company's Australian platform, the Company similarly reviewed its total investment in Middlemount Coal Pty Ltd. (Middlemount), which owns the Middlemount Mine in Queensland, Australia, as of June 30, 2015. As a result of that review, the Company determined that the carrying value of its equity investment in Middlemount was other-than-temporarily impaired and recorded a charge of \$46.6 million to write-off the investment.

The Company, along with the other equity interest holder, also periodically makes loans to Middlemount pursuant to the related shareholders' agreement for purposes of funding capital expenditures and working capital requirements. Prior to an impairment adjustment, the aggregate carrying value of such loans totaled \$299.3 million. Of that amount, a total of \$65.5 million (the Priority Loans) had seniority over the remainder (the Subordinated Loans) as of June 30, 2015. The Subordinated Loans are provided on an equal and shared basis with the other equity interest holder, and the Company's and the other equity interest holder's claims under the Subordinated Loans are on equal footing. The Company also reviewed the loans for impairment and recorded a charge of \$136.8 million to write down the carrying value of the Subordinated Loans.

The fair value estimates made during the Company's impairment assessments were determined in accordance with the methods outlined in Note 1. "Summary of Significant Accounting Policies" to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, except in certain instances where indicative bids were received related to non-strategic assets being marketed for divestiture. In those instances, the indicative bids were also considered in estimating fair value.

The Company believes the impairment charges recorded during the nine months ended September 30, 2015 adequately address the realization risks disclosed in Note 3. "Asset Realization" to its Quarterly Report on Form 10-Q for the period ended March 31, 2015.

(4) Discontinued Operations

Discontinued operations include certain former Australian Thermal Mining and Midwestern U.S. Mining segment assets that have ceased production and other previously divested legacy operations.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Summarized Results of Discontinued Operations

Results from discontinued operations were as follows during the three and nine months ended September 30, 2015 and 2014:

	Three Months Ended September 30, 2015 2014		Nine Months Ended September 30, 2015 2014	
	(Dollars in millions)			
(Loss) income from discontinued operations before income taxes	\$(157.5)	\$7.6	\$(202.7)	\$8.6
Income tax provision	—	2.6	—	2.6
(Loss) income from discontinued operations, net of income taxes	\$(157.5)	\$5.0	\$(202.7)	\$6.0

Assets and Liabilities of Discontinued Operations

The carrying amounts of assets and liabilities classified as discontinued operations included in the Company's condensed consolidated balance sheets were as follows:

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
Assets:		
Other current assets	\$0.3	\$0.3
Investments and other assets	15.9	16.3
Total assets classified as discontinued operations	\$16.2	\$16.6
Liabilities:		
Accounts payable and accrued expenses	\$78.2	\$12.5
Other noncurrent liabilities	218.0	109.8
Total liabilities classified as discontinued operations	\$296.2	\$122.3

Patriot-Related Matters. Refer to Note 19. "Matters Related to the Patriot Bankruptcy" for information surrounding charges recorded during the three and nine months ended September 30, 2015 associated with the bankruptcy of Patriot Coal Corporation and certain of its wholly-owned subsidiaries (Patriot).

Wilkie Creek Mine. In December 2013, the Company ceased production and started reclamation of the Wilkie Creek Mine in Queensland, Australia. On June 30, 2014, Queensland Bulk Handling Pty Ltd (QBH) commenced litigation against Peabody (Wilkie Creek) Pty Limited, the indirect wholly-owned subsidiary of the Company that owns the Wilkie Creek Mine, alleging breach of a Coal Port Services Agreement (CPSA) between the parties. Included in "(Loss) income from discontinued operations, net of income taxes" for the nine months ended September 30, 2015 is a \$7.6 million charge related to that litigation. Refer to Note 18. "Commitments and Contingencies" for additional information surrounding the QBH matter.

In June 2015, the Company entered into an agreement to sell the Wilkie Creek Mine in exchange for potential cash proceeds of up to \$20 million and the assumption of certain liabilities, including asset retirement obligations. That agreement was subsequently terminated in October 2015 in conjunction with entering into a new agreement with similar terms. The closing of the sale remains subject to certain conditions.

(5) Investments

Investments in available-for-sale securities at September 30, 2015 were as follows:

Available-for-sale securities	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(Dollars in millions)				
Noncurrent:				
Federal government securities	\$31.3	\$0.2	\$—	\$31.5
U.S. corporate bonds	19.4	0.1	(0.1)	19.4
Total	\$50.7	\$0.3	\$(0.1)	\$50.9

Investments in available-for-sale securities at December 31, 2014 were as follows:

Available-for-sale securities	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(Dollars in millions)				
Current:				
U.S. corporate bonds	\$11.2	\$—	\$—	\$11.2
Noncurrent:				
Marketable equity securities	6.2	—	—	6.2
Federal government securities	32.0	—	—	32.0
U.S. corporate bonds	12.4	—	—	12.4
Total	\$61.8	\$—	\$—	\$61.8

The Company classifies its investments as short-term if, at the time of purchase, remaining maturities are greater than three months and up to one year. Such investments are included in "Other current assets" in the condensed consolidated balance sheets. Investments with remaining maturities of greater than one year are classified as long-term and are included in "Investments and other assets" in the condensed consolidated balance sheets. The Company's previous investments in marketable equity securities consisted of an investment in Winsway Enterprises Holdings Limited. That investment was disposed of during the nine months ended September 30, 2015, resulting in an immaterial gain compared to the adjusted cost basis of the securities.

Contractual maturities for available-for-sale investments in debt securities at September 30, 2015 were as shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Contractual maturities for available-for-sale debt securities	Cost	Fair Value
(Dollars in millions)		
Due in one to five years	\$50.7	\$50.9

(6) Inventories

Inventories as of September 30, 2015 and December 31, 2014 consisted of the following:

	September 30, 2015	December 31, 2014
(Dollars in millions)		
Materials and supplies	\$121.2	\$143.6
Raw coal	68.3	115.0
Saleable coal	158.6	147.9
Total	\$348.1	\$406.5

Materials and supplies inventories presented above have been shown net of reserves of \$4.8 million and \$4.6 million as of September 30, 2015 and December 31, 2014, respectively.

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

(7) Derivatives and Fair Value Measurements

Risk Management — Non-Coal Trading Activities

The Company is exposed to several risks in the normal course of business, including (1) foreign currency exchange rate risk for non-U.S. dollar expenditures and balances, (2) price risk on commodities produced by and utilized in the Company's mining operations and (3) interest rate risk that has been partially mitigated by fixed rates on long-term debt. The Company manages a portion of its commodity price risk related to the sale of coal (excluding coal trading activities) using long-term coal supply agreements (those with terms longer than one year), rather than using derivative instruments. Derivative financial instruments are, or have been, used to manage the Company's risk exposure to prices of certain commodities used in production, foreign currency exchange rates and, from time to time, interest rates (collectively referred to as "Corporate Hedging"). These risks are actively monitored for compliance with the Company's risk management policies.

Foreign Currency Hedges. The Company is exposed to foreign currency exchange rate risk, primarily on Australian dollar expenditures made in its Australian mining platform. This risk has historically been managed using forward contracts and options designated as cash flow hedges, with the objective of reducing the variability of cash flows associated with forecasted foreign currency expenditures. The Company intends to allow a substantial portion of its positions to settle without adding further positions of a comparable notional amount, but may, from time to time, continue to use forward contracts and options to hedge its foreign currency exchange rate risk.

Diesel Fuel Hedges. The Company is exposed to commodity price risk associated with diesel fuel utilized in production in the U.S. and Australia. This risk is managed using derivatives, such as swaps or options, and to a lesser extent using cost pass-through contracts. The Company generally designates the swap contracts as cash flow hedges, with the objective of reducing the variability of cash flows associated with forecasted diesel fuel purchases.

Notional Amounts and Fair Value. The following summarizes the Company's foreign currency and commodity positions at September 30, 2015:

	Notional Amount by Year of Maturity			
	Total	2015	2016	2017
Foreign Currency				
A\$:US\$ hedge contracts (A\$ millions)	\$1,839.0	\$309.0	\$1,007.0	\$523.0
Commodity Contracts				
Diesel fuel hedge contracts (million gallons)	180.3	31.5	89.5	59.3
	Instrument Classification by			
	Cash Flow Hedge	Fair Value Hedge	Economic Hedge	Fair Value of Net Liability (Dollars in millions)
Foreign Currency				
A\$:US\$ hedge contracts (A\$ millions)	\$1,839.0	\$—	\$—	\$(293.5)
Commodity Contracts				
Diesel fuel hedge contracts (million gallons)	180.3	—	—	(106.7)

Based on the net fair value of the Company's non-coal trading commodity contract hedge positions held in "Accumulated other comprehensive loss" at September 30, 2015, the Company expects to reclassify net unrealized losses associated with the Company's diesel fuel hedge programs of approximately \$68 million from comprehensive income into earnings over the next 12 months. Based on the net fair value of the Company's foreign currency hedge contract portfolio, the net loss expected to be reclassified from comprehensive income to earnings over the next 12 months associated with that hedge program is approximately \$204 million. As these realized and unrealized gains and

losses are associated with derivative instruments that represent hedges of forecasted transactions, the amounts reclassified to earnings are expected to partially offset the effect of any changes in the hedged exposure related to the underlying transactions, when realized.

Hedge Ineffectiveness. A measure of ineffectiveness is inherent in hedging future diesel fuel purchases with derivative positions based on refined petroleum products as a result of location and/or product differences.

Transportation surcharges, which may vary over time, for purchased diesel fuel in certain regions can also result in ineffectiveness, though such surcharges have historically changed infrequently and comprise a small portion of the total cost of delivered diesel.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Company's derivative positions for the hedging of forecasted foreign currency expenditures contain a small measure of ineffectiveness due to timing differences between the hedge settlement and the purchase transaction, which could differ by less than a day and up to a maximum of 30 days.

The tables below show the classification and amounts of pre-tax gains and losses related to the Company's Corporate Hedging derivatives during the three and nine months ended September 30, 2015 and 2014:

Financial Instrument	Income Statement Classification	Three Months Ended September 30, 2015

Cash Flow Presentation. The Company classifies the cash effects of its Corporate Hedging derivatives within the "Cash Flows From Operating Activities" section of the unaudited condensed consolidated statements of cash flows.

Offsetting and Balance Sheet Presentation

The Company's Corporate Hedging derivative financial instruments are transacted in over-the-counter (OTC) markets with financial institutions under International Swaps and Derivatives Association (ISDA) Master Agreements. Those agreements contain symmetrical default provisions which allow for the net settlement of amounts owed by either counterparty in the event of default or contract termination. The Company offsets its Corporate Hedging asset and liability derivative positions on a counterparty-by-counterparty basis in the condensed consolidated balance sheets, with the fair values of those respective derivatives reflected in "Other current assets," "Investments and other assets," "Accounts payable and accrued expenses" and "Other noncurrent liabilities." Though the symmetrical default provisions associated with the Company's Corporate Hedging derivatives exist at the overall counterparty level across its foreign currency and diesel fuel hedging strategy derivative contract portfolios, the Company's accounting policy is to apply counterparty offsetting separately within those derivative contract portfolios for presentation in the condensed consolidated balance sheets because that application is more consistent with the fact that the Company generally net settles its Corporate Hedging derivatives with each counterparty by derivative contract portfolio on a routine basis. The classification and amount of Corporate Hedging derivative financial instruments presented on a gross and net basis as of September 30, 2015 and December 31, 2014 are presented in the tables that follow.

Financial Instrument	Fair Value of Liabilities Presented in the Condensed Consolidated Balance Sheet as of September 30, 2015 ⁽¹⁾
----------------------	---

	(Dollars in millions)
Current Liabilities:	
Commodity swap contracts	\$68.4
Foreign currency forward contracts	203.7
Total	\$272.1
Noncurrent Liabilities:	
Commodity swap contracts	\$38.3
Foreign currency forward contracts	89.8
Total	\$128.1

Financial Instrument	Fair Value of Liabilities Presented in the Condensed Consolidated Balance Sheet as of December 31, 2014 ⁽¹⁾ (Dollars in millions)
Current Liabilities:	
Commodity swap contracts	\$100.1
Foreign currency forward contracts	241.0
Total	\$341.1
Noncurrent Liabilities:	
Commodity swap contracts	\$67.0
Foreign currency forward contracts	169.0
Total	\$236.0

(1) All commodity swap contracts and foreign currency forward contracts were in a liability position as of September 30, 2015 and December 31, 2014.

The Company's Corporate Hedging derivative financial instruments are generally considered Swap Obligations, as that term is defined in the Company's secured credit agreement dated September 24, 2013 (as amended, the 2013 Credit Facility). Accordingly, such instruments, when in a liability position, are first lien obligations secured by the collateral and all of the property that is subject to liens under the 2013 Credit Facility. Refer to Note 12. "Long-term Debt" for additional information surrounding that collateral.

See Note 8. "Coal Trading" for information on balance sheet offsetting related to the Company's coal trading activities. Fair Value Measurements

The Company uses a three-level fair value hierarchy that categorizes assets and liabilities measured at fair value based on the observability of the inputs utilized in the valuation. These levels include: Level 1 - inputs are quoted prices in active markets for the identical assets or liabilities; Level 2 - inputs are other than quoted prices included in Level 1 that are directly or indirectly observable through market-corroborated inputs; and Level 3 - inputs are unobservable, or observable but cannot be market-corroborated, requiring the Company to make assumptions about pricing by market participants.

Financial Instruments Measured on a Recurring Basis. The following tables set forth the hierarchy of the Company's net financial asset (liability) positions for which fair value is measured on a recurring basis:

	September 30, 2015			Total
	Level 1	Level 2	Level 3	
	(Dollars in millions)			
Investments in debt and equity securities	\$20.2	\$30.7	\$—	\$50.9

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

For Level 1 and 2 financial assets and liabilities, the Company utilizes both direct and indirect observable price quotes, including interest rate yield curves, exchange indices, broker/dealer quotes, published indices, issuer spreads, benchmark securities and other market quotes. In the case of certain debt securities, fair value is provided by a third-party pricing service. Below is a summary of the Company's valuation techniques for Level 1 and 2 financial assets and liabilities:

Investments in debt and equity securities: U.S. government securities and marketable equity securities are valued based on quoted prices in active markets (Level 1) and investment-grade corporate bonds and U.S. government agency securities are valued based on the various inputs listed above that may preclude the security from being measured using an identical asset in an active market (Level 2).

Commodity swap contracts — diesel fuel and explosives: valued based on a valuation that is corroborated by the use of market-based pricing (Level 2) except when credit and non-performance risk is considered to be a significant input, then the Company classifies such contracts as Level 3.

Foreign currency forward and option contracts: valued utilizing inputs obtained in quoted public markets (Level 2) except when credit and non-performance risk is considered to be a significant input, then the Company classifies such contracts as Level 3.

Foreign currency and commodity purchase/sale contracts include a credit valuation adjustment based on credit and non-performance risk (Level 3). The credit valuation adjustment has not historically had a material impact on the valuation of the contracts resulting in Level 2 classification. However, due to the Company's corporate credit rating downgrades in 2015, the credit valuation adjustments as of September 30, 2015 are considered to be significant unobservable inputs in the valuation of the contracts resulting in Level 3 classification.

The following table summarizes the quantitative unobservable input utilized in the Company's internally-developed valuation models for foreign currency and commodity purchase/sale contracts classified as Level 3 as of September 30, 2015:

Input	Range Low	High	Weighted Average
Credit and non-performance risk	26	% 39	% 31

Significant increases or decreases in the credit and non-performance risk adjustment could result in a significantly higher or lower fair value measurement.

The following table summarizes the changes related to the Company's Corporate Hedging derivative financial instruments recurring Level 3 financial liabilities:

	Three Months Ended September 30, 2015			Nine Months Ended September 30, 2015		
	Commodity Contracts	Foreign Currency Contracts	Total	Commodity Contracts	Foreign Currency Contracts	Total
	(Dollars in millions)					
Beginning of period	\$—	\$—	\$—	\$—	\$—	\$—
Transfers into Level 3	76.0	259.8	335.8	76.0	259.8	335.8
Total net losses realized/unrealized:						
Included in earnings	(0.5)	—	(0.5)	(0.5)	—	(0.5)
Included in other comprehensive income	63.1	118.2	181.3	63.1	118.2	181.3
Settlements	(31.9)	(84.5)	(116.4)	(31.9)	(84.5)	(116.4)
End of period	\$106.7	\$293.5	\$400.2	\$106.7	\$293.5	\$400.2

The Company had no transfers between Levels 1 and 2 or transfers out of Level 3 during the three and nine months ended September 30, 2015 or 2014 or transfers into Level 3 for the three and nine months ended September 30, 2014. Transfers into Level 3 of liabilities previously classified in Level 2 during the three and nine months ended September 30, 2015 were due to the relative value of unobservable inputs to the total fair value measurement of certain derivative contracts rising above the 10% threshold. The Company's policy is to value all transfers between levels using the beginning of period valuation.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The following table summarizes the changes in net unrealized losses relating to Level 3 financial liabilities held both as of the beginning and the end of the period:

	Three Months Ended September 30, 2015			Nine Months Ended September 30, 2015		
	Commodity Contracts	Foreign Currency Contracts	Total	Commodity Contracts	Foreign Currency Contracts	Total
	(Dollars in millions)					
Changes in net unrealized losses ⁽¹⁾	\$15.5	\$52.9	\$68.4	\$15.5	\$52.9	\$68.4

Within the unaudited condensed consolidated statements of operations and unaudited condensed consolidated statements of comprehensive income for the periods presented, unrealized losses from Level 3 items are combined with unrealized gains and losses on positions classified in Level 1 or 2, as well as other positions that have been realized during the applicable periods.

Other Financial Instruments. The Company used the following methods and assumptions in estimating fair values for other financial instruments as of September 30, 2015 and December 31, 2014:

Cash and cash equivalents, accounts receivable, including those within the Company's accounts receivable securitization program, notes receivable and accounts payable have carrying values which approximate fair value due to the short maturity or the liquid nature of these instruments.

Long-term debt fair value estimates are based on observed prices for securities with an active trading market when available (Level 2), and otherwise on estimated borrowing rates to discount the cash flows to their present value (Level 3).

The carrying amounts and estimated fair values of the Company's long-term debt are summarized as follows:

	September 30, 2015		December 31, 2014	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(Dollars in millions)			
Long-term debt	\$6,301.9	\$2,126.3	\$5,986.8	\$5,227.9

Credit and Nonperformance Risk

The fair value of the Company's Corporate Hedging derivative assets and liabilities reflects adjustments for credit risk. The Company manages its counterparty risk through established credit standards, diversification of counterparties, utilization of investment grade commercial banks, adherence to established tenor limits based on counterparty creditworthiness and continuous monitoring of that creditworthiness. To reduce its credit exposure for these hedging activities, the Company seeks to enter into netting agreements with counterparties that permit the Company to offset asset and liability positions with such counterparties in the event of default. The Company also continually monitors counterparties for nonperformance risk, if present, on a case-by-case basis.

(8) Coal Trading

The Company engages in the direct and brokered trading of coal and freight-related contracts (coal trading). Except those for which the Company has elected to apply a normal purchases and normal sales exception, all derivative coal trading contracts are accounted for at fair value.

The Company includes instruments associated with coal trading transactions as a part of its trading book. Trading revenues from such transactions are recorded in "Other revenues" in the unaudited condensed consolidated statements of operations and include realized and unrealized gains and losses on derivative instruments, including those that arise from coal deliveries related to contracts accounted for on an accrual basis under the normal purchases and normal sales exception. Therefore, the Company has elected the trading exemption surrounding disclosure of its coal trading

activities.

16

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Trading revenues recognized during the three and nine months ended September 30, 2015 and 2014 were as follows:

Trading Revenues by Type of Instrument	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Commodity futures, swaps and options	\$47.7	\$10.7	\$89.4	\$69.0
Physical commodity purchase/sale contracts	(23.2) 4.3	(46.7) (22.7
Total trading revenues	\$24.5	\$15.0	\$42.7	\$46.3

Risk Management

Hedge Ineffectiveness. In some instances, the Company has designated an existing coal trading derivative as a hedge and, thus, the derivative has a non-zero fair value at hedge inception. The “off-market” nature of these derivatives, which is best described as an embedded financing element within the derivative, is a source of ineffectiveness. In other instances, the Company uses a coal trading derivative that settles at a different time, has different quality specifications or has a different location basis than the occurrence of the cash flow being hedged. These collectively yield ineffectiveness to the extent that the derivative hedge contract does not exactly offset changes in the fair value or expected cash flows of the hedged item.

The gross fair value of coal trading positions designated as cash flow hedges of forecasted sales was an asset of \$16.2 million and \$44.3 million as of September 30, 2015 and December 31, 2014, respectively. Based on the net fair value of the Company’s coal trading positions held in “Accumulated other comprehensive loss” at September 30, 2015, unrealized gains to be reclassified from comprehensive income to earnings through the end of the year are expected to be approximately \$16 million, at which point, all unrealized gains will have been reclassified. As these unrealized gains are associated with derivative instruments that represent hedges of forecasted transactions, the amounts reclassified to earnings may partially offset the effect of the realized underlying transactions in the unaudited condensed consolidated statements of operations.

Offsetting and Balance Sheet Presentation

The Company's coal trading assets and liabilities include financial instruments, such as swaps, futures and options, cleared through various commodities exchanges, which involve the daily net settlement of closed positions. The Company must post cash collateral, known as variation margin, on exchange-cleared positions that are in a net liability position and receives variation margin when in a net asset position. The Company also transacts in coal trading financial swaps and options through OTC markets with financial institutions and other non-financial trading entities under ISDA Master Agreements, which contain symmetrical default provisions. Certain of the Company's coal trading agreements with OTC counterparties also contain credit support provisions that may periodically require the Company to post, or entitle the Company to receive, initial and variation margin. Physical coal and freight-related purchase and sale contracts included in the Company's coal trading assets and liabilities are executed pursuant to master purchase and sale agreements that also contain symmetrical default provisions and allow for the netting and setoff of receivables and payables that arise during the same time period. The Company offsets its coal trading asset and liability derivative positions, and variation margin related to those positions, on a counterparty-by-counterparty basis in the condensed consolidated balance sheets, with the fair values of those respective derivatives reflected in “Assets from coal trading activities, net” and “Liabilities from coal trading activities, net.”

The fair value of assets and liabilities from coal trading activities presented on a gross and net basis as of September 30, 2015 and December 31, 2014 is set forth below:

Affected line item in the condensed consolidated balance sheets	Gross Amounts of Recognized Assets (Liabilities)	Gross Amounts Offset in the Condensed Consolidated Balance Sheets	Variation margin (held) posted ⁽¹⁾	Net Amounts of Assets (Liabilities) Presented in the Condensed Consolidated Balance Sheets
(Dollars in millions)				
Fair Value as of September 30, 2015				
Assets from coal trading activities, net	\$203.4	\$(123.4)) \$(37.7) \$42.3
Liabilities from coal trading activities, net	(156.8) 123.4	5.3	(28.1)
Total, net	\$46.6	\$—	\$(32.4) \$14.2
Fair Value as of December 31, 2014				
Assets from coal trading activities, net	\$342.5	\$(248.3)) \$(36.6) \$57.6
Liabilities from coal trading activities, net	(285.0) 248.3	4.0	(32.7)
Total, net	\$57.5	\$—	\$(32.6) \$24.9

⁽¹⁾ A total of \$0.7 million of the net variation margin held at September 30, 2015 related to cash flow hedges.

