ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

1. OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We may use the term royalty interest in these notes to the consolidated financial statements to refer to royalties, gold, silver or other metal stream interests, and other similar interests.

Summary of Significant Accounting Policies

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. In the opinion of management, all adjustments which are of a normal recurring nature considered necessary for a fair presentation of our interim financial statements have been included in this Form 10-Q. Certain amounts in the prior period financial statements have been reclassified for comparative purposes to conform with the presentation in the current period financial statements. Operating results for the three months ended September 30, 2014, are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2015. These interim unaudited financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2014 filed with the Securities and Exchange Commission on August 7, 2014 (Fiscal 2014 10-K).

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Our estimates of gold, silver, copper, nickel and other metal prices, operator's estimates of proven and probable reserves related to our royalty or streaming properties, and operator's estimates of operating, capital and reclamation costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty interests in mineral properties. Although we have made our best assessment of these factors based on current market conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty interests. As part of the Company's regular asset impairment analysis, the Company determined that one

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

production stage royalty interest and one exploration stage royalty interest should be written down to zero for a total impairment of \$1.8 million as of September 30, 2014.

2. ACQUISITION*Tetlin Royalty Acquisitions*

On September 30, 2014, Royal Gold acquired a 2.0% net smelter return (NSR) royalty and a 3.0% NSR royalty held by private parties over areas comprising Contango ORE, Inc.'s Tetlin mining project located near Tok, Alaska, for total consideration of \$6.0 million. The acquisition of the Tetlin royalties has been accounted for as an asset acquisition. The total purchase price of \$6.0 million, plus direct transaction costs, has been recorded as an exploration stage royalty interest within *Royalty and stream interests, net* on our consolidated balance sheets.

3. ROYALTY AND STREAM INTERESTS, NET

The following tables summarize the Company's principal royalty and stream interests as of September 30, 2014 and June 30, 2014.

As of September 30, 2014 (Amounts in thousands):	Cost	Accumulated Depletion	Net

(Amounts in thousands)
Unrealized

	Cost Basis	Gain	Loss	Fair Value
Non-current:				
Seabridge	\$ 9,565			\$ 9,565
Other	203		(160)	43
	\$ 9,768	\$	\$ (160)	\$ 9,608

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

The most significant available-for-sale security is the investment in Seabridge Gold, Inc. (Seabridge) common stock, acquired in June 2011 and discussed in greater detail in our Fiscal 2014 10-K. The Company's policy for determining whether declines in fair value of available-for-sale securities are other than temporary includes a quarterly analysis of the investments and a review by management of all investments for which the cost exceeds the fair value. Any temporary declines in fair value are recorded as a charge to other comprehensive income. If such impairment is determined by the Company to be other than temporary, the investment's cost basis is written down to fair value and recorded in net income during the period the Company determines such impairment to be other than temporary. Based on the Company's quarterly analysis of its investments and our ability and intent to hold these investments for a reasonable period of time, there were no write downs on our available-for-sale securities during the three months ended September 30, 2014. The Company recognized a loss on available-for-sale securities of \$4.5 million during the fourth quarter of our fiscal year ended June 30, 2014. The Company will continue to evaluate its investment in Seabridge common stock considering additional facts and circumstances as they arise, including, but not limited to, the progress of development of Seabridge's KSM project.

5. DEBT

The Company's non-current debt as of September 30, 2014 and June 30, 2014 consists of the following:

	As of September 30, 2014 Non-current	As of June 30, 2014 Non-current
	(Amounts in thousands)	
Convertible notes due 2019, net	\$ 314,333	\$ 311,860
Total debt	\$ 314,333	\$ 311,860

Convertible Senior Notes Due 2019

In June 2012, the Company completed an offering of \$370 million aggregate principal amount of 2.875% convertible senior notes due 2019 (2019 Notes). The 2019 Notes bear interest at the rate of 2.875% per annum, and the Company is required to make semi-annual interest payments on the outstanding principal balance of the 2019 Notes on June 15 and December 15 of each year. The 2019 Notes mature on June 15, 2019. Interest expense recognized on the 2019 Notes for the three months ended September 30, 2014 and 2013, was \$5.4 million and \$5.3 million, respectively, and included the contractual coupon interest, the accretion of the debt discount and amortization of the debt issuance costs.

Revolving credit facility

Edgar Filing: ROYAL GOLD INC - Form 10-Q

The Company maintains a \$450 million revolving credit facility. As of September 30, 2014, the Company had no amounts outstanding under the revolving credit facility. As discussed in Note 6 to the notes to consolidated financial statements in the Company's Fiscal 2014 10-K, the Company has financial covenants associated with its revolving credit facility. At September 30, 2014, the Company was in compliance with each financial covenant.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

6. REVENUE

Revenue is comprised of the following:

	For The Three Months Ended	
	September 30,	September 30,
	2014	2013
	(Amounts in thousands)	
Royalty interests	\$ 49,369	\$ 56,487
Stream interests	19,657	
Total revenue	\$ 69,026	\$ 56,487

7. STOCK-BASED COMPENSATION

The Company recognized stock-based compensation expense as follows:

	For The Three Months Ended	
	September 30,	September 30,
	2014	2013
	(Amounts in thousands)	
Stock options	\$ 112	\$ 129
Stock appreciation rights	355	306
Restricted stock	1,170	1,267
Performance stock	812	(89)
Total stock-based compensation expense	\$ 2,449	\$ 1,613

Stock-based compensation expense is included within general and administrative in the consolidated statements of operations and comprehensive income.

There were 19,760 and 24,775 stock options granted during the three months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there was \$0.9 million of unrecognized compensation expense related to non-vested stock options, which is expected to be recognized over a weighted-average period of 2.3 years.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

There were 87,890 and 84,125 stock-settled stock appreciation rights (SSARs) granted during the three months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there was \$3.3 million of unrecognized compensation expense related to non-vested SSARs, which is expected to be recognized over a weighted-average period of 2.4 years.

