Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the fiscal year ended December 30, 2012

or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 001-35406

Illumina, Inc.

(Exact name of registrant as specified in Its charter)

Delaware

33-0804655

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

5200 Illumina Way

92122

San Diego, California

(Zip Code)

(Address of principal executive offices)

Registrant's telephone number, including area code: (858) 202-4500

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common Stock, \$0.01 par value (including associated
Preferred Stock Purchase Rights)

The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities
Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during
the preceding 12 months (or for such shorter period that the registrant was required to submit and post such
files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained
herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer,
or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting
company" in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: ILLUMINA INC - Form 10-K

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of January 31, 2013, there were 124,040,754 shares (excluding 46,449,505 shares held in treasury) of the Registrant's Common Stock outstanding. The aggregate market value of the Common Stock held by non-affiliates of the Registrant as of July 2, 2012 (the last business day of the registrant's most recently completed second fiscal quarter), based on the closing price for the Common Stock on The NASDAQ Global Select Market on June 29, 2012 (the last trading day before July 2, 2012), was \$3.8 billion. This amount excludes an aggregate of approximately 29.3 million shares of Common Stock held by officers and directors and each person known by the registrant to own 10% or more of the outstanding Common Stock. Exclusion of shares held by any person should not be construed to indicate that such person possesses the power, directly or indirectly, to direct or cause the direction of the management or policies of the registrant, or that the registrant is controlled by or under common control with such person.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for the 2013 annual meeting of stockholders are incorporated by reference into Items 10 through 14 of Part III of this Report.

PART I

ITEM 1. Business

Overview

We are a leading developer, manufacturer, and marketer of life science tools and integrated systems for the analysis of genetic variation and function. We were incorporated in California in April 1998 and reincorporated in Delaware in July 2000. Our principal executive offices are located at 5200 Illumina Way, San Diego, California 92122. Our telephone number is (858) 202-4500.

Using our proprietary technologies, we provide a comprehensive line of genetic analysis solutions, with products and services that serve a broad range of highly interconnected markets, including sequencing, genotyping, and gene expression. Our customers include leading genomic research centers, academic institutions, government laboratories, and clinical research organizations, as well as pharmaceutical, biotechnology, agrigenomics, and consumer genomics companies, and in vitro fertilization clinics.

Our broad portfolio of systems, consumables, and analysis tools are designed to simplify genetic analysis. This portfolio addresses a range of genomic complexity, price points, and throughputs, enabling researchers to select the best solution for their scientific challenge. Our leading edge sequencing instruments can be used to efficiently perform a range of nucleic acid (DNA, RNA) analyses on large numbers of samples. For more focused studies, our array-based solutions provide ideal tools to perform genome-wide association studies (GWAS) involving single-nucleotide polymorphism genotyping and copy number variation analyses, as well as gene expression profiling, and other DNA, RNA, and protein studies.

In 2012 and early 2013, we took significant steps to support our goal of becoming the leader in genomic-based diagnostics by acquiring BlueGnome Ltd. (BlueGnome) in September 2012 and signing a definitive agreement to acquire Verinata Health, Inc. (Verinata) in January 2013. Our acquisition of BlueGnome, a leading provider of solutions for the screening of genetic abnormalities associated with developmental delay, cancer, and infertility, enhances our ability to establish integrated solutions in reproductive health and cancer. Upon completion of the Verinata acquisition, our focus on reproductive health will be further strengthened by having access to Verinata's veriFi® prenatal test, the broadest non-invasive prenatal test (NIPT) available today for high-risk pregnancies, and what we believe to be the most comprehensive intellectual property portfolio in the NIPT industry. To further enhance our genetic analysis workflows, in 2011 we acquired Epicentre Technologies Corporation, a leading provider of nucleic acid sample preparation reagents and specialty enzymes for sequencing and microarray applications. In 2010, through our acquisition of Helixis, Inc. (Helixis), we expanded our portfolio to include real-time polymerase chain reaction (PCR), one of the most widely used technologies in life sciences. Our Eco Real-Time PCR System provides researchers with an affordable, full-featured system to perform targeted validation studies.

Industry Background

Genetics Primer

The instruction set for all living cells is encoded in deoxyribonucleic acid, or DNA, with the complete set of DNA for any organism referred to as its genome. DNA contains small regions called genes, which comprise a string of nucleotide bases labeled A, C, G, and T, representing adenine, cytosine, guanine, and thymine, respectively. These nucleotide bases are present in a precise order known as the DNA sequence. When a gene is “expressed,” a partial copy of its DNA sequence - called messenger RNA (mRNA) - is used as a template to direct the synthesis of a particular protein. Proteins, in turn, direct all cellular function. The illustration below is a simplified gene expression schematic.

Molecular Diagnostics Market

Molecular diagnostics is the fastest growing segment of the diagnostics market. At present, this growth is largely driven by infectious disease testing, but molecular diagnostics is rapidly expanding into new areas such as reproductive health (including non-invasive prenatal testing) and cancer management - both are areas of focus for our diagnostics business. The increasing efficacy of molecular diagnostics is driven by the continued discovery of genetic markers with proven clinical utility, the increasing adoption of genetic-based diagnostic tests, and the expansion of reimbursement programs to include a greater number of approved molecular diagnostic tests. We believe our sequencing and array instrument platforms are foundational to continued growth in this market.

In September 2012 we acquired BlueGnome, a leading provider of solutions for screening genetic abnormalities associated with developmental delay, cancer, and infertility. The combination of BlueGnome's solutions with our microarray

Table of Contents

Figure 1: Illumina Platform Overview:

Sequencing Technology

DNA sequencing is the process of determining the order of nucleotide bases (A, C, G, or T) in a DNA sample. Our HiSeq 2500/2000, HiSeq 1500/1000, Genome Analyzer IIX, MiSeq, and HiScanSQ systems represent a family of systems that we believe are setting the standard for productivity, cost-effectiveness, and accuracy among next-generation sequencing technologies. They are used by customers to perform whole-genome, de novo, and targeted re-sequencing of genomes, and to analyze specific gene regions and genes.

Whole-genome sequencing determines an organism's complete DNA sequence. In de novo sequencing, the goal is to sequence a representative sample from a species never before sequenced. In targeted re-sequencing, a sequence of nucleotide bases is compared to a standard or reference sequence from a previously sequenced species to identify changes that reflect genetic variation. Understanding the similarities and differences in DNA sequence between and within species furthers our understanding of the function of the structures encoded in the DNA.

Our DNA sequencing technology is based on our proprietary reversible terminator-based sequencing chemistry, referred to as sequencing by synthesis (SBS) biochemistry. Our SBS sequencing technology provides researchers with a broad range of applications and the ability to sequence even large mammalian genomes in days rather than weeks or years. Our highest throughput sequencing instrument, the HiSeq 2500, has the ability to generate up to 600 gigabases (Gb) (five human genomes) of DNA sequence in ten days, or up to 120 Gb in approximately one day in rapid run mode. Since the launch of our first sequencing system in 2007, our systems have reduced the cost of sequencing by more than a factor of 100.

BeadArray Technology

Our BeadArray technology combines microscopic beads and a substrate in a proprietary manufacturing process to produce arrays that can perform many assays simultaneously, enabling large-scale analysis of genetic variation and biological function in a unique high-throughput, cost effective, and flexible manner. The arrays manufactured using BeadArray technology are imaged by our iScan, HiScan, and HiScanSQ systems for a broad range of DNA and RNA analysis applications including SNP discovery, SNP genotyping, CNV analysis, gene expression analysis, and methylation analysis.

Our proprietary BeadArray technology consists of microscopic silica beads, with each bead covered with hundreds of thousands of copies of oligonucleotides, or oligos, that act as the capture sequences in one of our assays. We deploy our BeadArray technology on BeadChips - silicon wafers the size of a microscope slide, with varying numbers of sample sites per slide. BeadChips are chemically etched to create tens of millions of wells for each sample site.

Table of Contents

Using our BeadArray technology, we achieve high-throughput analysis with a high density of test sites per array, and are able to format arrays in various configurations. We seek to maximize cost effectiveness by reducing consumption of expensive consumables and valuable samples, and through the low manufacturing costs associated with our technologies. Our ability to vary the size, shape, and format of the well patterns and to create specific bead pools for different applications provides the flexibility to address multiple markets and market segments. These features enable our BeadArray technology to be applied to high-growth markets of SNP genotyping and CNV analysis and have allowed us to be a key player in the gene expression market.

Eco Real-Time PCR Technology

In 2010, we purchased Helixis and its novel real-time PCR technology and introduced the Eco Real-Time PCR System to the market. Real-Time PCR (also known as quantitative PCR or qPCR) is used to amplify and simultaneously quantify a targeted DNA molecule, with applications in gene expression, viral quantification, array data validation, pathogen detection, and genotyping. The procedure follows the same steps as PCR, whereby thermal cycling (alternately heating and cooling the DNA sample from 20 to 40 times) causes the DNA to self-replicate, resulting in the doubling of DNA product with each cycle. Real-time PCR uses various fluorescent detection chemistries to enable the monitoring of the PCR reaction as it progresses. Data are collected at each cycle rather than at the end of the reaction, providing higher precision, increased sensitivity, increased dynamic range, and higher resolution.

The Eco System combines a proprietary thermal system, four-color multiplex capabilities, and a fine-tuned optical system to deliver accurate qPCR results. Its unique design provides superior thermal uniformity, supporting high-quality PCR performance for demanding applications such as high resolution melt (HRM) curve analysis used for SNP genotyping, DNA fingerprinting, species identification, HLA compatibility typing, allelic prevalence, and DNA methylation analysis. Measuring just over one cubic foot in size, we believe the Eco System's overall performance rivals larger, more expensive systems.

Our Products

Using our proprietary technologies, our products give our customers the ability to analyze the genome at any level of complexity, from whole-genome sequencing to low-multiplex assays, and enable us to serve a number of markets, including research, agriculture, forensics, pharmaceuticals, and genomic-based molecular diagnostics.

The majority of our product sales consist of instruments and consumables (which include reagents, flow cells, and BeadChips) based on our proprietary technologies. For the fiscal years ended December 30, 2012, January 1, 2012, and January 2, 2011, instrument sales comprised 27%, 35%, and 36%, respectively, of total revenues, and consumable sales represented 64%, 56%, and 56%, respectively, of total revenues.

Sequencing Platforms

Based on our proprietary SBS technology, our next-generation sequencing platforms are designed to meet the workflow, output, and accuracy demands of a full range of sequencing applications. Designed for high-throughput sequencing, the HiSeq 2500 is a fast, easy-to-use instrument that can generate either up to 600 Gb of data in high-output mode or up to 120 Gb in rapid run mode. In the high-output mode, the HiSeq 2500 processes either up to five human genomes (120 Gb per genome) in ten days or a single human genome at 30x coverage in approximately one day. Offering the same flexibility, the HiSeq 1500 accommodates lower throughput needs, with an easy upgrade path to the HiSeq 2500. Launched in 2011, our MiSeq Personal Sequencing System delivers the fastest time to an answer (as little as 2-3 hours) and offers a breadth of sequencing applications in a compact and economical instrument

to meet the needs of individual researchers.

Sequencing/Array Combination Platforms

The HiScanSQ combines our SBS sequencing technology and HiScan microarray analysis instrumentation into one system, with a modular design that can evolve with changing research needs. This flexible system allows researchers to use our sequencing and array technologies interactively to bring increased power to their experiments.

Array Platforms

The HiScan and iScan Systems are dedicated array scanners that support the rapid, sensitive, and accurate imaging of our array-based genetic analysis products. They incorporate high-performance lasers, optics, and detection systems, delivering sub-micron resolution and unmatched throughput rates. The HiScan and iScan support our Infinium, GoldenGate, DASL, gene expression, and methylation assays.

Table of Contents

Consumables

We have developed a variety of sample preparation and sequencing kits to simplify workflows and accelerate analysis. Some provide all the necessary consumables needed for analyses, such as our Standard Sequencing Kit (SBS chemistry on our sequencing platforms) and Infinium Assay Kit (array-based genotyping on our array platforms). Others support more discrete analyses, such as our Paired-End Genomic DNA Sample Prep Kit for streamlining library preparation for the generation of 200-500 kb insert paired-end reads for sequencing, gene expression, and epigenetic analysis. Our TruSeq SBS Sequencing Kit enhances sequencing studies with our HiSeq, Genome Analyzer IIx, and MiSeq systems, by enabling researchers to extend the read lengths, achieve higher Gb of mappable data, and deliver the highest yield of perfect reads to maximize the ability to accurately characterize the genome. Through our acquisition of Epicentre Technologies Corporation in 2011, we acquired the proprietary Nextera technology for next-generation sequencing library preparation. This technology has enabled us to offer sequencing library preparation kits with lower sample input requirements that greatly simplify genetic analysis workflows and significantly reduce the time from sample preparation to answer.

Our InfiniumHD Whole-Genome BeadChips represent our most technologically advanced multi-sample DNA analysis microarrays, enabling the interrogation of up to approximately 5 million markers per sample, depending on the BeadChip. The most recent additions to the Omni family, the HumanOmni5-Quad, the HumanOmni2.5, and the HumanOmni1S BeadChips, provide comprehensive coverage of common and rare variants identified by the 1000 Genomes Project for performing rich GWAS projects. This product line also includes agriculturally relevant genome panels such as the BovineHD and MaizeSNP50 BeadChips.

For researchers who want to study focused genomic regions of interest, or are interested in organisms for which there are no standard products, we offer iSelect Custom Genotyping BeadChips. Easily developed to fit any experimental design, these SNP genotyping arrays can be used to investigate from 3,000 to 1,000,000 markers targeting any species.

Through our acquisition of BlueGnome in 2012, we are a leading provider of solutions for the screening of genetic abnormalities associated with developmental delay, cancer, and infertility. BlueGnome supplies to some of the world's leading in vitro fertilization (IVF) centers a preimplantation genetic screening (PGS) test for counting the chromosomes in a single human cell. Studies have shown that PGS improves IVF success, increasing pregnancy rates for women and reducing miscarriages and multiple births.

Our reproductive health offerings also include CytoChip, a test for the investigation of genetic abnormalities mainly associated with developmental delay or with complex leukemias. CytoChip is used by more than 200 labs across 40 countries worldwide as a first-line cytogenetic test, replacing traditional G-band karyotyping.

Real-time PCR Platforms

The Eco Real-Time PCR System provides fast, accurate qPCR results. Its icon-driven user interface simplifies experimental design and setup, while a straightforward workflow streamlines operation, enabling the system to perform qPCR on 48 samples in less than 40 minutes. As our first entry into the qPCR market, we believe the smaller, lower-cost, full-featured Eco System will enable more scientists to use real-time PCR technology in their research.

Our Services

In addition to the products we supply to customers, we also provide sequencing and genotyping services through our CLIA-certified, CAP-accredited laboratory.

FastTrack Services

One of the ways in which we compete and extend the reach of our systems in the genetic analysis market is to deliver services that leverage our proprietary technologies and the expertise of our scientists to perform genotyping and sequencing services for our customers. We began offering genotyping services to academic institutions, biotechnology, and pharmaceutical customers in 2002. The in-house molecular geneticists that make up our FastTrack Genotyping team help customers perform GWAS projects, linkage analysis, and fine mapping studies to meet their deadlines, employing a range of our products, including standard and custom GoldenGate, standard Infinium and Infinium HD, and iSelect Infinium assays. These projects range in size from a few hundred to over 10,000 samples.

have filed or have been granted counterparts for many of these patents and applications in foreign countries.

We also rely upon trade secrets, know-how, copyright, and trademark protection, as well as continuing technological innovation and licensing opportunities to develop and maintain our competitive position. Our success will depend in part on our ability to obtain patent protection for our products and processes, to preserve our trade secrets, to enforce our patents, copyrights and trademarks, to operate without infringing the proprietary rights of third parties, and to acquire licenses related to enabling technology or products.

We are party to various exclusive and non-exclusive license agreements and other arrangements with third parties that grant us rights to use key aspects of our array and sequencing technologies, assay methods, chemical detection methods, reagent kits, and scanning equipment. We have exclusive licenses from Tufts University to patents that are directed to our BeadArray technology. These patents were filed by Dr. David Walt, who is a member of our board of directors, the Chairman of our Scientific Advisory Board, and one of our founders. Our exclusive licenses expire with the termination of the underlying patents, which will occur between 2013 and 2020. We have additional nonexclusive license agreements with various third

use, handling, and disposal of hazardous substances.

Raw Materials

Our manufacturing operations require a wide variety of raw materials, electronic and mechanical components, chemical and biochemical materials, and other supplies. We have multiple commercial sources for many of our components and supplies; however, there are some raw materials and components that we obtain from single source suppliers. To mitigate potential risks arising from single source suppliers, we believe that we can redesign our products for alternative components or

Table of Contents

use alternative reagents, if required. In addition, while we generally attempt to keep our inventory at minimal levels, we purchase incremental inventory as circumstances warrant to protect our supply chain.

Competition

Although we believe that our products and services provide significant advantages over products and services currently available from other sources, we expect to continue to encounter intense competition from other companies that offer products and services for sequencing, SNP genotyping, gene expression, and molecular diagnostics markets. These include companies such as Affymetrix, Inc.; Agilent Technologies, Inc.; Complete Genomics, Inc.; General Electric Company; Life Technologies Corporation; Luminex Corporation; Pacific Biosciences of California, Inc.; QIAGEN N.V.; and Roche Diagnostics Corp., among others. Some of these companies have or will have substantially greater financial, technical, research, and other resources and larger, more established marketing, sales, distribution, and service organizations than we do. In addition, they may have greater name recognition than we do in the markets we address and in some cases a larger installed base of systems. Each of these markets is very competitive and we expect new competitors to emerge and the intensity of competition to increase. In order to effectively compete with these companies, we will need to demonstrate that our products have superior throughput, cost, and accuracy advantages over competing products.

