Part I

Item 1. Business.

Overview

Domino's Pizza, Inc. (referred to as the Company, Domino's or in the first person notations of we, us and our) is the number one pizza delivery company in the United States, based on reported consumer spending. We also have a leading international presence, ranking as the second largest pizza company in the world, based on number of units and retail sales. On average, over 1.5 million pizzas are sold each day throughout the Domino's global system, with deliveries covering approximately 15 million miles per week. We pioneered the pizza delivery business and have built the Domino's Pizza® brand into one of the most widely-recognized consumer brands in the world. Together with our domestic franchisees, we have supported the Domino's Pizza® brand with an estimated \$1.4 billion in advertising spending in the United States over the past five years. Additionally, our international franchisees invest significant amounts in advertising efforts in their markets. We operate through a network of 10,886 Company-owned and franchise stores, located in all 50 states and in more than 70 international markets. In addition, we operate 16 regional dough manufacturing and supply chain centers, one equipment and supply facility, one thin crust manufacturing center and one vegetable processing center in the contiguous United States, and seven dough manufacturing and supply chain centers outside the contiguous United States. The foundation of our system-wide success and leading market position is our strong relationships with our franchisees, comprised of nearly 2,500 owner-operators throughout the world dedicated to the success of the Domino's Pizza® brand.

Over our 53-year history, we have developed a simple business model focused on our core strength of delivering quality pizza and other complementary items in a timely manner. This business model includes a delivery and carry-out oriented store design with relatively low capital requirements when compared to certain other restaurant concepts, a focused menu of pizza and other complementary items, committed owner-operator franchisees and a vertically-integrated supply chain system in the U.S. Our earnings are driven largely by retail sales at our franchise stores, which generate royalty payments and, in the U.S. and Canada, supply chain revenues to us. We also generate earnings through retail sales at our Company-owned stores. Internationally, most geographies are granted to a qualified master franchisee, and this master franchisee can utilize three potential income streams: owning and operating stores, sub-franchising stores and owning and operating supply chain centers.

We operate our business in three segments: domestic stores, domestic supply chain and international.

Domestic stores. The domestic stores segment, which is comprised of 4,596 franchise stores and 390 Company-owned stores, generated revenues of \$549.8 million and income from operations of \$182.0 million during our fiscal year ended December 29, 2013, which we refer to herein as 2013.

Domestic supply chain. Our domestic supply chain segment, which manufactures our dough and thin crust products for all of our Company-owned stores and over 99% of our domestic franchise stores and processes vegetables and distributes food, equipment and supplies to certain domestic stores, generated revenues of \$1.01 billion and income from operations of \$84.5 million during 2013.

International. Our international segment is comprised of 5,900 franchise stores outside the contiguous United States. It also manufactures dough and distributes food and supplies in a limited number of these markets. During 2013, our international segment generated revenues of \$242.6 million, of which approximately 55% related to franchise royalties and fees, and generated income from operations of \$118.9 million, of which approximately 90% related to franchise royalties and fees.

On a consolidated basis, we generated revenues of over \$1.80 billion and income from operations (after deducting \$71.6 million of unallocated corporate and other expenses) of \$313.8 million in 2013. Net income was \$143.0 million in 2013. In each of the past three years, we have been able to increase our net income, grow our global retail sales and, in those three years, we have added over 1,500 stores worldwide. We were able to grow our business with capital expenditures that ranged between \$24.3 million to \$40.4 million per year, as a significant portion of our earnings are derived from retail sales by our franchisees who are responsible for their own capital expenditures.

Our history

We have been delivering quality, affordable pizza to our customers since 1960 when brothers Thomas and James Monaghan borrowed \$900 and purchased a small pizza store in Ypsilanti, Michigan. Since that time, our store count and geographic reach have grown substantially. We opened our first franchise store in 1967 and our first international store in 1983. During 2012, we opened our 10,000th store worldwide and as of December 29, 2013, we had 10,886 stores worldwide.

Table of Contents

In 1998, an investor group led by investment funds associated with Bain Capital, LLC completed a recapitalization through which the investor group acquired a 93% controlling economic interest in our Company from founder Thomas Monaghan and his family. In 2004, Domino's Pizza, Inc. completed its initial public offering (the IPO) and now trades on the New York Stock Exchange under the ticker symbol DPZ. In connection with the IPO, on May 11, 2004, we reincorporated in Delaware. Currently, there are no shares held by our founder or in the original investment funds associated with Bain Capital, LLC.

During 2012, the Company completed a recapitalization transaction (the 2012 Recapitalization), primarily consisting of (i) the issuance of \$1.575 billion of borrowings of fixed rate notes, (ii) the purchase and retirement of all outstanding 2007 fixed rate notes (the 2007 Notes), (iii) the replacement of its existing variable funding note facility with a new \$100.0 million facility, and (iv) the payment of a special cash dividend to shareholders and related anti-dilution payments and adjustments to certain stock option holders.

Industry overview

In this document, we rely on and refer to information regarding the U.S. quick service restaurant, or QSR, sector, the U.S. QSR pizza category and its components and competitors (including us) from the CREST® report prepared by The NPD Group, as well as market research reports, analyst reports and other publicly-available information. Although we believe this information to be reliable, we have not independently verified it. Domestic sales information relating to the QSR sector, U.S. QSR pizza category and U.S. pizza delivery and carry-out represent reported consumer spending obtained by The NPD Group's CREST® report from consumer surveys. This information relates to both our Company-owned and franchise stores. Unless otherwise indicated, all U.S. industry data included in this document is based on reported consumer spending obtained by The NPD Group's CREST® report from consumer surveys.

The U.S. QSR pizza category is large and fragmented. From 2003 to 2013, the U.S. QSR pizza category in which Domino's Pizza competes has grown from \$30.5 billion to \$32.5 billion. With sales of \$32.5 billion in the twelve months ended November 2013, it is the third largest category within the \$254.2 billion U.S. QSR sector. The U.S. QSR pizza category is primarily comprised of delivery, dine-in and carry-out.

We participate primarily in two segments of this industry, the delivery and carry-out segments. During the period from 2003 to 2013, the delivery segment declined from \$11.1 billion to \$9.6 billion, including decreasing slightly over the past three years, from \$9.8 billion in 2011 to \$9.6 billion in 2013. Its \$9.6 billion of sales accounted for approximately 30% of total U.S. QSR pizza category sales in the twelve months ended November 2013. We and our top two competitors account for approximately 53% of U.S. pizza delivery, based on reported consumer spending, with the remaining 47% attributable to regional chains and individual establishments. From 2003 to 2013, the carry-out segment grew from \$12.1 billion to \$14.6 billion. Additionally, in the past three years the carry-out segment grew from \$14.3 billion in 2011 to \$14.6 billion in 2013. We are the market share leader in the delivery segment and the second largest in the carry-out segment, where we have been focused on growing our market share given our strong brand, convenient store locations and quality, affordable menu offerings.

In contrast to the United States, international pizza delivery is relatively underdeveloped, with only Domino's and two other competitors having a significant global presence. We believe that demand for international pizza and pizza delivery is large and growing, driven by international consumers' increasing emphasis on convenience, and the proven success of our 30 years of conducting business abroad.