There were 55,589 and 66,150 shares of restricted stock granted during the three months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there was \$7.9 million of unrecognized compensation expense related to non-vested restricted stock, which is expected to be recognized over a weighted-average vesting period of 3.6 years.

There were 46,800 and 71,700 shares of performance stock granted during the three months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there was \$4.0 million of unrecognized compensation expense related to non-vested performance stock, which is expected to be

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

recognized over a weighted-average vesting period of 2.0 years based on management's current estimate of the performance award criteria being achieved.

8. EARNINGS PER SHARE (EPS)

Basic earnings per common share were computed using the weighted-average number of shares of common stock outstanding during the period, considering the effect of participating securities. Unvested stock-based compensation awards that contain non-forfeitable rights to dividends or dividend equivalents are considered participating securities and are included in the computation of earnings per share pursuant to the two-class method. The Company's unvested restricted stock awards contain non-forfeitable dividend rights and participate equally with common stock with respect to dividends issued or declared. The Company's unexercised stock options, unexercised SSARs and unvested performance stock do not contain rights to dividends. Under the two-class method, the earnings used to determine basic earnings per common share are reduced by an amount allocated to participating securities. Use of the two-class method has an immaterial impact on the calculation of basic and diluted earnings per common share.

The following tables summarize the effects of dilutive securities on diluted EPS for the period:

	For The Three Months Ended	
	September 30,	September 30,
	2014	2013
	(in thousands, except per share data)	
Net income available to Royal Gold common stockholders	\$ 18,680	\$ 15,195
Weighted-average shares for basic EPS	64,962,883	64,858,354
Effect of other dilutive securities	144,598	122,245
Weighted-average shares for diluted EPS	65,107,481	64,980,599
Basic earnings per share	\$ 0.29	\$ 0.23
Diluted earnings per share	\$ 0.29	\$ 0.23

The calculation of weighted-average shares includes all of our outstanding stock: common stock and exchangeable shares. Exchangeable shares are the equivalent of common shares in that they have the same dividend rights and share equitably in undistributed earnings and are exchangeable on a one-for-one basis for shares of our common stock. The Company intends to settle the principal amount of the 2019 Notes in cash. As a result, there will be no impact to diluted earnings per share unless the share price of the Company's common stock exceeds the conversion price of \$105.31.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

9. INCOME TAXES

For The Three Months Ended
September 30, September 30,
2014 2013
(Amounts in thousands, except rate)

Income tax expense	\$	3,959	\$	4,842
Effective tax rate		17.3%		24.1%

The decrease in the effective tax rate for the quarter ended September 30, 2014 is primarily related to (i) a favorable tax rate associated with certain operations in lower-tax jurisdictions, and (ii) a decrease in tax expense due to the Chilean tax legislation enacted in the quarter and the re-measurement of the Chilean long term deferred tax asset to the higher corporate income tax rate. The decrease in tax expense was partially offset by an increase in current year tax expense due to accrual for uncertain tax positions.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal, state and local, and non-U.S. income tax examinations by tax authorities for fiscal years before 2009. As a result of (i) statute of limitations that will begin to expire within the next 12 months in various jurisdictions, (ii) possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, and (iii) additional accrual of exposure and interest on existing items the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will not decrease in the next 12 months.

As of September 30, 2014 and June 30, 2014, the Company had \$14.2 million and \$13.7 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively impact the Company's effective income tax rate.

The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At September 30, 2014 and June 30, 2014, the amount of accrued income-tax-related interest and penalties was \$5.9 million and \$5.4 million, respectively.

Notes to Consolidated Financial Statements

(Unaudited)

10. SEGMENT INFORMATION

The Company manages its business under a single operating segment, consisting of the acquisition and management of royalty and stream interests. Royal Gold's royalty revenue and long-lived assets (royalty and stream interests, net) are geographically distributed as shown in the following table.

	Revenue Three Months Ended September 30,		Royalty and Stream Interests, net	
	2014	2013	As of September 30, 2014	As of June 30, 2014
Canada	45%	26%	53%	53%
Chile	16%	31%	32%	31%
United States	16%	13%	3%	3%
Mexico	14%	18%	7%	7%
Australia	3%	4%	3%	3%
Africa	2%	3%	1%	1%
Other	4%	5%	1%	2%

11. FAIR VALUE MEASUREMENTS

FASB Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures* (ASC 820) establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Quoted prices for identical instruments in active markets;

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3: Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following table sets forth the Company's financial assets measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

	Carrying Amount	Total	At September 30, 2014		
			Fair Value		
			Level 1	Level 2	Level 3
Assets (In thousands):					
United States treasury bills(1)	\$ 499,991	\$ 499,991	\$ 499,991	\$	\$
Marketable equity securities(2)	\$ 8,268	\$ 8,268	\$ 8,268	\$	\$
Total assets		\$ 508,259	\$ 508,259	\$	\$
Liabilities (In thousands):					
Debt(3)	\$ 391,333	\$ 387,575	\$ 387,575	\$	\$
Total liabilities		\$ 387,575	\$ 387,575	\$	\$

(1) Included in *Cash and equivalents* in the Company's consolidated balance sheets.

(2) Included in *Available for sale securities* in the Company's consolidated balance sheets.

(3) Included in the carrying amount is the equity component of our 2019 Notes in the amount of \$77 million, which is included within *Additional paid-in capital* in the Company's consolidated balance sheets.

The Company invests primarily in United States treasury bills with maturities of 90 days or less, which are classified within Level 1 of the fair value hierarchy. The Company's marketable equity securities classified within Level 1 of the fair value hierarchy are valued using quoted market prices in active markets. The fair value of the Level 1 marketable equity securities is calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company. The Company's debt classified within Level 1 of the fair value hierarchy is valued using quoted prices in an active market.

