## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## (UNAUDITED)

## (1) Summary of Significant Accounting Policies

(a)

Basis of Presentation

#### Abstract

The accompanying financial statements include the consolidated accounts of National Rural Utilities Cooperative Finance Corporation ("CFC"), Rural Telephone Finance Cooperative ("RTFC"), National Cooperative Services Corporation ("NCSC") and certain entities created and controlled by CFC to hold foreclosed assets and accommodate loan securitization transactions, after elimination of intercompany accounts and transactions.

Unless stated otherwise, references to "we," "our" or "us" represent the consolidation of CFC, RTFC, NCSC and certain entities created and controlled by CFC to hold foreclosed assets and accommodate loan securitization transactions. Foreclosed assets are held by two subsidiaries controlled by CFC. Denton Realty Partners, LP ("DRP") holds a land development loan and a related limited partnership interest. Caribbean Asset Holdings ("CAH") holds our investment in cable and telecommunications operating entities in the United States Virgin Islands ("USVI"), British Virgin Islands and St. Maarten.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States ("GAAP") requires management to make estimates and assumptions that affect the assets, liabilities, revenue and expenses reported in the financial statements, as well as amounts included in the notes thereto, including discussion and disclosure of contingent liabilities. The accounting estimates that require our most significant and subjective judgments include the allowance for loan losses and the determination of the fair value of our derivatives and certain aspects of our foreclosed assets. While we use our best estimates and judgments based on the known facts at the date of the financial statements, actual results could differ from these estimates as future events occur.

During the preparation of our consolidated balance sheets for the quarter ended February 28, 2014, we determined that an intercompany elimination entry related to the consolidation of RTFC had been misclassified in each period since May 31, 2009, resulting in an overstatement of other liabilities and an understatement of noncontrolling interest at the end of each reported period. We corrected the misclassification in the quarter ended February 28, 2014, which resulted in a decrease of $\$ 11.5$ million in other liabilities and a corresponding increase in noncontrolling interest. We concluded that the correction of the misclassification was not material to our financial position in the current period, and the misclassification was not material to our financial position in the previously reported periods. Accordingly, we did not revise prior period balance sheet amounts. The misclassification had no impact on our consolidated statements

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

of operations and comprehensive income, total assets, total liabilities and equity, or cash flows for any of our previously filed annual or quarterly financial statements, and did not impact the compliance with any of our financial debt covenants for any period.

These interim unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2013. Reclassifications of prior period amounts have been made to conform to the current period presentation.

In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments (which consist only of normal recurring accruals) necessary for a fair presentation of our results of operations and financial position for the interim periods presented.

## (b) Variable Interest Entities

We are required to consolidate the financial results of RTFC and NCSC because CFC is the primary beneficiary of variable interests in RTFC and NCSC due to its exposure to absorbing the majority of their expected losses and because CFC manages the lending activities of RTFC and NCSC.

Under separate guarantee agreements, RTFC and NCSC pay CFC a fee to indemnify against loan losses. CFC is the sole lender to and manages the business operations of RTFC through a management agreement in effect until December 1, 2016, which is automatically renewed for one-year terms thereafter unless terminated by either party. CFC is the primary source of funding to and manages the lending activities of NCSC through a management agreement that is automatically renewable on an annual basis unless terminated by either party. NCSC funds its lending programs through loans from CFC or debt guaranteed by CFC. In connection with these guarantees, NCSC must pay a guarantee fee and purchase from CFC interest-bearing subordinated term certificates in proportion to the related guarantee.

Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

RTFC and NCSC creditors have no recourse against CFC in the event of a default by RTFC and NCSC, unless there is a guarantee agreement under which CFC has guaranteed NCSC or RTFC debt obligations to a third party. At February 28,2014 , CFC had guaranteed $\$ 121$ million of NCSC debt, derivative instruments and guarantees with third parties, and CFC's maximum potential exposure for these instruments totaled $\$ 128$ million. The maturities for NCSC obligations guaranteed by CFC extend through 2031. Guarantees of NCSC debt and derivative instruments are not included in Note 10, Guarantees, as the debt and derivatives are reported on the condensed consolidated balance sheet. At February 28, 2014, CFC guaranteed $\$ 2$ million of RTFC guarantees with third parties. The maturities for RTFC obligations guaranteed by CFC extend through 2015 and are renewed on an annual basis. All CFC loans to RTFC and NCSC are secured by all assets and revenue of RTFC and NCSC, respectively. At February 28, 2014, RTFC had total assets of $\$ 577$ million including loans outstanding to members of $\$ 455$ million, and NCSC had total assets of $\$ 804$ million including loans outstanding of $\$ 779$ million. At February 28, 2014, CFC had committed to lend RTFC up to $\$ 4,000$ million, of which $\$ 441$ million was outstanding. At February 28, 2014, CFC had committed to provide up to $\$ 3,000$ million of credit to NCSC, of which $\$ 884$ million was outstanding, representing $\$ 763$ million of outstanding loans and $\$ 121$ million of credit enhancements.

## (c)Loan Sales

We account for the transfer of loans resulting from direct loan sales to third parties and securitization transactions by removing the loans from our condensed consolidated balance sheets when control has been surrendered. We retain the servicing performance obligations on these loans and recognize related servicing fees on an accrual basis over the period for which servicing activity is provided. Deferred transaction costs and unamortized deferred loan origination costs related to the loans sold are included in determining the gain or loss on the sale. We do not hold any continuing interest in the loans sold to date other than servicing performance obligations. We have no obligation to repurchase loans from the purchaser, except in the case of breaches of representations and warranties.

During the nine months ended February 28, 2014 and 2013, we sold CFC loans with outstanding balances totaling $\$ 106$ million and $\$ 121$ million, respectively, at par for cash. We recorded immaterial losses on the sale of these loans.

## (d) Interest Income

Interest income on loans is recognized using the effective interest method. The following table presents the components of interest income:

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :--- | :--- | :--- | :--- |
|  | February 28, | February 28, |  |  |
| (Dollars in thousands) | 2014 | 2013 | 2014 | 2013 |
| Interest on long-term fixed-rate loans | $\$ 220,227$ | $\$ 216,716$ | $\$ 666,762$ | $\$ 652,903$ |
| Interest on long-term variable-rate loans | 5,217 | 5,203 | 14,871 | 16,121 |

| Interest on line of credit loans | 8,302 | 7,961 | 23,379 | 23,066 |
| :--- | :--- | :--- | :--- | :--- |
| Interest on restructured loans | - | 436 | 136 | 13,523 |
| Interest on investments | 1,932 | 1,864 | 5,685 | 4,378 |
| Fee income (1) | 3,054 | 1,841 | 8,224 | 5,745 |
| Total interest income | $\$ 238,732$ | $\$ 234,021$ | $\$ 719,057$ | $\$ 715,736$ |

(1) Primarily related to conversion fees that are deferred and recognized using the effective interest method over the remaining original loan interest rate pricing term, except for a small portion of the total fee charged to cover administrative costs related to the conversion, which is recognized immediately.

Deferred income recorded on the condensed consolidated balance sheets primarily consists of deferred conversion fees totaling $\$ 74$ million and $\$ 21$ million at February 28, 2014 and May 31, 2013, respectively.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## (e) Interest Expense

The following table presents the components of interest expense:

|  | Three Months Ended |  | Nine Months Ended <br> February 28, |  |
| :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) | 2014 | 2013 | 2014 | 2013 |
| Interest expense on debt (1): |  |  |  |  |
| Short-term debt | $\$ 1,406$ | $\$ 1,717$ | $\$ 4,445$ | $\$ 5,033$ |
| Medium-term notes | 20,369 | 21,294 | 62,920 | 74,010 |
| Collateral trust bonds | 76,090 | 84,197 | 227,746 | 247,907 |
| Subordinated deferrable debt | 4,750 | 2,806 | 14,250 | 8,419 |
| Subordinated certificates | 19,777 | 20,345 | 60,897 | 61,227 |
| Long-term notes payable | 37,130 | 37,622 | 113,828 | 113,933 |
| Debt issuance costs (2) | 1,806 | 1,891 | 5,453 | 5,733 |
| Fee expense (3) | 2,206 | 2,027 | 6,925 | 6,534 |
| Total interest expense | $\$ 163,534$ | $\$ 171,899$ | $\$ 496,464$ | $\$ 522,796$ |

(1) Represents interest expense and the amortization of discounts on debt.
(2) Includes amortization of all deferred charges related to the issuance of debt, principally underwriters' fees, legal fees, printing costs and comfort letter fees. Amortization is calculated using the effective interest method or a method approximating the effective interest method. Also includes issuance costs related to dealer commercial paper, which are recognized as incurred.
(3) Includes various fees related to funding activities, including fees paid to banks participating in our revolving credit agreements.

We exclude indirect costs, if any, related to funding activities from interest expense.

## (f)Derivative Financial Instruments

We are an end user of financial derivative instruments and not a swap dealer. We use derivatives such as interest rate swaps and treasury rate locks to mitigate interest rate risk. Consistent with the accounting standards for derivative financial instruments, we record derivative instruments (including certain derivative instruments embedded in other contracts) on the condensed consolidated balance sheets as either an asset or liability measured at fair value. In recording the fair value of derivative assets and liabilities, we do not net our positions under contracts with individual counterparties. Accrued cash settlements on our derivatives are recorded as accrued interest and other receivables and accrued interest payable line items of the condensed consolidated balance sheet. Changes in the fair value of

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

derivative instruments along with realized gains and losses from cash settlements are recognized in the derivative gains (losses) line item of the condensed consolidated statement of operations unless specific hedge accounting criteria are met.

We formally document, designate and assess the effectiveness of derivatives designated for hedge accounting treatment, which typically include treasury rate locks. If applicable cash flow hedge accounting criteria are met for these derivatives, changes in the fair value of the derivative instruments are recorded in other comprehensive income, and net cash settlements are recorded in interest expense. The gain or loss on derivatives used as a cash flow hedge of a forecasted debt transaction is recorded as a component of other comprehensive income (loss) and reclassified to interest expense using the effective interest method over the term of the hedged debt. Any ineffectiveness in the hedging relationship is recognized in the derivative gains (losses) line of the statement of operations.

Cash activity associated with interest rate swaps is classified as an operating activity in the condensed consolidated statements of cash flows.

## (g)New Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board issued Accounting Standards Update, Disclosures about Offsetting Assets and Liabilities, which requires enhanced disclosures about certain financial assets and liabilities that are subject to enforceable master netting agreements or similar agreements, or that have otherwise been offset on the balance sheet under certain specific conditions that permit net presentation. In January 2013, the Financial Accounting Standards Board issued Accounting Standards Update, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities, which clarifies that the scope of the above guidance is limited to derivatives, repurchase and reverse repurchase agreements,
and securities borrowing and lending transactions. The guidance was effective for us beginning in the first quarter of fiscal year 2014. See Note 8, Derivative Financial Instruments, for additional disclosures about offsetting assets and liabilities.

In February 2013, the Financial Accounting Standards Board issued Accounting Standards Update, Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income, which requires enhanced disclosures of the amounts reclassified out of Accumulated Other Comprehensive Income by component. In addition, an entity is required to present,

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of Accumulated Other Comprehensive Income by the respective line items of net income, but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. The guidance was effective for us beginning in the first quarter of fiscal year 2014 and did not have a material effect on the condensed consolidated financial statements, as the amounts reclassified out of other comprehensive income are immaterial for all periods presented.

## (2) Investment Securities

Our investment securities consist of Federal Agricultural Mortgage Corporation Series A preferred stock with a cost basis of $\$ 30$ million and fair value of $\$ 27$ million and $\$ 29$ million at February 28, 2014 and May 31, 2013, respectively, and an unrealized loss of $\$ 3$ million and $\$ 1$ million, respectively, recorded in accumulated other comprehensive income on the condensed consolidated balance sheet. The investment has been in a continuous unrealized loss position for less than twelve months, primarily due to the increase in interest rates. We do not intend to sell this investment in the foreseeable future and we currently expect to fully recover our cost. Our investment in this Series A preferred stock is classified as available-for-sale and therefore recorded in the condensed consolidated balance sheets at fair value.

Our investments also include Federal Agricultural Mortgage Corporation Class A common stock with a cost basis of $\$ 0.5$ million and a fair value of $\$ 2.1$ million and $\$ 2.2$ million at February 28, 2014 and May 31, 2013, respectively, and an unrealized gain of $\$ 1.6$ million and $\$ 1.7$ million, respectively, recorded in accumulated other comprehensive income on the condensed consolidated balance sheet. Our investment in this Class A common stock is classified as available-for-sale and therefore recorded in the condensed consolidated balance sheets at fair value.

## (3) Loans and Commitments

Loans outstanding to members and unadvanced commitments by loan type and by member class are summarized as follows:

|  | February 28, 2014 |  | May 31, 2013 |  |
| :--- | :--- | :--- | :--- | :--- |

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

$\left.\begin{array}{lllll}\text { Deferred origination costs } & 9,731 & - & & \left.\begin{array}{l}9,557 \\ (54,325\end{array}\right)\end{array}\right)$
(1) The interest rate on unadvanced commitments is not set until drawn, therefore, the long-term unadvanced loan commitments have been classified in this table as variable-rate unadvanced commitments. However, at the time of the advance, the borrower may select a fixed or a variable rate on the new loan.
(2) Includes nonperforming and restructured loans.

14

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Nonperforming and restructured loans outstanding and unadvanced commitments to members included in the table above are summarized by loan type and by company below:

|  | February 28, 2014 |  | May 31, 2013 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Loans | Unadvanced | Loans |  | Uadvanced |
| (Dollars in thousands) | Outstanding | Commitments (1) | Outstandirgommitments (1) |  |  |
| Nonperforming and restructured loans: |  |  |  |  |  |
| Nonperforming loans: |  |  |  |  |  |
| CFC: |  |  |  |  |  |
| Line of credit loans | \$ 5,000 | \$ | \$5,000 | \$ | - |
| NCSC: |  |  |  |  |  |
| Line of credit loans | 450 | - | - |  | - |
| RTFC: |  |  |  |  |  |
| Long-term fixed-rate loans | 2,786 | - | 3,690 |  | - |
| Long-term variable-rate loans | 2,609 | - | 6,807 |  | - |
| Total nonperforming loans | \$ 10,845 | \$ | \$15,497 | \$ | - |
| Restructured loans: |  |  |  |  |  |
| CFC: |  |  |  |  |  |
| Long-term fixed-rate loans | \$ 7,584 | \$ | \$46,953 | \$ | - |
| Line of credit loans (2) | - | - | - |  | 5,000 |
| Total restructured loans | \$ 7,584 | \$ | \$46,953 | , | 5,000 |

(1) The interest rate on unadvanced commitments is not set until drawn, therefore, the long-term unadvanced loan commitments have been classified in this table as variable-rate unadvanced commitments. However, at the time of the advance, the borrower may select a fixed or a variable rate on the new loan.
(2) The unadvanced commitment is part of the terms outlined in the related restructure agreement. Loans advanced under these commitments would be classified as performing. Principal and interest due under these performing loans would be in addition to scheduled payments due under the restructured loan agreement.

## Unadvanced Loan Commitments

A total of $\$ 2,249$ million and $\$ 1,703$ million of unadvanced commitments at February 28, 2014 and May 31, 2013, respectively, represented unadvanced commitments related to committed lines of credit loans that are not subject to a material adverse change clause at the time of each loan advance. As such, we will be required to advance amounts on these committed facilities as long as the borrower is in compliance with the terms and conditions of the facility.

The following table summarizes the available balance at February 28, 2014 under committed lines of credit that are not subject to a material adverse change clause and the related maturities by fiscal year and thereafter as follows:

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

|  | Available | Notional Maturities of Committed Lines of Credit |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) | Balance | 2014 | 2015 | 2016 | 2017 | 2018 | Thereafter |
| Committed lines of credit | $\$ 2,248,762$ | $\$ 19,048$ | $\$ 55,026$ | $\$ 61,000$ | $\$ 466,061$ | $\$ 861,098$ | $\$ 786,529$ |

The remaining unadvanced commitments totaling $\$ 11,296$ million and $\$ 11,720$ million at February 28, 2014 and May 31, 2013, respectively, were generally subject to material adverse change clauses. Prior to making an advance on these facilities, we confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with loan terms and conditions. In some cases, the borrower's access to the full amount of the facility is further constrained by the imposition of borrower-specific restrictions, or by additional conditions that must be met prior to advancing funds.

Unadvanced commitments related to line of credit loans are typically for periods not to exceed five years and are generally revolving facilities used for working capital and backup liquidity purposes. Historically, we have experienced a very low utilization rate on line of credit loan facilities, whether or not there is a material adverse change clause. Since we generally do not charge a fee on the unadvanced portion of the majority of our loan facilities, our borrowers will typically request long-term facilities to cover maintenance and capital expenditure work plans for periods of up to five years and draw down on the facility over that time. In addition, borrowers will typically request an amount in excess of their immediate estimated loan requirements to avoid the expense related to seeking additional loan funding for unexpected items.

The above items all contribute to our expectation that the majority of the unadvanced commitments will expire without being fully drawn upon and that the total unadvanced amount does not necessarily represent future cash funding requirements.

## Payment Status of Loans

The tables below present the payment status, including an aging of delinquent loans, of the recorded investment in loans outstanding by member class at February 28, 2014 and May 31, 2013:

February 28, 2014

(1) All loans 90 days or more past due are on non-accrual status.

May 31, 2013

(1) All loans 90 days or more past due are on non-accrual status.

## Credit Quality

We monitor the credit quality and performance statistics of our financing receivables in an ongoing manner to provide a balance between the credit needs of our members and the requirements for sound credit quality of the loan portfolio. We evaluate the credit quality of our loans using an internal risk rating system that employs similar criteria for all member classes.

Our internal risk rating system is based on a determination of a borrower's risk of default utilizing both quantitative and qualitative measurements.

We have grouped our risk ratings into the categories of pass and criticized based on the criteria below.
(i) Pass: Borrowers that are not experiencing difficulty and/or not showing a potential or well-defined credit weakness.
(ii) Criticized: Includes borrowers categorized as special mention, substandard and doubtful as described below:

Special mention: Borrowers that may be characterized by a potential credit weakness or deteriorating financial condition that is not sufficiently serious to warrant a classification of substandard or doubtful.

Substandard: Borrowers that display a well-defined credit weakness that may jeopardize the full collection of principal and interest.
Doubtful: Borrowers that have a well-defined weakness and the full collection of principal and interest is questionable or improbable.

Borrowers included in the pass, special mention, and substandard categories are reflected in the general portfolio of loans. Borrowers included in the doubtful category are reflected in the impaired portfolio of loans. Each risk rating is reassessed annually based on the receipt of the borrower's audited financial statements; however, interim downgrades and upgrades may take place at any time as significant events or trends occur.

