Notes to Condensed Consolidated Financial Statements

(Unaudited; tabular amounts in thousands, except percentages, share and per share amounts)

September 9, 2012

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. For further information, refer to the consolidated financial statements and footnotes for the fiscal year ended January 1, 2012 included in our annual report on Form 10-K.

In the opinion of management, all adjustments, consisting of normal recurring items, considered necessary for a fair presentation have been included. Operating results for the fiscal quarter and three fiscal quarters ended September 9, 2012 are not necessarily indicative of the results that may be expected for the fiscal year ending December 30, 2012.

In June 2011, the Financial Accounting Standards Board issued amended guidance related to the presentation of comprehensive income which requires entities to present net income and other comprehensive income in either a single continuous statement or in two separate, but consecutive, statements of net income and other comprehensive income. The Company adopted the requirements of the new guidance effective March 25, 2012 for all periods presented. The adoption did not impact the Company s financial position and results of operations.

2. Segment Information

The following table summarizes revenues, income from operations and earnings before interest, taxes, depreciation, amortization and other, which is the measure by which management allocates resources to its segments and which we refer to as Segment Income, for each of our reportable segments.

Fiscal Quarters Ended September 9, 2012 and September 11, 2011									
Domestic	Г	Oomestic			Inte	ersegment

7

The following table reconciles Total Segment Income to consolidated income before provision for income taxes.

	Fiscal Qu	arter Ended	Three Fiscal Quarters End			
	September 9, 2012	September 11, 2011	September 9, 2012	September 11, 2011		
Total Segment Income	\$ 70,986	\$ 64,707	\$ 222,492	\$ 207,181		
Depreciation and amortization	(5,412)	(6,010)	(15,852)	(17,078)		
Gains (losses) on sale/disposal of assets	(61)	819	87	2,455		
Non-cash compensation expense	(3,895)	(3,347)	(12,183)	(9,231)		
Expenses related to sale of Company-owned stores		(315)		(315)		
2012 recapitalization-related expenses			(252)			
Income from operations	61,618	55,854	194,292	183,012		
Interest income	34	60	240	213		
Interest expense	(20,683)	(20,984)	(73,651)	(63,485)		
Income before provision for income taxes	\$ 40,969	\$ 34,930	\$ 120,881	\$ 119,740		

3. Earnings Per Share

		Fiscal Qua	arter End	led	Three Fiscal Quarters Ended					
	September 9, 2012		September 11, 2011		September 9, 2012			ember 11, 2011		
Net income available to common										
stockholders basic and diluted	\$	25,976	\$	22,091	\$	74,814	\$	74,450		
Basic weighted average number of shares	50	56,082,516		59,172,788		56,588,382		59,670,550		
Earnings per share basic	\$	0.46	\$	0.37	\$	1.32	\$	1.25		
Diluted weighted average number of shares	Diluted weighted average number of shares 58,51		8,519,573 61,833,635		59	,240,919	62	2,577,561		
Earnings per share diluted	\$	0.44	\$	0.36	\$	1.26	\$	1.19		

The denominator used in calculating diluted earnings per share for common stock for the third quarter and three fiscal quarters of 2012 does not include 206,780 options to purchase common stock for each period, as the effect of including these options would have been anti-dilutive. The denominator used in calculating diluted earnings per share for common stock for the third quarter of 2011 does not include 105,000 options to purchase common stock or 394,070 options to purchase common stock for the three fiscal quarters of 2011, as the effect of including these options would have been anti-dilutive.

4. Stockholders Deficit

The following table summarizes changes in Stockholders Deficit for the three fiscal quarters of 2012.

Balance at September 9, 2012	56,846,578	\$ 568	\$ 911	\$ (1,344,585)	\$ (2,425)

5. Open Market Share Repurchase Program

During the third quarter and three fiscal quarters of 2012, the Company repurchased and retired 189,718 and 1,336,215 shares of common stock for a total of approximately \$5.9 million and \$42.7 million, respectively, under the Company s open market share repurchase program. In July 2012, the Board of Directors approved an increase to the Company s open market share repurchase program, which at the time of the approval, resulted in a total remaining authorized amount for additional share repurchases of \$200.0 million. As of September 9, 2012, the Company had approximately \$197.9 million remaining for future share repurchases under its open market share repurchase program. As of September 9, 2012, the Company had 56,846,578 shares of common stock outstanding. Subsequent to the third quarter of 2012, the Company repurchased and retired an additional 106,573 shares of common stock for a total cost of approximately \$3.7 million.

During the third quarter of 2011, the Company repurchased and retired 3,163,060 shares of common stock for a total of approximately \$81.9 million, and during the three fiscal quarters of 2011, the Company repurchased and retired 5,268,550 shares of common stock for \$129.2 million.

6. Sale of Certain Company-Owned Stores

During the three fiscal quarters of 2012, the Company sold its six remaining Company-owned stores in a certain market to a franchisee. In connection with the sale of these six stores, the Company recorded a minimal pre-tax gain on the sale of the related assets, which was net of a minimal reduction in goodwill. The gain was recorded in general and administrative expense in the Company s condensed consolidated statements of income. This transaction will not have a material ongoing impact on the Company s consolidated financial results.

During the third quarter of 2011, the Company sold 30 Company-owned stores to multiple franchisees; and during the three fiscal quarters of 2011, the Company sold 56 Company-owned stores to multiple franchisees. In connection with the sale of these stores, the Company recognized a gain on the sale of assets of approximately \$0.8 million during the third quarter of 2011, which was net of a reduction in goodwill of approximately \$0.3 million; and recognized a gain of approximately \$1.9 million during the three fiscal quarters of 2011, which was net of a reduction in goodwill of approximately \$0.7 million. Additionally, the Company incurred other related expenses of approximately \$0.3 million during both the third quarter of 2011 and the three fiscal quarters of 2011. These items were recorded in general and administrative expense in the Company s condensed consolidated statements of income. These transactions will not have a material ongoing impact on the Company s consolidated financial results.

7. Income Taxes

During the third quarter of 2012, the Company recorded a tax benefit of approximately \$0.7 million to reflect an increased tax basis for certain Company assets due to the issuance of final tax regulations during the quarter. Additionally, during the three fiscal quarters of 2012 and in connection with the sale of its six remaining Company-owned stores in a certain market to a franchisee, the Company recorded a deferred tax asset related to the capital loss that resulted from the write-off of the tax basis goodwill associated with the market that was sold. Management believes it is more likely than not that a portion of the deferred tax asset will not be realized and provided a valuation allowance of approximately \$0.9 million. The valuation allowance was recorded as an increase to the provision for income taxes and increased the Company s effective tax rate in the three fiscal quarters of 2012. On an ongoing basis, management will assess whether it remains more likely than not that the net deferred tax asset will be realized.

During the three fiscal quarters of 2011, the Company reduced its liability for unrecognized tax benefits related to a state income tax matter by approximately \$0.5 million. Approximately \$0.3 million of the decrease was related to gross unrecognized tax benefits and approximately \$0.2 million was related to interest. As a result, approximately \$0.2 million was recognized as an income tax benefit and reduced the Company s effective tax rate in the three fiscal quarters of 2011. The effective tax rate for the third quarter and three fiscal quarters of 2011 was positively impacted by higher wage related credits in 2011.