As of September 30, 2014, the Company also had assets that, under certain conditions, are subject to measurement at fair value on a non-recurring basis like those associated with royalty interests in mineral properties, intangible assets and other long-lived assets. For these assets, measurement at fair value in periods subsequent to their initial recognition is applicable if any of these assets are determined to be impaired. As discussed in Note 1, two of these assets were written down to fair value (or \$0) during the three months ended September 30, 2014. If recognition of these assets at their fair value becomes necessary, such measurements will be determined utilizing Level 3 inputs.

12. COMMITMENTS AND CONTINGENCIES*Phoenix Gold Project Stream Acquisition*

As of September 30, 2014, the Company has a remaining commitment of \$45 million as part of its Phoenix Gold Project stream acquisition in February 2014. The Company made a \$17 million payment as part of this commitment on October 3, 2014.

Tulsequah Chief Gold and Silver Stream Acquisition

As of September 30, 2014, the Company has a remaining commitment of \$45 million as part of its Tulsequah Chief gold and silver stream acquisition in December 2011, as amended in July 2014, payment of which is subject to satisfaction of certain conditions precedent.

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

Voisey's Bay

The Company indirectly owns a royalty on the Voisey's Bay mine in Newfoundland and Labrador owned by Vale Newfoundland & Labrador Limited (VNL). The royalty is directly owned by the Labrador Nickel Royalty Limited Partnership (LNRLP), in which the Company's wholly-owned indirect subsidiary, Canadian Minerals Partnership, is the general partner and 89.99% owner. The remaining interests in LNRLP are owned by Altius Investments Ltd. (10%), a company unrelated to Royal Gold, and the Company's wholly-owned indirect subsidiary, Voisey's Bay Holding Corporation (0.01%).

On October 16, 2009, LNRLP filed a claim in the Supreme Court of Newfoundland and Labrador Trial Division against Vale Inco Limited, now known as Vale Canada Limited (Vale Canada) and its wholly-owned subsidiaries, Vale Inco Atlantic Sales Limited and VNL, related to the calculation of the NSR on the sale of concentrates, including nickel concentrates, from the Voisey's Bay mine to Vale Canada. The claim asserts that Vale Canada is incorrectly calculating the NSR and requests an order in respect of the correct calculation of future payments. The claim also requests specific damages for underpayment of past royalties to the date of the claim in an amount not less than \$29 million, together with additional damages until the date of trial, interest, costs and other damages. The litigation is in the discovery phase.

13. SUBSEQUENT EVENT

Acquisition of Gold Stream on Euromax's Ilovitza Project

On October 20, 2014, RGLD Gold AG (RGLD Gold), a wholly owned subsidiary of the Company, entered into a \$175.0 million gold stream transaction with Euromax Resources Ltd (Euromax) that will finance a definitive feasibility study, permitting work, early stage engineering and a significant portion of the construction at Euromax's Ilovitza gold-copper project located in southeast Macedonia, approximately nine miles west of the Bulgarian border. RGLD Gold will make two advance deposit payments to Euromax totaling \$15.0 million, which will be used for completion of the definitive feasibility study and permitting of the project, followed by payments aggregating \$160 million towards project construction, in each case subject to certain conditions. Payment of the first \$7.5 million deposit is conditioned upon Euromax raising an additional \$5 million in equity. Royal Gold's decision to proceed with the second \$7.5 million deposit and the construction payments is conditioned upon, among other things, its satisfaction with the definitive feasibility study and environmental evaluations, demonstrated project viability, and sufficient project financing and permits to construct and operate the mine. The construction payments would be paid pro-rata with the balance of the project funding. In exchange, Euromax will deliver physical gold equal to 25% of gold produced from the Ilovitza project until 525,000 ounces have been delivered, and 12.5% thereafter (in each case subject to adjustment). RGLD Gold's purchase price per ounce will be 25% of the spot price at time of delivery.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide information to assist you in better understanding and evaluating our financial condition and results of operations. Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), recommends that you read this MD&A in conjunction with our consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended June 30, 2014 filed with the Securities and Exchange Commission (the SEC) on August 7, 2014 (the Fiscal 2014 10-K).

This MD&A contains forward-looking information. You should review our important note about forward-looking statements following this MD&A.

We refer to GSR, NSR, metal stream and other types of royalty or similar interests throughout this MD&A. These terms are defined in our Fiscal 2014 10-K.

Overview

Royal Gold, Inc., together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We may use the term royalty interest in this Quarterly Report on Form 10-Q to refer to royalties, gold, silver or other metal stream interests, and other similar interests. We seek to acquire existing royalty interests or to finance projects that are in production or in the development stage in exchange for royalty interests. In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty interests, to create new royalty interests through the financing of mine development or exploration, or to acquire companies that hold royalty interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, analysis of technical, financial and other confidential information, submission of indications of interest, participation in preliminary discussions and negotiations and involvement as a bidder in competitive processes.

As of September 30, 2014, the Company owned royalty interests on 37 producing properties, 23 development stage properties and 138 exploration stage properties, of which the Company considers 47 to be evaluation stage projects. The Company uses evaluation stage to describe exploration stage properties that contain mineralized material and on which operators are engaged in the search for reserves. As the holder of a portfolio of royalty interests, we do not conduct mining operations nor are we required to contribute to capital costs, exploration costs, environmental costs or other mining, processing or other operating costs on the properties in which we hold royalty interests. During the three months ended September 30, 2014, we focused on the management of our existing royalty interests and the acquisition of royalty interests.

Our financial results are primarily tied to the price of gold and, to a lesser extent, the price of silver, copper and nickel, together with the amounts of production from our producing stage royalty interests. The price of gold, silver, copper, nickel and other metals have fluctuated widely in recent years and most recently have experienced declines from highs experienced in the first half of our fiscal year 2013. The marketability and the price of metals are influenced by numerous factors beyond the control of the

Table of Contents

Company and significant declines in the price of gold, silver, copper or nickel could have a material and adverse effect on the Company's results of operations and financial condition.