The following table presents our loan portfolio by risk rating category and member class at February 28, 2014 and May 31, 2013:

| February 28, 2014 |  |  | May 31, 2013 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pass | Criticized | Total | Pass | Criticized | Total |
| \$ 15,168,785 | \$ 17,835 | \$ 15,186,620 | \$ 14,922,558 | \$ 18,634 | \$ 14,941,192 |
| 4,144,104 | 5,000 | 4,149,104 | 4,002,669 | 5,000 | 4,007,669 |
| 64,542 | 280 | 64,822 | 70,668 | 288 | 70,956 |

| 441,757 | 13,735 | 455,492 | 483,058 | 20,301 | 503,359 |
| 776,981 | 2,314 | 779,295 | 770,419 | 2,722 | 773,141 |
| \$20,596,169 | \$ 39,164 | \$20,635,333 | \$20,249,372 | \$ 46,945 | \$20,296,317 |

## Loan Security

Except when providing line of credit loans, we typically lend to our members on a senior secured basis. Long-term loans are typically secured on a parity with other secured lenders (primarily RUS), if any, by all assets and revenue of the borrower with exceptions typical in utility mortgages. Line of credit loans are generally unsecured. In addition to the lien and security interest we receive under the mortgage, our member borrowers are also required to achieve certain financial ratios as required by loan covenants.

The following table summarizes our secured and unsecured loans outstanding by loan type and by company:

|  | February 28, 2014 |  |  |  | May 31, 2013 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in thousands) | Secured | \% | Unsecured | \% | Secured | \% |  | Unsecured | \% |

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Nonperforming and Restructured Loans

Foregone interest income as a result of holding loans on non-accrual status:

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | ---: | :---: | :--- | :--- |
|  | February 28, |  | February 28, |  |
| (Dollars in thousands) | 2014 | 2013 | 2014 | 2013 |
| Nonperforming loans | $\$ 120$ | $\$ 355$ | $\$ 440$ | $\$ 1,135$ |
| Restructured loans | 122 | - | 367 | - |
| Total | $\$ 242$ | $\$ 355$ | $\$ 807$ | $\$ 1,135$ |

At February 28, 2014 and May 31, 2013, nonperforming loans totaled $\$ 11$ million, or 0.05 percent, of loans outstanding and $\$ 15$ million, or 0.08 percent, of loans outstanding, respectively. One borrower in this group is currently in bankruptcy. The debtor and certain secured creditors have negotiated a settlement for an agreed upon plan of reorganization. Another borrower in this group received a reversal of an unfavorable ruling related to state Universal Service Fund ("USF") payments. In March 2014, this borrower made a payment moving its loans to current payment status. There is one other borrower in this group that is currently seeking a buyer for its system, as it is not anticipated that it will have sufficient cash flow to repay its loans without the proceeds from the sale of the business. It is currently anticipated that even with the sale of the business, there will not be sufficient funds to repay the full amount owed. We have approval rights with respect to the sale of this company.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

At February 28, 2014 and May 31, 2013, we had restructured loans totaling $\$ 8$ million, or 0.04 percent, of loans outstanding and $\$ 47$ million, or 0.23 percent, of loans outstanding, respectively, all of which were performing according to their restructured terms. No interest income was accrued on restructured loans during the three months ended February 28, 2014 compared to $\$ 0.4$ million of interest income during the prior-year period. Approximately $\$ 0.1$ million of interest income was accrued on restructured loans during the nine months ended February 28, 2014, compared with $\$ 14$ million of interest income in the prior-year period. One of the restructured loans totaling $\$ 39$ million at May 31, 2013, was refinanced without concession during the first quarter of fiscal year 2014, with the new loan classified as performing at February 28, 2014. This loan was on accrual status since the time of restructuring. At February 28, 2014, all restructured loans were on non-accrual status.

We believe our allowance for loan loss is appropriate to cover the losses inherent in our loan portfolio at February 28, 2014.

## Pledging of Loans and Loans on Deposit

We are required to pledge eligible mortgage notes in an amount at least equal to the outstanding balance of our secured debt.

The following table summarizes our loans outstanding as collateral pledged to secure our collateral trust bonds, Clean Renewable Energy Bonds and notes payable to the Federal Agricultural Mortgage Corporation and the amount of the corresponding debt outstanding (see Note 5, Short-Term Debt and Credit Arrangements and Note 6, Long-Term Debt).

| (Dollars in thousands) | February | May 31, |
| :--- | ---: | :--- |
| Collateral trust bonds: | 28,2014 | 2013 |
| 2007 indenture |  |  |
| Distribution system mortgage notes | $\$ 5,454,096$ | $\$ 5,674,804$ |
| RUS guaranteed loans qualifying as permitted investments | 162,509 | 165,823 |
| Total pledged collateral | $\$ 5,616,605$ | $\$ 5,840,627$ |
| Collateral trust bonds outstanding | $5,179,372$ | $4,679,372$ |
|  |  |  |
| 1994 indenture | $\$ 1,567,122$ | $\$ 1,641,858$ |
| Distribution system mortgage notes | $1,310,000$ | $1,465,000$ |
| Collateral trust bonds outstanding |  |  |
|  |  |  |
| Federal Agricultural Mortgage Corporation: | $\$ 1,784,959$ | $\$ 1,795,947$ |
| Distribution and power supply system mortgage notes | $1,523,032$ | $1,542,474$ |
| Notes payable outstanding |  |  |

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Clean Renewable Energy Bonds Series 2009A:

| Distribution and power supply system mortgage notes | $\$ 21,932$ | $\$ 23,536$ |
| :--- | :---: | :---: |
| Cash | 7,221 | 7,634 |
| Total pledged collateral | $\$ 29,153$ | $\$ 31,170$ |
| Notes payable outstanding | 18,230 | 19,888 |

We are required to maintain collateral on deposit in an amount at least equal to the balance of debt outstanding to the Federal Financing Bank of the United States Treasury issued under the Guaranteed Underwriter program of the U.S. Department of Agriculture (the "Guaranteed Underwriter Program"). See Note 6, Long-Term Debt.

The following table shows the collateral on deposit and the amount of the corresponding debt outstanding:

| (Dollars in thousands) | February $28,2014$ | $\begin{aligned} & \text { May 31, } \\ & 2013 \end{aligned}$ |
| :---: | :---: | :---: |
| Federal Financing Bank |  |  |
| Distribution and power supply system mortgage notes on deposit | \$4,387,115 | \$3,903,786 |
| Notes payable outstanding | 3,999,000 | 3,674,000 |

## (4) Foreclosed Assets

Assets received in satisfaction of loan receivables are initially recorded at fair value when received and subsequently evaluated for impairment. These assets are classified on the condensed consolidated balance sheets as foreclosed assets. At February 28, 2014, all foreclosed assets were held by DRP and CAH, which are wholly-owned subsidiaries of CFC.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

The activity for foreclosed assets is summarized below:

|  | Nine Months Ended February |  |  |
| :--- | :--- | :--- | :--- |
|  | 28,2014 |  |  |
| (Dollars in thousands) | CAH | DRP | Total |
| Balance as of May 31, 2013 | $\$ 248,049$ | $\$ 13,423$ | $\$ 261,472$ |
| Results of operations | $(7,853$ | $(629$ | $(8,482)$ |
| Cash investments (proceeds) | 7,410 | $(5,250)$ | 2,160 |
| Balance as of February 28, 2014 | $\$ 247,606$ | $\$ 7,544$ | $\$ 255,150$ |

During the nine months ended February 28, 2014, our investment in the DRP foreclosed assets decreased primarily due to net cash proceeds received of $\$ 5$ million from the sale of raw land and developed lots and bonds reimbursements received.

## (5) Short-Term Debt and Credit Arrangements

The following is a summary of short-term debt outstanding:

|  | February | May 31, |
| :--- | :--- | :--- |
|  | 28, | 2013 |
| (Dollars in thousands) | 2014 |  |
| Short-term debt: |  |  |
| Commercial paper sold through dealers, net of discounts (1) | $\$ 2,611,744$ | $\$ 2,009,884$ |
| Commercial paper sold directly to members, at par (1) | 916,675 | 812,141 |
| Commercial paper sold directly to non-members, at par (1) | 20,160 | 39,298 |
| Select notes | 496,031 | 358,390 |
| Daily liquidity fund notes sold directly to members | 590,724 | 680,419 |
| Bank bid notes | 150,000 | 150,000 |
| Subtotal short-term debt | $4,785,334$ | $4,050,132$ |
|  |  |  |
| Long-term debt maturing within one year: |  |  |
| Medium-term notes sold through dealers | 270,282 | 989,607 |
| Medium-term notes sold to members | 365,845 | 391,318 |
| Secured collateral trust bonds | 854,605 | $1,504,949$ |
| Loan and guarantees subordinated certificates | 53,370 | 37,176 |
| Member capital securities | 181,480 | - |
| Secured notes payable | 27,174 | 742,402 |
| Unsecured notes payable | 3,897 | 3,899 |
| Total long-term debt maturing within one year | $1,756,653$ | $3,669,351$ |
| Total short-term debt | $\$ 6,541,987$ | $\$ 7,719,483$ |

(1) Backup liquidity is provided by our revolving credit agreements.

## Revolving Credit Agreements

At February 28, 2014 and May 31, 2013, we had $\$ 3,445$ million and $\$ 3,100$ million, respectively, of commitments under revolving credit agreements. We may request letters of credit for up to $\$ 100$ million under each agreement in place at February 28, 2014, which then reduces the amount available under the facility. Our bank lines of credit may be used for general corporate purposes; however, we use them primarily as backup liquidity for dealer and member commercial paper.

The following table presents the total available and the outstanding letters of credit under our revolving credit agreements:

| (Dollars in thousands) | Total Available |  | Letters of Credit Outstanding |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | February 28, 2014 | $\begin{aligned} & \text { May 31, } \\ & 2013 \end{aligned}$ | February 28, 2014 | $\begin{aligned} & \text { May 31, } \\ & 2013 \end{aligned}$ | Maturity | Facility Fee <br> Per Year (1) |
| Three-year agreement | \$219,000 | \$219,000 | \$ | \$ - | March 21, 2014 | 15 basis points |
| Three-year agreement | 1,036,000 | 916,000 | - | - | October 28, 2016 | 10 basis points |
| Four-year agreement | 1,122,500 | 1,007,500 | - | - | October 28, 2017 | 10 basis points |
| Five-year agreement | 1,065,609 | 954,012 | 1,891 | 3,488 | October 28, 2018 | 10 basis points |
| Total | 3,443,109 | \$3,096,512 | \$ 1,891 | \$ 3,488 |  |  |

(1) Facility fee determined by CFC's senior unsecured credit ratings based on the pricing schedules put in place at the inception of the related agreement.

On October 28, 2013, we amended our $\$ 1,006$ million three-year, $\$ 1,088$ million four-year, and $\$ 1,033$ million five-year revolving credit agreements to extend the maturity dates for the three-year, four-year, and five-year revolving credit agreements by one year each to October 28, 2016, 2017 and 2018, respectively. On February 7, 2014, we exercised our option to increase the commitment level for the three-year revolving credit agreement maturing on October 28, 2016, four-year revolving credit agreement maturing on October 28, 2017, and five-year revolving credit agreement maturing on October 28, 2018 by a total of $\$ 100$ million to $\$ 1,036$ million, $\$ 1,122$ million, and $\$ 1,068$ million, respectively.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

The following represents our required and actual financial ratios under the revolving credit agreements:

|  | Actual <br> February |  |  |
| :--- | :--- | :--- | :--- |
| Minimum average adjusted TIER over the six most recent fiscal quarters (1) | 1.025 | 1.28 | 1.27 |
| Requirement |  |  |  |
| 28, |  |  |  |
| Minimum adjusted TIER for the most recent fiscal year (1) (2) | 1.05 | 1.29 | 1.29 |
| Maximum ratio of adjusted senior debt to total equity (1) | 10.00 | 5.92 | 5.85 |

(1) In addition to the adjustments made to the leverage ratio set forth in the Non-GAAP Financial Measures section, senior debt excludes guarantees to member systems that have certain investment-grade ratings from Moody's Investors Service and Standard \& Poor's Corporation. The TIER and debt-to-equity calculations include the adjustments set forth in the Non-GAAP Financial Measures section and exclude the results of operations for CAH.
(2) We must meet this requirement to retire patronage capital.

At February 28, 2014 and May 31, 2013, we were in compliance with all covenants under our revolving credit agreements and there were no borrowings outstanding under these agreements.

## (6)Long-Term Debt

| $1,514,088$ | 819,960 |
| $6,969,896$ | $5,277,692$ |
| $\$ 12,902,920$ | $\$ 10,696,433$ |

In June 2013, we issued $\$ 400$ million of 2.35 percent collateral trust bonds due 2020. In November 2013, we issued $\$ 400$ million of 3.40 percent collateral trust bonds due 2023. On December 16, 2013, we redeemed $\$ 150$ million of our $\$ 600$ million 4.75 percent collateral trust bonds due March 1, 2014. The premium and unamortized issuance costs totaling $\$ 1.5$ million were recorded during the third quarter of fiscal 2014. In January 2014, we issued $\$ 300$ million of $1.10 \%$ collateral trust bonds due 2017 and $\$ 300$ million of $2.15 \%$ collateral trust bonds due 2019 .

At February 28, 2014 and May 31, 2013, we had unsecured notes payable totaling $\$ 3,999$ million and $\$ 3,674$ million, respectively, outstanding under bond purchase agreements with the Federal Financing Bank and a bond guarantee agreement with RUS issued under the Guaranteed Underwriter program, which provides guarantees to the Federal Financing Bank. During the nine months ended February 28, 2014, we borrowed $\$ 325$ million under our committed loan facilities with the Federal Financing Bank. On November 21, 2013, we closed on a $\$ 500$ million commitment from RUS to guarantee a loan from the Federal Financing Bank as part of the Guaranteed Underwriter Program that is available for advance through October 15, 2016. Advances under this facility have a 20 year maturity repayment period. At February 28, 2014, we had an aggregate amount of $\$ 924$ million available under committed term loan facilities from the Federal Financing Bank as part of this program. We are required to maintain collateral on deposit in an amount at least equal to the balance of debt outstanding to the Federal Financing Bank under this program.

At February 28, 2014 and May 31, 2013, secured notes payable include $\$ 1,523$ million and $\$ 1,542$ million, respectively, in debt outstanding to the Federal Agricultural Mortgage Corporation under a note purchase agreement totaling $\$ 3,900$ million. At February 28, 2014 and May 31, 2013, $\$ 26$ million and $\$ 741$ million, respectively, in debt outstanding to the Federal Agricultural Mortgage Corporation had a remaining maturity of less than one year and was classified as short-term debt and

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

$\$ 1,497$ and $\$ 801$ million, respectively, was classified as long-term debt. Under the terms of the note purchase agreement, we can borrow up to $\$ 3,900$ million at any time from the date of the agreement through January 11, 2016, and thereafter automatically extend the agreement on each anniversary date of the closing for an additional year, unless prior to any such anniversary date, the Federal Agricultural Mortgage Corporation provides CFC with a notice that the draw period will not be extended beyond the remaining term.

The agreement with the Federal Agricultural Mortgage Corporation is a revolving credit facility that allows us to borrow, repay and re-borrow funds at any time through maturity or from time to time as market conditions permit, provided that the principal amount at any time outstanding under the note purchase agreement is not more than the total available under the agreement. We are required to pledge eligible distribution system or power supply system loans as collateral in an amount at least equal to the total principal amount of notes outstanding under the agreement. See Note 3, Loans and Commitments, for additional information on the collateral pledged to secure notes payable under these programs.

## (7) Subordinated Deferrable Debt

At February 28, 2014 and May 31, 2013, we had $\$ 400$ million of 4.75 percent subordinated deferrable debt outstanding due 2043. Subordinated deferrable debt currently outstanding is callable at par on or after April 30, 2023.

## (8) Derivative Financial Instruments

We are an end user of financial derivative instruments and not a swap dealer. We utilize derivatives such as interest rate swaps and treasury rate locks to manage our interest rate risk exposure.

The following table shows the notional amounts outstanding and the weighted-average rate paid and received for our interest rate swaps by type:

|  | February 28, 2014 |  |  | May 31, 2013 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in thousands) | Notional Amount | WeightedAverage Rate Paid |  | WeightedAverage Rate Received |  | Notional amount | WeightedAverage Rate Paid |  | Weighted- <br> Average <br> Rate Received |
| Pay fixed-receive variable | \$5,172,809 | 3.36 | \% | 0.22 | \% | \$5,287,889 | 3.39 | \% | 0.26 |
| Pay variable-receive fixed | 3,124,000 | 0.86 |  | 3.62 |  | 3,500,440 | 1.12 |  | 4.62 |

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

The derivative gains (losses) line item of the condensed consolidated statement of operations includes cash settlements and derivative forward value for derivative instruments that do not meet hedge accounting criteria. Gains and losses recorded on the condensed consolidated statements of operations for our interest rate swaps are summarized below:

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :---: | :---: | :---: | :---: |
|  | February 28, | February 28, |  |  |
| (Dollars in thousands) | 2014 | 2013 | 2014 | 2013 |
| Derivative cash settlements | $\$(18,788)$ | $\$(14,607)$ | $\$(54,944)$ | $\$(43,926)$ |
| Derivative forward value | $(12,835)$ | 61,233 | 98,925 | 62,194 |
| Derivative (losses) gains | $\$(31,623)$ | $\$ 46,626$ | $\$ 43,981$ | $\$ 18,268$ |

## Rating Triggers for Derivatives

Some of our interest rate swaps have credit risk-related contingent features referred to as rating triggers. Rating triggers are not separate financial instruments and are not required to be accounted for separately as derivatives. At February 28, 2014, the following notional amounts of derivative instruments had rating triggers based on our senior unsecured credit ratings from Moody's Investors Service or Standard \& Poor's Corporation falling to a level specified in the applicable agreements and are grouped into the categories below. In calculating the payments and collections required upon termination, we netted the agreements for each counterparty, as allowed by the underlying master agreements. At February 28, 2014, our senior unsecured credit ratings from Moody's Investors Service and Standard \& Poor's Corporation were A2 and A, respectively. At February 28, 2014, both Moody's Investors Service and Standard \& Poor's Corporation had our ratings on stable outlook.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

| (Dollars in thousands) | Notional <br> Amount | Our Required <br> Payment | Amount We <br> Would Collect | Net <br> Total |
| :--- | :--- | :--- | :--- | :--- |
| Mutual rating trigger if ratings: | $\$-$ |  | $\$-$ | $\$$ - |
| fall to Baa1/BBB+ (1) | $\$-576,953$ | $(160,733$ | $)$ | 75,860 |

(1) Stated senior unsecured credit ratings are for Moody's Investors Service and Standard \& Poor's Corporation, respectively. Under these rating triggers, if the credit rating for either counterparty falls to the level specified in the agreement, the other counterparty may, but is not obligated to, terminate the agreement. If either counterparty terminates the agreement, a net payment may be due from one counterparty to the other based on the fair value, excluding credit risk, of the underlying derivative instrument.

In addition to the rating triggers listed in the preceding table, at February 28, 2014, we had a total notional outstanding amount of $\$ 450$ million of derivative instruments with one counterparty that would require the pledging of collateral totaling $\$ 9$ million (the fair value of such derivative instruments excluding credit risk) if our senior unsecured ratings from Moody's Investors Service were to fall below Baa2 or if the ratings from Standard \& Poor's Corporation were to fall below BBB. The aggregate fair value, net of the credit risk valuation adjustment, of all interest rate swaps with rating triggers that were in a net liability position at February 28, 2014 was $\$ 167$ million.