8. Recapitalization

On March 16, 2012, the Company announced it had completed a recapitalization (the 2012 Recapitalization) in which certain of the Company s subsidiaries replaced its outstanding 2007 fixed rate notes and variable funding notes (the 2007 Notes) with new notes (the Notes) issued pursuant to an asset-backed securitization. The Notes consist of \$1.575 billion of Series 2012-1 5.216% Fixed Rate Senior Secured Notes, Class A-2 (the Fixed Rate Notes) and \$100 million of Series 2012-1 Variable Funding Senior Secured Notes, Class A-1 (the Variable Funding Notes). The Notes were issued in a private placement transaction by indirect, bankruptcy-remote subsidiaries that hold substantially all of the Company s revenue-generating assets, excluding Company-owned stores. The Notes are guaranteed by certain subsidiaries of the Company and secured by a security interest in substantially all of the assets of the Company, including royalty income from all domestic stores, domestic supply chain income, international income and intellectual property. The Fixed Rate Notes have an anticipated maturity of seven years and a legal maturity of 30 years. If the Fixed Rate Notes are not repaid in full by the anticipated repayment date, substantially all the cash generated by the Company less a specific amount allocated to the Company as a management fee must be used to pay down outstanding principal and interest that may be higher at that time. The Variable Funding Notes have an anticipated maturity of five years, with the option for up to two one-year renewals (subject to certain conditions, including a minimum debt service coverage ratio), and a legal maturity of 30 years. In addition, the Company may voluntarily prepay, in part or in full, the Fixed Rate Notes at any time, subject to certain make-whole interest obligations. The Variable Funding Notes were undrawn on the closing date.

The Fixed Rate Notes have scheduled principal payments of \$17.7 million in 2012, \$23.6 million in each of 2013 and 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During the three fiscal quarters of 2012, the Company made principal payments of approximately \$11.8 million. If the Company meets certain conditions, including a maximum leverage ratio of 4.5x total debt to EBITDA, it may elect to not make the scheduled principal payments. If the leverage ratio subsequently exceeds 4.5x, it must make up the payments it had elected not to make.

The Notes are subject to certain financial and non-financial covenants, including a debt service coverage calculation, as defined in the related agreements. The covenants, among other things, limit the ability of certain of the Company s subsidiaries to declare dividends, make loans or advances or enter into transactions with affiliates. The Notes also include a financial covenant based on the achievement of a minimum amount of global retail sales. In the event that certain covenants are not met, the Notes may become due and payable on an accelerated schedule. As of September 9, 2012 the Company was in compliance with all debt covenants.

The Company used a portion of the proceeds from the 2012 Recapitalization to repay approximately \$1.447 billion in outstanding principal under the 2007 Notes. The proceeds were also used to pay accrued interest on the 2007 Notes and transaction-related fees and expenses in connection with the 2012 Recapitalization and to fund a reserve account for the payment of interest on the Notes.

On March 16, 2012, the Company s Board of Directors declared a \$3.00 per share special cash dividend on its outstanding common stock totaling \$171.1 million, which was paid on April 2, 2012 to stockholders of record at the close of business on March 26, 2012. Additionally, pursuant to the anti-dilution provisions in the Company s underlying stock option plans, on April 2, 2012, the Company made a corresponding cash payment of approximately \$13.5 million on certain stock options, reduced the exercise price on certain other stock options by an equivalent per share amount and, in certain circumstances, both reduced the stock option exercise price and made a cash payment for amounts totaling \$3.00 per share. On April 2, 2012, the Company also accrued an estimated \$2.4 million for payments to be made as certain performance-based restricted stock grants vest. The dividend and related dividend equivalent payments were funded with the remaining proceeds from the 2012 Recapitalization and cash on hand. These anti-dilution payments were accounted for as modifications/settlements and were recorded as increases in total stockholders—deficit. As of September 9, 2012, total cash paid for common stock dividends and related anti-dilution equivalent payments was approximately \$185.5 million and the total estimated liability recorded for future cash payments on certain performance-based restricted stock was approximately \$1.5 million. Of the total amount of \$187.0 million recorded for common stock dividends and related anti-dilution payments, \$10.2 million was recorded as a reduction of additional paid-in capital and \$176.8 million was recorded as an increase in retained deficit.

10

During the three fiscal quarters of 2012 and in connection with the 2012 Recapitalization, the Company incurred approximately \$10.5 million of net expenses. This consisted primarily of \$8.1 million of net write-offs of deferred financing fees and interest rate swap related to the extinguished debt. The Company also incurred \$2.1 million of interest expense on the 2007 borrowings subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 borrowings, resulting in the payment of interest on both the 2007 and 2012 facilities for a short period of time. Further, the Company incurred \$0.3 million of other net 2012 Recapitalization-related general and administrative expenses, including stock compensation expenses, payroll taxes related to the payments made to certain stock option holders and legal and professional fees incurred in connection with the 2012 Recapitalization.

In connection with the 2012 Recapitalization, the Company recorded an additional \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet during the three fiscal quarters of 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012, is expected to be amortized into interest expense over each of the next seven years.

9. Fair Value Measurements

Fair value measurements enable the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The Company classifies and discloses assets and liabilities carried at fair value in one of the following three categories:

- Level 1: Quoted market prices in active markets for identical assets or liabilities.
- Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.
- Level 3: Unobservable inputs that are not corroborated by market data.

The fair values of the Company s cash equivalents and investments in marketable securities are based on quoted prices in active markets for identical assets. The following tables summarize the carrying amounts and fair values of certain assets at September 9, 2012 and January 1, 2012:

		At September 9, 2012				
		Fair Value Estimated Using				
	Carrying	Level 1	Level 2	Level 3		
	Amount	Inputs	Inputs	Inputs		
Cash equivalents	\$ 27,536	\$ 27,536	\$	\$		
Restricted cash equivalents	51,034	51,034				
Investments in marketable securities	1,968	1,968				

		At January 1, 2012 Fair Value Estimated Using				
	Carrying Amount	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs		
Cash equivalents	\$ 41,699	\$ 41,699	\$	\$		
Restricted cash equivalents	34,117	34,117				
Investments in marketable securities	1,538	1,538				

At September 9, 2012, management estimates that the approximately \$1.563 billion in principal amount of outstanding Fixed Rate Notes had a fair value of approximately \$1.699 billion, and at January 1, 2012 the approximately \$1.311 billion in principal amount of senior fixed rate notes had a fair value of approximately \$1.316 billion. Additionally, the \$76.1 million in principal amount of subordinated fixed rate notes had a fair value of approximately \$76.3 million at January 1, 2012. The fixed rate notes are classified as a Level 2 measurement, as the Company estimated the fair value amount by using available market information. The Company obtained broker quotes from two separate brokerage firms that are knowledgeable about the Company s fixed rate notes and, at times, trade these notes. Further, the Company performs its own internal analysis based on the information it gathers from public markets, including information on notes that are similar to that of the Company. However, considerable judgment is required in interpreting market data to develop estimates of fair value. Accordingly, the fair value estimates presented here are not necessarily indicative of the amount that the Company or the debtholders could realize in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair value.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations.