Segment and Geographic Information

In accordance with the authoritative accounting guidance for segment reporting, we have determined that we have two operating segments for purposes of recording and reporting our financial results: Life Sciences and Diagnostics. Our Life Sciences operating segment includes all products and services related to the research market, namely the product lines based on our sequencing, array, and real-time PCR technologies. Our Diagnostics operating segment focuses on the emerging opportunity in molecular diagnostics. During all periods presented, our Diagnostics operating segment had limited activity. Accordingly, our financial results for both operating segments are reported on an aggregate basis as one reportable segment. We will begin reporting in two operating segments once revenues, operating profit or loss, or assets of the Diagnostics operating segment exceed 10% of the consolidated amounts.

We currently sell our products to a number of customers outside the United States, including customers in other areas of North America, Europe, and the Asia-Pacific region. Shipments to customers outside the United States totaled \$580.1 million, or 51% of our total revenue, during fiscal 2012, compared to \$526.8 million, or 50%, and \$403.8 million, or 45%, in fiscal 2011 and 2010, respectively. The U.S. dollar has been determined to be the functional currency of the Company's international operations due to the primary economic environment of our foreign subsidiaries. We expect that sales to international customers will continue to be an important and growing source of revenue. See note "15. Segment Information, Geographic Data, and Significant Customers" in Part II, Item 8 of this Form 10-K for further information concerning our foreign and domestic operations.

Backlog

Our backlog was approximately \$260 million and \$251 million at December 30, 2012 and January 1, 2012, respectively. Generally, our backlog consists of orders believed to be firm as of the balance sheet date; however, we may allow customers to make product substitutions as we launch new products. The timing of shipments depends on several factors, including agreed upon shipping schedules, which may span multiple quarters, and whether the product is catalog or custom. We expect the majority of the backlog as of December 30, 2012 to be shipped within the fiscal year ending December 29, 2013. Although we generally recognize revenue upon the transfer of title to a customer, we may be required to defer the recognition of revenue even after title transfer depending on the specific arrangement with a customer and the applicable accounting treatment.

Table of Contents

Environmental Matters

We are committed to the protection of our employees and the environment. Our operations require the use of hazardous materials that subject us to a variety of federal, state, and local environmental and safety laws and regulations. We believe we are in material compliance with current applicable laws and regulations; however, we could be held liable for damages and fines should contamination of the environment or individual exposures to hazardous substances occur. In addition, we cannot predict how changes in these laws and regulations, or the development of new laws and regulations, will affect our business operations or the cost of compliance.

Government Regulation

As we continue to expand our product lines to encompass products that are intended to be used for the diagnosis of disease, such as molecular diagnostic products, regulation by governmental authorities in the United States and other countries will be a significant factor in the development, testing, production, and marketing of such products. Products that we develop in the molecular diagnostic markets, depending on their intended use, will be regulated as medical devices by the FDA and comparable agencies of other countries and may require either receiving clearance following a pre-market notification process, also known as a 510(k) clearance, or premarket approval (PMA), from the FDA prior to marketing. Obtaining the requisite regulatory approvals can be expensive and may involve considerable delay.

The shorter 510(k) clearance process, which generally takes from three to six months after submission, but can take significantly longer, may be utilized if it is demonstrated that the new product is “substantially equivalent” to a similar product that has already been cleared by the FDA. The longer PMA process is much more costly, uncertain, and generally takes from nine months to two years after filing. Because we cannot be certain that any molecular diagnostic products that we develop will be subject to the shorter 510(k) clearance process, or will ultimately be approved at all, the regulatory approval process for such products may be significantly delayed and may be significantly more expensive than anticipated. If we fail to obtain, or experience significant delays in obtaining, regulatory approvals for molecular diagnostic products that we develop, we may not be able to launch or successfully commercialize such products in a timely manner, or at all.

Changes to the current regulatory framework, including the imposition of additional or new regulations, could arise at any time during the development or marketing of our products, which may negatively affect our ability to obtain or maintain FDA or comparable regulatory approval of our products, if required.

In addition, the regulatory approval or clearance process required to design, manufacture, market, sell, and support our existing and future products that are intended for, and marketed and labeled as, “Research Use Only,” or RUO, is uncertain if such products are used or could be used, even without our consent, for the diagnosis of disease. If the FDA or other regulatory authorities assert that any of our RUO products are subject to regulatory clearance or approval, our business, financial condition, or results of operations could be adversely affected.

Employees

As of December 30, 2012, we had a total of approximately 2,400 employees. We consider our employee relations to be positive. Our success will depend in large part upon our ability to attract and retain employees. In addition, we employ a number of temporary and contract employees. We face competition in this regard from other companies, research and academic institutions, government entities, and other organizations.

ITEM 1A. Risk Factors

Our business is subject to various risks, including those described below. In addition to the other information included in this Form 10-K, the following issues could adversely affect our operating results or our stock price.

Reduction or delay in research and development budgets and government funding may adversely affect our revenue.

A substantial portion of our revenue is derived from genomic research centers, academic institutions, government laboratories, and clinical research organizations, as well as pharmaceutical, biotechnology, agrigenomics, and consumer genomics companies, and their capital spending budgets can have a significant effect on the demand for our products and services. These budgets are based on a wide variety of factors, including the allocation of available resources to make purchases, funding from government sources, the spending priorities among various types of research equipment, and policies regarding capital expenditures during recessionary periods. Any decrease in capital spending or change in spending priorities of our customers could significantly reduce our revenue. Moreover, we have no control over the timing and amount of

Table of Contents

purchases by our customers, and, as a result, revenue from these sources may vary significantly due to factors that can be difficult to forecast. Any delay or reduction in purchases by our customers or our inability to forecast fluctuations in demand could harm our future operating results.

The timing and amount of revenues from customers that rely on government and academic research funding may vary significantly due to factors that can be difficult to forecast, and there remains significant uncertainty concerning government and academic research funding worldwide as governments in the United States and Europe, in particular, focus on reducing fiscal deficits while at the same time confronting slowing economic growth. Funding for life science research has increased more slowly during the past several years compared to previous years and has declined in some countries. Government funding of research and development is subject to the political process, which is inherently fluid and unpredictable. Other programs, such as defense, entitlement programs, or general efforts to reduce budget deficits could be viewed by governments as a higher priority. These budgetary pressures may result in reduced allocations to government agencies that fund research and development activities, such as the U.S. National Institute of Health, or NIH. For instance, the significance and timing of anticipated reductions to the NIH budget from March 2013 may be significantly impacted by the sequestration provisions of the Budget Control Act of 2011 and whether these provisions remain in effect. Past proposals to reduce budget deficits have included reduced NIH and other research and development allocations. Any shift away from the funding of life sciences research and development or delays surrounding the approval of government budget proposals may cause our customers to delay or forego purchases of our products, which could adversely affect our business, financial condition, or results of operations.

We face intense competition, which could render our products obsolete, result in significant price reductions, or substantially limit the volume of products that we sell.

We compete with life sciences companies that design, manufacture, and market products for analysis of genetic variation and biological function and other applications using a wide-range of competing technologies. We anticipate that we will continue to face increased competition as existing companies develop new or improved products and as new companies enter the market with new technologies. One or more of our competitors may render our technology obsolete or uneconomical. Some of our competitors have greater financial and personnel resources, broader product lines, a more established customer base, and more experience in research and development than we do. Furthermore, life sciences and pharmaceutical companies, which are our potential customers and strategic partners, could also develop competing products. We believe that customers in our markets display a significant amount of loyalty to their initial supplier of a particular product; therefore, it may be difficult to generate sales to potential customers who have purchased products from competitors. To the extent we are unable to be the first to develop or supply new products, our competitive position may suffer.

The market for molecular diagnostics products is currently limited and highly competitive, with several large companies already having significant market share, intellectual property portfolios, and regulatory expertise. Established diagnostic companies also have an installed base of instruments in several markets, including clinical and reference laboratories, which could deter acceptance of our products. In addition, some of these companies have formed alliances with genomics companies that provide them access to genetic information that may be incorporated into their diagnostic tests.

Our acquisitions expose us to risks that could adversely affect our business, and we may not achieve the anticipated benefits of acquisitions of businesses or technologies.

As part of our strategy to develop and identify new products, services, and technologies, we have made, and may continue to make, acquisitions of technologies, products, or businesses. Acquisitions involve numerous risks and operational, financial, and managerial challenges, including the following, any of which could adversely affect our

business, financial condition, or results of operations:

• difficulties in integrating new operations, technologies, products, and personnel;

• lack of synergies or the inability to realize expected synergies and cost-savings;

• difficulties in managing geographically dispersed operations;

• underperformance of any acquired technology, product, or business relative to our expectations and the price we paid;

• negative near-term impacts on financial results after an acquisition, including acquisition-related earnings charges;

• the potential loss of key employees, customers, and strategic partners of acquired companies;

Table of Contents

- claims by terminated employees and shareholders of acquired companies or other third parties related to the transaction;
- the issuance of dilutive securities, assumption or incurrence of additional debt obligations or expenses, or use of substantial portions of our cash;
- diversion of management’s attention and company resources from existing operations of the business;
- inconsistencies in standards, controls, procedures, and policies;
- the impairment of intangible assets as a result of technological advancements, or worse-than-expected performance of acquired companies; and
- assumption of, or exposure to, unknown contingent liabilities or liabilities that are difficult to identify or accurately quantify.

In addition, the successful integration of acquired businesses requires significant efforts and expense across all operational areas, including sales and marketing, research and development, manufacturing, finance, legal, and information technologies. There can be no assurance that any of the acquisitions we make will be successful or will be, or will remain, profitable. Our failure to successfully address the above risks may prevent us from achieving the anticipated benefits from any acquisition in a reasonable time frame, or at all.

Our success depends upon the continued emergence and growth of markets for analysis of genetic variation and biological function.

We design our products primarily for applications in the life sciences, diagnostic, agricultural, and pharmaceutical industries. The usefulness of our technologies depends in part upon the availability of genetic data and its usefulness in identifying or treating disease. We are focusing on markets for analysis of genetic variation and biological function, namely sequencing, genotyping, and gene expression profiling. These markets are new and emerging, and they may not develop as quickly as we anticipate, or reach their full potential. Other methods of analysis of genetic variation and biological function may emerge and displace the methods we are developing. Also, researchers may not be able to successfully analyze raw genetic data or be able to convert raw genetic data into medically valuable information. For instance, demand for our microarray products may be adversely affected if researchers fail to find meaningful correlations between genetic variation, such as SNPs, and disease susceptibility through genome wide association studies. In addition, factors affecting research and development spending generally, such as changes in the regulatory environment affecting life sciences and pharmaceutical companies, and changes in government programs that provide funding to companies and research institutions, could harm our business. If useful genetic data is not available or if our target markets do not develop in a timely manner, demand for our products may grow at a slower rate than we expect, and we may not be able to sustain profitability.

If the quality of our products does not meet our customers’ expectations, then our reputation could suffer and ultimately our sales and operating earnings could be negatively impacted.

In the course of conducting our business, we must adequately address quality issues associated with our products and services, including defects in our engineering, design, and manufacturing processes, as well as defects in third-party components included in our products. Because our instruments and consumables are highly complex, the occurrence of defects may increase as we continue to introduce new products and services and as we scale up manufacturing to meet increased demand for our products and services. Although we have established internal procedures to minimize risks that may arise from product quality issues, there can be no assurance that we will be able to eliminate or mitigate occurrences of these issues and associated liabilities. In addition, identifying the root cause of quality issues, particularly those affecting reagents and third-party components, may be difficult, which increases the time needed to address quality issues as they arise and increases the risk that similar problems could recur. Finding solutions to

quality issues can be expensive, and we may incur significant costs or lost revenue in connection with, for example, shipment holds, product recalls, and warranty or other service obligations. In addition, quality issues can impair our relationships with new or existing customers and adversely affect our brand image, and our reputation as a producer of high quality products could suffer, which could adversely affect our business, financial condition, or results of operations.

Our continued growth is dependent on continuously developing and commercializing new products.

Our target markets are characterized by rapid technological change, evolving industry standards, changes in customer needs, existing and emerging competition, strong price competition, and frequent new product introductions. Accordingly, our continued growth depends on continuously developing and commercializing new products and services, including improving

unable to secure a sufficient supply, we may not be able to obtain these components or materials on a timely basis or in sufficient quantities or qualities, or at all, in order to meet demand for our products. We may need to enter into contractual relationships with manufacturers for commercial-scale production of some of our products, or develop these capabilities internally, and there can be no assurance that we will be able to do this on a timely basis, in sufficient quantities, or on commercially reasonable terms. In addition, the lead time needed to establish a relationship with a new supplier can be lengthy, and we may experience delays in meeting demand in the event we must switch to a new supplier. The time and effort required to qualify a new supplier could result in additional costs, diversion of resources, or reduced manufacturing yields, any of which would negatively impact our operating results. Accordingly, we may not be able to establish or maintain reliable, high-volume manufacturing at commercially

Table of Contents

reasonable costs or at all. In addition, the manufacture or shipment of our products may be delayed or interrupted if the quality of the components or materials supplied by our vendors does not meet our requirements. Current or future social and environmental regulations or critical issues, such as those relating to the sourcing of conflict minerals from the Democratic Republic of the Congo or the need to eliminate environmentally sensitive materials from our products, could restrict the supply of components and materials used in production or increase our costs. Any delay or interruption to our manufacturing process or in shipping our products could result in lost revenue, which would adversely affect our business, financial condition, or results of operations.

If we lose our key personnel or are unable to attract and retain additional personnel, we may be unable to achieve our goals.

We are highly dependent on our management and scientific personnel, including Jay Flatley, our President and Chief Executive Officer. The loss of their services could adversely impact our ability to achieve our business objectives. In addition, the continued growth of our business depends on our ability to hire additional qualified personnel with expertise in molecular biology, chemistry, biological information processing, sales, marketing, and technical support. We compete for qualified management and scientific personnel with other life science companies, universities, and research institutions, particularly those focusing on genomics. Competition for these individuals, particularly in the San Diego and San Francisco area, is intense, and the turnover rate can be high. Failure to attract and retain management and scientific personnel would prevent us from pursuing collaborations or developing our products or technologies. Additionally, integration of acquired companies and businesses can be disruptive, causing key employees of the acquired business to leave. Further, we use stock options and restricted stock units to attract key personnel, incentivize them to remain with us, and align their interests with those of the Company by building long-term stockholder value. If our stock price decreases, the value of these equity awards decreases and therefore reduces a key employee's incentive to stay.

If we are unable to increase our manufacturing capacity and develop and maintain operation of our manufacturing capability, we may not be able to launch or support our products in a timely manner, or at all.

We continue to rapidly increase our manufacturing capacity to meet the anticipated demand for our products. Although we have significantly increased our manufacturing capacity and we believe we have plans in place sufficient to ensure we have adequate capacity to meet our current business plans, there are uncertainties inherent in expanding our manufacturing capabilities, and we may not be able to sufficiently increase our capacity in a timely manner. For example, manufacturing and product quality issues may arise as we increase production rates at our manufacturing facilities and launch new products. Also, we may not manufacture the right product mix to meet customer demand, especially as we introduce new products. As a result, we may experience difficulties in meeting customer, collaborator, and internal demand, in which case we could lose customers or be required to delay new product introductions, and demand for our products could decline. Additionally, in the past, we have experienced variations in manufacturing conditions and quality control issues that have temporarily reduced or suspended production of certain products. Due to the intricate nature of manufacturing complex instruments, consumables, and products that contain DNA, we may encounter similar or previously unknown manufacturing difficulties in the future that could significantly reduce production yields, impact our ability to launch or sell these products (or to produce them economically), prevent us from achieving expected performance levels, or cause us to set prices that hinder wide adoption by customers.

Additionally, we currently manufacture in a limited number of locations. Our manufacturing facilities are located in San Diego and Hayward, California; Madison, Wisconsin; Singapore; and Cambridge, United Kingdom. These areas are subject to natural disasters such as earthquakes, wildfires, or floods. If a natural disaster were to damage one of our facilities significantly or if other events were to cause our operations to fail, we may be unable to manufacture our

may be disproportionate to the actual import of the ruling itself. Furthermore, parties making claims against us may be able to obtain injunctive or other relief, which effectively could block our ability to develop further, commercialize, or sell products or services, and could result in the award of substantial damages against us. In the event of a successful infringement claim against us, we may be required to pay damages and obtain one or more licenses from third parties, or be prohibited from selling certain products or services. In addition, we may be unable to obtain these licenses at a reasonable cost, if at all. We could therefore incur substantial costs related to royalty payments for licenses obtained from third parties, which could negatively affect our gross margins. In addition, we could encounter delays in product introductions while we attempt to develop alternative methods or products. Defense of any lawsuit or failure to obtain any of these licenses on favorable terms could prevent us from commercializing products, and the prohibition of sale of any of our products or services could adversely affect our ability to grow or maintain profitability.

Our products, if used for the diagnosis of disease, could be subject to government regulation, and the regulatory approval and maintenance process for such products may be expensive, time-consuming, and uncertain both in timing and in outcome.

Changes in the value of the relevant currencies may affect the cost of certain items required in our operations. Changes in currency exchange rates may also affect the relative prices at which we are able to sell products in the same market. Our revenues from international customers may be negatively impacted as increases in the U.S. dollar relative to our international customers' local currency could make our products more expensive, impacting our ability to compete. Our costs of materials from international suppliers may increase if in order to continue doing business with us they raise their prices as the value of the U.S. dollar decreases relative to their local currency. Foreign policies and actions regarding currency valuation could result in actions by the United States and other countries to offset the effects of such fluctuations. The recent global financial downturn

20

because the pattern for revenue generation during that month is normally not linear, with a concentration of orders in the final week of the quarter. In light of that, our revenue cut-off and recognition procedures, together with our manufacturing and shipping operations, may experience increased pressure and demand during the time period shortly before the end of a fiscal quarter.

