Exhibit	Description
No. 1	RNS Announcement, re: Restructuring update dated 18 November 2004

18 November 2004

British Energy plc

Edgar Filing: BRITISH ENERGY PLC - Form 6-K

Restructuring and output update

Further to the announcements on 22 October 2004, both units at each of Heysham 1 and Hartlepool remain shutdown. Although work to demonstrate the integrity of certain boilers has been virtually completed, we are continuing to make other modifications to Hartlepool and Heysham 1 before they are restarted which is not expected to be before mid-December.

In light of this, the Company has reduced its target for nuclear output for the financial year 2004/2005 to 59.5 TWh.

British Energy is continuing to work hard to complete the Agreed Restructuring in late January 2005. However in the light of the delay to the restart of Hartlepool and Heysham 1, the Company has decided it is prudent to seek an extension to the present Restructuring Long Stop Date of 31 January 2005. An extension requires the agreement of holders of a simple majority of the bond and RBS claims, a two-thirds majority of the Eggborough bank debt and swap claims and a simple majority of the Enron, Teesside and Total claims (now held by Deutsche Bank AG, London), and BNFL and the Secretary of State for Trade and Industry. The Company expects to reach such an agreement shortly.

The Agreed Restructuring remains subject to large number of important conditions and significant uncertainties. If for any reason the Company is unable to implement the Agreed Restructuring prior to the present or any extended Restructuring Long Stop Date, it may be unable to meet its financial obligations as they fall due, in which case it may have to take appropriate insolvency proceedings. If the Company were to commence insolvency proceedings, distributions, if any, to unsecured creditors may represent only a small fraction of their unsecured liabilities and it is highly unlikely there would be any return to shareholders.