(Unaudited; tabular amounts in millions, except percentages and store data)

The 2012 third quarter referenced herein represents the twelve-week period ended September 9, 2012, while the 2011 third quarter represents the twelve-week period ended September 11, 2011. The 2012 three fiscal quarters referenced herein represents the thirty-six week period ended September 9, 2012, while the 2011 three fiscal quarters represents the thirty-six week period ended September 11, 2011.

Overview

We are the number one pizza delivery company in the United States based on reported consumer spending, and the second largest pizza company in the world based on number of units. We operate through a primarily franchised network of stores, located in all 50 states and in more than 70 international markets, as well as Company-owned stores, all of which are in the United States. In addition, we operate regional dough manufacturing and supply chain centers in the United States and Canada.

Our financial results are driven largely by retail sales at our franchise and Company-owned stores. Changes in retail sales are driven by changes in same store sales and store counts. We monitor both of these metrics very closely, as they directly impact our revenues and profits, and strive to consistently increase both metrics. Retail sales drive royalty payments from franchisees as well as Company-owned store and supply chain revenues. Retail sales are primarily impacted by the strength of the Domino s Pizza brand, the results of our marketing promotions, our ability to execute our store operating model, the overall global economic environment and the success of our business strategies.

The information below is based on reported consumer spending obtained by The NPD Group s CREST® report from consumer surveys.

From 2001 to 2011, the U.S. quick service restaurant pizza industry in which Domino s Pizza competes has grown from \$29.7 billion to \$32.4 billion. We participate primarily in two segments of this industry, the delivery and carry out segments. During this ten year period, the delivery segment declined from \$11.2 billion in 2001 to \$9.8 billion in 2011. However, the delivery segment has increased slightly over the past three years, going from \$9.7 billion in 2009 to \$9.8 billion in 2011. From 2001 to 2011, the carry out segment grew from \$10.9 billion in 2001 to \$14.3 billion in 2011. Additionally, in the past three years the carry out segment grew from \$13.3 billion in 2009 to \$14.3 billion in 2011. We are the market share leader in the delivery segment and the third largest in carry out, a segment we have been focused on growing.

During the third quarter, we continued to produce steady, consistent results with strong earnings per share growth, a slight increase in domestic order counts and strong cash flows. We also experienced positive same store sales growth both domestically and internationally and our international division continued its strong store growth. Recently, we celebrated the opening of our $10,000^{th}$ store, which is a significant milestone for our global brand. We continue to deliver the products, service and value that are resonating with our consumers and have improved store level profitability for our domestic franchise and Company-owned stores throughout 2012. We believe that our product platforms, combined with our innovative and effective advertising campaigns, continued focus on operational excellence and new technology contributed to the growth in our income from operations during the third quarter and the three fiscal quarters of 2012.

Global retail sales, which are total retail sales at franchise and Company-owned stores worldwide, increased 4.9% in the third quarter of 2012, and increased 5.1% in the three fiscal quarters of 2012. These increases were driven primarily by international and domestic same store sales growth, as well as an increase in our worldwide franchise store counts during the trailing four quarters, offset in part by the negative impact of foreign currency exchange rates. Domestic same store sales growth reflected the sustained positive sales trends and the continued success of our new products and promotions. International same store sales growth reflected continued strong performance in the markets where we compete.

Revenues increased \$1.8 million, up 0.5% in the third quarter of 2012, and decreased \$11.6 million, down 1.0% in the three fiscal quarters of 2012. The increase during the third quarter of 2012 was due primarily to higher international revenues attributable to same store sales and store count growth and higher domestic franchise revenues due to an increase in same store sales. These increases were offset, in part by lower Company-owned store revenues, resulting from the sale of 56 Company-owned stores to multiple franchisees during the three fiscal quarters of 2011, and the negative impact on international revenues of changes in foreign currency exchange rates. The decrease during the three fiscal quarters of 2012 was due primarily to lower Company-owned store revenues, resulting from the sale of 56 Company-owned stores to multiple franchisees during the three fiscal quarters of 2011, lower domestic supply chain revenues resulting from lower volumes and lower overall commodity prices, including cheese, and the negative impact on international revenues of changes in foreign currency exchange rates. These decreases were offset in part by higher international revenues attributable to same store sales and store count growth and higher domestic franchise revenues due to an increase in same store sales and store count growth. These changes in revenues are described in more detail below.

Income from operations increased \$5.7 million, up 10.3% in the third quarter of 2012, and increased \$11.3 million, up 6.2% in the three fiscal quarters of 2012. These increases were driven primarily by higher royalty revenues from both domestic and international franchise stores and higher domestic Company-owned store margins. Additionally, the third quarter benefited by higher domestic supply chain margins as described in more detail below. These increases were offset, in part, by the negative impact of the changes in foreign currency exchange rates and higher general and administrative expenses.

Net income increased \$3.9 million, up 17.6% in the third quarter of 2012, and increased \$0.3 million, up 0.5% in the three fiscal quarters of 2012. These increases were driven by domestic and international same store sales growth, international store growth and higher domestic Company-owned store margins and were negatively impacted by changes in foreign currency exchange rates. The three fiscal quarters of 2012 were negatively impacted by approximately \$10.5 million of net pre-tax expenses incurred in connection with the Company s recapitalization (the 2012 Recapitalization), including the write-offs of deferred financing fees and interest rate swap related to the extinguished debt, interest expense incurred on the 2007 debt subsequent to the closing of the 2012 Recapitalization, and other expenses including stock compensation expenses, payroll taxes related to the dividend equivalent payments made to certain stock option holders and legal and professional fees.

13

Revenues

	Third Qu of 20		Third Quote of 20		Three F		Three Fi Quarters o	
Domestic Company-owned stores	\$ 72.2	19.1%	\$ 76.2	20.3%	\$ 223.7	19.7%	\$ 237.9	20.7%
Domestic franchise	44.0	11.6%	41.6	11.1%	133.5	11.7%	129.0	11.2%
Domestic supply chain	213.5	56.5%	213.1	56.6%	636.9	55.9%	645.2	56.1%
International	48.3	12.8%	45.3	12.0%	144.6	12.7%	138.3	12.0%
Total revenues	\$ 378.1	100.0%	\$ 376.3	100.0%	\$ 1,138.8	100.0%	\$ 1,150.4	100.0%

Revenues primarily consist of retail sales from our Company-owned stores, royalties from our domestic and international franchise stores and sales of food, equipment and supplies from our supply chain centers to substantially all of our domestic franchise stores and certain international franchise stores. Company-owned store and franchise store revenues may vary significantly from period to period due to changes in store count mix, while supply chain revenues may vary significantly as a result of fluctuations in commodity prices, primarily cheese and meats.