Our competitive strengths

We believe that our competitive strengths include the following:

Strong and proven growth and earnings model. Over our 53-year history, we have developed a focused growth and earnings model. This model is anchored by strong store-level economics, which provide an entrepreneurial incentive for our franchisees and historically has generated demand for new stores. Our franchise system, in turn, has produced strong and consistent earnings for us through royalty fees and through supply chain revenues, with minimal associated capital expenditures by us.

Table of Contents

Strong store-level economics. We have developed a cost-efficient store model, characterized by a delivery and carry-out oriented store design, with low capital requirements and a focused menu of quality, affordable pizza and other complementary items. At the store level, we believe that the simplicity and efficiency of our operations give us significant advantages over our competitors, who, in many cases, also focus on dine-in. During 2012, we introduced our new Pizza Theater store design for our domestic stores, which may offer casual seating for customers while they are waiting for their orders, but does not offer a full-service dine-in area. Similarly, many of our international stores also offer casual seating, but generally do not offer full-service dine-in areas. Consequently, our domestic and international stores do not require expensive restaurant facilities and staffing. In addition, our focused menu simplifies and streamlines our production and delivery processes and maximizes economies of scale on purchases of our principal ingredients. As a result of our focused business model and menu, our stores are small (averaging approximately 1,500 square feet) and relatively inexpensive to build, furnish and maintain as compared to many other restaurant concepts. The combination of this efficient store model and strong store sales volume has resulted in strong store-level financial returns and makes Domino's Pizza an attractive business opportunity for existing and prospective franchisees.

Strong and well-diversified franchise system. We have developed a large, global, diversified and committed franchise network that is a critical component of our system-wide success, our leading position in pizza delivery and our growing position in carry-out pizza. As of December 29, 2013, our franchise store network consisted of 10,496 stores, 44% of which were located in the contiguous United States. In the United States, ten franchisees operate more than 50 stores, including our largest domestic franchisee who operates 135 stores. Our domestic franchisees own and operate an average of five stores. We generally require our domestic franchisees to forego active, outside business endeavors, aligning their interests with ours and making the success of each Domino's Pizza store of critical importance to our franchisees.

In addition, we generally share 50% (or a higher percentage in the case of Company-owned stores and certain franchisees who operate a larger number of stores) of the pre-tax profits generated by our regional dough manufacturing and supply chain centers with those domestic franchisees who agree to purchase all of their food from our supply chain system. These arrangements strengthen our ties with our franchisees by enhancing their profitability, while providing us with a continuing source of revenues and earnings. This arrangement also provides incentives for franchisees to work closely with us to reduce costs. We believe our strong, mutually-beneficial franchisee relationships are evidenced by the over 99% voluntary participation in our domestic supply chain system, our approximately 99% domestic franchise contract renewal rate and our over 99% collection rate on domestic franchise royalty and domestic supply chain receivables.

Internationally, we have been able to grow our franchise network by attracting franchisees with business experience, capital and local market knowledge. We generally employ our master franchise model, which provides our international franchisees with exclusive rights to operate stores and sub-franchise our well-recognized Domino's Pizza® brand name in specific, agreed-upon market areas, as well as operate their own supply chain systems. From year-end 2008 through 2013, we grew our international franchise network 58%, from 3,726 stores to 5,900 stores. Our largest master franchisee, Domino's Pizza Enterprises Limited, operates 1,270 stores in six markets, which accounts for approximately 22% of our total international store count and approximately 12% of our global store count. During 2013, we had 573 net international store openings, including 125 net stores in India, 76 net stores in Turkey, 51 net stores in the United Kingdom, 42 net stores in Japan and 41 net stores in Australia.

Strong cash flow and earnings stream. A substantial percentage of our earnings are generated by our committed franchisees through royalty payments and revenues to our vertically-integrated supply chain system.

We believe that our store economics have led to a strong, well-diversified franchise system. This established franchise system has produced strong cash flow and earnings for us, which has enabled us to invest in the Domino's Pizza® brand, our stores, our technology and our supply chain centers, pay significant dividends, repurchase and retire shares of our common stock and repurchase and retire outstanding principal on our fixed rate notes.

#1 pizza delivery company in the United States with a leading international presence. We are the number one pizza delivery company in the United States with a 23.6% share of pizza delivery based on reported consumer spending. With 4,986 stores located in the contiguous United States, our domestic store delivery areas cover a majority of U.S. households. Our share position and scale allow us to leverage our purchasing power, supply chain strength and advertising investment across our store base. We also believe that our scale and market coverage allow us to effectively serve our customers' demands for convenience and timely delivery.

Table of Contents

Outside the United States, we have significant market share positions in the key markets in which we compete, including the United Kingdom, India, Mexico, Australia, South Korea, Canada, Turkey, Japan, France and the Netherlands. These top ten international markets, based on store count, accounted for approximately 79% of our international retail sales in 2013. We believe we have a strong presence in each of these markets.

Strong brand awareness. We believe our Domino's Pizza® brand is one of the most widely-recognized consumer brands in the world. We believe consumers associate our brand with the timely delivery of quality, affordable pizza and other complementary items. Over the past five years, our domestic franchise and Company-owned stores have invested an estimated \$1.4 billion in national, local and co-operative advertising in the United States. Additionally, our international franchisees invest significant amounts in advertising efforts in their markets. Our Domino's Pizza® brand is routinely named a MegaBrand by *Advertising Age*. We continue to reinforce our brand with extensive advertising through television, web-based promotions, radio and print. We have also enhanced the strength of our brand through marketing affiliations with brands such as Coca-Cola®.

We believe that our brand is particularly strong among pizza consumers for whom a meal is a fairly spontaneous event. In these situations, we believe that service and product quality are the consumers' priorities. We believe that well established demographic and lifestyle trends will drive continuing emphasis on convenience and will, therefore, continue to play into our brand's strength.

Internal dough manufacturing and supply chain system. In addition to generating significant revenues and earnings, primarily in the United States, we believe that our vertically integrated dough manufacturing and supply chain system enhances the quality and consistency of our products, enhances our relationships with franchisees, leverages economies of scale to offer lower costs to our stores and allows store managers to better focus on store operations and customer service by relieving them of the responsibility of mixing dough in the stores and sourcing other ingredients.

In 2013, we made approximately 523,000 full-service food deliveries to our domestic stores, or approximately two deliveries per store, per week, with a fill rate of over 99%. Fill rate is an industry metric which compares the number of items delivered to the number of items ordered. All of our Company-owned stores and over 99% of our domestic franchise stores purchase all of their food and supplies from us. This is accomplished through our network of 16 regional dough manufacturing and supply chain centers, each of which is generally located within a one-day delivery radius of the stores it serves, and a leased fleet of over 400 tractors and trailers. Additionally, we supply certain of our domestic and international franchisees with equipment and supplies through our equipment and supply center, which we operate as part of our domestic supply chain segment, offering a full range of non-food products, from ovens to uniforms. We also supply certain of our domestic stores with ingredients that are processed at our vegetable processing center and thin crust product that is manufactured at our thin crust manufacturing center, both of which we operate as part of our domestic supply chain segment.

Because we source the food for substantially all of our domestic stores, our domestic supply chain segment enables us to leverage and monitor our strong supplier relationships to achieve the cost benefits of scale and to ensure compliance with our rigorous quality standards. In addition, the one-stop shop nature of this system, combined with our delivery accuracy, allows store managers to eliminate a significant component of the typical back-of-store activity that many of our competitors' store managers must undertake. Additionally, we operate seven supply chain centers that service certain of our international franchise markets.