For the three months ended September 30, 2014 and 2013, gold, silver, copper and nickel price averages and percentage of revenue by metal were as follows:

Metal	Three Months Ended			
	September 30, 2014		September 30, 2013	
	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue
Gold (\$/ounce)	\$ 1,282	76%	\$ 1,326	70%
Silver (\$/ounce)	\$ 19.76	4%	\$ 21.32	7%
Copper (\$/pound)	\$ 3.17	10%	\$ 3.21	11%
Nickel (\$/pound)	\$ 8.43	4%	\$ 6.31	8%
Other	N/A	6%	N/A	4%

Recent Business Developments*Tetlin Master Agreement and Royalty Acquisitions*

On September 29, 2014, Royal Gold and Contango ORE, Inc. (Contango) entered into a Master Agreement pursuant to which Contango will, upon consummation of a joint venture transaction contemplated in the Master Agreement, transfer all of its assets relating to the Tetlin gold-copper-silver project located near Tok, Alaska, into a newly formed joint venture with Royal Gold. The Company has the ability to obtain up to a 40% membership interest in the joint venture in exchange for aggregate contributions of up to \$30.0 million. The project is situated partly on lands leased from the Native Village of Tetlin, a federally recognized Indian tribe (Tetlin). By action of the Tetlin Tribal Council and Tetlin membership, Tetlin ratified the lease and agreed to stabilize the terms of the lease for its duration in the event Tetlin seeks federal trust oversight of tribal lands subject to the lease. Consummation of the joint venture transaction is subject to various conditions, including, among others, (i) approval by Contango's shareholders of the joint venture transaction, and (ii) the payment by Royal Gold of \$5.0 million to the joint venture and an additional \$750,000 to Contango pursuant to the Master Agreement.

On September 30, 2014, Royal Gold acquired a 2.0% net smelter return (NSR) royalty and a 3.0% NSR royalty held by private parties over areas comprising the Tetlin project for total consideration of \$6.0 million.

Acquisition of Gold Stream on Euromax's Ilovitza Project

On October 20, 2014, RGLD Gold AG (RGLD Gold), a wholly owned subsidiary of the Company, entered into a \$175.0 million gold stream transaction with Euromax Resources Ltd (Euromax) that will finance a definitive feasibility study, permitting work, early stage engineering and a significant portion of the construction at Euromax's Ilovitza gold-copper project located in southeast Macedonia, approximately nine miles west of the Bulgarian border. RGLD Gold will make two advance deposit payments to Euromax totaling \$15.0 million, which will be used for

Edgar Filing: ROYAL GOLD INC - Form 10-Q

completion of the definitive feasibility study and permitting of the project, followed by payments aggregating \$160 million towards project construction, in each case subject to certain conditions. Payment of the first \$7.5 million deposit is conditioned upon Euromax raising an additional \$5 million in equity. Royal Gold's decision to proceed with the second \$7.5 million deposit and the construction payments is conditioned upon, among other things, its satisfaction with the definitive feasibility study and environmental evaluations, demonstrated project viability, and sufficient project financing and permits to construct and operate the mine. The construction payments would be paid pro-rata with the balance of the project funding. In exchange, Euromax will

Table of Contents

deliver physical gold equal to 25% of gold produced from the Ilovitza project until 525,000 ounces have been delivered, and 12.5% thereafter (in each case subject to adjustment) RGLD Gold's purchase price per ounce will be 25% of the spot price at time of delivery.

The Ilovitza project is located in south east Macedonia, approximately nine miles west of the Bulgarian border. Euromax has completed a prefeasibility study for the project which estimates reserves of 2.45 million ounces of gold and 905 million pounds of copper, average annual production of 35 million pounds of copper and 95,000 ounces of gold over a 23 year mine life and a production startup in calendar 2018.

Principal Royalty and Stream Interests

Our principal producing and development royalty and stream interests are listed alphabetically in the following tables. The Company considers both historical and future potential revenues in determining which royalty interests in our portfolio are principal to our business. Estimated future potential revenues from both producing and development properties are based on a number of factors, including reserves subject to our royalty or stream interests, production estimates, feasibility studies, metal price assumptions, mine life, legal status and other factors and assumptions, any of which could change and could cause Royal Gold to conclude that one or more of such royalty or stream interests are no longer principal to our business.

Please refer to our Fiscal 2014 10-K for further discussion of our principal producing and development royalty and stream interests.

Principal Producing Properties

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Andacollo(1)	Region IV, Chile	Compañía Minera Teck Carmen de Andacollo (Teck)	75% of gold produced (until 910,000 payable ounces; 50% thereafter)
Cortez	Nevada, USA	Barrick Gold Corporation (Barrick)	GSR1: 0.40% to 5.0% sliding-scale GSR GSR2: 0.40% to 5.0% sliding-scale GSR GSR3: 0.71% GSR NVR1: 1.014% NVR; 0.618% NVR (Crossroads)
Holt	Ontario, Canada	St Andrew Goldfields Ltd. (St Andrew)	0.00013 x quarterly average gold price NSR
Mt. Milligan	British Columbia, Canada	Thompson Creek Metals Company Inc. (Thompson Creek)	Gold stream - 52.25% of payable gold
Mulatos(2)	Sonora, Mexico	Alamos Gold, Inc. (Alamos)	1.0% to 5.0% sliding-scale NSR
Peñasquito	Zacatecas, Mexico	Goldcorp	2.0% NSR (gold, silver, lead, zinc)
Robinson	Nevada, USA	KGHM International Ltd. (KGHM)	3.0% NSR (copper, gold, silver, molybdenum)
Voisey's Bay	Newfoundland and Labrador, Canada	Vale Newfoundland & Labrador Limited (Vale)	2.7% NSR (nickel, copper, cobalt)

(1) There have been approximately 228,000 cumulative payable ounces produced as of September 30, 2014.

(2) The Mulatos royalty is capped at 2.0 million gold ounces of production. Approximately 1.30 million cumulative ounces of gold have been produced as of September 30, 2014.

