Aberdeen Asia Pacific Income Fund, Inc.

Semi-Annual Report

April 30, 2009

Invests primarily in Australian and Asian debt securities.

Letter to Shareholders (unaudited)

June 11, 2009

Dear Shareholder,

We present this Semi-Annual Report which covers the activities of Aberdeen Asia-Pacific Income Fund, Inc. (the Fund) for the six months ended April 30, 2009. The Fund's investment objective is to seek current income. The Fund may also achieve incidental capital appreciation.

Net Asset Value Performance

The Fund's total return based on net asset value (NAV) was 17.38% over the six months ended April 30, 2009 and 8.4% per annum since inception, assuming the reinvestment of distributions.

Share Price Performance

The Fund's share price increased by 18.4% over the six months, from \$4.18 on October 31, 2008 to \$4.95 on April 30, 2009. The Fund's share price on April 30, 2009 represented a discount of 9.2% to the NAV per share of \$5.45 on that date, compared with a discount of 14.9% to the NAV per share of \$4.91 on October 31, 2008. At the date of this letter, the share price was \$5.65 representing a discount of 4.4% to the NAV per share of \$5.91.

Asia: 48.1% of Total Investments Invested in Asian Debt Securities

As of April 30, 2009, the Fund held 48.1% of its total investments in Asian debt securities (including New Zealand). Of the Fund's total investments, 29.2% were held in U.S. dollar denominated bonds issued by foreign issuers, bringing the Fund's total U.S. dollar exposure to 40.2%.

Credit Quality: 71.3% of Securities Rated or Deemed Equivalent to A or Better

As of April 30, 2009, 71.3% of the Fund's portfolio was invested in securities where either the issue or the issuer was rated A or better, or judged by Aberdeen Asset Management Asia Limited (the Investment Manager) to be of equivalent quality.

Distributions

Distributions to common shareholders for the twelve months ended April 30, 2009 totaled 47 cents per share (including a special distribution of 5 cents per share). Based on the share price of \$4.95 on April 30, 2009, the distribution rate over the twelve months then ended was 9.5% (8.5% excluding the special distribution). Since all distributions are paid after deducting applicable

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

withholding taxes, the effective distribution rate may be higher for those U.S. investors who are able to claim a tax credit.

On June 9, 2009, the Board of Directors (Board) authorized a monthly distribution of 3.5 cents per share, payable on July 10, 2009 to common shareholders of record as of June 30, 2009.

The Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent the Fund does not generate earnings from dividends, interest and net realized capital gains equal to or in excess of the aggregate distributions paid by the Fund, paid-in capital, which is a non-taxable return of capital. It is the Board's intention that the monthly distribution of 3.5 cents per share be maintained for twelve months, beginning with the July 10, 2009 distribution payment. This policy is subject to regular review at the Board's quarterly meetings, unless market conditions require an earlier evaluation. The next review is scheduled to take place in September 2009.

Share Repurchase Policy

The Board's policy is generally to buy back Fund shares on the open market when the Fund trades at certain discounts to NAV. During the six months ended April 30, 2009 and the fiscal year ended October 31, 2008, the Fund repurchased 753,400 and 3,344,500 shares, respectively, through this program.

Revolving Credit Facility and Leverage

The Fund has entered into a \$600 million loan facility with a syndicate led by The Bank of Nova Scotia. The loan facility with the syndicate led by the Bank of Nova Scotia was renewed for another 364 day term on April 15, 2009. Under the terms of the loan facility and applicable regulation, the Fund is required to maintain certain asset coverage ratios for the amount of its borrowings outstanding. Following the broader market declines in October 2008, the Fund's management determined to pay down \$80 million of the loan facility in order to maintain compliance with these asset coverage ratios. Subsequent to fiscal year end, the Fund paid down an additional \$30 million on the loan balance. In April 2009, the Fund drew down an additional \$30 million on the loan balance. The Fund's Board continues to evaluate the use of leverage for the Fund. In December 2008, the Fund's Board authorized the Fund to use reverse repurchase agreements as another form of leverage. The Fund may implement a reverse repurchase agreement program if the Board determines it would be advantageous for the Fund and shareholders to do so.

Portfolio Holdings Disclosure

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q.

Aberdeen Asia-Pacific Income Fund, Inc.

Letter to Shareholders (unaudited) (concluded)

The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information about the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330. The Fund makes the information on Form N-Q available to shareholders on the Fund's website or upon request and without charge by calling Investor Relations toll-free at 1-800-522-5465.

Proxy Voting

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities, and information regarding how the Fund voted proxies relating to portfolio securities during the twelve months ended June 30, 2008, is available: (i) upon request and without charge by calling Investor Relations toll-free at 1-800-522-5465; and (ii) on the SEC's website at <http://www.sec.gov>.

Investor Relations Information

For information about the Fund, daily updates of share price, NAV and details of distributions, please contact Aberdeen Asset Management Inc. by:

calling toll free at 1-800-522-5465 in the United States,
emailing InvestorRelations@aberdeen-asset.com, or
visiting the website at www.aberdeenfx.com.

For information about the Aberdeen Group, visit the Aberdeen website at www.aberdeen-asset.com.

Yours sincerely,

Christian Pittard

President

All amounts are U.S. dollars unless otherwise stated.