Our business strategy

We intend to achieve further growth and strengthen our competitive position through the continued implementation of our business strategy, which includes the following key elements:

Continue to execute on our mission statement. Our mission statement is Exceptional franchisees and team members on a mission to be the best pizza delivery company in the world. We implement this mission statement by following a business strategy that:

puts franchisees and Company-owned stores at the foundation of all our thinking and decisions;

emphasizes our ability to select, develop and retain exceptional team members and franchisees;

provides a strong infrastructure to support our stores; and

builds excellent store operations to create loyal customers.

Table of Contents

We adhere to the following guiding principles, which are based on the concept of one united brand, system and team:

putting people first;

demanding integrity;

striving to make every customer a loyal customer;

delivering with smart hustle and positive energy; and

winning by improving results every day.

Grow our leading position in an attractive industry. U.S. pizza delivery and carry-out are the largest components of the U.S. QSR pizza category. They are also highly fragmented. Pizza delivery, through which a majority of our retail sales are generated, had sales of \$9.6 billion in the twelve months ended November 2013. As the leader in U.S. pizza delivery, we believe that our strategic store locations, simple operating model, widely-recognized brand and efficient supply chain system are competitive advantages that position us to capitalize on future growth.

The carry-out component had \$14.6 billion of sales in the twelve months ended November 2013. While our primary focus is on pizza delivery, we are also favorably positioned as a leader in the growing carry-out component given our strong brand, store locations and quality, affordable menu offerings.

Leverage our strong brand awareness. We believe that the strength of our Domino's Pizza® brand makes us one of the first choices of consumers seeking a convenient, quality and affordable meal. We intend to continue to promote our brand name and enhance our reputation as the leader in pizza delivery, with a growing position in carry-out pizza. In late 2009, in connection with the launch of our improved pizza recipe, we launched the campaign, Oh Yes We Did. The launch of the new pizza and this campaign received significant attention in the news media, social networking internet sites and other media outlets and we experienced positive same store sales growth in our domestic stores throughout 2010 and 2011. This momentum has continued with the launch of our new Handmade Pan Pizza, which contributed to our positive domestic same store sales growth in 2012 and 2013. Our domestic stores have historically contributed 4% or 5% of their retail sales to fund national marketing and advertising campaigns, with additional required contributions to local market-level programs. Beginning in 2010, all domestic franchisees contributed 5.5% (subject, in limited instances, to lower rates based on certain incentives and waivers) of their retail sales for national advertising. In January 2013, with the support of the domestic franchise system, domestic franchisees amended their standard franchise agreements to require a contribution of 6% (subject, in limited instances, to lower rates based on certain incentives and waivers) of their retail sales for national advertising. We currently anticipate that this 6% contribution rate, which took effect in 2013, will remain in place for the foreseeable future.

Expand global store base. We plan to expand our base of domestic stores to take advantage of the attractive growth opportunities in U.S. pizza delivery and carry-out. We believe that our scale will allow us to expand our store base with limited marketing, distribution and other incremental infrastructure costs. Additionally, our franchise-oriented business model will allow us to expand our store base with limited capital expenditures and working capital requirements. While we plan to expand our traditional domestic store base primarily through opening new franchise stores, we will also continually evaluate our mix of Company-owned and franchise stores, strategically acquire franchise stores and relicense Company-owned stores.

We believe that pizza has global appeal and that there is strong and growing international demand for delivered pizza. We have successfully built a broad international platform, primarily through our master franchise model, as evidenced by our 5,900 international stores in more than 70 international markets. We believe that we continue to have significant long-term growth opportunities in international markets where we have established a leading presence. In our top ten international markets, we believe that our current store base is approximately half of the total long-term potential store base in those markets.

Generally, we believe we will achieve long-term growth internationally as a result of the favorable store-level economics of our business model, the growing international demand for pizza and delivered pizza and the strong global recognition of the Domino's Pizza® brand. Our international stores have produced positive quarterly same store sales growth for 80 consecutive quarters. Additionally, during 2013, we had 573 net international store openings, including 125 net stores in India, 76 net stores in Turkey, 51 net stores in the United Kingdom, 42 net stores in Japan and 41 net stores in Australia.

Table of Contents

Continue to focus on product and technological innovation. We believe product and technological innovation is vital to our brand and our long-term success. Digital ordering has become increasingly important to the global pizza industry. After launching digital ordering domestically in 2008, we made the strategic decision in 2010 to develop our own online ordering platform and to manage this important and growing area of our business internally. Over the next two years, we launched new mobile applications for the iPhone, iPod touch, Android smartphones and for Amazon's Kindle Fire. We also created a Spanish-language ordering mobile application for smartphones. In 2013, we launched our enhanced online ordering profiles platform, allowing customers the ability to reorder their favorite order in as few as five clicks, or about 30 seconds. All of this improved functionality has been developed to work seamlessly with our Domino's PULSE point-of-sale system, which we believe gives us a competitive advantage over other concepts. Currently, on average, approximately 40% of our domestic stores' retail sales originate digitally including mobile orders. A substantial and growing portion of our international stores' retail sales also originate online.

We continue to introduce innovative, consumer-tested and profitable new product varieties as another important way to bring compelling news and product innovation to our customers. Products such as Handmade Pan Pizzas, Oven Baked Sandwiches and Domino's American Legend® have been added to our product line-up since 2008, along with complementary side items such as our Parmesan Bread Bites, Stuffed Cheesy Bread and Chocolate Lava Crunch Cakes. We believe this focus on innovation, when coupled with our scale and share leadership, will allow us to grow our position in both U.S. pizza delivery and carry-out.

Store operations

We believe that our focused and proven store model provides a significant competitive advantage relative to many of our competitors who focus on multiple components of the pizza category, particularly dine-in. We have been focused primarily on pizza delivery for over 50 years. During 2012, we introduced our new Pizza Theater store design, which may offer casual seating for customers to watch the preparation of their orders, but does not offer a full-service dine-in area. Certain of our international stores also offer casual seating, but generally do not offer full-service dine-in areas. As a result, our domestic and international stores do not require expensive restaurant facilities and staffing. Our stores also benefit from lower maintenance costs, as store assets have long lives and updates are not frequently required. Our simple and efficient operational processes, which we have refined through continuous improvement, include:

strategic store locations to facilitate delivery and carry-out service;

production-oriented store designs;

product and process innovations;

a focused menu;

efficient order taking, production and delivery;

Domino's PULSE point-of-sale system with state-of-the-art digital ordering capabilities; and

a comprehensive store operations evaluation program.

Strategic store locations to facilitate delivery and carry-out service

We locate our stores strategically to facilitate timely delivery and carry-out service to our customers. The majority of our domestic stores are located in populated areas in or adjacent to large or mid-size cities, or on or near college campuses. We use geographic information software, which incorporates variables such as household demographics, competitor locations, traffic volumes and visibility, to evaluate and identify potential store locations and new markets.

Production-oriented store designs

Our typical store is relatively small, occupying on average approximately 1,500 square feet and is designed with a focus on efficient and timely production of consistently high quality food for delivery and carry-out. The store layout has been refined over time to provide an efficient flow from order-taking to delivery or carry-out. Although our new Pizza Theater store design may offer a small casual dining area, our stores do not offer a full-service dine-in area.