See Note 7. "Derivatives and Fair Value Measurements" for information on balance sheet offsetting related to the Company's Corporate Hedging activities.

Fair Value Measurements

The following tables set forth the hierarchy of the Company's net financial asset (liability) coal trading positions for which fair value is measured on a recurring basis as of September 30, 2015 and December 31, 2014:

September 30, 2015				
	Level 1	Level 2	Level 3	Total
(Dollars in millions)				
Commodity futures, swaps and options	\$(7.0) \$19.0	\$—	\$12.0
Physical commodity purchase/sale contracts	—	0.9	1.3	2.2
Total net financial (liabilities) assets	\$(7.0) \$19.9	\$1.3	\$14.2
December 31, 2014				
	Level 1	Level 2	Level 3	Total
(Dollars in millions)				
Commodity futures, swaps and options	\$(0.2) \$32.6	\$—	\$32.4
Physical commodity purchase/sale contracts	—	(9.6) 2.1	(7.5)
Total net financial (liabilities) assets	\$(0.2) \$23.0	\$2.1	\$24.9

For Level 1 and 2 financial assets and liabilities, the Company utilizes both direct and indirect observable price quotes, including U.S. interest rate curves; LIBOR yield curves; Chicago Mercantile Exchange (CME) Group, Intercontinental Exchange (ICE), LCH.Clearnet (formerly known as the London Clearing House), NOS Clearing ASA and Singapore Exchange (SGX) contract prices; broker quotes; published indices and other market quotes. Below is a summary of the Company's valuation techniques for Level 1 and 2 financial assets and liabilities:

• Commodity futures, swaps and options: generally valued based on unadjusted quoted prices in active markets (Level 1) or a valuation that is corroborated by the use of market-based pricing (Level 2).

Physical commodity purchase/sale contracts: purchases and sales at locations with significant market activity corroborated by market-based information (Level 2).

Physical commodity purchase/sale contracts transacted in less liquid markets or contracts, such as long-term arrangements with limited price availability, are classified in Level 3. Indicators of less liquid markets are those with periods of low trade activity or wide pricing spreads between broker quotes.

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Company's risk management function, which is independent of the Company's commercial trading function, is responsible for valuation policies and procedures, with oversight from executive management. Generally, the Company's Level 3 instruments or contracts are valued using bid/ask price quotations and other market assessments obtained from multiple, independent third-party brokers or other transactional data incorporated into internally-generated discounted cash flow models. While the Company does not anticipate any decrease in the number of third-party brokers or market liquidity, the occurrence of such events could erode the quality of market information and therefore the valuation of its market positions. The Company's valuation techniques include basis adjustments to the foregoing price inputs for quality, such as heat rate and sulfur and ash content; location differentials, expressed as port and freight costs, and credit risk. The Company's risk management function independently validates the Company's valuation inputs, including unobservable inputs, with third-party information and settlement prices from other sources where available. A daily process is performed to analyze market price changes and changes to the portfolio. Further periodic validation occurs at the time contracts are settled with the counterparty. These valuation techniques have been consistently applied in all periods presented, and the Company believes it has obtained the most accurate information available for the types of derivative contracts held.

The fair value of the Company's coal trading positions classified in Level 3, and changes thereto, was not material to the periods presented. Additionally, the Company did not have any significant transfers between Level 1 and Level 2 during the three and nine months ended September 30, 2015 or 2014, nor were there any transfers in or out of Level 3 during those periods. The Company's policy is to value all transfers between levels using the beginning of period valuation.

As of September 30, 2015, the Company's trading portfolio was expected to have positive net cash realizations in 2015 and 2016, reaching substantial maturity in 2016 on a fair value basis.

Credit and Nonperformance Risk. The fair value of the Company's coal derivative assets and liabilities reflects adjustments for credit risk. The Company's exposure is substantially with electric utilities, energy marketers, steel producers and nonfinancial trading houses. The Company's policy is to independently evaluate each customer's creditworthiness prior to entering into transactions and to regularly monitor the credit extended. If the Company engages in a transaction with a counterparty that does not meet its credit standards, the Company seeks to protect its position by requiring the counterparty to provide an appropriate credit enhancement. Also, when appropriate (as determined by its credit management function), the Company has taken steps to reduce its exposure to customers or counterparties whose credit has deteriorated and who may pose a higher risk of failure to perform under their contractual obligations. These steps include obtaining letters of credit or cash collateral (margin), requiring prepayments for shipments or the creation of customer trust accounts held for the Company's benefit to serve as collateral in the event of a failure to pay or perform. To reduce its credit exposure related to trading and brokerage activities, the Company seeks to enter into netting agreements with counterparties that permit the Company to offset asset and liability positions with such counterparties and, to the extent required, the Company will post or receive margin amounts associated with exchange-cleared and certain OTC positions. The Company also continually monitors counterparty and contract nonperformance risk, if present, on a case-by-case basis.

At September 30, 2015, 86% of the Company's credit exposure related to coal trading activities with investment grade counterparties, while 1% was with non-investment grade counterparties and 13% was with counterparties that are not rated.

Performance Assurances and Collateral

Certain of the Company's derivative trading instruments require the parties to provide additional performance assurances whenever a material adverse event jeopardizes one party's ability to perform under the instrument. If the Company was to sustain a material adverse event (using commercially reasonable standards), its counterparties could request collateralization on derivative trading instruments in net liability positions which, based on an aggregate fair

value at September 30, 2015 and December 31, 2014, would have amounted to collateral postings to counterparties of approximately \$26 million and \$31 million, respectively. As of September 30, 2015 and December 31, 2014, no collateral was posted to counterparties for such positions.

Certain of the Company's other derivative trading instruments require the parties to provide additional performance assurances whenever a credit downgrade occurs below a certain level, as specified in each underlying contract. The terms of such derivative trading instruments typically require additional collateralization, which is commensurate with the severity of the credit downgrade. In 2015, each of the three agencies downgraded our corporate credit rating. The credit downgrades were, in part, due to continued weakness in seaborne coal prices. The Company was not required to post additional collateral as a direct result of these downgrades for its derivative trading instruments. Even if a credit downgrade were to have occurred below contractually specified levels, the Company's additional collateral requirement owed to its counterparties for these derivative trading instruments would have been zero at September 30, 2015 and December 31, 2014 based on the aggregate fair value of all derivative trading instruments with such features. As of September 30, 2015 and December 31, 2014, no collateral was posted to counterparties to support such derivative trading instruments.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Company is required to post variation margin on positions that are in a net liability position and is entitled to receive and hold variation margin on positions that are in a net asset position with an exchange and certain of its OTC derivative contract counterparties. At September 30, 2015 and December 31, 2014, the Company held net variation margin of \$32.4 million and \$32.6 million, respectively.

In addition to the requirements surrounding variation margin, the Company is required by the exchanges upon which it transacts and by certain of its OTC arrangements to post certain additional collateral, known as initial margin, which represents an estimate of potential future adverse price movements across the Company's portfolio under normal market conditions. As of September 30, 2015 and December 31, 2014, the Company had posted initial margin of \$17.7 million and \$15.2 million, respectively, which is reflected in "Other current assets" in the condensed consolidated balance sheets. The Company had posted \$4.1 million of margin in excess of the required variation and initial margin as of September 30, 2015, while it had posted \$6.1 million of excess margin as of December 31, 2014.

(9) Financing Receivables

The Company's total financing receivables as of September 30, 2015 and December 31, 2014 consisted of the following:

Balance Sheet Classification	September 30, 2015	December 31, 2014
	(Dollars in millions)	
Other current assets	\$24.6	\$—
Investments and other assets	153.0	347.2
Total financing receivables	\$177.6	\$347.2

The Company periodically assesses the collectability of accounts and loans receivable by considering factors such as specific evaluation of collectability, historical collection experience, the age of the receivable and other available evidence. Below is a description of the Company's financing receivables outstanding as of September 30, 2015.

Codrilla Mine Project. In 2011, a wholly-owned subsidiary of PEA-PCI, then Macarthur Coal Limited, completed the sale of a portion of its 85% interest in the Codrilla Mine Project to the other participants of the Coppabella Moorvale Joint Venture, afterward retaining 73.3% ownership. The final outstanding installment payment of 40% of the sale price is due upon the earlier of the mine's first coal shipment or a specified date. The sales agreement was amended in the second quarter of 2013 to delay the specified date from March 31, 2015 to June 30, 2016. There are currently no indications of impairment on the remaining installment and the Company expects to receive full payment by June 30, 2016. The remaining balance associated with these receivables totaled \$24.6 million and \$27.6 million at September 30, 2015 and December 31, 2014, respectively, and was recorded in "Other current assets" and "Investments and other assets" in the condensed consolidated balance sheets, respectively.

Middlemount. The Company periodically makes loans to Middlemount, in which the Company owns a 50% equity interest, pursuant to the related shareholders' agreement for purposes of funding capital expenditures and working capital requirements. Middlemount is required to pay down the loans as excess cash is generated pursuant to its shareholders' agreement. The Priority Loans bear interest at a rate equal to the monthly average 30-day Australian Bank Bill Swap Reference Rate plus 3.5%, while the Subordinated Loans presently do not bear interest. The loans expire on December 31, 2016. Based on the expected timing of repayment of these loans, which is projected to extend beyond the stated expiration date, the Company considers these loans to be of a long-term nature. As a result, (1) the foreign currency impact related to the shareholder loans is included in foreign currency translation adjustment in the condensed consolidated balance sheets and the unaudited condensed consolidated statements of comprehensive income and (2) interest income on the Priority Loans is recognized when cash is received. Refer to Note 3. "Asset Impairment" for background surrounding an impairment charge of \$136.8 million recognized during the nine months ended September 30, 2015. The carrying value of these loans of \$153.0 million and \$319.6 million was reflected in "Investments and other assets" in the condensed consolidated balance sheets as of September 30, 2015 and

December 31, 2014, respectively.

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

(10) Property, Plant, Equipment and Mine Development

Property, plant, equipment and mine development, net, as of September 30, 2015 and December 31, 2014 consisted of the following:

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
Land and coal interests	\$ 10,637.5	\$ 11,021.1
Buildings and improvements	1,536.9	1,569.1
Machinery and equipment	2,341.9	2,685.7
Less: Accumulated depreciation, depletion and amortization	(5,040.9)	(4,698.6)
Total, net	\$ 9,475.4	\$ 10,577.3

(11) Income Taxes

The Company's income tax provision of \$6.9 million and \$79.4 million for the three months ended September 30, 2015 and 2014, respectively, included a tax benefit of \$0.8 million and \$1.2 million related to the remeasurement of foreign income tax accounts for the same respective periods. The Company's income tax benefit of \$83.2 million and provision of \$30.9 million for the nine months ended September 30, 2015 and 2014, respectively, included tax benefits of \$1.0 million and \$3.9 million related to the remeasurement of foreign income tax accounts, respectively.

The Company's effective tax rate before remeasurement for the three and nine months ended September 30, 2015 is based on the Company's estimated full year effective tax rate, comprised of expected statutory tax expense more than offset by reductions from percentage depletion, foreign rate differential and changes in valuation allowance. The Company wrote-off deferred tax assets due to the repeal of the Australian Minerals Rent Resource Tax (MRRT) of \$70.1 million and \$16.1 million for the three and nine months ended September 30, 2014, respectively.

The income tax expense and tax benefit recorded for the three and nine months ended September 30, 2015 are primarily comprised of a tax allocation to results from continuing operations related to the tax effects of items credited directly to "Other comprehensive income". Generally, the amount of tax provision or benefit allocated to continuing operations is determined without regard to the tax effects of other categories of income or loss, such as "Other comprehensive income." However, an exception applies in periods in which there is a year-to-date loss from continuing operations before taxes and income in other categories of earnings before taxes. Under this exception, and notwithstanding the continuing valuation allowance on the Company's net deferred tax assets in the U.S. and Australia, the tax provision is first allocated to the other categories of earnings and a related tax benefit is recorded in results from continuing operations. There was no similar activity recorded for the three or nine months ended September 30, 2014.

During the three and nine months ended September 30, 2015, the Company decreased its unrecognized tax benefits, including interest and penalties related thereto, by \$25.0 million due to finalization of IRS audits on the 2009 through 2013 tax years.

(12) Long-term Debt

The Company's total indebtedness as of September 30, 2015 and December 31, 2014 consisted of the following:

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
2013 Term Loan Facility due September 2020	\$1,167.4	\$1,175.1
7.375% Senior Notes due November 2016	—	650.0
6.00% Senior Notes due November 2018	1,518.8	1,518.8
6.50% Senior Notes due September 2020	650.0	650.0
6.25% Senior Notes due November 2021	1,339.6	1,339.6
10.00% Senior Secured Second Lien Notes due March 2022	977.5	—
7.875% Senior Notes due November 2026	247.7	247.6
Convertible Junior Subordinated Debentures due December 2066	384.5	382.3
Capital lease obligations	15.7	22.2
Other	0.7	1.2
Total	\$6,301.9	\$5,986.8

The carrying amounts of the 2013 Term Loan Facility due September 2020, the 10.00% Senior Secured Second Lien Notes due March 2022 (the Senior Secured Second Lien Notes), the 7.875% Senior Notes due November 2026 and the Convertible Junior Subordinated Debentures due December 2066 (the Debentures) have been presented above net of the respective unamortized original issue discounts.

Other than as described in the following section, there were no significant changes to the Company's long-term debt subsequent to December 31, 2014. Information regarding the Company's long-term debt is outlined in Note 12 to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

2013 Credit Facility Amendment

On February 5, 2015, the Company entered into the Omnibus Amendment Agreement (the First Amendment) related to its 2013 Credit Facility. The 2013 Credit Facility provides for a \$1.65 billion revolving credit facility (the 2013 Revolver) and a \$1.20 billion term loan facility (the 2013 Term Loan Facility).

The Company's obligations under the 2013 Credit Facility are guaranteed by the Company and substantially all of its domestic subsidiaries and are secured by (1) a pledge of 65% of the stock of Peabody Investments (Gibraltar) Limited, a holding company for the Company's Australian operations, (2) a pledge of the stock of Peabody IC Funding Corp., whose assets are substantially comprised of intercompany debt owed to it by Peabody IC Holdings, LLC, a holding company whose sole asset is intercompany debt, which had a book value of \$5.4 billion at September 30, 2015, owed to it by the top-level Gibraltar subsidiary of the Company's Australian platform, an entity which previously owed such debt directly to Peabody IC Funding Corp., and (3) after the effectiveness of the First Amendment, substantially all of the Company's U.S. assets and 65% of the equity interests of its first-tier foreign subsidiaries, subject to certain exceptions. Under the 2013 Credit Facility, the amount of such obligations that are secured by Principal Property and Capital Stock (each as is defined in the indentures for the Company's 6.00%, 6.25%, 6.50% and 7.875% Senior Notes (collectively, the Senior Notes)) is limited in order for the Company to utilize the general liens basket in the Company's Senior Notes indentures.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

In addition to the pledge of certain collateral, among other things, the First Amendment:

amended the financial maintenance covenants to provide the Company with greater financial flexibility by lowering the minimum interest coverage ratio and increasing the maximum net secured first lien leverage ratio for the term of the 2013 Credit Facility;

amended the liens covenant to allow for second lien debt issuances, so long as the Company remains in compliance with the 2013 Credit Facility;

amended certain other negative covenants to (1) reduce the annual cash dividend payments basket to a maximum of \$27.5 million (with carryforward permitted), (2) reduce the additional general restricted payments basket, which includes dividends, stock repurchases and certain investments, to a maximum of \$100.0 million (though the Company may also make restricted payments using another basket whose size is based on, among other things, positive earnings during the term of the agreement) and (3) further limit the Company's ability to incur liens, incur debt and make investments; and

provided for certain additional mandatory prepayments including with the net cash proceeds of certain asset sales, subject to customary reinvestment rights.

The Company paid aggregate modification costs of \$11.8 million related to the First Amendment during the nine months ended September 30, 2015, which will be amortized over the remaining terms of the 2013 Revolver and the 2013 Term Loan Facility.

Under the Credit Facility, the secured obligations include: term loans outstanding, revolver borrowings, letters of credit outstanding, and Swap Obligations and Cash Management Obligations, as defined in the Company's secured credit agreement dated September 24, 2013.

Senior Secured Second Lien Notes Offering

On March 16, 2015, the Company completed the offering of \$1.0 billion aggregate principal amount of the Senior Secured Second Lien Notes. The notes were offered to qualified institutional buyers under Rule 144A of the Securities Act of 1933, as amended (the Securities Act), and to non-U.S. persons in transactions outside the U.S. under Regulation S of the Securities Act.

The Senior Secured Second Lien Notes are secured by a second-priority lien on all of the assets that secure the Company's obligations under the 2013 Credit Facility on a first-lien basis, subject to permitted liens and other limitations. The Company's Senior Secured Second Lien Notes indenture contains a limit, consistent with the 2013 Credit Facility, on the amount of debt that may be secured by Principal Property and Capital Stock. For purposes of calculating the Principal Property limit, 15% of Specified Consolidated Net Tangible Assets (as that term is used in the related indenture) was approximately \$1.5 billion as of September 30, 2015. Additionally, as of September 30, 2015, the book value of Principal Property was approximately \$3.0 billion, the book value of property that did not constitute Principal Property was approximately \$2.4 billion and the book value of 65% of the capital stock in the Company's first-tier foreign subsidiaries and 65% of the capital stock in Peabody Investments (Gibraltar) Limited was approximately \$2.9 billion.

The Company used the net proceeds from the sale of the notes, in part, to fund the tender offer to purchase its 7.375% Senior Notes due November 2016 (the 2016 Senior Notes) and to redeem the aggregate principal amount of the 2016 Senior Notes that was not tendered in the tender offer. Additionally, the remaining proceeds were intended for general corporate purposes, which may include the payment of federal coal lease expenditures.

The Company must pay interest on the notes semi-annually on March 15 and September 15 of each year until maturity on March 15, 2022. The Company may redeem the Senior Secured Second Lien Notes at any time on or after March 15, 2018 at the redemption prices specified in the related indenture and, prior to that date, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus a make whole premium, in addition to any accrued and unpaid interest. Prior to March 15, 2018, the Company may also redeem up to 35% of the aggregate principal

amount of the Senior Secured Second Lien Notes with the net cash proceeds from certain equity offerings. The notes were issued at an issue price of 97.566% of principal amount, resulting in an original issue discount of \$24.3 million that will be amortized through maturity. The Company also paid aggregate debt issuance costs of \$16.9 million during the nine months ended September 30, 2015 related to the offering, which will also be amortized over the life of the Senior Secured Second Lien Notes.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2016 Senior Notes Tender Offer and Redemption

Concurrently with the offering of the Senior Secured Second Lien Notes, the Company commenced a tender offer to repurchase the \$650.0 million aggregate principal amount then outstanding of the 2016 Senior Notes. Consequently, the Company repurchased \$566.9 million aggregate principal amount of the 2016 Senior Notes that were validly tendered and not validly withdrawn during March 2015. The Company redeemed the remaining \$83.1 million aggregate principal amount of the 2016 Senior Notes on April 15, 2015. In connection with those repurchases, the Company recognized an aggregate loss on early debt extinguishment of \$67.8 million in the unaudited condensed consolidated statement of operations for the nine months ended September 30, 2015 comprised of aggregate tender offer and make-whole premiums paid of \$66.4 million and the non-cash write-off of associated unamortized debt issuance costs of \$1.4 million.

(13) Pension and Postretirement Benefit Costs

Net periodic pension cost included the following components:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Service cost for benefits earned	\$0.7	\$0.6	\$2.0	\$1.6
Interest cost on projected benefit obligation	10.1	11.3	30.3	34.0
Expected return on plan assets	(12.0)	(13.6)	(36.1)	(40.7)
Amortization of prior service cost and net actuarial loss	10.0	7.9	30.4	23.6
Net periodic pension cost	\$8.8	\$6.2	\$26.6	\$18.5

Annual contributions to the qualified plans are made in accordance with minimum funding standards and the Company's agreement with the Pension Benefit Guaranty Corporation (PBGC). Funding decisions also consider certain funded status thresholds defined by the Pension Protection Act of 2006 (generally 80%). As of September 30, 2015, the Company's qualified plans were expected to be at or above the Pension Protection Act thresholds and will therefore avoid benefit restrictions and at-risk penalties for 2015. During the three and nine months ended September 30, 2015, the Company contributed \$2.3 million and \$ 4.5 million respectively, to its qualified pension plans. During the three and nine months ended September 30, 2015, the Company contributed \$0.3 million and \$1.0 million respectively to its non-qualified pension plans. The Company expects to contribute approximately \$5.8 million to its pension plans to meet minimum funding requirements for its qualified plans and benefit payments for its non-qualified plans in 2015.

Net periodic postretirement benefit cost included the following components:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
	(Dollars in millions)			
Service cost for benefits earned	\$2.8	\$3.1	\$8.4	\$9.2
Interest cost on accumulated postretirement benefit obligation	8.4	9.1	25.3	27.3
Amortization of prior service cost and net actuarial loss	4.6	3.9	13.6	11.8
Net periodic postretirement benefit cost	\$15.8	\$16.1	\$47.3	\$48.3

(15) Other Events

Organizational Realignment

From time to time, the Company initiates restructuring activities in connection with its repositioning efforts to appropriately align its cost structure or optimize its coal production relative to prevailing global coal industry conditions. Costs associated with restructuring actions can include early mine closures, voluntary and involuntary workforce reductions, office closures and other related activities. Costs associated with restructuring activities are recognized in the period incurred.

In 2015, the Company has eliminated corporate and regional staff positions in the U.S. and implemented workforce reductions of employee and contractor positions at multiple mines in Australia. Included in the Company's unaudited condensed consolidated statements of operations for the three and nine months ended September 30, 2015 were aggregate restructuring charges of \$1.8 million and \$23.0 million, respectively, primarily comprised of cash severance costs. Of that amount, \$5.7 million remained accrued as of September 30, 2015, which is expected to be paid in the fourth quarter of 2015.

Coal Supply Agreement

During April 2014, the Company finalized pricing under a sales agreement for one of its Powder River Basin Mining segment customers. As a result of that agreement, the Company recognized additional contract revenue and sales-related expenses totaling \$33.5 million and \$6.4 million, respectively, during the nine months ended September 30, 2014.

Divestitures

As noted in Note 3. "Asset Impairment," the Company initiated a review of its asset portfolio during the second quarter of 2015. In connection with that review and related marketing and divestiture approval processes conducted during the period, certain assets were classified as held-for-sale. Subsequent to the related write-downs, these assets had an aggregate carrying value of approximately \$125 million and were included in "Other current assets" in the Company's unaudited condensed consolidated balance sheet as of September 30, 2015. The results of operations and cash flows of such assets were not material to the consolidated financial statements for the periods presented in this report.

In January 2014, the Company sold a non-strategic exploration tenement asset in Australia in exchange for cash proceeds of \$62.6 million. The Company had previously recorded an impairment charge in December 2013 to write down the carrying value of that asset to its fair value. Accordingly, there was no gain or loss recognized on the disposal during the nine months ended September 30, 2014.

(16) Earnings per Share (EPS)

Basic and diluted EPS are computed using the two-class method, which is an earnings allocation that determines EPS for each class of common stock and participating securities according to dividends declared and participation rights in undistributed earnings. The Company's restricted stock awards are considered participating securities because holders are entitled to receive non-forfeitable dividends during the vesting term. Diluted EPS includes securities that could potentially dilute basic EPS during a reporting period, for which the Company includes the Debentures and share-based compensation awards. Dilutive securities are not included in the computation of loss per share when a company reports a net loss from continuing operations as the impact would be anti-dilutive.

