**Wells Fargo Advantage Multi-Sector Income Fund (the Fund )**

**Notes to Portfolio of investments July 31, 2013 (unaudited)**

**Securities valuation**

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (normally 4 p.m. Eastern Time).

Fixed income securities acquired with maturities exceeding 60 days are valued based on evaluated bid prices received from an independent pricing service which may utilize both transaction data and market information such as yield, prices of securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If valuations are not available from the independent pricing service or values received are deemed not representative of market value, values will be obtained from a broker-dealer or otherwise determined based on the Fund's Valuation Procedures.

Short-term securities with maturities of 60 days or less generally are valued at amortized cost which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Equity securities that are listed on a foreign or domestic exchange, except for The Nasdaq Stock Market, Inc. ( Nasdaq ), are valued at the official closing price or, if none, the last sales price. Securities listed on Nasdaq are valued at the Nasdaq Official Closing Price ( NOCP ). If no NOCP is available, securities are valued at the last sales price. If no sales price is shown on the Nasdaq, the bid price will be used. If no sale occurs on the primary exchange or market for the security that day or if no sale occurs and no bid price is shown on Nasdaq, the prior day's price will be deemed stale and fair values will be determined in accordance with the Fund's Valuation Procedures.

Securities denominated in foreign currencies are translated into U.S. dollars using the rates of exchange in effect on the day of valuation at a time specified by the Management Valuation Team of Wells Fargo Funds Management, LLC ( Funds Management ).

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market information to assess the continued appropriateness of the fair valuation methodology used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the input factors considered in the valuation process until there is a readily available price provided on the exchange or by an independent pricing service. Valuations received from an independent pricing

service or broker quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

### **Foreign currency translation**

The accounting records of the Fund are maintained in U.S. dollars. Assets, including investment securities, and liabilities denominated in foreign currency are translated into U.S. dollars at the rates of exchange at a time specified by the Management Valuation Team on the date of valuation. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting in changes in exchange rates.

The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are recorded with net realized and unrealized gains or losses from investments. Gains and losses from certain foreign currency transactions are treated as ordinary income for U.S. federal income tax purposes.

### **Forward foreign currency contracts**

The Fund may be subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. A forward foreign currency contract is an agreement between two parties to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund enters into forward foreign currency contracts to facilitate transactions in foreign-denominated securities and to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. Forward foreign currency contracts are recorded at the forward rate and marked-to-market daily. When the contracts are closed, realized gains and losses arising from such transactions are recorded as realized gains or losses on forward foreign currency contract transactions. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably. The Fund's maximum risk of loss from counterparty credit risk is the unrealized gains on the contracts. This risk may be mitigated if there is a master netting arrangement between the Fund and the counterparty.

### **When-issued transactions**

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

### **Term loans**

The Fund may invest in term loans. The Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

As of July 31, 2013, the Fund had unfunded loan commitments of \$99,250.

### **Fair valuation measurements**

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

As of July 31, 2013, the inputs used in valuing investments in securities were as follows:

	Quoted prices (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
<b>Investments in securities</b>				
<b>Agency securities</b>	\$ 0	\$ 17,972,855	\$ 0	\$ 17,972,855

	\$ 11,645,935	\$ 884,019,516	\$ 10,614,673	\$ 906,280,124

As of July 31, 2013, the inputs used in valuing the Fund's other financial instruments were as follows:

Other financial instruments	Quoted prices (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
<b>Forward foreign currency contracts+</b>	\$ 0	\$ (943,008)	\$ 0	\$ (943,008)

+ Forward foreign currency contracts are presented at the unrealized losses on the instrument. Transfers in and transfers out are recognized at the end of the reporting period. For the nine months ended July 31, 2013, the Fund did not have any transfers into/out of **Level 1 or Level 2**.

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

	Common stocks	Term loans	Total
<b>Balance as of October 31, 2012</b>	\$ 2,322	\$ 16,839,203	\$ 16,841,525

<b>Change in unrealized gains (losses) relating to securities still held at July 31, 2013</b>	\$ (2,322)	\$ 33,759	\$ 31,437

The investments types categorized above were valued using indicative broker quotes and are therefore considered Level 3 inputs.

Quantitative unobservable inputs used by the brokers are often proprietary and not provided to the Fund and therefore the disclosure that would address these inputs is not included above.