Table of Contents

Product and process innovations

Our over 50 years of experience and innovative culture have resulted in numerous new product and process developments that increase both quality and efficiency. These include our efficient, vertically-integrated supply chain system, a sturdier corrugated pizza box and a mesh screen that helped cook pizza crust more evenly. The Domino's HeatWave® hot bag keeps our pizzas hot during delivery. We also continue to introduce new products such as Domino's American Legend® pizzas, launched in 2009; Stuffed Cheesy Bread, launched in 2011; and Parmesan Bread Bites and our new Handmade Pan Pizzas, both launched in 2012. Additionally, we have added a number of complementary side items to our menu such as Cinna Stix® and Chocolate Lava Crunch Cakes. In 2009, we introduced our improved pizza recipe, which was a change to our core pizza recipe.

Focused menu

We maintain a focused menu that is designed to present an attractive, quality offering to customers, while minimizing order errors, and expediting the order taking and food preparation processes. Our basic menu has three choices for pizza products: pizza type, pizza size and pizza toppings. Most of our stores carry two or three sizes of Traditional Hand-Tossed, Brooklyn Style and Crunchy Thin Crust pizza. Our typical store also offers Domino's Handmade Pan Pizzas, Domino's American Legend® pizzas, Domino's Oven Baked Sandwiches, boneless chicken and wings, Cinna Stix®, Chocolate Lava Crunch Cakes, Stuffed Cheesy Bread, Parmesan Bread Bites and Coca-Cola® soft drink products. We also occasionally offer other products on a promotional or a regional basis, such as salads. We believe that our focused menu creates a strong identity among consumers, improves operating efficiency and maintains food quality and consistency.

Efficient order taking, production and delivery

Each store executes an operational process that includes order taking, pizza preparation, cooking (via automated, conveyor-driven ovens), boxing and delivery. The entire order taking and pizza production process is designed for completion in approximately 12-15 minutes. These operational processes are supplemented by an extensive employee training program designed to ensure world-class quality and customer service. It is our priority to ensure that every Domino's store operates in an efficient, consistent manner while maintaining our high standards of food quality and team member safety.

Domino's PULSE point-of-sale system with state-of-the-art digital ordering capabilities

Our computerized management information systems are designed to improve operating efficiencies, provide corporate management with timely access to financial and marketing data and reduce store and corporate administrative time and expense. We have installed Domino's PULSE, our proprietary point-of-sale system, in every Company-owned store in the United States, in more than 99% of our domestic franchise stores and in nearly 60% of the international stores. Domino's PULSE features include:

touch screen ordering, which ensures accuracy and facilitates more efficient order taking;

a delivery driver routing system, which assists with delivery efficiency and safety;

administrative and reporting capabilities, which enable store managers to better focus on store operations and customer satisfaction; and

state-of-the-art digital ordering capability, including Pizza Tracker and Pizza Builder.

We require our domestic franchisees to install and maintain Domino's PULSE. Additionally, Domino's PULSE has been installed in over 3,400 international franchise stores. Management believes that utilizing Domino's PULSE throughout our domestic system, and a growing portion of our global system, provides us with competitive advantages over other point-of-sales systems, including:

integration with multiple digital ordering platforms and applications;

consistent execution and communication of operational best practices in our stores;

real-time dissemination of data with field management, which enables efficient and informed decision making;

data collection capability, which provides operations management insight into store operations;

innovation sharing throughout the system, which allows all users to be more efficient and profitable; and

electronic dissemination of materials and information to our stores, which reduces training and operating costs.

Table of Contents

Since the rollout of Domino's PULSE to our domestic stores, our online ordering transactions have grown. Currently, on average, approximately 40% of our domestic stores' sales originate online. In 2010, we made the strategic decision to develop our own online ordering platform and manage this important and growing area of our business internally. In 2011, we launched a new mobile application for the iPhone and iPod touch to provide further convenience for our customers when ordering online. In 2012, we launched a new mobile application for the Android smartphone and for Amazon's Kindle Fire, and we also launched a new Spanish-language ordering mobile application for smartphones. In 2013, we launched our enhanced online ordering profiles platform, allowing customers the ability to reorder their favorite order in as few as five clicks, or about 30 seconds. We intend to continue to enhance and grow our online ordering capabilities.

Comprehensive store operations evaluation program

We utilize a comprehensive evaluation program to ensure that our stores are meeting both our stringent standards as well as the expectations of our customers. The program focuses primarily on the quality of the pizza the store is producing, the customer service the store is providing and the condition of the store as viewed by the customer. We believe that this program is an integral part of our strategy to maintain high standards in our stores.

Segment overview

We operate in three business segments:

Domestic stores. Our domestic stores segment consists of our domestic franchise operations, which oversees a network of 4,596 franchise stores located in the contiguous United States, and our domestic Company-owned store operations, which operates a network of 390 Company-owned stores located in the contiguous United States.

Domestic supply chain. Our domestic supply chain segment operates 16 regional dough manufacturing and food supply chain centers, one thin crust manufacturing center, one supply chain center providing equipment and supplies to certain of our domestic and international stores and one vegetable processing center.

International. Our international segment is comprised of our network of 5,900 international franchise stores in more than 70 international markets. Our international segment also distributes food to a limited number of markets from seven dough manufacturing and supply chain centers in Canada (five), Alaska and Hawaii.

Domestic stores

During 2013, our domestic stores segment accounted for \$549.8 million, or 31% of our consolidated revenues. Our domestic franchises are operated by entrepreneurs who own and operate an average of five stores. Ten of our domestic franchisees operate more than 50 stores, including our largest domestic franchisee who operates 135 stores. Our principal sources of revenues from domestic store operations are Company-owned store sales and royalty payments based on retail sales by our franchisees. Our domestic network of Company-owned stores also plays an important strategic role in our predominantly franchised operating structure. In addition to generating revenues and earnings, we use our domestic Company-owned stores as test sites for new products and promotions as well as store operational improvements and as forums for training new store managers and prospective franchisees. We also believe that our domestic Company-owned stores add to the economies of scale available for advertising, marketing and other costs

that are primarily borne by our franchisees. While we continue to be primarily a franchised business, we continually evaluate our mix of domestic Company-owned and franchise stores in an effort to optimize our long-term profitability.

Our domestic Company-owned store operations are divided into eight geographic areas located throughout the contiguous United States while our domestic franchise operations are divided into four regions. Our team members within these areas provide direct supervision over our domestic Company-owned stores; provide training, store operational audits and marketing services and provide financial analysis and store development services to our franchisees. We maintain a close relationship with our franchise stores through regional franchise teams, an array of computer-based training materials that help franchise stores comply with our standards and franchise advisory groups that facilitate communications between us and our franchisees.

Table of Contents***Domestic supply chain***

During 2013, our domestic supply chain segment accounted for \$1.01 billion, or 56% of our consolidated revenues. Our domestic supply chain segment is comprised primarily of 16 regional dough manufacturing and supply chain centers that manufacture fresh dough on a daily basis and purchase, receive, store and deliver quality pizza-related food products and other complementary items to all of our Company-owned stores and over 99% of our domestic franchise stores. On average, each regional dough manufacturing and supply chain center serves approximately 300 stores, generally located within a one-day delivery radius. We regularly supply nearly 5,000 stores with various supplies and ingredients, of which, nine product groups account for over 90% of the volume. Our domestic supply chain segment made approximately 523,000 full-service deliveries in 2013 or approximately two deliveries per store per week, and we produced over 300 million pounds of dough during 2013.