For all but the performance units, the potentially dilutive impact of the Company's share-based compensation awards is determined using the treasury stock method. Under the treasury stock method, awards are treated as if they had been exercised with any proceeds used to repurchase common stock at the average market price during the period. Any incremental difference between the assumed number of shares issued and purchased is included in the diluted share computation. For the Company's performance units, their contingent features result in an assessment for any potentially dilutive common stock by using the end of the reporting period as if it were the end of the contingency

period for all units granted. For further discussion of the Company's share-based compensation awards, see Note 18. "Share-Based Compensation" to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

A conversion of the Debentures may result in payment for any conversion value in excess of the principal amount of the Debentures in the Company's common stock. For diluted EPS purposes, potential common stock is calculated based on whether the market price of the Company's common stock at the end of each reporting period is in excess of the conversion price of the Debentures. For a full discussion of the conditions under which the Debentures may be converted, the conversion rate to common stock and the conversion price, see Note 12. "Long-term Debt" to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. The effect of the Debentures was excluded from the calculation of diluted EPS for all periods presented herein because to do so would have been anti-dilutive for those periods.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The computation of diluted EPS also excluded aggregate share-based compensation awards of approximately 0.3 million and 0.2 million for the three months ended September 30, 2015 and 2014, respectively, and 0.3 million and 0.2 million for the nine months ended September 30, 2015 and 2014, respectively, because to do so would have been anti-dilutive for those periods. Because the potential dilutive impact of such share-based compensation awards is calculated under the treasury stock method, anti-dilution generally occurs when the exercise prices or unrecognized compensation cost per share of such awards are higher than the Company's average stock price during the applicable period.

The following illustrates the earnings allocation method utilized in the calculation of basic and diluted EPS. The number of shares and per share amounts for all periods presented below have been retroactively restated to reflect the Reverse Stock Split discussed in Note 1. "Basis of Presentation."

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Financial Instruments with Off-Balance Sheet Risk

As of September 30, 2015, the Company had the following financial instruments with off-balance sheet risk:

	Reclamation Obligations	Lease Obligations	Workers' Compensation Obligations	Other ⁽¹⁾	Total	Letters of Credit in Support of Financial Instruments
	(Dollars in millions)					
Self bonding	\$1,470.0	\$—	\$—	\$—	\$1,470.0	\$—
Surety bonds ⁽²⁾	304.7	110.6	27.8	14.7	457.8	40.6
Bank guarantees	287.0	—	—	79.1	366.1	81.2
Other letters of credit	—	—	38.8	139.9	178.7	—
Total	\$2,061.7	\$110.6	\$66.6	\$233.7	\$2,472.6	\$121.8

Other includes the \$79.7 million in letters of credit related to Dominion Terminal Associates and TXU Europe

⁽¹⁾ Limited described below and an additional \$154.0 million in bank guarantees, letters of credit and surety bonds related to collateral for road maintenance, performance guarantees and other operations.

A total of \$81.0 million of letters of credit issued as collateral to support surety bonds related to Patriot have been

⁽²⁾ excluded from above as they no longer represent off-balance sheet obligations as discussed in Note 19. "Matters Related to the Patriot Bankruptcy".

The Company owns a 37.5% interest in Dominion Terminal Associates, a partnership that operates a coal export terminal in Newport News, Virginia under a 30-year lease that permits the partnership to purchase the terminal at the end of the lease term for a nominal amount. The partners have severally (but not jointly) agreed to make payments under various agreements which, in the aggregate, provide the partnership with sufficient funds to pay rents and to cover the principal and interest payments on the floating-rate industrial revenue bonds issued by the Peninsula Ports Authority, and which are supported by letters of credit from a commercial bank. As of September 30, 2015, the Company's maximum reimbursement obligation to the commercial bank was in turn supported by letters of credit totaling \$42.7 million.

The Company is party to an agreement with the PBGC and TXU Europe Limited, an affiliate of the Company's former parent corporation, under which the Company is required to make special contributions to two of the Company's defined benefit pension plans and to maintain a \$37.0 million letter of credit in favor of the PBGC. If the Company or the PBGC gives notice of an intent to terminate one or more of the covered pension plans in which liabilities are not fully funded, or if the Company fails to maintain the letter of credit, the PBGC may draw down on the letter of credit and use the proceeds to satisfy liabilities under the Employee Retirement Income Security Act of 1974, as amended. The PBGC, however, is required to first apply amounts received from a \$110.0 million guarantee in place from TXU Europe Limited in favor of the PBGC before it draws on the Company's letter of credit. On November 19, 2002, TXU Europe Limited was placed under the administration process in the U.K. (a process similar to bankruptcy proceedings in the U.S.) and continues under this process as of September 30, 2015. As a result of these proceedings, TXU Europe Limited may be liquidated or otherwise reorganized in such a way as to relieve it of its obligations under its guarantee. As of September 30, 2015, the Company's wholly-owned captive insurance subsidiary was party to a letter of credit arrangement for \$32.8 million in relation to certain of its workers' compensation and other insurance-related obligations whereby that subsidiary has pledged \$46.9 million of its investments in debt securities as collateral. This arrangement reduces the letters of credit drawn on the Company's 2013 Credit Facility and effectively lowers the fees associated with the related letters of credit.

Accounts Receivable Securitization

The Company has an accounts receivable securitization program (securitization program) with a maximum capacity of \$275.0 million through its wholly-owned, bankruptcy-remote subsidiary (Seller). At September 30, 2015, the Company had \$48.2 million remaining capacity available under the securitization program, net of outstanding letters of credit of \$120.0 million and amounts drawn. Under the securitization program, the Company contributes trade receivables of most of the Company's U.S. subsidiaries on a revolving basis to the Seller, which then sells the receivables in their entirety to a consortium of unaffiliated asset-backed commercial paper conduits and banks (the Conduits). After the sale, the Company, as servicer of the assets, collects the receivables on behalf of the Conduits for a nominal servicing fee. The Company utilizes proceeds from the sale of its accounts receivable as an alternative to short-term borrowings under the 2013 Revolver portion of the Company's 2013 Credit Facility, effectively managing its overall borrowing costs and providing an additional source of working capital. The securitization program will expire in April 2016.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Seller is a separate legal entity whose assets are available first and foremost to satisfy the claims of its creditors. Of the receivables sold to the Conduits, a portion of the amount due to the Seller is deferred until the ultimate collection of the underlying receivables. During the nine months ended September 30, 2015, the Company received total consideration of \$2,815.1 million related to accounts receivable sold under the securitization program, including \$1,860.8 million of cash up front from the sale of the receivables, an additional \$529.4 million of cash upon the collection of the underlying receivables and \$173.5 million that had not been collected at September 30, 2015 and was recorded at carrying value, which approximates fair value. The reduction in accounts receivable as a result of securitization activity with the Conduits was \$25.0 million and \$30.0 million at September 30, 2015 and December 31, 2014, respectively.

The securitization activity has been reflected in the unaudited condensed consolidated statements of cash flows as an operating activity because both the cash received from the Conduits upon sale of the receivables as well as the cash received from the Conduits upon the ultimate collection of the receivables are not subject to significantly different risks given the short-term nature of the Company's trade receivables. The Company recorded expense associated with securitization transactions of \$0.5 million and \$0.4 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.3 million and \$1.2 million for the nine months ended September 30, 2015 and 2014, respectively. Other

Included in "Other noncurrent liabilities" in the Company's condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014 is a liability of \$44.7 million, related to reclamation, bonding and mine closure commitments provided on behalf of a third-party coal producer associated with a 2007 purchase of coal reserves and surface lands in the Illinois Basin.

The Company is the lessee under numerous equipment and property leases. It is common in such commercial lease transactions for the Company, as the lessee, to agree to indemnify the lessor for the value of the property or equipment leased, should the property be damaged or lost during the course of the Company's operations. The Company expects that losses with respect to leased property, if any, would be covered by insurance (subject to deductibles). The Company and certain of its subsidiaries have guaranteed other subsidiaries' performance under various lease obligations. Aside from indemnification of the lessor for the value of the property leased, the Company's maximum potential obligations under its leases are equal to the respective future minimum lease payments, and the Company assumes that no amounts could be recovered from third parties.

The Company has provided financial guarantees under certain long-term debt agreements entered into by its subsidiaries and substantially all of the Company's U.S. subsidiaries provide financial guarantees under long-term debt agreements entered into by the Company. The maximum amounts payable under the Company's debt agreements are equal to the respective principal and interest payments of all secured obligations herein.

(18) Commitments and Contingencies

Commitments

Unconditional Purchase Obligations

As of September 30, 2015, purchase commitments for capital expenditures were \$28.6 million, all of which are obligated within the next 12 months.

There were no other material changes to the Company's commitments from the information provided in Note 24 to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Contingencies

From time to time, the Company or its subsidiaries are involved in legal proceedings arising in the ordinary course of business or related to indemnities or historical operations. The Company believes it has recorded adequate reserves for these liabilities and that there is no individual case pending that is likely to have a material adverse effect on the

Company's financial condition, results of operations or cash flows. The Company discusses its significant legal proceedings below, including ongoing proceedings and those that impacted the Company's results of operations for the periods presented.

Litigation Relating to Continuing Operations

Peabody Monto Coal Pty Ltd, Monto Coal 2 Pty Ltd and Peabody Energy Australia PCI Pty Ltd (PEA-PCI). In October 2007, a statement of claim was delivered to Peabody Monto Coal Pty Ltd, a wholly-owned subsidiary of PEA-PCI, then Macarthur Coal Limited, and Monto Coal 2 Pty Ltd, an equity accounted investee, from the minority interest holders in the Monto Coal Joint Venture, alleging that Monto Coal 2 Pty Ltd breached the Monto Coal Joint Venture Agreement and Peabody Monto Coal Pty Ltd breached the Monto Coal Management Agreement. Peabody Monto Coal Pty Ltd is the manager of the Monto Coal Joint Venture pursuant to the Management Agreement. Monto Coal 2 Pty Ltd holds a 51% interest in the Monto Coal Joint Venture. The plaintiffs are Sanrus Pty Ltd, Edge Developments Pty Ltd and H&J Enterprises (Qld) Pty Ltd. An additional statement of claim was delivered to PEA-PCI in November 2010 from the same minority interest holders in the Monto Coal Joint Venture, alleging that PEA-PCI induced Monto Coal 2 Pty Ltd and Peabody Monto Coal Pty Ltd to breach the Monto Coal Joint Venture Agreement and the Monto Coal Management Agreement, respectively. The plaintiffs later amended their claim to allege damages for lost opportunities to sell their joint venture interest. These actions, which are pending before the Supreme Court of Queensland, Australia, seek damages from the three defendants collectively of amounts ranging from \$15.6 million Australian dollars to \$1.8 billion Australian dollars, plus interest and costs. The defendants dispute the claims and are vigorously defending their positions. Based on the Company's evaluation of the issues and their potential impact, the amount of any future loss cannot be reasonably estimated.

Sumiseki Materials Co. Ltd. In 2010, Sumiseki Materials Co. Ltd. (Sumiseki), the Class B shareholder (noncontrolling interest holder) in Wambo Coal Pty Ltd (Wambo), an Australian subsidiary of the Company, filed a lawsuit against Wambo in the Supreme Court of New South Wales, Australia, alleging that it was entitled to certain dividends from Wambo (subject to limited exceptions) and requested payment of those dividends for periods from 2009 to 2012. In March 2013, the Supreme Court ruled Sumiseki was entitled to the disputed dividends (subject to limited exceptions). In May 2013, the Supreme Court issued finalized orders, which included the amounts due for the disputed dividends including interest. Wambo appealed the Supreme Court's decision to the New South Wales Court of Appeal and obtained a stay of the Supreme Court judgment. In accordance with the terms of the stay, Wambo posted security with the court in an interest-bearing trust account jointly operated by the parties.

On September 17, 2014, the Court of Appeal upheld the Supreme Court's ruling (with a minor exception), finding Sumiseki was entitled to the disputed dividends plus interest and costs. In its ruling, the Court of Appeal noted that while payment of dividends is usually a matter for a company's directors, the Class B dividend is a mandatory dividend, regardless of any decision by the directors, and that the amount of the dividend is based on a percentage of the company's net profit, unless there is a legal prohibition that precludes the dividend being paid. Wambo filed an application for leave to appeal the ruling to the High Court of Australia, but the application was denied. Wambo has satisfied the terms of the Court of Appeal's judgment, including the remittance of the restricted security previously posted with the court, and the litigation is over.

Eagle Mining, LLC Arbitration. On May 3, 2013, Eagle Mining, LLC (Eagle) filed an arbitration demand against a Company subsidiary under a contract mining agreement, asserting various claims for damages. An arbitration hearing was held in January 2014 before a single arbitrator. As a result of the damages awarded to Eagle in arbitration, the Company recorded a charge of \$15.6 million in "Operating costs and expenses" in the unaudited condensed consolidated statement of operations for the nine months ended September 30, 2014 to increase the associated liability accrual to \$23.4 million. On April 18, 2014, the Company subsidiary filed a petition to partially vacate and modify the arbitration award in the United States District Court for the Southern District of West Virginia, Charleston Division. On July 29, 2015, the District Court issued a Memorandum Opinion and Order denying the petition to partially vacate and modify the arbitration award and granting Eagle's motion to confirm the arbitration award.

In September 2015, Eagle and the Company's subsidiary settled all claims and agreed to dismiss with prejudice all pending litigation between the parties. In connection with this settlement, the Company recorded a gain totaling \$10.8 million in the three and nine months ended September 30, 2015 to reduce the accrued liability to the amount paid. The matter has concluded.

Queensland Bulk Handling Pty Ltd. On June 30, 2014, QBH filed a statement of claim with the Supreme Court of Queensland, Australia, against Peabody (Wilkie Creek) Pty Limited, an indirect wholly-owned subsidiary of the Company, alleging breach of a CPSA between the parties. QBH originally sought damages of \$113.1 million Australian dollars, plus interest and costs. However, it later altered its claim to seek a declaration that the Company subsidiary had exercised an option to renew the contract for a further term, and withdrew its claim for money damages.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

On February 27, 2015, the Supreme Court of Queensland, Australia ruled that QBH and the Company subsidiary were bound to enter into a new CPSA upon substantially the same terms as the 2009 CPSA between them. Under the 2009 CPSA, QBH provided services to Peabody (Wilkie Creek) Pty Limited for operations at the Wilkie Creek Mine, which was closed in 2013. The term of the potential new CPSA would commence January 1, 2015 and expire on December 31, 2026 and, assuming substantially the same contractual terms, would require annual minimum payments of approximately \$11.8 million Australian dollars. The Company subsidiary appealed this ruling, which was heard by the Court of Appeal on July 30, 2015. On October 23, 2015, the appellate court upheld this ruling and dismissed the appeal. The Company subsidiary was ordered to pay QBH's costs of the appeal. QBH has not responded to this ruling. The Company is evaluating the ruling and its options.

While the ultimate impact of the litigation is subject to a wide range of uncertainty, the Company recognized a charge of \$7.6 million to discontinued operations for the nine months ended September 30, 2015. That amount represents the low end of the range of loss that the Company considers probable. It is reasonably possible that additional exposure may exist up to and including the aggregate annual minimum payments under the potential new CPSA noted above.

Lori J. Lynn Class Action. On June 11, 2015, a former Peabody Investments Corp. (PIC) employee filed a putative class action lawsuit in the United States District Court, Eastern District of Missouri on behalf of three of the Company's or its subsidiaries' 401(k) retirement plans and certain participants and beneficiaries of the plans. The lawsuit, which was brought against the Company, Peabody Holding Company, LLC (PHC), PIC and a number of the Company's and PIC's current and former executives and employees, alleges breach of fiduciary duties under the Employee Retirement Income Security Act of 1974 (ERISA) relating to the offering of the Peabody Energy Stock Fund as an investment option in the 401(k) retirement plans.

On September 8, 2015, the plaintiffs filed an amended complaint which, among other things, named a new plaintiff and named all of the current members and two former members of the board as defendants. The class period (December 2012 to present) remains unchanged. The defendants' response to the amended complaint is due November 6, 2015. The defendants dispute the allegations of the lawsuit and plan to vigorously defend their positions. Based on current information the Company believes these claims are likely to be finalized without a material adverse effect of its financial condition, results of operations or cash flows.

Claims, Litigation and Settlements Relating to Indemnities or Historical Operations

Environmental Claims and Litigation Arising From Historical, Non-Coal Producing Operations. Gold Fields Mining, LLC (Gold Fields) is a dormant, non-coal producing entity that was previously managed and owned by Hanson plc, the Company's predecessor owner. In a February 1997 spin-off, Hanson plc transferred ownership of Gold Fields to the Company despite the fact that Gold Fields had no ongoing operations and the Company had no prior involvement in its past operations. Gold Fields is currently one of the Company's subsidiaries. The Company indemnified TXU Group with respect to certain claims relating to the historical operations of a former affiliate of Gold Fields.

Environmental claims for remediation, past costs, future costs, and/or natural resource damages have been asserted against Gold Fields related to historical activities of Gold Fields or a former affiliate. Gold Fields or the former affiliate has been named a potentially responsible party (PRP) at five national priority list sites based on the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLA claims were asserted at 13 additional sites, bringing the total to 18, which have since been reduced to six by completion of work, settlement, transfer or regulatory inactivity. The number of CERCLA sites alone is not a relevant measure of liability because the nature and extent of environmental concerns and costs varies by site, as does the estimated share of responsibility relative to other PRPs for Gold Fields or the former affiliate.

Undiscounted liabilities for environmental cleanup-related costs for all of the sites noted above were \$64.3 million as of September 30, 2015 and \$69.4 million as of December 31, 2014, of which \$14.4 million and \$19.4 million was reflected as a current liability, respectively, in the condensed consolidated balance sheets as of those dates. These

amounts represent those costs that the Company believes are probable and reasonably estimable.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Significant uncertainty exists as to whether claims will be pursued against Gold Fields or the former affiliate in all cases, and where they are pursued, the amount and timing of the eventual costs and liabilities, which could be greater or less than the liabilities recorded in the condensed consolidated balance sheets. Changes to cost estimates associated with a particular site can occur for many reasons, including, but not limited to, the gathering of additional information at the site, the completion of the remedial design phase of the CERCLA remediation process, changes in anticipated remediation standards or labor and material costs or the reaching of a settlement agreement or consent order by the parties at the site. Based on the Company's evaluation of the issues and their potential impact, the total amount of any future loss cannot be reasonably estimated. However, based on current information, the Company believes these claims are likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Patriot-Related Matters. Refer to Note 19. "Matters Related to the Patriot Bankruptcy" for information surrounding the United Mine Workers of America (UMWA) 1974 Pension Plan litigation.

Other

In June 2007, the New York Office of the Attorney General (NYAG) served a letter and subpoena on the Company, seeking information and documents relating to the Company's disclosure to investors of risks associated with possible climate change and related legislation and regulations. The Company believes it has made full and proper disclosure of these potential risks. In late 2013, the NYAG submitted a letter to the Company requesting additional information and documents. On November 8, 2015, the NYAG and the Company entered into an agreement pursuant to which the Company agreed to make certain disclosures concerning the issues raised by the NYAG.

In January 2013, the Securities and Exchange Commission (SEC) staff served a subpoena on the Company seeking information and documents relating to the development of Prairie State Energy Campus, a 1,600 megawatt coal-fueled electricity generation plant and adjacent coal mine in Illinois in which the Company owns a 5.06% undivided interest. The Company cooperated with the SEC's investigation and has not received any related communication from the SEC since August 2013.

At times the Company becomes a party to other disputes, including those related to contract miner performance, claims, lawsuits, arbitration proceedings and administrative procedures in the ordinary course of business in the U.S., Australia and other countries where the Company does business. Based on current information, the Company believes that such other pending or threatened proceedings are likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

(19) Matters Related to the Patriot Bankruptcy

In 2012, Patriot and certain of its wholly owned subsidiaries filed voluntary petitions for relief under Chapter 11 of Title 11 of the U.S. Code. In 2013, the Company entered into a definitive settlement agreement with Patriot and the UMWA, on behalf of itself, its represented Patriot employees and its represented Patriot retirees, to resolve all then disputed issues related to Patriot's bankruptcy. In May 2015, Patriot again filed voluntary petitions for relief under Chapter 11 of Title 11 of the U.S. Code in the Eastern District of Virginia and subsequently initiated a process to sell some or all of its assets to qualified bidders. On October 9, 2015, Patriot's bankruptcy court entered an order confirming Patriot's plan of reorganization, which provides, among other things, for the sale of substantially all of Patriot's assets to two different buyers.

Credit Support

As part of the 2013 definitive settlement agreement with Patriot and the UMWA, the Company has provided \$121.5 million of credit support to Patriot, with \$81.0 million in the form of surety bonds issued for the benefit of Patriot beneficiaries; \$22.4 million in the form of letters of credit issued for the benefit of Patriot beneficiaries; and \$18.1 million in the form of corporate guarantees to Patriot beneficiaries. Those surety bonds, corporate guarantees and letters of credit are excluded in the financial instruments with off-balance sheet risk table presented in Note 17. "

Financial Instruments, Guarantees with Off-Balance Sheet Risk and Other Guarantees". A total of \$35.3 million of the credit support relates to certain of Patriot's Coal Act obligations that a subsidiary of the Company agreed to fund at the time of the Patriot spin-off pursuant to the Coal Act Liabilities Assumption Agreement. During the three months ended September 30, 2015, \$22.4 million of cash drawdowns were made by the beneficiaries of the letters of credit, leaving \$99.1 million remaining as a liability on our condensed consolidated balance sheet as of September 30, 2015.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Due to Patriot's May 2015 bankruptcy filing, the Company recorded a net charge of \$34.7 million to increase its liability related to the credit support to the estimated fair value of the portion of the credit support exposed to nonperformance by Patriot. That net charge included a \$16.6 million correction of an error reflected in the nine months ended September 30, 2015 to derecognize a liability that had been previously recorded to the Company's historical financial statements in 2014 and 2013. The Company reflected the correction as an out-of-period adjustment because it considers the impact of the error to be immaterial quantitatively and qualitatively to the total mix of information available in the Company's 2015 and historical financial statements.

Black Lung Occupational Disease Liabilities

Patriot has federal and state black lung occupational disease liabilities related to workers employed in periods prior to Patriot's spin-off from the Company in 2007. Upon spin-off, Patriot indemnified the Company against any claim relating to these liabilities, which amounted to approximately \$150 million at that time. The indemnification included any claim made by the U.S. Department of Labor (DOL) against the Company with respect to these obligations as a potentially liable operator under the Federal Coal Mine Health and Safety Act of 1969. The definitive settlement agreement reached in 2013 included Patriot's affirmance of all indemnities provided in the spin-off agreements, including the indemnity relating to such black lung liabilities.