A large portion of our expenses are relatively fixed, including expenses for facilities, equipment, and personnel. In addition, we expect operating expenses to continue to increase significantly in absolute dollars, and we expect that our research and development and selling and marketing expenses will increase at a higher rate in the future as a result of the development and launch of new products. Accordingly, our ability to sustain profitability will depend, in part, on the rate of growth, if any, of our revenue and on the level of our expenses, and if revenue does not grow as anticipated, we may not be able to maintain annual or quarterly profitability. Any significant delays in the commercial launch of our products, unfavorable sales trends in our existing product lines, or impacts from the other factors mentioned above, could adversely affect our future revenue growth or cause a sequential decline in quarterly revenue. In addition, non-cash share-based compensation expense and expenses related to prior and future acquisitions are also likely to continue to adversely affect our future profitability. Due to the

and employees, in our data centers and on our networks. The secure maintenance of this information is important to our operations and business strategy. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost, or stolen. Any such access, disclosure, or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, and damage to our reputation.

Conversion of our outstanding convertible notes may result in losses.

As of December 30, 2012, we had \$40 million aggregate principal amount of convertible notes due 2014 and \$920 million aggregate principal amount of convertible notes due 2016 outstanding. The notes are convertible into cash, and if applicable, shares of our common stock under certain circumstances, including trading price conditions related to our common

ITEM 3. Legal Proceedings.

We are involved in various lawsuits and claims arising in the ordinary course of business, including actions with respect to intellectual property, employment, and contractual matters. In connection with these matters, we assess, on a regular basis, the probability and range of possible loss based on the developments in these matters. A liability is recorded in the financial statements if it is believed to be probable that a loss has been incurred and the amount of the loss can be reasonably estimated. We recorded a legal contingency loss of \$3.0 million in aggregate within cost of product revenue in 2012. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review outstanding legal matters to determine the adequacy of the liabilities accrued and related disclosures. The amount of ultimate loss may differ from these estimates. Each matter presents its own unique circumstances, and prior litigation does not necessarily provide a reliable basis on which to predict the outcome, or range of outcomes, in any individual proceeding. Because of the uncertainties related to the occurrence, amount, and range of loss on any pending litigation or claim, we are currently unable to predict their ultimate outcome, and, with respect to any pending litigation or claim where no liability has been accrued, to make a meaningful estimate of the reasonably possible loss or range of loss that could result from an unfavorable outcome. In the event that opposing litigants in outstanding litigations or claims ultimately succeed at trial and any subsequent appeals on their claims, any potential loss or charges in excess of any established accruals, individually or in the aggregate, could have a material adverse effect on our business, financial condition, results of operations, and/or cash flows in the period in which the unfavorable outcome occurs or becomes probable, and potentially in future periods.

On November 24, 2010, Syntrix Biosystems, Inc. filed suit against us in the United States District Court for the Western District of Washington at Tacoma (Case No. C10-5870-BHS) alleging that we willfully infringed U.S. Patent No. 6,951,682 by selling our BeadChip array products, and that we misappropriated Syntrix's trade secrets. Fact and expert discovery is complete in the case. In November and December 2012, we filed motions for summary judgment that the patent is not infringed and is invalid, and that Syntrix's trade secrets claims are barred by various statutes of limitation. Syntrix filed a motion for summary judgment that the patent is valid. On January 30, 2013, the court granted our motion for summary judgment on Syntrix's trade secret claims, and dismissed those claims from the case. The court denied Syntrix's motion for summary judgment on validity, and denied our motion for summary judgment for non-infringement and invalidity. A trial is scheduled to begin on February 26, 2013.

We have thoroughly investigated Syntrix's claims and believe the claims are without merit. While we believe there is no legal basis for the alleged liability, we cannot estimate the possible loss or range of possible loss as there are significant legal and factual issues to be resolved. For example, each party has filed motions seeking to exclude portions of the other party's expert testimony and to preclude the other party from introducing certain other evidence at trial. In addition to post-trial briefing, the parties would likely engage in appellate motion practice, the result of which is also unpredictable and could significantly affect the outcome of the case.

ITEM 4. Mine Safety Disclosures.

Not applicable.

Table of Contents

Holders

As of January 31, 2013 we had 224 record holders of our common stock.

Dividends

We have never paid cash dividends and have no present intention to pay cash dividends in the foreseeable future. The indentures for our 0.625% convertible senior notes due 2014 and 0.25% convertible senior notes due 2016, which notes are convertible into cash and, in certain circumstances, shares of our common stock, require us to increase the conversion rate applicable to the notes if we pay any cash dividends.

Purchases of Equity Securities by the Issuer

On April 18, 2012, the Company's Board of Directors authorized a \$250 million stock repurchase program to be effected via a combination of Rule 10b5-1 and discretionary share repurchase programs. The following table summarizes shares repurchased pursuant to these programs during the quarter ended December 30, 2012.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Programs
October 1, 2012 - October 28, 2012	97,289	\$51.39	97,289	\$187,518,994
October 29, 2012 - November 25, 2012	207,558	48.18	207,558	177,519,092
November 26, 2012 - December 30, 2012	190,921	52.38	190,921	167,519,168
Total	495,768	\$50.43	495,768	\$167,519,168

(1) All shares purchased during the fiscal quarter ended December 30, 2012 were made in open-market transactions.

Sales of Unregistered Securities

None during the fiscal quarter ended December 30, 2012.

of the 0.625% Convertible Senior Notes was not convertible and was therefore reclassified to long-term liability. See note "7. Convertible Senior Notes" in Part II, Item 8, Notes to Consolidated Financial Statements, for further information.

For the fiscal years ended December 30, 2012, January 1, 2012, January 2, 2011, January 3, 2010, and (2) December 28, 2008, we repurchased 1.9 million, 9.2 million, 0.8 million, 6.1 million, and 3.1 million shares, respectively, of common stock for \$82.5 million, \$570.3 million, \$44.0 million, \$175.1 million, and \$70.8 million, respectively. See note "10. Stockholders' Equity" in Part II, Item 8, Notes to Consolidated Financial Statements.

Table of Contents

y portfolio in the NIPT industry. To further enhance our genetic analysis workflows, in 2011 we acquired Epicentre Technologies Corporation (Epicentre), a leading provider of nucleic acid sample preparation reagents and specialty enzymes for sequencing and microarray applications. In 2010, through our acquisition of Helixis, Inc., we expanded our portfolio to include real-time polymerase chain reaction (PCR), one of the most widely used technologies in life sciences. Our Eco Real-Time PCR System provides researchers with an affordable, full-featured system to perform targeted validation studies.

Our financial results have been, and will continue to be, impacted by several significant trends, which are described below. While these trends are important to understanding and evaluating our financial results, this discussion should be read in conjunction with our consolidated financial statements and the notes thereto in Item 1, Part I of this report, and the other transactions, events, and trends discussed in “Risk Factors” in Item 1A, Part I of this report.

Funding Environment

There remains significant uncertainty concerning government and academic research funding worldwide as governments in the United States and Europe, in particular, focus on reducing fiscal deficits while at the same time confronting slow economic growth. We believe this uncertainty will continue in 2013, which could lead to purchasing delays and could negatively impact our business.

While many of our customers receive funding from government agencies to purchase our products or services, we are increasingly less dependent on government funding. In fiscal 2012, approximately 30% of our total revenue came from commercial customers who are not reliant on government agencies for funding, and it is our strategy to diversify our customer base to increase further the portion of our revenue from commercial customers over time. However, we estimate that approximately one-third of our total revenue continues to be derived, directly or indirectly, from funding provided by the U.S. National Institute of Health (NIH). In fiscal 2012, the NIH budget increased 1% as compared to fiscal 2011 levels. NIH funding for the first quarter of 2013 will be subject to the continuing resolution that was signed into law by President Obama and funds the NIH at 90% of budget. The significance and timing of any reductions to the NIH budget from March 2013 may be significantly impacted by the sequestration provisions of the Budget Control Act of 2011 and by whether these provisions remain in effect. In addition, the U.S. Department of Health and Human Services (HHS), of which the NIH is a part, has the ability to reallocate funds within its budget to spare the NIH from the full effect of HHS budget reductions. We further believe that allocations within the NIH budget will continue to favor genetic analysis tools generally and, in particular, research programs that utilize next-generation sequencing.

Next-Generation Sequencing

Next-generation sequencing has become a core technology for modern life science research and is increasingly being used in the applied, molecular diagnostics, and translational markets. Over the next several years, expansion of the sequencing market, including an increase in the number of samples available and enhancements in our product portfolio will continue to drive demand for our next-generation sequencing technologies. Our sequencing instrument installed base continued to expand in 2012. As a result, we believe that our sequencing consumable revenue will continue to grow in future periods.

Our sequencing instrument portfolio primarily includes the HiSeq product family and MiSeq. We began full commercial shipments in the fourth quarter of 2012 of our previously announced HiSeq 2500 sequencing system, which allows customers to sequence an entire human genome in approximately a day. Our MiSeq sequencing system is a low-cost personal sequencing system that we believe will provide individual researchers a platform with rapid turnaround time, high accuracy, and streamlined workflow. We believe our MiSeq systems will continue to be a

competitive offering in the lower throughput sequencing market and help us expand our presence in this emerging market segment.

MicroArrays

As a complement to next-generation sequencing, we believe microarrays offer a less expensive, faster, and highly accurate technology for use when genetic content is already known. The information content of microarrays is fixed and reproducible. As such, microarrays provide repeatable, standardized assays for certain subsets of nucleotide bases within the overall genome. As the cost of sequencing continues to decrease, we believe that life science researchers will migrate certain whole genome array studies to sequencing over the next few years; however, we expect this decline to be offset by demand from customers in applied and translational markets.

Table of Contents

Financial Overview

Financial highlights for 2012 include the following:

Net revenue increased by 9% during 2012 compared to 2011. The increase in revenue was primarily driven by an increase in consumable sales and instrument service contract revenue as our installed base continued to expand in 2012. We believe our revenue will continue to grow in 2013.

Gross profit as a percentage of revenue (gross margin) was 67.4% in 2012, an increase from 67.2% in 2011. Gross margin improved in 2012 due in large part to the shift in sales mix from instruments to consumables, which have a higher gross margin than instruments. We believe our gross margin in future periods will depend on several factors, including market conditions that may impact our pricing power, product mix changes between consumable, instrument, and service sales, product mix changes between established products and new products in new markets, our cost structure for manufacturing operations, and our ability to create innovative and high premium products that meet or stimulate customer demand.

Income from operations increased slightly by \$1.3 million in 2012 compared to 2011. This was a result of higher gross profit, which was driven by increased revenue, being mostly offset by higher operating expenses. In 2012, our research and development expenses increased by \$34.1 million and our selling, general and administrative expenses increased by \$24.1 million as we continue to grow our business. We anticipate that the dollar amount of these expenses will increase as we continue to invest in our technology, people, and infrastructure to support our growth. In 2012, we completed the relocation of our headquarters that started in 2011 and incurred \$26.3 million in headquarter relocation expense, which primarily included a cease-use loss upon vacating our prior headquarters, double rent expense during the transition to the new facility, and the accretion of interest expense on the related lease exit liability. We do not expect to incur significant additional headquarter relocation expense other than the accretion of interest expense on lease exit liability.

In 2012, we also incurred \$23.1 million in expenses associated with the unsolicited tender offer for shares of our common stock commenced by CKH Acquisition Corp. and Roche Holding Ltd. (together, “Roche”) in early 2012. We anticipate incurring additional advisory expenses through mid-2013.

Our effective tax rate was 32.1% in 2012, as compared to 34.9% in 2011. The provision for income taxes is dependent on the mix of earnings in tax jurisdictions with different statutory tax rates and the other factors discussed in the risk factor “We are subject to risks related to taxation in multiple jurisdictions” in Item 1A of this report. For 2013 and beyond, we anticipate the provision for income taxes to increase in absolute dollars but the effective tax rate to trend lower than the U.S. federal statutory rate as the portion of our earnings subject to lower statutory tax rates increases. The American Taxpayer Relief Act of 2012, which was signed into law on January 2, 2013, included the retroactive reinstatement of the federal research and development credit from January 1, 2012, through December 31, 2013. Our provision for income taxes for the year ended December 30, 2012, did not include the impact of the federal research credit generated in 2012 since the law was enacted subsequent to our reporting period. Had the legislation been enacted in 2012, the provision for income taxes for the year ended December 30, 2012, would have been reduced by approximately \$2.0 million. Our provision for income taxes in the first quarter of 2013 will include the tax benefit as a result of the retroactive reinstatement of the federal research credit for 2012.

↯ We ended 2012 with cash, cash equivalents, and short-term investments totaling \$1.35 billion.

Product revenue consists primarily of revenue from the sale of consumables and instruments. Services and other revenue consists primarily of instrument service contract revenue as well as sequencing and genotyping service revenue.

Table of Contents

2012 Compared to 2011

Consumables revenue increased \$133.5 million, or 22%, to \$729.3 million in 2012 compared to \$595.8 million in 2011. The increase was primarily attributable to increased sales of sequencing consumables, driven by higher consumable sales per HiSeq instrument and the growth in both the HiSeq and MiSeq installed base.

Instrument revenue decreased \$58.8 million, or 16%, to \$314.3 million in 2012 compared to \$373.1 million in 2011, driven by a decrease in HiSeq shipments, partially offset by a full year of MiSeq shipments in 2012 as compared to less than two quarters of shipments in 2011.

Revenue in 2011 reflects the impact of discounts provided to customers under our Genome Analyzer trade-in program. The estimated incremental sales incentive provided under this trade-in program was approximately \$11.1 million, based on the total discount provided from list price in excess of our average discount on HiSeq 2000 sales during the period. The Genome Analyzer trade-in program was completed in Q4 2011. See “Revenue Recognition” in note “1. Summary of Significant Accounting Policies” in Part II, Item 8, of this Form 10-K for additional information on the Genome Analyzer trade-in program.

The increase in service and other revenue in 2012 compared to 2011 was driven by an increase in our instrument service contract revenue as a result of our growing installed base as well as an increase in our genotyping and sequencing service revenue.

2011 Compared to 2010

Consumables revenue increased \$90.8 million, or 18%, to \$595.8 million in 2011 compared to \$505.0 million in 2010. The increase was primarily attributable to increased sales of sequencing consumables, which accounted for more than half of our consumables revenue in 2011, driven by growth in the installed base of our sequencing systems, partially offset by a decrease in the consumable revenue per sequencing instrument.

Instrument revenue increased \$48.5 million, or 15%, to \$373.1 million in 2011 compared to \$324.6 million in 2010. The increase was primarily attributable to the launch of MiSeq in the third quarter of 2011 and higher HiSeq revenue primarily driven by increased average selling price following completion of the Genome Analyzer trade-in program during the first half of 2011. These increases in instrument revenue were partially offset by a decrease in sales of our Genome Analyzer from 2010 to 2011, as our Genome Analyzer customers upgraded to HiSeq 2000.

Revenue from HiSeq 2000 sales in 2011 and 2010 was impacted by discounts provided to customers under our Genome Analyzer trade-in program. The estimated incremental sales incentive provided under this trade-in program was approximately \$11.1 million and \$47.8 million in 2011 and 2010, respectively. See “Revenue Recognition” in note “1. Organization and Summary of Significant Accounting Policies” in Part II, Item 8, of this Form 10-K for additional information on the Genome Analyzer trade-in program.

The increase in service and other revenue in 2011 compared to 2010 was primarily driven by an increase in our instrument service contract revenue resulting from our expanded installed base and an increase in sequencing services.

Gross Margin

(Dollars in thousands)	2012 - 2011				2011 - 2010			
	2012	2011	Change	% Change	2011	Change	% Change	
Total gross profit	\$773,528	\$709,098	\$64,430	9	% \$601,540	\$107,558	18	%

Total gross margin	67.4	%	67.2	%	66.6	%
--------------------	------	---	------	---	------	---

2012 Compared to 2011

Gross profit in 2012 increased in comparison to 2011 primarily due to higher sales. Gross margin improved in 2012 due in large part to the shift in sales mix from instruments to consumables, which have a higher margin than instruments. This improvement was partially offset by a legal settlement charge recorded to cost of sales in 2012. In addition, instrument sales in 2011 were affected by promotional discounts provided to customers on HiSeq 2000 sales, including the Genome Analyzer trade-in program. Based on the estimated amount of incremental sales incentive provided, the Genome Analyzer trade-in

on the lease exit liability. Headquarter relocation expense recorded in 2011 consisted of accelerated depreciation and rent expense on the new facility during the transition period of occupying both the current and new facility.

During Q1 2012, CKH Acquisition Corporation and Roche Holding Ltd. (together, "Roche") made an unsolicited tender offer to purchase all outstanding shares of our common stock for up to \$51.00 per share. During 2012, we recorded \$23.1 million of expenses incurred in relation to Roche's unsolicited tender offer, consisting primarily of legal, advisory, and other professional fees.

In late 2011, we announced restructuring plans to reduce our global workforce and to consolidate certain facilities. As a result of the restructuring effort, we recorded additional restructuring charges of \$3.5 million during 2012, comprised primarily of separation and other employee costs.

During the fourth quarter of 2012, we recognized a gain of \$48.6 million on the sale of our minority ownership interest in deCODE Genetics, a cost-method investment. We also recorded an impairment loss of \$2.7 million on another cost-method investment that was determined to be other-than-temporarily impaired.

Interest income increased in 2012 primarily due to a \$6.0 million recovery of a previously impaired note receivable and an increase in realized gains from our investment portfolio. Interest expenses in both 2012 and 2011 are primarily comprised of accretion of the discount on our convertible senior notes.