Table of Contents*Principal Development Property*

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Pascua-Lama	Region III, Chile	Barrick	0.78% to 5.23% sliding-scale NSR 1.05% fixed rate royalty (copper)

Operators Production Estimates by Royalty Interest for Calendar 2014

We received annual production estimates from many of the operators of our producing mines during the first calendar quarter of 2014. The following table shows such production estimates for our principal producing properties for calendar 2014 as well as the actual production reported to us by the various operators through September 30, 2014. The estimates and production reports are prepared by the operators of the mining properties. We do not participate in the preparation or calculation of the operators' estimates or production reports and have not independently assessed or verified the accuracy of such information. Please refer to Property Developments below within this MD&A for further discussion on any updates at our principal producing or development properties.

Operators Production Estimate by Royalty and Stream Interest for Calendar 2014 and Reported Production

Principal Producing Properties

For the period January 1, 2014 through September 30, 2014

Royalty/Stream	Calendar 2014 Operator's Production Estimate(1)			Reported Production through September 30, 2014(2)		
	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)
Andacollo(3)	38,500			31,500		
Cortez GSR1	125,000			48,400		
Cortez GSR2	151,000			92,500		
Cortez GSR3	276,000			140,900		
Cortez NVR1	228,000			112,600		
Holt	66,000			48,000		
Mt. Milligan(3)	185,000-195,000			136,700		
Mulatos	150,000-170,000			96,400		
Peñasquito	530,000-560,000	22-25 million		430,000	21.4 million	
<i>Lead(3)</i>			135-145 million			129.9 million
<i>Zinc(3)</i>			315-325 million			252.5 million
Robinson(3),(4)	N/A	N/A		16,300		
<i>Copper</i>			N/A			55.9 million
Voisey's Bay(3),(4)						
<i>Copper</i>			N/A			41.3 million
<i>Nickel</i>			N/A			83.9 million

(1) There can be no assurance that production estimates received from our operators will be achieved. Please refer to our cautionary language regarding forward-looking statements following this MD&A, as well as the Risk Factors identified in Part I, Item 1A, of our Fiscal 2014 10-K for information regarding factors that could affect actual results.

(2) Reported production relates to the amount of metal sales, subject to our royalty interests, for the period January 1, 2014 through September 30, 2014, as reported to us by the operators of the mines. For our streaming interest at Mt. Milligan, reported production represents payable gold shipped, subject to our stream interest, during the January 1, 2014 through September 30, 2014 period.

(3) Payable metal and deliveries are subject to shipping and settlement schedules.

(4) The operator did not release public production guidance for calendar 2014.

Table of Contents

(5) Vale is commissioning its new Long Harbour Processing Plant and intends to begin introducing nickel concentrates from Voisey's Bay in coming quarters. In anticipation of the transition from processing Voisey's Bay nickel concentrates at Vale's Sudbury and Thompson smelters to processing at the Long Harbour hydrometallurgical plant, the Company has engaged in discussions with Vale concerning calculation of the royalty once Voisey's Bay nickel concentrates are processed at Long Harbour. Vale proposed a calculation of the royalty that the Company estimates could result in the substantial reduction of royalty payable to LNRLP on Voisey's Bay nickel concentrates processed at Long Harbour.

Property Developments

The following information is provided by the operators of the property, either to Royal Gold or in various documents made publicly available. Reported production, as used below, relates to the amount of metal sales subject to our royalty interests, as reported to us by the operators of the mines. For our streaming interest at Mt. Milligan, reported production represents payable gold shipped, subject to our stream interest.

Andacollo

Andacollo reported production decreased 37% over the prior year quarter primarily due to lower grades that were anticipated by the mine plan throughout calendar 2014. Teck has returned to mining close to reserve grade, and we expect that trend to continue.

Cortez

Reported production at Cortez increased almost ten-fold over the prior year quarter as surface mining activity occurred at the Pipeline and Gap pits, where our royalty applies, while no significant mining activity occurred in these areas during the prior year quarter. Additionally, roaster ore from refractory material stockpiled at Cortez was transported to Goldstrike for processing during the current quarter, while limited roaster ore shipments occurred during the prior year quarter.

Holt

Reported production at Holt decreased 13% over the prior year quarter as the tonnage milled and the grade processed were both slightly down during the current quarter.

Mt. Milligan

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Thompson Creek reported production of 60,400 ounces of payable gold in the current quarter, an increase of 63% over the previous quarter, primarily due to higher gold grades and recovery. Mill throughput averaged 40,445 tonnes per day during the current quarter, up 5% compared to the previous quarter. Throughput was impacted by downtime to make various adjustments to the grinding and flotation circuits, as well as to remediate some minor electrical issues. Thompson Creek expects these modifications will provide improved performance in the December quarter as they target 80% (48,000 tonnes per day) of design capacity by the end of calendar 2014.

During the quarter ended September 30, 2014, RGLD Gold purchased approximately 13,600 ounces of physical gold, consisting of approximately 7,000 ounces from the final settlement of Thompson Creek's third, fourth and fifth shipments from the Mt. Milligan mine and approximately 6,600 ounces upon provisional payment relating to Thompson Creek's eighth and ninth shipments. RGLD Gold sold approximately 15,300 ounces of gold during the period at an average price of \$1,281 per ounce, and had approximately 6,100 ounces of gold in inventory as of September 30, 2014.

Deliveries of gold to RGLD Gold are a product of the gold ounces contained in concentrates from Mt. Milligan, a 97% payable factor, and our 52.25% stream interest; and, for the first 12 concentrate shipments from Mt. Milligan, are based on Thompson Creek's receipt of first provisional payments under

Table of Contents

each of its concentrate sales agreements. For shipments 1-4, 75% of the gold was delivered based upon Thompson Creek's receipt of the first provisional payment under each concentrate sales agreement and 25% of the gold ounces was delivered based upon final settlement under each agreement. For shipments 5-8, those percentages are 50% and 50%, respectively, and for shipments 9-12, the percentages are 25% and 75%, respectively. Thereafter, all deliveries to RGLD Gold will be based solely on final settlement timing and volumes under Thompson Creek's concentrate sales agreements.