## Offsetting Derivatives Assets and Liabilities

As noted previously, all of our master swap agreements include netting provisions that allow for offsetting of all contracts with a given counterparty in the event of default by one of the two parties to the transaction.
Notwithstanding netting provisions, our derivative assets and liabilities are not offset in the accompanying condensed consolidated balance sheets. The following table provides information on the gross fair value of derivative assets and liabilities and the gross amounts that are not offset in the condensed consolidated balance sheets.

February 28, 2014

| (Dollars in thousands) |  |  | Net Amounts of Assets/ | Gross Amounts Not Offset in the Balance Sheet |  |  |

## (9) Equity

In May 2013, the CFC Board of Directors authorized the allocation of $\$ 1$ million of fiscal year 2013 net earnings to the Cooperative Educational Fund. In July 2013, the CFC Board of Directors authorized the allocation of the fiscal year 2013 net earnings as follows: $\$ 138$ million to the members' capital reserve and $\$ 81$ million to members in the form of patronage capital. In July 2013, the CFC Board of Directors authorized the retirement of allocated net earnings totaling $\$ 41$ million, representing 50 percent of the fiscal year 2013 allocation. This amount was returned to members in cash on October 1, 2013. Future allocations and retirements of net earnings may be made annually as determined by the CFC Board of Directors with due regard for its financial condition. The CFC Board of Directors has the authority to change the current practice for allocating and retiring net earnings at any time, subject to applicable laws and regulations.

## (10) Guarantees

The following table summarizes total guarantees by type of guarantee and member class:

|  | February <br> 28, | May 31, |
| :--- | :--- | :--- |
| (Dollars in thousands) | 2014 | 2013 |
| Total by type: |  |  |
| Long-term tax-exempt bonds | $\$ 519,185$ | $\$ 547,970$ |
| Letters of credit | 472,008 | 447,683 |
| Other guarantees | 115,018 | 117,118 |
| Total | $\$ 1,106,211$ | $\$ 1,112,771$ |
|  |  |  |
| Total by member class: |  |  |
| CFC: | $\$ 209,336$ | $\$ 245,265$ |
| Distribution | 801,785 | 810,900 |
| Power supply | 5,488 | 6,948 |
| Statewide and associate | $1,016,609$ | $1,063,113$ |
| CFC total | 2,304 | 3,711 |
| RTFC | 87,298 | 45,947 |
| NCSC | $\$ 1,106,211$ | $\$ 1,112,771$ |

The maturities for the long-term tax-exempt bonds and the related guarantees run through calendar year 2042. Amounts in the table represent the outstanding principal amount of the guaranteed bonds. At February 28, 2014, our maximum potential exposure for the $\$ 73$ million of fixed-rate tax-exempt bonds is $\$ 120$ million, representing principal and interest. Of the amounts shown in the table above for long-term tax-exempt bonds, $\$ 446$ million and $\$ 473$ million as of February 28, 2014 and May 31, 2013, respectively, are adjustable or floating-rate bonds that may be converted to a fixed rate as specified in the applicable indenture for each bond offering. We are unable to determine the maximum amount of interest that we could be required to pay related to the remaining adjustable and floating-rate bonds. Many of these bonds have a call provision that in the event of a default allow us to trigger the call provision. This would limit our exposure to future interest payments on these bonds. Our maximum potential exposure is secured by a mortgage lien on all of the member system's assets and future revenue. If the debt is accelerated because of a determination that the interest thereon is not tax-exempt, the system's obligation to reimburse us for any guarantee payments will be treated as a long-term loan.

The maturities for letters of credit run through calendar year 2024. The amounts shown in the table above represent our maximum potential exposure, of which $\$ 131$ million is secured at February 28, 2014. Security provisions include a mortgage lien on substantially all of the system's assets, future revenue and the system's investment in our commercial paper.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

In addition to the letters of credit listed in the table, under master letter of credit facilities in place at February 28, 2014, we may be required to issue up to an additional $\$ 168$ million in letters of credit to third parties for the benefit of our members. As of February 28, 2014, all of our master letter of credit facilities were subject to material adverse change clauses at the time of issuance. Also, at February 28, 2014 we had hybrid letter of credit facilities totaling $\$ 1,615$ million that represent commitments that may be used for the issuance of letters of credit or line of credit loan advances, at the option of a borrower, and are included in unadvanced loan commitments for line of credit loans reported in Note 3, Loans and Commitments. Hybrid letter of credit facilities subject to material adverse change clauses at the time of issuance totaled $\$ 353$ million at February 28, 2014. Prior to issuing a letter of credit, we would confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with the letter of credit terms and conditions. The remaining commitment under hybrid letter of credit facilities of $\$ 1,262$ million may be used for the issuance of letters of credit as long as the borrower is in compliance with the terms and conditions of the facility.

The maturities for other guarantees listed in the table run through calendar year 2025. The maximum potential exposure for these other guarantees is $\$ 116$ million, all of which is unsecured.

At February 28, 2014 and May 31, 2013, we had $\$ 456$ million and $\$ 410$ million of guarantees, respectively, representing 41 percent of total guarantees at the end of each period, under which our right of recovery from our members was not secured.

At February 28, 2014, we were the liquidity provider for a total of $\$ 571$ million of variable-rate tax-exempt bonds issued for our member cooperatives. As liquidity provider on these $\$ 571$ million of tax-exempt bonds, we are required to purchase bonds that are tendered or put by investors. Investors provide notice to the remarketing agent that they will tender or put a certain amount of bonds at the next interest rate reset date. If the remarketing agent is unable to sell such bonds to other
investors by the next interest rate reset date, we have unconditionally agreed to purchase such bonds. On a total of $\$ 446$ million of the bonds for which we are liquidity provider, we also provide a guarantee of all principal and interest, which is shown in the chart above as a tax-exempt bond guarantee. On a total of $\$ 125$ million of tax-exempt bonds, our obligation as liquidity provider is in the form of a letter of credit which is reflected in our letters of credit. During the nine months ended February 28, 2014, we were not required to perform as liquidity provider pursuant to these obligations.

## Guarantee Liability

At February 28, 2014 and May 31, 2013, we recorded a guarantee liability of $\$ 23$ million and $\$ 25$ million, respectively, which represents the contingent and non-contingent exposures related to guarantees and liquidity obligations associated with our members' debt. The contingent guarantee liability at February 28, 2014 and May 31, 2013 was $\$ 2$ million based on management's estimate of exposure to losses within the guarantee portfolio. The remaining balance of the total guarantee liability of $\$ 21$ million and $\$ 23$ million, respectively, at February 28, 2014 and May 31, 2013 relates to our non-contingent obligation to stand ready to perform over the term of our guarantees and liquidity obligations that we have entered into or modified since January 1, 2003.

Activity in the guarantee liability account is summarized below:

|  | Nine <br> Months |
| :--- | :--- |
| (Dollars in thousands) | Ended |
|  | February |
|  | 28,2014 |
| Beginning balance as of May 31, 2013 | $\$ 24,742$ |
| Net change in non-contingent liability | $(1,729 \quad)$ |
| Provision for contingent guarantee liability | 159 |
| Ending balance as of February 28, 2014 | $\$ 23,172$ |
|  |  |
| Liability as a percentage of total guarantees | $2.09 \quad \%$ |

## (11) Fair Value Measurement

## Fair Value

Assets and liabilities measured at fair value on either a recurring or non-recurring basis on the condensed consolidated balance sheets at February 28, 2014 and May 31, 2013 consisted of investments in common stock and preferred stock, derivative instruments, and collateral-dependent nonperforming loans.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Assets and Liabilities Measured at Fair Value on a Recurring Basis

We account for derivative instruments in the condensed consolidated balance sheets as either an asset or liability measured at fair value. There is not an active secondary market for the types of interest rate swaps we use. Our process to estimate the fair value of our derivative instruments involves multiple steps including consideration of indicative quotes from counterparties and use of a discounted cash flow model. We obtain indicative quotes from the interest rate swap counterparties to estimate fair value on a quarterly basis. The indicative quotes are based on the expected future cash flow and the estimated yield curve.

We perform analysis to validate the indicative quotes obtained from our swap counterparties and investigate any significant differences. We adjust the market values received from the counterparties using credit default swap levels for us and the counterparties. The credit default swap levels represent the credit risk premium required by a market participant based on the available information related to us and the counterparty. We only enter into swap agreements with counterparties that are participating in our revolving lines of credit at the time the exchange agreements are executed. All of our swap agreements are subject to master netting agreements.

Our valuation technique for interest rate swaps is based on discounted cash flows and we utilize observable inputs, which reflect market data. To calculate fair value, we determine the forward curve. The forward curve allows us to determine the projected floating rate cash flows and the discount factors needed to calculate the net present value of each interest payment. The significant observable inputs for our derivatives include Spot LIBOR rates, Eurodollar futures contracts, and market swap rates.

Fair values for our interest rate swaps are classified as a Level 2 valuation. We record the change in the fair value of our derivatives for each reporting period in the derivative gains (losses) line, included in non-interest income in the condensed consolidated statements of operations, as currently none of our derivatives qualify for hedge accounting.

Our investments in equity securities include investments in the Federal Agricultural Mortgage Corporation Class A common stock and Series A preferred stock, and are recorded in the condensed consolidated balance sheet at fair value. We calculate fair value of the investments based on the quoted price on the stock exchange where the stock is traded. That stock exchange

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

is an active market based on the volume of shares transacted. Fair values for these securities are classified as a Level 1 valuation. For the three and nine months ended February 28, 2014 we recorded an unrealized gain of $\$ 2$ million and an unrealized loss of $\$ 3$ million, respectively, compared with an unrealized loss of $\$ 0.5$ million and unrealized gain of $\$ 0.4$ million, respectively, for the prior-year periods in accumulated other comprehensive income on the condensed consolidated balance sheet.

Deferred compensation investments are recorded in the condensed consolidated balance sheets in the other assets category at fair value. We calculate fair value based on the quoted price on the stock exchange where the funds are traded. That stock exchange is an active market based on the volume of shares transacted. The amounts are invested in highly liquid indices and mutual funds and are classified within Level 1 of the fair value hierarchy.

The following table presents our assets and liabilities that are measured at fair value on a recurring basis:
(Dollars in thousands)
Derivative assets
Derivative liabilities
Investments in common and preferred stock
Deferred compensation investments

February 28, 2014 May 31, 2013
Level 1 Level 2 Level 1 Level 2
\$- \$261,598 \$- \$257,878

| - | 380,518 | - | 475,278 |
| :--- | :--- | :--- | :--- |
| 28,702 | - | 31,632 | - |
| 4,035 | - | 3,716 | - |

## Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

We may be required, from time to time, to measure certain assets at fair value on a non-recurring basis in accordance with GAAP. Any adjustments to fair value usually result from application of lower-of-cost or fair value accounting or write-downs of individual assets. At February 28, 2014 and May 31, 2013, we measured certain collateral-dependent nonperforming loans at fair value. We utilize the collateral fair value underlying the loan in estimating the specific loan loss allowance. To estimate the fair value of the collateral, we may use third party valuation specialists, internal estimates or a combination of both. The valuation technique used to determine fair value of the nonperforming loans provided by both our internal staff and third party specialists includes market multiples (i.e., comparable companies). The significant unobservable inputs used in the determination of fair value include EBITDA multiples ranging from $3.5 x$ to $5.0 x$. The material inputs used in estimating fair value by both internal staff and third party specialists are Level 3 within the fair value hierarchy. In these instances, the valuation is considered to be a non-recurring item. The significant unobservable inputs for Level 3 assets that are valued using fair values obtained from third party specialists are reviewed by our Credit Risk Management group to assess the reasonableness of the assumptions used and the accuracy of the work performed. In cases where we rely on third party inputs, we use the final unadjusted third party valuation analysis as support for any financial statement adjustments and disclosures to the financial statements. The valuation techniques and significant unobservable inputs for assets classified as Level 3 in the fair value hierarchy, which are measured using an internal model, are independently reviewed by other internal staff.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Assets measured at fair value on a non-recurring basis at February 28, 2014 and May 31, 2013, were classified as Level 3 within the fair value hierarchy. Any increase or decrease to significant unobservable inputs used in the determination of fair value will not have a material impact on the fair value measurement of those assets or to the results of operations of the Company. For the three and nine months ended February 28, 2014 and 2013, respectively, there were no losses on our nonperforming loans. The following table provides the carrying/fair value of the related individual assets at February 28, 2014 and May 31, 2013:

|  | Level 3 Fair Value |  |
| :--- | :--- | :--- |
|  | February | May 31, |
|  | 28, |  |
| (Dollars in thousands) | 2014 | 2013 |
| Nonperforming loans, net of specific reserves | $\$ 10,331$ | $\$ 12,070$ |

27

## (12) Fair Value of Financial Instruments

Carrying and fair values for our financial instruments are presented as follows:

|  | February 28, 2014 <br> Carrying |  | Fair Value | May 31, 2013 <br> Carrying <br> Value |
| :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) |  | Fair Value |  |  |

| Long-term debt | $12,902,920$ | $14,079,914$ | $10,696,433$ | $12,156,097$ |
| Guarantee liability | 23,172 | 26,061 | 24,742 | 27,730 |
| Derivative instruments | 380,518 | 380,518 | 475,278 | 475,278 |
| Subordinated deferrable debt | 400,000 | 372,200 | 400,000 | 404,300 |
| Members' subordinated certificates | $1,486,965$ | $1,486,965$ | $1,729,226$ | $1,880,672$ |

Off-balance sheet instruments:
Commitments

See Note 11, Fair Value Measurement, for more details on assets and liabilities measured at fair value on a recurring or non-recurring basis on our condensed consolidated balance sheets. We consider observable prices in the principal market in our valuations where possible. Fair value estimates were developed at the reporting date and may not necessarily be indicative of amounts that could ultimately be realized in a market transaction at a future date. There were no transfers between levels of the fair value hierarchy during the nine months ended February 28, 2014 and the year ended May 31, 2013.

With the exception of redeeming debt under early redemption provisions, terminating derivative instruments under early termination provisions and allowing borrowers to prepay their loans, we held and intend to hold all financial instruments to maturity excluding common stock and preferred stock investments that have no stated maturity. Below is a summary of significant methodologies used in estimating fair value amounts at February 28, 2014 and May 31, 2013.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Cash and Cash Equivalents

Cash and cash equivalents includes cash and certificates of deposit with original maturities of less than 90 days. Cash and cash equivalents are valued at the carrying value, which approximates fair value. Cash and cash equivalents are classified within Level 1 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, cash and cash equivalents classified within Level 1 of the fair value hierarchy totaled $\$ 843$ million and $\$ 177$ million, respectively.

## Restricted Cash

Restricted cash consists of cash and cash equivalents for which use is contractually restricted. Restricted cash is valued at the carrying value, which approximates fair value. Restricted cash is classified within Level 1 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, restricted cash classified within Level 1 of the fair value hierarchy totaled $\$ 7$ million and $\$ 8$ million, respectively.

## Investments

Our investments include investments in the Federal Agricultural Mortgage Corporation Class A common stock and Series A preferred stock. The Class A common stock and Series A preferred stock are classified as available-for-sale securities and recorded in the condensed consolidated balance sheets at fair value. We calculate fair value based on the quoted price on the stock exchange where the stock is traded. That stock exchange is an active market based on the volume of shares transacted. The common stock and preferred stock are classified within Level 1 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, investments classified within Level 1 of the fair value hierarchy totaled $\$ 29$ million and $\$ 32$ million, respectively.

## Time Deposits

Time deposits with financial institutions in interest bearing accounts have maturities of less than one year as of the reporting date and are valued at the carrying value, which approximates fair value. The deposits are classified within Level 2 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, time deposits classified within Level 2 of the fair value hierarchy totaled $\$ 700$ million.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Deferred Compensation Investments

CFC offers a non-qualified 457 (b) deferred compensation plan to highly compensated employees. Such amounts deferred by employees are invested by the company. The deferred compensation investments are recorded in the condensed consolidated balance sheets in the other assets category at fair value. We calculate fair value based on the quoted price on the stock exchange where the funds are traded. That stock exchange is an active market based on the volume of shares transacted. The amounts are invested in highly liquid indices and mutual funds and are classified within Level 1 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, deferred compensation investments classified within Level 1 of the fair value hierarchy totaled $\$ 4$ million.

## Loans to Members, net

As part of receiving a loan from us, our members have additional requirements and rights that are not typical of other financial institutions, such as the ability to receive a patronage capital allocation, the general requirement to purchase subordinated certificates or member capital securities to meet their capital contribution requirements as a condition of obtaining additional credit from us, the option to select fixed rates from one year to maturity with the fixed rate resetting or repricing at the end of each selected rate term, the ability to convert from a fixed rate to another fixed rate or the variable rate at any time, and certain interest rate discounts that are specific to the borrower's activity with us. These features make it difficult to obtain market data for similar loans. Therefore, we must use other methods to estimate the fair value.

Fair values for fixed-rate loans are estimated using a discounted cash flow technique by discounting the expected future expected cash flows using the current rates at which we would make similar loans to new borrowers for the same remaining maturities. The maturity date used in the fair value calculation of loans with a fixed rate for a selected rate term is the next repricing date since these borrowers must reprice their loans at various times throughout the life of the loan at the current market rate.

Loans with different risk characteristics, specifically nonperforming and restructured loans, are valued by using collateral valuations or by adjusting cash flows for credit risk and discounting those cash flows using the current rates at which similar loans would be made by us to borrowers for the same remaining maturities. See Note 11, Fair Value Measurement, for more details about how we calculate the fair value of certain nonperforming loans.

The carrying value of our variable rate loans adjusted for credit risk approximates fair value since variable-rate loans are eligible to be reset at least monthly.

Loans to members are classified within Level 3 of the fair value hierarchy and at February 28, 2014 and May 31, 2013, totaled $\$ 21,016$ million and $\$ 21,318$ million, respectively.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Debt Service Reserve Funds

Debt service reserve funds represent cash and/or investments on deposit with the bond trustee for tax-exempt bonds that we guarantee. Debt service reserve fund investments are comprised of actively traded tax exempt municipal bonds and commercial paper. Carrying value is considered to be equal to fair value. Debt service reserve funds are classified within Level 1 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, debt service reserve funds classified within Level 1 of the fair value hierarchy totaled $\$ 39$ million and $\$ 40$ million, respectively.

## Short-Term Debt

Short-term debt consists of commercial paper, select notes, bank bid notes, daily liquidity fund and other long-term debt due within one year. The fair value of short-term debt with maturities less than or equal to 90 days is carrying value, which is a reasonable estimate of fair value. The fair value of short-term debt with maturities greater than 90 days is estimated based on discounted cash flows and quoted market rates for debt with similar maturities. Short-term debt classified within Level 1 of the fair value hierarchy is comprised of dealer commercial paper, bank bid notes, and daily liquidity fund. At February 28, 2014 and May 31, 2013, short-term debt classified within Level 1 of the fair value hierarchy is based on quoted prices in active markets and totaled $\$ 3,353$ million and $\$ 2,840$ million, respectively.