Other (expense) income, net, in 2012 primarily consisted of foreign exchange losses. Other (expense) income, net, in 2011 primarily consisted of a \$37.6 million loss on the extinguishment of debt recorded on conversions of our 0.625% convertible senior notes due 2014.

Table of Contents

2011 Compared to 2010

The decrease in interest income in 2011 compared to 2010 was primarily driven by lower interest rates, despite the increase in our cash, cash equivalents and short-term investment balance during the period. Interest expense increased during the period primarily due to the accretion of discount on our \$920.0 million 0.25% convertible senior notes due 2016 issued in the first half of 2011, partially offset by the decrease in interest expense associated with the repayment of \$349.9 million in principal for the 0.625% convertible senior notes due 2014 during 2011.

Other (expense) income, net, in 2011 primarily consisted of a loss of \$37.6 million on the extinguishment of debt recorded on conversions of our 0.625% convertible senior notes due 2014 and a \$1.1 million foreign exchange loss recorded during the period. The loss on extinguishment of debt was calculated as the difference between the carrying amount of the converted notes and their fair value as of the settlement dates. Other (expense) income, net, in 2010 primarily consisted of a \$13.2 million impairment charge related to a cost-method investment and a related note receivable, partially offset by a \$2.9 million gain on acquisition recorded for the difference between the carrying value of a cost method investment prior to the acquisition and the fair value of that investment at the time of acquisition, and foreign exchange gains.

Cost-method investment related gain (loss), net, in 2010 consisted of a \$13.2 million impairment charge recorded on a cost-method investment and a related note receivable, partially offset by a \$2.9 million gain on acquisition of a previous investee.

Provision for Income Taxes

	2012 - 2011				2011 - 2010		
(Dollars in thousands)	2012	2011	Change	% Change	2010	Change	% Change
Income before income taxes	\$222,608	\$133,045	\$89,563	67	% \$185,379	\$(52,334)	(28)%
Provision for income taxes	71,354	46,417	24,937	54	60,488	(14,071)	(23)
Net income	\$151,254	\$86,628	\$64,626	75	% \$124,891	\$(38,263)	(31)%
Effective tax rate	32.1	% 34.9	%		32.6	%	

2012 Compared to 2011

Our effective tax rate was 32.1% for 2012. The variance from the U.S. statutory rate of 35% was primarily attributable to the change in the mix of earnings in tax jurisdictions with different statutory rates. Our future effective tax rate may vary from the U.S. statutory tax rate due to the change in the mix of earnings in tax jurisdictions with different statutory rates, benefits related to tax credits, and the tax impact of non-deductible expenses and other permanent differences between income before income taxes and taxable income. The effective tax rate in 2011 closely approximated the U.S. statutory rate because a significant portion of our earnings were subject to U.S. taxation.

2011 Compared to 2010

The effective tax rate in 2011 closely approximated the U.S. statutory rate because a significant portion of our earnings was subject to U.S. taxation. The increase in the effective tax rate in 2011 from 2010 was primarily attributable to lower non-taxable gains recorded on the changes in fair value of contingent consideration related to prior acquisitions and higher nondeductible acquired IPR&D charges recorded in 2011.

Liquidity and Capital Resources

At December 30, 2012, we had approximately \$434.0 million in cash and cash equivalents, a \$131.0 million increase from last year, due to the factors described in the “Cash Flow Summary” below. Our primary source of liquidity has been cash flows from operations. Our ability to generate cash from operations provides us with the financial flexibility we need to meet operating, investing, and financing needs. Cash and cash equivalents held by our foreign subsidiaries at December 30, 2012 were approximately \$265.5 million. It is our intention to indefinitely reinvest all current and future foreign earnings in foreign subsidiaries.

Historically, we have liquidated our short-term investments and/or issued debt and equity securities to finance our business needs as a supplement to cash provided by operating activities. At December 30, 2012, we have \$916.2 million in

Table of Contents

short-term investments. Our short-term investments include marketable securities consisting of debt securities in government-sponsored entities, corporate debt securities, and U.S. Treasury notes.

In 2011, we issued \$920.0 million in principal amount of convertible senior notes that mature on March 15, 2016 (2016 notes). We pay 0.25% interest per annum on the principal amount of the 2016 notes semi-annually in arrears in cash on March 15 and September 15 of each year. In 2007, we issued \$400.0 million in principal of convertible senior notes that mature on February 15, 2014 (2014 notes). We pay 0.625% interest per annum on the principal amount of the 2014 notes semi-annually in arrears in cash on February 15 and August 15 of each year. Additional information about the convertible notes, including their conversion features, is described in note “7. Convertible Senior Notes” in Part II, Item 8, of this Form 10-K. As of December 30, 2012, the principal amounts of our 2016 notes and 2014 notes were \$920.0 million and \$40.1 million, respectively. Our commitment of interest payment on these outstanding notes is \$8.4 million on an annual basis.

Our primary short-term needs for capital, which are subject to change, include expenditures related to:

- support of commercialization efforts related to our current and future products, including expansion of our direct sales force and field support resources both in the United States and abroad;
- acquisitions of equipment and other fixed assets for use in our current and future manufacturing and research and development facilities;
- repurchases of our outstanding common stock;
- the continued advancement of research and development efforts;
- potential strategic acquisitions and investments; and
- the expansion needs of our facilities, including costs of leasing additional facilities.

In 2012, we acquired BlueGnome for total cash and other consideration of \$95.5 million, which included \$7.5 million in fair value of contingent cash consideration. In 2011, we acquired Epicentre for total cash and other consideration of \$71.4 million, which included \$4.6 million in the fair value of contingent consideration settled in stock and \$7.4 million in the fair value of contingent cash consideration.

Our Board of Directors has authorized several common stock repurchase programs. In 2012, we used \$82.5 million to repurchase our outstanding shares under these programs. As of December 30, 2012, we had authorization from our Board of Directors to repurchase to an additional \$167.5 million of our common stock.

During 2011, we used \$314.3 million of the net proceeds from the issuance of our 2016 notes to purchase 4.9 million shares of our common stock in privately negotiated transactions concurrently with the issuance. We also used part of the net proceeds for the extinguishment of \$349.9 million principal amount of our 2014 notes upon conversion. We used the remaining net proceeds for other general corporate purposes, which included acquisitions and purchases of our common stock.

We expect that our revenue and the resulting operating income, as well as the status of each of our new product development programs, will significantly impact our cash management decisions.

We anticipate that our current cash, cash equivalents and short-term investments, together with cash provided by operating activities will be sufficient to fund our near term capital and operating needs for at least the next 12 months, including the pending acquisition of Verinata. Operating needs include the planned costs to operate our business, including amounts required to fund working capital and capital expenditures. Our future capital requirements and the adequacy of our available funds will depend on many factors, including:

- our ability to successfully commercialize and further develop our technologies and create innovative products in our markets;

• scientific progress in our research and development programs and the magnitude of those programs;
• competing technological and market developments; and
• the need to enter into collaborations with other companies or acquire other companies or technologies to enhance or complement our product and service offerings.

the customer and the creditworthiness of the customer. If we determine that collection of a payment is not reasonably assured, revenue recognition is deferred until receipt of payment.

We regularly enter into contracts where revenue is derived from multiple deliverables including any mix of products or services. These products or services are generally delivered within a short time frame, approximately three to six months, of the contract execution date. Revenue recognition for contracts with multiple deliverables is based on the individual units of accounting determined to exist in the contract. A delivered item is considered a separate unit of accounting when the delivered item has value to the customer on a stand-alone basis. Items are considered to have stand-alone value when they are sold separately by any vendor or when the customer could resell the item on a stand-alone basis.

For transactions with multiple deliverables, consideration is allocated at the inception of the contract to all deliverables based on their relative selling price. The relative selling price for each deliverable is determined using vendor specific objective

Table of Contents

evidence (VSOE) of selling price or third-party evidence of selling price if VSOE does not exist. If neither VSOE nor third-party evidence exists, we use best estimate of the selling price for the deliverable.

In order to establish VSOE of selling price, we must regularly sell the product or service on a standalone basis with a substantial majority priced within a relatively narrow range. VSOE of selling price is usually the midpoint of that range. If there are not a sufficient number of standalone sales and VSOE of selling price cannot be determined, then we consider whether third party evidence can be used to establish selling price. Due to the lack of similar products and services sold by other companies within the industry, we have rarely established selling price using third-party evidence. If neither VSOE nor third party evidence of selling price exists, we determine our best estimate of selling price using average selling prices over a rolling 12-month period coupled with an assessment of current market conditions. If the product or service has no history of sales or if the sales volume is not sufficient, we rely upon prices set by our pricing committee adjusted for applicable discounts. We recognize revenue for delivered elements only when we determine there are no uncertainties regarding customer acceptance.

In 2010, we offered an incentive with the launch of the HiSeq 2000 that enabled existing Genome Analyzer customers to trade in their Genome Analyzer and receive a discount on the purchase of a HiSeq 2000. The incentive was limited to customers who had purchased a Genome Analyzer as of the date of the announcement and was the first significant trade-in program we have offered. The Genome Analyzer trade-in program was completed in 2011. We accounted for HiSeq 2000 discounts related to the trade-in program as reductions to revenue upon recognition of the HiSeq 2000 sales revenue, which is later than the date the trade-in program was launched.

In certain markets, the Company sells products and provides services to customers through distributors that specialize in life science products. In most sales through distributors, the product is delivered directly to customers. In cases where the product is delivered to a distributor, revenue recognition is deferred until acceptance is received from the distributor, and/or the end-user, if required by the applicable sales contract. The terms of sales transactions through distributors are consistent with the terms of direct sales to customers. These transactions are accounted for in accordance with the Company's revenue recognition policy described herein.

Investments

We invest in various types of securities, including debt securities in government-sponsored entities, corporate debt securities, and U.S. treasury securities. As of December 30, 2012, we have \$916.2 million in short-term investments. In accordance with the accounting standard for fair value measurements, we classify our investments as Level 1, 2, or 3 within the fair value hierarchy. Fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets that we have the ability to access. Fair values determined by Level 2 inputs utilize data points that are observable such as quoted prices, interest rates and yield curves. Fair values determined by Level 3 inputs utilize unobservable data points for the asset.

As discussed in note "6. Fair Value Measurements" in Part II, Item 8 of this Form 10-K, a majority of our security holdings have been classified as Level 2. These securities have been initially valued at the transaction price and subsequently valued utilizing a third party service provider who assesses the fair value using inputs other than quoted prices that are observable either directly or indirectly, such as yield curve, volatility factors, credit spreads, default rates, loss severity, current market and contractual prices for the underlying instruments or debt, broker and dealer quotes, as well as other relevant economic measures. We perform certain procedures to corroborate the fair value of these holdings, and in the process, we apply judgments and estimates that if changed, could significantly affect our results of operations.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We evaluate the collectibility of our accounts receivable based on a combination of factors. We regularly analyze customer accounts, review the length of time receivables are outstanding, review historical loss rates and assess current economic trends that may impact the level of credit losses in the future. Our gross trade accounts receivables totaled \$219.3 million and the allowance for doubtful accounts was \$4.3 million at December 30, 2012. Our allowance for doubtful accounts has generally been adequate to cover our actual credit losses. However, since we cannot reliably predict future changes in the financial stability of our customers, we may need to increase our reserves if the financial conditions of our customers deteriorate.

Table of Contents

Inventory Valuation

Inventories are stated at lower of cost or market. We record adjustments to inventory for potentially excess, obsolete, or impaired goods in order to state inventory at net realizable value. We must make assumptions about future demand, market conditions, and the release of new products that will supersede old ones. We regularly review inventory for excess and obsolete products and components, taking into account product life cycles, quality issues, historical experience, and usage forecasts. Our gross inventory totaled \$178.6 million and the cumulative adjustment for potentially excess and obsolete inventory was \$19.9 million at December 30, 2012. Historically, our inventory adjustment has been adequate to cover our losses. However, if actual market conditions are less favorable than anticipated, additional inventory adjustments could be required.

Contingencies

We are involved in various lawsuits and claims arising in the ordinary course of business, including actions with respect to intellectual property, employment, and contractual matters. In connection with these matters, we assess, on a regular basis, the probability and range of possible loss based on the developments in these matters. A liability is recorded in the financial statements if it is believed to be probable that a loss has been incurred and the amount of the loss can be reasonably estimated. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about future events. We regularly review outstanding legal matters to determine the adequacy of the liabilities accrued and related disclosures in consideration of many factors, which include, but are not limited to, past history, scientific and other evidence, and the specifics and status of each matter. We may change our estimates if our assessment of the various factors changes and the amount of ultimate loss may differ from our estimates, resulting in a material effect on our business, financial condition, results of operations, and/or cash flows.

Business Combinations

Under the acquisition method of accounting, we allocate the fair value of the total consideration transferred to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values on the date of acquisition. The fair values assigned, defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between willing market participants, are based on estimates and assumptions determined by management. We record the excess consideration over the aggregate fair value of tangible and intangible assets, net of liabilities assumed, as goodwill. These valuations require us to make significant estimates and assumptions, especially with respect to intangible assets.

In connection with certain of our acquisitions, additional contingent consideration is earned by the sellers upon completion of certain future performance milestones. In these cases, a liability is recorded on the acquisition date for an estimate of the acquisition date fair value of the contingent consideration by applying the income approach utilizing variable inputs such as anticipated future cash flows, risk-free adjusted discount rates, and nonperformance risk. Any change in the fair value of the contingent consideration subsequent to the acquisition date is recognized in acquisition related expense (gain), net, a component of operating expenses, in our consolidated statements of income. This method requires significant management judgment, including the probability of achieving certain future milestones and discount rates. Future changes in our estimates could result in expenses or gains.

Management typically uses the discounted cash flow method to value our acquired intangible assets. This method requires significant management judgment to forecast future operating results and establish residual growth rates and discount factors. The estimates we use to value and amortize intangible assets are consistent with the plans and estimates that we use to manage our business and are based on available historical information and industry estimates

and averages. If the subsequent actual results and updated projections of the underlying business activity change compared with the assumptions and projections used to develop these values, we could experience impairment charges. In addition, we have estimated the economic lives of certain acquired assets and these lives are used to calculate depreciation and amortization expense. If our estimates of the economic lives change, depreciation or amortization expenses could be accelerated or slowed.

Intangible Assets and Other Long-Lived Assets — Impairment Assessments

We regularly perform reviews to determine if the carrying values of our long-lived assets are impaired. A review of identifiable intangible assets and other long-lived assets is performed when an event occurs indicating the potential for impairment. If indicators of impairment exist, we assess the recoverability of the affected long-lived assets and compare their fair values to the respective carrying amounts.

Table of Contents

Income Taxes

Our provision for income taxes, deferred tax assets and liabilities, and reserves for unrecognized tax benefits reflect our best assessment of estimated future taxes to be paid. Significant judgments and estimates based on interpretations of existing tax laws or regulations in the United States and the numerous foreign jurisdictions where we are subject to income tax are required in determining our provision for income taxes. Changes in tax laws, statutory tax rates, and estimates of the company's future taxable income could impact the deferred tax assets and liabilities provided for in the consolidated financial statements and would require an adjustment to the provision for income taxes.

Deferred tax assets are regularly assessed to determine the likelihood they will be recovered from future taxable income. A valuation allowance is established when we believe it is more likely than not the future realization of all or some of a deferred tax asset will not be achieved. In evaluating our ability to recover deferred tax assets within the jurisdiction which they arise, we consider all available positive and negative evidence. Factors reviewed include the cumulative pre-tax book income for the past three years, scheduled reversals of deferred tax liabilities, our history of earnings and reliability of our forecasts, projections of pre-tax book income over the foreseeable future, and the impact of any feasible and prudent tax planning strategies. Based on the available evidence as of December 30, 2012, we were not able to conclude it is more likely than not certain U.S. deferred tax assets will be realized. Therefore, we recorded a valuation allowance of \$1.8 million against certain U.S. deferred tax assets.

We recognize the impact of a tax position in our financial statements only if that position is more likely than not of being sustained upon examination by taxing authorities, based on the technical merits of the position. Tax authorities regularly examine our returns in the jurisdictions in which we do business and we regularly assess the tax risk of the company's return filing positions. Due to the complexity of some of the uncertainties, the ultimate resolution may result in payments that are materially different from our current estimate of the tax liability. These differences, as well as any interest and penalties, will be reflected in the provision for income taxes in the period in which they are determined.

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest Rate Sensitivity

Our investment portfolio is exposed to market risk from changes in interest rates. The fair market value of fixed rate securities may be adversely impacted by fluctuations in interest rates while income earned on floating rate securities may decline as a result of decreases in interest rates. Under our current policies, we do not use interest rate derivative instruments to manage exposure to interest rate changes. We attempt to ensure the safety and preservation of our invested principal funds by limiting default risk, market risk, and reinvestment risk. We mitigate default risk by investing in investment grade securities. We have historically maintained a relatively short average maturity for our investment portfolio, and we believe a hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would not materially affect the fair value of our interest sensitive financial instruments. In addition, if a 100 basis point change in overall interest rates were to occur in 2013, our interest income would change by approximately \$13.5 million in relation to amounts we would expect to earn, based on our cash, cash equivalents, and short-term investments as of December 30, 2012.