Deliveries to RGLD Gold can be affected by several factors that make it difficult to calculate our quarterly Mt. Milligan revenue based solely on Thompson Creek's reported quarterly production, including the timing of Thompson Creek's concentrate shipments and the provisional and final settlement terms applicable to each shipment, neither of which are known to RGLD Gold prior to the shipment date. RGLD Gold receives physical metal within two days after Thompson Creek records a sale, which in turn can take between five days and several weeks post-shipment. RGLD Gold currently sells most of the delivered gold within three weeks of receipt, and recognizes revenue on its streaming transactions when the metal received is sold.

Mulatos

Reported production decreased 32% over the prior year quarter. Alamos has stated that the Mulatos mine is transitioning from open pit to both open pit and underground mining in order to access higher grade mineral reserves. In addition, mill improvements were underway and are expected to be completed by the end of the December 2014 quarter. In spite of the deferral of high grade mill production from San Carlos and the September quarter rainy season in Mexico, Alamos continues to maintain the lower end of their calendar year production guidance for 2014.

Peñasquito

Reported gold, lead and zinc production increased 41%, 4% and 16%, respectively, while reported silver production decreased slightly, over the prior year quarter. Goldcorp reported that it is mining in the higher grade portion of the pit, which it expects will continue through calendar 2014 at a projected throughput of 110,000 tonnes per day.

Robinson

Reported gold production decreased 28% and reported copper production increased 47% over the prior year quarter. Gold production declined due to lower gold grades and recovery. Gold recovery was adversely impacted by high pyrite ores that carry gold and are rejected in flotation. Copper production increased due to higher quality ore encountered at Ruth West. KGHM expected to complete mining in the Kimbley pit during the September 2014 quarter, while continuing to develop the Ruth East pit so that it can be the primary ore supplier in the December 2014 quarter and in calendar 2015.

Voisey's Bay

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Reported nickel and copper production decreased 40% and 37%, respectively, over the prior year quarter due to lower ore grades. Concentrate production was also impacted due to a ten day planned maintenance shutdown on the Voisey's Bay mill. In July, Long Harbour achieved a major milestone with the production of the first finished nickel from the facility. Initially, Long Harbour will process primarily nickel matte from PT Vale Indonesia, and transitioning to processing solely concentrate from Voisey's Bay at a later stage.

In anticipation of the transition from processing Voisey's Bay nickel concentrates at Vale's Sudbury and Thompson smelters to processing at the Long Harbour hydrometallurgical plant, the Company has engaged in discussions with Vale concerning calculation of the royalty once Voisey's Bay nickel

Table of Contents

concentrates are processed at Long Harbour. Vale proposed a calculation of the royalty that the Company estimates could result in the substantial reduction of royalty payable to the Company on Voisey's Bay nickel concentrates processed at Long Harbour. While the Company may continue to engage in discussions concerning calculation of the royalty on nickel concentrates processed at Long Harbour, there is no guaranty that the Company and Vale will reach agreement on the proper calculation under the terms of the royalty agreement. If no agreement is reached, the Company intends to vigorously pursue all legal remedies to ensure the appropriate calculation of the royalty and to enforce our royalty interests at Voisey's Bay.

Results of Operations

Quarter Ended September 30, 2014, Compared to Quarter Ended September 30, 2013

For the quarter ended September 30, 2014, we recorded net income attributable to Royal Gold stockholders of \$18.7 million, or \$0.29 per basic and diluted share, as compared to net income attributable to Royal Gold stockholders of \$15.2 million, or \$0.23 per basic share and diluted share, for the quarter ended September 30, 2013. The increase in our earnings per share was primarily attributable to an increase in revenue, as discussed further below.

For the quarter ended September 30, 2014, we recognized total revenue of \$69.0 million, at an average gold price of \$1,282 per ounce, an average silver price of \$19.76 per ounce, an average copper price of \$3.17 per pound and an average nickel price of \$8.43 per pound, compared to revenue of \$56.5 million, at an average gold price of \$1,326 per ounce, an average silver price of \$21.32 per ounce, an average copper price of \$3.21 per pound and an average nickel price of \$6.31 per pound for the quarter ended September 30, 2013. Revenue and the corresponding production attributable to our royalty interests for the quarter ended September 30, 2014 compared to the quarter ended September 30, 2013 is as follows:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Other(3)	Various	\$ 14,225	N/A		\$ 17,111	N/A	
Total Revenue		\$ 69,026			\$ 56,487		

(1) Reported production relates to the amount of metal sales, subject to our royalty interests, for the three months ended September 30, 2014 and 2013, as reported to us by the operators of the mines, and may differ from the operators public reporting.

(2) For our streaming interest at Mt. Milligan, our revenue is a product of the reported production, our 52.25% stream interest, an applicable provisional percentage (for the first 12 shipments only) and an average gold sale price of \$1,281 per ounce for the three months ended September 30, 2014. During the three months ended September 30, 2014, Thompson Creek reported production of 60,400 ounces of gold at Mt. Milligan, and the Company sold approximately 15,300 ounces and had approximately 6,100 ounces of gold in inventory as of September 30, 2014. Production began at Mt. Milligan during the fourth quarter of calendar 2013.

(3) Individually, no royalty included within the Other category contributed greater than 5% of our total revenue for either period.

The increase in revenue for the quarter ended September 30, 2014, compared with the quarter ended September 30, 2013, resulted primarily from new production at Mt. Milligan and production increases at Cortez and Peñasquito. These increases were partially offset by a decrease in the average gold, silver and copper prices and decreases in production primarily at Andacollo, Voisey s Bay and Mulatos. Please refer to

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Property Developments earlier within this MD&A for further discussion on any recent developments regarding properties covered by certain of our royalty interests.