Short-term debt classified within Level 2 of the fair value hierarchy is comprised of member commercial paper, non-member commercial paper and select notes. At February 28, 2014 and May 31, 2013, short-term debt classified within Level 2 of the fair value hierarchy was determined based on discounted cash flows using discount rates consistent with current market rates for similar products with similar remaining terms and totaled $\$ 1,433$ million and $\$ 1,210$ million, respectively. Short-term debt classified within Level 2 also includes our collateral trust bonds and medium-term notes maturing within one year. At February 28, 2014 and May 31, 2013, such short-term debt classified within Level 2 of the fair value hierarchy totaled $\$ 1,495$ million and $\$ 2,912$ million, respectively. The fair value of short term debt classified within Level 2 of the fair value hierarchy was determined based on discounted cash flows using a pricing model that incorporates available market information such as

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

indicative benchmark yields and credit spread assumptions that are provided by third party pricing services such as our banks that underwrite our other debt transactions.

Short-term debt classified within Level 3 of the fair value hierarchy includes our notes payable, members' subordinated certificates and members' capital securities due within one year and totaled $\$ 267$ million and $\$ 789$ million at February 28, 2014 and May 31, 2013, respectively. The fair value of short-term debt classified within Level 3 of the fair value hierarchy was determined based on discounted cash flows using benchmark yields and spreads for similar instruments supplied by underwriter quotes for similar instruments, if available. Secondary trading quotes for our debt instruments used in the determination of fair value incorporate our credit risk.

## Long-Term Debt

Long-term debt consists of collateral trust bonds, medium-term notes and long-term notes payable. We issue substantially all collateral trust bonds and some medium-term notes in underwritten public transactions. Collateral trust bonds and medium-term notes are classified within Level 2 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, long-term debt classified within Level 2 of the fair value hierarchy totaled $\$ 8,424$ million and $\$ 7,410$ million, respectively. The fair value of long-term debt classified within Level 2 of the fair value hierarchy was determined based on discounted cash flows. There is no active secondary trading for the underwritten collateral trust bonds and medium-term notes; therefore, dealer quotes and recent market prices are both used in estimating fair value. There is essentially no secondary market for the medium-term notes issued to our members or in transactions that are not underwritten; therefore, fair value is estimated based on observable benchmark yields and spreads for similar instruments supplied by banks that underwrite our other debt transactions.

The long-term notes payable are issued in private placement transactions and there is no secondary trading of such debt. Long-term notes payable are classified within Level 3 of the fair value hierarchy. Long-term debt classified within Level 3 of the fair value hierarchy totaled $\$ 5,656$ million and $\$ 4,746$ million at February 28, 2014 and May 31, 2013, respectively. The fair value was determined based on discounted cash flows using benchmark yields and spreads for similar instruments supplied by underwriter quotes for similar instruments, if available. Secondary trading quotes for our debt instruments used in the determination of fair value incorporate our credit risk.

## Guarantees

The fair value of our guarantee liability is based on the fair value of our contingent and non-contingent exposure related to our guarantees. The fair value of our contingent exposure for guarantees is based on management's estimate of our exposure to losses within the guarantee portfolio using a discounted cash flow method. The fair value of our non-contingent exposure for guarantees issued is estimated based on the total unamortized balance of guarantee fees paid and guarantee fees to be paid discounted at our current short-term funding rate, which represents management's estimate of the fair value of our obligation to stand ready to perform. Guarantees are classified within Level 3 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, guarantees classified within Level 3 of the fair value hierarchy totaled $\$ 26$ million and $\$ 28$ million, respectively.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Subordinated Deferrable Debt

Subordinated deferrable debt outstanding was issued in an underwritten public transaction. There is no active secondary trading for this subordinated deferrable debt; therefore, dealer quotes and recent market prices are both used in estimating fair value based on a discounted cash flow method. Subordinated deferrable debt is classified within Level 2 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, subordinated deferrable debt classified within Level 2 of the fair value hierarchy totaled $\$ 372$ million and $\$ 404$ million, respectively.

## Members' Subordinated Certificates

Members' subordinated certificates include (i) membership subordinated certificates issued to our members, (ii) loan and guarantee subordinated certificates issued as a condition of obtaining loan funds or guarantees and (iii) member capital securities issued as voluntary investments by our members. All members' subordinated certificates are non-transferable other than among members with CFC's consent and there is no ready market from which to obtain fair value quotes. These certificates are valued at par. Members' subordinated certificates are classified within Level 3 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, members' subordinated certificates classified within Level 3 of the fair value hierarchy totaled $\$ 1,487$ million and $\$ 1,881$ million, respectively.

## Derivative Instruments

We record derivative instruments in the condensed consolidated balance sheets as either an asset or liability measured at fair value. Because there is not an active secondary market for the types of interest rate swaps we use, we obtain indicative quotes from the interest rate swap counterparties to estimate fair value on a quarterly basis. The indicative quotes are based on the expected future cash flow and estimated yield curves. We adjust the market values received from the counterparties using credit default swap levels for us and the counterparties. The credit default swap levels represent the credit risk premium required by a market participant based on the available information related to us and the counterparty. Derivative instruments

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

are classified within Level 2 of the fair value hierarchy. At February 28, 2014 and May 31, 2013, derivative asset instruments classified within Level 2 of the fair value hierarchy totaled $\$ 262$ million and $\$ 258$ million, respectively, and derivative liability instruments classified within Level 2 of the fair value hierarchy totaled $\$ 381$ million and $\$ 475$ million, respectively.

## Commitments

The fair value of our commitments is estimated as the carrying value, or zero. Extensions of credit under these commitments, if exercised, would result in loans priced at market rates.

## (13) Segment Information

The following tables contain the segment presentation for the condensed consolidated statements of operations for the three and nine months ended February 28, 2014 and 2013 and condensed consolidated balance sheets at February 28, 2014 and 2013.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

## Forward-Looking Statements

This Form 10-Q contains forward-looking statements defined by the Securities Act of 1933, as amended, and the Exchange Act of 1934, as amended. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, are generally identified by our use of words such as "intend," "plan," "may," "should," "will," "project," "estimate," "anticipate," "believe," "expect," "continue," "potential," "opportunity" and sin expressions, whether in the negative or affirmative. All statements about future expectations or projections, including statements about loan volume, the adequacy of the loan loss allowance, operating income and expenses, leverage and debt-to-equity ratios, borrower financial performance, impaired loans, and sources and uses of liquidity, are forward-looking statements. Although we believe that the expectations reflected in our forward-looking statements are based on reasonable assumptions, actual results and performance could materially differ. Factors that could cause future results to vary from current expectations include, but are not limited to, general economic conditions, legislative changes including those that could affect our tax status, governmental monetary and fiscal policies, demand for our loan products, lending competition, changes in the quality or composition of our loan portfolio, changes in our ability to access external financing, changes in the credit ratings on our debt, valuation of collateral supporting impaired loans, charges associated with our operation or disposition of foreclosed assets, regulatory and economic conditions in the rural electric industry, nonperformance of counterparties to our derivative agreements and the costs and effects of legal or governmental proceedings involving CFC or its members. Some of these and other factors are discussed in our annual and quarterly reports previously filed with the U.S. Securities and Exchange Commission ("SEC"). Except as required by law, we undertake no obligation to update or publicly release any revisions to forward-looking statements to reflect events, circumstances or changes in expectations after the date on which the statement is made.

## Introduction

The following discussion and analysis is designed to provide a better understanding of our consolidated financial condition and results of operations and as such should be read in conjunction with the condensed consolidated financial statements, including the notes thereto and the information contained elsewhere in this Form 10-Q, and Part I, Item 1A. Risk Factors in our Form 10-K for the year ended May 31, 2013.

Unless stated otherwise, references to "we," "our" or "us" relate to the consolidation of National Rural Utilities Cooperative Finance Corporation ("CFC"), Rural Telephone Finance Cooperative ("RTFC"), National Cooperative Services Corporation ("NCSC") and certain entities created and controlled by CFC to hold foreclosed assets and to accommodate loan securitization transactions.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Throughout this management discussion and analysis, we refer to certain of our financial measures that are not in accordance with generally accepted accounting principles in the United States ("GAAP") as "adjusted." In our Executive Summary, our discussion focuses on the key metrics that we use to evaluate our business, which are adjusted times interest earned ratio ("TIER") and adjusted debt-to-equity ratio. The most closely related GAAP measures are TIER and debt-to-equity ratio. The financial covenants in our revolving credit agreements and debt indentures are based on our adjusted measures rather than the related GAAP measures. In addition to the adjusted measures mentioned above, we also use GAAP measures such as loans outstanding in our evaluation of our business performance. The main adjustments we make to calculate the non-GAAP measures compared with the related GAAP measures are to adjust interest expense to include derivative cash settlements; to adjust net income, senior debt and total equity to exclude the non-cash adjustments from the accounting for derivative financial instruments; to exclude from senior debt the amount that funds CFC member loans guaranteed by the Rural Utilities Service ("RUS"), subordinated deferrable debt and members' subordinated certificates; and to adjust total equity to include subordinated deferrable debt and members' subordinated certificates. See Non-GAAP Financial Measures for further explanation of the adjustments we make to our financial results for our own analysis and covenant compliance and for a reconciliation to the related GAAP measures.

Our primary objective as a member-owned cooperative lender is to provide cost-based financial products to our rural electric and telecommunications members while maintaining sound financial results required for investment-grade credit ratings on our debt instruments. Our objective is not to maximize net income; therefore, the rates we charge our member-borrowers reflect our adjusted interest expense plus a spread to cover our operating expenses, a provision for loan losses and earnings sufficient to achieve interest coverage to meet our financial objectives. Our goal is to earn an annual minimum adjusted TIER of 1.10 and to achieve and maintain an adjusted debt-to-equity ratio below 6.00-to-1.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Executive Summary

## Lending Activity

At February 28, 2014, total loans outstanding were $\$ 20,635$ million, which represented a $\$ 339$ million, or 2 percent, increase during the nine months ended February 28, 2014, primarily due to an increase of $\$ 245$ million in CFC distribution loans and an increase of $\$ 141$ million in CFC power supply loans, partly offset by a decrease of $\$ 48$ million in RTFC loans.

During the nine months ended February 28, 2014, $\$ 973$ million of CFC long-term fixed-rate loans repriced. Of this total, $\$ 816$ million repriced to a new long-term fixed rate; $\$ 67$ million repriced to a long-term variable rate; $\$ 17$ million repriced to a new rate offered as part of our loan sales program and were sold by CFC with CFC continuing to service the loans sold; and $\$ 73$ million were repaid in full.

## Funding Activity

At February 28, 2014, total debt outstanding was $\$ 21,332$ million, an increase of $\$ 787$ million, or 4 percent, during the nine months ended February 28, 2014. The increase was primarily due to funding for the $\$ 339$ million increase in loans outstanding and the $\$ 666$ million increase in cash. The increase in cash at February 28, 2013 was driven primarily by the prefunding of $\$ 450$ million of collateral trust bonds that matured on March 1, 2014.

Since May 31, 2013, long-term debt maturing in the next 12 months decreased by $\$ 1,913$ million, which we refinanced through the issuance of original issue short-term debt and other long-term debt funding. Specifically, original issue short-term debt increased by $\$ 735$ million as we continued to maintain a high utilization of our commercial paper and other original issue short-term funding to take advantage of the low interest rate environment. At February 28, 2014 and May 31, 2013, commercial paper, select notes, daily liquidity fund and bank bid notes outstanding represented 22 percent and 20 percent of total debt outstanding, respectively. Since May 31, 2013, we borrowed $\$ 325$ million as part of the Guaranteed Underwriter Program and issued $\$ 1,400$ million of collateral trust bonds.

During the nine months ended February 28, 2014, we took advantage of availability in the capital markets to extend the maturity and increase the amount of our revolving credit agreements thereby providing us with an additional source of liquidity. Specifically, on October 28, 2013, we amended our $\$ 1,006$ million three-year, $\$ 1,088$ million four-year, and $\$ 1,033$ million five-year revolving credit agreements to extend the maturity dates for the three-year, four-year, and five-year revolving credit agreements by one year each to October 28, 2016, 2017 and 2018, respectively. In addition, on February 7, 2014, we exercised our option to increase the commitment level for the three-year revolving credit agreement maturing on October 28, 2016, four-year revolving credit agreement maturing

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

on October 28, 2017, and five-year revolving credit agreement maturing on October 28, 2018 by a total of $\$ 100$ million to $\$ 1,036$ million, $\$ 1,122$ million, and $\$ 1,068$ million, respectively.

## Financial Results

For the nine months ended February 28, 2014 and 2013, we reported net income of $\$ 212$ million and $\$ 163$ million, respectively, and TIER of 1.43 and 1.31, respectively. As previously mentioned, we use adjusted non-GAAP measures in our analysis to evaluate our performance and for debt covenant compliance. For the nine months ended February 28, 2014 and 2013, our adjusted net income was $\$ 113$ million and $\$ 101$ million, respectively, and adjusted TIER was 1.20 and 1.18 , respectively.

The increase to our adjusted net income for the nine months ended February 28, 2014 as compared with the same prior-year period was driven primarily by a $\$ 19$ million increase in adjusted net interest income and a $\$ 17$ million decrease in salaries and employee benefits, partially offset by a $\$ 14$ million decrease in fee and other income and a $\$ 9$ million decrease in the results of operations of foreclosed assets.

The $\$ 19$ million increase in adjusted net interest income was primarily due to the refinancing of higher cost debt with lower cost debt and the continued higher utilization of our original issue short-term debt. The $\$ 17$ million decrease in salaries and employee benefits was due to the voluntary $\$ 13$ million contribution that CFC made to its National Rural Electric Cooperative Association ("NRECA") sponsored Retirement Security Plan in January 2013. The $\$ 14$ million decrease in fee and other income was due to a $\$ 13$ million prepayment fee received on a capital expenditures loan in September 2012. The $\$ 9$ million decrease in the results of operations of foreclosed assets was due to $\$ 13$ million in positive one-time adjustments recorded in the prior year period.

At February 28, 2014, our debt-to-equity ratio decreased to 22.33 -to-1 compared with 26.21 -to-1 at May 31, 2013. As mentioned previously, we use adjusted non-GAAP measures in our own analysis to evaluate our performance and for covenant compliance. Our adjusted debt-to-equity ratio increased to 6.01 -to- 1 at February 28, 2014 compared with 5.76 -to-1 at May 31, 2013, due to the increase in adjusted liabilities partially offset by the increase in adjusted equity. A portion of the

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

increase in adjusted liabilities was temporary and driven by the prefunding for the $\$ 450$ million of collateral trust bonds that matured on March 1, 2014.

## Outlook for the Next 12 Months

We expect the amount of new long-term loan advances to exceed scheduled long-term loan repayments over the next 12 months partially offset by expected repayments of line of credit bridge loans. We anticipate a slight increase to earnings from core lending operations over the next 12 months due to the increase to long-term loans outstanding.

During the nine months ended February 28, 2014, the CFC Board of Directors authorized management to execute the call of our 7.5 percent member capital securities held by CFC members. As of February 28, 2014, $\$ 86$ million of the 7.5 percent member capital securities were redeemed and we had call notices outstanding for another $\$ 181$ million. The call dates for the $\$ 181$ million will take place through May 2014. Over the next 12 months, we expect to provide notice to members for the early call of an additional $\$ 120$ million of 7.5 percent member capital securities with call dates through January 2015. The Board of Directors also authorized management to offer members the option to invest in a new series of 5 percent member capital securities. As of February 28, 2014, members have invested \$53 million in the new 5 percent member capital securities.

We have $\$ 4,785$ million of short-term debt and $\$ 1,757$ million of long-term debt scheduled to mature over the next 12 months. We believe that we have sufficient liquidity from the combination of member loan repayments and our ability to issue debt in the capital markets, to our members and in private placements, to satisfy member loan advances and meet our need to fund long-term debt maturing over the next 12 months. At February 28, 2014, we had $\$ 1,572$ million in cash, investments and time deposits, up to $\$ 924$ million available under committed term loan facilities from the Federal Financing Bank, $\$ 3,443$ million available under committed revolving lines of credit with a syndicate of banks and, subject to market conditions, up to $\$ 2,377$ million available under a revolving note purchase agreement with the Federal Agriculture Mortgage Corporation. On March 21, 2014, the amount available under committed revolving lines of credit will decrease by $\$ 219$ million to $\$ 3,224$. On November 21, 2013, we closed on a $\$ 500$ million commitment from RUS to guarantee a loan from the Federal Financing Bank as part of the Guaranteed Underwriter Program that is available for advance through October 15, 2016. We also have the ability to issue collateral trust bonds and medium-term notes in the capital markets and medium-term notes to members. We believe we can continue to roll over the $\$ 4,785$ million of commercial paper, select notes, daily liquidity fund and bank bid notes scheduled to mature over the next 12 months, as we expect to continue to maximize the utilization of these short-term funding options. We expect to be in compliance with the covenants under our revolving credit agreements; therefore, we could draw on these facilities to repay dealer or member commercial paper that cannot be rolled over in the event of market disruptions.

As indicated above, our adjusted debt-to-equity ratio was 6.01-to-1 at February 28, 2014 compared with 5.76-to-1 at May 31, 2013. This temporary increase is driven primarily by the prefunding for the $\$ 450$ million of collateral trust bonds that matured on March 1, 2014. Accordingly, we expect to be able to maintain the adjusted debt-to-equity ratio below 6.00 -to- 1 over the next 12 months.

## Results of Operations

(1) Adjusted to exclude the effect of the derivative forward value from net income and to include all derivative cash settlements in the interest expense. The derivative forward value and derivative cash settlements are combined in the derivative (losses) gains line item in the chart above. See Non-GAAP Financial Measures for further explanation and a reconciliation of these adjustments.

## Interest Income

The following tables break out the average rate on loans and the change to interest income due to changes in average loan volume versus changes to interest rates summarized by loan type.

(1) Calculated using the following formula: (current period average balance - prior-year average balance) x prior-year average rate.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(2) Calculated using the following formula: (current period average rate - prior-year average rate) x current period average balance.
(3) The net change attributable to the combined impact of volume and rate has been allocated to each in proportion to the absolute dollar amounts of change.

During the three months ended February 28, 2014, interest income increased by 2 percent compared with the prior-year period, primarily due to the 6 percent increase in average loan balances partly offset by the 21 basis-point decrease in the average rate on loans. During the nine months ended February 28, 2014, interest income increased by 1 percent compared with the prior-year period, primary due to the 6 percent increase in average loan balances partly offset by the 28 basis-point decrease in the average rate on loans. The increase in the total interest income earned for the three and nine months ended February 28, 2014 compared with the prior-year periods was driven primarily by the increase in interest income earned on our long-term fixed rate loans, time deposits and fee income. For the nine months ended February 28, 2014, this increase in interest income is partly offset by the $\$ 13$ million decrease in interest income earned on restructured loans due to the pay-off of a $\$ 414$ million restructured loan in September 2012.