Distribution Disclosure Classification (unaudited)

Your Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore, the exact amount of distributable income for each fiscal year can only be determined as of the end of the Fund's fiscal year, October 31. However, under the U.S. Investment Company Act of

1940, as amended (the 1940 Act), the Fund may be required to indicate the sources of certain distributions to shareholders.

The Fund estimates that distributions for the fiscal year commencing November 1, 2008, including the distribution paid on June 12, 2009, are comprised entirely of net investment income.

This estimated distribution composition may vary from month to month because it may be materially impacted by future realized gains and losses on securities and fluctuations in the value of the currencies in which Fund assets are denominated.

In January 2010, a Form 1099-DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with respect to their appropriate tax treatment for the 2009 calendar year.

Aberdeen Asia-Pacific Income Fund, Inc.

Dividend Reinvestment and Cash Purchase Plan (unaudited)

We invite you to participate in the Fund's Dividend Reinvestment and Cash Purchase Plan (the Plan) which allows you to automatically reinvest your distributions in shares of the Fund's common stock at favorable commission rates. Distributions made under the Plan are taxable to the same extent as are cash distributions. The Plan also enables you to make additional cash investments in shares of at least \$100 per transaction, with a maximum of \$10,000 per month, and an aggregate annual limit of \$120,000. Under this arrangement, The Bank of New York Mellon Corporation (the Plan Agent) will purchase shares for you on the New York Stock Exchange or otherwise on the open market on or before the investment date. The investment date is the 15th day of each month, but if such date is not a business day, the preceding business day.

As a participant in the Plan, you will benefit from:

Automatic reinvestment the Plan Agent will automatically reinvest your distributions, allowing you to gradually grow your holdings in the Fund;

Lower costs shares are purchased on your behalf under the Plan at low brokerage rates. Brokerage on share purchases is currently 2 cents per share;

Convenience the Plan Agent will hold your shares in non-certificated form and will provide a detailed plan account statement of your holdings at the end of each month.

To request a brochure containing information on the Plan, together with an enrollment form, please contact the Plan Agent:

Report of the Investment Manager (unaudited)

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

Share Price Performance

On April 30, 2009, the Fund's share price was \$4.95, which represented a discount of 9.2% to the NAV per share of \$5.45. As of June 11, 2009, the share price was \$5.65, representing a discount of 4.4% to the NAV per share of \$5.91.

Loan Facility and the Use of Leverage

The Fund utilizes leverage to seek to increase the yield for its common shareholders. Until April 21, 2008, the Fund had issued AMPS for its leverage. The AMPS were redeemed and the leverage for investment purposes now involves borrowing under a loan facility. The amounts borrowed from the line of credit may be invested at higher rates than the rates in the Fund's portfolio. However, the cost of leverage could exceed the income earned by the Fund on the proceeds of such leverage. To the extent that the Fund is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Fund's common stock will decrease. In addition, in the event of a general market decline in the value of assets in which the Fund invests, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage. Non-recurring expenses in connection with the implementation of the loan facility and the redemption of the AMPS will also reduce the Fund's performance.

The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the loan facility may constitute a substantial lien and burden by reason of their prior claim against the income of the Fund and against the net assets of the Fund in liquidation. The Fund is not permitted to declare dividends or other distributions in the event of default under the loan facility. In the event of a default under the credit agreement, the lenders have the right to cause a liquidation of the collateral (i.e., sell portfolio securities and other assets of the Fund) and, if any such default is not cured, the lenders may be able to control the liquidation as well. The loan facility has a term of 364 days and is not a perpetual form of leverage; there can be no assurance that the loan facility will be available for renewal on acceptable terms, if at all.

The credit agreement governing the loan facility includes usual and customary covenants for this type of transaction. These covenants impose on the Fund asset coverage requirements, fund composition requirements and limits on certain investments, such as illiquid investments, which are more stringent than those imposed on the Fund by the 1940 Act. The covenants or guidelines could impede the Investment Manager or Investment Adviser from fully managing the

Aberdeen Asia-Pacific Income Fund, Inc.

Report of the Investment Manager (unaudited) (continued)

Fund's portfolio in accordance with the Fund's investment objective and policies. Furthermore, non-compliance with such covenants or the occurrence of other events could lead to the cancellation of the loan facility.

Prices and availability of leverage are extremely volatile in the current market environment. The Fund's Board continues to evaluate the use of leverage for the Fund and will explore other forms of leverage. In December 2008, the Fund's Board authorized the Fund to use reverse repurchase agreements as another form of leverage. The Fund may implement a reverse repurchase agreement program if the Board determines it would be advantageous for the Fund and shareholders to do so. A reverse repurchase agreement involves the sale of a security, with an agreement to repurchase the same or substantially similar securities at an agreed upon price and date. Whether such a transaction produces a gain for a fund depends upon the costs of the agreements; coupled with the income and gains of the securities purchased with the proceeds received from the sale of the security. If the income and gains on the securities purchased fail to exceed the costs, the Fund's NAV will decline faster than otherwise would be the case. Reverse repurchase agreements, as with any leveraging techniques, may increase the Fund's return; however, such transactions also increase the Fund's risks in down markets.