Domestic Stores Revenues

	Third Quote of 20		Third Q of 20		Three I Quarters		Three Duarters	
Domestic Company-owned stores	\$ 72.2	62.1%	\$ 76.2	64.7%	\$ 223.7	62.6%	\$ 237.9	64.8%
Domestic franchise	44.0	37.9%	41.6	35.3%	133.5	37.4%	129.0	35.2%
Domestic stores	\$ 116.3	100.0%	\$ 117.9	100.0%	\$ 357.3	100.0%	\$ 366.9	100.0%

Domestic stores revenues decreased \$1.6 million, down 1.4% in the third quarter of 2012, and decreased \$9.6 million, down 2.6% in the three fiscal quarters of 2012. These decreases were due primarily to lower Company-owned store revenues, resulting from the sale of 56 Company-owned stores to multiple franchisees during the three fiscal quarters of 2011, and were offset in part by higher domestic Company-owned and franchise same store sales. These changes in domestic stores revenues are more fully described below.

Domestic Company-Owned Stores Revenues

Revenues from domestic Company-owned store operations decreased \$4.0 million, down 5.3% in the third quarter of 2012, and decreased \$14.2 million, down 5.9% in the three fiscal quarters of 2012. These decreases were due to fewer Company-owned stores being open during 2012, primarily as a result of the sale of 56 Company-owned stores to multiple franchisees during the three fiscal quarters of 2011. These decreases were partially offset by higher same store sales during the third quarter and three fiscal quarters of 2012. Domestic Company-owned same store sales increased 0.5% in the third quarter of 2012, and increased 0.8% in the three fiscal quarters of 2012. This compared to an increase of 4.2% in the third quarter of 2011, and an increase of 2.2% in the three fiscal quarters of 2011.

Domestic Franchise Revenues

Revenues from domestic franchise operations increased \$2.4 million, up 5.7% in the third quarter of 2012, and increased \$4.5 million, up 3.5% in the three fiscal quarters of 2012. These increases were due primarily to higher domestic franchise same store sales and an increase in the average number of domestic franchise stores open during 2012. Domestic franchise same store sales increased 3.6% in the third quarter of 2012, and increased 2.5% in the three fiscal quarters of 2012. This compared to an increase of 2.9% in the third quarter of 2011, and an increase of 2.0% in the three fiscal quarters of 2011.

Domestic Supply Chain Revenues

Revenues from domestic supply chain operations increased \$0.4 million, up 0.2% in the third quarter of 2012, and decreased \$8.3 million, down 1.3% in the three fiscal quarters of 2012. The third quarter of 2012 increase was due primarily to a change in the mix of products sold and an increase in the number of franchise stores in operation. This was offset in part by lower overall commodity prices, including cheese and lower volumes. The decrease during the three fiscal quarters of 2012 was due primarily to lower volumes, a change in the mix of products sold and lower overall commodity prices, including cheese. The published cheese block price-per-pound averaged \$1.71 in the third quarter of 2012, and \$1.58 in the three fiscal quarters of 2012. This was down from \$2.08 and \$1.81 in the comparable periods in 2011. We estimate that these lower cheese block prices resulted in approximately a \$7.1 million decrease in domestic supply chain revenues during the third quarter of 2012, and an \$11.8 million decrease in revenues in the first three quarters of 2012.

International Revenues

	Third Q of 20	-	Third (Quarter 011	Three I Quarters		Three l Quarters	
International royalty and other	\$ 27.0	55.8%	\$ 24.9	55.1%	\$ 80.0	55.3%	\$ 73.6	53.2%
International supply chain	21.3	44.2%	20.4	44.9%	64.6	44.7%	64.7	46.8%
International	\$48.3	100.0%	\$ 45.3	100.0%	\$ 144.6	100.0%	\$ 138.3	100.0%

International revenues primarily consist of royalties from our international franchise stores and international supply chain sales. Revenues from international operations increased \$3.0 million, up 6.7% in the third quarter of 2012, and \$6.3 million, up 4.5% in the three fiscal quarters of 2012. These increases were due primarily to higher international royalty and other revenues offset in part by the negative impact of changes in foreign currency exchange rates, as discussed below.

Revenues from international royalties and other revenues increased \$2.1 million, up 8.1% in the third quarter of 2012, and increased \$6.4 million, up 8.7% in the three fiscal quarters of 2012. These increases were due primarily to higher same store sales and more international stores being open during 2012, offset in part by the negative impact of changes in foreign currency exchange rates of approximately \$1.7 million in the third quarter of 2012, and approximately \$4.1 million in the three fiscal quarters of 2012. On a constant dollar basis (which excludes the impact of foreign currency exchange rates), same store sales increased 5.0% in the third quarter of 2012, and increased 5.1% in the three fiscal quarters of 2012. This compared to an increase of 8.1% in the third quarter of 2011, and 7.9% in the three fiscal quarters of 2011. On a historical dollar basis (which includes the impact of foreign currency exchange rate changes), same store sales decreased 1.1% in the third quarter of 2012, and increased 0.4% in the three fiscal quarters of 2012. This compared to an increase of 16.9% in the third quarter of 2011, and an increase of 15.8% in the three fiscal quarters of 2011. The variance in our same store sales on a constant dollar basis versus a historical dollar basis in 2012 was caused by the stronger dollar when compared to the currencies in the international markets in which we compete.

Revenues from international supply chain operations increased \$0.9 million, up 4.9% in the third quarter of 2012, and decreased \$0.1 million, down 0.2% in the three fiscal quarters of 2012. The increase in the third quarter was due primarily to higher volumes partially offset by the negative impact of foreign currency exchange rates of approximately \$0.5 million. The decrease in the three fiscal quarters was due primarily to the negative impact of the primary foreign currency exchange rate of approximately \$0.8 million.

Cost of Sales / Operating Margin

	Third Q of 20		Third Q of 20		Three F Quarters		Three F Quarters	
Consolidated revenues	\$ 378.1	100.0%	\$ 376.3	100.0%	\$ 1,138.8	100.0%	\$ 1,150.4	100.0%
Consolidated cost of sales	266.7	70.5%	273.0	72.5%	798.1	70.1%	824.8	71.7%
Consolidated operating margin	\$ 111.4	29.5%	\$ 103.4	27.5%	\$ 340.7	29.9%	\$ 325.7	28.3%

Consolidated cost of sales consists primarily of domestic Company-owned store and domestic supply chain costs incurred to generate related revenues. Components of consolidated cost of sales primarily include food, labor and occupancy costs.

The consolidated operating margin, which we define as revenues less cost of sales, increased \$8.0 million, up 7.8% in the third quarter of 2012, and increased \$15.0 million, up 4.6% in the three fiscal quarters of 2012. These increases in the consolidated operating margins were due primarily to higher domestic and international franchise revenues and higher margins at our Company-owned stores. Franchise revenues do not have a cost of sales component and, as such, changes in franchise revenues have a disproportionate effect on the consolidated operating margin.

As a percentage of revenues, the consolidated operating margin increased 2.0 percentage points in the third quarter of 2012, and increased 1.6 percentage points in the three fiscal quarters of 2012. These increases were due primarily to a change in our mix of revenues, higher Company-owned stores operating margins and lower overall commodity prices, including cheese.