Cost of sales were approximately \$6.7 million for the three months ended September 30, 2014, compared to zero for the three months ended September 30, 2013. Cost of sales is specific to our streaming agreement for Mt. Milligan, which began production during the fourth quarter of calendar 2013, and is the

Table of Contents

result of the Company's purchases of gold for a cash payment of the lesser of \$435 per ounce, or the prevailing market price of gold when purchased.

General and administrative expenses increased to \$7.1 million for the three months ended September 30, 2014, from \$6.6 million for the three months ended September 30, 2013. The increase was primarily due to an increase in non-cash stock-based compensation as a result of management's change in estimate for the number of performance shares that are expected to vest in future period. Refer to Note 7 of our notes to consolidated financial statements for further discussion on the Company's stock-based compensation.

During the quarter ended September 30, 2014, we recognized income tax expense totaling \$4.0 million compared with \$4.8 million during the quarter ended September 30, 2013. This resulted in an effective tax rate of 17.3% in the current period, compared with 24.1% in the quarter ended September 30, 2013. The decrease in the effective tax rate for the quarter ended September 30, 2014 is primarily related to (i) a favorable tax rate associated with certain operations in lower-tax jurisdictions and (ii) a decrease in tax expense due to the Chilean tax legislation enacted in the quarter and the re-measurement of the Chilean long term deferred tax asset to the higher corporate income tax rate. The decrease in tax expense was partially offset by an increase in current year tax expense due to accrual for uncertain tax positions. Excluding the enactment of the Chilean tax legislation, the effective tax rate for the three months ended September 30, 2014, would have been 28.2%. For a complete discussion of the factors that influence our effective tax rate, refer to Note 12 to the notes to consolidated financial statements in the Company's Fiscal 2014 10-K.

Liquidity and Capital Resources

Overview

At September 30, 2014, we had current assets of \$757.4 million compared to current liabilities of \$20.8 million for a current ratio of 36 to 1. This compares to current assets of \$736.0 million and current liabilities of \$22.5 million at June 30, 2014, resulting in a current ratio of approximately 33 to 1. The increase in our current ratio was primarily attributable to an increase in our cash and equivalents during the period. Please refer to "Summary of Cash Flows" below for further discussion on changes to our cash and equivalents during the period.

During the quarter ended September 30, 2014, liquidity needs were met from \$69.0 million in revenue and our available cash resources. As of September 30, 2014, the Company had \$450 million available and no amounts outstanding under its revolving credit facility. The Company was in compliance with each financial covenant under its revolving credit facility as of September 30, 2014. Refer to Note 5 of our notes to consolidated financial statements for further discussion on our debt.

We believe that our current financial resources and funds generated from operations will be adequate to cover anticipated expenditures for debt service, general and administrative expense costs and capital expenditures for the foreseeable future. Our current financial resources are also available to fund dividends and for acquisitions of royalty and stream interests, including the remaining commitments incurred in connection with the Phoenix Gold, Ilovitza and Tulsequah Chief stream acquisitions. Our long-term capital requirements are primarily affected by our ongoing acquisition activities. The Company currently, and generally at any time, has acquisition opportunities in various stages of active review. In the event of one or more substantial royalty interest or other acquisitions, we may seek additional debt or equity financing as necessary.

Please refer to our risk factors included in Part 1, Item 1A of our Fiscal 2014 10-K for a discussion of certain risks that may impact the Company's liquidity and capital resources.

Table of Contents

Summary of Cash Flows

Operating Activities

Net cash provided by operating activities totaled \$52.5 million for the three months ended September 30, 2014, compared to \$35.5 million for the three months ended September 30, 2013. The increase was primarily due to an increase in proceeds received from our royalty interests, net of production taxes, of approximately \$9.7 million.

Investing Activities

Net cash used in investing activities totaled \$6.3 million for the three months ended September 30, 2014, compared to cash used in investing activities of \$48.1 million for the three months ended September 30, 2013. The decrease in cash used in investing activities is primarily due to a decrease in funding for royalty or stream acquisitions. The Company made its final commitment payment to Thompson Creek (\$12.9 million) as part of the Mt. Milligan gold stream acquisition during the quarter ended September 30, 2013. The Company also acquired a royalty on the El Morro copper-gold project for \$35 million during the prior year quarter.

Financing Activities

Net cash used in financing activities totaled \$14.2 million for the three months ended September 30, 2014, compared to cash used in financing activities of \$13.6 million for the three months ended September 30, 2013. The increase in cash used in financing activities is primarily attributable to an increase in the common stock dividend payment, which was the result of an increase in the dividend rate when compared to the same period of the prior year.

Recently Adopted Accounting Standards

There were no new accounting standards adopted during the quarter ended September 30, 2014.

Critical Accounting Policies

Asset Impairment

Edgar Filing: ROYAL GOLD INC - Form 10-Q

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Our estimates of gold, silver, copper, nickel and other metal prices, operator's estimates of proven and probable reserves related to our royalty or streaming properties, and operator's estimates of operating, capital and reclamation costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty interests in mineral properties. Although we have made our best assessment of these factors based on current market conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty

Table of Contents

interests. As part of the Company's regular asset impairment analysis, the Company determined that one production stage royalty interest and one exploration stage royalty interest should be written down to zero for a total impairment of \$1.8 million as of September 30, 2014.