The Fund's Investment Management Agreement and Investment Advisory Agreement, under which management and advisory fees are paid to the Investment Manager and Investment Adviser based on the Fund's assets applicable to shares of both common and preferred stock, have been amended and restated in order to reflect the implementation of the loan facility and completion of the AMPS redemption. Because the Fund no longer uses preferred stock (i.e. the AMPS) for leverage, the Fund, the Investment Manager and Investment Adviser have amended and restated the Investment Management Agreement and Investment Advisory Agreement to reflect the parties' intention that the investment management fee be paid based on the Fund's Managed Assets (including assets attributable to any form of investment leverage). For purposes of this calculation, Managed Assets of the Fund means total assets of the Fund, including any form of investment leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility or the issuance of debt securities), (ii) the issuance of preferred stock or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies, and/or (iv) any other means. Shareholders ratified and approved the modifications to the Investment Management and Investment Advisory Agreements at the Annual Meeting of Shareholders held on March 6, 2009.

Interest Rate Swaps

The Fund previously entered into interest rate swap agreements, based on an aggregate notional amount of \$390 million, which represented 65% of the total borrowings. On April 17, 2009, the Fund unwound two previously held interest rate swap agreements and entered into two new interest rate swap agreements with an aggregate notional amount of \$246 million. As of April 30, 2009, the Fund held interest rate swap agreements with an aggregate notional amount of \$390 million which represented 75% of the total borrowings. Under the terms of the agreements currently in effect, the Fund receives a floating rate of interest (three month USD-LIBOR BBA rate) and pays fixed rates of interest for the terms and based upon the notional amounts set forth below:

Remaining Term as of April 30, 2009	Amount (in \$ million)	Fixed Rate Payable (%)
---	---------------------------	---------------------------

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

36 months	130	1.817
24 months	116	1.470
2 months	144	3.370

A significant risk associated with interest rate swaps is the risk that the counterparty may default or file for bankruptcy, in which case the Fund would bear the risk of loss of the amount expected to be received under the swap agreements. There can be no assurance that the Fund will have an interest rate swap in place at any given time nor can there be any assurance that, if an interest rate swap is in place, it will be successful in hedging the Fund's interest rate risk with respect to the loan facility. The implementation of this strategy is at the discretion of the Leverage Committee of the Board of Directors.

Economic Review

The period under review remained an extremely volatile one for investors. Concerns over the health of the global financial system, in particular the banking sector, remained from the start and continued throughout the period. Various government schemes to inject capital into the banking sector were met with sometimes improving and then deteriorating market and economic conditions. Global economic data releases were generally extremely weak in the 4th quarter of 2008 and 1st quarter of 2009, while equity markets weakened dramatically during the first two months of 2009. The U.S. Federal Reserve also took their official interest rate target down to 0-0.25% in December last year and embarked on a course of

Aberdeen Asia-Pacific Income Fund, Inc.

Report of the Investment Manager (unaudited) (concluded)

unconventional monetary policy, in a further effort to stem the slide in the U.S. economy. Overall many major economies in the developed world had clearly moved into a recession in the latter part of 2008 continuing into 2009.

Against this backdrop of deteriorating global growth, the Asia-Pacific region also experienced dramatic weakness in a variety of growth indicators, particularly in the area of exports and industrial production which weakened dramatically towards the end of 2008 and continued into 2009. As a result, Asian central banks quickly turned from having a tightening bias for official cash rates, largely as a result of the lagged inflation impact of higher oil and energy prices, towards a policy of rapid easing. Expansionary fiscal policy in the form of significant increases in government spending on infrastructure was also a key feature during the period under review.

Despite this quite negative backdrop for global financial markets, and despite a significant decline in global equity markets during the first two months of 2009, there were a number of positive factors that supported the performance of the Fund during the period in review. For example, the Australian dollar increased from around 66.8 U.S. cents to 72.6 U.S. cents during the period under review. Average yields in the Investment Grade Merrill Lynch Asian credit index also declined from around 11.6% to 8.4% with average credit spreads falling from 878 basis points to around 629 basis points over U.S. treasuries. Movements in the high yield market were even more pronounced with average credit spreads narrowing from around 1,235 basis points to around 830 basis points during the same period.

In the Australian fixed income market government bond yields followed the official cash rate lower during the period. Two year bond yields declined from around 4.3% to 3.1% while longer dated 10 year government yields declined from 5.2% to 4.6%. The Reserve Bank of Australia (RBA) also continued to reduce official interest rates from 6% to 3% as signs of weaker growth and falling inflationary pressures unfolded over the past six months.

In contrast, local Asian government bond markets experienced mixed fortunes throughout the period. For example, countries such as Indonesia and the Philippines, which had experienced significant weakness during September and October of last year, witnessed a substantial decline in bond yields during the period. However, yields in longer dated bond markets in countries such as Hong Kong, Thailand and Malaysia declined in yield during the beginning of the period but increased over January and February. Rising yield levels in longer dated U.S. government bond yields and / or substantial increases in local government bond issuance were largely behind the increases in yields in these markets. Similarly, Asian currencies were generally weaker against the U.S. dollar between December and late February before recovering strongly towards the end of April 2009.

Looking ahead across the various markets in which the Fund invests, in Australia while our base case remains that the official cash rate is expected to fall to 2.5% over the current cycle, it is clear that the RBA is close to the end of this easing cycle. It is more likely that global developments will determine whether the RBA moves cash rates or whether 3% will mark the low point in this cycle. In the interim period longer dated Australian government bond yields are likely to continue to take their lead from the U.S. treasury market. In the Asian USD credit markets, we remain cautiously constructive on the outlook for the Asian credit market and believe there are selective investment opportunities amid a somewhat mixed macroeconomic outlook in the year ahead. Credit spreads have narrowed from the peaks witnessed in October and November last year. However, with historically low interest rates on risk free assets and spreads still quite wide, we expect that a selective approach to Asian credit will continue to provide positive returns for the remainder of 2009.