We believe that our franchisees voluntarily choose to obtain food, supplies and equipment from us because we offer the most efficient, convenient and cost-effective alternative, while also offering both quality and consistency. In addition, our domestic supply chain segment offers a profit-sharing arrangement to franchisees that purchase all of their food for their stores from our domestic dough manufacturing and supply chain centers. This profit-sharing arrangement generally offers domestic Company-owned stores and participating franchisees with 50% (or a higher percentage in the case of Company-owned stores and certain franchisees who operate a larger number of stores) of their regional supply chain center's pre-tax profits. Profits are shared with the franchisees based upon each franchisee's purchases from our supply chain centers. We believe these arrangements strengthen our ties with these franchisees.

The information systems used by our domestic dough manufacturing and supply chain centers are an integral part of the quality service we provide our stores. We use routing strategies and software to optimize our daily delivery schedules, which maximizes on-time deliveries. Through our strategically located dough manufacturing and supply chain center locations and proven routing systems, we achieved a fill rate of over 99% during 2013. Our supply chain center drivers unload food and supplies and stock store shelves typically during non-peak store hours, which minimize disruptions in store operations.

International

During 2013, our international segment accounted for \$242.6 million, or 13% of our consolidated revenues. At December 29, 2013, we had 5,900 international franchise stores. The principal sources of revenues from our international operations are royalty payments generated by retail sales from franchise stores and sales of food and supplies to franchisees in certain markets.

We have grown by nearly 2,200 international stores over the past five years. During 2013, we had 573 net international store openings, including 125 net stores in India, 76 net stores in Turkey, 51 net stores in the United Kingdom, 42 net stores in Japan and 41 net stores in Australia. Our international franchisees adapt our standard operating model, within certain parameters, to satisfy the local eating habits and consumer preferences of various regions outside the United States. Currently, most of our international stores are operated under master franchise agreements, and we plan to continue entering into master franchise agreements with qualified franchisees to expand our international operations in selected markets. We believe that our international franchise stores appeal to potential franchisees because of our well-recognized brand name, the limited capital expenditures required to open and operate our stores and our system's favorable store economics. While we have a significant presence in our top ten international markets, we believe that our current store base is approximately half of the total long-term potential store base in those markets. Of these top ten markets, there are four master franchise companies that are publicly traded on stock exchanges in Australia, India, Mexico and the United Kingdom, which collectively oversee seven of these top ten markets. The following table shows our store count as of December 29, 2013 in our top ten international markets,

which account for approximately 73% of our international stores.

Market	Number of stores
United Kingdom	771
India	677
Mexico	590
Australia	505
South Korea	390
Canada	380
Turkey	360
Japan	287
France	227
Netherlands	144

Table of Contents

Domestic franchise program

As of December 29, 2013, our 4,596 domestic franchise stores were owned and operated by our 958 domestic franchisees. The success of our franchise formula, which enables franchisees to benefit from our brand name with a relatively low initial capital investment, has attracted a large number of motivated entrepreneurs as franchisees. As of December 29, 2013, the average domestic franchisee owned and operated five stores and had been in our franchise system for nearly sixteen years. At the same time, ten of our domestic franchisees operated more than 50 stores, including our largest domestic franchisee who operates 135 stores, and 372 of our domestic franchisees operate a single store.

Franchisees

We apply rigorous standards to prospective franchisees. We generally require prospective domestic franchisees to manage a store for at least one year before being granted a franchise. This enables us to observe the operational and financial performance of a potential franchisee prior to entering into a long-term contract. We also generally restrict the ability of domestic franchisees to be involved in other businesses, which focuses our franchisees' attention on operating their stores. As a result, the vast majority of our domestic franchisees have historically come from within the Domino's Pizza system. We believe these standards are largely unique to the franchise industry and result in qualified and focused franchisees operating their stores.

Franchise agreements

We enter into franchise agreements with domestic franchisees under which the franchisee is granted the right to operate a store in a particular location for a term of ten years, with options to renew for an additional term of ten years. We currently have a franchise contract renewal rate of approximately 99%. Under the current standard franchise agreement, we assign an exclusive area of primary responsibility to each franchise store. During the term of the franchise agreement, the franchisee is required to pay a 5.5% royalty fee on sales, subject, in limited instances, to lower rates based on area development agreements, sales initiatives and new store incentives. We have the contractual right, subject to state law, to terminate a franchise agreement for a variety of reasons, including, but not limited to, a franchisee's failure to make required payments when due or failure to adhere to specified Company policies and standards.

Franchise store development

We assist domestic franchisees with selecting store sites and conforming the space to the physical specifications required for a Domino's Pizza store. Each domestic franchisee selects the location and design for each store, subject to our approval, based on accessibility and visibility of the site and demographic factors, including population density and anticipated traffic levels. We also sell fixtures and equipment to many of our franchise stores.

International franchise program

Franchisees

The vast majority of our markets outside of the contiguous United States are operated by master franchisees with franchise and distribution rights for entire regions or countries; in a few select markets, we franchise directly to individual store operators. Prospective master franchisees are required to possess or have access to local market knowledge required to establish and develop Domino's Pizza stores. The local market knowledge focuses on the ability to identify and access targeted real estate sites along with expertise in local customs, culture, consumer behavior and

laws. We also seek candidates that have access to sufficient capital to meet growth and development plans.

Master franchise agreements

Our master franchise agreements generally grant the franchisee exclusive rights to develop or sub-franchise stores and the right to operate supply chain centers in a particular geographic area for a term of 10 to 20 years, with options to renew for additional terms. The agreements typically contain growth clauses requiring franchisees to open a minimum number of stores within a specified period. The master franchisee is generally required to pay an initial, one-time franchise fee as well as an additional franchise fee upon the opening of each new store. In addition, the master franchisee is required to pay a continuing royalty fee as a percentage of retail sales, which varies among international markets, and averaged approximately 3.1% in 2013.

Table of Contents

Franchise training and support

Training store managers and employees is a critical component of our success. We require all domestic franchisees to complete initial and ongoing training programs provided by us. In addition, under the standard domestic franchise agreement, domestic franchisees are required to implement training programs for their store employees. We assist our domestic and international franchisees by making certain training materials available to them for their use in training store managers and employees, including computer-based training materials, comprehensive operations manuals and franchise development classes. We also maintain communications with our franchisees online through various newsletters, electronic communications and through face-to-face meetings.

Franchise operations

We enforce stringent standards over franchise operations to protect the Domino's Pizza® brand. All franchisees are required to operate their stores in compliance with written policies, standards and specifications, which include matters such as menu items, ingredients, materials, supplies, services, furnishings, decor and signs. Each franchisee owns and operates their own stores and controls the day-to-day operations of their respective stores. We also provide ongoing support to our franchisees, including training, marketing assistance and consultation to franchisees who experience financial or operational difficulties. We have established several advisory boards, through which franchisees contribute to developing system-wide initiatives.