As indicated above, the consolidated operating margin as a percentage of revenues was positively impacted by lower cheese costs. Cheese price changes are a pass-through in domestic supply chain revenues and cost of sales and, as such, have no impact on the related operating margin as measured in dollars. However, cheese price changes do impact operating margin when measured as a percentage of revenues. For example, if the 2012 average cheese prices had been in effect during 2011, the impact on supply chain margins would have caused the consolidated operating margin for the third quarter of 2011 to be approximately 28.0% of total revenues versus the reported 27.5% and approximately 28.6% of total revenues for the three fiscal quarters of 2011 versus the reported 28.3%. However, the dollar margins for those same periods would have been unaffected.

Domestic Company-Owned Stores Operating Margin

Domestic Company-Owned Stores	Third Quarter of 2012		Third Quarter of 2011		Three Fiscal Ouarters of 2012		Three Fiscal Quarters of 2011	
• •					\$ 223.7		\$ 237.9	
Revenues	\$ 72.2	100.0%	\$ 76.2	100.0%	\$ 223.1	100.0%	\$ 237.9	100.0%
Cost of sales	56.4	78.1%	61.9	81.3%	171.3	76.6%	189.8	79.8%
Store operating margin	\$ 15.8	21.9%	\$ 14.3	18.7%	\$ 52.4	23.4%	\$ 48.1	20.2%

The domestic Company-owned store operating margin increased \$1.5 million, up 10.8% in the third quarter of 2012, and increased \$4.3 million, up 9.1% in the three fiscal quarters of 2012. The margin increases in both the third quarter and three fiscal quarters of 2012 were due primarily to lower food costs, lower labor and related expenses, lower occupancy expenses and higher same store sales. The sale of 56 Company-owned stores to multiple franchisees in the three fiscal quarters of 2011 had a slightly positive impact on the domestic Company-owned stores operating margin in 2012.

As a percentage of store revenues, the store operating margin increased 3.2 percentage points in both the third quarter and three fiscal quarters of 2012.

As a percentage of store revenues, food costs decreased 2.2 percentage points to 27.4% in the third quarter of 2012, and decreased 1.8 percentage points to 26.8% in the three fiscal quarters of 2012. These decreases were due primarily to the positive impact of a higher average customer price paid per order and lower overall commodity prices, including cheese. The cheese block price-per-pound averaged \$1.71 in the third quarter of 2012 and \$1.58 in the three fiscal quarters of 2012. This compared to \$2.08 in the third quarter of 2011 and \$1.81 in the three fiscal quarters of 2011.

As a percentage of store revenues, labor and related costs decreased 0.2 percentage points to 28.3% in the third quarter of 2012, and decreased 0.7 percentage points to 28.5% in the three fiscal quarters of 2012. These decreases were due primarily to the positive impact of a higher average customer price paid per order during the third quarter and three fiscal quarters of 2012.

As a percentage of store revenues, occupancy costs (which include rent, telephone, utilities and depreciation) decreased 0.3 percentage points to 10.4% in the third quarter of 2012, and decreased 0.7 percentage points to 9.6% in the three fiscal quarters of 2012. These decreases were due primarily to lower utilities and depreciation costs per store during each of the three fiscal quarters of 2012.

Domestic Supply Chain Operating Margin

Domestic Supply Chain	Third Q of 20		Third Q of 20	_	Three l		Three I	
Revenues	\$ 213.5	100.0%	\$ 213.1	100.0%	\$ 636.9	100.0%	\$ 645.2	100.0%
Cost of sales	191.3	89.6%	192.8	90.5%	569.5	89.4%	577.3	89.5%
Supply Chain operating margin	\$ 22.2	10.4%	\$ 20.3	9.5%	\$ 67.4	10.6%	\$ 67.9	10.5%

The domestic supply chain operating margin increased \$1.9 million, up 8.9% in the third quarter of 2012, and decreased \$0.5 million, down 0.7% in the three fiscal quarters of 2012. The third quarter of 2012 increase was due primarily to a change in the mix of products sold. The

decrease during the three fiscal quarters of 2012 was due primarily to lower volumes, which was partially offset by a change in mix of products sold.

16

As a percentage of supply chain revenues, the supply chain operating margin increased 0.9 percentage points in the third quarter of 2012, and increased 0.1 percentage points in the three fiscal quarters of 2012 as compared to the prior year periods. The operating margins were positively impacted by a decrease in overall commodity prices, including cheese and a change in the mix of products sold. This was offset in part by lower volumes. Decreases in certain food prices have a positive effect on the domestic supply chain operating margin due to the fixed dollar margin earned by domestic supply chain on certain food items. Had the 2012 cheese prices been in effect during 2011, the domestic supply chain operating margin as a percentage of domestic supply chain revenues would have been approximately 9.9% for the third quarter of 2011 versus the reported 9.5% and approximately 10.7% for the three fiscal quarters of 2011 versus the reported 10.5%. However, the dollar margins for those same periods would have been unaffected.

General and Administrative Expenses

General and administrative expenses increased \$2.3 million, up 4.8% in the third quarter of 2012, and increased \$3.8 million, up 2.6% in the three fiscal quarters of 2012. General and administrative expenses were negatively impacted by approximately \$0.5 million in the third quarter of 2012, and by approximately \$2.2 million in the three fiscal quarters of 2012, from pre-tax gains recorded on the sale of certain Company-owned operations in 2011 that did not recur in 2012. Additionally, approximately \$0.3 million of recapitalization-related expenses that were included in the first quarter of 2012 negatively impacted the year-over-year comparison in the three fiscal quarters. Excluding these items, general and administrative expenses increased \$1.6 million in the third quarter of 2012 and \$1.1 million in the three fiscal quarters of 2012. These increases were primarily due to investments in technology, international, and other strategic initiatives.

Interest Expense

Interest expense decreased \$0.3 million to \$20.7 million in the third quarter of 2012, and increased \$10.2 million to \$73.7 million in the three fiscal quarters of 2012. The slight decrease in third quarter of 2012 was due primarily to a lower average interest rate as a result of the 2012 Recapitalization that was completed in the first quarter of 2012. The increase in the three fiscal quarters of 2012 was due primarily to approximately \$10.2 million of expenses incurred in the first quarter of 2012 related to the 2012 Recapitalization, including \$8.1 million of write-offs of deferred financing fees and the interest rate swap related to the extinguished debt and \$2.1 million of interest expense that was incurred on the 2007 debt subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 debt.

The Company s cash borrowing rate decreased 0.6 percentage points to 5.3% during the third quarter of 2012, and decreased 0.3 percentage points to 5.6% in the three fiscal quarters of 2012. The Company s average outstanding debt balance, excluding capital lease obligations, increased to \$1.6 billion in both the third quarter and three fiscal quarters of 2012 compared to \$1.4 billion in both the third quarter and three fiscal quarters of 2011. The decreases in the Company s cash borrowing rate and the increases in the Company s average outstanding debt balances resulted from the completion of the 2012 Recapitalization during the first quarter of 2012.