Changes in interest rates may also impact gains or losses from the conversion of our outstanding convertible senior notes. During 2011, we issued \$920 million in aggregate principal amount of our 0.25% convertible senior notes due 2016. At our election, the notes are convertible into cash, shares of our common stock, or a combination of cash and shares of our common stock in each case under certain circumstances, including trading price conditions related to our common stock. If the trading price of our common stock reaches a price for a sustained period at 130% above the

conversion price of \$83.55, the notes will become convertible. Upon conversion, we are required to record a gain or loss for the difference between the fair value of the debt to be extinguished and its corresponding net carrying value. The fair value of the debt to be extinguished depends on our then-current incremental borrowing rate. If our incremental borrowing rate at the time of conversion is higher or lower than the implied interest rate of the notes, we will record a gain or loss in our consolidated statement of income during the period in which the notes are converted. The implicit interest rate for the notes is 4.5%. An incremental borrowing rate that is a hypothetical 100 basis points lower than the implicit interest rate upon conversion of \$100 million aggregate principal amount of the notes would result in a loss of approximately \$3.0 million.

Table of Contents

Market Price Sensitive Instruments

In order to reduce potential equity dilution, in connection with the issuance (and potential conversion) of our 0.625% convertible senior notes due 2014, we entered into convertible note hedge transactions, entitling us to purchase up to 18,322,000 shares of our common stock at a strike price of \$21.83 per share, subject to adjustment. In addition, we sold to the hedge transaction counterparties warrants exercisable on a net-share basis, for up to 18,322,000 shares of our common stock at a strike price of \$31.435 per share, subject to adjustment. The anti-dilutive effect of the note hedge transactions, if any, could be partially or fully offset to the extent the trading price of our common stock exceeds the strike price of the warrants on the exercise dates of the warrants, which occur during 2014, assuming the warrants are exercised.

Foreign Currency Exchange Risk

We conduct a portion of our business in currencies other than the company's U.S. dollar functional currency. These transactions give rise to monetary assets and liabilities that are denominated in currencies other than the U.S. dollar. The value of these monetary assets and liabilities are subject to changes in currency exchange rates from the time the transactions are originated until settlement in cash. Our foreign currency exposures are primarily concentrated in the Euro, Yen, British pound sterling, Australian dollar, and Singapore dollar. Both realized and unrealized gains or losses on the value of these monetary assets and liabilities are included in the determination of net income. We recorded a \$3.7 million net currency exchange loss for the fiscal year ended December 30, 2012 on business transactions, net of hedging transactions, which are included in other (expense) income, net, in our consolidated statements of income.

We use forward exchange contracts to manage a portion of the foreign currency exposure risk for foreign subsidiaries with monetary assets and liabilities denominated in currencies other than the U.S. dollar. We only use derivative financial instruments to reduce foreign currency exchange rate risks; we do not hold any derivative financial instruments for trading or speculative purposes. We primarily use forward exchange contracts to hedge foreign currency exposures, and they generally have terms of one month or less. Realized and unrealized gains or losses on the value of financial contracts entered into to hedge the exchange rate exposure of these monetary assets and liabilities are also included in the determination of net income, as they have not been designated for hedge accounting. These contracts, which settle monthly, effectively fix the exchange rate at which these specific monetary assets and liabilities will be settled, so that gains or losses on the forward contracts offset the losses or gains from changes in the value of the underlying monetary assets and liabilities. As of December 30, 2012, the total notional amount of outstanding forward contracts in place for foreign currency purchases was approximately \$51.2 million.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
Illumina, Inc.

We have audited the accompanying consolidated balance sheets of Illumina, Inc. as of December 30, 2012 and January 1, 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three fiscal years in the period ended December 30, 2012. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Illumina, Inc. at December 30, 2012 and January 1, 2012, and the consolidated results of its operations and its cash flows for each of the three fiscal years in the period ended December 30, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Illumina, Inc.'s internal control over financial reporting as of December 30, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 15, 2013 expressed an unqualified opinion thereon.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company's identifiable intangible assets are typically comprised of acquired core technologies, licensed technologies, IPR&D, customer relationships, and trade names. The cost of all identifiable intangible assets with finite lives is amortized on a straight-line basis over the assets' respective estimated useful lives.

IPR&D, which also has an indefinite useful life, is reviewed for impairment at least annually, or more frequently if an event occurs indicating the potential for impairment. The IPR&D impairment test requires the Company to assess the fair value of the asset as compared to its carrying value and record an impairment charge if the carrying value exceeds the fair value. The Company performed its annual impairment test of its IPR&D in the second fiscal quarter of 2012 and recorded \$21.4 million in impairment charges within research and development expenses in the consolidated statements of income. Resources previously assigned to the research project were re-directed with no plans for additional investments to be made to the project in the foreseeable future.

The Company regularly performs reviews to determine if any event has occurred that may indicate its intangible assets with finite useful lives and other long-lived assets are potentially impaired. If indicators of impairment exist, the Company performs an impairment test to assess the recoverability of the affected assets by determining whether the carrying amount of such assets exceeds the undiscounted expected future cash flows. If the affected assets are not recoverable, the Company estimates the fair value of the assets and records an impairment loss if the carrying value of the assets exceeds the fair value. Factors that would indicate potential impairment include a significant decline in the Company's stock price and market capitalization compared to its net book value, significant changes in the ability of a particular asset to generate positive cash flows, and significant changes in the Company's strategic business objectives and utilization of a particular asset. The Company performed quarterly reviews of its intangible assets with finite useful lives and other long-lived assets and noted no indications of impairment for the year ended December 30, 2012.

Reserve for Product Warranties

The Company generally provides a one-year warranty on instruments. Additionally, the Company provides a warranty on its consumables through the expiration date, which generally ranges from six to twelve months after the manufacture date. At the time revenue is recognized, the Company establishes an accrual for estimated warranty expenses based on historical experience as well as anticipated product performance. The Company periodically reviews the adequacy of its warranty reserve and adjusts, if necessary, the warranty accrual based on actual experience and estimated costs to be incurred. Warranty expense is recorded as a component of cost of product revenue.

Revenue Recognition

The Company's revenue is generated primarily from the sale of products and services. Product revenue primarily consists of sales of instrumentation and consumables used in genetic analysis. Service and other revenue primarily consists of revenue received for performing genotyping and sequencing services, instrument service contract sales, and amounts earned under research agreements with government grants, which are recognized in the period during which the related costs are incurred.

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed or determinable, and collectibility is reasonably assured. In instances where final acceptance of the product or system is required, revenue is deferred until all the acceptance criteria have been met. All revenue is recorded net of any discounts.

Revenue from product sales is recognized generally upon transfer of title to the customer, provided that no significant obligations remain and collection of the receivable is reasonably assured. Revenue from instrument service contracts is recognized as the services are rendered, typically evenly over the contract term. Revenue from genotyping and sequencing services is recognized when earned, which is generally at the time the genotyping or sequencing analysis data is made available to the customer or agreed upon milestones are reached.

In order to assess whether the price is fixed or determinable, the Company evaluates whether refund rights exist. If there are refund rights or payment terms based on future performance, the Company defers revenue recognition until the price becomes fixed or determinable. The Company assesses collectibility based on a number of factors, including past transaction history with the customer and the creditworthiness of the customer. If the Company determines that collection of a payment is not reasonably assured, revenue recognition is deferred until receipt of payment.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company regularly enters into contracts where revenue is derived from multiple deliverables including any mix of products or services. These products or services are generally delivered within a short time frame, approximately three to six months, after the contract execution date. Revenue recognition for contracts with multiple deliverables is based on the individual units of accounting determined to exist in the contract. A delivered item is considered a separate unit of accounting when the delivered item has value to the customer on a stand-alone basis. Items are considered to have stand-alone value when they are sold separately by any vendor or when the customer could resell the item on a stand-alone basis. Consideration is allocated at the inception of the contract to all deliverables based on their relative selling price. The relative selling price for each deliverable is determined using vendor specific objective evidence (VSOE) of selling price or third-party evidence of selling price if VSOE does not exist. If neither VSOE nor third-party evidence exists, the Company uses its best estimate of the selling price for the deliverable.

In order to establish VSOE of selling price, the Company must regularly sell the product or service on a standalone basis with a substantial majority priced within a relatively narrow range. VSOE of selling price is usually the midpoint of that range. If there are not a sufficient number of standalone sales and VSOE of selling price cannot be determined, then the Company considers whether third party evidence can be used to establish selling price. Due to the lack of similar products and services sold by other companies within the industry, the Company has rarely established selling price using third-party evidence. If neither VSOE nor third party evidence of selling price exists, the Company determines its best estimate of selling price using average selling prices over a rolling 12-month period coupled with an assessment of current market conditions. If the product or service has no history of sales or if the sales volume is not sufficient, the Company relies upon prices set by the Company's pricing committee adjusted for applicable discounts. The Company recognizes revenue for delivered elements only when it determines there are no uncertainties regarding customer acceptance.

During the fiscal year ended January 1, 2012, the Company completed its Genome Analyzer trade-in program that enabled certain Genome Analyzer customers to trade in their Genome Analyzer and receive a discount on the purchase of a HiSeq 2000. The incentive was limited to customers who had purchased a Genome Analyzer prior to the beginning of the incentive program in early 2010 and was the only significant trade-in program offered by the Company to date. The Company accounted for HiSeq 2000 discounts related to the Genome Analyzer trade-in program as reductions to revenue upon recognition of the HiSeq 2000 sales revenue, which is later than the date the trade-in program was launched.

In certain markets, the Company sells products and provides services to customers through distributors that specialize in life science products. In most sales through distributors, the product is delivered directly to customers. In cases where the product is delivered to a distributor, revenue recognition is deferred until acceptance is received from the distributor, and/or the end-user, if required by the applicable sales contract. The terms of sales transactions through distributors are consistent with the terms of direct sales to customers. These transactions are accounted for in accordance with the Company's revenue recognition policy described herein.

Shipping and Handling Expenses

Shipping and handling expenses are included in cost of product revenue.

Research and Development

Research and development expenses include personnel expenses, contractor fees, license fees, facilities costs, and utilities. Expenditures relating to research and development are expensed in the period incurred.

Advertising Costs

The Company expenses advertising costs as incurred. Advertising costs were \$7.3 million, \$6.8 million, and \$6.9 million for the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively.

Leases

Leases are reviewed and classified as capital or operating at their inception. For leases that contain rent escalations, the Company records rent expense on a straight-line basis over the term of the lease, which includes the construction build-out period and lease extension periods, if appropriate. The difference between rent payments and straight-line rent expense is recorded as deferred rent in accrued liabilities and other long-term liabilities. Landlord allowances are amortized on a straight-

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

line basis over the lease term as a reduction to rent expense. The Company capitalizes leasehold improvements and amortizes them over the shorter of the lease term or their expected useful lives.

In 2012, the Company completed the relocation of its headquarters to another facility in San Diego, California. Headquarter relocation expenses recorded in years ended December 30, 2012 and January 1, 2012 primarily consisted of accelerated depreciation expense, impairment of assets, additional rent expense during the transition period when both the new and former headquarter facilities are occupied, moving expenses, and cease-use losses. The Company recorded accelerated depreciation expense for leasehold improvements at its former headquarter facility based on the reassessed useful lives of less than a year. The Company recorded cease-use losses and the corresponding facility exit obligation upon vacating certain buildings of its former headquarters, calculated as the present value of the remaining lease obligation offset by estimated sublease rental receipts during the remaining lease period, adjusted for deferred items and estimated lease incentives. The key assumptions used in the calculation include the amount and timing of estimated sublease rental receipts, and the risk-adjusted discount rate.

Restructuring Charges

During the fourth quarter of the year ended January 1, 2012, the Company announced and executed a restructuring plan, to reduce the Company's workforce and to consolidate certain facilities. The Company measured and accrued the liabilities associated with employee separation costs at fair value as of the date the plan was announced and terminations were communicated to employees, which primarily included severance pay and other separation costs such as outplacement services and benefits.

The fair value measurement of restructuring related liabilities requires certain assumptions and estimates to be made by the Company, such as the retention period of certain employees, the timing and amount of sublease income on properties to be vacated, and the operating costs to be paid until lease termination. It is the Company's policy to use the best estimates based on facts and circumstances available at the time of measurement, review the assumptions and estimates periodically, and adjust the liabilities when necessary.

Income Taxes

The provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for the expected future tax benefit to be derived from tax loss and credit carryforwards. Deferred tax assets and liabilities are determined using the enacted tax rates in effect for the years in which those tax assets are expected to be realized. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in the provision for income taxes in the period that includes the enactment date.

Deferred tax assets are regularly assessed to determine the likelihood they will be recovered from future taxable income. A valuation allowance is established when the Company believes it is more likely than not the future realization of all or some of a deferred tax asset will not be achieved. In evaluating the ability to recover deferred tax assets within the jurisdiction which they arise the Company considers all available positive and negative evidence. Factors reviewed include the cumulative pre-tax book income for the past three years, scheduled reversals of deferred tax liabilities, history of earnings and reliable forecasting, projections of pre-tax book income over the foreseeable future, and the impact of any feasible and prudent tax planning strategies.

The Company recognizes excess tax benefits associated with share-based compensation to stockholders' equity only when realized. When assessing whether excess tax benefits relating to share-based compensation have been realized,

the Company follows the with-and-without approach excluding any indirect effects of the excess tax deductions. Under this approach, excess tax benefits related to share-based compensation are not deemed to be realized until after the utilization of all other tax benefits available to the Company.

The Company recognizes the impact of a tax position in the financial statements only if that position is more likely than not of being sustained upon examination by taxing authorities, based on the technical merits of the position. Any interest and penalties related to uncertain tax positions will be reflected in income tax expense.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Functional Currency

The U.S. dollar is the functional currency of the Company's international operations. The Company remeasures its foreign subsidiaries' assets and liabilities and revenue and expense accounts related to monetary assets and liabilities to the U.S. dollar and records the net gains or losses resulting from remeasurement in other (expense) income, net in the consolidated statements of income. During the years ended December 30, 2012 and January 1, 2012, the Company recorded \$2.2 million net gain and \$2.0 million net loss from remeasurement, respectively. Gains and losses related to remeasurement were immaterial for the year ended January 2, 2011.

Derivatives

The Company is exposed to foreign exchange rate risks in the normal course of business. To manage a portion of the accounting exposure resulting from changes in foreign currency exchange rates, the Company enters into foreign exchange contracts to hedge monetary assets and liabilities that are denominated in currencies other than the U.S. dollar. These foreign exchange contracts are carried at fair value and are not designated as hedging instruments. Changes in the value of the derivatives are recognized in other (expense) income, net, in the consolidated statements of income in the respective periods, along with an offsetting remeasurement gain or loss on the underlying foreign currency denominated assets or liabilities.

As of December 30, 2012, the Company had foreign exchange forward contracts in place to hedge exposures in the euro, Japanese yen, and Australian dollar. As of December 30, 2012 and January 1, 2012, the total notional amount of outstanding forward contracts in place for foreign currency purchases was \$51.2 million and \$25.5 million, respectively. Non-designated foreign exchange forward contract related gain was \$1.2 million for the year ended December 30, 2012 and immaterial for the years ended January 1, 2012 and January 2, 2011.

Share-Based Compensation

The Company uses the Black-Scholes-Merton option-pricing model to estimate the fair value of stock options granted and stock purchases under the Employee Stock Purchase Plan (ESPP). This model incorporates various assumptions including expected volatility, expected term of an award, expected dividends, and the risk-free interest rates. The Company determines the expected volatility by equally weighing the historical and implied volatility of the Company's common stock. The historical volatility of the Company's common stock over the most recent period is generally commensurate with the estimated expected term of the Company's stock awards, adjusted for the impact of unusual fluctuations not reasonably expected to recur and other relevant factors. The implied volatility is calculated from the implied market volatility of exchange-traded call options on the Company's common stock. The expected term of an award is based on historical forfeiture experience, exercise activity, and on the terms and conditions of the stock awards. The expected dividend yield is determined to be 0% given that the Company has never declared or paid cash dividends on its common stock and does not anticipate paying such cash dividends. The risk-free interest rate is based upon U.S. Treasury securities with remaining terms similar to the expected term of the share-based awards. The fair value of restricted stock units granted is based on the market price of the Company's common stock on the date of grant. The Company recognizes the fair value of share-based compensation on a straight-line basis over the requisite service periods of the awards.

Net Income per Share

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the reporting period. Diluted net income per share is computed by dividing net income by the

weighted average number of common shares outstanding during the reporting period increased to include dilutive potential common shares calculated using the treasury stock method. Diluted net income per share reflects the potential dilution from outstanding stock options, restricted stock units, ESPP, warrants, shares subject to forfeiture, and convertible senior notes. Under the treasury stock method, convertible senior notes will have a dilutive impact when the average market price of the Company's common stock is above the applicable conversion price of the respective notes. In addition, the following amounts are assumed to be used to repurchase shares: the amount that must be paid to exercise stock options and warrants and purchase shares under the ESPP; the average amount of compensation expense for future services that the Company has not yet recognized for stock options, restricted stock units, ESPP, and shares subject to forfeiture; and the amount of tax benefits that will be recorded in additional paid-in capital when the expenses related to respective awards become deductible.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following table presents the calculation of weighted average shares used to calculate basic and diluted net income per share (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
Weighted average shares outstanding	122,999	123,399	123,581
Effect of dilutive potential common shares from:			
Convertible senior notes	967	3,783	9,058
Equity awards	3,906	4,703	4,674
Warrants sold in connection with convertible senior notes	5,821	7,052	5,317
Warrants assumed in a prior acquisition	—	—	803
Weighted average shares used in calculating diluted net income per share	133,693	138,937	143,433
Potentially dilutive shares excluded from calculation due to anti-dilutive effect	2,556	2,418	1,934

Accumulated Other Comprehensive Income

Comprehensive income is comprised of net income and other comprehensive income. Accumulated other comprehensive income on the consolidated balance sheets at December 30, 2012 and January 1, 2012 includes accumulated foreign currency translation adjustments and unrealized gains and losses on the Company's available-for-sale securities.