By statute, the Company remains secondarily liable for the black lung liabilities related to Patriot's workers employed by former subsidiaries of the Company. Whether the Company will ultimately be required to fund certain of those obligations in the future as a result of Patriot's May 2015 bankruptcy remains uncertain. The Company does believe that it is probable that it will be required to fund a portion of these obligations in the future and recorded a charge to "(Loss) income from discontinued operations, net of income taxes" of \$126.0 million, net of \$15.0 million previously accrued credit support related to Patriot's federal black lung obligations, during the three and nine months ended September 30, 2015. The liability recorded for black lung occupational disease liability is based on information provided by Patriot which the Company continues to evaluate. As a result of the complexity of this estimate and the limited amount of time the Company has had to evaluate the underlying data, this estimate may change in future periods. The amount of the Company's recorded liability reflects only Patriot workers employed by former subsidiaries of the Company that are presently retired, disabled or otherwise not actively employed, which the Company believes reflects the low end of the range of potential loss. The Company cannot reliably estimate the potential liabilities for Patriot's workers employed by former subsidiaries of the Company that are presently active in the workforce because of the potential for such workers to continue to work for another coal operator that is a going concern, including a potential buyer of Patriot's former operations. The Company estimates that the annual cash cost to fund these potential Black Lung liabilities will range between \$10 million and \$15 million.

Combined Benefit Fund (Combined Fund)

The Combined Fund was created by the Coal Act in 1992 as a multi-employer plan to provide health care benefits to a closed group of retirees who last worked prior to 1976, as well as orphaned beneficiaries of bankrupt companies who were receiving benefits as orphans prior to the passage of the Coal Act. No new retirees will be added to this group, which includes retirees formerly employed by certain Patriot subsidiaries and their predecessors. Former employers are required to contribute to the Combined Fund according to a formula.

Under the terms of the Patriot spin-off, Patriot was primarily liable for the obligations of its subsidiaries to the Combined Fund, which obligations were actuarially estimated to be approximately \$40 million at that time. To the extent that Patriot ceases to meet its obligations, we may be held responsible for these costs. The Company believes it is probable that it will be required to fund these obligations in the future and recorded a "(Loss) income from discontinued operations, net of income taxes" charge of \$29.1 million during the three and nine months ended September 30, 2015 utilizing the best available actuarial information received prior to the issuance of these financial statements. The Company estimates that the annual cash cost to fund these potential Combined Fund liabilities will

range between \$2 million and \$3 million in the near-term, with those premiums expected to decline over time because the fund is closed to new participants.

VEBA Payments

In connection with the 2013 definitive settlement agreement, the Company was required to provide total payments of \$310.0 million, payable over four years through 2017, to partially fund the newly established voluntary employee beneficiary association (VEBA) and settle all Patriot and UMWA claims involving the Patriot bankruptcy. Those payments included an initial payment of \$90.0 million made in January 2014, comprised of \$70.0 million paid to Patriot and \$20.0 million paid to the VEBA, and a payment of \$75.0 million made in January 2015 to the VEBA. The settlement agreement also contemplates subsequent payments to be made to the VEBA of \$75.0 million in 2016 and \$70.0 million in 2017.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

As a result of Patriot's failure to reimburse the Company for the draws on the credit support that the Company provided under the 2013 Settlement Agreement, Patriot has materially breached the 2013 Settlement Agreement. The Company and the UMWA disagree about the impact Patriot's breaches have on the Company's future obligations under the 2013 Settlement Agreement, including the payment of the two remaining VEBA payments. Accordingly, on August 28, 2015, the Company sought to-reopen Patriot's first bankruptcy cases that were pending in the United States Bankruptcy Court for the Eastern District of Missouri (the "Missouri Bankruptcy Court") for the limited purpose of having the Missouri Bankruptcy Court decide this issue. On October 9, 2015, the Missouri Bankruptcy Court granted the Company's motion and ordered the Company to file its declaratory judgment action within 30 days. On October 9, 2015, the Company filed in the Missouri Bankruptcy Court a declaratory judgment action against the UMWA seeking a declaration that the Company's obligations to make the final two VEBA payments are excused as a result of Patriot's breaches of the agreement (the "Missouri Declaratory Judgment Action"). Patriot's appeal of the Missouri Bankruptcy Court's order was dismissed on October 26, 2015.

On October 16, the UMWA filed a motion to withdraw the reference with respect to the Missouri Declaratory Judgment Action to the United States District Court for the Eastern District of Missouri, with the stated intent of thereafter seeking a transfer of the case ultimately to the United States Bankruptcy Court for the Eastern District of Virginia (the "Virginia Bankruptcy Court") where Patriot's second bankruptcy cases are pending. On October 23, 2015, the Company filed an objection to this motion.

On October 19, 2015, Patriot and the UMWA filed a declaratory judgment action in the Virginia Bankruptcy Court (the "Virginia Declaratory Judgment Action") against the Company and one of its subsidiaries seeking, among other things, a declaration that the Company must make the remaining two VEBA payments notwithstanding Patriot's breach of the 2013 Settlement Agreement. On November 3, 2015, Patriot and the UMWA filed a motion for a preliminary and permanent injunction to prevent the Company from proceeding with the Missouri Declaratory Judgment Action (the "Injunction Motion"). On November 4, 2015, the Company filed a motion to dismiss the Virginia Declaratory Judgment Action for lack of subject matter jurisdiction or, in the alternative, to transfer it to the Missouri Bankruptcy Court; the Company intends to vigorously oppose the Injunction Motion.

Retiree Health Care Obligations for Certain Salaried Patriot Personnel

In connection with the 2007 spin-off of Patriot from the Company, the Company and one of its subsidiaries entered into a Salaried Employee Liabilities Assumption Agreement ("SELAA") pursuant to which its subsidiary agreed fund the healthcare benefits that Patriot was obligated to provide for a group of Patriot's salaried retirees. On October 9, 2015, Patriot's bankruptcy court entered an order approving a stipulation and settlement among the Company and its subsidiary, Patriot and its affiliates and the Official Committee of Retirees in Patriot's chapter 11 cases (on behalf of itself and the retirees that it represents), pursuant to which, among other things, (i) the SELAA is terminated as of October 31, 2015; (ii) the Company and its subsidiary have agreed to pay a total of \$16.1 million in five annual installments to a VEBA to be established by the Official Committee of Retirees; (iii) the Company agreed to pay \$100,000 to the VEBA for its start-up and administrative costs; and (iv) the parties exchanged mutual releases. At September 30, 2015, the Company had \$33.6 million accrued in relation to these obligations.

UMWA 1974 Pension Plan (Plan) Litigation

On July 16, 2015, a lawsuit was filed by the Plan, the UMWA 1974 Pension Trust (Trust) and the Trustees of the Plan and Trust (Trustees) in the United States District Court for the District of Columbia, against the Company, PHC, a subsidiary of the Company, and Arch Coal, Inc. (Arch). The plaintiffs are seeking, pursuant to ERISA and the Multiemployer Pension Plan Amendments Act of 1980 (MPPAA), a declaratory judgment that the defendants are obligated to arbitrate any opposition to the Trustees' determination that the defendants have statutory withdrawal liability as a result of the 2015 Patriot bankruptcy. The plaintiffs' July lawsuit claimed that the defendants' withdrawal liability will result in at least \$767 million owed to the Plan. On October 29, 2015, the plaintiffs filed an amended

complaint, alleging that the plaintiffs had determined that Peabody has \$644.2 million and Arch has \$299.8 million in withdrawal liabilities to the 1974 Pension Plan.

Also on October 29, 2015, the Trustees issued a withdrawal liability assessment against the Company in the amount of \$644.2 million ("October 29 Assessment"). The Trustees claim that a principal purpose of the Company's 2007 spin-off of Patriot was to "evade or avoid" withdrawal liability to the Plan, and they assert that the Company is therefore liable for Patriot's withdrawal from the Plan due to Patriot terminating certain collective bargaining agreements with the UMWA eight years later, during its current bankruptcy proceeding. The October 29 Assessment does not contain the payment schedule required by ERISA. Instead, the Trustees assert that the Company was in default on the \$644.2 million liability assessment as of the moment it was assessed. The Company and PHC dispute this withdrawal liability claim -- including the notion that the Company could be in default on the withdrawal liability assessment prior to being given an opportunity to make any payments on the assessment -- and are vigorously defending their positions.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

ERISA provides a process to adjudicate withdrawal liability disputes, which consists of administrative review by the Plan followed by arbitration, after which either side can appeal to the appropriate United States district court. The Company anticipates it will not have to make payments on the October 29 Assessment until an arbitrator issues a final decision in favor of the Trustees on the "evade or avoid" theory of liability. The Company also anticipates that during arbitration it will receive a decision on the legality of the Fund's determination that the Company was in default. The Company anticipates that as a consequence of such decision, the Fund will be required to issue it a payment schedule setting forth the annual payments required to pay the alleged withdrawal liability over time. If a payment schedule is issued, yet the underlying evade or avoid claim is not finally arbitrated to decision at least 15 months following the October 29 Assessment, the Company anticipates it would then have to post a bond or place into escrow an amount equal to one year's payment (up to \$22.5 million) toward the liability. The bond would remain in place until an arbitration decision is reached on the underlying withdrawal liability issue. If it is decided in the Company's favor, the Company will not owe any amounts to the Plan.

(20) Segment Information

During the second quarter of 2015, the Company elected a new chief executive officer, who is also considered the Company's chief operating decision maker (CODM). Due to that change, the Company updated its reportable segments to reflect the manner in which its new CODM views the Company's businesses for purposes of reviewing performance, allocating resources and assessing future prospects and strategic execution. The Company now reports its results of operations primarily through the following reportable segments: "Powder River Basin Mining," "Midwestern U.S. Mining," "Western U.S. Mining," "Australian Metallurgical Mining," "Australian Thermal Mining," "Trading and Brokerage" and "Corporate and Other." Prior period results have been recast for comparability. The principal business of the Company's mining segments in the U.S. is the mining, preparation and sale of thermal coal, sold primarily to electric utilities in the U.S. under long-term contracts, with a portion sold into the seaborne markets as market conditions warrant. The Company's Powder River Basin Mining operations consist of its mines in Wyoming. The mines in that segment are characterized by surface mining extraction processes, coal with a lower sulfur content and Btu and higher customer transportation costs (due to longer shipping distances). The Company's Midwestern U.S. Mining operations reflect the Company's Illinois and Indiana mining operations, which are characterized by a mix of surface and underground mining extraction processes, coal with a higher sulfur content and Btu and lower customer transportation costs (due to shorter shipping distances). The Company's Western U.S. Mining operations reflect the aggregation of the Southwest and Colorado mining operations. The mines in that segment are characterized by a mix of surface and underground mining extraction processes, coal with a lower sulfur content and Btu and generally higher customer transportation costs (due to longer shipping distances). Geologically, the Company's Powder River Basin operations mine sub-bituminous coal deposits, its Midwestern operations mine bituminous coal deposits and its Western operations mine both bituminous and sub-bituminous coal deposits. The business of the Company's Australian operating platform is primarily export focused with customers spread across several countries, while a portion of the coal is sold within Australia. Generally, revenues from individual countries vary year by year based on electricity demand, the strength of the global economy, governmental policies and several other factors, including those specific to each country. The Company's Australian Metallurgical Mining operations consist of mines in Queensland and New South Wales, Australia. The mines in that segment are characterized by both surface and underground extraction processes used to mine various qualities of metallurgical coal (low-sulfur, high Btu coal). The metallurgical coal qualities include hard coking coal, semi-hard coking coal, semi-soft coal and pulverized coal injection coal. The Company's Australian Thermal Mining operations predominantly consist of mines in New South Wales, Australia. The mines in that segment are characterized by both surface and underground extraction processes used to mine low-sulfur, high Btu thermal coal. The Company classifies its Australian mines within the Australian Metallurgical Mining or Australian Thermal Mining segments based on the

primary customer base and coal reserve type of each mining operation. A small portion of the coal mined by the Australian Metallurgical Mining segment is of a thermal grade. Similarly, a small portion of the coal mined by the Australian Thermal Mining segment is of a metallurgical grade. Additionally, the Company may market some of its metallurgical coal products as a thermal coal product from time to time depending on market conditions.

The Company's Trading and Brokerage segment engages in the direct and brokered trading of coal and freight-related contracts through the trading and business offices. Coal brokering is conducted both as principal and agent in support of various coal production-related activities that may involve coal produced from our mines, coal sourcing arrangements with third-party mining companies or offtake agreements with other coal producers. The Trading and Brokerage segment also provides transportation-related services, which involves both financial derivative contracts and physical contracts. Collectively, coal and freight-related hedging activities include both economic hedging and, from time to time, cash flow hedging in support of our coal trading strategy.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Company's Corporate and Other segment includes selling and administrative expenses, corporate hedging activities, mining and export/transportation joint ventures, restructuring charges and activities associated with the optimization of our coal reserve and real estate holdings, minimum charges on certain transportation-related contracts, the closure of inactive mining sites and certain energy-related commercial matters.

The Company's CODM uses Adjusted EBITDA as the primary measure of segment profit and loss. The Company defines Adjusted EBITDA as (loss) income from continuing operations before deducting net interest expense (including gains and losses on early debt extinguishment or modification); income taxes; asset retirement obligation expenses; depreciation, depletion and amortization; asset impairment and mine closure costs; charges for the settlement of claims and litigation related to previously divested operations and changes in deferred tax asset valuation allowance and amortization of basis difference related to equity affiliates.

(21) Supplemental Guarantor/Non-Guarantor Financial Information

In accordance with the indentures governing the Senior Notes, certain 100% owned U.S. subsidiaries of the Company (each, a Guarantor Subsidiary) have fully and unconditionally guaranteed the Senior Notes, on a joint and several basis. The indentures governing the Senior Notes contain customary exceptions under which a guarantee of a Guarantor Subsidiary will terminate, including (a) the release or discharge of the guarantee of the Company's 2013 Credit Facility by such Guarantor Subsidiary, except a discharge or release by or as a result of payment under such guarantee, (b) a sale or other disposition, by way of merger, consolidation or otherwise, of all of the capital stock of such Guarantor Subsidiary, and (c) the legal defeasance or discharge of the indentures. Separate financial statements and other disclosures concerning the Guarantor Subsidiaries are not presented because management believes that such information is not material to the holders of the Senior Notes. The following historical financial statement information is provided for the Guarantor/Non-Guarantor Subsidiaries.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Notice Regarding Forward-Looking Statements

This report includes statements of our expectations, intentions, plans and beliefs that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are intended to come within the safe harbor protection provided by those sections. These statements relate to future events or our future financial performance, including, without limitation, the section captioned "Outlook" in this Item 2. We use words such as "anticipate," "believe," "expect," "may," "forecast," "project," "show," "estimate," "plan," "outlook," "target," "likely," "will," "to be" or other similar words to identify forward-looking statements.

Table of Contents

Without limiting the foregoing, all statements relating to our future operating results, anticipated capital expenditures, future cash flows and borrowings and sources of funding are forward-looking statements and speak only as of the date of this report. These forward-looking statements are based on numerous assumptions that we believe are reasonable, but are subject to a wide range of uncertainties and business risks and actual results may differ materially from those discussed in these statements. Among the factors that could cause actual results to differ materially are:

- supply and demand for our coal products;
- price volatility and customer procurement practices, particularly in international seaborne products and in our trading and brokerage businesses;
- impact of alternative energy sources, including, but not limited to, natural gas and renewables;
- global steel demand and the downstream impact on metallurgical coal prices;
- impact of weather and natural disasters on demand, production and transportation;
- reductions and/or deferrals of purchases by major customers and our ability to renew sales contracts;
- credit and performance risks associated with customers, suppliers, contract miners, co-shippers and trading, banks and other financial counterparties;
- geologic, equipment, permitting, site access, operational risks and new technologies related to mining;
- transportation availability, performance and costs;
- availability, timing of delivery and costs of key supplies, capital equipment or commodities such as diesel fuel, steel, explosives and tires;
- impact of take-or-pay arrangements for rail and port commitments for the delivery of coal;
- successful implementation of business strategies, including, without limitation, the actions we are implementing to improve our organization and respond to current market conditions;
- negotiation of labor contracts, employee relations and workforce availability;
- changes in postretirement benefit and pension obligations and their related funding requirements;
- replacement and development of coal reserves;
- adequate liquidity to operate the business;
- the cost, availability and access to capital and financial markets;
- ability to appropriately secure our obligations for reclamation, federal and state workers' compensation, federal coal leases and other obligations related to our operations, including our ability to remain eligible for self-bonding and/or successfully access the commercial surety market;
- impacts of the degree to which we are leveraged and our ability to comply with financial and other restrictive covenants in our credit agreements;
- effects of changes in interest rates and currency exchange rates (primarily the Australian dollar);
- effects of acquisitions or divestitures;
- economic strength and political stability of countries in which we have operations or serve customers;
- legislation, regulations and court decisions or other government actions, including, but not limited to, new environmental and mine safety requirements, changes in income tax regulations, sales-related royalties or other regulatory taxes and changes in derivatives laws and regulations;
- litigation, including, but not limited to, claims not yet asserted;
- any additional liabilities or obligations that we may have as a result of the bankruptcy of Patriot Coal Corporation (Patriot), including, without limitation, as a result of litigation filed by third parties in relation to that bankruptcy;
- terrorist attacks or security threats, including, but not limited to, cybersecurity threats;
- impacts of pandemic illnesses; and
- other factors, including, but not limited to, those discussed in Part II, Item 1. "Legal Proceedings" and Part II, Item 1A. "Risk Factors."

When considering these forward-looking statements, you should keep in mind the cautionary statements in this document and in our other Securities and Exchange Commission (SEC) filings, including, but not limited to, the more detailed discussion of these factors and other factors that could affect our results contained in Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2014. These forward-looking statements speak

only as of the date on which such statements were made, and we undertake no obligation to update these statements except as required by federal securities laws.

Table of Contents

Overview

We are the world's largest private sector coal company. As of September 30, 2015, we owned interests in 26 active coal mining operations located in the United States (U.S.) and Australia. We have a majority interest in 25 of those mining operations and a 50% equity interest in Middlemount Coal Pty Ltd. (Middlemount), which owns the Middlemount Mine in Queensland, Australia. In addition to our mining operations, we market and broker coal from other coal producers, both as principal and agent, and trade coal and freight-related contracts.

In 2014, we produced and sold 227.2 million and 249.8 million tons of coal, respectively, from continuing operations. During that period, 75% of our total sales (by volume) were to U.S. electricity generators, 23% were to customers outside the U.S. and 2% were to the U.S. industrial sector, with approximately 83% of our worldwide sales (by volume) delivered under long-term contracts.

We conduct business through six operating segments: Australian Metallurgical Mining, Australian Thermal Mining, Midwestern U.S. Mining, Powder River Basin Mining, Western U.S. Mining and Trading and Brokerage. Refer to Note 20. "Segment Information" to the accompanying unaudited condensed consolidated financial statements for further information surrounding those segments and the components of our Corporate and Other segment.

Results of Operations

Reverse Stock Split

Pursuant to the authorization provided at a special meeting of our stockholders held on September 16, 2015, we completed a 1-for-15 reverse stock split of the shares of our common stock on September 30, 2015 (the Reverse Stock Split). As a result of the Reverse Stock Split, every 15 shares of issued and outstanding common stock were combined into one issued and outstanding share of Common Stock, without any change in the par value per share. Our common stock began trading on a reverse stock split-adjusted basis on the New York Stock Exchange on October 1, 2015. All share and per share data included in this report has been retroactively restated to reflect the Reverse Stock Split.

Non-U.S. GAAP Financial Measures

The following discussion of our results of operations includes references to and analysis of Adjusted EBITDA, Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS, which are financial measures not recognized in accordance with U.S. generally accepted accounting principles (GAAP). These financial measures are not intended to serve as alternatives to U.S. GAAP measures of performance and may not be comparable to similarly-titled measures presented by other companies.

Adjusted EBITDA is defined as (loss) income from continuing operations before deducting net interest expense (including gains and losses on early debt extinguishment or modification); income taxes; asset retirement obligation expenses; depreciation, depletion and amortization; asset impairment and mine closure costs; charges for the settlement of claims and litigation related to previously divested operations and changes in deferred tax asset valuation allowance and amortization of basis difference related to equity affiliates. Adjusted EBITDA is the primary metric used by management to measure our segments' operating performance and we believe it is useful to external users of our financial statements in comparing our current results with those of prior and future periods and in evaluating our operating performance without regard to our capital structure or the cost basis of our assets.

Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS are defined as (loss) income from continuing operations and diluted earnings per share from continuing operations (EPS), respectively, excluding the impacts of asset impairment and mine closure costs and charges for the settlement of claims and litigation related to previously divested operations, net of tax, and the remeasurement of foreign income tax accounts on our income tax provision. The income tax benefits related to asset impairment and mine closure costs and charges for the settlement of claims and litigation related to previously divested operations have been calculated based on the enacted tax rate in the jurisdiction in which they have been or will be realized, adjusted for the estimated recoverability of those benefits. We have included Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS in our discussion because, in the opinion of management, excluding those foregoing items is useful in comparing our current results with those of prior periods. We also believe that excluding the impact of the remeasurement of our foreign income tax accounts represents a meaningful indicator of our ongoing effective tax rate.

A reconciliation of Adjusted EBITDA to its most comparable measure under U.S. GAAP is included in Note 20.

"Segment Information" of the accompanying unaudited condensed consolidated financial statements. Adjusted (Loss)

Income from Continuing Operations and Adjusted Diluted EPS are reconciled to their most comparable measures under U.S. GAAP in the sections that follow.

Table of Contents

Three and Nine Months Ended September 30, 2015 Compared to the Three and Nine Months Ended September 30, 2014

Summary

Demand for seaborne metallurgical coal for the nine months ended September 30, 2015 was adversely impacted by a 2.4% decrease in worldwide steel production compared to the same period in the prior year, according to data recently published by the World Steel Association (WSA). Policy measures in China aimed toward supporting the domestic coal industry also limited imports into China during the period. Such measures, along with a lack of growth in global electricity generation from coal have also hampered demand for seaborne thermal coal thus far in 2015.

These adverse demand factors and the impact of excess supply have continued to weigh on international coal prices. Benchmark pricing for seaborne premium high quality hard coking coal (HQHCC), premium low volatile pulverized coal injections products (LV PCI) and thermal coal originating from Newcastle, Australia (NEWC) for the first, second, and third quarters of 2015 and 2014 were as follows (on a per tonne basis):

Contract Commencement	HQHCC		Price Decrease		LV PCI		Price Decrease		NEWC		Price Decrease	
Month:	2015	2014	%		2015	2014	%		2015	2014	%	
January	\$117	\$143	(18)%	\$99	\$116	(15)%	\$70	\$87	(20)%
April	\$110	\$120	(8)%	\$93	\$100	(7)%	\$68	\$82	(17)%
July	\$93	\$120	(23)%	\$73	\$100	(27)%	\$68	\$76	(11)%

In the U.S., electricity generation from coal decreased 6% and 12% during the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, according to the U.S. Energy Information Administration (EIA). U.S. electricity generation from coal was unfavorably affected during that period by coal-to-gas switching due to relatively lower natural gas prices and, for the nine-month period, lower heating-degree days due to mild winter weather. Production in the U.S. Powder River Basin was also impacted by higher-than-average rainfall in the second quarter of 2015, which further contributed, along with the above factors, to a decrease in sales volumes in our total U.S. mining platform of 5% and 6% for the three and nine months ended September 30, 2015, respectively, compared to the same periods in the prior year.

Our revenues decreased during the three and nine months ended September 30, 2015 compared to the same periods in 2014 (\$304.0 million and \$811.6 million, respectively) primarily due to lower realized pricing and lower sales volumes driven by the demand and production factors mentioned above.