The increase in interest income earned on long-term fixed-rate loans during the three and nine months ended February 28,2014 compared with the prior-year periods was primarily due to the $\$ 1,194$ million and $\$ 1,331$ million increase in average fixed-rate loan balances, respectively, partly offset by a 26 basis-point and 27 basis-point decrease in the weighted average rate earned on our long-term fixed-rate loans, respectively. The increase in average fixed-rate loan balances was primarily due to a large amount of advances to CFC and NCSC borrowers during the fourth quarter of fiscal 2013 to refinance debt from other lenders, to fund capital improvements and for new loan advances. The decrease in average yield on fixed-rate loans was due to activity in the capital markets and the repricing of loans. As a cost-based lender, our fixed interest rates reflect our cost of borrowing in the capital markets marked up to cover our cost of operations. As benchmark treasury rates and spreads tightened over the past few years, there was a continued reduction in the rates we had to pay for funding in the capital markets and we lowered the long-term fixed rates we offered on our new loans. Although the average long-term fixed interest rates we offered on electric loans started to increase during the three and nine months ended February 28, 2014, the residual impact of lower rates offered over the past few years continued to result in a decrease in the average yield earned when comparing the three and nine months ended February 28, 2014 to the prior-year periods.

Our nonperforming and restructured loans on non-accrual status affect interest income for both the current and prior-year period. The effect of non-accrual loans on interest income is included in the rate variance in Table 3. Table 4 summarizes foregone interest income as a result of holding loans on non-accrual status.

## Table 4: Foregone Interest Income

| Telecommunications | 79 | 102 | 327 | 317 |
| Total | $\$ 242$ | $\$ 355$ | $\$ 807$ | $\$ 1,135$ |

## Interest Expense

The following tables break out the average cost of debt and the change to interest expense due to changes in average debt volume versus changes to interest rates summarized by debt type. We do not fund each individual loan with specific debt. Rather, we attempt to minimize costs and maximize efficiency by funding large aggregated amounts of loans. The following tables also break out the change to derivative cash settlements due to changes in the average notional amount of our derivative portfolio versus changes to the net difference between the average rate paid and the average rate received. Additionally, the tables present adjusted interest expense, which includes all derivative cash settlements in interest expense. See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include all derivative cash settlements in interest expense.

(1) Interest expense includes the amortization of discounts on debt.
(2) Average volume and interest expense includes commercial paper, daily liquidity fund, bank bid notes and select notes.
(3) Interest expense includes amortization of all deferred charges related to debt issuances, principally underwriter's fees, legal fees, printing costs and comfort letter fees. Amortization is calculated on the effective interest method. Also includes issuance costs related to dealer commercial paper, which are recognized as incurred.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(4) Interest expense includes various fees related to funding activities, including fees paid to banks participating in our revolving credit agreements. Fees are recognized as incurred or amortized on a straight-line basis over the life of the respective agreement.
(5) For derivative cash settlements, average volume represents the average notional amount of derivative contracts outstanding, and the average cost represents the net difference between the average rate paid and the average rate received for cash settlements during the period.
(6) See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include the derivative cash settlements in interest expense.

(1) Calculated using the following formula: (current period average balance - prior-year average balance) x prior-year average rate.
(2) Calculated using the following formula: (current period average rate - prior-year average rate) x current period average balance.
(3) The net change attributable to the combined impact of volume and rate has been allocated to each in proportion to the absolute dollar amounts of change.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(4) For derivative cash settlements, variance due to average volume represents the change in derivative cash settlements that resulted from the change in the average notional amount of derivative contracts outstanding. Variance due to average rate represents the change in derivative cash settlements that resulted from the net difference between the average rate paid and the average rate received for interest rate swaps during the period.
(5) See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include the derivative cash settlements in interest expense.

During the three and nine months ended February 28, 2014, the average balance of debt outstanding increased by 5 percent and 7 percent, respectively, compared to the prior-year periods in order to fund the overall growth in our balance sheet. Despite the increase in average debt outstanding, total interest expense decreased by 5 percent compared with the prior-year periods. The lower interest rates and tighter credit spreads available in the capital markets allowed us to refinance maturing debt at a lower cost. Specifically, the decrease in interest expense for the three and nine months ended February 28, 2014 is due to the 32 basis-point and 42 basis-point reduction in the total weighted average cost of debt, respectively. The lower average interest rate on debt is primarily due to the refinancing of $\$ 340$ million of 8 percent medium-term notes in the second quarter of fiscal year 2013 and an overall decrease in the average volume of collateral trust bonds outstanding partially offset by an increase in the average volume of subordinated deferrable debt. We funded the refinancing of higher cost medium-term notes as well as the overall growth in our balance sheet with a mix of lower-cost short-term debt, medium-term notes, collateral trust bonds and notes payable issued under the Guaranteed Underwriter Program and our agreement with the Federal Agricultural Mortgage Corporation. Short-term debt is our lowest cost of funding, with an average cost of 13 basis points and 14 basis points for the three and nine months ended February 28, 2014, respectively. Our utilization of short-term debt increased from 19 percent to 21 percent of average total debt during the nine months ended February 28, 2014, compared with the prior-year period, while the weighted average rate paid for these instruments during the same period decreased slightly.

Adjusted interest expense, which includes all derivative cash settlements, was $\$ 182$ million and $\$ 551$ million for the three and nine months ended February 28, 2014, respectively, compared with $\$ 187$ million and $\$ 567$ million for the three and nine months ended February 28, 2013, respectively. The decrease in adjusted interest expense during the three and nine months ended February 28, 2014 was due to the lower interest expense noted above, partially offset by an increase in derivative cash settlements expense during the three and nine months ended February 28, 2014. See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include all derivative cash settlements in interest expense.

## Net Interest Income

The following tables represent a summary of the effect on net interest income and adjusted net interest income from changes in the components of total interest income and total interest expense described above. The following tables also summarize the net yield and adjusted net yield and the changes to net interest income and adjusted net interest income due to changes in average balances versus changes to average rate/cost.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(1) See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include the derivative cash settlements in interest expense, which affects adjusted net interest income.

Table 8: Rate/ Volume Analysis of Changes in Net Interest Income

|  | Three Months Ended |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | February | 8, 2014 | s. 2013 | February | 28, 2014 | s. 2013 |
|  | Change Due to (3) |  |  | Change Due to (3) |  |  |
|  | Average |  |  | Average |  | Net |
| (Dollars in thousands) | Volume <br> (1) | Average Rate (2) | Change | Volume <br> (1) | Average Rate (2) | Change |
| Increase in net interest income | \$ 10,103 | \$ 2,973 | \$13,076 | \$23,132 | \$6,521 | \$29,653 |
| Increase in adjusted net interest income | 11,152 | (2,257 ) | 8,895 | 27,075 | (8,440 ) | 18,635 |

(1) Calculated using the following formula: (current period average balance - prior-year average balance) x prior-year average rate.
(2) Calculated using the following formula: (current period average rate - prior-year average rate) $x$ current period average balance.
(3) The net change attributable to the combined impact of volume and rate has been allocated to each in proportion to the absolute dollar amounts of change.

Net interest income for the three and nine months ended February 28, 2014, increased by 21 percent and 15 percent, respectively, compared with the prior-year periods due to the reduction in interest expense. The primary factor driving the reduction in interest expense was our refinancing of maturing term debt with lower cost debt during fiscal year 2013 and 2014. We maintained a higher average balance of commercial paper, medium-term notes and long-term notes payable, which have a lower weighted-average cost, in our overall funding mix.

Adjusted net interest income for the three and nine months ended February 28, 2014, increased by 19 percent and 13 percent, respectively, compared with the prior-year periods primarily due to the reduction in interest expense, partially offset by higher derivative cash settlements expense compared with the prior-year periods. See Non-GAAP Financial Measures for further explanation of the adjustment we make in our financial analysis to include all derivative cash settlements in determining our adjusted interest expense which, in turn, affects adjusted net interest income.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Provision for Loan Losses

The provision for loan losses during the three months ended February 28, 2014 was $\$ 0.8$ million compared to a recovery of $\$ 0.4$ million during the prior-year period. The loan loss provision of $\$ 3$ million during the nine months ended February 28, 2014, was due to an increase to the allowance held for general loans of $\$ 3$ million and an increase in the qualitative component of the general reserve of $\$ 2$ million, partially offset by the $\$ 1.5$ million decrease in the allowance held for impaired loans. The increase in the reserve for the general portfolio for the nine months ended February 28, 2014 was driven primarily by the overall increase in the balance of loans outstanding and a slight deterioration in certain borrowers' internal risk ratings during fiscal 2014. The loan loss provision of $\$ 5$ million for the nine months ended February 28, 2013 was due to the increase in the allowance held for the general loan portfolio of $\$ 6$ million and an increase in the allowance held for large loan exposures of $\$ 6$ million, partially offset by the reduction of $\$ 8$ million to the allowance held for impaired loans.

## Non-interest Income

Non-interest income decreased by $\$ 87$ million for the three months ended February 28, 2014, compared with the prior-year period, primarily due to the increase in derivative losses of $\$ 78$ million and the decrease in the results of operations of foreclosed assets of $\$ 8$ million.

Non-interest income increased by $\$ 2$ million for the nine months ended February 28, 2014, compared with the prior-year period, primarily due to the increase in derivative gains of $\$ 26$ million partly offset by the decrease in fee and other income of $\$ 14$ million and decrease in the results of operations of foreclosed assets of $\$ 9$ million. The reduction in fee income for the nine months ended February 28, 2014 is due to the $\$ 13$ million prepayment fee received on a capital expenditures loan in September 2012. The $\$ 9$ million decrease in the results of operations of foreclosed assets was due to $\$ 13$ million in positive one-time adjustments recorded in the prior year period.

The derivative (losses) gains line item includes income and losses recorded for our interest rate swaps as summarized below in Table 9.

Table 9: Derivative Gains (Losses)

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

We currently use two types of interest rate exchange agreements: (i) we pay a fixed rate and receive a variable rate and (ii) we pay a variable rate and receive a fixed rate.

Table 10 provides a breakout of the average notional amount outstanding by type of interest rate exchange agreement and the weighted average interest rate paid and received for cash settlements.

Table 10: Derivative Average Notional Balances and Average Interest Rates

| (Dollars in thousands) | Nine Months Ended February 28,2014 |  |  |  |  | 2013 |  | Weighted- |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Average | Weighted- |  | Weighted- |  | Average | Weighted- |  |  |
|  | notional | average |  | Average |  | Notional | Average |  | Average |
|  | balance | rate paid |  | Rate Received |  | Balance | Rate Paid |  | Rate Received |
| Pay fixed-receive variable | \$5,332,403 | 3.36 | \% | 0.25 | \% | \$5,607,847 | 3.61 | \% | 0.37 |
| Pay variable-receive fixed | 3,052,709 | 0.97 |  | 4.06 |  | 3,604,103 | 1.20 |  | 4.67 |
| Total | \$8,385,112 | 2.49 |  | 1.64 |  | \$9,211,950 | 2.66 |  | 2.05 |

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

During the three and nine months ended February 28, 2014, the weighted-average rate we paid on our interest rate swap agreements was 83 basis points and 85 basis points, respectively, higher than the weighted-average rate we received, whereas the weighted-average rate we paid on our interest rate swap agreements was 60 basis points and 61 basis points, respectively, higher than the weighted-average rate we received during the prior-year periods. The primary reason for the increase in the weighted-average outflow was the reduction in the average notional amount for our pay variable-receive fixed interest rate swaps, due to a total of $\$ 575$ million of pay variable-receive fixed interest rate swaps that matured since February 28, 2013.

The derivative forward value represents the change in fair value of our interest rate swaps during the reporting period due to changes in the estimate of future interest rates over the remaining life of our derivative contracts. The derivative forward value recorded for the three and nine months ended February 28, 2014 decreased by $\$ 74$ million and increased by $\$ 37$ million, respectively, compared with the prior-year periods. For the three months ended February 28, 2014, the derivative value forward loss of $\$ 13$ million was due to the downward shift and flattening of the estimated yield curve for our swaps of 3 basis points and 16 basis points, respectively. For the nine months ended February 28, 2014, the derivative value forward gain of $\$ 99$ million was due to the upward shift and steepening of the estimated yield curve for our swaps of 32 basis points and 42 basis points, respectively. During the nine months ended February 28,2014 , the increase in fair value for our pay fixed-receive variable interest rate swaps outweighed the decrease in fair value for pay variable-receive fixed swaps as pay fixed-receive variable interest rate swaps represented 64 percent of our derivative contracts and they are more sensitive to changes in the estimated yield curve as they have a higher weighted-average maturity than our pay variable-receive fixed interest rate swaps. For the nine months ended February 28, 2014, the fair value of pay variable-receive fixed swaps declined as a result of swap maturities and changes in the estimated yield curve.

## Non-interest Expense

Non-interest expense decreased by $\$ 12$ million and $\$ 16$ million during the three and nine months ended February 28, 2014, respectively, compared with prior-year periods, primarily driven by the voluntary $\$ 13$ million contribution that CFC made to its NRECA sponsored Retirement Security Plan in January 2013. The decrease in non-interest expense during the nine months ended February 28, 2014 was also driven by a payment of $\$ 4$ million made in the prior-year period related to the Innovative Communication Corporation bankruptcy.

## Net Income

The changes in the items described above resulted in net income of $\$ 29$ million and $\$ 212$ million for the three and nine months ended February 28, 2014, respectively, compared with net income of $\$ 90$ million and $\$ 163$ million for the same prior-year periods. The adjusted net income, which excludes the effect of the derivative forward value, was $\$ 41$ million and $\$ 113$ million for the three and nine months ended February 28, 2014, respectively, compared with the adjusted net income of $\$ 29$ million and $\$ 101$ million, respectively, for the same prior-year periods. Based on the adjusted net income, adjusted TIER was 1.23 and 1.20 , respectively, for the three and nine months ended February 28, 2014 compared with an adjusted TIER of 1.15 and 1.18 for the same prior-year periods, respectively. See Non-GAAP Financial Measures for further explanation of the adjustments we make in our financial analysis to net income.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Net Income Attributable to the Noncontrolling Interest
The net income or loss attributable to the noncontrolling interest represents 100 percent of the results of operations of RTFC and NCSC as the members of RTFC and NCSC own or control 100 percent of the interest in their respective companies. Noncontrolling interest income for the three and nine months ended February 28, 2014 was $\$ 0.2$ million and $\$ 3$ million, respectively, compared with $\$ 2$ million for the prior-year periods. Fluctuations in net income and loss are primarily due to fluctuations in the fair value of NCSC's derivative instruments.

## Financial Condition

## Loan and Guarantee Portfolio Assessment

## Loan Programs

We are a cost-based lender that offers long-term fixed- and variable-rate loans and line of credit variable-rate loans. Borrowers choose between a variable interest rate or a fixed interest rate for periods of one to 35 years. When a selected fixed interest rate term expires, the borrower may select another fixed-rate term or the variable rate.

Table 11 summarizes loans outstanding by type and by member class.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Table 11: Loans Outstanding by Type and Member Class

| (Dollars in thousands) | February 28, 2014 | May 31, 2013 |  | Increase/ |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Loans by type (1): | Amount | $\%$ | Amount | $\%$ | (decrease) |

Loans by member class (1):
CFC:
$\left.\begin{array}{lclllll}\text { Distribution } & \$ 15,186,620 & 74 & \% & \$ 14,941,192 & 74 & \% \\ \$ 245,428 \\ \text { Power supply } & 4,149,104 & 20 & 4,007,669 & 20 & 141,435 \\ \text { Statewide and associate } & 64,822 & - & 70,956 & - & (6,134\end{array}\right)$
(1) Includes loans classified as restructured and nonperforming.

The balance of loans outstanding increased by $\$ 339$ million during the nine months ended February 28, 2014 primarily due to an increase of $\$ 245$ million in CFC distribution loans, an increase of $\$ 141$ million in CFC power supply loans partly offset by a decrease of $\$ 48$ million in RTFC loans.

During the nine months ended February 28, 2014, $\$ 973$ million of CFC long-term fixed-rate loans repriced. Of this total, $\$ 816$ million repriced to a new long-term fixed rate; $\$ 67$ million repriced to the long-term variable rate; $\$ 17$ million repriced to a new rate offered as part of our loan sale program and were sold by CFC with CFC continuing to service the loans sold; and $\$ 73$ million were prepaid in full.

Table 12 summarizes loans and guarantees outstanding by member class.

## Credit Concentration

The service territories of our electric and telecommunications members are located throughout the United States and its territories, including 49 states, the District of Columbia and two U.S. territories. At February 28, 2014 and May 31, 2013, loans outstanding to members in any one state or territory did not exceed 16 percent and 15 percent, respectively, of total loans outstanding.

At February 28, 2014 and May 31, 2013, the total exposure outstanding to any one borrower or controlled group did not exceed 2.1 percent and 2.2 percent, respectively, of total loans and guarantees outstanding. At February 28, 2014 and May 31, 2013, the 10 largest borrowers included four distribution systems and six power supply systems.

Table 13 represents the exposure to the 10 largest borrowers as a percentage of total exposure presented by type of exposure and by company.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

Security Provisions
Except when providing line of credit loans, we typically lend to our members on a senior secured basis. Long-term loans are typically secured on parity with other secured lenders (primarily RUS), if any, by all assets and revenue of the borrower with exceptions typical in utility mortgages. Line of credit loans are generally unsecured. Guarantee reimbursement obligations are typically secured on parity with other secured creditors by substantially all assets and revenue of the borrower or by the underlying financed asset. In addition to the collateral pledged to secure our loans, borrowers are also required to set rates charged to customers to achieve certain financial ratios. At February 28, 2014 and May $31,2013, \$ 2,316$ million and $\$ 2,243$ million out of $\$ 20,635$ million and $\$ 20,296$ million, respectively, of total loans outstanding were unsecured, representing 11 percent of total loans outstanding.

## Pledged Loans and Loans on Deposit

Table 14 summarizes our secured debt or debt requiring collateral on deposit, the excess collateral pledged and our unencumbered loans.

## Table 14: Unencumbered Loans

$\left.\begin{array}{lcc}\text { (Dollars in thousands) } & \text { February 28, } & \text { May 31, } \\ \text { Total loans to members } & 2014 & 2013 \\ \text { Less: Total secured debt or debt requiring collateral on deposit } & \$ 20,635,333 & \$ 20,296,317 \\ \text { Excess collateral pledged or on deposit (1) } & (1,029,634) & (11,380,734) \\ \text { Unencumbered loans } & \$ 7,257,600 & (1,825,020) \\ & & \$ 7,090,563 \\ & 35 & \%\end{array}\right)$

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(1) Excludes cash collateral pledged to secure debt. Unless and until there is an event of default, we can withdraw excess collateral as long as there is 100 percent coverage of the secured debt. If there is an event of default under most of our indentures, we can only withdraw this excess collateral if we substitute cash of equal value.

## Nonperforming and Restructured Loans

Table 15 summarizes nonperforming and restructured loans as a percentage of total loans and total loans and guarantees outstanding.

Table 15: Nonperforming and Restructured Loans

|  | February 28, | May 31, |  |  |
| :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) | 2014 | 2013 |  |  |
| Nonperforming loans (1) | $\$ 10,845$ | $\$ 15,497$ |  |  |
| Percent of loans outstanding | 0.05 | $\%$ | 0.08 | $\%$ |
| Percent of loans and guarantees outstanding | 0.05 |  | 0.07 |  |
|  |  |  |  |  |
| Restructured loans | $\$ 7,584$ | $\$ 46,953$ |  |  |
| Percent of loans outstanding | 0.04 |  | 0.23 | $\%$ |
| Percent of loans and guarantees outstanding | 0.03 |  | 0.22 |  |
|  |  |  |  |  |
| Total nonperforming and restructured loans | $\$ 18,429$ |  | $\$ 62,450$ |  |
| Percent of loans outstanding | 0.09 | $\%$ | 0.31 | $\%$ |
| Percent of loans and guarantees outstanding | 0.08 |  | 0.29 |  |
|  |  |  |  |  |
| Total non-accrual loans | $\$ 18,429$ |  | $\$ 23,081$ |  |
| Percent of loans outstanding | 0.09 | $\%$ | 0.11 | $\%$ |
| Percent of loans and guarantees outstanding | 0.08 |  | 0.11 |  |

(1) All loans classified as nonperforming were on non-accrual status.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

A borrower is classified as nonperforming when any one of the following criteria is met:
principal or interest payments on any loan to the borrower are past due 90 days or more;
as a result of court proceedings, repayment on the original terms is not anticipated; or
for some other reason, management does not expect the timely repayment of principal and interest.

