Item 7.01 Regulation FD Disclosure.

Peabody today confirmed that the longwall move at its North Goonyella Mine has been interrupted by temporarily elevated gas levels. Services such as power, ventilation and normal water management activities in the mine continue, and the mine is shipping from inventories. Longwall move activities have been delayed for about two and a half weeks thus far and the company is working toward resuming operations. Peabody is well over halfway through the two-month longwall move at this point. The longwall move, which was expected to be completed in September, is now targeted for completion in the early part of the fourth quarter. Prior to this time, the company had been trending to the upper end of its 2018 metallurgical coal sales volume targets, and those targets have not been revised. The company intends to provide further updates on or before its earnings release near the end of October.

This statement should be read together with the information included in the Company's other filings with the Securities and Exchange Commission, including the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2017 and Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2018.

The furnishing of information under this Item 7.01 of this Current Report on Form 8-K shall not be deemed an admission as to the materiality of any information herein that is required to be disclosed solely by reason of Regulation FD.