To mitigate the impact of lower coal pricing, we have continued to drive operational efficiencies, optimize production across our mining platform and control expenses at all operational and administrative levels of the organization, which has led to year-over-year decreases in our operating costs and expenses (three months, \$199.3 million; nine months \$541.3 million) and selling and administrative expenses (three months, \$15.1 million; nine months \$42.8 million) in each current year period. Also included in operating results for the three and nine months ended September 30, 2015 are aggregate restructuring charges of \$1.8 million and \$23.0 million, respectively, recognized in connection with certain actions initiated to reduce headcount and costs at several operating sites in Australia and to amend our administrative organizational structure, which actions are expected to improve our cost position moving forward. Overall, Adjusted EBITDA of \$129.0 million and \$381.6 million for the three and nine months ended September 30, 2015, respectively, reflected year-over-year decreases of \$87.3 million and \$224.7 million, respectively. Net results attributable to common stockholders decreased for the three and nine months ended September 30, 2015 compared to the same periods in the prior year by \$154.1 million and \$1,254.2 million, respectively. In addition to lower Adjusted EBITDA, those results also reflected unfavorable results from discontinued operations and, for the year-to-date period, an adverse impact from asset impairment charges and debt extinguishment expenses related to the early refinancing of our 7.375% Senior Notes due 2016 (the 2016 Senior Notes). Those factors were partially offset by a favorable income tax variance and lower depreciation, depletion and amortization.

As mentioned above, we recognized material impairments during the nine months ended September 30, 2015 (\$900.8 million). Additional information surrounding those charges may be found in Note 3. "Asset Impairment" to the unaudited condensed consolidated financial statements as of September 30, 2015.

As of September 30, 2015, our available liquidity was approximately \$1.8 billion, a decrease from December 31, 2014. Refer to the "Liquidity and Capital Resources" section contained within this Item 2 for a further discussion of factors affecting our available liquidity.

Table of Contents

Tons Sold

The following table presents tons sold by operating segment:

	Three Months Ended September 30, 2015 2014 (Tons in millions)		Decrease to Volumes Tons %			Nine Months Ended September 30, 2015 2014 (Tons in millions)		Decrease to Volumes Tons %		
Australian Metallurgical Mining	4.0	4.5	(0.5) (11)%	11.7	12.4	(0.7) (6)%
Australian Thermal Mining	5.3	5.5	(0.2) (4)%	15.0	15.5	(0.5) (3)%
Powder River Basin Mining	35.5	35.5	—	—	%	103.1	105.3	(2.2) (2)%

Revenues

The following table presents revenues by operating segment:

	Three Months Ended September 30, 2015 2014 (Dollars in millions)		Increase (Decrease) to Revenues \$ %			Nine Months Ended September 30, 2015 2014 (Dollars in millions)		Decrease to Revenues \$ %		
Australian Metallurgical Mining	\$280.4	\$398.7	\$(118.3) (30)%	\$924.6	\$1,189.1	\$(264.5) (22)%
Australian Thermal Mining	205.3	277.6	(72.3) (26)%	615.2	806.4	(191.2) (24)%
Powder River Basin Mining	475.0	472.1	2.9	1	%	1,393.9	1,438.1	(44.2) (3)%
Western U.S. Mining	177.3	239.0	(61.7) (26)%	526.9	681.6	(154.7) (23)%
Midwestern U.S. Mining	249.4	312.9	(63.5) (20)%	768.2	920.5	(152.3) (17)%
Trading and Brokerage	24.5	15.0	9.5	63	%	42.7	46.3	(3.6) (8)%
Corporate and Other	7.0	7.6	(0.6) (8)%	24.6	25.7	(1.1) (4)%
Total revenues	\$1,418.9	\$1,722.9	\$(304.0) (18)%	\$4,296.1	\$5,107.7	\$(811.6) (16)%

Australian Metallurgical Mining. Revenues from our Australian Metallurgical Mining segment decreased during the three and nine months ended September 30, 2015 compared to the same periods in the prior year due to lower realized coal prices (three months, \$77.6 million; nine months, \$188.9 million) and an unfavorable volume and mix variance (three months, \$40.7 million; nine months, \$75.6 million). The volume decrease reflected (1) lower sales volumes from our Burton Mine due to an amended agreement with the contract miner reached in the second half of 2014 that provided for reduced production from the site, (2) the exhaustion of reserves at our Eaglefield Mine in the fourth quarter of 2014.

Australian Thermal Mining. The decline in revenues from our Australian Thermal Mining segment during the three and nine months ended September 30, 2015 compared to the same periods in the prior year was also driven by lower realized coal prices (three months, \$42.1 million; nine months, \$133.9 million) and an unfavorable volume and mix variance (three months, \$30.2 million; nine months, \$57.3 million). The decrease in tons sold reflected the unfavorable production impact of weather-related adverse mining conditions and, for the year-to-date period, mine

sequencing at our surface operations.

52

Table of Contents

Powder River Basin Mining. Powder River Basin Mining segment revenues increased slightly for the three months ended September 30, 2015 and decreased for the nine months then ended compared to the same periods in the prior year. The decrease for the year-to-date period mainly reflected lower volumes due to weather-related adverse mining conditions experienced in the second quarter of 2015 that limited production capabilities in the region.

Western U.S. Mining. Revenues from our Western U.S. Mining segment decreased during the three and nine months ended September 30, 2015 compared to the same periods in the prior year due to an unfavorable volume and mix variance (three months, \$62.1 million; nine months, \$169.4 million) primarily due to (1) lower market demand and a lack of export opportunities at current coal pricing, (2) a planned longwall move completed in the third quarter of 2015 at our Twentymile Mine and (3) for the year-to-date period, higher equipment downtimes for a planned upgrade. The effect of lower volumes was partially offset by higher coal pricing (three months, \$0.4 million; nine months, \$14.7 million) on improved customer mix.

Midwestern U.S. Mining. Segment revenues were adversely impacted during the three and nine months ended September 30, 2015 compared to the same periods in the prior year by an unfavorable volume and mix variance (three months, \$52.5 million; nine months, \$119.9 million) driven by soft market demand across the region and the exhaustion of reserves at our Viking-Corning Pit Mine in the prior year. Revenues for the segment were also impacted by lower pricing (three months, \$11.0 million; nine months \$32.4 million) due to the effect of contract price re-openers and the renewal of sales contracts at less favorable prices.

Trading and Brokerage. Trading and Brokerage segment revenues increased for the three months ended September 30, 2015 and decreased for the nine months ended September 30, 2015 compared to the same periods in the prior year. Those changes reflected lower physical volumes shipped due to the opportunity-limiting impact of depressed coal market pricing, offset, in whole or in part, by improved mark-to-market earnings from financial contract trading.

Segment Adjusted EBITDA

The following table presents Segment Adjusted EBITDA by operating segment:

	Three Months Ended		Increase (Decrease)			Nine Months Ended		Increase (Decrease)		
	September 30, 2015	2014	\$	%		September 30, 2015	2014	\$	%	
	(Dollars in millions)					(Dollars in millions)				
Australian Metallurgical Mining	\$(15.4)	\$(50.9)	\$35.5	70	%	\$(2.2)	\$(168.8)	\$166.6	99	%
Australian Thermal Mining	49.4	60.3	(10.9)	(18)%	153.9	204.5	(50.6)	(25)%
Powder River Basin Mining	120.0	114.5	5.5	5	%	354.7	382.3	(27.6)	(7)%
Western U.S. Mining	45.7	80.8	(35.1)	(43)%	147.7	209.8	(62.1)	(30)%
Midwestern U.S. Mining	72.3	87.0	(14.7)	(17)%	218.6	236.4	(17.8)	(8)%
Trading and Brokerage	29.4	3.3	26.1	791	%	30.4	7.7	22.7	295	%
Segment Adjusted EBITDA	\$301.4	\$295.0	\$6.4	2	%	\$903.1	\$871.9	\$31.2	4	%

Australian Metallurgical Mining. The improvement in Australian Metallurgical Mining segment Adjusted EBITDA during the three and nine months ended September 30, 2015 compared to the same periods in 2014 reflected (1) the impact of exchange rate movements (three months, \$81.3 million; nine months, \$178.9 million), (2) favorable cost performance from our surface mining operations driven by an amended agreement with the contract miner at the Burton Mine reached in the second half of 2014 and the owner-operator conversion of our Moorvale Mine completed at the end of the third quarter of 2014 (three months, \$26.8 million; nine months, \$60.5 million), (3) lower diesel fuel prices (three months, \$15.0 million; nine months, \$42.7 million) and (4) for the year-to-date period, improved longwall performance from our underground mines driven by longwall top coal caving technology issues experienced

at our North Goonyella Mine in the prior year (\$55.5 million). The above factors were partially offset by lower coal pricing, net of sales-related costs (three months, \$72.0 million; nine months, \$176.1 million).

Table of Contents

Australian Thermal Mining. The decrease in Australian Thermal Mining segment Adjusted EBITDA during the three and nine months ended September 30, 2015 compared to the the same periods in the prior year reflected lower coal pricing, net of sales-related costs (three months, \$38.6 million; nine months, \$122.9 million) and lower surface mine yields mainly due to mine sequencing at our Wilpinjong Mine (three months, \$35.8 million; nine months, \$61.2 million). Those adverse factors were partially offset by the net impact of exchange rate movements (three months, \$47.2 million; nine months, \$99.8 million) and improved underground mine efficiency driven by a longwall move completed at the end of the third quarter of 2014 (three months, \$17.8 million; nine months, \$22.1 million).

Powder River Basin Mining. Powder River Basin Mining segment Adjusted EBITDA increased during the three months ended September 30, 2015 and decreased for the nine months ended September 30, 2015 compared to the same periods in the prior year. Segment results for both periods benefited from lower pricing for commodities used in production (three months, \$16.0 million; nine months, \$42.3M). That benefit was offset, in part or in whole, by unfavorable productivity variances driven by weather-related effects on volumes and mine sequencing (three months, \$8.1 million; nine months, \$18.3 million) and for the year-to-date period, lower volumes (\$35.0 million).

Western U.S. Mining. The decrease in Western U.S. Mining segment Adjusted EBITDA during the three and nine months ended September 30, 2015 compared to the same periods in the prior year reflected lower volumes (three months, \$33.6 million; nine months, \$85.0 million). That factor was partially offset by lower diesel fuel prices (three months, \$3.9 million; nine months, \$10.9 million) and higher realized pricing.

Midwestern U.S. Mining. The decrease in Midwestern U.S. Mining segment Adjusted EBITDA for the three and nine months ended September 30, 2015 compared to the same periods in the prior year was driven by lower volumes (three months \$30.1 million; nine months, \$42.4 million) and lower pricing, net of sales related costs (three months, \$10.7 million; nine months, \$29.1 million). Those factors were partially offset by lower diesel fuel pricing (three months, \$9.5 million; nine months, \$32.2 million) and lower expenditures for repair and maintenance expenditures.

Trading and Brokerage. Trading and Brokerage segment Adjusted EBITDA increased year-over-year during the three and nine months ended September 30, 2015 compared to the same periods in 2014. Those favorable variances reflected the impact of damages awarded in the first quarter of 2014 relating to the Eagle Mining, LLC (Eagle) arbitration and the settlement of the matter reached in the third quarter of 2015, in addition to improved mark-to-market earnings on financial contract trading. Refer to Note 18. "Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements for additional information related to the Eagle matter.

Table of Contents

Loss From Continuing Operations Before Income Taxes

The following table presents loss from continuing operations before income taxes:

	Three Months Ended		Increase (Decrease)			Nine Months Ended		Increase (Decrease)		
	September 30, 2015	2014	\$	%		September 30, 2015	2014	\$	%	
	(Dollars in millions)					(Dollars in millions)				
Segment Adjusted EBITDA	\$301.4	\$295.0	\$6.4	2	%	\$903.1	\$871.9	\$31.2	4	%
Corporate and Other Adjusted EBITDA	(172.4)	(78.7)	(93.7)	(119)	%	(521.5)	(265.6)	(255.9)	(96)	%
Subtotal - Adjusted EBITDA	129.0	216.3	(87.3)	(40)	%	381.6	606.3	(224.7)	(37)	%
Depreciation, depletion and amortization	(136.0)	(163.6)	27.6	17	%	(430.6)	(483.9)	53.3	11	%
Asset retirement obligation expenses	(12.3)	(15.0)	2.7	18	%	(40.4)	(46.5)	6.1	13	%
Asset impairment	—	—	—	n.m.		(900.8)	—	(900.8)	n.m.	
Amortization of basis difference related to equity affiliates	(0.7)	(1.5)	0.8	53	%	(4.2)	(4.0)	(0.2)	(5)	%
Change in deferred tax asset valuation allowance related to equity affiliates	(0.4)	—	(0.4)	n.m.		0.4	—	0.4	n.m.	
Interest expense	(118.5)	(114.5)	(4.0)	(3)	%	(344.0)	(321.4)	(22.6)	(7)	%
Loss on early debt extinguishment	—	—	—	n.m.		(67.8)	(1.6)	(66.2)	(4,138)	%
Interest income	1.4	3.7	(2.3)	(62)	%	6.6	11.7	(5.1)	(44)	%
Loss from continuing operations before income taxes	\$(137.5)	\$(74.6)	\$(62.9)	(84)	%	\$(1,399.2)	\$(239.4)	\$(1,159.8)	(484)	%

Results from continuing operations before income taxes declined for the three and nine months ended September 30, 2015 compared to the same periods in the prior year primarily due to an unfavorable change in Corporate and Other Adjusted EBITDA (see below for details) and, for the year-to-date period, asset impairment, restructuring and debt extinguishment charges recorded in the first half of 2015. Those factors were partially offset by lower depreciation, depletion and amortization and improved Segment Adjusted EBITDA.

Table of Contents

Corporate and Other Adjusted EBITDA. The following table presents a summary of Corporate and Other Adjusted EBITDA results during the three and nine months ended September 30, 2015 and 2014:

	Three Months Ended September 30,		Increase (Decrease) to Income			Nine Months Ended September 30,		Increase (Decrease) to Income		
	2015	2014	\$	%		2015	2014	\$	%	
	(Dollars in millions)					(Dollars in millions)				
Resource management activities ⁽¹⁾	\$6.2	\$3.5	\$2.7	77	%	\$17.3	\$14.7	\$2.6	18	%
Selling and administrative expenses	(37.8)	(52.9)	15.1	29	%	(128.8)	(171.6)	42.8	25	%
Restructuring charges	(1.8)	—	(1.8)	n.m.		(23.0)	—	(23.0)	n.m.	
Corporate hedging	(116.9)	6.8	(123.7)	(1,819)	%	(326.6)	(7.2)	(319.4)	(4,436)	%
Other items, net ⁽²⁾	(22.1)	(36.1)	14.0	39	%	(60.4)	(101.5)	41.1	40	%
Corporate and Other Adjusted EBITDA	\$(172.4)	\$(78.7)	\$(93.7)	(119)	%	\$(521.5)	\$(265.6)	\$(255.9)	(96)	%

⁽¹⁾ Includes gains on certain surplus coal reserve and surface land sales and property management costs and revenues.

⁽²⁾ Includes results from equity affiliates (before the impact of related changes in deferred tax asset valuation allowance and amortization of basis difference), costs associated with past mining activities, certain coal royalty expenses, gains (losses) on certain asset disposals, minimum charges on certain transportation-related contracts and expenses related to our other commercial activities.

Resource management earnings increased during the three and nine months ended September 30, 2015 compared to the same periods in the prior year due to higher gains from the disposal of assets, mainly from the sale of surplus lands in the Midwestern U.S. The improvement in selling and administrative expenses during the three and nine months ended September 30, 2015 compared to the same periods in the prior year largely reflected the impact of our ongoing cost containment programs, including past restructuring activities. The restructuring charges recognized in 2015 were driven by the elimination of corporate and regional staff positions in the U.S. and workforce reductions at multiple mines in Australia during the period. The unfavorable variance associated with corporate hedging results, which includes foreign currency and commodity hedging, resulted from the year-over-year weakening of the Australian dollar and decrease in fuel prices. The improvement in "Other items, net" during the three and nine months ended September 30, 2015 compared to 2014 reflected improved Middlemount results, as lower foreign currency rates and operational improvements at the mine more than offset by the effect of lower coal pricing.

Depreciation, Depletion and Amortization. The following table presents a summary of depreciation, depletion and amortization expense by segment:

	Three Months Ended September 30,		Increase to Income			Nine Months Ended September 30,		Increase (Decrease) to Income		
	2015	2014	\$	%		2015	2014	\$	%	
	(Dollars in millions)					(Dollars in millions)

Table of Contents

Additionally, the following table presents a summary of our weighted-average depletion rate per ton for active mines in each of our mining segments:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Australian Metallurgical Mining	\$4.10	\$4.60	\$5.19	\$4.78
Australian Thermal Mining	2.69	2.86	2.58	3.07
Powder River Basin Mining	0.69	0.69	0.69	0.70
Western U.S. Mining	0.95	0.96	0.93	0.95
Midwestern U.S. Mining	0.49	0.46	0.46	0.47

The decrease in depreciation, depletion and amortization expense during the three and nine months ended September 30, 2015 compared to the same periods in the prior year reflected lower sales volumes from our mining platform. Depreciation, depletion and amortization was also impacted compared to the prior year by a reduction in the asset base at three of the mines in our Australian Metallurgical Mining segment due to further impairment charges recognized in the second quarter of 2015 and the fourth quarter of 2014 and the cessation of mining at our Eaglefield Mine in the fourth quarter of 2014 due to the exhaustion of reserves at the site.

Asset Impairment. Refer to Note 3. "Asset Impairment" in the accompanying unaudited condensed consolidated financial statements for information surrounding the impairment charges recorded in the second quarter of 2015.

Interest Expense. The increase in interest expense for the three and nine months ended September 30, 2015 compared to the same periods in the prior year reflected higher interest rates, as compared with previously outstanding debt, related to the \$1.0 billion aggregate principal amount of 10.00% Senior Secured Second Lien Notes due March 2022 (the Senior Secured Second Lien Notes) issued in March 2015 and higher overall debt levels. Those factors were partially offset by lower interest charges recognized in the 2015 periods for litigation matters (three months, \$11.2 million; nine months, \$10.7 million) primarily due to charges recorded in the third quarter of the prior year related to the Sumiseki Materials Co. Ltd. (Sumiseki) litigation. Refer to Note 18. "Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements for additional information related to the Sumiseki matter.

Loss on Early Debt Extinguishment. The loss on early debt extinguishment charges recorded during the nine months ended September 30, 2015 related to the repurchase of our 2016 Senior Notes during that period.

Loss from Continuing Operations, Net of Income Taxes

The following table presents loss from continuing operations, net of income taxes:

	Three Months Ended September 30,		Increase (Decrease) to Income		Nine Months Ended September 30,		Increase (Decrease) to Income	
	2015	2014	\$	%	2015	2014	\$	%
	(Dollars in millions)				(Dollars in millions)			
Loss from continuing operations before income taxes	\$(137.5)	\$(74.6)	\$(62.9)	(84)%	\$(1,399.2)	\$(239.4)	\$(1,159.8)	(484)%
Income tax provision (benefit)	6.9	79.4	72.5	91%	(83.2)	30.9	114.1	369%
Loss from continuing operations, net of income taxes	\$(144.4)	\$(154.0)	\$9.6	6%	\$(1,316.0)	\$(270.3)	\$(1,045.7)	(387)%

Results from continuing operations, net of income taxes, increased for the three months ended September 30, 2015, and decreased for the nine months then ended compared to the same periods in the prior year primarily due to lower before-tax earnings, which were offset, in whole or in part, by the favorable effect of income taxes.

Table of Contents

Income Tax (Benefit) Provision. The favorable variance related to income taxes was driven by the tax effect of lower earnings, the write-off of a net deferred tax asset in the prior year due to the third quarter 2014 repeal of the Australian Minerals and Resource Rent Tax and, for the nine-month period, an income tax benefit related to asset impairments taken in the second quarter of 2015. The favorable factors above were partially offset by a discrete item recognized in the third quarter of 2015 from the resolution of a tax audit. Refer to Note 11. "Income Taxes" in the accompanying unaudited condensed consolidated financial statements for additional information.

Adjusted Loss From Continuing Operations

The following table presents Adjusted Loss from Continuing Operations:

	Three Months Ended September 30, 2015 2014		Increase (Decrease) to Adjusted Income \$ %		Nine Months Ended September 30, 2015 2014		Decrease to Adjusted Income \$ %		
	(Dollars in millions)				(Dollars in millions)				
Loss from continuing operations, net of income taxes	\$(144.4)	\$(154.0)	\$9.6	6 %	\$(1,316.0)	\$(270.3)	\$(1,045.7)	(387)	%
Asset impairment	—	—	\$—	n.m.	900.8	—	\$900.8	n.m.	
Income tax benefit related to asset impairment	—	—	\$—	n.m.	(67.4)	—	\$(67.4)	n.m.	
Remeasurement benefit related to foreign income tax accounts	(0.8)	(1.2)	\$0.4	33 %	(1.0)	(3.9)	\$2.9	74 %	
Adjusted Loss from Continuing Operations	\$(145.2)	\$(155.2)	\$10.0	6 %	\$(483.6)	\$(274.2)	\$(209.4)	(76)	%

Adjusted Loss from Continuing Operations changed favorably for the three months ended September 30, 2015 and unfavorably for the nine months ended compared to the same periods in the prior year. The change in results reflected lower Adjusted EBITDA and, for the year-to-date period, restructuring and debt extinguishment charges recorded in the first half of 2015. Those factors were offset, in whole or in part, by a favorable income tax variance and lower depreciation, depletion and amortization, each factor as discussed above.

Net Loss Attributable to Common Stockholders

The following table presents net loss attributable to common stockholders:

	Three Months Ended September 30, 2015 2014		Increase (Decrease) to Income \$ %		Nine Months Ended September 30, 2015 2014		Decrease to Income \$ %		
	(Dollars in millions)				(Dollars in millions)				
Loss from continuing operations, net of income taxes	\$(144.4)	\$(154.0)	\$9.6	6 %	\$(1,316.0)	\$(270.3)	\$(1,045.7)	(387)	%
(Loss) income from discontinued operations, net of income taxes	(157.5)	5.0	(162.5)	(3,250)%	(202.7)	6.0	(208.7)	(3,478)	%
Net loss	(301.9)	(149.0)	(152.9)	(103)%	(1,518.7)	(264.3)	(1,254.4)	(475)	%
Less: Net income attributable to noncontrolling interests	2.8	1.6	(1.2)	(75)%	7.9	8.1	(0.2)	(2)	%
	\$(304.7)	\$(150.6)	\$(154.1)	(102)%	\$(1,526.6)	\$(272.4)	\$(1,254.2)	(460)	%

Net loss attributable
to common
stockholders

58

Table of Contents

Net results attributable to common stockholders increased slightly for the three months ended September 30, 2015 and decreased for the nine months then ended compared to the same periods in the prior year, which reflected the trend in results from continuing operations for each period, in addition to the unfavorable impact of results from discontinued operations.