Once a borrower is classified as nonperforming, we typically place the loan on non-accrual status and reverse all accrued and unpaid interest back to the date of the last payment.

At February 28, 2014 and May 31, 2013, nonperforming loans totaled $\$ 11$ million, or 0.05 percent, of loans outstanding and $\$ 15$ million, or 0.08 percent, of loans outstanding, respectively. One borrower in this group is currently in bankruptcy. The debtor and certain secured creditors have negotiated a settlement for an agreed upon plan of reorganization. Another borrower in this group received a reversal of an unfavorable ruling related to state USF payments. In March 2014, this borrower made a payment moving its loans to current payment status. There is one other borrower in this group that is currently seeking a buyer for its system, as it is not anticipated that it will have sufficient cash flow to repay its loans without the proceeds from the sale of the business. It is currently anticipated that even with the sale of the business, there will not be sufficient funds to repay the full amount owed. We have approval rights with respect to the sale of this company.

At February 28, 2014 and May 31, 2013, we had restructured loans totaling $\$ 8$ million, or 0.04 percent, of loans outstanding and $\$ 47$ million, or 0.23 percent, of loans outstanding, respectively, all of which were performing according to their restructured terms. No interest income was accrued on restructured loans during the three months ended February 28, 2014 compared with $\$ 0.4$ million of interest income during the prior-year period. Approximately $\$ 0.1$ million of interest income was accrued on restructured loans during the nine months ended February 28, 2014, compared with $\$ 14$ million of interest income in the prior-year period. One of the restructured loans totaling $\$ 39$ million at May 31, 2013, was refinanced during the first quarter of fiscal year 2014 with the new loan classified as performing at February 28, 2014. This loan was on accrual status since the time of restructuring. At February 28, 2014, all restructured loans were on non-accrual status.

## Allowance for Loan Losses

We maintain an allowance for loan losses at a level estimated by management to provide appropriately for probable losses inherent in the loan portfolio. Table 16 summarizes activity in the allowance for loan losses including a disaggregation by company of the allowance for loan losses held at CFC.

Table 16: Allowance for Loan Losses
(Dollars in thousands)

304.09

Our loan loss allowance increased by $\$ 2$ million from May 31, 2013 to February 28, 2014, primarily due to an increase in the allowance held for general loans of $\$ 3$ million and an increase in the qualitative component of the general reserve by $\$ 2$ million offset by a decrease in the allowance held for impaired loans of $\$ 1.5$ million and net charge-offs of $\$ 1.4$ million, due primarily to the sale of one of our impaired loans during the nine months ended February 28, 2014. See Provision for Loan Losses in the Results of Operations section for further discussion. On a quarterly basis, we review all nonperforming and restructured borrowers, as well as certain additional borrowers selected based on known facts and circumstances, to determine if the loans to the borrowers are impaired and/or to determine if there are changes to a previously impaired loan. We calculate a borrower's impairment based on the expected future cash flows or the fair value of the collateral securing our loans to the borrower if cash flow cannot be estimated. As events related to the borrower take place and economic conditions and our assumptions change, the impairment calculations will change.

At February 28, 2014 and May 31, 2013, there was a total specific loan loss allowance balance of $\$ 0.5$ million and $\$ 3$ million, respectively, related to impaired loans totaling $\$ 18$ million and $\$ 62$ million, respectively.

Based on our analysis, we believe we have an appropriate loan loss allowance for our exposure related to nonperforming and restructured loans at February 28, 2014.

## Liabilities and Equity

Outstanding Debt
Table 17 breaks out our debt outstanding by type of debt.

| Percentage of short-term debt | 22 | 20 |  |

[^0]
## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(2) The rate on commercial paper notes does not change once the note has been issued. However, the rates on new commercial paper notes change daily, and commercial paper notes generally have maturities of less than 90 days. Therefore, commercial paper notes are classified as variable-rate debt. Also includes fixed-rate debt that has been swapped to a variable rate net of any variable-rate debt that has been swapped to a fixed rate.

During the nine months ended February 28, 2014, total debt outstanding increased by $\$ 787$ million primarily due to funding of the $\$ 339$ million increase in loans outstanding and $\$ 666$ million increase in cash. The increase in cash at February 28, 2013 was driven primarily by the prefunding of $\$ 450$ million of collateral trust bonds that matured on March 1, 2014. Total commercial paper, select notes, daily liquidity fund and bank bid notes outstanding represented 22 percent of total debt at February 28, 2014 and May 31, 2013. To take advantage of the current low interest rates on short-term debt, we intend to continue to maximize the use of commercial paper in our funding portfolio mix.

During the nine months ended February 28, 2014, the CFC Board of Directors authorized management to execute the call of our 7.5 percent member capital securities held by CFC members. As of February 28, 2014, $\$ 86$ million of the 7.5 percent member capital securities were redeemed and we had call notices outstanding for another $\$ 181$ million. The Board of Directors also authorized management to offer members the option to invest in a new series of 5 percent member capital securities. As of February 28, 2014, members have invested $\$ 53$ million in the new 5 percent member capital securities.

## Equity

At February 28, 2014, total equity increased by $\$ 179$ million from May 31, 2013, primarily due to net income of $\$ 212$ million for the nine months ended February 28, 2014, and the correction of a misclassified intercompany elimination entry of $\$ 11.5$ million, which was partially offset by the board authorized patronage capital retirement of $\$ 41$ million.

During the preparation of our consolidated balance sheets for the quarter ended February 28, 2014, we determined that an intercompany elimination entry related to the consolidation of RTFC had been misclassified in each period since May 31, 2009, resulting in an overstatement of other liabilities and an understatement of noncontrolling interest at the end of each reported period. We corrected the misclassification in the quarter ended February 28, 2014, which resulted in a decrease of

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

$\$ 11.5$ million in other liabilities and a corresponding increase in noncontrolling interest and total equity. We concluded that the correction of the misclassification was not material to our financial position in the current period, and the misclassification was not material to our financial position in the previously reported periods. Accordingly, we did not revise prior period balance sheet amounts. The misclassification had no impact on our consolidated statements of operations and comprehensive income, total assets, total liabilities and equity, or cash flows for any of our previously filed annual or quarterly financial statements, and did not impact the compliance with any of our financial debt covenants for any period.

In May 2013, the CFC Board of Directors authorized the allocation of $\$ 1$ million of fiscal year 2013 net earnings to the Cooperative Educational Fund. In July 2013, the CFC Board of Directors authorized the allocation of the fiscal year 2013 net earnings as follows: $\$ 138$ million to the members' capital reserve and $\$ 81$ million to members in the form of patronage capital. In July 2013, the CFC Board of Directors authorized the retirement of allocated net earnings totaling $\$ 41$ million, representing 50 percent of the fiscal year 2013 allocation. This amount was returned to members in cash in October 2013. Future allocations and retirements of net earnings may be made annually as determined by the CFC Board of Directors with due regard for CFC's financial condition. The CFC Board of Directors has the authority to change the current practice for allocating and retiring net earnings at any time, subject to applicable cooperative law.

## Off-Balance Sheet Obligations

## Guarantees

Table 18 breaks out our guarantees outstanding by type of guarantee and by company.

Table 18: Guarantees Outstanding
$\left.\begin{array}{lclc}\text { (Dollars in thousands) } & \begin{array}{l}\text { February 28, } \\ \text { May 31, }\end{array} & \begin{array}{l}\text { Increase/ } \\ \text { (decrease) }\end{array} \\ \text { Total by guarantee type: } & & 2013 & \\ \text { Long-term tax-exempt bonds } & \$ 519,185 & \$ 547,970 & \$(28,785\end{array}\right)$

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

In addition to the letters of credit listed in the table, under master letter of credit facilities in place at February 28, 2014, we may be required to issue up to an additional $\$ 168$ million in letters of credit to third parties for the benefit of our members. As of February 28, 2014, all of our master letter of credit facilities were subject to material adverse change clauses at the time of issuance. Also, at February 28, 2014 we had hybrid letter of credit facilities totaling $\$ 1,615$ million that represent commitments that may be used for the issuance of letters of credit or line of credit loan advances, at the option of a borrower, and are included in unadvanced loan commitments for line of credit loans reported in Note 3, Loans and Commitments. Hybrid letter of credit facilities subject to material adverse change clauses at the time of issuance totaled $\$ 353$ million at February 28, 2014. Prior to issuing a letter of credit, we would confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with the letter of credit terms and conditions. The remaining commitment under hybrid letter of credit facilities of $\$ 1,262$ million may be used for the issuance of letters of credit as long as the borrower is in compliance with the terms and conditions of the facility.

At February 28, 2014, we were the liquidity provider for a total of $\$ 571$ million of variable-rate tax-exempt bonds issued for our member cooperatives. As liquidity provider on these $\$ 571$ million of tax-exempt bonds, we are required to purchase bonds that are tendered or put by investors. Investors provide notice to the remarketing agent that they will tender or put a certain amount of bonds at the next interest rate reset date. If the remarketing agent is unable to sell such bonds to other investors by the next interest rate reset date, we have unconditionally agreed to purchase such bonds. On a total of $\$ 446$ million of the bonds for which we are liquidity provider, we also provide a guarantee of all principal and interest, which is shown in the chart on page 25 as a tax-exempt bond guarantee. On a total of $\$ 125$ million of tax-exempt bonds, our obligation as liquidity provider is in the form of a letter of credit which is reflected in our letters of credit. During the nine months ended February 28, 2014, we were not required to perform as liquidity provider pursuant to these obligations.

At February 28, 2014 and May 31, 2013, 59 percent and 63 percent, respectively, of total guarantees were secured by a mortgage lien on substantially all of the system's assets and future revenue.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

The decrease in total guarantees during the nine months ended February 28, 2014 is primarily due to a decrease in long-term tax exempt bonds partly offset by an increase in letters of credit outstanding. At February 28, 2014 and May 31,2013 , we recorded a guarantee liability totaling $\$ 23$ million and $\$ 25$ million, respectively, which represents the contingent and non-contingent exposure related to guarantees and liquidity obligations associated with members' debt.

Table 19 summarizes the off-balance sheet obligations at February 28, 2014, and the related maturities by fiscal year and thereafter.

Table 19: Maturities of Guaranteed Obligations

|  | Outstanding |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) | Balance | 2014 | 2015 | 2016 | 2017 | 2018 | Thereafter |
| Guarantees (1) | $\$ 1,106,211$ | $\$ 28,396$ | $\$ 352,934$ | $\$ 32,579$ | $\$ 20,007$ | $\$ 150,172$ | $\$ 522,123$ |

(1) At February 28, 2014, we are the guarantor and liquidity provider for $\$ 446$ million of tax-exempt bonds issued for our member cooperatives. We have also issued letters of credit to provide standby liquidity for an additional $\$ 125$ million of tax-exempt bonds.

## Contingent Off-Balance Sheet Obligations

## Unadvanced Loan Commitments

Unadvanced commitments represent approved and executed loan contracts for which the funds have not been advanced. At February 28, 2014 and May 31, 2013, we had the following amount of unadvanced commitments on loans to our borrowers.

Table 20: Unadvanced Loan Commitments

| (Dollars in thousands) | February 28, | \% of Total | May 31, <br> 2013 | $\%$ of <br> Total |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 2014 |  |  | $\%$ | $\$ 4,718,162$ | 35 |
| Long-term | $\$ 4,547,813$ | 34 |  | $\%$ |  |  |
| Line of credit | $8,996,845$ | 66 | $8,704,586$ | 65 |  |  |
| Total | $\$ 13,544,658$ | 100 | $\%$ | $\$ 13,422,748$ | 100 | $\%$ |

A total of $\$ 2,249$ million and $\$ 1,703$ million of unadvanced commitments at February 28, 2014 and May 31, 2013, respectively, represented unadvanced commitments related to committed lines of credit that are not subject to a material adverse change clause at the time of each advance. As such, we would be required to advance amounts on these committed facilities as long as the borrower is in compliance with the terms and conditions of the facility. The

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

remaining available amounts at February 28, 2014 and May 31, 2013 are conditional obligations because they are generally subject to material adverse change clauses. Prior to making an advance on these facilities, we confirm that there has been no material adverse change in the business or condition, financial or otherwise, of the borrower since the time the loan was approved and confirm that the borrower is currently in compliance with loan terms and conditions.

Unadvanced commitments related to line of credit loans are typically revolving facilities for periods not to exceed five years. It is our experience that unadvanced commitments related to line of credit loans are usually not fully drawn. We believe these conditions will continue for the following reasons:
electric cooperatives generate a significant amount of cash from the collection of revenue from their customers, so they usually do not need to draw down on loan commitments to supplement operating cash flow;

- the majority of the line of credit unadvanced commitments provide backup liquidity to our borrowers; and historically, we have experienced a very low utilization rate on line of credit loan facilities, whether or not there is a material adverse change clause at the time of advance.

In our experience, unadvanced commitments related to term loans may not be fully drawn and borrowings occur in multiple transactions over an extended period of time. We believe these conditions will continue for the following reasons:
electric cooperatives typically execute loan contracts to cover multi-year work plans and, as such, it is expected that advances on such loans will occur over a multi-year period;
electric cooperatives generate a significant amount of cash from the collection of revenue from their customers, thus - operating cash flow is available to reduce the amount of additional funding needed for capital expenditures and maintenance;
we generally do not charge our borrowers a fee on long-term unadvanced commitments; and long-term unadvanced commitments generally expire five years from the date of the loan agreement.

Unadvanced commitments that are subject to a material adverse change clause are classified as contingent liabilities. Based on the conditions to advance funds described above, the majority of our unadvanced loan commitments do not represent off-balance sheet liabilities and have not been included with guarantees in our off-balance sheet disclosures above. We do, however, record a reserve for credit losses associated with our unadvanced commitments for committed facilities that are not subject to a material adverse change clause.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

The table below summarizes the available balance under committed lines of credit at February 28, 2014, and the related maturities by fiscal year and thereafter.

## Table 21: Notional Maturities of Committed Lines of Credit

| Available |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| (Dollars in thousands) | balance | 2014 | 2015 | 2016 | 2017 | 2018 | Thereafter |
| Committed lines of credit | $\$ 2,248,762$ | $\$ 19,048$ | $\$ 55,026$ | $\$ 61,000$ | $\$ 466,061$ | $\$ 861,098$ | $\$ 786,529$ |

## Ratio Analysis

Leverage Ratio

The leverage ratio is calculated by dividing the sum of total liabilities and guarantees outstanding by total equity. Based on this formula, the leverage ratio at February 28, 2014 was 23.45 -to-1, a decrease from 27.58-to-1 at May 31, 2013. The decrease in the leverage ratio is due to the increase of $\$ 179$ million in total equity and the decrease of $\$ 7$ million in total guarantees, partially offset by the increase of $\$ 857$ million in total liabilities as discussed under the Liabilities and Equity section of Financial Condition and under Off-Balance Sheet Obligations.

For covenant compliance on our revolving credit agreements and for internal management purposes, the leverage ratio calculation is adjusted to exclude derivative liabilities, debt used to fund loans guaranteed by RUS, subordinated deferrable debt and subordinated certificates from liabilities; uses members' equity rather than total equity; and adds subordinated deferrable debt and subordinated certificates to calculate adjusted equity.

At February 28, 2014 and May 31, 2013, the adjusted leverage ratio was 6.35 -to-1 and 6.11-to-1, respectively. See Non-GAAP Financial Measures for further explanation and a reconciliation of the adjustments we make to our leverage ratio calculation. The increase to the adjusted leverage ratio was due to the increase of $\$ 1,004$ million in adjusted liabilities, partially offset by the increase of $\$ 36$ million in adjusted equity and the decrease of $\$ 7$ million in guarantees as discussed under the Liabilities and Equity section of Financial Condition and under Off-Balance Sheet Obligations.

## Debt-to-Equity Ratio

The debt-to-equity ratio is calculated by dividing the sum of total liabilities outstanding by total equity. The debt-to-equity ratio based on this formula at February 28, 2014 was 22.33 -to-1, a decrease from 26.21-to-1 at May 31, 2013. The decrease in the debt-to-equity ratio is due to the increase of $\$ 179$ million in total equity, partially offset by the increase of $\$ 857$ million in total liabilities as discussed under the Liabilities and Equity section of Financial

## Condition.

For internal management purposes, the debt-to-equity ratio calculation is adjusted to exclude derivative liabilities, debt used to fund loans guaranteed by RUS, subordinated deferrable debt and subordinated certificates from liabilities; uses members' equity rather than total equity; and adds subordinated deferrable debt and subordinated certificates to determine adjusted equity. At February 28, 2014 and May 31, 2013, the adjusted debt-to-equity ratio was 6.01 -to-1 and 5.76-to-1, respectively. See Non-GAAP Financial Measures for further explanation and a reconciliation of the adjustments made to the debt-to-equity ratio calculation. The increase in the adjusted debt-to-equity ratio is due to the increase of $\$ 1,004$ million in adjusted liabilities, partially offset by the increase of $\$ 36$ million in adjusted equity. A portion of the increase in adjusted liabilities was temporary and driven by the prefunding for the $\$ 450$ million of collateral trust bonds that matured on March 1, 2014. Accordingly, we expect to be able to maintain the adjusted debt-to-equity ratio below 6.00 -to- 1 over the next 12 months.

## Liquidity and Capital Resources

The following section discusses our expected sources and uses of liquidity. At February 28, 2014, we expect that our current sources of liquidity will allow us to issue the debt required to fund our operations over the next 12 to 18 months.

The table below shows the projected sources and uses of cash by quarter through August 31, 2015. In analyzing our projected liquidity position, we track key items identified in the chart below. The long-term debt maturities represent the scheduled maturities of our outstanding term debt for the period presented. The long-term loan advances represent our current best estimate of the member demand for our loans, the amount and the timing of which are subject to change. The long-term loan amortization and repayments represent the scheduled long-term loan amortization for the outstanding loans at February 28, 2014, as well as our current estimate for the repayment of long-term loans. The estimate of the amount and timing of long-term loan repayments is subject to change. We assumed the issuance of commercial paper, medium-term notes and other long-term debt, including collateral trust bonds and private placement of term debt, to maintain matched funding within our loan portfolio and to allow our revolving lines of credit to provide backup liquidity for our outstanding commercial paper. Commercial paper repayments in the table below do not represent scheduled maturities but rather the assumed use of excess cash to pay down the commercial paper balance.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Table 22: Projected Sources and Uses of Liquidity

(1) Cumulative excess sources over uses of liquidity includes cash, investments and time deposits.