Provision for Income Taxes

Provision for income taxes increased \$2.2 million to \$15.0 million in the third quarter of 2012. This increase was due primarily to higher pre-tax income offset, in part by a tax benefit of approximately \$0.7 million recorded to reflect an increased tax basis in certain assets due to the issuance of final tax regulations during the quarter. The effective tax rate decreased to 36.6% in the third quarter of 2012, from 36.8% in the third quarter of 2011 due primarily to the aforementioned tax benefit recorded during the third quarter of 2012. Higher wage related credits positively impacted the effective tax rate for the third quarter of 2011.

Provision for income taxes increased \$0.8 million in the three fiscal quarters of 2012. This increase was due primarily to higher pre-tax income and a valuation allowance recorded on a deferred tax asset of approximately \$0.9 million during the first quarter of 2012 offset, in part by a tax benefit of approximately \$0.7 million recorded to reflect increased tax basis in certain assets due to the issuance of final tax regulations during the third quarter of 2012. The effective tax rate increased to 38.1% in the three fiscal quarters of 2012, from 37.8% in the three fiscal quarters of 2011, driven primarily by the aforementioned valuation allowance recorded on a deferred tax asset of approximately \$0.9 million during the first quarter of 2012 offset, in part by the aforementioned \$0.7 million tax benefit recorded during the third quarter of 2012. Additionally, wage credits positively impacted the effective tax rate in 2011.

17

Summary of Recapitalization Expenses

The following table presents total recapitalization-related expenses incurred during the three fiscal quarters of 2012. These pre-tax expenses affect comparability between the periods presented for 2012 and 2011.

	Three Fiscal
(in millions)	Quarters of 2012
2012 Recapitalization-related expenses:	
General and administrative expenses (1)	\$ 0.3
Additional interest expense (2)	10.2
Total of 2012 Recapitalization-related expenses	\$ 10.5

- (1) Primarily includes stock compensation expenses, payroll taxes related to the payments made to certain stock option holders, legal and professional fees incurred in the first quarter in connection with the 2012 Recapitalization.
- (2) Primarily includes the write-off of deferred financing fees. Additionally, we incurred \$2.1 million of interest expense on the 2007 borrowings subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 borrowings, resulting in the payment of interest on both the 2007 and 2012 facilities for a period of time.

In addition to the above fees and expenses and in connection with obtaining the asset-backed securitization financing facility, we recorded an additional \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet as of September 9, 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012 is expected to be amortized into interest expense over each of the next seven years.

Liquidity and Capital Resources

As of September 9, 2012, we had working capital of \$13.1 million, excluding restricted cash and cash equivalents of \$60.9 million, and including unrestricted cash and cash equivalents of \$34.6 million. Historically, we have operated with minimal positive working capital, or negative working capital, primarily because our receivable collection periods and inventory turn rates are faster than the normal payment terms on our current liabilities. We generally collect our receivables within three weeks from the date of the related sale, and we generally experience 30 to 40 inventory turns per year. In addition, our sales are not typically seasonal, which further limits our working capital requirements. These factors, coupled with servicing our debt obligations, investing in our business and repurchasing our common stock, all of which are generally funded by ongoing cash flows from operations, also reduce our working capital amounts. As of September 9, 2012, we had approximately \$39.2 million of restricted cash held for future principal and interest payments, \$21.5 million of restricted cash held in a three month interest reserve as required by the related debt agreements and \$0.2 million of other restricted cash, for a total of \$60.9 million of restricted cash and cash equivalents.

On March 16, 2012, we announced that we had completed the 2012 Recapitalization in which certain of our subsidiaries replaced the outstanding 2007 fixed rate notes and variable funding notes (the 2007 Notes) with new notes (the Notes) issued pursuant to an asset-backed securitization. The Notes consist of \$1.575 billion of Series 2012-1 5.216% Fixed Rate Senior Secured Notes, Class A-2 (the Fixed Rate Notes) and \$100 million of Series 2012-1 Variable Funding Senior Secured Notes, Class A-1 (the Variable Funding Notes). The Notes were issued in a private placement transaction by indirect, bankruptcy-remote subsidiaries that hold substantially all of our revenue-generating assets, excluding Company-owned stores. The Fixed Rate Notes have an anticipated maturity of seven years and a legal maturity of 30 years. The Variable Funding Notes have an anticipated maturity of five years, with an option for up to two one-year renewals (subject to certain minimum financial conditions), and a legal maturity of 30 years. The Variable Funding Notes were undrawn on the closing date and at September 9, 2012.

The Fixed Rate Notes have scheduled principal payments of \$17.7 million in 2012, \$23.6 million in each of 2013 and 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During the three fiscal quarters of 2012, we made principal payments of approximately \$11.8 million. If we meet certain conditions, including a maximum leverage ratio of 4.5x total debt to EBITDA, we may elect to not make the scheduled principal payments. If the leverage ratio subsequently exceeds 4.5x, we must make-up the payments we had elected not to make.

The Notes are subject to certain financial and non-financial covenants, including a debt service coverage calculation, as defined in the related agreements. The Notes also include a financial covenant based on the achievement of a minimum amount of global retail sales. In the event that certain covenants are not met, the Notes may become due and payable on an accelerated schedule.

18

We used a portion of the proceeds from the 2012 Recapitalization to repay approximately \$1.447 billion in outstanding principal under the 2007 Notes. The proceeds were also used to pay accrued interest on the 2007 Notes and transaction-related fees and expenses in connection with the 2012 Recapitalization and to fund a reserve account for the payment of interest on the Notes.

On March 16, 2012, our Board of Directors declared a \$3.00 per share special cash dividend on the outstanding common stock totaling \$171.1 million, which was paid on April 2, 2012 to stockholders of record at the close of business on March 26, 2012. Additionally, pursuant to the anti-dilution provisions in our underlying stock option plans, on April 2, 2012, we made a corresponding cash payment of approximately \$13.5 million on certain stock options, reduced the exercise price on certain other stock options by an equivalent per share amount and, in certain circumstances, both reduced the stock option exercise price and made a cash payment totaling \$3.00 per share. On April 2, 2012, we also accrued an estimated \$2.4 million for payments to be made as certain performance-based restricted stock grants vest. The dividend and related dividend equivalent payments were funded with the remaining proceeds from the 2012 Recapitalization and cash on hand. These anti-dilution payments were accounted for as modifications/settlements and were recorded as increases in total stockholders deficit. As of September 9, 2012, total cash paid for common stock dividends and related anti-dilution equivalent payments was approximately \$185.5 million and the total estimated liability recorded for future cash payments on certain performance-based restricted stock was approximately \$1.5 million.

During the three fiscal quarters of 2012 and in connection with the 2012 Recapitalization, we incurred approximately \$10.5 million of net expenses. Additionally, in connection with the 2012 Recapitalization, we recorded an additional \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet during the three fiscal quarters of 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012 is expected to be amortized into interest expense over each of the next seven years.