Forward-Looking Statements

Cautionary Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: With the exception of historical matters, the matters discussed in this Quarterly Report on Form 10-Q are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from projections or estimates contained herein. Such forward-looking statements include, without limitation, statements regarding projected production estimates and estimates pertaining to timing and commencement of production from the operators of properties where we hold royalty and stream interests; effective tax rate estimates; the adequacy of financial resources and funds to cover anticipated expenditures for general and administrative expenses as well as costs associated with exploration and business development and capital expenditures, and our expectation that substantially all our revenues will be derived from royalty interests. Words such as may, could, should, would, believe, estimate, expect, anticipate, plan, forecast, potential, intend, continue, project and variations of words and similar expressions generally indicate forward-looking statements, which speak only as of the date the statement is made. Do not unduly rely on forward-looking statements. Actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, among others:

- changes in gold and other metals prices on which our royalty interests are paid or changes in prices of the primary metals mined at properties where we hold royalty interests;
- the production at or performance of properties where we hold royalty interests;
- the ability of operators to bring projects, particularly development stage properties, into production on schedule or operate in accordance with feasibility studies;
- challenges to mining, processing and related permits and licenses, or to applications for permits and licenses, by or on behalf of indigenous populations, non-governmental organizations or other third parties;
- decisions and activities of the operators of properties where we hold royalty interests;
- liquidity or other problems our operators may encounter;

Edgar Filing: ROYAL GOLD INC - Form 10-Q

- hazards and risks at the properties where we hold royalty interests that are normally associated with developing and mining properties, including unanticipated grade and geological, metallurgical, processing or other problems, mine operating and ore processing facility problems, pit wall or tailings dam failures, industrial accidents, environmental hazards and natural catastrophes such as floods or earthquakes and access to raw materials, water and power;
- changes in operators' mining, processing and treatment techniques may change the production of minerals subject to our royalty interests;
- changes in the methodology employed by our operators to calculate our royalty interests in accordance with the agreements that govern them;
- changes in project parameters as plans of the operators of properties where we hold royalty interests are refined;
- changes in estimates of reserves and mineralization by the operators of properties where we hold royalty interests;

Table of Contents

- contests to our royalty interests and title and other defects to the properties where we hold royalty interests;

- economic and market conditions;

- future financial needs;

- federal, state and foreign legislation governing us or the operators of properties where we hold royalty interests;

- the availability of royalty interests for acquisition or other acquisition opportunities and the availability of debt or equity financing necessary to complete such acquisitions;

- our ability to make accurate assumptions regarding the valuation, timing and amount of revenue to be derived from our royalty interests when evaluating acquisitions;

- risks associated with conducting business in foreign countries, including application of foreign laws to contract and other disputes, environmental, real estate, contract and permitting laws, currency fluctuations, expropriation of property, repatriation of earnings, taxation, price controls, inflation, import and export regulations, community unrest and labor disputes, endemic health issues, corruption, enforcement and uncertain political and economic environments;

- changes in laws governing us, the properties where we hold royalty interests or the operators of such properties;

- risks associated with issuances of additional common stock or incurrence of indebtedness in connection with acquisitions or otherwise including risks associated with the issuance and conversion of convertible notes;

- acquisition and maintenance of permits and authorizations, completion of construction and commencement and continuation of production at the properties where we hold royalty interests;

- changes in management and key employees; and

- failure to complete future acquisitions;

as well as other factors described elsewhere in this report and our other reports filed with the SEC. Most of these factors are beyond our ability to predict or control. Future events and actual results could differ materially from those set forth in, contemplated by or underlying the forward-looking statements. Forward-looking statements speak only as of the date on which they are made. We disclaim any obligation to update any forward-looking statements made herein, except as required by law. Readers are cautioned not to put undue reliance on forward-looking statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our earnings and cash flows are significantly impacted by changes in the market price of gold and other metals. Gold, silver, copper, nickel and other metal prices can fluctuate significantly and are affected by numerous factors, such as demand, production levels, economic policies of central banks, producer hedging, world political and economic events and the strength of the U.S. dollar relative to other currencies. Please see *Volatility in gold, silver, copper, nickel and other metal prices may have an adverse impact on the value of our royalty interests and reduce our revenues. Certain contracts governing our royalty interests have features that may amplify the negative effects of a drop in metal prices,* under Part I, Item 1A of our Fiscal 2014 10-K, for more information about factors that can affect

Table of Contents

gold, silver, copper, nickel and other metal prices as well as historical gold, silver, copper and nickel prices.

During the three month period ended September 30, 2014, we reported revenue of \$69.0 million, with an average gold price for the period of \$1,282 per ounce, an average silver price of \$19.76 per ounce, an average copper price of \$3.17 per pound and an average nickel price of \$8.43 per pound. Approximately 76% of our total recognized revenues for the three months ended September 30, 2014 were attributable to gold sales from our gold producing interests, as shown within the MD&A. For the three months ended September 30, 2014, if the price of gold had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$5.7 million.

Approximately 10% of our total recognized revenues for the three months ended September 30, 2014 were attributable to copper sales from our copper producing interests. For the three months ended September 30, 2014, if the price of copper had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.7 million.

Approximately 4% of our total recognized revenues for the three months ended September 30, 2014 were attributable to silver sales from our silver producing interests. For the three months ended September 30, 2014, if the price of silver had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$0.4 million.

Approximately 4% of our total recognized revenues for the three months ended September 30, 2014 were attributable to nickel sales from our nickel producing interests. For the three months ended September 30, 2014, if the price of nickel had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.4 million.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of September 30, 2014, the Company's management, with the participation of the President and Chief Executive Officer (the principal executive officer) and Chief Financial Officer and Treasurer (the principal financial and accounting officer) of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on such evaluation, the Company's President and Chief Executive Officer and its Chief Financial Officer and Treasurer have concluded that, as of September 30, 2014, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and that such information is accumulated and communicated to the Company's management, including the President and Chief Executive Officer and its Chief Financial Officer and Treasurer, as appropriate to allow timely decisions regarding required disclosure.

Disclosure controls and procedures involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human failures. As a result, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource

Edgar Filing: ROYAL GOLD INC - Form 10-Q

constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Table of Contents

Changes in Internal Controls

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2014, that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Voisey's Bay

Refer to Note 12 of our notes to consolidated financial statements for a discussion on litigation associated with our Voisey's Bay royalty. There was no material development to this litigation during the three months ended September 30, 2014.

ITEM 1A. RISK FACTORS

Information regarding risk factors appears in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Statements, and various risks faced by us are also discussed elsewhere in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations of this Quarterly Report on Form 10-Q. In addition, risk factors are included in Part I, Item 1A of our Fiscal 2014 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS

The exhibits to this Quarterly Report on Form 10-Q are listed in the Exhibit Index.