(Loss) Income from Discontinued Operations, Net of Income Taxes. The unfavorable change in results from discontinued operations for the three and nine months ended September 30, 2015 compared to the same periods in the prior year was driven by Patriot bankruptcy related charges associated with black lung liabilities and the UMWA Combined Benefit Fund totaling \$155.1 million, an after-tax net gain of \$3.2 million recognized in the third quarter of 2014 related to the termination of a sale and purchase agreement with a potential buyer of our Wilkie Creek Mine due to the inability of that buyer to meet the necessary conditions for closing. Results for the nine-month period also reflected a \$34.7 million charge recorded in the second quarter of 2015 related to credit support that we provide to Patriot and a contingent loss accrual of \$7.6 million recognized in the first quarter of 2015 associated with the Queensland Bulk Handling Pty Ltd. litigation. Those matters are discussed further in Note 19. "Matters Related to the Patriot Bankruptcy" and Note 18. "Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements.

Diluted EPS

The following table presents diluted EPS:

	Three Months Ended September 30,		Increase (Decrease) to EPS		Nine Months Ended September 30,		Decrease to EPS	
	2015	2014	\$	%	2015	2014	\$	%
Diluted EPS attributable to common stockholders:								
Loss from continuing operations	\$(8.08)	\$(8.72)	\$0.64	7 %	\$(73.05)	\$(15.62)	\$(57.43)	(368)%
(Loss) income from discontinued operations	(8.65)	0.28	(8.93)	(3,189)%	(11.18)	0.33	(11.51)	(3,488)%
Net Loss	\$(16.73)	\$(8.44)	\$(8.29)	(98)%	\$(84.23)	\$(15.29)	\$(68.94)	(451)%

Diluted EPS results changed favorably for the three months ended September 30, 2015 and unfavorably for the nine months then ended compared to the same periods in the prior year, commensurate with the changes in results from continuing operations and discontinued operations during those periods.

Adjusted Diluted EPS

The following table presents Adjusted Diluted EPS. Please note that the per share amounts for the prior periods presented below have been retroactively restated to reflect the Reverse Stock Split:

	Three Months Ended September 30,		Increase to EPS		Nine Months Ended September 30,		Decrease to Adjusted EPS	
	2015	2014	\$	%	2015	2014	\$	%
Adjusted Diluted EPS Reconciliation:								
Loss from continuing operations	\$(8.08)	\$(8.72)	\$0.64	7 %	\$(73.05)	\$(15.62)	\$(57.43)	(368)%
Asset impairment, net of income taxes	—	—	—	n.m.	45.98	—	45.98	n.m.
Remeasurement benefit related to foreign income tax accounts	(0.05)	(0.06)	0.01	17 %	(0.05)	(0.22)	0.17	77 %
Adjusted Diluted EPS	\$(8.13)	\$(8.78)	\$0.65	7 %	\$(27.12)	\$(15.84)	\$(11.28)	(71)%

Adjusted Diluted EPS increased for the three months ended September 30, 2015 and decreased for the nine months then ended compared to the same periods in the prior year commensurate with the adverse change in Adjusted Loss from Continuing Operations during the nine-month period.

Table of Contents

Outlook

Our near-term outlook is intended to coincide with the next 12 to 24 months, with subsequent periods addressed in our long-term outlook.

Near-Term Outlook

Slowing global economic growth, declining steel consumption and economic weakness in China have resulted in a reduction in global coal demand that has more than offsets recent supply reductions and resulted in lower seaborne coal prices. In the U.S., while the decline in natural gas prices has impacted coal demand and prices, we believe that the Powder River Basin is positioned to remain competitive in the current low natural gas price environment due to the relative lower delivered cost to customers.

Global Macroeconomic Indicators. The International Monetary Fund (IMF) revised its global economic growth estimates lower in its October 2015 World Economic Outlook due to continued global growth decline in the first half of 2015, reflecting a further slowdown in emerging markets and a weaker recovery in advanced economies. The IMF notes that the persistently modest pace of recovery in advanced economies and the fifth consecutive year of growth declines in emerging markets are due to both medium-term and long-term factors. These include low productivity growth, high public and private debt, financial sector weakness, low investment, demographic transitions, ongoing adjustment in many emerging markets following the post-crisis credit and investment boom, a growth realignment in China - with important cross-border repercussions - and a downturn in commodity prices triggered by weaker demand as well as higher production capacity. Selected regional and worldwide projections of 2015 and 2016 macroeconomic growth, as measured by recent IMF forecasts of gross domestic product (GDP), are presented below:

Region:	GDP Growth (%)			
	2015		2016	
U.S.	2.6	%	2.8	%
China	6.8	%	6.3	%
India	7.3	%	7.5	%
Worldwide	3.1	%	3.6	%

Seaborne Thermal Coal Market Segments and Our Position. Seaborne thermal coal demand declined on lower Chinese imports primarily from reduced coal generation demand and an increase in hydroelectric generation. According to China Customs data, China's thermal coal imports declined 33 percent, or 59 million tonnes, to 120 million tonnes in the first nine months of 2015 on a year-over-year basis. Lower demand represents near-term risk for China imports and market fundamentals in the seaborne coal market segments in general. Such adverse factors were partly offset by higher thermal coal imports into India, which increased an estimated 18 million tonnes in the first nine months of 2015 on a year-over-year basis.

While Indonesian exports have declined through the first nine months of 2015, the 33 percent decline in Chinese imports and relatively flat year-over-year supply from other exporting countries have led to a seaborne thermal coal market that remains well-supplied, resulting in lower prices.

Seaborne Metallurgical Coal Market Segments and Our Position. The World Steel Association (WSA) reported that global steel production fell by 2.4 percent in the nine months ended September 30, 2015 on a year-over-year basis, primarily due to a slowdown in China's steel demand. In its October 2015 Short Range Outlook, the WSA forecasted year-over-year global steel demand will decrease by 1.7 percent in 2015, and show growth of 0.7 percent in 2016. Seaborne metallurgical coal prices for HQHCC and LV PCI settled at approximately \$89 and \$71 per tonne, respectively, for quarterly contracts commencing in October 2015, down from prior quarter price levels of \$93 per tonne and \$73 per tonne, respectively. Declining steel demand in China has led to an increase in steel and coke exports and a decline in metallurgical coal imports of 18% through the first nine months of 2015, which has impacted global prices. Seaborne pricing levels have led to a number of announced production cutbacks, and we expect current prices to place further pressure on seaborne suppliers.

Our total Australian coal sales for 2015 are targeted at 35 million to 36 million tons, including both metallurgical and thermal coal products supplied for export and within Australia.

Table of Contents

U.S. Thermal Coal Market Segments and Our Position. Thermal coal consumption for electricity generation was impacted by relatively low natural gas prices in the first nine months of 2015 as compared to the same period in the prior year. Due to lower natural gas prices, coal generation declined 12 percent, while natural gas generation rose 20 percent in the nine months ended September 30, 2015 on a year-over-year basis. We estimate that coal inventories for Powder River Basin customers were in the mid-70 days range on a day's-burn basis as of September 30, 2015.

In its October 2015 Short-Term Energy Outlook, the EIA projected that coal's share of U.S. electricity generation will fall to 35.0 percent in 2015 from 38.7 percent in 2014, while electricity generation from natural gas is expected to increase to 31.6 percent in 2015 from 27.4 percent in 2014 on lower average natural gas prices. Given our expectation of lower average natural gas prices in 2015, we project total U.S. utility coal consumption for electricity generation to decline by 100 million tons in 2015 compared to 2014.

We are targeting 2015 U.S. sales volumes at 175 million to 185 million tons, with these volumes fully priced as of September 30, 2015. 2016 U.S. production is approximately 15 percent unpriced based on assumed 2016 produced levels, which are expected to be modestly below 2015 targets. We anticipate that average realized pricing from our U.S. mining operations will decrease by 5 percent to 7 percent on a per-ton basis in 2015 compared to 2014 due to lower contract pricing, primarily in our Midwestern U.S. Mining segment, as well as a higher mix of comparatively lower-priced Powder River Basin volumes.

Operating Cost and Capital Update. In an effort to mitigate pressures from the challenging global coal industry environment, we remain focused on cost containment activities. We expect a decrease in our per-ton U.S. operating costs and expenses in 2015 compared to the prior year. We also expect 2015 operating costs and expenses in Australia to be lower than 2014 levels on a per-ton basis as additional projected savings from a weaker Australian dollar, lower diesel fuel prices, cost containment, improved longwall performance and reduced production from our contractor-operated Burton Mine more than offset the effects of inflationary pressures.

We also remain focused on efficiently controlling and allocating capital. We are now targeting 2015 capital spending levels of \$140 million to \$150 million, representing a decrease from our prior guidance of \$160 to \$170 million.

Regulatory Update

Mercury and Air Toxics Standards (MATS). On December 16, 2011, the Environmental Protection Agency (EPA) announced the MATS rule and published it in the Federal Register on February 16, 2012. The MATS rulemaking collectively revised the New Source Performance Standards (NSPS) for nitrogen oxides, sulfur dioxides and particulate matter for new and modified coal-fueled electricity generating plants, and imposed Maximum Achievable Control Technology (MACT) emission limits on hazardous air emissions from new and existing coal-fueled and oil-fueled electric generating plants. The rule provided three years for compliance and a possible fourth year as a state permitting agency may deem necessary. Some utilities have been moving forward with installation of equipment necessary to comply with MATS, and the EPA and states have been granting additional time beyond the 2015 deadline (but no more than one extra year) for facilities that needed more time to upgrade and complete those installations. The D.C. Circuit upheld the NSPS portion of the rulemaking in a unanimous decision on March 11, 2014, and upheld the limits on hazardous air emissions against all challenges on April 15, 2014, in a two-to-one decision. Industry groups and a number of states filed and were granted review of the D.C. Circuit decision in the U.S. Supreme Court. On June 29, 2015 the U.S. Supreme Court held that the EPA interpreted the Clean Air Act (CAA) unreasonably when it deemed cost irrelevant to the decision to regulate power plants. The Court reversed the D.C. Circuit Court and remanded the case for further proceedings.

Rules for Regulating Carbon Dioxide Emissions From Existing Fossil Fuel-Fired Electricity Utility Generating Units (EGUs) - The Clean Power Plan. On June 2, 2014, the EPA issued and later formally published for comment proposed rules for regulating carbon dioxide emissions from existing fossil fuel-fired EGUs under section 111(d) of the CAA. On August 3, 2015, the EPA announced the final rule. In the final rule, the EPA is establishing final emission guidelines for states to follow in developing plans to reduce greenhouse gas emissions from existing fossil fuel-fired EGUs. These final guidelines require that the states individually or collectively create systems that would reduce carbon emissions from any EGU located within their borders. Individual states are required to submit their proposed implementation plans to the EPA by September 6, 2016, unless an extension is approved, in which case the

states will have until September 6, 2018. The rule sets emission performance rates to be phased in over the period from 2022 through 2030. The rule is intended to reduced carbon dioxide emissions from the 2005 baseline by 28% in 2025 and 32% in 2030.

Legal challenges to the rule began when it was still a proposed rule. One action by an industry petitioner, joined by intervenors, including us, and another by a coalition of states led by West Virginia, asserted that the EPA does not have the authority to issue the regulations of existing power plants under section 111(d) of the CAA. The D.C. Circuit heard oral arguments on the challenges in April 2015. The petitions to enjoin the proposed rulemaking were denied as premature in

Table of Contents

June 2015. However, the D.C. Circuit court acknowledged that a legal challenge could be filed after the EPA issued a final rule. In September 2015 the D.C. Circuit Court refused to stay the rule, holding that it could not review the rule until it was published in the Federal Register which is occurred on October 23, 2015.

Since Federal Register publication on October 23, 2015, more than 16 separate petitions for review have been filed in the U.S. Court of Appeals for the D.C. Circuit challenging the final rule. The petitions reflect challenges by 27 states and governmental entities, as well as challenges by utilities, industry groups, trade associations, coal companies, and other entities. All together, the petitions include legal challenges by over 100 entities. The lawsuits have been consolidated into the case filed by West Virginia and Texas (in which other States have also joined). The time for filing further petitions will not expire until December 22, 2015. On October 29, 2015, we filed a motion to intervene in the case filed by West Virginia and Texas, in support of the petitioning States. Numerous States and cities have also sought to intervene in support of EPA.

Judicial Challenge to the EPA's Greenhouse Gas (GHG) Regulations. In litigation over the EPA's GHG emission standards for new motor vehicles, the U.S. Supreme Court's 2014 decision in *Utility Air Regulatory Group v. EPA* reversed in part and affirmed in part an earlier decision of the D.C. Circuit. Specifically, the Supreme Court held that the EPA exceeded its statutory authority when it interpreted the CAA to require Prevention of Significant Deterioration (PSD) and Title V permitting for stationary sources based on their potential GHG emissions. The Court noted, however, that the EPA permissibly determined that a source already subject to the PSD program because of its emission of conventional pollutants may be required to limit its GHG emissions by employing best available control technology. In April 2015, the D.C. Circuit ruled on a number of pending motions from industry groups, certain states, environmental groups and the EPA concerning the implementation of the Supreme Court's decision, vacating the portions of the EPA's rulemaking that were inconsistent with the Supreme Court's decision and ordering the EPA to take steps to revise the applicable CAA regulations as expeditiously as practicable in order to make them consistent with the Supreme Court's decision and the D.C. Circuit's order and to consider whether any further revisions to the regulations are appropriate in light of the decisions and order and, if so, to make them.

Cross State Air Pollution Rule (CSAPR). On July 6, 2011, the EPA finalized the CSAPR, which requires the District of Columbia and 27 states from Texas eastward (not including the New England states or Delaware) to significantly improve air quality by reducing power plant emissions that cross state lines and contribute to ozone and/or fine particle pollution in other states. Under the CSAPR, the first phase of the nitrogen oxide and sulfur dioxide emissions reductions was to commence in 2012 with further reductions effective in 2014. In October 2011, the EPA proposed amendments to the CSAPR to increase emission budgets in ten states, including Texas, and ease limits on market-based compliance options. While the CSAPR had an initial compliance deadline of January 1, 2012, the rule was challenged and, on December 30, 2011, the D.C. Circuit stayed the rule and advised that the EPA was expected to continue administering the Clean Air Interstate Rule until the pending challenges are resolved. The court vacated the CSAPR on August 21, 2012, in a two to one decision, concluding that the rule was beyond the EPA's statutory authority. The U.S. Supreme Court on April 29, 2014 reversed the D.C. Circuit and upheld the CSAPR, concluding generally that the EPA's development and promulgation of CSAPR was lawful, while acknowledging the possibility that under certain circumstances some states may have a basis to bring a particularized, as-applied challenge to the rule. In October 2014, the D.C. Circuit filed an order lifting its stay of CSAPR and addressing a number of preliminary motions regarding the implementation of the Supreme Court's remand. On remand, the D.C. Circuit court held on July 28, 2015 that certain of EPA's Phase II emission budgets were invalid because they required more emissions reductions than necessary to achieve the desired air pollutant reduction in the relevant downwind states. The court did not vacate the rule but required the EPA to reconsider the invalid emissions budgets.

Stream Protection Rule. On July 27, 2015, the Office of Surface Mining Reclamation and Enforcement issued its proposed Stream Protection Rule (SPR). The proposed rule would impact both surface and underground mining operations and would increase testing and monitoring requirements related to the quality or quantity of surface water and groundwater or the biological condition of streams. The SPR will also require the collection of increased pre-mining data about the site of the proposed mining operation and adjacent areas to establish a baseline for

evaluation of the impacts of mining and the effectiveness of reclamation associated with returning streams to pre-mining conditions. The SPR was issued as a result of the D.C. Circuit Court's decision in 2014 to vacate the then existing Stream Buffer Zone Rule. Peabody along with many other groups and operators have responded with to the proposed rule via the public comment process, which ended October 26, 2015.

Long-Term Outlook

While a well-supplied market and declining seaborne coal prices have tempered near-term expectations, our long-term outlook for international coal market segments is more positive based on anticipated growth in Asia. We project that new global coal-fueled generation, as well as industrialization and urbanization trends in China and India, will drive aggregate global thermal and metallurgical coal demand growth. Seaborne supply growth is expected to be constrained during that

Table of Contents

period due to limited capital investment in response to the current pricing environment. In the U.S., we expect natural gas prices to rise modestly over the next several years as export infrastructure is completed, on-shore demand rises and production growth is constrained due to the amount of natural gas production that is associated with oil and natural gas liquids pricing.

Our long-term plans also include advancing projects to expand our presence in Asia, some of which include sourcing third-party coal and partnerships to utilize our mining experience for joint mine development. We also continue to support clean coal technology development and Btu Conversion projects that are designed to expand the uses of coal.

The International Energy Agency (IEA) regularly makes projections about world coal demand based on various future scenarios for energy development. The scenarios used by the IEA as the bases for these projections vary by time and publication. Further details are available to the public directly from the IEA, including through the IEA's website: <http://www.iea.org/publications/scenariosandprojections/>. Information contained on or accessible through the IEA's website is not incorporated by reference into this Quarterly Report on Form 10-Q.

The "New Policies Scenario" is IEA's central scenario in its World Energy Outlook report (WEO). It incorporates policies and measures affecting energy markets that have already been adopted, as well as other relevant commitments and plans that have been announced by countries, including national pledges to reduce emissions and plans to phase-out fossil fuel subsidies, even if the measures to implement these commitments have yet to be identified or announced.

Different scenarios used by the IEA in its projections of energy demand have different implications for coal usage. Projected coal usage is highest in the "Current Policies Scenario" and lowest in the "450 Scenario." The Current Policies Scenario (previously called the "Reference Scenario") assumes no changes in policies from the mid-point of the year of publication, thus considering policies and measures that have already been formally enacted, but assuming that governments do not implement any commitments that have yet to be finalized by legislation and will not introduce any new policies affecting coal usage.

Finally, the 450 Scenario assumes implementation of a set of government policies consistent with a goal of limiting long-term increases in the average global temperature to two degrees Celsius, a limit determined by various governments and non-governmental organizations and recognized by nations of the world in the 2010 United Nations Climate Change Conference in Cancun, Mexico.

The Company has historically emphasized the Current Policies Scenario in its strategic planning processes and its investor communications. We believe that the Current Policies Scenario is the most appropriate for our investors to consider because we believe that it has proven to be the scenario that has yielded the most accurate projections of coal usage. Although the New Policies Scenario is the IEA's central scenario, the IEA does not endorse any particular scenario as being a more probable forecast than the others.

The IEA estimates in its WEO 2014, Current Policies Scenario, that worldwide primary energy demand will grow 50% (37% under the New Policies Scenario) between 2012 and 2040. Demand for coal during this time period is projected to rise 51% (15% under the New Policies Scenario)

Under its Current Policies Scenario, the IEA expects coal to retain its prominent presence as a fuel for the power sector worldwide. Coal's share of the power generation mix was 41% in 2012. By 2040, the IEA's Current Policies Scenario estimates that coal's fuel share of global power generation will be 40% as it continues to have the largest share of worldwide electric power production (31%, slightly less than the share attributable to hydro and renewables, under the New Policies Scenario). Under the Current Policies Scenario, the IEA also projects that global natural gas-fueled electricity generation will have a compound annual growth rate of 2.7% from 2012-2040 (2.2% annual

growth rate under the New Policies Scenario). The total amount of electricity generated from natural gas is expected to be approximately 40% below the total for coal (approximately 20% below the total for coal under the New Policies Scenario), even in 2040. Hydro and other renewables are projected to comprise a combined 25% of the 2040 fuel mix (33% under the New Policies Scenario) versus 21% in 2012. Electricity generation from nuclear power is expected to fall from 11% to 9% (while growing from 11% to 12% under the New Policies Scenario) between 2012 and 2040.

As noted above, projected coal usage is highest under the Current Policies Scenario. Future energy use consistent with the 450 Scenario would likely yield results materially lower than the projections noted above under the Current Policies Scenario or the New Policies Scenario.

Table of Contents

Enactment of laws or passage of regulations regarding emissions from the combustion of coal by the U.S., some of its states or other countries, or other actions to limit such emissions (including measures incorporated into the New Policies and 450 Scenarios discussed above), could result in electricity generators switching from coal to other fuel sources or in coal-fueled power plant closures. Further, policies limiting available financing for the development of new coal-fueled power plants could adversely impact global coal demand in the future. The potential financial impact on us of future laws, regulations or other policies will depend upon the degree to which any such laws, regulations or other policies force electricity generators to diminish their reliance on coal as a fuel source. That, in turn, will depend on a number of factors, including the specific requirements imposed by any such laws, regulations or other policies, the time periods over which those laws, regulations or other policies would be phased in, the state of commercial development and deployment of carbon capture and storage technologies and the alternative markets for coal.

From time to time, we attempt to analyze the potential impact on the Company of as-yet-unadopted, potential laws, regulations and policies. Such analyses require that we make significant assumptions as to the specific provisions of such potential laws, regulations and policies. These analyses sometimes show that certain potential laws, regulations and policies, if implemented in the manner assumed by the analyses, could result in material adverse impacts on our operations, financial condition or cash flow, in view of the significant uncertainty surrounding each of these potential laws, regulations and policies. We do not believe that such analyses reasonably predict the quantitative impact that future laws, regulations or other policies may have on our results of operations, financial condition or cash flows.

As noted above, on August 3, 2015, the EPA announced the final rules (which were published in the Federal Register on October 23, 2015) for regulating carbon dioxide emissions from existing fossil fuel-fired EGUs. This ruling is intended to begin reducing carbon dioxide emissions by 2022 and, by 2030, reach a reduction of 32% from 2005 baseline emissions. The EPA expects the rule to have a significant impact on demand for coal-fired electricity generation in the U.S. and, depending upon the implementation methods adopted by the various states, we believe the rule could have a material adverse effect on our results of operations, financial condition and cash flows in future periods.

Liquidity and Capital Resources

Capital Resources

Our primary sources of cash are proceeds from the sale of our coal production to customers and cash provided by our trading and brokerage activities. To a lesser extent, we also generate cash from the sale of assets, including coal reserves and surface lands, borrowings under our committed credit facilities and, from time to time, the issuance of securities.

Debt Modification, Issuance and Refinancing. Maintaining financial flexibility and adequate liquidity is one of our key areas of emphasis as we navigate through challenged global coal market conditions. In connection with such efforts, we entered into the Omnibus Amendment Agreement (the First Amendment) on February 5, 2015 related to our secured credit agreement dated September 24, 2013 (as amended, the 2013 Credit Facility). In addition to the pledge of certain collateral, among other things, the First Amendment:

- amended the financial maintenance covenants to provide greater financial flexibility by lowering the minimum interest coverage ratio and increasing the maximum net secured first lien leverage ratio for the term of the 2013 Credit Facility;

- amended the liens covenant to allow for second lien debt issuances, so long as we remain in compliance with the 2013 Credit Facility;

- amended certain other negative covenants to (1) reduce the annual cash dividend payments basket to a maximum of \$27.5 million (with carryforward permitted), (2) reduce the additional general restricted payments basket, which includes dividends, stock repurchases and certain investments, to a maximum of \$100.0 million (though we may also make restricted payments using another basket whose size is based on, among other things, positive earnings during the term of the agreement) and (3) further limit our ability to incur liens, incur debt and make investments; and
- provided for certain additional mandatory prepayments including with the net cash proceeds of certain asset sales, subject to customary reinvestment rights.

We paid aggregate modification costs of \$11.8 million related to the First Amendment during the nine months ended September 30, 2015, which will be amortized over the remaining term of the facility.

