Critical accounting policies
.....

The management commentary included in the Report of the Directors: 'Financial Review', together with the 'Employees' and 'Corporate sustainability' sections of 'Corporate Governance' and the 'Directors' Remuneration Report' is presented in compliance with the IFRSs Practice Statement 'Management Commentary' issued by the IASB.

Use of non-GAAP financial measures

Our reported results are prepared in accordance with IFRSs as detailed in the Financial Statements starting on page 416. In measuring our performance, the financial measures that we use include those which have been derived from our reported results in order to eliminate factors which distort year-on-year comparisons. These are considered non-GAAP financial measures. Non-GAAP financial measures that we use throughout our Financial Review and are described below. Other non-GAAP financial measures are described and reconciled to the closest reported financial measure when used.

Constant currency

The constant currency measure adjusts for the year-on-year effects of foreign currency translation differences by comparing reported results for 2013 with reported results for 2012 retranslated at 2013 exchange rates. Except where stated otherwise, commentaries are on a constant currency basis, as reconciled in the table below.

The foreign currency translation differences reflect the movements of the US dollar against most major currencies during 2013.

We exclude the translation differences because we consider the like-for-like basis of constant currency financial measures more appropriately reflects changes due to operating performance.

Constant currency

Constant currency comparatives for 2012 referred to in the commentaries are computed by retranslating into US dollars for non-US dollar branches, subsidiaries, joint ventures and associates:

- the income statements for 2012 at the average rates of exchange for 2013; and
- the balance sheet at 31 December 2012 at the prevailing rates of exchange on 31 December 2013.

No adjustment has been made to the exchange rates used to translate foreign currency denominated assets and liabilities into the functional currencies of any HSBC branches, subsidiaries, joint ventures or associates. When reference is made to 'constant currency' in tables or commentaries, comparative data reported in the functional currencies of HSBC's operations have been translated at the appropriate exchange rates applied in the current year on the basis described above.

Underlying performance

To arrive at underlying performance:

Edgar Filing: HSBC HOLDINGS PLC - Form 6-K

- we adjust for the year-on-year effects of foreign currency translation;
- we eliminate the fair value movements on our long-term debt attributable to credit spread ('own credit spread') where the net result of such movements will be zero upon maturity of the debt. This does not include fair value changes due to own credit risk in respect of trading liabilities or derivative liabilities; and
- we adjust for acquisitions, disposals and changes of ownership levels of subsidiaries, associates, joint ventures and businesses.

For acquisitions, disposals and changes of ownership levels of subsidiaries, associates, joint ventures and businesses, we eliminate the gain or loss on disposal or dilution and any associated gain or loss on reclassification or impairment recognised in the year incurred, and remove the operating profit or loss of the acquired, disposed of or diluted subsidiaries, associates, joint ventures and businesses from all the years presented so we can view results on a like-for-like basis. For example, if a disposal was made in the current year, any gain

For footnotes, see page 132.

or loss on disposal, any associated gain or loss on reclassification or impairment recognised and the results of the disposed-of business would be removed from the results of the current year and the previous year as if the disposed-of business did not exist in those years. Disposal of investments other than those included in the above definition do not lead to underlying adjustments.

We use underlying performance to explain year-on-year changes when the effect of fair value movements on own debt, acquisitions, disposals or dilution is significant because we consider that this basis more appropriately reflects operating performance.

The following acquisitions, disposals and changes to ownership levels affected the underlying performance:

Disposal gains/(losses) affecting underlying performance

	Date	Disposal gain/(loss) US\$m
HSBC Bank Canada's disposal of HSBC Securities (Canada) Inc's full service retail brokerage business ⁵	Jan 2012	83