Domino's re-image campaign

We have embarked upon a system-wide campaign to re-image our stores in accordance with our franchise contracts. This campaign, designed to improve our brand image and in-store customer experience, involves upgrading store interiors and store signs. As part of this campaign, we expect to relocate a certain number of stores to improve our brand visibility. Our re-image campaign formally began in November 2013, and we and our franchisees plan to continue to re-image and relocate our domestic stores until each store meets our new image standards. Our plan is that we and our franchisees will be significantly complete in relocating or re-imaging our domestic franchise and Company-owned stores by the end of 2017.

Marketing operations

Our domestic stores have historically contributed 4% or 5% of their retail sales to fund national marketing and advertising campaigns, with additional required contributions to local market-level programs. Beginning in 2010, all domestic franchisees contributed 5.5% (subject, in limited instances, to lower rates based on certain incentives and waivers) of their retail sales for national advertising. In January 2013, with the support of the domestic franchise system, domestic franchisees amended their standard franchise agreements to require a contribution of 6% (subject, in limited instances, to lower rates based on certain incentives and waivers) of their retail sales for national advertising. We currently anticipate that this 6% contribution rate, which took effect in 2013, will remain in place for the foreseeable future. In those markets where we have co-operative advertising programs, our domestic stores are still able to contribute to market-level media campaigns at their discretion. These national and market-level funds are administered by Domino's National Advertising Fund Inc., or DNAF, our not-for-profit advertising subsidiary. The funds remitted to DNAF are used primarily to purchase media for advertising, but also support market research, field communications, public relations, commercial production, talent payments and other activities supporting the Domino's Pizza® brand. DNAF also provides cost-effective print resources to our domestic stores for use in local marketing that reinforce our national branding strategy. In addition to the national and market-level advertising contributions, domestic stores spend additional amounts on local store marketing, including targeted database mailings, saturation print mailings and community involvement through school and civic organizations. Additionally,

we may occasionally partner with other organizations in an effort to promote the Domino's Pizza® brand.

By communicating a common brand message at the national, local market and store levels, we create and reinforce a powerful, consistent marketing message to consumers. This is evidenced by our successful marketing campaign with the slogan "Oh Yes We Did." Since introducing our improved pizza recipe and this new marketing campaign in the fourth quarter of 2009, we have received significant attention in the news media, social networking internet sites and other media outlets, and have experienced positive same store sales growth in our domestic stores. Over the past five years, we estimate that domestic stores have invested approximately \$1.4 billion in national, local and co-operative advertising in the United States.

Internationally, franchisees also commit significant dollars in advertising efforts in their markets and these marketing efforts are the responsibility of the franchisee in each local market. We assist international franchisees with their marketing efforts through marketing workshops and knowledge sharing of best practices and successful concepts.

Table of Contents

Third-party suppliers

We have maintained active relationships of 20 years or more with more than half of our major third-party suppliers. Our supply partners are required to meet strict quality standards to ensure food safety. We review and evaluate our supply partners' quality assurance programs through, among other actions, on-site visits, third party audits and product evaluations to ensure compliance with our standards. We believe that the length and quality of our relationships with third-party suppliers provides us with priority service and quality products at competitive prices.

We believe that two factors have been critical to maintaining long-lasting relationships and keeping our purchasing costs low. First, we are one of the largest domestic volume purchasers of pizza-related products such as flour, cheese, sauce and pizza boxes, which allows us to maximize leverage with our third-party suppliers when items are put out for bid on a scheduled basis. Second, we use a combination of single-source and multi-source procurement strategies. Each supply category is evaluated along a number of criteria including value of purchasing leverage, consistency of quality and reliability of supply to determine the appropriate number of third-party suppliers.

We currently purchase our pizza cheese from a single supplier. Under the arrangement with this supplier, which was entered into in October 2012, the supplier agreed to provide an uninterrupted supply of cheese and the Company agreed to a five-year pricing period during which it agreed to purchase all of its primary pizza cheese for the Company's domestic stores from this supplier or, alternatively, pay to the supplier an amount reflecting any benefit previously received by the Company under the new pricing terms. The pricing schedule is directly correlated to the Chicago Mercantile Exchange (CME) block cheddar price. The majority of our meat toppings come from a single supplier under a contract that began in November 2010 and expires in May 2014. We have the right to terminate these arrangements for quality failures and for uncured breaches.

We believe that alternative third-party suppliers for all of these ingredients are available, and all of our pizza boxes, sauces and other ingredients are sourced from various third-party suppliers. While we may incur additional costs if we are required to replace any of our supply partners, we do not believe that such additional costs would have a material adverse effect on our business. Since 2003, we have been party to a multi-year agreement with Coca-Cola for the contiguous United States. This contract was renegotiated in December 2013 and provides for Coca-Cola to continue to be our exclusive beverage supplier and expires on December 31, 2018 or at such time as a minimum number of cases of Coca-Cola® products are purchased by us, whichever occurs last. We continually evaluate each supply category to determine the optimal sourcing strategy.

We have not experienced any significant shortages of supplies or any delays in receiving our food or beverage inventories, restaurant supplies or products. Prices charged to us by our supply partners are subject to fluctuation and we have historically been able to pass increased costs and savings on to our stores. We periodically enter into supplier contracts to manage the risk from changes in commodity prices. We do not engage in speculative transactions nor do we hold or issue financial instruments for trading purposes.

Competition

The U.S. and international pizza delivery and carry-out segments are highly competitive. Domestically, we compete against regional and local companies as well as national chains Pizza Hut®, Papa John's® and Little Caesars Pizza®. Internationally, we compete primarily against Pizza Hut®, Papa John's® and country-specific national and local companies. We generally compete on the basis of product quality, location, image, service and price. We also compete on a broader scale with quick service and other international, national, regional and local restaurants. In addition, the overall food service industry and the QSR sector in particular are intensely competitive with respect to product quality, price, service, convenience and concept. The industry is often affected by changes in consumer tastes,

economic conditions, demographic trends and consumers' disposable income. We compete within the food service industry and the QSR sector not only for customers, but also for employees, suitable real estate sites and qualified franchisees.

Government regulation

We are subject to various federal, state and local laws affecting the operation of our business, as are our franchisees, including various health, sanitation, fire and safety standards. Each store is subject to licensing and regulation by a number of governmental authorities, which include zoning, health, safety, sanitation, building and fire agencies in the jurisdiction in which the store is located. In connection with maintaining our stores, we may be required to expend funds to meet certain federal, state and local regulations, including regulations requiring that remodeled or altered stores be accessible to persons with disabilities. Difficulties in obtaining, or the failure to obtain, required licenses or approvals could delay or prevent the opening of a new store in a particular area or cause an existing store to cease operations. Our supply chain facilities are also licensed and subject to similar regulations by federal, state and local health and fire codes.

Table of Contents

We are also subject to the Fair Labor Standards Act and various other federal and state laws governing such matters as minimum wage requirements, overtime and other working conditions and citizenship requirements. A significant number of our food service personnel are paid at rates related to the applicable minimum wage, and past increases in the minimum wage have increased our labor costs, as would future increases.