For Asian currencies, in the near term the risk environment will dictate performance with the key risk again being a stalling in the current rally and return to risk aversion. Longer term however, the recent crisis has highlighted the relative fundamental strength of Asian economies and key risks particularly with respect to the U.S. economy, making the continued structural undervaluation of Asian currencies even more notable. On a longer term basis, we feel that the Asian economies remain fundamentally strong and are encouraged that they are not marred by structural obstacles such as an over extended banking system burdened by loss-making derivative and asset backed securities. We expect Asian economic growth to turn positive by the second half of 2009 as the efforts of government stimulus packages start to bring about results.

There are some risks of resurging inflation moving into next year but for the next two quarters inflation should remain on a downtrend with some regions like Thailand and China continuing to see negative headline inflation. This creates a positive macro backdrop for the Asian bond markets. The main risks to bond market performance stem from supply, which has lessened in the last couple of months, but remains an issue, particularly with respect to Malaysia, India and potentially Thailand, if the volatile political scene eventually stabilizes and leads to increased government spending on infrastructure.

Aberdeen Asia-Pacific Income Fund, Inc.

Portfolio Composition (unaudited)

Quality of Investments

As of April 30, 2009, 71.3% of the Fund's total investments were invested in securities where either the issue or the issuer was rated A or better by Standard & Poor's Corporation or Moody's Investors Service, Inc. or, if unrated, judged to be of equivalent quality by the Investment Manager. The table below shows the asset quality of the Fund's portfolio as of April 30, 2009, compared with the previous six and twelve months:

	AAA/Aaa %	AA/Aa %	A %	BBB/Baa %	BB/Ba* %	B* %
April 30, 2009	31.0	15.0	25.3	10.7	17.2	0.8
October 31, 2008	38.4	11.6	21.9	10.0	16.7	1.4
April 30, 2008	46.7	6.9	20.2	9.8	15.5	0.9

* Below investment grade

Geographic Composition

The table below shows the geographical composition (i.e., with U.S. dollar denominated bonds issued by foreign issuers allocated into country of issuance) of the Fund's total investments as of April 30, 2009 compared with the previous six and twelve months:

	Australia %	Asia (including NZ) %	United States %
April 30, 2009	48.7	48.1	3.2
October 31, 2008	47.4	48.5	4.1
April 30, 2008	54.8	42.0	3.2

Currency Composition

The table below shows the currency composition of the Fund's total investments as of April 30, 2009, compared with the previous six and twelve months:

Date	Australian Dollar %	Asian Currencies (including NZ dollar) %	US Dollar* %
April 30, 2009	45.2	14.6	40.2
October 31, 2008	44.3	18.1	37.6
April 30, 2008	46.7	12.7	40.6

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

* Includes U.S. dollar denominated bonds issued by foreign issuers: 29.2% on April 30, 2009, 29.4% on October 31, 2008, and 27.5% on April 30, 2008.

Maturity Composition

As of April 30, 2009, the average maturity of the Fund's total investments was 7.2 years, compared with 8.4 years at October 31, 2008. The following table shows the maturity composition of the Fund's investments as of April 30, 2009, compared with the previous six and twelve months:

Date	Under 3 Years %	3 to 5 Years %	5 to 10 Years %	10 Years & Over %
April 30, 2009	27.8	27.1	34.6	10.5
October 31, 2008	26.8	24.3	34.4	14.5
April 30, 2008	34.7	21.6	32.2	11.5

Indicates a variable rate security. The maturity date presented for these instruments is the later of the next date on which the security can be redeemed at par or the next date on which the rate of interest is adjusted. The interest rate shown reflects the rate in effect at April 30, 2009.

- (b) The date presented for these instruments represents the next call/put date.
- (c) Security acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2009, the aggregate market value of these securities amounted to \$269,704,466 or 18.98% of net assets applicable to common shareholders.

Asset coverage per \$1,000 on revolving credit facility at year end				
Asset coverage ratio on preferred stock at year end	409%	385%	379%	384%
Asset coverage per share on preferred stock at year end	\$102,227	\$96,334	\$94,819	\$95,852

- (1) Based upon average shares outstanding.
- (2) Total investment return is calculated assuming a purchase of common stock on the first day and a sale on the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment return does not reflect brokerage commissions.
- (3) Ratios calculated on the basis of income, expenses and preferred share dividends applicable to both the common and preferred shares relative to the average net assets of common shareholders. Ratios of net investment income before preferred stock dividends to average net assets of common shareholders are 6.22%, 6.44%, 6.65%, 6.35%, 6.16%, and 5.74%, respectively.
- (4) Includes expenses of both preferred and common stock.
- (5) Annualized.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited)

Aberdeen Asia-Pacific Income Fund, Inc. (the Fund) was incorporated in Maryland on March 14, 1986 as a closed-end, non-diversified management investment company. The Fund's investment objective is to seek current income. The Fund may also achieve incidental capital appreciation. The Fund will seek to achieve its investment objective through investment in Australian and Asian debt securities. In order to comply with a rule adopted by the Securities and Exchange Commission under the 1940 Act regarding fund names, the Board of Directors has adopted an investment policy that, for as long as the name of the Fund remains Aberdeen Asia-Pacific Income Fund, Inc., it shall be the policy of the Fund normally to invest at least 80% of its net assets plus the amount of any borrowings for investment purposes, in Asian debt securities, Australian debt securities and New Zealand debt securities. This 80% investment policy is a non-fundamental policy of the Fund and may be changed by the Board of Directors upon 60 days prior written notice to shareholders. There can be no assurance that the Fund will achieve its objectives. The ability of issuers of debt securities held by the Fund to meet their obligations may be affected by economic developments in a specific industry, country or region.

1. Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Basis of Presentation:

The financial statements of the Fund are prepared in accordance with accounting principles generally accepted in the United States of America, using the United States dollar as both the functional and reporting currency. However, the Australian dollar is the functional currency for Federal tax purposes.

Securities Valuation:

The Fund's Board of Directors has adopted Valuation and Liquidity Procedures (the Procedures) to be used in determining the value of the assets held by the Fund. These Procedures were revised and approved by the Board of Directors on December 9, 2008. In accordance with the Procedures, investments are stated at current fair value. Investments for which market quotations are readily available are valued at the last quoted closing price on the date of determination as obtained from a pricing source. If no such trade price is available, such investments are valued at the last quoted bid price, as obtained from a pricing agent or broker selected by the Fund's Manager.

Short-term debt securities which mature in more than 60 days are valued as described above. Short-term debt securities of sufficient credit quality which mature in 60 days or less are valued at amortized cost using a pricing source quote that approximates amortized cost.

Securities for which market quotations are not readily available (including investments which are subject to limitations as to their sale) are to be valued at fair value. As a general rule, whether or not the Fund is required to fair value price an asset is dependent on the ready availability of current market quotes or, even if readily available, the reliability of such quotes. Any assets for which

Edgar Filing: ABERDEEN ASIA-PACIFIC INCOME FUND INC - Form N-CSRS

market quotations are not readily available or for which available prices are not reliable, shall be determined in a manner that most fairly reflects the asset's (or group of assets) fair value (i.e., the amount that the Fund might reasonably expect to receive for the asset upon its current sale) on the valuation date, based on a consideration of all available information.

The Procedures provide that in certain instances, including without limitation, if there is a stale price for a portfolio security, in an emergency situation, or if a significant event occurs after the close of trading of a portfolio security, but before the calculation of the Fund's net asset value, the security may be valued at its fair value.

In 2009, the Fund commenced complying with Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157), effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. FAS 157 establishes a single authoritative definition of fair value, establishes a framework for measuring fair value and expands disclosure requirements for fair value measurements. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 establishes a three-tier hierarchy to classify fair value measurements for disclosure purposes. The three broad levels of the hierarchy are listed below.

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value each of the Fund's investments as of April 30, 2009.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

Valuation Inputs	Investments in Securities	Other Financial Instruments*	
		Assets	Liabilities
Level 1	\$	\$	\$ 229,252
Level 2	1,882,465,160	2,367,382	4,654,648
Level 3			
Total	\$ 1,882,465,160	\$ 2,367,382	\$ 4,883,900

* Other financial instruments include futures contracts, forward foreign currency exchange contracts and interest rate swaps.

In April 2009, the FASB issued FASB Staff Position No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly* (FSP 157-4). FSP 157-4 provides additional guidance for estimating fair value in accordance with FAS 157, when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. Management is currently evaluating the impact the adoption of FSP 157-4 will have on the Fund's financial statement disclosures.

Repurchase Agreements:

In connection with transactions in repurchase agreements with U.S. financial institutions, it is the Fund's policy that its custodian/counterparty segregates the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest.

To the extent that any repurchase transaction exceeds one business day, the collateral is valued on a daily basis to determine its adequacy. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Foreign Currency Translation:

Foreign currency amounts are translated into United States dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the exchange rates at the end of the reporting period;
- (ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

The Fund isolates that portion of the results of operations arising from changes in the foreign exchange rates due to fluctuations in the market prices of the securities held at the end of the reporting period. Similarly, the Fund isolates the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the reporting period.

Net realized foreign exchange gains/(losses) include realized foreign exchange gains/(losses) from sales and maturities of portfolio securities, sales of foreign currencies, currency gains/(losses) realized between the trade and settlement dates on securities transactions, the difference between the amounts of interest, discount and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized foreign exchange appreciation/(depreciation) include changes in the value of portfolio securities and other assets and liabilities arising as a result of changes in the exchange rate.

Accumulated net realized and unrealized foreign exchange gains/(losses) shown in the composition of net assets represent foreign exchange gains/(losses) for book purposes that may not have been recognized for tax purposes.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the U.S. dollar.

Securities Transactions and Investment Income:

Securities transactions are recorded on the trade date. Realized and unrealized gains/(losses) from security and currency transactions are calculated on the identified cost basis. Interest income is recorded on an accrual basis. Discounts and premiums on securities purchased are accreted or amortized on an effective yield basis over the estimated lives of the respective securities. Expenses are recorded on the accrual basis.

Derivative Financial Instruments:

The Fund is authorized to use derivatives to manage both currency and interest rate risk for global debt securities. Losses may arise due to changes in the value of the contract if the counterparty does not perform under the contract. The use of derivative instruments involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statement of Assets and Liabilities.