The components of accumulated other comprehensive income are as follows (in thousands):

	December 30, 2012	January 1, 2012
Foreign currency translation adjustments	\$1,289	\$1,289
Unrealized gain on available-for-sale securities, net of deferred tax	834	828
Total accumulated other comprehensive income	\$2,123	\$2,117

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Available-For-Sale Securities

As of December 30, 2012 the Company had 59 available-for-sale securities in a gross unrealized loss position, all of which had been in such position for less than twelve months. There were no impairments considered other-than-temporary as it is more likely than not the Company will hold the securities until maturity or a recovery of the cost basis. The following table shows the fair values and the gross unrealized losses of the Company's available-for-sale securities that were in an unrealized loss position as of December 30, 2012 and January 1, 2012 aggregated by investment category (in thousands):

	December 30, 2012		January 1, 2012	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Debt securities in government-sponsored entities	\$28,176	\$(16)	\$133,904	\$(148)
Corporate debt securities	130,224	(187)	138,326	(461)
Total	\$158,400	\$(203)	\$272,230	\$(609)

Realized gains and losses are determined based on the specific identification method and are reported in interest income in the consolidated statements of income. Gross realized gains on sales of available-for-sale securities for the years ended December 30, 2012, January 1, 2012, and January 2, 2011 were \$1.6 million, \$1.4 million, and \$1.7 million, respectively. Gross realized losses on sales of available-for-sale securities for the years ended December 30, 2012, January 1, 2012, and January 2, 2011 were immaterial.

Contractual maturities of available-for-sale debt securities as of December 30, 2012 were as follows (in thousands):

	Estimated Fair Value
Due within one year	\$328,991
After one but within five years	587,232
Total	\$916,223

Cost-Method Investments

As of December 30, 2012 and January 1, 2012, the aggregate carrying amounts of the Company's cost-method investments in non-publicly traded companies were \$56.3 million and \$45.3 million, respectively. The Company's cost-method investments are assessed for impairment quarterly. The Company does not estimate the fair value of cost-method investments if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investments. The Company includes cost-method investments in other long term assets in the consolidated balance sheets.

During the fourth quarter of 2012, the Company sold its minority ownership interest in deCODE Genetics, Inc., an Icelandic company that focuses on the genetic studies of human disease, to Amgen Inc., a biotechnology medicines company based in the U.S. Gross proceeds received were \$50.8 million, resulting in a gain of \$48.6 million. Also during the fourth quarter of 2012, the Company received \$6.0 million from an investee in principal payment of a loan that was previously impaired, and recorded the recovered funds in interest income in the consolidated statements of income.

As a result of its impairment analysis performed in the fourth quarter of 2012, the Company determined that a cost-method investment was other-than-temporarily impaired and recorded an impairment loss of \$2.7 million. This determination was based upon operational performance trends coupled with uncertainty regarding the entity's ability to obtain additional funding in a required timeframe for the entity to continue operations.

No impairment losses were recorded during the year ended January 1, 2012. In the year ended January 2, 2011, the Company determined that a \$6.0 million cost-method investment and a related \$6.8 million note receivable with interest receivable of \$0.4 million were below carrying value and the impairment was other-than-temporary. As a result, the Company recorded an impairment charge of \$13.2 million in cost-method investment gain (loss), net in the consolidated statements of income for the year ended January 2, 2011.

4. Acquisitions

BlueGnome

On September 19, 2012, the Company announced the acquisition of BlueGnome Ltd. (BlueGnome), a provider of cytogenetics and in vitro fertilization screening products. Total consideration for the acquisition was \$95.5 million, which included \$88.0 million in initial cash payments and \$7.5 million in fair value of contingent cash consideration

of up to \$20.0 million based on the achievement of certain revenue based milestones by December 28, 2014.

The Company estimated the fair value of contingent cash consideration using a probability weighted discounted cash flow approach, a Level 3 measurement based on unobservable inputs that are supported by little or no market activity and reflect the Company's own assumptions in measuring fair value. The Company used a discount rate of 30% in the assessment of the acquisition date fair value for the contingent cash consideration. Future changes in significant inputs such as the discount rate and estimated probabilities of milestone achievements could have a significant effect on the fair value of the contingent consideration.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

In conjunction with the purchase transaction, the Company also agreed to pay up to \$20.0 million to BlueGnome shareholders contingent upon the retention of certain key employees and certain other criteria. Such contingent payments are recognized as contingent compensation expense over the retention period through December 28, 2014.

The Company allocated approximately \$11.2 million of the total consideration to tangible assets, net of liabilities, and \$48.9 million to identified intangible assets, including additional developed technologies of \$25.0 million, customer relationships of \$16.8 million, and a trade name of \$7.1 million with average useful lives of seven, five, and ten years, respectively. The Company also recorded a \$12.1 million deferred tax liability to reflect the tax impact of certain identified intangible assets, the amortization expenses for which are not tax deductible. The Company recorded the excess consideration of approximately \$47.5 million as goodwill.

Prior Acquisitions

On January 10, 2011, the Company acquired Epicentre Technologies Corporation (Epicentre), a provider of nucleic acid sample preparation reagents and specialty enzymes used in sequencing and microarray applications. Total consideration for the acquisition was \$71.4 million, which included \$59.4 million in net cash payments, \$4.6 million in the fair value of contingent consideration settled in stock that is subject to forfeiture if certain non-revenue based milestones are not met, and \$7.4 million in the fair value of contingent cash consideration of up to \$15.0 million based on the achievement of certain revenue based milestones by January 10, 2013.

The Company estimated the fair value of contingent stock consideration based on the closing price of its common stock as of the acquisition date. Approximately 229,000 shares of common stock were issued to Epicentre shareholders in connection with the acquisition, which shares are subject to forfeiture if certain non-revenue-based milestones are not met. One third of these shares issued with an assessed fair value of \$4.6 million were determined to be part of the purchase price. The remaining shares with an assessed fair value of \$10.1 million were determined to be compensation for post-acquisition service, the cost of which will be recognized as contingent compensation expense over a period of two years in research and development expense and selling, general and administrative expense.

The Company estimated the fair value of contingent cash consideration using a probability weighted discounted cash flow approach, a Level 3 measurement based on unobservable inputs that are supported by little or no market activity and reflects the Company's own assumptions in measuring fair value. The Company used a discount rate of 21% in the assessment of the acquisition date fair value for the contingent cash consideration.

The Company allocated \$0.9 million of the total consideration to tangible assets, net of liabilities, and \$26.9 million to identified intangible assets, including additional developed technologies of \$23.3 million, a trade name of \$2.5 million, and customer relationships of \$1.1 million, with weighted average useful lives of approximately nine, ten, and three years, respectively. The Company recorded the excess consideration of \$43.6 million as goodwill.

On July 28, 2010, the Company completed an acquisition of another privately-held, development stage entity. Total consideration for the acquisition was \$22.0 million. As a result of this transaction, the Company recorded an IPR&D asset of \$21.4 million in intangible assets. In determining the fair value of the IPR&D, various factors were considered, such as future revenue contributions, additional research and development costs to be incurred, and contributory asset charges. The fair value of the IPR&D was calculated using an income approach, and the rate used to discount net future cash flows to their present values was based on a risk-adjusted rate of return of approximately 28%. Significant factors considered in the calculation of the rate of return include the weighted average cost of capital, the weighted average return on assets, the internal rate of return, as well as the risks inherent in the development

process for development-stage entities of similar sizes.

On April 30, 2010, the Company completed the acquisition of Helixis, Inc. (Helixis), a company developing a high-performance, low-cost, real time PCR system used for nucleic acid analysis. Total consideration for the acquisition was \$86.7 million, including \$70.0 million in net cash payments and \$14.1 million for the fair value of contingent consideration payments that could range from \$0 to \$35 million based on the achievement of certain revenue-based milestones by December 31, 2011. The Company allocated \$2.3 million of the consideration to tangible assets, net of liabilities, and \$28.0 million to identified intangible assets that will be amortized over a useful life of ten years. The Company also recorded a \$10.7 million deferred tax liability to reflect the tax impact of the identified intangible assets, the amortization expenses for which are not tax deductible and an \$8.7 million deferred tax asset which primarily relates to acquired net operating loss carryforwards. The Company recorded the excess consideration of \$58.4 million as goodwill.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Prior to the acquisition, the Company had an equity interest in Helixis with a cost basis of \$2.0 million that was accounted for under the cost-method of accounting. The Company recognized a gain of \$2.9 million, which was included in other (expense) income, net, in its consolidated statement of income as a result of revaluing the Company's equity interest in Helixis on the acquisition date.

In addition, the Company agreed to pay the former shareholders of another development stage company acquired in 2008 a certain amount of contingent cash consideration based on the achievement of certain product-related and employment-related milestones. In accordance with the applicable accounting guidance effective at the time, such consideration was accounted for as additional elements of the cost of acquisition, resulting in additional IPR&D charges in the years ended January 1, 2012 and January 2, 2011 when the contingencies were resolved beyond a reasonable doubt and the considerations were issued or became issuable.

Summary of Contingent Compensation Expenses and IPR&D Charges

Contingent compensation expenses and IPR&D charges as a result of acquisitions consist of the following (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
Contingent compensation expense, included in research and development expense	\$3,419	\$4,799	\$3,675
Contingent compensation expense, included in selling, general and administrative expense	5,732	1,258	—
Total contingent compensation expense	\$9,151	\$6,057	\$3,675
IPR&D, included in acquisition related expense (gain), net	\$—	\$5,425	\$1,325

5. Intangible Assets

The Company's intangible assets, excluding goodwill, include acquired core and licensed technologies, license agreements, trade name, and customer relationships. Amortization for the intangible assets that have finite useful lives is generally recorded on a straight-line basis over their useful lives.

The following is a summary of the Company's identifiable intangible assets as of the respective balance sheet dates (in thousands):

	December 30, 2012			January 1, 2012		
	Weighted Average Useful Life (years)	Gross Carrying Amount	Accumulated Intangibles, Amortization Net	Weighted Average Useful Life (years)	Gross Carrying Amount	Accumulated Intangibles, Amortization Net
Intangible assets with finite useful lives:						
Licensed technologies	6.6	\$46,904	\$ (25,271) \$ 21,633	8.0	\$36,000	\$ (20,000) \$ 16,000
Core technologies	8.8	99,800	(27,427) 72,373	9.7	74,800	(18,544) 56,256
Customer relationships	5.0	18,780	(2,214) 16,566	3.0	1,980	(1,253) 727

Edgar Filing: ILLUMINA INC - Form 10-K

License agreements	7.8	14,829	(4,133)	10,696	8.9	12,404	(2,605)	9,799
Trade name	10.0	9,600	(672)	8,928	10.0	2,500	(245)	2,255
Indefinitely-lived Intangible Asset:								
In-process research & development		—	—	—		21,438	—	21,438
Total intangible assets, net		\$ 189,913	\$ (59,717)	\$ 130,196		\$ 149,122	\$ (42,647)	\$ 106,475

Additions to intangible assets in the current year are primarily due to the BlueGnome acquisition and technology license agreements entered into during the year. As discussed in note “1. Organization and Summary of Significant Accounting Policies,” IPR&D was impaired during the year ended December 30, 2012. Amortization expense associated with intangible assets was \$17.1 million for the year ended December 30, 2012, \$15.5 million of which related to acquired intangible assets.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Amortization expense associated with intangible assets for the years ended January 1, 2012 and January 2, 2011 were \$13.6 million and \$7.8 million, respectively.

The estimated annual amortization of intangible assets for the next five years is shown in the following table (in thousands). Actual amortization expense to be reported in future periods could differ from these estimates as a result of acquisitions, divestitures, asset impairments, among other factors.

2013	\$24,644
2014	23,860
2015	23,414
2016	18,715
2017	14,612
Thereafter	24,951
Total	\$130,196

6. Fair Value Measurements

The following table presents the Company's fair value hierarchy for assets and liabilities measured at fair value on a recurring basis as of December 30, 2012 and January 1, 2012 respectively (in thousands):

	December 30, 2012				January 1, 2012			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets:

Deferred compensation liability	—	12,071	—	12,071	—	8,970	—	8,970
Total liabilities measured at fair value	\$—	\$12,071	\$12,519	\$24,590	\$—	\$8,970	\$6,638	\$15,608

The Company holds available-for-sale securities that consist of highly liquid, investment grade debt securities. The Company determines the fair value of its debt security holdings based on pricing from a service provider. The service provider values the securities based on "consensus pricing," using market prices from a variety of industry-standard independent data providers. Such market prices may be quoted prices in active markets for identical assets or liabilities (Level 1 inputs) or pricing determined using inputs that are observable either directly or indirectly (Level 2

inputs), such as quoted prices for similar assets or liabilities, yield curve, volatility factors, credit spreads, default rates, loss severity, current market and contractual prices for the underlying instruments or debt, broker and dealer quotes, as well as other relevant economic measures. The Company's deferred compensation plan assets consist primarily of mutual funds. See note "14. Employee Benefit Plans" for additional information about our deferred compensation plan. The Company performs certain procedures to corroborate the fair value of its holdings, including comparing prices obtained from service providers to prices obtained from other reliable sources.

The Company reassesses the fair value of contingent consideration to be settled in cash related to acquisitions on a quarterly basis using the income approach. This is a Level 3 measurement. Significant assumptions used in the measurement include probabilities of achieving the remaining milestones and the discount rates, which depend on the milestone risk profiles. Due to changes in the estimated payments and a shorter discounting period, the fair value of the contingent consideration

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

liabilities changed, resulting in a \$2.0 million expense recorded in acquisition related expense (gain), net in the consolidated statements of income during the year ended December 30, 2012.

Changes in estimated fair value of contingent consideration liabilities from January 3, 2010 through December 30, 2012 are as follows (in thousands):

	Contingent Consideration Liability (Level 3 Measurement)
Balance as of January 3, 2010	\$ —
Acquisition of Helixis	14,114

Cash payments	(3,594)
Balance as of December 30, 2012	\$ 12,519

7. Convertible Senior Notes

0.25% Convertible Senior Notes due 2016

In 2011, the Company issued \$920.0 million aggregate principal amount of 0.25% convertible senior notes due 2016 (2016 Notes) in an offering conducted in accordance with Rule 144A under the Securities Act of 1933, as amended. The 2016 Notes were issued at 98.25% of par value. Debt issuance costs of approximately \$0.4 million were primarily comprised of legal, accounting, and other professional fees, the majority of which were recorded in other noncurrent assets and are being amortized to interest expense over the five-year term of the 2016 Notes.

The 2016 Notes will be convertible into cash, shares of common stock, or a combination of cash and shares of common stock, at the Company's election, based on an initial conversion rate, subject to adjustment, of 11.9687 shares per \$1,000 principal amount of the 2016 Notes (which represents an initial conversion price of approximately \$83.55 per share), only in the following circumstances and to the following extent: (1) during the five business-day period after any 10 consecutive trading day period (the "measurement period") in which the trading price per 2016 Note for each day of such measurement period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on each such day; (2) during any calendar quarter (and only during that quarter) after the calendar quarter ending March 31, 2011, if the last reported sale price of the Company's common stock for 20 or more trading days in the period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter exceeds 130% of the applicable conversion price in effect on the last trading day of the immediately preceding calendar quarter; (3) upon the occurrence of specified events described in the indenture for the 2016 Notes; and (4) at any time on or after December 15, 2015 through the second scheduled trading day immediately preceding the maturity date.

As noted in the indenture for the 2016 Notes, it is the Company's intent and policy to settle conversions through combination settlement, which essentially involves repayment of an amount of cash equal to the "principal portion" and delivery of the "share amount" in excess of the conversion value over the principal portion in shares of common stock. In general, for each \$1,000 in principal, the "principal portion" of cash upon settlement is defined as the lesser of \$1,000, and the conversion value during the 20-day observation period as described in the indenture for the 2016 Notes. The conversion value is the sum of the daily conversion value which is the product of the effective conversion rate divided by 20 days and the daily volume weighted average price ("VWAP") of the Company's common stock. The "share amount" is the cumulative "daily share amount" during the observation period, which is calculated by dividing the daily VWAP into the difference between the daily conversion value (i.e., conversion rate x daily VWAP) and \$1,000.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company pays 0.25% interest per annum on the principal amount of the 2016 Notes semiannually in arrears in cash on March 15 and September 15 of each year. The Company paid \$2.3 million in interest payments during the year ended December 30, 2012. The 2016 Notes mature on March 15, 2016. If a designated event, as defined in the indenture for the 2016 Notes, such as an acquisition, merger, or liquidation, occurs prior to the maturity date, subject to certain limitations, holders of the 2016 Notes may require the Company to repurchase all or a portion of their 2016 Notes for cash at a repurchase price equal to 100% of the principal amount of the 2016 Notes to be repurchased, plus any accrued and unpaid interest to, but excluding, the repurchase date.

The Company accounts separately for the liability and equity components of the 2016 Notes in accordance with authoritative guidance for convertible debt instruments that may be settled in cash upon conversion. The guidance requires the carrying amount of the liability component to be estimated by measuring the fair value of a similar liability that does not have an associated conversion feature. Because the Company has no outstanding non-convertible public debt, the Company determined that senior, unsecured corporate bonds traded on the market represent a similar liability to the convertible senior notes without the conversion option. Based on market data available for publicly traded, senior, unsecured corporate bonds issued by companies in the same industry and with similar maturity, the Company estimated the implied interest rate of its 2016 Notes to be 4.5%, assuming no conversion option. Assumptions used in the estimate represent what market participants would use in pricing the liability component, including market interest rates, credit standing, and yield curves, all of which are defined as Level 2 observable inputs. The estimated implied interest rate was applied to the 2016 Notes, which resulted in a fair value of the liability component of \$748.5 million upon issuance, calculated as the present value of implied future payments based on the \$920.0 million aggregate principal amount. The \$155.4 million difference between the cash proceeds of \$903.9 million and the estimated fair value of the liability component was recorded in additional paid-in capital as the 2016 Notes are not considered currently redeemable at the balance sheet date.