We are subject to the rules and regulations of the Federal Trade Commission and various state laws regulating the offer and sale of franchises. The Federal Trade Commission and various state laws require that we furnish a franchise disclosure document containing certain information to prospective franchisees, and a number of states require registration of the franchise disclosure document with state authorities. We are operating under exemptions from registration in several states based on the net worth of our operating subsidiary, Domino's Pizza LLC and experience. Substantive state laws that regulate the franchisor-franchisee relationship presently exist in a substantial number of states, and bills have been introduced in Congress from time to time that would provide for federal regulation of the franchisor-franchisee relationship. The state laws often limit, among other things, the duration and scope of non-competition provisions, the ability of a franchisor to terminate or refuse to renew a franchise and the ability of a franchisor to designate sources of supply. We believe that our franchise disclosure document, together with any applicable state versions or supplements, and franchising procedures comply in all material respects with both the Federal Trade Commission guidelines and all applicable state laws regulating franchising in those states in which we have offered franchises.

Internationally, our franchise stores are subject to national and local laws and regulations that often are similar to those affecting our domestic stores, including laws and regulations concerning franchises, labor, health, sanitation and safety. Our international stores are also often subject to tariffs and regulations on imported commodities and equipment, and laws regulating foreign investment. We believe that our international disclosure statements, franchise offering documents and franchising procedures comply in all material respects with the laws of the foreign countries in which we have offered franchises.

Privacy and data protection

We are subject to a number of privacy and data protection laws and regulations globally. The legislative and regulatory landscape for privacy and data protection continues to evolve, and there has been an increase in attention given to privacy and data protection issues with the potential to affect directly our business, including recently enacted laws and regulations in the United States and internationally requiring notification to individuals and government authorities of security breaches involving certain categories of personal information. We have a privacy policy posted on our website at www.dominos.com and believe that we are in material compliance therewith.

Trademarks

We have many registered trademarks and service marks and believe that the Domino[®] mark and Domino's Pizza[®] names and logos, in particular, have significant value and are important to our business. Our policy is to pursue registration of our trademarks and to vigorously oppose the infringement of any of our trademarks. We license the use of our registered marks to franchisees through franchise agreements.

Environmental matters

We are not aware of any federal, state or local environmental laws or regulations that will materially affect our earnings or competitive position, or result in material capital expenditures. However, we cannot predict the effect of possible future environmental legislation or regulations. During 2013, there were no material capital expenditures for environmental control facilities, and no such material expenditures are anticipated in 2014.

Employees

As of December 29, 2013, we had approximately 10,000 employees, who we refer to as team members, in our Company-owned stores, supply chain centers, World Resource Center (our corporate headquarters) and regional offices. None of our team members are represented by a labor union or covered by a collective bargaining agreement. As franchisees are independent business owners, they and their employees are not included in our employee count. We consider our relationship with our employees and franchisees to be good. We estimate the total number of people who work in the Domino's Pizza system, including our employees, franchisees and the employees of franchisees, was over 220,000 as of December 29, 2013.

Table of Contents

Safety

Our commitment to safety is embodied in our hiring, training and review process. Before an applicant is considered for hire as a delivery driver in the United States, motor vehicle records are reviewed to ensure a minimum safe driving record of one or two years. In addition, we require regular checks of driving records and proof of insurance for delivery drivers throughout their employment with us. Our safety and security department oversees security matters for our domestic Company-owned stores. Security and safety personnel oversee security measures at domestic Company-owned store locations and assist local authorities in investigations of incidents involving our stores or personnel.

Community activities

We believe in supporting the communities we serve, and we base our corporate giving on three simple elements: delivering charitable support to our own team members, to our customers, and to national programs.

National philanthropic partner

We have a tradition of creating multi-year partnerships with a national charity to raise funds and public awareness for the organization. Our current national philanthropic partner is St. Jude Children's Research Hospital. St. Jude is internationally recognized for its pioneering work in finding cures and saving children with cancer and other catastrophic diseases. Through a variety of internal and consumer-based activities, including a national fundraising campaign called *Thanks and Giving*, the Domino's Pizza system has contributed more than \$20.0 million to St. Jude during our ten years of partnership, including approximately \$4.0 million in 2013. In addition to raising funds, the Domino's Pizza system has supported St. Jude through in-kind donations, including hosting hospital-wide pizza parties for patients and their families. The Domino's Pizza system also helps St. Jude build awareness through the inclusion of the St. Jude logo on millions of our pizza boxes and through a link on our consumer web site.

The Domino's Pizza Partners Foundation

Founded in 1986, the mission of the Partners Foundation is Team Members Helping Team Members. Completely funded by team member and franchise contributions, the foundation is a separate, not-for-profit organization that has disbursed nearly \$14.0 million since its inception, to meet the needs of team members facing crisis situations, such as fire, accidents, illness or other personal tragedies.

Domino's Pizza contributions

During 2013, the Domino's Pizza system in the U.S. directly contributed as well as helped raise approximately \$4.7 million to external charitable organizations in monetary and in-kind giving.

Franchisee involvement

In addition to the work that we do in the community on a corporate level, we are proud to have the support of nearly 2,500 franchisees around the world who choose to get involved with local charities to make a difference in their communities. Franchisees participate in numerous local programs with schools, hospitals and other charitable organizations, delivering pizzas and offering monetary support.

Research and development

We operate research and product development facilities at our World Resource Center in Ann Arbor, Michigan. Company-sponsored research and development activities, which include, among other things, testing new products for possible menu additions, are an important activity to us and our franchisees. We do not consider the amounts spent on research and development to be material.

Insurance

We maintain insurance coverage for general liability, owned and non-owned automobile liability, workers compensation, employment practices liability, directors and officers liability, fiduciary, property (including leaseholds and equipment, as well as business interruption), commercial crime, global risks, data asset and network security risks, product contamination and other coverages in such form and with such limits as we believe are customary for a business of our size and type.

Table of Contents

We have retention programs for workers' compensation, general liability and owned and non-owned automobile liabilities for certain periods prior to December 1998 and for periods after December 2001. We are generally responsible for up to \$1.0 million per occurrence under these retention programs for workers' compensation and general liability. We are also generally responsible for between \$500,000 and \$3.0 million per occurrence under these retention programs for owned and non-owned automobile liabilities. Pursuant to the terms of our standard franchise agreement, franchisees are also required to maintain minimum levels of insurance coverage at their expense and to have us named as an additional insured on their liability policies.

Working capital

Information about the Company's working capital is included in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7., pages 42 through 44.

Customers

The Company's business is not dependent upon a single customer or small group of customers, including franchisees. No customer accounted for more than 10% of total consolidated revenues in 2011, 2012 or 2013. Our largest franchisee operates 1,270 stores in six international markets, and accounted for approximately 11.7% of our total store count. Additionally, royalty revenues from this franchisee accounted for approximately 1.6% of our consolidated revenues in 2013. Furthermore, as our international franchise business has a minimal amount of general and administrative expenses allocated to its markets and does not have cost of sales, a disproportionate amount of these royalty revenues result in earnings to us.

Seasonal operations

The Company's business is not typically seasonal.

Backlog orders

The Company has no backlog orders as of December 29, 2013.

Government contracts

No material portion of the Company's business is subject to renegotiation of profits or termination of contracts or subcontracts at the election of the United States government.

Financial information about business segments and geographic areas

Financial information about international and United States markets and business segments is incorporated herein by reference to Selected Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related footnotes in Part II, Item 6., pages 29 through 30, Item 7. and 7A., pages 31 through 47 and Item 8., pages 48 through 77, respectively, of this Form 10-K.