Table of Contents

Further, on March 16, 2015, we completed the offering of \$1.0 billion aggregate principal amount of our 10.00% Senior Secured Second Lien Notes due March 2022 (the Senior Secured Second Lien Notes). The Senior Secured Second Lien Notes are secured by a second-priority lien on all of the assets that secure the Company's obligations under the 2013 Credit Facility on a first-lien basis, subject to permitted liens and other limitations. Additional information surrounding the collateral securing the 2013 Credit Facility and the Senior Secured Second Lien Notes is included in Note 12. "Long-term Debt" to the accompanying unaudited condensed consolidated financial statements. The notes were issued at an issue price of 97.566% of principal amount, resulting in an original issue discount of \$24.3 million that will be amortized ratably through maturity. We also paid aggregate debt issuance costs of approximately \$16.9 million during the nine months ended September 30, 2015 related to the offering that will also be amortized over the life of the Senior Secured Second Lien Notes.

We used the net proceeds from the sale of the notes, in part, to fund (1) the March 2015 tender offer through which we repurchased \$566.9 million aggregate principal amount of the 2016 Senior Notes and (2) the April 2015 redemption of \$83.1 million aggregate principal amount of the 2016 Senior Notes that was not tendered in the tender offer. The remaining proceeds were intended for general corporate purposes, which may include the payment of federal coal lease expenditures.

In connection with the tender offer and redemption, we recognized an aggregate loss on debt extinguishment of \$67.8 million in the unaudited condensed consolidated statement of operations for the nine months ended September 30, 2015. That charge was comprised of tender offer and make-whole premiums paid of \$66.4 million and the write-off of associated unamortized debt issuance costs of \$1.4 million. As market conditions warrant, we may, from time to time, continue to repurchase our debt securities, in the open market, in privately negotiated transactions, by tender offer or otherwise, including pursuant to exchange offers for new debt securities.

Cash and Cash Equivalents. As of September 30, 2015, our cash balances totaled \$334.3 million, including approximately \$150 million held by U.S. entities, with the remaining balance held by foreign subsidiaries in accounts predominantly domiciled in the U.S. A significant majority of the cash held by our foreign subsidiaries is denominated in U.S. dollars. This cash is generally used to support non-U.S. liquidity needs, including capital and operating expenditures in Australia and the foreign operations of our Trading and Brokerage segment. We do not expect restrictions or potential taxes on the repatriation of amounts held by our foreign subsidiaries to have a material effect on our overall liquidity, financial condition or results of operations.

Proceeds from Asset Sales. During the nine months ended September 30, 2015, we generated \$39.6 million in proceeds from the disposal of assets, largely driven by the sale of surplus surface lands in the U.S. and Australia. We will continue to monitor our portfolio for opportunities to divest assets as a source of potential liquidity. We evaluate potential asset sales through several criteria including strategic fit, value consideration, potential growth and cash requirements. We are currently advancing multiple asset sale processes.

Liquidity. In addition to cash and cash equivalents, our liquidity includes the available balances from our \$1.65 billion revolving credit facility (the 2013 Revolver) under the 2013 Credit Facility and an accounts receivable securitization program. Our available liquidity was \$1.8 billion as of September 30, 2015, which was substantially comprised of \$1.4 billion available for borrowing under the 2013 Revolver (net of outstanding letters of credit of \$228.7 million), \$334.3 million in cash and cash equivalents and \$48.2 million of available capacity from our accounts receivable securitization program. As of November 5, 2015, our available liquidity declined to \$1.4 billion, which was substantially comprised of \$1.2 billion available for borrowing under the 2013 Revolver (net of outstanding letters of credit of \$419.8 million), \$167.4 million in cash and cash equivalents and \$17.5 million of available capacity from our accounts receivable securitization program. The decline since September 30, 2015 was primarily due to due to federal coal lease expenditures (\$188.3 million) and letters of credit posted in support of bank guarantees (\$78.9 million) and surety bonds (\$28.7 million).

Challenged coal market conditions and tender and make-whole premiums paid in connection with the extinguishment of our 2016 Senior Notes resulted in a cash outflow from operations for the nine months ended September 30, 2015. If market conditions do not improve, we may continue to experience cash outflows from operations in future quarters, which would adversely affect our liquidity. In order to mitigate the impact of adverse market conditions on our liquidity, we have implemented and may continue to pursue (1) operational improvements, (2) cost reductions at all

levels of the organization, (3) reductions in production volumes and capital spend and (4) asset sales, which may include additional surface lands in the U.S., surface lands and mining tenements in Australia or operating assets.

Table of Contents

We expect our cash on hand and other sources of available liquidity will be sufficient to meet our anticipated capital requirements during the remainder of 2015 and 2016. That expectation is predicated, in part, on the assumption that we will continue to have access to a substantial portion of our maximum borrowing capacity under the 2013 Revolver. Refer to Part I, Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2014, Part II, Item 1A. "Risk Factors" of this report and the "Long-term Debt Covenants" section below for a discussion of circumstances that could limit our access to such funds. Other factors that could adversely impact our liquidity include the following:

- If we are unable to maintain our current level of self bonding for any reason. This would cause us to seek replacement financial assurances through the commercial surety market, which would require us to provide collateral in the form of letters of credit;

If we are required to provide additional collateral to support our operations. During the third quarter of 2015, we were required to increase our total posted letters of credit by \$187.7 million to the issuing parties of certain of our surety bonds and bank guarantees, whereas we have not previously been required to do so, and we may be required to post additional collateral in the future to support such instruments or other operating requirements;

If we are unable to renew our accounts receivable securitization program at an appropriate capacity when it expires in April 2016; and

If we incur any additional liabilities or obligations as a result of the Patriot bankruptcy. The related matters are discussed further in Note 19. "Matters Related to the Patriot Bankruptcy" to the accompanying unaudited condensed consolidated financial statements.

Capital Requirements

Our primary uses of cash include the cash costs of coal production and sale, capital expenditures, coal reserve lease and royalty payments, debt service costs (including interest and principal), capital and operating lease payments, postretirement plans, take or pay obligations and past mining retirement obligations.

We had various bilateral credit and liquidity arrangements with banks, lenders and other counterparties that we used to support the ongoing requirements of our operations, where possible. In recent months, we were notified by several of such counterparties that our bilateral credit lines would not be renewed, which required us to post additional collateral in the form of letters of credit.

We continually monitor capital and financial market conditions to evaluate the availability of alternative financing sources, including our ability to offer and sell securities under our shelf registration statement. Our ability to obtain external financing and the cost of such financing is affected by our credit ratings, which are periodically reviewed by the three major credit rating agencies. In 2015, each of the three agencies downgraded our corporate credit rating. The credit downgrades were, in part, due to continued weakness in seaborne coal prices. We continue to believe, based on our financial condition and credit relationships, that we currently have the ability to access capital and financial markets, if needed. Nonetheless, recently the cost of accessing those markets has increased and we believe the extent to which they may be accessed has decreased. Any further adverse changes in our financial condition, liquidity or credit ratings, or additional uncertainty in capital and financial markets, could further negatively impact our ability to access such funds and, in turn, impair our ability to fund our capital requirements.

While we were not required to post additional collateral as a direct result of our credit downgrades for counterparties to any of our derivative contracts, we have experienced an unfavorable change in payment terms and willingness to transact from certain coal trading counterparties. Also, we were required to issue a letter of credit of \$65.0 million in the first quarter of 2015 (which has subsequently been reduced to \$58.7 million) due to the downgrades to the benefit of one of our customers for a pricing rebate agreed to in 2014 in connection with an arbitration process, which correspondingly reduced our available liquidity as of September 30, 2015.

Additions to Property, Plant, Equipment and Mine Development. We evaluate our capital project portfolio on an ongoing basis and believe we have the appropriate flexibility to adjust our growth capital spending as appropriate based on any material changes in our cash flows from operations and liquidity position.

Additions to property, plant, equipment and mine development during the nine months ended September 30, 2015 included expenditures associated with advancing the reserve development at the Gateway North Mine in the U.S., which replaces production from the existing Gateway Mine as its reserves are exhausted in the second half of 2015.

Table of Contents

For 2015, we are now targeting full year capital expenditures of \$140 million to \$150 million, reflecting a decrease from our 2014 spend of \$194.4 million and our previously disclosed 2015 targeted range of \$160 million to \$170 million. We expect to allocate approximately 75% of that target to maintaining the existing productive capacity of our global mining platform, with the remainder allotted to safety development and operational improvement projects. We continue to defer certain new and early-stage growth and development projects across our global platform to periods beyond 2015 and continue to evaluate the timing associated with those projects based on changes in global coal supply and demand and capital availability.

Federal Coal Lease Expenditures. During the nine months ended September 30, 2015, our cash used in investing activities included federal coal lease expenditures of \$89.8 million related to our Powder River Basin Mining segment operations. We anticipate that federal coal lease expenditures will total approximately \$280 million in 2015, with the remainder to be paid in the fourth quarter.

Total Indebtedness. Our total indebtedness as of September 30, 2015 and December 31, 2014 consisted of the following:

	September 30, 2015	December 31, 2014
	(Dollars in millions)	
2013 Term Loan Facility due September 2020	\$1,167.4	\$1,175.1
7.375% Senior Notes due November 2016	—	650.0
6.00% Senior Notes due November 2018	1,518.8	1,518.8
6.50% Senior Notes due September 2020	650.0	650.0
6.25% Senior Notes due November 2021	1,339.6	1,339.6
10.00% Senior Secured Second Lien Notes due March 2022	977.5	—
7.875% Senior Notes due November 2026	247.7	247.6
Convertible Junior Subordinated Debentures due December 2066	384.5	382.3
Capital lease obligations	15.7	22.2
Other	0.7	1.2
Total Debt	\$6,301.9	\$5,986.8

The carrying amounts of the 2013 Term Loan Facility due September 2020, the 10.00% Senior Secured Second Lien Notes due March 2022, the 7.875% Senior Notes due November 2026 and the Convertible Junior Subordinated Debentures due December 2066 (the Debentures) have been presented above net of the respective unamortized original issue discounts.

Long-term Debt Covenants. Certain of our long-term debt arrangements contain various administrative, reporting, legal and financial covenants. We are permitted to pay dividends, buy and sell assets and make redemptions or repurchases of capital stock, subject to restrictions imposed by the 2013 Credit Facility and the Senior Secured Second Lien Notes indenture. Our negative covenants also collectively limit our ability to pay dividends from the top-level Gibraltar holding company of our Australian operations to our domestic subsidiaries in an amount in excess of \$500 million per year. We were in compliance with our long-term debt covenants as of September 30, 2015.

The financial covenants included in our 2013 Credit Facility require us to maintain a maximum Consolidated Net Secured First Lien Leverage Ratio, as defined in the 2013 Credit Facility, and a minimum Consolidated Interest Coverage Ratio, as defined in the 2013 Credit Facility. More specifically, we are required to maintain, as of the end of any fiscal quarter, (1) a Consolidated Net Secured First Lien Leverage Ratio, which is the ratio of Consolidated Net Senior First Lien Secured Debt, as defined in the 2013 Credit Facility, to Consolidated EBITDA, as defined in such agreement, not to exceed 4.5 to 1.0 and (2) a Consolidated Interest Coverage Ratio, which is the ratio of Consolidated EBITDA to Consolidated Net Cash Interest Charges, as defined in the 2013 Credit Facility of at least 1.0 to 1.0, in each case calculated for the four prior consecutive quarters. Our Consolidated Net Secured First Lien Leverage Ratio was approximately 1.3 to 1.0 and our Consolidated Interest Coverage Ratio was approximately 1.6 to 1.0, in each case, as of September 30, 2015. Our ability to borrow on the 2013 Revolver under the 2013 Credit Facility is conditioned upon compliance with these covenants and our borrowing capacity under the 2013 Credit Facility may be less than the maximum borrowing capacity. The maximum borrowing capacity under the 2013 Credit Facility is

limited by our Consolidated Net Secured First Lien Leverage Ratio, as described above, such that any borrowings under the 2013 Revolver plus outstanding borrowings under the 2013 Term Loan Facility and any other senior secured first lien debt, less cash and cash equivalents, cannot exceed our Consolidated EBITDA, as defined in the 2013 Credit Facility, as of the end of any computation period by a ratio of more than 4.5 to 1.0.

Table of Contents

If our reported Adjusted EBITDA and other sources of earnings or adjustments used to calculate Consolidated EBITDA, fall below our Consolidated Net Cash Interest Charges during 2016, it is reasonably possible that our borrowing capacity may be substantially limited by, and we may not comply with, our financial ratio covenants. Other sources of earnings or adjustments to our reported Adjusted EBITDA provided for under our covenants may include, in certain instances, cash proceeds from asset monetization activities. We believe it is probable that we will be able to maintain compliance with our covenants during the remainder of 2015 and 2016; however, given the uncertainty surrounding future market conditions and asset sales, it is possible we will not be able to do so. If we experience or expect to experience a financial covenant breach, we could request an amendment to, or waiver of, the covenant from our revolving lenders.

We have a history of engaging with our lenders to proactively address ongoing covenant compliance and our liquidity and financial flexibility, as evidenced by the First Amendment discussed above. Nonetheless, we cannot guarantee that such endeavors, if necessary, would prove successful in the future. If we violate these covenants and are unable to obtain waivers from our lenders, our 2013 Credit Facility, our Senior Notes, our Senior Secured Second Lien Notes and our Debentures would be in default and the debt owing under such agreements could be accelerated. If our indebtedness is accelerated, we may not be able to repay our debt or borrow sufficient funds to refinance it. Even if we are able to obtain new financing, it may not be on commercially reasonable terms or on terms that are acceptable to us. If our debt is in default for any reason and we are unable to successfully restructure our debt, our business, financial condition and results of operations could be materially and adversely affected. Refer to Part I, Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2014 and Part II, Item 1A. "Risk Factors" of this report for a discussion of the risks associated with our indebtedness, liquidity and debt covenants.

Settlement Agreement with Patriot and the UMW. In connection with our settlement agreement with Patriot and the UMW, on behalf of itself, its represented Patriot employees and its represented Patriot retirees, that became effective in December 2013, we are required to provide total payments of \$310 million payable over four years through 2017 to partially fund the voluntary employee beneficiary association (VEBA) and settle all Patriot and UMW claims involving the Patriot bankruptcy. Those payments included an initial payment of \$90.0 million made in January 2014, comprised of \$70.0 million paid to Patriot and \$20.0 million paid to the VEBA, and a payment of \$75.0 million made in January 2015 to the VEBA. Subsequent payments will be made to the VEBA of \$75.0 million in 2016 and \$70.0 million in 2017.

As a result of Patriot's failure to reimburse us for the draws on the credit support that we provided under the 2013 Settlement Agreement, Patriot has materially breached the 2013 Settlement Agreement. We and the UMW disagree about the impact Patriot's breaches have on our future obligations under the 2013 Settlement Agreement, including the payment of the two remaining VEBA payments. Accordingly, on August 28, 2015, we sought to-reopen Patriot's first bankruptcy cases that were pending in the United States Bankruptcy Court for the Eastern District of Missouri (the "Missouri Bankruptcy Court") for the limited purpose of having the Missouri Bankruptcy Court decide this issue. On October 9, 2015, the Missouri Bankruptcy Court granted our motion and ordered us to file our declaratory judgment action within 30 days. On October 9, 2015, we filed in the Missouri Bankruptcy Court a declaratory judgment action against the UMW seeking a declaration that our obligations to make the final two VEBA payments are excused as a result of Patriot's breaches of the agreement (the "Missouri Declaratory Judgment Action"). Patriot's appeal of the Missouri Bankruptcy Court's order was dismissed on October 26, 2015.

On October 16, the UMW filed a motion to withdraw the reference with respect to the Missouri Declaratory Judgment Action to the United States District Court for the Eastern District of Missouri, with the stated intent of thereafter seeking a transfer of the case ultimately to the United States Bankruptcy Court for the Eastern District of Virginia (the "Virginia Bankruptcy Court") where Patriot's second bankruptcy cases are pending. On October 23, 2015, we filed an objection to this motion.

On October 19, 2015, Patriot and the UMW filed a declaratory judgment action in the Virginia Bankruptcy Court (the "Virginia Declaratory Judgment Action") against us and one of our subsidiaries seeking, among other things, a declaration that we must make the remaining two VEBA payments notwithstanding Patriot's breach of the 2013 Settlement Agreement. On November 3, 2015, Patriot and the UMW filed a motion for a preliminary and permanent injunction to prevent us from proceeding with the Missouri Declaratory Judgment Action (the "Injunction Motion").

On November 4, 2015, we filed a motion to dismiss the Virginia Declaratory Judgment Action for lack of subject matter jurisdiction or, in the alternative, to transfer it to the Missouri Bankruptcy Court; we intend to vigorously oppose the Injunction Motion.

Refer to Note 19. "Matters Related to the Patriot Bankruptcy" to the accompanying unaudited condensed consolidated financial statements for additional information surrounding our exposures to such matters, including the potential impact to our liquidity.

Table of Contents

Dividends. In connection with our ongoing efforts to manage our cash and preserve liquidity, our Board of Directors suspended our quarterly dividend beginning in the third quarter of 2015. Our Board of Directors will continue to evaluate the appropriate dividend rate over time. The declaration and payment of dividends in the future and the amount of those dividends will depend on our results of operations, financial condition, cash requirements, future prospects, any limitations imposed by our debt covenants and other factors that our Board of Directors may deem relevant to such evaluations.

There were no other material changes to our capital resources or capital requirements from the information provided in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014.

Contractual Obligations

Other than the matters outlined above, there were no other material changes to our contractual obligations from the information provided in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014.

Historical Cash Flows

The following table summarizes our cash flows for the nine months ended September 30, 2015 and 2014, as reported in the accompanying unaudited condensed consolidated financial statements:

	Nine Months Ended September 30,		Increase (Decrease) to Cash and Cash Equivalents		
	2015	2014	\$	%	
	(Dollars in millions)				
Net cash (used in) provided by operating activities	\$ (90.6) \$ 250.1	\$ (340.7) (136)%
Net cash used in investing activities	(146.3) (89.6) (56.7) 63	%
Net cash provided by (used in) in financing activities	273.2	(138.0) 411.2	298	%
Net change in cash and cash equivalents	36.3	22.5	13.8	61	%
Cash and cash equivalents at beginning of period	298.0	444.0	(146.0) (33)%
Cash and cash equivalents at end of period	\$ 334.3	\$ 466.5	\$ (132.2) (28)%

Operating Activities. The decrease in net cash provided by operating activities for the nine months ended September 30, 2015 compared to the same period in the prior year was driven by the following:

- The decline in results from operations, including \$66.4 million of tender premiums paid in connection with the repurchase of the 2016 Senior Notes;

- An unfavorable change in net cash flows associated with current assets and current liabilities (\$190.1 million, excluding the impact of payments to the VEBA discussed separately below) driven by the timing of disbursements and less favorable payment terms associated with our accounts payable and certain accrued liabilities, offset in part by lower inventory builds; partially mitigated by

- Lower aggregate payments to Patriot and the related VEBA made in connection with our 2013 settlement agreement with Patriot and the UMWA (\$15.0 million).

Investing Activities. The unfavorable change in cash results from investing activities for the nine months ended September 30, 2015 compared to the same period in the prior year was mainly due to:

- Lower proceeds from the disposal of assets driven by cash received from the first quarter 2014 sale of a non-strategic exploration tenement asset in Australia and certain sale-leaseback transactions completed in the prior year (\$112.9 million); partially offset by

- Lower current year capital spending as we continue to tightly control capital to preserve liquidity (\$38.9 million, including changes in accrued expenses related to capital expenditures); and

- Higher net proceeds from debt and equity security investment transactions (\$9.3 million) due mainly from the second quarter 2015 divestment of our prior holdings of Winsway Enterprises Holdings Limited marketable equity securities.

Table of Contents

Financing Activities. The increase in net cash provided by financing activities for the nine months ended September 30, 2015 compared to the same period in the prior year was reflective of:

- Proceeds from the issuance of our Senior Secured Second Lien Notes (\$975.7 million, net of original issue discount);
- Lower dividend payments due to a reduction in the quarterly dividend rate (\$67.8 million); and
- Consent fees paid in June 2014 in connection with the consent solicitation surrounding our Convertible Junior Subordinated Debentures due December 2066 (\$10.1 million); partially offset by
- The extinguishment of \$650.0 million aggregate principal amount of our 2016 Senior Notes using a portion of the proceeds from our Senior Secured Second Lien Notes; and
- The payment of an additional \$28.7 million of deferred financing costs related to the Senior Secured Second Lien Notes and the First Amendment.

Off-Balance Sheet Arrangements

In the normal course of business, we are a party to guarantees and financial instruments with off-balance-sheet risk, most of which are not reflected in the accompanying condensed consolidated balance sheets. As of November 9, 2015, we do not expect any material losses to result from these guarantees or off-balance-sheet instruments in excess of liabilities already provided for in the consolidated balance sheet as of September 30, 2015 related to credit support provided to Patriot. However, we could experience a decline in our liquidity as bank guarantees, surety bonds, letters of credit, or other obligations are required to be collateralized by cash or letters of credit.

Guarantees and Other Financial Instruments with Off-Balance Sheet Risk. See Note 17. "Financial Instruments, Guarantees with Off-Balance Sheet Risk and Other Guarantees" to our unaudited condensed consolidated financial statements for a discussion of our accounts receivable securitization program and guarantees and other financial instruments with off-balance sheet risk.

As previously noted, we have various bilateral credit and liquidity arrangements with banks, lenders and other counterparties that are generally provided on an uncommitted basis and are subject to be repriced, or the related capacity reduced or withdrawn, with limited or no notice by such counterparties. The cost and availability of such arrangements will depend, in part, on our credit profile. Earlier this year, we were notified by several of such counterparties that our bilateral credit lines would not be renewed, which may limit our ability to conduct our corporate hedging activities or to obtain sufficient bank guarantees required by our operations in Australia without posting additional collateral in the form of letters of credit. To the extent that our creditworthiness, as determined by such counterparties, deteriorates further, such credit arrangements may continue to become more costly and/or less available.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition, results of operations, liquidity and capital resources is based upon our financial statements, which have been prepared in accordance with U.S. GAAP. We are also required under U.S. GAAP to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. We evaluate our estimates on an ongoing basis. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Our critical accounting policies are discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2014. Our critical accounting policies remain unchanged at September 30, 2015.

Newly Adopted Accounting Standards and Accounting Standards Not Yet Implemented

See Note 2. "Newly Adopted Accounting Standards and Accounting Standards Not Yet Implemented" to our unaudited condensed consolidated financial statements for a discussion of newly adopted accounting standards.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We have historically utilized foreign currency forward contracts and options to hedge currency risk associated with anticipated Australian dollar expenditures. The accounting for these derivatives is discussed in Note 7. "Derivatives and Fair Value Measurements" to the accompanying unaudited condensed consolidated financial statements. We intend to allow a substantial portion of our positions to settle without adding further positions of a comparable notional amount, but we may, from time to time, continue to use forward contracts and options to hedge our foreign currency exchange rate risk. This does not materially change our exposure in operating costs and expenses to a change in the Australian dollar for 2015 compared to that which was discussed in Item 7A. "Quantitative and Qualitative Disclosures About Market Risk" of our Annual Report on Form 10-K for the year ended December 31, 2014, but it will change our exposure in future periods. For example, taking into consideration our foreign currency hedges in place and no additional hedges, our exposure in operating costs and expenses due to a \$0.05 change in the Australian dollar/U.S. dollar exchange rate is approximately \$50 million for 2016.

Other than the foregoing, there have been no material changes in market risk from the information provided in Item 7A. "Quantitative and Qualitative Disclosures About Market Risk" of our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures.