If the 2016 Notes were converted as of December 30, 2012, the if-converted value would not exceed the principal amount. As a policy election under applicable guidance related to the calculation of diluted net income per share, the Company elected the combination settlement method as its stated settlement policy and applied the treasury stock method. The 2016 Notes had an anti-dilutive effect for the years ended December 30, 2012 and January 1, 2012.

0.625% Convertible Senior Notes due 2014

In 2007, the Company issued \$400.0 million principal amount of 0.625% convertible senior notes due 2014 (2014 Notes). The Company pays 0.625% interest per annum on the principal amount of the 2014 Notes, payable semi-annually in arrears in cash on February 15 and August 15 of each year. The 2014 Notes mature on February 15, 2014. The effective interest rate of the liability component was estimated to be 8.3%.

The Company entered into hedge transactions concurrently with the issuance of the 2014 Notes under which the Company is entitled to purchase up to approximately 18,322,000 shares of the Company's common stock at a strike price of approximately \$21.83 per share, subject to adjustment. The convertible note hedge transactions had the effect of reducing dilution to the Company's stockholders upon conversion of the 2014 Notes. Also concurrently with the issuance of the 2014 Notes, the Company sold to the hedge counterparties warrants exercisable, on a cashless basis, for up to approximately 18,322,000 shares of the Company's common stock at a strike price of \$31.435 per share, subject to adjustment. The proceeds from these warrants partially offset the cost to the Company of the convertible note hedge transactions.

The 2014 Notes became convertible into cash and shares of the Company's common stock in various prior periods and became convertible again from April 1, 2012 through, and including, December 30, 2012. There were no conversions of the 2014 Notes during the year ended December 30, 2012. During the year ended January 1, 2012, the principal amount of all 2014 Notes converted was repaid with cash and the excess of the conversion value over the principal amount was paid in shares of common stock. The equity dilution resulting from the issuance of common stock related to the conversion of the 2014 Notes was offset by repurchase of the same amount of shares under the convertible note hedge transactions, which were automatically exercised in accordance with their terms at the time of each such conversion. The balance of the convertible note hedge transactions with respect to approximately \$40.1 million principal amount of the 2014 Notes (which are convertible into up to 1,838,000 shares of the Company's common stock) remained in place as of December 30, 2012. The warrants were not affected by the early conversions of the 2014 Notes and, as a result, warrants covering up to approximately 18,322,000 shares of common stock remained outstanding as of December 30, 2012.

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

As a result of the conversions during the year ended January 1, 2012, the Company recorded losses on extinguishment of debt calculated as the difference between the estimated fair value of the debt and the carrying value of the notes as of the settlement dates. To measure the fair value of the converted notes as of the settlement dates, the applicable interest rates were estimated using Level 2 observable inputs and applied to the converted notes using the same methodology as in the issuance date valuation. If the 2014 Notes were converted as of December 30, 2012, the if-converted value would exceed the principal amount by \$60.0 million.

The following table summarizes information about the equity and liability components of the 2014 and 2016 Notes (dollars in thousands). The fair values of the respective notes outstanding were measured based on quoted market prices.

	December 30, 2012		January 1, 2012	
	2016 Notes	2014 Notes	2016 Notes	2014 Notes
Principal amount of convertible notes outstanding	\$920,000	\$40,125	\$920,000	\$40,125
Unamortized discount of liability component	(114,594)	(3,158)	(147,034)	(5,722)
Net carrying amount of liability component	805,406	36,967	772,966	34,403
Less: current portion	—	(36,967)	—	—
Long-term debt	\$805,406	\$—	\$772,966	\$34,403
Conversion option subject to cash settlement	\$—	\$3,158	\$—	\$5,722
Carrying value of equity component, net of issuance costs	\$155,366	\$111,470	\$155,366	\$114,035
Fair value of outstanding notes	\$892,446	\$101,470	\$725,632	\$60,122
Remaining amortization period of discount on the liability component	3.2 years	1.1 years	4.2 years	2.1 years

Contractual coupon interest expense and accretion of discount on the liability component recorded for the convertible senior notes were as follows (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
Contractual coupon interest expense	\$2,472	\$2,285	\$2,390
Accretion of discount on the liability component	\$35,004	\$32,173	\$21,407

8. Commitments

Operating Leases

The Company leases office and manufacturing facilities under various noncancellable operating lease agreements. Facility leases generally provide for periodic rent increases, and many contain escalation clauses and renewal options. Certain leases require the Company to pay property taxes and routine maintenance. The Company is headquartered in San Diego, California and leases facilities in San Diego, California; Hayward, California; Fairfax, Virginia; Madison, Wisconsin; the United Kingdom; the Netherlands; Japan; Singapore; Australia; Brazil; Canada; and China.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Annual future minimum payments under these operating leases as of December 30, 2012 were as follows (in thousands):

2013	\$27,676
2014	23,970
2015	23,197
2016	23,416
2017	23,860
Thereafter	393,088
Total	\$515,207

Rent expenses were \$21.4 million, \$17.4 million, and \$14.7 million for the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively.

The Company recorded facility exit obligations upon vacating its former headquarters during the years ended December 30, 2012 and January 1, 2012. Changes in the facility exit obligation from January 1, 2012 through December 30, 2012 are as follows (in thousands):

Balance as of January 1, 2012:	\$25,049	
Additional facility exit obligation recorded	24,878	
Accretion of interest expense	2,129	
Cash payments	(6,704)
Balance as of December 30, 2012	\$45,352	

Warranties

Changes in the Company's reserve for product warranties from January 3, 2010 through December 30, 2012 are as follows (in thousands):

Balance as of January 3, 2010	\$10,215

Weighted average fair value per share	\$16.45	\$20.08	\$11.10

As of December 30, 2012, approximately \$177.8 million of total unrecognized compensation cost related to stock options, restricted stock units, and ESPP shares issued to date is expected to be recognized over a weighted-average period of approximately 2.3 years.

10. Stockholders' Equity

The Company's 2005 Stock and Incentive Plan (the 2005 Stock Plan), 2005 Solexa Equity Incentive Plan (the 2005 Solexa Equity Plan), and the New Hire Stock and Incentive Plan allow for the issuance of stock options, restricted stock units and awards, and performance stock units. As of December 30, 2012, approximately 3,065,000 shares remained available for future grants under the 2005 Stock Plan and the 2005 Solexa Equity Plan. There is no set number of shares reserved for issuance under the New Hire Stock and Incentive Plan.

Stock Options

Stock options granted at the time of hire primarily vest over a four or five-year period, with 20% or 25% of options vesting on the first anniversary of the grant date and the remaining options vesting monthly over the remaining vesting period. Stock options granted subsequent to hiring primarily vest monthly over a four or five-year period. Each grant of options has a

71

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

maximum term of ten years, measured from the applicable grant date, subject to earlier termination if the optionee's service ceases. Vesting in all cases is subject to the individual's continued service through the vesting date. The Company satisfies option exercises through the issuance of new shares.

The Company's stock option activity under all stock option plans from January 3, 2010 through December 30, 2012 is as follows:

	Options (in thousands)	Weighted- Average Exercise Price
Outstanding at January 3, 2010	16,089	\$18.59
Granted	2,045	39.11
Exercised	(5,541)) 16.65
Cancelled	(711)) 21.76
Outstanding at January 2, 2011	11,882	22.83
Granted	1,399	64.98
Exercised	(2,784)) 17.98
Cancelled	(119)) 33.49
Outstanding at January 1, 2012	10,378	29.69
Granted	251	40.79
Exercised	(2,071)) 20.34
Cancelled	(207)) 39.18
Outstanding at December 30, 2012	8,351	\$32.10

At December 30, 2012, outstanding options to purchase approximately 6,725,000 shares were exercisable with a weighted average per share exercise price of \$28.49. The weighted average remaining life of options outstanding and exercisable is 5.5 years and 5.0 years, respectively, as of December 30, 2012.

The aggregate intrinsic value of options outstanding and options exercisable as of December 30, 2012 was \$207.0 million and \$185.9 million, respectively. Aggregate intrinsic value represents the product of the number of options outstanding multiplied by the difference between the Company's closing stock price per share on the last trading day of the fiscal period, which was \$54.75 as of December 28, 2012, and the exercise price. Total intrinsic value of options exercised was \$60.6 million, \$136.5 million, and \$156.9 million for the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively. Total fair value of options vested was \$31.9 million, \$49.5 million, and \$47.3 million for the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively.

Restricted Stock

The Company issues restricted stock units (RSUs) and restricted stock awards (RSAs). The Company grants RSUs pursuant to its 2005 Stock and Incentive Plan. RSUs are share awards that, upon vesting, will deliver to the holder shares of the Company's common stock. For grants to new hires prior to July 2011 and for grants to existing employees, RSUs generally vest 15% on the first anniversary of the grant date, 20% on the second anniversary of the grant date, 30% on the third anniversary of the grant date, and 35% on the fourth anniversary of the grant date. For grants to new hires subsequent to July 2011, RSUs generally vest over a four-year period with equal vesting on anniversaries of the grant date. The Company satisfies RSU vesting through the issuance of new shares. The Company also issues RSAs that are released based on service related vesting conditions. RSAs may be issued from the Company's treasury stock or granted pursuant to the Company's 2005 Stock and Incentive Plan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

A summary of the Company's restricted stock activity and related information from January 3, 2010 through December 30, 2012 is as follows:

	Restricted Stock (in thousands)	Weighted Average Grant-Date Fair Value per Share
Outstanding at January 3, 2010	2,509	\$32.45
Awarded	1,353	50.74
Vested	(510)) 32.10
Cancelled	(243)) 33.36
Outstanding at January 2, 2011	3,109	40.39
Awarded	1,780	45.10
Vested	(827)) 36.47
Cancelled	(356)) 42.15
Outstanding at January 1, 2012	3,706	43.36
Awarded	1,952	48.42
Vested	(1,139)) 40.33
Cancelled	(394)) 45.05
Outstanding at December 30, 2012	4,125	\$46.43

Based on the closing price per share of the Company's common stock of \$54.75 and \$30.48 on December 28, 2012 and December 30, 2011, respectively, the total pre-tax intrinsic value of all outstanding restricted stock as of December 30, 2012 and January 1, 2012 was \$225.8 million and \$112.9 million, respectively. Total fair value of restricted stock vested was \$45.9 million, \$30.2 million, and \$16.4 million for the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively.

Performance Stock Units

In March 2012, the Company's Compensation Committee of the Company's Board of Directors approved changes to the Company's long-term equity incentive program for executive officers and approved the issuance of certain performance stock units at the end of a three-year performance period. The number of shares issuable will range from 50% and 150% of the shares approved in the award based on the Company's performance relative to specified earnings per share targets at the end of the three-year performance period. A total of 587,000 shares were outstanding as of December 30, 2012 with a weighted-average grant-date fair value of \$49.64, which represents the fair market value of one share of the Company's common stock on the grant date.

Employee Stock Purchase Plan

A total of 15,467,000 shares of the Company's common stock have been reserved for issuance under its 2000 Employee Stock Purchase Plan, or ESPP. The ESPP permits eligible employees to purchase common stock at a discount, but only through payroll deductions, during defined offering periods. The price at which stock is purchased under the ESPP is equal to 85% of the fair market value of the common stock on the first or last day of the offering period, whichever is lower. The initial offering period commenced in July 2000.

The ESPP provides for annual increases of shares available for issuance by the lesser of 3% of the number of outstanding shares of the Company's common stock on the last day of the immediately preceding fiscal year, 3,000,000 shares, or such lesser amount as determined by the Company's board of directors. Shares totaling approximately 328,000, 328,000, and 373,000 were issued under the ESPP during the years ended December 30, 2012, January 1, 2012, and January 2, 2011, respectively. As of December 30, 2012 and January 1, 2012, there were approximately 15,406,000 shares and 15,734,000 shares available for issuance under the ESPP, respectively.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Warrants

As of December 30, 2012, warrants exercisable, on a cashless basis, for up to approximately 18,322,000 shares of common stock were outstanding with an exercise price of \$31.435. These warrants were sold to counterparties to the Company's convertible note hedge transactions in connection with the offering of the Company's 2014 Notes, with the proceeds of such warrants used by the Company to partially offset the cost of such hedging transactions. All outstanding warrants expire in equal installments during the 40 consecutive scheduled trading days beginning on May 16, 2014.

During the year ended January 1, 2012, the remaining warrants assumed by the Company in a prior acquisition to purchase approximately 505,000 shares of the Company's common stock were exercised, resulting in cash proceeds to the Company of approximately \$5.5 million.

Share Repurchases

On April 18, 2012, the Company's Board of Directors authorized a \$250 million stock repurchase program to be effected via a combination of Rule 10b5-1 and discretionary share repurchase programs. During the year ended December 30, 2012, the Company repurchased approximately 1,860,000 shares for \$82.5 million.

In August 2011, the Company's board of directors authorized a \$100 million discretionary repurchase program. During the year ended January 1, 2012, the Company utilized the authorized amount in its entirety and repurchased approximately 1,894,000 shares under this program.

Concurrently with the issuance of the Company's 2016 Notes in 2011, approximately 4,891,000 shares were repurchased for \$314.3 million.

In July 2010, the Company's board of directors authorized a \$200 million stock repurchase program, with \$100 million allocated to repurchasing Company common stock under a 10b5-1 plan over a twelve month period and \$100 million allocated to repurchasing Company common stock at management's discretion during open trading windows. During the year ended January 1, 2012, the Company repurchased approximately 2,438,000 shares for \$156.0 million. The authorized repurchase amount had been utilized completely as of January 1, 2012.

Stockholder Rights Plan

In connection with the unsolicited tender offer by Roche (refer to note "12. Unsolicited Tender Offer"), on January 25, 2012, the Company's Board of Directors declared a dividend of one preferred share purchase right (Right) for each outstanding share of the Company's common stock. Each Right entitles the registered holder to purchase from the Company one one-thousandth of a share of the Company's Series A Junior Participating Preferred Stock, par value \$0.01 per share (Preferred Shares), at a price of \$275.00 per one thousandth of a Preferred Share, subject to adjustment. The Rights will not be exercisable until such time, if ever, that the Board of Directors determines to eliminate its deferral of the date on which separate Rights certificates are issued and the Rights trade separately from the Company's common stock (Distribution Date). If a person or group (triggering party) acquires 15% or more of the Company's outstanding common stock, each Right will entitle holders other than the triggering party to purchase, at the exercise price of the Right, a number of shares of common stock having a market value of two times the exercise price of the Right. If the Company is acquired in a merger or other business combination transaction after a person acquires 15% or more of the Company's common stock, each Right will entitle holders other than the triggering party to purchase, at the Right's then-current exercise price, a number of common shares of the acquiring company that

the time of such transaction have a market value of two times the exercise price of the Right. The Board of Directors will be entitled to redeem the Rights at a price of \$0.001 per Right at any time before the Distribution Date. The Board of Directors will also be entitled to exchange the Rights at an exchange ratio per Right of one share of common stock after any person acquires beneficial ownership of 15% or more of the Company's outstanding common stock, and prior to the acquisition of 50% or more of the Company's outstanding common stock. The Rights will expire on January 26, 2017.

On May 3, 2001, the board of directors of the Company declared a dividend of one preferred share purchase right (Right) for each outstanding share of common stock of the Company. The dividend was payable on May 14, 2001 to the stockholders of record on that date. Each Right entitles the registered holder to purchase from the Company one unit consisting of one thousandth of a share of its Series A Junior Participating Preferred Stock at a price of \$100 per unit. The Rights will be exercisable if a person or group hereafter acquires beneficial ownership of 15% or more of the outstanding common stock of the Company or announces an offer for 15% or more of the outstanding common stock. If a person or group acquires 15% or

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

more of the outstanding common stock of the Company, each Right will entitle its holder to purchase, at the exercise price of the Right, a number of shares of common stock having a market value of two times the exercise price of the Right. If the Company is acquired in a merger or other business combination transaction after a person acquires 15% or more of the Company's common stock, each Right will entitle its holder to purchase, at the Right's then-current exercise price, a number of common shares of the acquiring company which at the time of such transaction have a market value of two times the exercise price of the Right. The board of directors will be entitled to redeem the Rights at a price of \$0.01 per Right at any time before any such person acquires beneficial ownership of 15% or more of the outstanding common stock. The Rights expired on May 14, 2011.

11. Legal Proceedings

The Company is involved in various lawsuits and claims arising in the ordinary course of business, including actions with respect to intellectual property, employment, and contractual matters. In connection with these matters, the Company assesses, on a regular basis, the probability and range of possible loss based on the developments in these matters. A liability is recorded in the financial statements if it is believed to be probable that a loss has been incurred and the amount of the loss can be reasonably estimated. During the year ended December 30, 2012, the Company recorded a legal contingency loss of \$3.0 million in aggregate within cost of product revenue. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about future events. The Company regularly reviews its outstanding legal matters to determine the adequacy of the liabilities accrued and related disclosures. The amount of ultimate loss may differ from these estimates. Each matter presents its own unique circumstances, and prior litigation does not necessarily provide a reliable basis on which to predict the outcome, or range of outcomes, in any individual proceeding. Because of the uncertainties related to the occurrence, amount, and range of loss on any pending litigation or claim, management is currently unable to predict their ultimate outcome, and, with respect to any pending litigation or claim where no liability has been accrued, to make a meaningful estimate of the reasonably possible loss or range of loss that could result from an unfavorable outcome. In the event that opposing litigants in outstanding litigations or claims ultimately succeed at trial and any subsequent appeals on their claims, any potential loss or charges in excess of any established accruals, individually or in the aggregate, could have a material adverse effect on the Company's business, financial condition, results of operations, and/or cash flows in the period in which the unfavorable outcome occurs or becomes probable, and potentially in future periods.