As of September 9, 2012, we had approximately \$1.567 billion of long-term debt, of which \$24.4 million was classified as a current liability. Additionally, as of September 9, 2012, we had \$39.7 million of outstanding letters of credit and \$60.3 million of available capacity under our \$100.0 million Variable Funding Notes. The letters of credit are primarily related to our casualty insurance programs and supply chain center leases. Borrowings under the Variable Funding Notes are available to fund our working capital requirements, capital expenditures and other general corporate purposes. Our primary source of liquidity is cash flows from operations and availability of borrowings under our Variable Funding Notes.

The Company used cash of approximately \$5.9 million during the third quarter of 2012 and \$42.7 million during the three fiscal quarters of 2012 for the repurchase and retirement of common stock under its open market share repurchase program. In July 2012, the Board of Directors approved an increase to the Company s open market share repurchase program, which at the time of the approval, resulted in a total remaining authorized amount for additional share repurchases of \$200.0 million. As of September 9, 2012, we had approximately \$197.9 million remaining for future share repurchases under the current Board of Directors approved \$200.0 million open market share repurchase program. Subsequent to the third quarter of 2012, the Company repurchased and retired an additional 106,573 shares of common stock for a total of approximately \$3.7 million. We expect to continue to use ongoing excess cash flow generation and (subject to certain restrictions in the documents governing the Variable Funding Notes) availability under the Variable Funding Notes to, among other things, repurchase shares under the current authorized program.

During the three fiscal quarters of 2012, we experienced increases in both domestic and international same store sales versus the comparable periods in the prior year. Additionally, our international business continued to grow stores in the three fiscal quarters of 2012 as our international store count surpassed the number of stores domestically. These factors have contributed to our continued ability to generate positive operating cash flows. We expect to use our unrestricted cash and cash equivalents, ongoing cash flows from operations and available borrowings under the Variable Funding Notes to, among other things, fund working capital requirements, invest in our core business, and repurchase our common stock. We have historically funded our working capital requirements, capital expenditures, debt repayments and repurchases of common stock primarily from our cash flows from operations and, when necessary, our available borrowings under variable funding note facilities.

Management believes its current unrestricted cash and cash equivalents balance and its expected ongoing cash flows from operations will be sufficient to fund operations for at least the next twelve months. We did not have any material commitments for capital expenditures as of September 9, 2012.

Table of Contents 30

19

Table of Contents

Cash provided by operating activities was \$101.3 million in the three fiscal quarters of 2012 and \$85.1 million in the three fiscal quarters of 2011. The \$16.2 million increase was due primarily to a \$10.4 million decrease in the use of cash resulting from the timing of payments of current operating liabilities. Cash provided by operating activities was also positively impacted by a \$5.8 million increase in net income, excluding non-cash adjustments versus the prior year period, resulting primarily from our improved operating performance.

Cash provided by investing activities was \$20.8 million in the three fiscal quarters of 2012. Cash used in investing activities was \$5.6 million in the three fiscal quarters of 2011. The \$26.4 million net change was due primarily to a \$29.5 million decrease in restricted cash and cash equivalents due primarily to lower restricted cash reserve requirements as a result of the 2012 Recapitalization. This was offset in part by a \$2.9 million decrease in proceeds from the sale of assets, primarily as a result of the sale of Company-owned stores during 2011.

Cash used in financing activities was \$137.3 million in the three fiscal quarters of 2012 and \$95.1 million in the three fiscal quarters of 2011. The \$42.2 million increase in the use of cash was due primarily to \$1.4 billion of repayments of the 2007 debt facilities, \$185.5 million dividend and equivalent payments, a \$31.4 million increase in cash paid for financing costs, all of which resulted from our 2012 Recapitalization, and a \$24.8 million decrease in proceeds from the exercise of stock options. These uses of cash for financing activities were offset, in part by \$1.6 billion of proceeds from issuance of the 2012 debt facility and an \$86.5 million decrease in purchases of common stock.

Based upon the current level of operations and anticipated growth, we believe that the cash generated from operations, our current unrestricted cash and cash equivalents and amounts available under the Variable Funding Notes will be more than adequate to meet our anticipated debt service requirements, capital expenditures and working capital needs for at least the next twelve months. Our ability to continue to fund these items and continue to reduce debt could be adversely affected by the occurrence of any of the events described under Risk Factors in this report and our other filings with the Securities and Exchange Commission. There can be no assurance, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available under the variable funding notes or otherwise to enable us to service our indebtedness, or to make anticipated capital expenditures. Our future operating performance and our ability to service, extend or refinance the fixed rate notes and to service, extend or refinance the variable funding notes will be subject to future economic conditions and to financial, business and other factors, many of which are beyond our control.

20

Forward-Looking Statements

This filing contains forward-looking statements. You can identify forward-looking statements because they contain words such as believes, will, should, seeks, approximately, intends, plans, estimates, or anticipates or similar expressions that concern of or intentions. Forward-looking statements relating to our anticipated profitability, estimates in same store sales growth, the growth of our international business, ability to service our indebtedness, our operating performance, trends in our business and other descriptions of future events reflect management s expectations based upon currently available information and data. However, actual results are subject to future risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. The risks and uncertainties that could cause actual results to differ materially include: the level of and our ability to refinance our long-term and other indebtedness; the uncertainties relating to litigation; consumer preferences, spending patterns and demographic trends; the effectiveness of our advertising, operations and promotional initiatives; the strength of our brand in the markets in which we compete; our ability to retain key personnel; new product and concept developments by us, and other food-industry competitors; the ongoing level of profitability of our franchisees; our ability and that of our franchisees to open new restaurants and keep existing restaurants in operation; changes in food prices, particularly cheese, labor, utilities, insurance, employee benefits and other operating costs; the impact that widespread illness or general health concerns may have on our business and the economy of the countries where we operate; severe weather conditions and natural disasters; changes in our effective tax rate; changes in government legislation and regulations; adequacy of our insurance coverage; costs related to future financings; our ability and that of our franchisees to successfully operate in the current credit environment; changes in the level of consumer spending given the general economic conditions including interest rates, energy prices and weak consumer confidence; availability of borrowings under our variable funding notes and our letters of credit; and changes in accounting policies. Important factors that could cause actual results to differ materially from our expectations are more fully described in our other filings with the Securities and Exchange Commission, including under the section headed Risk Factors in our annual report on Form 10-K and this quarterly report on Form 10-Q for the quarter ended September 9, 2012. Except as required by applicable securities law, we do not undertake to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

21

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Market Risk

The Company is exposed to market risk from interest rate changes on our variable rate debt, which consists of variable funding note borrowings that are outstanding from time to time. Management actively monitors this exposure when present. As of September 9, 2012, we had no outstanding variable funding note borrowings. Our outstanding fixed rate notes, which comprise substantially all of our outstanding borrowings, contain fixed interest rates until January 2019. We do not engage in speculative transactions nor do we hold or issue financial instruments for trading purposes.