The chart above represents our best estimate of the funding requirements and how we expect to manage such funding requirements through August 31, 2015. Our estimates assume that the balance of our time deposit investments will remain consistent with current levels over the next six quarters. These estimates will change on a quarterly basis based on the factors described above.

## Sources of Liquidity

## Capital Market Debt Issuance

As a well-known seasoned issuer, we have the following effective shelf registration statements on file with the U.S. Securities and Exchange Commission for the issuance of debt:
unlimited amount of collateral trust bonds until September 2016;
unlimited amount of medium-term notes, member capital securities and subordinated deferrable debt until November 2014; and daily liquidity fund for a total of $\$ 20,000$ million with a $\$ 3,000$ million limitation on the aggregate principal amount outstanding at any time until April 2016.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

While we register member capital securities and the daily liquidity fund with the Securities and Exchange Commission, these securities are not available for sale to the general public. Medium-term notes are available for sale to both the general public and members. In November 2013, we issued $\$ 250$ million of 3 -year floating-rate medium-term notes in a registered offering.

Commercial paper issued through dealers and bank bid notes totaled $\$ 2,762$ million and represented 13 percent of total debt outstanding at February 28, 2014. We intend to maintain the balance of dealer commercial paper and bank bid notes at 15 percent or less of total debt outstanding during fiscal year 2014. Our bank lines of credit may be used for general corporate purposes; however, we use them primarily as backup liquidity for dealer and member commercial paper.

In June 2013, we issued $\$ 400$ million of 2.35 percent collateral trust bonds due 2020. In November 2013, we issued $\$ 400$ million of 3.40 percent collateral trust bonds due 2023. On December 16, 2013, we redeemed $\$ 150$ million of our $\$ 600$ million 4.75 percent collateral trust bonds due March 1, 2014. The principal and accrued distributions at the redemption date were paid with a combination of cash on hand and other sources of liquidity including issuance of commercial paper. The premium and unamortized issuance costs totaling $\$ 1.5$ million were recorded during the third quarter of fiscal 2014. In January 2014, we issued $\$ 300$ million of $1.10 \%$ collateral trust bonds due 2017 and $\$ 300$ million of $2.15 \%$ collateral trust bonds due 2019 .

## Private Debt Issuance

We have access to liquidity from private debt issuances through a note purchase agreement with the Federal Agricultural Mortgage Corporation. At February 28, 2014 and May 31, 2013, we had secured notes payable of $\$ 1,523$ million and $\$ 1,542$ million, respectively, outstanding to the Federal Agricultural Mortgage Corporation under a note purchase agreement totaling $\$ 3,900$ million. Under the terms of our March 2011 note purchase agreement, we can borrow up to $\$ 3,900$ million at any time from the date of the agreement through January 11, 2016 and thereafter automatically extend the agreement on each anniversary date of the closing for an additional year, unless prior to any such anniversary date, the Federal Agricultural Mortgage Corporation provides CFC with a notice that the draw period will not be extended beyond the remaining term. The agreement with the Federal Agricultural Mortgage Corporation is a revolving credit facility that allows us to borrow, repay and re-borrow funds at any time through maturity or from time to time as market conditions permit, provided that the principal amount at any time outstanding under the note purchase agreement is not more than the total available under the

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

agreement. Each borrowing under a note purchase agreement is evidenced by a secured note setting forth the interest rate, maturity date and other related terms as we may negotiate with the Federal Agricultural Mortgage Corporation at the time of each such borrowing. We may select a fixed rate or variable rate at the time of each advance with a maturity as determined in the applicable pricing agreement. At February 28, 2014, we had up to $\$ 2,377$ million available under this agreement, subject to market conditions for debt issued by the Federal Agricultural Mortgage Corporation.

At February 28, 2014 and May 31, 2013, we had $\$ 3,999$ million and $\$ 3,674$ million, respectively, of unsecured notes payable outstanding under bond purchase agreements with the Federal Financing Bank and a bond guarantee agreement with RUS issued under the Guaranteed Underwriter Program, which supports the Rural Economic Development Loan and Grant program and provides guarantees to the Federal Financing Bank. On July 18, 2013, we borrowed $\$ 325$ million under our committed loan facilities from the Federal Financing Bank as part of this program at a weighted average interest rate of 2.49 percent with a repricing period ranging from 10 to 15 years and a final maturity of 20 years. On November 21, 2013, we closed on a $\$ 500$ million commitment from RUS to guarantee a loan from the Federal Financing Bank as part of the Guaranteed Underwriter Program that is available for advance through October 15, 2016. Advances under this facility have a 20 year maturity repayment period. At February 28, 2014, we had up to $\$ 924$ million available under committed term loan facilities from the Federal Financing Bank as part of this program.

## Member Loan Repayments

We expect long-term loan repayments from scheduled loan amortization and prepayments to be $\$ 1,109$ million over the next 12 months.

## Member Loan Interest Payments

During the nine months ended February 28, 2014, interest income on the loan portfolio was $\$ 705$ million, representing an average rate of 4.63 percent compared with 4.91 percent for the nine months ended February 28, 2013. For the past three fiscal years, interest income on the loan portfolio has averaged $\$ 963$ million. At February 28, 2014, 89 percent of the total loans outstanding had a fixed rate of interest, and 11 percent of loans outstanding had a variable rate of interest.

## Bank Revolving Credit Agreements

At February 28, 2014 and May 31, 2013, we had $\$ 3,445$ million and $\$ 3,100$ million, respectively, of commitments under revolving credit agreements. We may request letters of credit for up to $\$ 100$ million under each agreement in place at February 28, 2014, which then reduces the amount available under the facility. Our bank lines of credit may be used for general corporate purposes; however, we use them primarily as backup liquidity for dealer and member

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

commercial paper.

Table 23 presents the total available and the outstanding letters of credit under our revolving credit agreements.

## Table 23: Revolving Credit Agreements

| (Dollars in thousands) | Total Available |  | Letters of Credit Outstanding |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | February 28, 2014 | $\begin{aligned} & \text { May 31, } \\ & 2013 \end{aligned}$ | February 28, 2014 | $\begin{aligned} & \text { May 31, } \\ & 2013 \end{aligned}$ | Maturity | Facility Fee <br> Per Year (1) |
| Three-year agreement | \$219,000 | \$219,000 | \$ - | \$ - | March 21, 2014 | 15 basis points |
| Three-year agreement | 1,036,000 | 916,000 | - | - | October 28, 2016 | 10 basis points |
| Four-year agreement | 1,122,500 | 1,007,500 | - | - | October 28, 2017 | 10 basis points |
| Five-year agreement | 1,065,609 | 954,012 | 1,891 | 3,488 | October 28, 2018 | 10 basis points |
| Total | \$3,443,109 | \$3,096,512 | \$ 1,891 | \$ 3,488 |  |  |

(1) Facility fee determined by CFC's senior unsecured credit ratings based on the pricing schedules put in place at the inception of the related agreement.

On October 28, 2013, we amended our $\$ 1,006$ million three-year, $\$ 1,088$ million four-year, and $\$ 1,033$ million five-year revolving credit agreements to extend the maturity dates for the three-year, four-year, and five-year revolving credit agreements by one year each to October 28, 2016, 2017 and 2018, respectively. On February 7, 2014, we exercised our option to increase the commitment level for the three-year revolving credit agreement maturing on October 28, 2016, four-year revolving credit agreement maturing on October 28, 2017, and five-year revolving credit agreement maturing on October 28, 2018 by a total of $\$ 100$ million to $\$ 1,036$ million, $\$ 1,122$ million, and $\$ 1,068$ million, respectively.

The revolving credit agreements do not contain a material adverse change clause or ratings triggers that limit the banks' obligations to fund under the terms of the agreements, but we must be in compliance with their other requirements to draw down on the facilities, including financial ratios. For further discussion see the Compliance with Debt Covenants section.

## Member Investments

Table 24 shows the components of our member investments included in total debt outstanding.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Table 24: Member Investments

|  | February 28, 2014 |  | May 31, 2013 |  |  | Increase/ (Decrease) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in thousands) | Amount | \% of Total (1) |  | Amount | \% of Total (1) |  |  |
| Commercial paper | \$916,675 | 26 | \% | \$812,141 | 28 | \% | \$ 104,534 |
| Select notes | 491,931 | 99 |  | 353,190 | 99 |  | 138,741 |
| Daily liquidity fund | 590,724 | 100 |  | 680,419 | 100 |  | (89,695 ) |
| Medium-term notes | 484,943 | 19 |  | 574,108 | 19 |  | (89,165 ) |
| Members' subordinated certificates | 1,721,815 | 100 |  | 1,766,402 | 100 |  | (44,587 ) |
| Total | \$4,206,088 |  |  | \$4,186,260 |  |  | \$ 19,828 |
| Percentage of total debt outstanding | 20 |  |  | 20 \% |  |  |  |

(1) Represents the percentage of each line item outstanding to our members.

Member investments averaged $\$ 4,083$ million outstanding over the last three years. We view member investments as a more stable source of funding than capital market issuances.

## Cash, Investments and Time Deposits

At February 28, 2014, cash, investments and time deposits totaled $\$ 1,572$ million. The interest rate earned on these investments and time deposits is sufficient to cover the cost of the underlying borrowed funds. This total represents an additional source of liquidity that is available to support our operations.

## Cash Flows from Operations

For the nine months ended February 28, 2014, cash flows provided by operating activities were $\$ 281$ million compared with $\$ 204$ million for the prior-year period. Our cash flows from operating activities are driven primarily by a combination of cash flows from operations and the timing and amount of loan interest payments we received compared with interest payments we made on our debt.

## Compliance with Debt Covenants

At February 28, 2014, we were in compliance with all covenants under our revolving credit agreements and senior debt indentures. The following represents our required and actual financial ratios under the revolving credit agreements.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Table 25: Financial Ratios under Revolving Credit Agreements

|  | $\begin{array}{l}\text { Actual } \\ \text { February }\end{array}$ |  |  |
| :--- | :--- | :--- | :--- |
| May 31, |  |  |  |
| Requirement |  |  |  |
| 28, |  |  |  |
| Minimum average adjusted TIER over the six most recent fiscal quarters (1) |  |  |  |$)$

(1) In addition to the adjustments made to the leverage ratio set forth in the Non-GAAP Financial Measures section, senior debt excludes guarantees to member systems that have certain investment-grade ratings from Moody's Investors Service and Standard \& Poor's Corporation. The TIER and debt-to-equity calculations include the adjustments set forth in the Non-GAAP Financial Measures section and exclude the results of operations for CAH.
(2) We must meet this requirement to retire patronage capital.

The revolving credit agreements prohibit liens on loans to members except liens:
under our indentures, related to taxes that are not delinquent or contested, stemming from certain legal proceedings that are being contested in good faith, created by CFC to secure guarantees by CFC of indebtedness the interest on which is excludable from the gross income of the recipient for federal income tax purposes, granted by any subsidiary to CFC, and
to secure other indebtedness of CFC of up to $\$ 7,500$ million plus an amount equal to the incremental increase in CFC's allocated Guaranteed Underwriter Program obligations, provided that the aggregate amount of such indebtedness may not exceed $\$ 10,000$ million. As of February 28, 2014, the amount of our secured indebtedness for purposes of this provision of all three revolving credit agreements was $\$ 5,540$ million.

The revolving credit agreements limit new investments in foreclosed assets held by CAH to $\$ 275$ million without consent by the required banks. At February 28, 2014, these investments did not exceed this limit.

Table 26 summarizes our required and actual financial ratios as defined under our 1994 collateral trust bonds indenture and our medium-term notes indentures in the United States markets.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

## Table 26: Financial Ratios under Indentures

|  |  | Actual |  |
| :---: | :---: | :---: | :---: |
|  |  | February |  |
|  | Requirement | $\begin{aligned} & 28 \\ & 2014 \end{aligned}$ | May 31, 2013 |
| Maximum ratio of adjusted senior debt to total equity (1) | 20.00 | 6.72 | 6.72 |

(1) The ratio calculation includes the adjustments made to the leverage ratio in the Non-GAAP Financial Measures section, with the exception of the adjustments to exclude the non-cash impact of derivative financial instruments and adjustments from total liabilities and total equity.

We are required to pledge collateral equal to at least 100 percent of the outstanding balance of debt issued under our collateral trust bond indentures and note purchase agreements with the Federal Agricultural Mortgage Corporation. In addition, we are required to maintain collateral on deposit equal to at least 100 percent of the outstanding balance of debt outstanding to the Federal Financing Bank under the Guaranteed Underwriter program of the USDA, which supports the Rural Economic Development Loan and Grant program, for which distribution and power supply loans may be deposited. See Pledging of Loans and Loans on Deposit in Note 3, Loans and Commitments, for additional information related to collateral.

The following table summarizes the amount of mortgage notes pledged or on deposit as collateral as a percentage of the related debt outstanding under the debt agreements noted above.

## Table 27: Collateral Pledged or on Deposit

(1) Represents collateral on deposit as a percentage of the related debt outstanding.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

(2) All pledge agreements previously entered into with RUS and U.S. Bank National Association were consolidated into one amended, restated and consolidated pledge agreement in December 2012.

## Uses of Liquidity

## Loan Advances

Loan advances are either from new loans approved to a borrower or from the unadvanced portion of loans previously approved. At February 28, 2014, unadvanced loan commitments totaled $\$ 13,545$ million. Of that total, $\$ 2,249$ million represented unadvanced commitments related to line of credit loans that are not subject to a material adverse change clause at the time of each loan advance. As such, we would be required to advance amounts on these committed facilities as long as the borrower is in compliance with the terms and conditions of the loan. New advances of \$791 million or 35 percent under these committed line of credit loans would be advanced at CFC's standard rates and, therefore, any increase in CFC's costs to obtain funding required to make the advance could be passed on to the borrower. The other $\$ 1,458$ million or 65 percent of committed line of credit loans represent loan syndications where the pricing is set at a spread over a market index as agreed upon by all of the participating banks and market conditions at the time of syndication. The remaining $\$ 11,296$ million of unadvanced loan commitments at February 28,2014 , were generally subject to material adverse change clauses. Prior to making an advance on these facilities, we would confirm that there has been no material adverse change in the borrower's business or condition, financial or otherwise, since the time the loan was approved and confirm that the borrower is currently in compliance with loan terms and conditions. In some cases, the borrower's access to the full amount of the facility is further constrained by the imposition of borrower-specific restrictions, or by additional conditions that must be met prior to advancing funds.

Since we generally do not charge a fee for the borrower to have an unadvanced amount on a loan facility that is subject to a material adverse change clause, our borrowers tend to request amounts in excess of their immediate estimated loan requirements. It has been our history that we do not see significant loan advances from the large amount of long-term unadvanced loan amounts that are subject to material adverse change clauses at the time of the loan advance. We have a very low historical average utilization rate on all our line of credit facilities, including committed line of credit facilities. Unadvanced commitments related to line of credit loans are typically revolving facilities for periods not to exceed five years. Long-term unadvanced commitments generally expire five years from the date of the loan agreement. These reasons, together with the other limitations on advances as described above, all contribute to our expectation that the majority of the

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

unadvanced commitments reported will expire without being fully drawn upon and that the total commitment amount does not necessarily represent future cash funding requirements at February 28, 2014.

We currently expect to make long-term loan advances totaling approximately $\$ 1,495$ million to our members over the next 12 months.

## Interest Expense on Debt

For the nine months ended February 28, 2014, interest expense on debt was $\$ 484$ million, representing an average cost of 3.15 percent compared with 3.56 percent for the nine months ended February 28, 2013. For the past three fiscal years, interest expense on debt has averaged $\$ 746$ million. At February 28, 2014, 77 percent of outstanding debt had a fixed interest rate and 23 percent had a variable interest rate.

## Principal Repayments on Long-Term Debt

Table 28 summarizes the principal amount of medium-term notes, collateral trust bonds, long-term notes payable, subordinated deferrable debt and membership subordinated certificates maturing by fiscal year and thereafter.

## Table 28: Principal Maturity of Long-Term Debt

Amount
(Dollars in thousands) Maturing (1)
May 31, $2014 \quad \$ 958,120$
May 31, $2015 \quad 837,607$
May 31, $2016 \quad 1,486,521$
May 31,2017 1,189,975
May 31, $2018 \quad$ 754,594
Thereafter 11,192,613
Total \$16,419,430
(1) Excludes loan subordinated certificates totaling $\$ 126$ million that amortize annually based on the outstanding balance of the related loan and $\$ 1$ million in payments not received on certificates subscribed and unissued. There are many items that affect the amortization of a loan, such as loan conversions, loan repricing at the end of an interest rate term and prepayments; therefore, an amortization schedule cannot be maintained for these certificates. Over the past three years, annual amortization on these certificates has averaged $\$ 24$ million. In fiscal year 2013, amortization represented 18 percent of amortizing loan subordinated certificates outstanding.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Patronage Capital Retirements

CFC has made annual retirements of allocated net earnings in 34 of the last 35 years. In July 2013, the CFC Board of Directors approved the allocation of $\$ 81$ million from fiscal year 2013 net earnings to CFC's members in the form of patronage capital and authorized the retirement of allocated net earnings totaling $\$ 41$ million, representing 50 percent of the fiscal year 2013 allocation. This amount was returned to members in cash in October 2013. The remaining portion of allocated net earnings will be retained by CFC for 25 years under guidelines adopted by the CFC Board of Directors in June 2009. The board of directors has the authority to change the current practice for allocating and retiring net earnings at any time, subject to applicable laws and regulation.

## Market Risk

Our primary market risks are liquidity risk, interest rate risk and counterparty risk as a result of entering into derivative financial instruments.

## Liquidity Risk

We face liquidity risk in funding our loan portfolio and refinancing our maturing obligations. Our Asset Liability Committee monitors liquidity risk by establishing and monitoring liquidity targets, as well as strategies and tactics to meet those targets, and ensuring that sufficient liquidity is available for unanticipated contingencies.

We face liquidity risk in the funding of our loan portfolio based on member demand for new loans. As presented in Table 22, we expect over the next six quarters that advances on our long-term loans will exceed long-term loan repayments by an estimated $\$ 213$ million.

At February 28, 2014, we had $\$ 4,785$ million of commercial paper, select notes, daily liquidity fund and bank bid notes scheduled to mature during the next 12 months. We expect to continue to maintain member investments in commercial paper, select notes and the daily liquidity fund at recent levels of approximately $\$ 2,000$ million. Dealer commercial paper and bank bid notes increased from $\$ 2,160$ million at May 31, 2013 to $\$ 2,762$ million at February 28,2014 . We expect that the dealer commercial paper balance will fluctuate to offset changes in demand from our members. We intend to maintain the current level of commercial paper outstanding while favorable market conditions exist. We intend to limit the balance of dealer

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

commercial paper and bank bid notes outstanding to 15 percent or less of total debt outstanding. At February 28, 2014, 15 percent of total debt outstanding was $\$ 3,200$ million. In order to access the commercial paper markets at current levels, we believe we need to maintain our current ratings for commercial paper of P1 from Moody's Investors Service and A1 from Standard \& Poor's Corporation.

We use our bank lines of credit primarily as backup liquidity for dealer and member commercial paper. At February 28 , 2014, we had $\$ 3,443$ million in available lines of credit with financial institutions. We expect to be in compliance with the covenants under our revolving credit agreements; therefore, we could draw on these facilities to repay dealer or member commercial paper that cannot be rolled over in the event of market disruptions.