Interest Rate and Currency Swaps:

The Fund may engage in certain swap transactions in order to obtain a desired return at a lower cost than if the Fund had invested directly in the asset that yielded the desired return or to hedge the leverage facility.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

An interest rate swap is an agreement between two parties which involves the exchange of floating and fixed rate payments (an interest rate and currency swap involves the exchange of interest rate payments in another currency) for a specified period of time. Interest rate and currency swaps involve the accrual and exchange of payments between the parties. These payments are recorded as realized gain/(loss).

During the term of the swap, changes in the value of the swap are recognized as unrealized appreciation or depreciation by marking-to-market to reflect the fair market value of the swap. When the swap is terminated, the Fund will record a realized gain/(loss) equal to the difference, if any, between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. The Fund is exposed to credit risk in the event of non-performance by the counterparty to the swap. However, the Fund does not anticipate non-performance by any counterparty.

Notional amounts of swaps are used to express the extent of involvement in these transactions, although the risk of loss may exceed amounts recognized in the Statement of Assets and Liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms and the possible lack of liquidity with respect to the contracts.

Forward Foreign Currency Exchange Contracts:

A forward foreign currency exchange contract (Forward Contract) involves an obligation to purchase and sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. The Forward Contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized appreciation or depreciation. When the Forward Contract is closed, the Fund records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. Risks arise from unanticipated movements in the value of the foreign currency relative to the functional currencies and from potential inability of counterparties to meet the terms of their contracts. The Fund is subject to off balance sheet risk to the extent of the value of the contracts for purchases of foreign currency and in an unlimited amount for sales of foreign currency.

Futures Contracts:

A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized appreciation or depreciation. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Use of long futures contracts subjects the Fund to the risk of loss in excess of the amounts on the Statement of Assets and Liabilities up to the notional value of the futures contracts. Use of short futures subjects the Fund to unlimited risk of loss.

Distributions:

It is the Fund's current policy to pay distributions from net investment income supplemented by net realized foreign exchange gains, net realized short-term capital gains and return of capital distributions if necessary, on a monthly basis. The Fund will also declare and pay distributions at least annually from net realized gains on investment transactions and net realized foreign

exchange gains, if any. Distributions to common shareholders are recorded on the ex-dividend date.

Income distributions and capital and currency gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are primarily due to differing treatments for foreign currencies, loss deferrals and recognition of market discount and premium.

Recent Accounting Pronouncements:

In March 2008, Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (FAS 161) was issued and is effective for fiscal years and interim periods beginning after November 15, 2008. FAS 161 is intended to improve financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position. Management is currently evaluating the implications of FAS 161. The impact on the Fund's financial statement disclosures, if any, is currently being assessed.

Taxes:

For Federal income and excise tax purposes, substantially all of the Fund's transactions are accounted for using the Australian dollar as the functional currency. Accordingly, only realized currency gains/(losses) resulting from the repatriation of Australian dollars into U.S. dollars and realized currency gains and losses on non-functional currencies are recognized for U.S. tax purposes.

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

No provision has been made for U.S. Federal income taxes because it is the Fund's policy to meet the requirements of the U.S. Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders.

Management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Since tax authorities can examine previously filed tax returns, the Fund's tax returns for each of the four years in the period ended October 31, 2008 are subject to such review.

Cash Flow Information:

The Fund invests in securities and distributes dividends from net investment income and net realized gains on investment and currency transactions which are paid in cash or are reinvested at the discretion of shareholders. These activities are reported in the Statements of Changes in Net Assets Applicable to Common Shareholders and additional information on cash receipts and cash payments is presented in the Statement of Cash Flows. Cash includes domestic and foreign currency but does not include cash at brokers in segregated accounts for financial futures contracts because it is designated as collateral.

Use of Estimates:

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

Concentration Risk Disclosure:

The Fund may have elements of risk not typically associated with investments in the United States of America due to concentrated investments in a limited number of countries or regions. Such concentrations may subject the Fund to additional risks resulting from political or economic conditions in such countries or regions and the possible imposition of adverse governmental laws or currency exchange restrictions could cause the securities and their markets to be less liquid and their prices to be more volatile than those of comparable U.S. securities.

2. Agreements

Aberdeen Asset Management Asia Limited (the Investment Manager) serves as investment manager to the Fund and Aberdeen Asset Management Limited (the Investment Adviser) serves as investment adviser to the Fund, pursuant to a management agreement and an advisory agreement, respectively. The Investment Adviser is an indirect wholly-owned subsidiary of the Investment Manager, which is a direct wholly-owned subsidiary of Aberdeen Asset Management PLC.

The Investment Manager makes investment decisions on behalf of the Fund on the basis of recommendations and information furnished to it by the Investment Adviser, including the selection of and the placement of orders with brokers and dealers to execute portfolio transactions on behalf of the Fund.

The management agreement provides the Investment Manager with a fee, payable monthly, at the following annual rates: 0.65% of the Fund's average weekly Managed Assets up to \$200 million, 0.60% of such assets between \$200 million and \$500 million, 0.55% of such assets between \$500 million and \$900 million, 0.50% of such assets between \$900 million and \$1.75 billion and 0.45% of such assets in excess of \$1.75 billion. Managed Assets are defined in the management agreement to mean total assets of the Fund, including any form of investment leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility or the issuance of debt securities), (ii) the issuance of preferred stock or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies, and/or (iv) any other means.