On November 24, 2010, Syntrix Biosystems, Inc. filed suit against the Company in the United States District Court for the Western District of Washington at Tacoma (Case No. C10-5870-BHS) alleging that the Company willfully infringed U.S. Patent No. 6,951,682 by selling its BeadChip array products, and that the Company misappropriated Syntrix's trade secrets. Fact and expert discovery is complete in the case. In November and December 2012, the Company filed motions for summary judgment that the patent is not infringed and is invalid, and that Syntrix's trade secrets claims are barred by various statutes of limitation. Syntrix filed a motion for summary judgment that the patent is valid. On January 30, 2013, the court granted the Company's motion for summary judgment on Syntrix's trade secret claims, and dismissed those claims from the case. The court denied Syntrix's motion for summary judgment on validity, and denied the Company's motion for summary judgment for non-infringement and invalidity. A trial is scheduled to begin on February 26, 2013.

The Company has thoroughly investigated Syntrix's claims and believes the claims are without merit. While the Company believes there is no legal basis for its alleged liability, the Company cannot estimate the possible loss or range of possible loss as there are significant legal and factual issues to be resolved. For example, each party has filed motions seeking to exclude portions of the other party's expert testimony and to preclude the other party from introducing certain other evidence at trial. In addition to post-trial briefing, the parties would likely engage in appellate motion practice, the result of which is also unpredictable and could significantly affect the outcome of the

case.

12. Unsolicited Tender Offer

On January 27, 2012, CKH Acquisition Corporation and Roche Holding Ltd. (together, “Roche”) commenced an unsolicited tender offer (Offer) to purchase all outstanding shares of the Company’s common stock for \$44.50 per share. As more fully described in the Company’s Solicitation/Recommendation on Schedule 14D-9 filed with the SEC on February 7, 2012 in response to the Offer, the Company’s Board of Directors unanimously recommended that the Company’s stockholders reject the Offer and not tender their shares to Roche for purchase.

On March 28, 2012, Roche revised the Offer to purchase all outstanding shares of the Company’s common stock for \$51.00 per share. As more fully described in the Amendment No. 11 to Solicitation/Recommendation on Schedule 14D-9 filed

75

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

with the SEC on April 2, 2012 in response to the revised Offer, the Company's Board of Directors unanimously recommended that the Company's stockholders reject the Roche offer and not tender their shares to Roche for purchase. The Offer expired, without being extended, on April 20, 2012.

During the year ended December 30, 2012, the Company recorded \$23.1 million in expenses in relation to the Offer, such expenses consisting primarily of legal, advisory, proxy solicitation, and other professional services fees.

13. Income Taxes

The income (loss) before income taxes summarized by region is as follows (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
United States	\$102,296	\$(7,100) \$109,068
Foreign	120,312	140,145	76,311
Total income before income taxes	\$222,608	\$133,045	\$185,379

The provision for income taxes consists of the following (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
Current:			
Federal	\$57,285	\$43,161	\$39,476
State	10,121	3,958	8,607
Foreign	31,504	24,154	6,330
Total current provision	98,910	71,273	54,413
Deferred:			
Federal	(7,724) (22,738) 6,557
State	(7,708) (8,050) (6,808
Foreign	(12,124) 5,932	6,326
Total deferred (benefit) provision	(27,556) (24,856) 6,075
Total tax provision	\$71,354	\$46,417	\$60,488

The provision for income taxes reconciles to the amount computed by applying the federal statutory rate to income before taxes as follows (in thousands):

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
Tax at federal statutory rate	\$77,913	\$46,566	\$64,881

Other	315	(563) (1,147
Total tax provision	\$71,354	\$46,417	\$60,488

Significant components of the Company's deferred tax assets and liabilities are as follows (in thousands):

	December 30, 2012	January 1, 2012
Deferred tax assets:		
Net operating losses	\$2,564	\$4,981
Tax credits	16,447	16,647
Other accruals and reserves	47,306	22,411
Stock compensation	39,175	33,811
Inventory adjustments	8,977	16,469
Impairment of cost-method investment	1,406	4,972
Other amortization	5,195	4,521
Other	13,469	8,861
Total gross deferred tax assets	134,539	112,673
Valuation allowance on deferred tax assets	(1,756) (1,799
Total deferred tax assets	132,783	110,874
Deferred tax liabilities:		
Purchased intangible amortization	(20,116) (19,760
Convertible debt	(38,910) (49,404
Property and equipment	(10,867) (4,369
Other	(6,682) (7,953
Total deferred tax liabilities	(76,575) (81,486
Net deferred tax assets	\$56,208	\$29,388

A valuation allowance is established when it is more likely than not the future realization of all or some of the deferred tax assets will not be achieved. The evaluation of the need for a valuation allowance is performed on a jurisdiction-by-jurisdiction basis, and includes a review of all available positive and negative evidence. Based on the available evidence as of December 30, 2012, the Company was not able to conclude it is more likely than not certain U.S. deferred tax assets will be realized. Therefore, the Company recorded a valuation allowance of \$1.8 million against certain U.S. deferred tax assets.

As of December 30, 2012, the Company had net operating loss carryforwards for federal and state tax purposes of \$16.8 million and \$117.8 million, respectively, which will begin to expire in 2020 and 2015, respectively. In addition,

the Company also had state research and development tax credit carryforwards of \$39.7 million, which will begin to expire in 2019.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Pursuant to Section 382 and 383 of the Internal Revenue Code, utilization of the Company's net operating loss and credits may be subject to annual limitations in the event of any significant future changes in its ownership structure. These annual limitations may result in the expiration of net operating losses and credits prior to utilization. The deferred tax assets as of December 30, 2012 are net of any previous limitations due to Section 382 and 383.

The Company recognizes excess tax benefits associated with share-based compensation to stockholders' equity only when realized. When assessing whether excess tax benefits relating to share-based compensation have been realized, the Company follows the with-and-without approach excluding any indirect effects of the excess tax deductions. Under this approach, excess tax benefits related to share-based compensation are not deemed to be realized until after the utilization of all other tax benefits available to the Company. During the year ended December 30, 2012, the Company realized \$17.0 million of such excess tax benefits, and accordingly recorded a corresponding credit to additional paid in capital. As of December 30, 2012, the Company has \$9.8 million of unrealized excess tax benefits associated with share-based compensation. These tax benefits will be accounted for as a credit to additional paid-in capital, if and when realized, rather than a reduction of the provision for income taxes.

The Company's manufacturing operations in Singapore operate under various tax holidays and incentives that begin to expire in 2018. For the year ended December 30, 2012, these tax holidays and incentives resulted in an approximate \$10.2 million decrease to the provision for income taxes and an increase to net income per diluted share of \$0.08.

It is the Company's intention to indefinitely reinvest all current and future foreign earnings in order to ensure sufficient working capital and expand existing operations outside the United States. Accordingly, residual U.S. income taxes have not been provided on \$185.6 million of undistributed earnings of foreign subsidiaries as of December 30, 2012. In the event the Company was required to repatriate funds from outside of the United States, such repatriation would be subject to local laws, customs, and tax consequences.

The following table summarizes the gross amount of the Company's uncertain tax positions (in thousands):

	December 30, 2012	January 1, 2012	January 2, 2011
Balance at beginning of year	\$28,396	\$22,729	\$11,760
Increases related to prior year tax positions	2,573	875	5,066
Decreases related to prior year tax positions	(69) (382) —
Increases related to current year tax positions	6,685	5,174	5,903
Balance at end of year	\$37,585	\$28,396	\$22,729

Included in the balance of uncertain tax positions as of December 30, 2012, and January 1, 2012 are \$29.9 million and \$23.4 million, respectively, of net unrecognized tax benefits that, if recognized, would reduce the Company's effective income tax rate in future periods.

The Company does not expect its uncertain tax positions to change significantly over the next 12 months. Any interest and penalties related to uncertain tax positions are reflected in the provision for income taxes. The Company recognized expenses of \$0.8 million and \$1.1 million related to potential interest and penalties on uncertain tax positions during the years ended December 30, 2012 and January 1, 2012, respectively. A minimal amount was recognized in 2010 for potential interest and penalties on uncertain tax positions. The Company recorded a liability for potential interest and penalties of \$2.1 million and \$1.2 million as of December 30, 2012 and January 1, 2012, respectively. Tax years 1997 to 2012 remain subject to future examination by the major tax jurisdictions in which the Company is subject to tax.

14. Employee Benefit Plans

Retirement Plan

The Company has a 401(k) savings plan covering substantially all of its employees in the United States. Company contributions to the plan are discretionary. During the years ended December 30, 2012, January 1, 2012, and January 2, 2011, the Company made matching contributions of \$5.5 million, \$5.3 million, and \$4.2 million, respectively.

Table of Contents

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Deferred Compensation Plan

The Company adopted the Illumina, Inc. Deferred Compensation Plan (the Plan) that became effective January 1, 2008. Eligible participants, which include the Company's senior level employees and members of the board of directors, can contribute up to 80% of their base salary and 100% of all other forms of compensation into the Plan, including bonus, equity awards, commission, and director fees. The Company has agreed to credit the participants' contributions with earnings that reflect the performance of certain independent investment funds. On a discretionary basis, the Company may also make employer contributions to participant accounts in any amount determined by the Company. The vesting schedules of employer contributions are at the sole discretion of the Compensation Committee. However, all employer contributions shall become 100% vested upon the occurrence of the participant's disability, death or retirement or a change in control of the Company. The benefits under this plan are unsecured. Participants are generally eligible to receive payment of their vested benefit at the end of their elected deferral period or after termination of their employment with the Company for any reason or at a later date to comply with the restrictions of Section 409A. As of December 30, 2012, no employer contributions were made to the Plan.

In January 2008, the Company also established a rabbi trust for the benefit of the participants under the Plan. In accordance with authoritative guidance related to consolidation of variable interest entities and accounting for deferred compensation arrangements where amounts earned are held in a rabbi trust and invested, the Company has included the assets of the rabbi trust in its consolidated balance sheet since the trust's inception. As of December 30, 2012 and January 1, 2012, the assets of the trust were \$13.6 million and \$10.8 million, respectively, and liabilities of the Company were \$12.1 million and \$9.0 million, respectively. The assets and liabilities are classified as other assets and accrued liabilities, respectively, on the Company's consolidated balance sheets. Changes in the values of the assets held by the rabbi trust are recorded in other (expense) income, net in the consolidated statement of income, and changes in the values of the deferred compensation liabilities are recorded in cost of sales or operating expenses.

15. Segment Information, Geographic Data, and Significant Customers

The Company is organized in two operating segments: Life Sciences and Diagnostics. Life Sciences operating segment includes all products and services related to the research market, namely the product lines based on the Company's sequencing, BeadArray, and real-time PCR technologies. The Diagnostics operating segment focuses on the emerging opportunity in molecular diagnostics. During all periods presented, the Diagnostics operating segment had limited activity. Accordingly, the Company's operating results for both units were reported on an aggregate basis as one reportable segment. The Company will begin reporting in two segments once revenues, operating profit or loss, or assets of the Diagnostics operating segment exceeds 10% of the consolidated amounts.

The Company had revenue in the following regions for the years ended December 30, 2012, January 1, 2012, and January 2, 2011 (in thousands):

	Years Ended		
	December 30, 2012	January 1, 2012	January 2, 2011
United States	\$568,443	\$528,723	\$498,981
United Kingdom	81,678	67,578	60,521
Other European countries	209,726	210,393	163,062
Asia-Pacific	232,498	197,005	143,441
Other markets	56,171	51,836	36,736
Total	\$1,148,516	\$1,055,535	\$902,741

Net revenues are attributable to geographic areas based on the region of destination.

The majority of our product sales consist of consumables and instruments. For the years ended December 30, 2012, January 1, 2012, and January 2, 2011, consumable sales represented 64%, 56%, and 56%, respectively, of total revenues and instrument sales comprised 27%, 35%, and 36%, respectively, of total revenues. The Company's customers include leading genomic research centers, academic institutions, government laboratories, and clinical research organizations, as well as pharmaceutical, biotechnology, agrigenomics, and consumer genomics companies, and in vitro fertilization clinics. The

ILLUMINA, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Company had no customers that provided more than 10% of total revenue in the years ended December 30, 2012, January 1, 2012, and January 2, 2011.

Net long-lived assets exclude goodwill and other intangible assets since they are not allocated on a geographic basis. The Company had net long-lived assets consisting of property and equipment in the following regions as of December 30, 2012 and January 1, 2012 (in thousands):

	December 30, 2012	January 1, 2012
United States	\$126,749	\$94,624
United Kingdom	21,740	22,642
Singapore	12,504	14,673
Other countries	5,174	11,544
Total	\$166,167	\$143,483

16. Quarterly Financial Information (unaudited)

The following financial information reflects all normal recurring adjustments, except as noted below, which are, in the opinion of management, necessary for a fair statement of the results and cash flows of interim periods. All quarters for fiscal years 2012 and 2011 ended December 30, 2012 and January 1, 2012 were 13 weeks. Summarized quarterly data for fiscal years 2012 and 2011 are as follows (in thousands except per share data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2012:				
Total revenue	\$272,770	\$280,607	\$285,874	\$309,265
Gross profit	181,011	192,997	195,873	203,647
Net income	26,202	23,401	29,748	71,903
Net income per share, basic	0.21	0.19	0.24	0.58
Net income per share, diluted	0.20	0.18	0.22	0.53
2011:				
Total revenue	\$282,515	\$287,450	\$235,499	\$250,071
Gross profit	188,041	193,356	157,115	170,586
Net income	24,137	30,620	20,151	11,720
Net income per share, basic	0.19	0.25	0.17	0.10
Net income per share, diluted	0.16	0.22	0.15	0.09

17. Subsequent Event

On January 6, 2013, the Company entered into a definitive agreement to acquire Verinata Health, Inc. (Verinata), a leading provider of non-invasive tests for the early identification of fetal chromosomal abnormalities, for consideration of \$350 million in cash and up to \$100 million in milestone payments through 2015. In connection with the intended acquisition, the Company also agreed to provide bridge financing to Verinata for up to an aggregate amount of \$45 million in exchange for the issuance of subordinated convertible promissory notes from Verinata. Any subordinated notes outstanding as of the consummation of the acquisition, net of Verinata's cash on hand, will reduce the total cash payments to be made by the Company at closing.

ITEM 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

80

Table of Contents

ITEM 9A. Controls and Procedures.

We design our internal controls to provide reasonable assurance that (1) our transactions are properly authorized; (2) our assets are safeguarded against unauthorized or improper use; and (3) our transactions are properly recorded and reported in conformity with U.S. generally accepted accounting principles. We also maintain internal controls and procedures to ensure that we comply with applicable laws and our established financial policies.

Based on management's evaluation (under the supervision and with the participation of our chief executive officer (CEO) and chief financial officer (CFO)), as of the end of the period covered by this report, our CEO and CFO concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), are effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

During the fourth quarter of 2012, there were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that materially affected or are reasonably likely to materially affect internal control over financial reporting.

An evaluation was also performed under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of any change in our internal control over financial reporting that occurred during the fourth quarter of 2012 and that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. The evaluation did not identify any such change.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. We conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control — Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 30, 2012. The effectiveness of our internal control over financial reporting as of December 30, 2012 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
Illumina, Inc.

We have audited Illumina, Inc.'s internal control over financial reporting as of December 30, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Illumina, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Illumina, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 30, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated balance sheets of Illumina, Inc. as of December 30, 2012 and January 1, 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three fiscal years in the period ended December 30, 2012 of Illumina, Inc. and our report dated February 15, 2013 expressed an unqualified opinion thereon.

PART III

ITEM 10. Directors, Executive Officers, and Corporate Governance.

(a) Identification of Directors. Information concerning our directors is incorporated by reference from the section entitled “Proposal One: Election of Directors,” “Information About Directors,” “Director Compensation,” and “Board of Directors and Corporate Governance” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

(b) Identification of Executive Officers. Information concerning our executive officers is incorporated by reference from the section entitled “Executive Officers” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

(c) Compliance with Section 16(a) of the Exchange Act. Information concerning compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated by reference from the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

(d) Information concerning the audit committee financial expert as defined by the SEC rules adopted pursuant to the Sarbanes-Oxley Act of 2002 is incorporated by reference from the section entitled “Board of Directors and Corporate Governance” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

Code of Ethics

We have adopted a code of ethics for our directors, officers, and employees, which is available on our website at www.illumina.com in the Corporate Governance portal of the Investor Relations section under “Company.” A copy of the Code of Ethics is available in print free of charge to any stockholder who requests a copy. Interested parties may address a written request for a printed copy of the Code of Ethics to: Corporate Secretary, Illumina, Inc., 5200 Illumina Way, San Diego, California 92122. We intend to satisfy the disclosure requirement regarding any amendment to, or a waiver from, a provision of the Code of Ethics for our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, by posting such information on our website. The information on, or that can be accessed from, our website is not incorporated by reference into this report.

ITEM 11. Executive Compensation.

Information concerning executive compensation is incorporated by reference from the sections entitled “Compensation Discussion and Analysis,” “Director Compensation,” and “Executive Compensation” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information concerning the security ownership of certain beneficial owners and management and information covering securities authorized for issuance under equity compensation plans is incorporated by reference from the sections entitled “Stock Ownership of Principal Stockholders and Management,” “Executive Compensation,” and “Equity Compensation Plan Information” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.

ITEM 13. Certain Relationships and Related Transactions, and Director Independence.

Information concerning certain relationships and related transactions, and director independence is incorporated by reference from the sections entitled “Proposal One: Election of Directors,” “Information About Directors,” “Director Compensation,” “Executive Compensation,” and “Certain Relationships and Related Party Transactions” to be contained in our definitive Proxy Statement with respect to our 2013 Annual Meeting of Stockholders to be filed with the SEC no later than April 29, 2013.