At February 28, 2014, we had long-term debt maturing in the next 12 months totaling $\$ 1,757$ million. In addition to our access to the dealer and member commercial paper markets as discussed above, we believe we will be able to refinance these maturing obligations because:

Based on our funding sources available and past history, we believe we will meet our obligation to refinance the -remaining $\$ 270$ million of medium-term notes sold through dealers and $\$ 366$ million of medium-term notes sold to members that mature over the next 12 months with new medium-term notes including those in the retail notes market. We expect to maintain the ability to obtain funding through the capital markets. During the nine months ended -February 28, 2014, we issued $\$ 570$ million of medium-term notes and $\$ 1,400$ million of collateral trust bonds in registered offerings.

We can borrow up to $\$ 3,900$ million under a note purchase agreement with the Federal Agriculture Mortgage Corporation at any time through January 11, 2016, subject to market conditions for debt issued by the Federal Agricultural Mortgage Corporation. We had up to $\$ 2,377$ million available under this revolving note purchase agreement at February 28, 2014.
We had up to $\$ 924$ million available under committed term loan facilities from the Federal Financing Bank at February 28, 2014. A total of $\$ 424$ million is available for advance through October 15, 2015 and a total of $\$ 500$ million is available for advance through October 16, 2016. CFC is required to deposit collateral satisfactory to RUS - pursuant to the terms of the facilities. Advances may have a maturity date of up to 20 years from the date of the advance. The spread we pay over the applicable treasury rate is locked in under this program. During the nine months ended February 28, 2014, we borrowed $\$ 325$ million under our committed loan facilities with the Federal Financing Bank.

At February 28, 2014, we were the liquidity provider for a total of $\$ 571$ million of variable-rate tax-exempt bonds issued for our member cooperatives. As liquidity provider on these $\$ 571$ million of tax-exempt bonds, we are required to purchase bonds that are tendered or put by investors. Investors provide notice to the remarketing agent that they will tender or put a certain amount of bonds at the next interest rate reset date. If the remarketing agent is unable to sell such bonds to other investors by the next interest rate reset date, we have unconditionally agreed to purchase such bonds. On a total of $\$ 446$ million of the bonds for which we are liquidity provider, we also provide a guarantee of all principal and interest. On a total of $\$ 125$ million of tax-exempt bonds, our obligation as liquidity provider is in the form of a letter of credit which is reflected in our letters of credit. During the nine months ended February 28, 2014, we were not required to perform as liquidity provider pursuant to these obligations.

At February 28, 2014, we had a total of $\$ 472$ million of letters of credit outstanding for the benefit of our members. That total includes $\$ 125$ million for the purpose of providing liquidity for pollution control bonds which is also mentioned in the paragraph above. The remaining $\$ 347$ million represents obligations for which we may be required to advance funds based on various trigger events included in the letters of credit. If we are required to advance funds, the member is obligated to pay such amounts to CFC.

We expect that our current sources of liquidity, along with our $\$ 843$ million of cash on hand, $\$ 29$ million of investments and $\$ 700$ million of time deposits at February 28, 2014, will allow us to meet our obligations and to fund our operations over the next 12 to 18 months.

## Interest Rate Risk

Our interest rate risk exposure is related to the funding of the fixed-rate loan portfolio. Our Asset Liability Committee monitors interest rate risk by meeting at least monthly to review the following information: national economic forecasts, forecasts for the federal funds rate and the interest rates that we set, interest rate gap analysis, liquidity position, schedules of loan and debt maturities, short- and long-term funding needs, anticipated loan demands, credit concentration status, derivatives portfolio and financial forecast. The Asset Liability Committee also discusses the composition of fixed-rate

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

versus variable-rate lending, new funding opportunities, changes to the nature and mix of assets and liabilities for structural mismatches and interest rate swap transactions.

## Matched Funding Practice

We provide our members with many options on loans with regard to interest rates, the term for which the selected interest rate is in effect, and the ability to convert or prepay the loan. Long-term loans typically have maturities of up to 35 years. Borrowers may select fixed interest rates for periods of one year through the life of the loan. Each time borrowers select a rate, it is at our current market rate for that type of loan. We do not match fund the majority of our fixed-rate loans with a specific debt issuance at the time the loans are advanced. To monitor and mitigate interest rate risk in the funding of fixed-rate loans, we perform a monthly interest rate gap analysis, a comparison of fixed-rate assets repricing or maturing by year to fixed-rate liabilities and members' equity maturing by year (see table 29 below). Fixed-rate liabilities include debt issued at a fixed rate as well as variable-rate debt swapped to a fixed rate using interest rate swaps. Fixed-rate debt swapped to a variable rate using interest rate swaps is excluded from the analysis since it is used to match fund the variable-rate loan pool. With the exception of members' subordinated certificates, which are generally issued at rates below our long-term cost of funding and with extended maturities, and commercial paper, our liabilities have average maturities that closely match the repricing terms (but not the maturities) of our fixed-interest-rate loans.

We fund the amount of fixed-rate assets that exceed fixed-rate debt and members' equity with short-term debt, primarily commercial paper. We also have the option to enter pay fixed-receive variable interest rate swaps. Our funding objective is to manage the matched funding of asset and liability repricing terms within a range of total assets (excluding derivative assets) deemed appropriate by the Asset Liability Committee based on the current environment and extended outlook for interest rates. Due to the flexibility we offer our borrowers, there is a possibility of significant changes in the composition of the fixed-rate loan portfolio, and the management of the interest rate gap is very fluid. We may use interest rate swaps to adjust the interest rate gap based on our needs for fixed-rate or variable-rate funding as changes arise. The interest rate risk is deemed minimal on variable-rate loans since the loans are eligible to be repriced at least monthly, therefore minimizing the variance to the cost of variable-rate debt used to fund the loans. At February 28, 2014 and May 31, 2013, 11 percent of loans carried variable interest rates.

Our interest rate gap analysis also allows us to analyze the effect on the overall adjusted TIER of issuing a certain amount of debt at a fixed rate for various maturities before the issuance of the debt. See Non-GAAP Financial Measures for further explanation and a reconciliation of the adjustments to TIER.

The following table shows the scheduled amortization and repricing of fixed-rate assets and liabilities outstanding at February 28, 2014.

Table 29: Interest Rate Gap Analysis

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

| (Dollars in millions) | May <br> 31, <br> 2014 <br> or <br> prior | June 1, <br> 2014 to <br> May 31, <br> 2016 |  | June 1, <br> 2016 to <br> May 31, <br> 2018 | June 1, <br> 2018 to <br> May 31, <br> 2023 | June 1, <br> 2023 to <br> May 31, <br> 2033 |  | Beyond June 1, 2033 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assets amortization and repricing | \$ 472 | \$ 4,245 |  | \$ 3,266 | \$4,706 | \$ 4,286 |  | \$ 1,395 | \$18,370 |
| Liabilities and members' equity: |  |  |  |  |  |  |  |  |  |
| Long-term debt | \$ 530 | \$ 2,474 |  | \$ 3,246 | \$ 4,627 | \$ 3,129 |  | \$484 | \$14,490 |
| Subordinated certificates | 193 | 212 |  | 70 | 163 | 304 |  | 763 | 1,705 |
| Members' equity (1) | - | - |  | - | - | 843 |  | 148 | 991 |
| Total liabilities and members' equity | \$ 723 | \$ 2,686 |  | \$3,316 | \$4,790 | \$4,276 |  | \$1,395 | \$17,186 |
| Gap (2) | \$ (251 ) | \$ 1,559 |  | \$ (50 | \$ 84 | \$ 10 |  | \$ - | \$1,184 |
| Cumulative gap | (251 ) | 1,308 |  | 1,258 | 1,174 | 1,184 |  | 1,184 |  |
| Cumulative gap as a \% of total assets | (1.09 )\% | 5.66 | \% | 5.44 \% | 5.08 \% | 5.12 | \% | 5.12 |  |
| Cumulative gap as a \% of adjusted total assets (3) | (1.10) | 5.73 |  | 5.51 | 5.14 | 5.18 |  | 5.18 |  |

(1) Includes the portion of the loan loss allowance and subordinated deferrable debt allocated to fund fixed-rate assets and excludes non-cash adjustments from the accounting for derivative financial instruments.
(2) Assets less liabilities and members' equity.
(3) Adjusted total assets represent total assets in the condensed consolidated balance sheets less derivative assets.

At February 28, 2014, we had $\$ 18,370$ million of fixed-rate assets amortizing or repricing, funded by $\$ 14,490$ million of fixed-rate liabilities maturing during the next 30 years and $\$ 2,696$ million of members' equity and members' subordinated certificates. A portion of members' equity does not have a scheduled maturity. The difference of $\$ 1,184$ million, or 5.12 percent of total assets and 5.18 percent of total assets excluding derivative assets, represents the fixed-rate assets maturing during the next 30 years in excess of the fixed-rate debt and members' equity. Our Asset Liability Committee believes that the difference in the matched funding at February 28, 2014 as a percentage of total assets less derivative assets is appropriate

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

based on the extended outlook for interest rates and allows the flexibility to maximize funding opportunities in the current low interest rate environment. Funding fixed-rate loans with short-term debt presents a liquidity risk of being able to roll over the short-term debt until we issue long-term debt to fund the fixed-rate loans through their repricing or maturity date. Factors that mitigate this risk include our maintenance of liquidity available at February 28, 2014 through committed revolving credit agreements totaling $\$ 3,443$ million, $\$ 924$ million under committed term loan facilities from the Federal Financing Bank, and, subject to market conditions, up to $\$ 2,377$ million under a revolving note purchase agreement with the Federal Agriculture Mortgage Corporation.

## Derivative Financial Instruments

We are an end user of financial derivative instruments and not a swap dealer. We use derivatives such as interest rate swaps and treasury rate locks to mitigate interest rate risk. These derivatives are used when they provide a lower cost of funding or minimize interest rate risk as part of our overall interest rate matching strategy. As an end user and not a swap dealer, we have not entered into derivative financial instruments for investing, speculating or trading purposes in the past and do not anticipate doing so in the future. At February 28, 2014 and May 31, 2013, there were no foreign currency derivative instruments outstanding.

## Counterparty Risk

We are exposed to counterparty risk related to the performance of the parties with which we entered into financial transactions, primarily for derivative instruments and cash and time deposits that we have with various financial institutions. To mitigate this risk, we only enter into these transactions with financial institutions with investment-grade ratings. Our cash and time deposits with financial institutions have an original maturity of less than one year. For our derivative instruments, at February 28, 2014 and May 31, 2013, the highest percentage concentration of total notional exposure to any one counterparty was 21 percent and 20 percent of total derivative instruments, respectively. At the time counterparties are selected to participate in our exchange agreements, the counterparty must be a participant in one of our revolving credit agreements. In addition, the derivative instruments executed for each counterparty are based on key characteristics such as the following: notional concentration, credit risk exposure, tenor, bid success rate, total credit commitment and credit ratings. At February 28, 2014, our derivative instrument counterparties had credit ratings ranging from AA- to BBB+ as assigned by Standard \& Poor's Corporation and Aa 2 to Baa2 as assigned by Moody's Investors Service. Based on the fair market value of our derivative instruments at February 28, 2014, there were three counterparties that would be required to make a payment to us totaling $\$ 76$ million if all of our derivative instruments were terminated on that day. The largest amount owed to us by a single counterparty was $\$ 57$ million, or 75 percent of the total exposure to us, at February 28, 2014.

## Rating Triggers

Some of our interest rate swaps have credit risk-related contingent features referred to as rating triggers. Rating triggers are not separate financial instruments and are not required to be accounted for separately as derivatives.

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

At February 28, 2014, the following notional amounts of derivative instruments had rating triggers based on our senior unsecured credit ratings from Moody's Investors Service or Standard \& Poor's Corporation falling to a level specified in the applicable agreements and are grouped into the categories below. In calculating the payments and collections required upon termination, we netted the agreements for each counterparty, as allowed by the underlying master agreements. At February 28, 2014, our senior unsecured credit rating from Moody's Investors Service and Standard \& Poor's Corporation was A2 and A, respectively. At February 28, 2014, both Moody's Investors Service and Standard \& Poor's Corporation had our ratings on stable outlook.

## Table 30: Rating Triggers for Derivatives

|  | Notional <br> (Dollars in thousands) | Our Required <br> Amount | Amount We <br> Payment | Net |
| :--- | :--- | :--- | :--- | :--- |
| Wutual rating trigger if ratings: |  |  |  |  |
| fall to Baa1/BBB+ (1) | $\$-$ | $\$-$ | $\$-$ | $\$$ - |
| fall below Baa1/BBB+ (1) | $6,576,953$ | $(160,733$ | $)$ | 75,860 |
| Total | $\$ 6,576,953$ | $\$(160,733$ | $) \$ 75,860$ | $\$(84,873)$ |

(1) Stated senior unsecured credit ratings are for Moody's Investors Service and Standard \& Poor's Corporation, respectively. Under these rating triggers, if the credit rating for either counterparty falls to the level specified in the agreement, the other counterparty may, but is not obligated to, terminate the agreement. If either counterparty terminates the agreement, a net payment may be due from one counterparty to the other based on the fair value, excluding credit risk, of the underlying derivative instrument.

In addition to the rating triggers listed above, at February 28, 2014, we had a total notional amount of $\$ 450$ million of derivative instruments with one counterparty that would require the pledging of collateral totaling $\$ 9$ million (the fair value of such derivative instruments excluding credit risk) if our senior unsecured ratings from Moody's Investors Service were to fall below Baa2 or if our ratings from Standard \& Poor's Corporation were to fall below BBB. The aggregate fair value, net

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

of the credit risk valuation adjustment, of all interest rate swaps with rating triggers that were in a net liability position at February 28, 2014 was $\$ 167$ million.

At February 28, 2014, the credit rating for two counterparties was below the rating trigger level in the interest rate swap contracts with these counterparties. As a result, we have the option to terminate all interest rate swaps with these counterparties. At February 28, 2014, the interest rate swap contracts with these counterparties have a total notional amount of $\$ 781$ million. If we were to decide to terminate the interest rate swaps with these counterparties, the contracts would be settled based on the fair value at the date of termination. At February 28, 2014, we estimate that we would have to make a payment of approximately $\$ 22$ million to settle the interest rate swaps with these counterparties. Because we use our interest rate swaps as part of our matched funding strategy, we generally do not terminate such agreements early. At this time, we have not provided notice to either counterparty that we intend to terminate the interest rate swaps. We will continue to evaluate the overall credit worthiness of these counterparties and monitor our overall matched funding position.

For additional information about the risks related to our business, see Item 1A. Risk Factors.

## Non-GAAP Financial Measures

We make certain adjustments to financial measures in assessing our financial performance that are not in accordance with GAAP. These non-GAAP adjustments fall primarily into two categories: (i) adjustments related to the calculation of the TIER and (ii) adjustments related to the calculation of the leverage and debt-to-equity ratios. These adjustments reflect management's perspective on our operations, and in several cases, adjustments used to measure covenant compliance under our revolving credit agreements. Therefore, we believe these are useful financial measures for investors. We refer to our non-GAAP financial measures as "adjusted" throughout this document.

## Adjustments to Net Income and the Calculation of TIER

The following table provides a reconciliation between interest expense and net interest income, and these financial measures adjusted to include the impact of derivatives. Refer to Non-GAAP Financial Measures in Item 7.
Management's Discussion and Analysis of Financial Condition and Results of Operations, in our Form 10-K for the year ended May 31, 2013 for an explanation of why these adjustments to net income and the calculation of the TIER ratio reflect management's perspective on our operations and why we believe these are useful financial measures for investors.

Table 31: Adjusted Financial Measures - Income Statement

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :---: | :---: | :--- | :--- | :--- |
|  | February 28, |  | February 28, |  |

## Table 32: TIER and Adjusted TIER

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :---: | :---: | :---: | :---: |
|  | February 28, | February 28, |  |  |
|  | 2014 | 2013 | 2014 | 2013 |
| TIER (1) | 1.17 | 1.52 | 1.43 | 1.31 |
| Adjusted TIER (2) | 1.23 | 1.15 | 1.20 | 1.18 |

(1) TIER using GAAP financial measures is calculated by dividing interest expense plus net income prior to cumulative effect of change in accounting principle by interest expense.
(2) Adjusted TIER is calculated by dividing adjusted interest expense plus adjusted net income by adjusted interest expense.

# Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q 

## Adjustments to the Calculation of Leverage and Debt-to-Equity Ratios

The following table provides a reconciliation between the liabilities and equity used to calculate the leverage and debt-to-equity ratios and these financial measures adjusted to exclude the non-cash effects of derivatives and foreign currency adjustments, to subtract debt used to fund loans that are guaranteed by RUS from total liabilities, and to subtract from total liabilities, and add to total equity, debt with equity characteristics. Refer to Non-GAAP Financial Measures in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, in our Form 10-K for the year ended May 31, 2013 for an explanation of why these adjustments to the calculation of leverage and debt-to-equity ratios reflect management's perspective on our operations and why we believe these are useful financial measures for investors.

## Table 33: Adjusted Financial Measures - Balance Sheet

(Dollars in thousands)

(2) Represents the accumulated other comprehensive income related to derivatives. Excludes $\$ 2$ million of accumulated other comprehensive loss and $\$ 1$ million of accumulated other comprehensive income related to the unrecognized gains (losses) on our investments at February 28, 2014 and May 31, 2013, respectively.

Table 34: Leverage and Debt-to-Equity and Adjusted Leverage and Adjusted Debt-to-Equity Ratios

## Edgar Filing: NATIONAL RURAL UTILITIES COOPERATIVE FINANCE CORP /DC/ - Form 10-Q

|  | February 28, May 31, |  |
| :--- | :--- | :--- |
|  | 2014 | 2013 |
| Leverage ratio (1) | 23.45 | 27.58 |
| Adjusted leverage ratio (2) | 6.35 | 6.11 |
|  |  |  |
| Debt-to-equity ratio (3) | 22.33 | 26.21 |
| Adjusted debt-to-equity ratio (4) | 6.01 | 5.76 |

(1) The leverage ratio using GAAP financial measures is calculated by dividing liabilities plus guarantees outstanding by total equity.
(2) The debt-to-equity ratio using GAAP financial measures is calculated by dividing liabilities by total equity.
(3) The adjusted leverage ratio is calculated by dividing adjusted liabilities plus guarantees outstanding by adjusted equity.
(4) The adjusted debt-to-equity ratio is calculated by dividing adjusted liabilities by adjusted equity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

For quantitative and qualitative disclosures about market risk, see "Part I—Item 2. MD\&A—Market Risk."

## Item 4. Controls and Procedures.

At the end of the period covered by this report, senior management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on this evaluation process, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective. There were no changes in our internal control over financial reporting that occurred during the three months ended February 28, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

## Item 1A. Risk Factors.

Refer to Part I, Item 1A. Risk Factors in our Form 10-K for the year ended May 31, 2013 for information regarding factors that could affect our results of operations, financial condition and liquidity. There have been no material changes to our risk factors described in our Form 10-K for the year ended May 31, 2013.

## Item 5. Other Information.

None.

## Item 6. Exhibits.