At the Annual Meeting of Shareholders held on March 6, 2009, and reconvened on April 3, 2009, Shareholders approved a Sub-Advisory Agreement among the Fund, the Investment Manager and Aberdeen Asset Management Investment Services Limited (the Sub-Advisory Agreement). The Sub-Advisory Agreement provides that Aberdeen Asset Management Investment Services Limited (AAMISL or the Sub-Adviser) will manage that portion of all of the assets of the Fund that the Investment Manager allocates to it.

As compensation for its services under the Sub-Advisory Agreement, AAMISL will receive an annual fee paid by the Investment Manager in the amount of \$100,000, to be paid in monthly increments.

The Investment Manager pays fees to the Investment Adviser for its services rendered. The Investment Manager informed the Fund that it paid \$969,417 to the Investment Adviser during the six months ended April 30, 2009.

Aberdeen Asset Management Inc. (AAMI), an affiliate of the Investment Manager and the Investment Adviser, is the Fund's Administrator, pursuant to an agreement under which AAMI receives a fee, payable monthly, at an annual rate of 0.15% of the Fund's

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (continued)

average weekly Managed Assets up to \$600 million and 0.125% of the Fund's average weekly Managed Assets in excess of \$600 million.

Under terms of an Investor Relations Services Agreement, AAMI serves as the Fund's investor relations services provider. This agreement provides AAMI with a monthly retainer fee of \$10,000 plus out-of-pocket expenses. During the six months ended April 30, 2009, the Fund incurred fees of \$58,800 for the investor relations services of AAMI. Investor relations fees and expenses in the Statement of Operations include certain out-of-pocket expenses.

3. Portfolio Securities

Purchases and sales of investment securities, other than short-term investments, for the six months ended April 30, 2009 aggregated \$575,918,402 and \$559,650,016, respectively.

4. Common Stock

There are 400 million shares of \$0.01 par value common stock authorized. At April 30, 2009, there were 260,975,744 common shares issued and outstanding.

On March 1, 2001, the Board of Directors approved a stock repurchase program. The Board of Directors amended the program on December 12, 2007. The stock repurchase program allows the Fund to repurchase up to 10% of its outstanding common stock in the open market during any 12-month period, if and when the discount to NAV is at least 8%. For the six months ended April 30, 2009, the Fund repurchased 753,400 shares through this program. The weighted average discount on shares repurchased by the Fund was 19.1% during the six months ended April 30, 2009.

5. Revolving Credit Facility

The Fund has entered into a \$600 million loan facility with a syndicate of major financial institutions led by The Bank of Nova Scotia. On April 21, 2008, there was an initial draw of \$325 million and subsequent draws of \$100 million on April 24, 2008 and May 2, 2008, and a final draw of \$75 million on May 12, 2008. For the fiscal year ended October 31, 2008, the average interest rate on the loan facility was 3.53% and the average balance of the loan facility was \$581,871,795. For the six months ended April 30, 2009, the average interest rate on the loan facility was 1.92% and the average balance of the loan facility was \$491,988,950. The interest expense is accrued on a daily basis and is payable to The Bank of Nova Scotia on a monthly basis. On October 24, 2008, the Fund paid down \$15 million on the balance on the loan, on October 27, 2008, the Fund paid down \$25 million on the balance of the loan and on October 31, the Fund paid down \$40 million on the balance of the loan bringing the total balance of the loan outstanding at October 31, 2008, to \$520 million. On November 3, 2008, the Fund paid down an additional \$30 million. On April 21, 2009, the Fund made a drawdown of \$30 million on the facility bringing the total balance of the loan outstanding to \$520 million at April 30, 2009.

The amounts borrowed from the line of credit may be invested at higher rates than the rates in the Fund's portfolio. However, the cost of leverage could exceed the income earned by the Fund on the proceeds of such leverage. To the extent that the Fund is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the

leverage, the yield on the Fund's common stock will decrease. In addition, in the event of a general market decline in the value of assets in which the Fund invests, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage.

The Fund's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the loan facility may constitute a substantial lien and burden by reason of their prior claim against the income of the Fund and against the net assets of the Fund in liquidation. The Fund is not permitted to declare dividends or other distributions in the event of default under the loan facility. In the event of a default under the credit agreement, the lenders have the right to cause a liquidation of the collateral (i.e., sell portfolio securities and other assets of the Fund) and, if any such default is not cured, the lenders may be able to control the liquidation as well. The loan facility has a term of 364 days and is not a perpetual form of leverage; there can be no assurance that the loan facility will be available for renewal on acceptable terms, if at all. The loan facility was renewed for another 364 day term on April 15, 2009. Bank loan fees and expenses included in the Statement of Operations include fees for the renewal of the loan facility as well commitment fees for any portion of the loan facility not drawn upon at any time during the period.

The credit agreement governing the loan facility includes usual and customary covenants for this type of transaction. These covenants impose on the Fund asset coverage requirements, fund composition requirements and limits on certain investments, such as illiquid investments, which are more stringent than those imposed on the Fund by the 1940 Act. The covenants or guidelines could impede the Investment Manager or Investment Adviser from fully managing the Fund's portfolio in accordance with the Fund's investment objective and policies. Furthermore, non-compliance with such covenants or the occurrence of other events could lead to the cancellation of the loan facility.

The Fund's Investment Management Agreement and Investment Advisory Agreement, under which management and advisory fees are

Aberdeen Asia-Pacific Income Fund, Inc.