Our disclosure controls and procedures are designed to, among other things, provide reasonable assurance that material information, both financial and non-financial, and other information required under the securities laws to be disclosed is accumulated and communicated to senior management, including our principal executive and financial officers, on a timely basis. Our Chief Executive Officer and Chief Financial Officer have evaluated our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of September 30, 2015, and concluded that such controls and procedures are effective to provide reasonable assurance that the desired control objectives were achieved. Additionally, there have been no changes to our internal control over financial reporting during the most recent fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

See Note 18. "Commitments and Contingencies" and Note 19. "Matters Related to the Patriot Bankruptcy" to the unaudited condensed consolidated financial statements included in Part I, Item 1. "Financial Statements" of this report relating to certain legal proceedings, which information is incorporated by reference herein.

Item 1A. Risk Factors.

The risk factors set forth below are updates to certain risk factors previously disclosed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, filed with the SEC on February 25, 2015.

Table of Contents

Our financial performance could be adversely affected by our debt.

As of September 30, 2015, our total indebtedness was \$6.3 billion, and we had \$1.4 billion of available borrowing capacity under the revolving credit facility (as amended, the 2013 Revolver) under our secured credit agreement entered into in 2013 (as amended, the 2013 Credit Facility), net of outstanding letters of credit. The indentures governing our Convertible Junior Subordinated Debentures (the Debentures) and the 7.875%, 6.50%, 6.25% and 6.00% Senior Notes (collectively our Senior Notes) do not limit the amount of indebtedness or any guarantees of such indebtedness that we may issue, although certain of our debt instruments do contain such limitations, including the 2013 Credit Facility and the indenture governing our 10.00% Senior Secured Second Lien Notes (the Senior Secured Second Lien Notes). The degree to which we are leveraged could have important consequences, including, but not limited to:

- making it more difficult for us to pay interest and satisfy our debt obligations;
- increasing the costs of borrowing under our existing credit facilities or newly issued debt obligations;
- increasing our vulnerability to general adverse economic and industry conditions;
- requiring the dedication of a substantial portion of our cash flow from operations to the payment of principal and interest on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, business development or other general corporate requirements;
- limiting our ability to obtain additional financing to fund future working capital, capital expenditures, business development or other general corporate requirements;
- limiting our ability to obtain additional financing to refinance our indebtedness when it becomes due;
- making it more difficult to obtain bank guarantees, surety bonds, letters of credit or other financing, particularly during periods in which credit markets are weak;
- limiting our flexibility in planning for, or reacting to, changes in our business and in the coal industry;
- requiring us to provide credit support, or additional credit support, for our unsecured obligations;
- causing a decline in our credit ratings; and
- placing us at a competitive disadvantage compared to less leveraged competitors.

In addition, our debt agreements subject us to financial and other restrictive covenants. Failure by us to comply with these covenants could result in an event of default that, if not cured or waived, could have a material adverse effect on us and result in amounts outstanding thereunder to be immediately due and payable, which could also result in a cross-default or cross-acceleration of our other indebtedness.

Any future downgrade in our credit ratings could result in requirements to post additional collateral on derivative trading instruments and certain agreements with our customers, the loss of trading counterparties for corporate hedging and trading and brokerage activities or an increase in the cost of, or a limit on our access to, various forms of credit used in operating our business.

If our cash flows and capital resources are insufficient to fund our debt services obligations, we may be forced to sell assets, seek additional capital to attempt to meet our debt service and other obligations or seek to restructure certain debt obligations. These alternative measures may not be successful and may not permit us to meet our scheduled debt services obligations. In this regard, certain agreements governing our indebtedness restrict our ability to sell assets and the use of proceeds from asset sales. We also may not be able to complete any such asset sales or realize sufficient proceeds to meet debt service obligations then due. In addition, our ability to restructure our debt obligations may be impacted by cash tax liabilities that result from the cancellation of debt income if we are unable to offset that income with tax losses or other tax planning strategies. If the actions described above are not successful and we are unable to meet our debt service obligations when due, we could be required to reorganize our company in its entirety, including through bankruptcy proceedings.

Our ability to meet our financial obligations and fund our operations is dependent upon market conditions and our continued access to borrowing capacity of our existing borrowing facilities.

Liquidity risk represents the inability to generate or otherwise obtain funds at reasonable rates to meet our financial obligations and fund our operations. In addition to cash and cash equivalents, our liquidity includes the available balances from the 2013 Revolver under the 2013 Credit Facility and our accounts receivable securitization program.

In order for our liquidity to be sufficient to meet our anticipated capital requirements, we must continue to have access

to a substantial portion of our maximum borrowing capacity under the 2013 Revolver. Our available liquidity was \$1.8 billion as of September 30, 2015, which was substantially comprised of \$1.4 billion available for borrowing under the 2013 Revolver (net of outstanding letters of credit of \$228.7 million), \$334.3 million in cash and cash equivalents and \$48.2 million of available capacity from our accounts receivable securitization program. As of November 5, 2015, our available liquidity declined to \$1.4 billion, which was substantially comprised of \$1.2 billion available for borrowing under the 2013 Revolver (net of outstanding letters of credit of \$419.8 million), \$167.4 million in cash and cash equivalents and \$17.5 million of available capacity from our accounts receivable securitization program. The decline since September 30, 2015 was primarily due to due to federal coal

Table of Contents

lease expenditures (\$188.3 million) and letters of credit posted in support of bank guarantees (\$78.9 million) and surety bonds (\$28.7 million).

Challenged coal market conditions and tender and make-whole premiums paid in connection with the extinguishment of our 2016 Senior Notes resulted in a cash outflow from operations for the nine months ended September 30, 2015. If market conditions do not improve, we may continue to experience cash outflows from operations in future quarters, which would adversely affect our liquidity. Although we have taken steps to reduce the impact of these conditions, our actions may not entirely address our cash outflows from operations.

Other factors that could adversely impact our liquidity include an inability to maintain our current level of self-bonding for any reason, requirements to provide additional collateral to support our operations, on inability to renew our accounts receivable securitization program at an appropriate capacity when it expires in April 2016 and additional obligations or liabilities that we incur as a result of the Patriot bankruptcy.

The covenants in our 2013 Credit Facility, and the indentures governing our Senior Notes, Senior Secured Second Lien Notes and Debentures impose restrictions that may limit our operating and financial flexibility.

Our 2013 Credit Facility, the indentures governing our Senior Notes, our Senior Secured Second Lien Notes and our Debentures and the instruments governing our other indebtedness contain certain restrictions and covenants which restrict our ability to incur liens and/or debt or provide guarantees in respect of obligations of any other person. Under our 2013 Credit Facility, we must comply with certain financial covenants on a quarterly basis including a maximum net secured first lien leverage ratio and minimum interest coverage ratio, as defined therein. The covenants also place limitations on our investments in joint ventures, unrestricted subsidiaries, indebtedness and the imposition of liens on our assets. If we do not remain in compliance with the covenants in our 2013 Credit Facility, we may be restricted in our ability to pay dividends, sell assets and make redemptions or repurchase capital stock. Also, because our ability to borrow under the 2013 Credit Facility is conditioned upon compliance with these covenants, our actual borrowing capacity under the 2013 Credit Facility at any time may be less than the maximum borrowing capacity or may be altogether precluded.

If our reported Adjusted EBITDA and other sources of earnings or adjustments used to calculate Consolidated EBITDA fall below our Consolidated Net Cash Interest Charges during 2016, it is reasonably possible that our borrowing capacity may be substantially limited by, and we may not comply with, our financial covenants. If we violate these covenants and are unable to obtain waivers from our lenders, our 2013 Credit Facility, our Senior Notes, our Senior Secured Second Lien Notes and our Debentures would be in default and the debt owing under such agreements could be accelerated. If our indebtedness is accelerated, we may not be able to repay our debt or borrow sufficient funds to refinance it. Even if we are able to obtain new financing, it may not be on commercially reasonable terms or on terms that are acceptable to us. If our debt is in default for any reason, our business, financial condition and results of operations could be materially and adversely affected. In addition, complying with these covenants may also cause us to take actions that are not favorable to holders of our other debt or equity securities and may make it more difficult for us to successfully execute our business strategy and compete against companies who are not subject to such restrictions.

Under the indentures governing our Senior Notes, the amount of Indebtedness (as defined in the indentures governing the Senior Notes) that may be secured by Principal Property and Capital Stock (each as defined in the Senior Notes indentures) is limited in amount, unless the Senior Notes are secured on an equal and ratable basis. Our 2013 Credit Agreement and our Senior Secured Second Lien Notes are secured by Principal Property and Capital Stock, among other collateral, in a manner that uses substantially all of such limited amount. While the 2013 Credit Agreement and our Senior Secured Second Lien Notes provide us with flexibility to secure certain other debt with Principal Property and Capital Stock while maintaining compliance with the terms of our Senior Notes indentures and not requiring such notes to be equally and ratably secured, our ability to incur such other secured debt is limited, and our ability to secure any debt in the future, whether or not secured by Principal Property and Capital Stock, may be negatively affected by such constraints. In addition, under the 2013 Credit Facility, if we cannot meet our debt service obligations, the lenders could terminate their commitments to loan money, the lenders could foreclose against the assets securing their borrowings and we could be forced into bankruptcy.

Table of Contents

We are exposed to risk of loss due to Patriot's bankruptcy.

In 2012, Patriot Coal Company and certain of its wholly owned subsidiaries (Patriot) filed voluntary petitions for relief under Chapter 11 of Title 11 of the U.S. Code. In 2013, we entered into a definitive settlement agreement with Patriot and the United Mine Workers of America (UMWA), on behalf of itself, its represented Patriot employees and its represented Patriot retirees, to resolve all disputed issues related to Patriot's bankruptcy. In May 2015, Patriot again filed voluntary petitions for relief under Chapter 11 of Title 11 of the U.S. Code in the Eastern District of Virginia and subsequently initiated a process to sell some or all of its assets to qualified third-party bidders. On October 9, 2015, the bankruptcy court overseeing Patriot's current bankruptcy confirmed a plan of reorganization that sells substantially all of Patriot's assets to two buyers and contributes the remainder to a liquidating trust. The plan became effective on October 28, 2015.

We have exposure related to a total of \$99.1 million of credit support we provide to Patriot pursuant to the 2013 definitive settlement agreement that remains outstanding (net of \$22.4 million of letters of credit drawn upon in the third quarter of 2015). While the credit support amounts have been accrued, \$99.1 million in letters of credit have not been drawn upon as of September 30, 2015. Refer to Note 19. "Matters Related to the Patriot Bankruptcy" to the accompanying unaudited condensed consolidated financial statements for additional information surrounding these risks.

While we believe that any material exposure to us associated with Patriot's bankruptcy relates to the credit support, Coal Act liabilities and black lung liabilities, a lawsuit has also been filed alleging we have withdrawal liability to the UMWA 1974 Pension Plan, which is discussed in Note 19. "Matters Related to the Patriot Bankruptcy". Other parties may make claims against us in relation to Patriot's bankruptcy, although we are unaware of any other claims at this time.

Our mining operations could be adversely affected if we fail to appropriately secure our obligations.

U.S. federal and state laws and Australian laws require us to secure certain of our obligations to reclaim lands used for mining, to pay federal and state workers' compensation, to secure coal lease obligations and to satisfy other miscellaneous obligations. The primary methods we use to meet those obligations are to post a corporate guarantee (i.e., self bond), provide a third-party surety bond or provide a letter of credit. As of September 30, 2015, we had \$1,470.0 million of self bonding in place for our reclamation obligations. As of September 30, 2015, we also had outstanding surety bonds with third parties, bank guarantees and letters of credit of \$1,286.5 million, of which \$700.5 million was for post-mining reclamation, \$160.5 million related to workers' compensation obligations, \$110.6 million was for coal lease obligations and \$314.9 million was for other obligations, including road maintenance and performance guarantees. During the third quarter of 2015, we were required to increase our total posted letters of credit by \$187.8 million to the issuing parties of certain of our surety bonds and bank guarantees, whereas we had not previously been required to do so. Surety bond and bank guarantee issuers may not continue to renew the instruments or may continue to demand additional collateral or increased fees, which may in turn affect our available liquidity. Our ability to maintain and acquire letters of credit is subject to us maintaining compliance under our two primary facilities used for such items, which are our secured credit agreement dated September 24, 2013 (the 2013 Credit Facility, as amended) and our accounts receivable securitization program.

Our failure to retain, or inability to acquire, surety bonds, bank guarantees or letters of credit, or to provide a suitable alternative, would have a material adverse effect on us. That failure could result from a variety of factors including the following:

- lack of availability, higher expense or unfavorable market terms of surety bonds;
- restrictions on the availability of collateral for current and future third-party surety bond issuers under the terms of our indentures or our 2013 Credit Facility;
- the exercise by third-party surety bond issuers of their right to refuse to renew the surety bonds; and
- the inability to renew or refinance our 2013 Credit Facility or a default or lack of availability of letters of credit thereunder.

Our ability to self-bond reduces our costs of providing financial assurances. To the extent we are unable to maintain our current level of self-bonding due to legislative or regulatory changes, changes in our financial condition or for any other reason, we would be required to access the commercial surety market to obtain replacement financial assurances.

Further, self-bonding is permitted at the discretion of each state. While we have historically demonstrated compliance with the applicable financial requirements in the states in which we self-bond, our self-bonding status may be challenged or withdrawn at any time. As a result of any adverse change in our ability to self-bond, our costs would increase and our liquidity available for other uses would be reduced to the extent of any collateral required to obtain replacement financial assurances.

Our expenditures for postretirement benefit and pension obligations could be materially higher or occur sooner than we have predicted if our underlying assumptions prove to be incorrect.

We provide postretirement health and life insurance benefits to eligible employees. Our total accumulated postretirement benefit obligation related to such benefits was a liability of \$839.7 million as of September 30, 2015, of which \$57.6 million was classified as a current liability. Certain of our U.S. subsidiaries also sponsor defined benefit pension plans. Net pension liabilities were \$153.4 million as of September 30, 2015, of which \$1.7 million was classified a current liability.

Table of Contents

These liabilities are actuarially determined and we use various actuarial assumptions, including the discount rate, future cost trends, and rates of return on plan assets to estimate the costs and obligations for these items. Our discount rate is determined by utilizing a hypothetical bond portfolio model which approximates the future cash flows necessary to service our liabilities. A decrease in the discount rate used to determine our postretirement benefit and defined benefit pension obligations could result in an increase in the valuation of these obligations, thereby increasing the cost in subsequent fiscal years. We have made assumptions related to future trends for medical care costs in the estimates of retiree health care obligations. Our medical trend assumption is developed by annually examining the historical trend of our cost per claim data. If our assumptions do not materialize as expected, actual cash expenditures and costs that we incur could differ materially from our current estimates. Moreover, regulatory changes or changes in healthcare benefits provided by the government could increase our obligation to satisfy these or additional obligations. Additionally, our reported defined benefit pension funding status may be affected, and we may be required to increase employer contributions, due to increases in our defined benefit pension obligation or poor financial performance in asset markets in future years.

Our defined benefit pension plans are subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). It is implicit in our underlying assumptions that those plans continue to operate in the normal course of business. However, the Pension Benefit Guarantee Corporation (PBGC) may terminate our plans under certain circumstances pursuant to ERISA laws, including in the event that the PBGC concludes that its risk may increase unreasonably if such plans continue to operate based on its assessment of the plans' funded status, our financial condition or other factors. Termination of the plans would require us to provide immediate funding or other financial assurance to the PBGC for all or a substantial portion of the underfunded amounts, as determined by the PBGC based on its own assumptions. Those assumptions may differ from our own. Any of those consequences could have a material adverse effect on our results of operations, financial conditions or available liquidity.

Concerns about the environmental impacts of coal combustion, including perceived impacts on global climate issues, are resulting in increased regulation of coal combustion in many jurisdictions, unfavorable lending policies by government-backed lending institutions and development banks toward the financing of new overseas coal-fueled power plants and divestment efforts affecting the investment community, which could significantly affect demand for our products or our securities.

Global climate issues continue to attract public and scientific attention. Numerous reports, such as the Fourth (and, more recently, the Fifth) Assessment Report of the Intergovernmental Panel on Climate Change, have also engendered concern about the impacts of human activity, especially fossil fuel combustion, on global climate issues. In turn, increasing government attention is being paid to global climate issues and to emissions of what are commonly referred to as greenhouse gases, including emissions of carbon dioxide from coal combustion by power plants.

Enactment of laws or passage of regulations regarding emissions from the combustion of coal by the U.S., some of its states or other countries, or other actions to limit such emissions, could result in electricity generators switching from coal to other fuel sources or coal-fueled power plant closures. Further, policies limiting available financing for the development of new coal-fueled power plants could adversely impact the global demand for coal in the future. The potential financial impact on us of future laws, regulations or other policies will depend upon the degree to which any such laws or regulations force electricity generators to diminish their reliance on coal as a fuel source. That, in turn, will depend on a number of factors, including the specific requirements imposed by any such laws, regulations or other policies, the time periods over which those laws, regulations or other policies would be phased in, the state of commercial development and deployment of CCS technologies and the alternative markets for coal. From time to time, we attempt to analyze the potential impact on the Company of as-yet-unadopted, potential laws, regulations and policies. Such analyses require that we make significant assumptions as to the specific provisions of such potential laws, regulations and policies. These analyses sometimes show that certain potential laws, regulations and policies, if implemented in the manner assumed by the analyses, could result in material adverse impacts on our operations, financial condition or cash flow, in view of the significant uncertainty surrounding each of these potential laws, regulations and policies. We do not believe that such analyses reasonably predict the quantitative impact that future

laws, regulations or other policies may have on our results of operations, financial condition or cash flows.

There have also been efforts in recent years affecting the investment community, including investment advisors, sovereign wealth funds, public pension funds, universities and other groups, promoting the divestment of fossil fuel equities and also pressuring lenders to limit funding to companies engaged in the extraction of fossil fuel reserves. The impact of such efforts may adversely affect the demand for and price of securities issued by us, and impact our access to the capital and financial markets.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Pursuant to the authorization provided at a special meeting of our stockholders held on September 16, 2015, we completed a 1-for-15 reverse stock split of the shares of our common stock on September 30, 2015. Our common stock began trading

Table of Contents

on a reverse stock split-adjusted basis on the New York Stock Exchange on October 1, 2015. All share and per share data included in this Item 2 have been retroactively restated to reflect the stock split.

Share Repurchase Programs

On October 24, 2008, we announced that our Board of Directors approved an amendment to the then existing share repurchase program to authorize repurchases of up to \$1.0 billion of the then outstanding shares of our common stock (Repurchase Program). The Repurchase Program does not have an expiration date and may be discontinued at any time. Through September 30, 2015, we have repurchased a total of 0.5 million shares under the Repurchase Program at a cost of \$299.6 million, leaving \$700.4 million available for share repurchases under the Repurchase Program. Repurchases may be made from time to time based on an evaluation of our outlook and general business conditions, as well as alternative investment and debt repayment options. No share repurchases were made under the Repurchase Program during the nine months ended September 30, 2015 or 2014.

Share Relinquishments

We routinely allow employees to relinquish common stock to pay estimated taxes upon the vesting of restricted stock and upon the issuance of common stock related to performance units under our equity incentive plans. The value of common stock tendered by employees is determined based on the closing price of our common stock on the dates of the respective relinquishments.

Purchases of Equity Securities

The following table summarizes all share purchases for the three months ended September 30, 2015:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Dollar Value that May Yet Be Used to Repurchase Shares Under the Publicly Announced Program (In millions)
July 1 through July 31, 2015	1,572	\$27.26	—	\$700.4
August 1 through August 31, 2015	557	30.12	—	700.4
September 1 through September 30, 2015	36	34.20	—	700.4
Total	2,165	\$28.12	—	

⁽¹⁾ Represents shares withheld to cover the withholding taxes upon the vesting of restricted stock, which are not part of the Repurchase Program.

Dividends

In connection with our ongoing efforts to manage our cash and preserve liquidity, our Board of Directors suspended our quarterly dividend beginning in the third quarter of 2015. Our Board of Directors will continue to evaluate the appropriate dividend rate over time. The declaration and payment of dividends in the future and the amount of those dividends will depend on our results of operations, financial condition, cash requirements, future prospects, any limitations imposed by our debt covenants and other factors that our Board of Directors may deem relevant to such evaluations. Limitations on our ability to pay dividends imposed by our debt instruments are discussed in Part I, Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Mine Safety Disclosures.

Safety is a core value and is integrated into all areas of our business. Our goal is to provide a workplace that is incident free. We believe that it is our responsibility to provide a safe and healthy work environment. We seek to achieve this goal by: setting clear expectations about safe work practices and training employees and contractors in those practices; holding ourselves and others accountable for a safe and healthy work environment; modeling and reinforcing behaviors that support safety and health best practices and our values; promoting processes to identify and

manage risks, transparently reporting and investigating incidents and losses to develop effective corrective actions to prevent recurrence; and seeking ways to continually improve our safety and health standards and culture. We also believe personal accountability is key and expect every employee to commit to our safety goals and governing principles.

Table of Contents

As part of our efforts, we collaborate with the Mine Safety and Health Administration and other government agencies to identify and test emerging safety technologies. We also partner with other companies and certain governmental agencies to pursue new technologies that have the potential to improve our safety performance and provide better safety protection for employees. We are currently exploring, implementing or using leading technology to assist with proximity detection and fatigue monitoring.

Our "Safety a Way of Life Management System" has been designed to set clear and consistent expectations for safety and health across our business. It aligns to the National Mining Association's CORESafety® framework and encompasses three fundamental areas: leadership and organization, safety and health risk management and assurance. We continually monitor our safety performance and regulatory compliance. The information concerning mine safety violations or other regulatory matters required by SEC regulations is included in Exhibit 95 to this Quarterly Report on Form 10-Q.

EXHIBIT INDEX

The exhibits below are numbered in accordance with the Exhibit Table of Item 601 of Regulation S-K.

Exhibit No.	Description of Exhibit
3.1	Third Amended and Restated Certificate of Incorporation of the Registrant, as amended (Incorporated by reference to Exhibit 3.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2011) and Certificate of Amendment of Third Amended and Restated Certificate of Incorporation of the Registrant (Incorporated by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on October 6, 2015).
3.2	Amended and Restated By-Laws of the Registrant (Incorporated by reference to Exhibit 3.1 of the Registrant's Current Report on Form 8-K filed on March 17, 2014).
31.1*	Certification of periodic financial report by Peabody Energy Corporation's Chief Executive Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934, as amended pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2*	Certification of periodic financial report by Peabody Energy Corporation's Chief Financial Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934, as amended pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1*	Certification of periodic financial report pursuant to 18 U.S.C. Section 1350, adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Peabody Energy Corporation's Chief Executive Officer.
32.2*	Certification of periodic financial report pursuant to 18 U.S.C. Section 1350, adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Peabody Energy Corporation's Chief Financial Officer.
95*	Mine Safety Disclosure required by Item 104 of Regulation S-K.
101*	Interactive Data File (Form 10-Q for the quarterly period ended September 30, 2015 filed in XBRL). The financial information contained in the XBRL-related documents is "unaudited" and "unreviewed."

The agreements and other documents filed as exhibits to this report are not intended to provide factual information or other disclosure other than with respect to the terms of the agreements or other documents themselves, and you should not rely on them for that purpose. In particular, any representations and warranties made by us in these agreements or other documents were made solely within the specific context of the relevant agreement or document and may not describe the actual state of affairs as of the date they were made or at any other time.

* Filed herewith.