The Company is exposed to market risk from changes in commodity prices. During the normal course of business, we purchase cheese and certain other food products that are affected by changes in commodity prices and, as a result, we are subject to volatility in our food costs. We may periodically enter into financial instruments to manage this risk. We do not engage in speculative transactions nor do we hold or issue financial instruments for trading purposes. In instances where we use forward pricing agreements with our suppliers, we use these agreements to cover our physical commodity needs; the agreements are not net-settled and are accounted for as normal purchases.

We have exposure to various foreign currency exchange rate fluctuations for revenues generated by our operations outside the United States, which can adversely impact our net income and cash flows. Total revenues of approximately 12.8% in the third quarter of 2012, 12.0% in the third quarter of 2011, 12.7% in the three fiscal quarters of 2012 and 12.0% in the three fiscal quarters of 2011 were derived from sales to customers and royalties from franchisees outside the contiguous United States. This business is conducted in the local currency but royalty payments are generally remitted to us in U.S. dollars. We do not enter into financial instruments to manage this foreign currency exchange risk. A hypothetical 10% adverse change in the foreign currency rates in each of our top ten international markets, based on store count, would have resulted in a negative impact on royalty revenues of approximately \$5.8 million in the three fiscal quarters of 2012.

Item 4. Controls and Procedures.

Management, with the participation of the Company s President and Chief Executive Officer, J. Patrick Doyle, and Executive Vice President and Chief Financial Officer, Michael T. Lawton, performed an evaluation of the effectiveness of the Company s disclosure controls and procedures (as that term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on that evaluation, Mr. Doyle and Mr. Lawton concluded that the Company s disclosure controls and procedures were effective.

During the quarterly period ended September 9, 2012, there were no changes in the Company s internal controls over financial reporting that have materially affected or are reasonably likely to materially affect the Company s internal control over financial reporting.

22

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

We are a party to lawsuits, revenue agent reviews by taxing authorities and administrative proceedings in the ordinary course of business which include, without limitation, workers compensation, general liability, automobile and franchisee claims. We are also subject to suits related to employment practices.

While we may occasionally be party to large claims, including class action suits, we do not believe that these matters, individually or in the aggregate, will materially affect our financial position, results of operations or cash flows.

Item 1A. Risk Factors.

The following risk factors, which have been updated to reflect our 2012 Recapitalization, should be read in conjunction with the risk factors previously disclosed in the Company s Form 10-K for the fiscal year ended January 1, 2012.

Our substantial indebtedness could adversely affect our business and limit our ability to plan for or respond to changes in our business.

We generally operate with a substantial amount of indebtedness and are highly leveraged. As of September 9, 2012, our consolidated long-term indebtedness was approximately \$1.57 billion. Under the terms of the securitized debt agreements we may also incur additional debt. Our substantial indebtedness could have important consequences to our business and our shareholders. For example, it could:

make it more difficult for us to satisfy our obligations with respect to our debt agreements;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow for other purposes; and

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate, thereby placing us at a competitive disadvantage compared to our competitors that may have less debt.

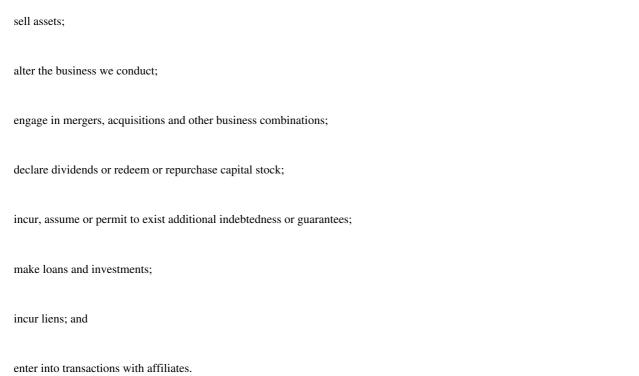

In addition, the financial and other covenants we agreed to with our lenders may limit our ability to incur additional indebtedness, make investments, pay dividends and engage in other transactions, and the leverage may cause potential lenders to be less willing to loan funds to us in the future. Our failure to comply with these covenants could result in an event of default that, if not cured or waived, could result in the acceleration of repayment of all of our indebtedness.

We may be unable to generate sufficient cash flow to satisfy our significant debt service obligations, which would adversely affect our financial condition and results of operations.

Our ability to make principal and interest payments on and to refinance our indebtedness will depend on our ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. If our business does not generate sufficient cash flow from operations, in the amounts projected or at all, or if future borrowings are not available to us under our variable funding notes in amounts sufficient to fund our other liquidity needs, our financial condition and results of operations may be adversely affected. If we cannot generate sufficient cash flow from operations to make scheduled principal and interest payments on our debt obligations in the future, we may need to refinance all or a portion of our indebtedness on or before maturity, sell assets, delay capital expenditures or seek additional equity. If we are unable to refinance any of our indebtedness on commercially reasonable terms or at all or to effect any other action relating to our indebtedness on satisfactory terms or at all, our business may be harmed. While we have a variable funding senior revolving notes facility, the facility has a five year term and failure to extend or refinance the facility would subsequently reduce our liquidity.

The terms of our securitized debt financing of certain of our wholly-owned subsidiaries have restrictive terms and our failure to comply with any of these terms could put us in default, which would have an adverse effect on our business and prospects.

Unless and until we repay all outstanding borrowings under our securitized debt, we will remain subject to the restrictive terms of these borrowings. The securitized debt, under which certain of our wholly-owned subsidiaries issued and guaranteed senior and fixed rate notes and variable funding senior revolving notes, contain a number of covenants, with the most significant financial covenant being a debt service coverage calculation. These covenants limit the ability of certain of our subsidiaries to, among other things:

The securitized debt also requires us to maintain a specified financial ratio at the end of each fiscal quarter. These restrictions could affect our ability to pay dividends or repurchase shares of our common stock. Our ability to meet this financial ratio can be affected by events beyond our control, and we may not satisfy such a test. A breach of this covenant could result in a rapid amortization event or default under the securitized debt. If amounts owed under the securitized debt are accelerated because of a default under the securitized debt and we are unable to pay such amounts, the noteholders have the right to assume control of substantially all of the securitized assets.

During the seven-year term following issuance, the senior notes will accrue interest at a fixed rate of 5.216% per year. Additionally, the senior notes have scheduled principal payments of \$17.7 million in 2012, \$23.6 million in each of 2013 and 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During the three fiscal quarters of 2012, we made principal payments of approximately \$11.8 million. If we meet certain conditions, including a maximum leverage ratio of 4.5x total debt to EBITDA, we may elect to not make the scheduled principal payments. If the leverage ratio subsequently exceeds 4.5x, we must make up the payments we had elected not to make.

If we are unable to refinance or repay amounts under the securitized debt prior to the expiration of the seven-year term, our cash flow would be directed to the repayment of the securitized debt and, other than a weekly management fee sufficient to cover minimal selling, general and administrative expenses, would not be available for operating our business.

No assurance can be given that any refinancing or additional financing will be possible when needed or that we will be able to negotiate acceptable terms. In addition, our access to capital is affected by prevailing conditions in the financial and capital markets and other factors beyond our control. There can be no assurance that market conditions will be favorable at the times that we require new or additional financing.