Notes to Financial Statements (unaudited) (concluded)

paid to the Investment Manager and Investment Adviser, are based on the Fund's assets applicable to shares of common and preferred stock, have been reformed in order to reflect the implementation of the loan facility and the completion of the AMPS redemption. Because the Fund no longer uses preferred stock (i.e. the AMPS) for leverage, the Fund, the Investment Manager and Investment Adviser have agreed to reform the Investment Management Agreement and Investment Advisory Agreement to reflect the parties' intention that the investment management fee be paid based on the Fund's Managed Assets (including assets attributable to any form of investment leverage). For purposes of this calculation, Managed Assets of the Fund means total assets of the Fund, including any form of investment leverage, minus all accrued expenses incurred in the normal course of operations, but not excluding any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility or the issuance of debt securities), (ii) the issuance of preferred stock or other similar preference securities, (iii) the reinvestment of collateral received for securities loaned in accordance with the Fund's investment objectives and policies, and/or (iv) any other means.

6. Subsequent Events

Subsequent to April 30, 2009, the Fund declared a monthly distribution of 3.5 cents per share payable on June 12, 2009 and July 10, 2009 to common shareholders of record as of May 29, 2009 and June 30, 2009, respectively.

7. Change in Independent Registered Public Accounting Firm

PricewaterhouseCoopers LLP (PwC), 300 Madison Avenue, New York, New York 10017, an independent registered public accounting firm, was the independent registered public accounting firm for the Fund for the fiscal year ended October 31, 2008. At the meetings held on June 9, 2009, the Audit Committee and the Board of Directors engaged KPMG LLP to replace PwC as the independent registered public accounting firm for the Fund.

The reports of the financial statements, previously issued by PwC for the Fund for each of the two most recent fiscal years ended October 31, did not contain an adverse opinion or disclaimer of opinion, and were not qualified or modified as to uncertainty, audit scope or accounting principles. For the past two most recent fiscal years and through the date of the auditor change, there were no disagreements between the Fund and PwC on any matters of accounting principles or practices, financial statement disclosures, auditing scope or procedures, or any other matter which, if not resolved to the satisfaction of PwC, would have caused PwC to make reference to the subject matter of the disagreements in connection with the issuance of PwC's reports on the financial statements of such periods.

Aberdeen Asia-Pacific Income Fund, Inc.

Supplemental Information (unaudited)

Results of Annual Meeting of Shareholders

The Annual Meeting of Shareholders was held on Friday, March 6, 2009 at 1735 Market Street, Philadelphia, Pennsylvania. The description of the proposals and number of shares voted at the meeting are as follows:

1. To elect three directors to serve as Class III directors for three year terms and until their successors are duly elected and qualify:

	Votes For	Votes Withheld
Martin Gilbert	157,996,405	15,551,102
Brian M. Sherman	158,336,171	15,211,336
William J. Potter	158,175,476	15,372,031

Total	753,400	4.097	753,400	

¹ The Registrant's stock repurchase program was announced on March 19, 2001 and further amended by the Registrant's Board of Directors on December 12, 2007. Under the terms of the current program, the Registrant is permitted to repurchase up to 10% of its outstanding shares of common stock, par value \$.01 per share, on the open market during any 12 month period if and when the discount to net asset value is at least 8%.

Item 10 Submission of Matters to a Vote of Security Holders.

In December 2008, the Registrant's Board of Directors adopted amendments to the Registrant's Amended and Restated Bylaws dated as of December 12, 2007 (Bylaws) pertaining to certain corporate governance matters. Many of these amendments reflect recent changes to the Maryland general corporation law; other amendments were also approved to conform the Bylaws to those of the other closed-end funds managed by the Investment Manager. The amended Bylaws include:

Updates to the procedures required for shareholders to call a special meeting of shareholders, including provisions that (a) clarify which shareholders may call a special meeting; (b) establish procedures to fix a record date; (c) establish procedures to set the date, time and place of special shareholders' meetings; (d) address revocation of requests for special shareholders' meetings; and (e) allow for verification of the validity of a shareholder request for a special meeting.

Enhancements to the advance notice provisions of the Bylaws. These amendments require shareholders to notify the Secretary of the Registrant of Director nominations and other shareholder proposals to be brought at an annual meeting, beginning with the 2010 annual meeting of shareholders, not earlier than the 150th day and not later than 5:00 p.m., Eastern Time, on the 120th day prior to the first anniversary of the date of the preceding year's proxy statement.

Additionally, the enhanced advanced notice provisions (a) expand the information required to be provided by the shareholder making the proposal or nomination, including information regarding hedging activities and investment strategies of such shareholder and the shareholder's affiliates; and (b) require shareholders to update or correct any previously-submitted information.

Clarification that only those individuals nominated in compliance with the advance notice provisions of the Bylaws are eligible to serve as Directors, and that individuals must meet the substantive qualification requirements at both the time of nomination and at the time of election.

Item 11 Controls and Procedures.

- (a) It is the conclusion of the Registrant's principal executive officer and principal financial officer that the effectiveness of the Registrant's current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the Registrant has been recorded, processed, summarized and reported within the time period specified in the Commission's rules and forms and that the information required to be disclosed by the Registrant has been accumulated and communicated to the Registrant's principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.
- (b) There have been no changes in the Registrant's internal control over financial reporting that occurred during the second fiscal quarter of the period covered by this report that have materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 12 Exhibits.

(a)(1) Not applicable.

(a)(2) Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended.

(a)(3) Not applicable.

(b) Certifications pursuant to Rule 30a-2(b) under the Investment Company Act of 1940, as amended.