Available information

The Company makes available, free of charge, through its internet website www.dominosbiz.com, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as

soon as reasonably practicable after electronically filing such material with the Securities and Exchange Commission. You may read and copy any materials filed with the Securities and Exchange Commission at the Securities and Exchange Commission's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the Securities and Exchange Commission at 1-800-SEC-0330. This information is also available at www.sec.gov. The reference to these website addresses does not constitute incorporation by reference of the information contained on the websites and should not be considered part of this document.

Table of Contents

Item 1A. Risk Factors.

The quick service restaurant pizza category is highly competitive and such competition could adversely affect our operating results.

We compete in the United States against three national chains, as well as many regional and local businesses. We could experience increased competition from existing or new companies in the pizza category which could create increasing pressures to grow our business in order to maintain our market share. If we are unable to maintain our competitive position, we could experience downward pressure on prices, lower demand for our products, reduced margins, the inability to take advantage of new business opportunities and the loss of market share, all of which would have an adverse effect on our operating results and could cause our stock price to decline.

We also compete on a broader scale with quick service and other international, national, regional and local restaurants. The overall food service market and the quick service restaurant sector are intensely competitive with respect to food quality, price, service, image, convenience and concept, and are often affected by changes in:

consumer tastes;

international, national, regional or local economic conditions;

disposable purchasing power;

demographic trends; and

currency fluctuations related to our international operations.

We compete within the food service market and the quick service restaurant sector not only for customers, but also for management and hourly employees, suitable real estate sites and qualified franchisees. Our domestic supply chain segment is also subject to competition from outside suppliers. While over 99% of domestic franchisees purchased food, equipment and supplies from us in 2013, domestic franchisees are not required to purchase food, equipment or supplies from us and they may choose to purchase from outside suppliers. If other suppliers who meet our qualification standards were to offer lower prices or better service to our franchisees for their ingredients and supplies and, as a result, our franchisees chose not to purchase from our domestic supply chain centers, our financial condition, business and results of operations would be adversely affected.

If we fail to successfully implement our growth strategy, which includes opening new domestic and international stores, our ability to increase our revenues and operating profits could be adversely affected.

A significant component of our growth strategy includes the opening of new domestic and international stores. We and our franchisees face many challenges in opening new stores, including, among others:

availability of financing with acceptable terms;

selection and availability of suitable store locations;

negotiation of acceptable lease or financing terms;

securing required domestic or foreign governmental permits and approvals;

employment and training of qualified personnel; and

general economic and business conditions.

The opening of additional franchise stores also depends, in part, upon the availability of prospective franchisees who meet our criteria. Our failure to add a significant number of new stores would adversely affect our ability to increase revenues and operating income.

We are currently planning to expand our international operations in many of the markets where we currently operate and in selected new markets. This may require considerable management time as well as start-up expenses for market development before any significant revenues and earnings are generated. Operations in new foreign markets may achieve low margins or may be unprofitable, and expansion in existing markets may be affected by local economic and market conditions. Therefore, as we expand internationally, we or our franchisees may not experience the operating margins we expect, our results of operations may be negatively impacted and our common stock price may decline.

We may also pursue strategic acquisitions as part of our business. If we are able to identify acquisition candidates, such acquisitions may be financed, to the extent permitted under our debt agreements, with substantial debt or with potentially dilutive issuances of equity securities.

Table of Contents

The food service market is affected by consumer preferences and perceptions. Changes in these preferences and perceptions may lessen the demand for our products, which would reduce sales and harm our business.

Food service businesses are affected by changes in consumer tastes, international, national, regional and local economic conditions, and demographic trends. For instance, if prevailing health or dietary preferences cause consumers to avoid pizza and other products we offer in favor of foods that are perceived as more healthy, our business and operating results would be harmed. Moreover, because we are primarily dependent on a single product, if consumer demand for pizza should decrease, our business would suffer more than if we had a more diversified menu, as many other food service businesses do.

Reports of food-borne illness or food tampering could reduce sales and harm our business.

Reports, whether true or not, of food-borne illnesses (such as E. Coli, avian flu, bovine spongiform encephalopathy, hepatitis A, trichinosis or salmonella) and injuries caused by food tampering have in the past severely injured the reputations of participants in the QSR sector and could in the future as well. The potential for acts of terrorism on our global food supply also exists and, if such an event occurs, it could have a negative impact on us and could severely hurt sales and profits. In addition, our reputation is an important asset; as a result, anything that damages our reputation could immediately and severely affect our sales and profits. Media reports of illnesses and injuries, whether accurate or not, could force some stores to close or otherwise reduce sales at such stores. In addition, reports of food-borne illnesses or food tampering, even those occurring solely at the restaurants of competitors, could, by resulting in negative publicity about the restaurant industry, adversely affect us on a local, regional, national or international basis.

Increases in food, labor and other costs could adversely affect our profitability and operating results.

An increase in our operating costs could adversely affect our profitability. Factors such as inflation, increased food costs, increased labor and employee health and benefit costs, increased rent costs and increased energy costs may adversely affect our operating costs. Most of the factors affecting costs are beyond our control and, in many cases, we may not be able to pass along these increased costs to our customers or franchisees. Most ingredients used in our pizza, particularly cheese, are subject to significant price fluctuations as a result of seasonality, weather, demand and other factors. The cheese block price per pound averaged \$1.75 in 2013, and the estimated increase in Company-owned store food costs from a hypothetical \$0.25 adverse change in the average cheese block price per pound would have been approximately \$2.1 million in 2013. Labor costs are largely a function of the minimum wage for a majority of our store personnel and certain supply chain center personnel and, generally, are also a function of the availability of labor. Food, including cheese costs and labor represent approximately 50% to 60% of a typical Company-owned store's sales.

We do not have long-term contracts with certain of our suppliers, and as a result they could seek to significantly increase prices or fail to deliver.

We do not have long-term contracts or arrangements with certain of our suppliers. Although in the past we have not experienced significant problems with our suppliers, our suppliers may implement significant price increases or may not meet our requirements in a timely fashion, or at all. The occurrence of any of the foregoing could have a material adverse effect on our results of operations.

Shortages or interruptions in the supply or delivery of fresh food products could adversely affect our operating results.

We and our franchisees are dependent on frequent deliveries of fresh food products that meet our specifications. Shortages or interruptions in the supply of fresh food products caused by unanticipated demand, problems in production or distribution, financial or other difficulties of suppliers, inclement weather or other conditions could adversely affect the availability, quality and cost of ingredients, which would adversely affect our operating results.

Any prolonged disruption in the operations of any of our dough manufacturing and supply chain centers could harm our business.

We operate 16 regional dough manufacturing and supply chain centers, one thin crust manufacturing center and one vegetable processing center in the contiguous United States and a total of seven dough manufacturing and supply chain centers in Alaska, Hawaii and Canada. Our domestic dough manufacturing and supply chain centers service all of our Company-owned stores and over 99% of our domestic franchise stores. As a result, any prolonged disruption in the operations of any of these facilities, whether due to technical or labor difficulties, destruction or damage to the facility, real estate issues or other reasons, could adversely affect our business and operating results.

Table of Contents

Our success depends in part upon effective advertising, and lower advertising funds may reduce our ability to adequately market the Domino's Pizza® brand.

We have been routinely named a MegaBrand by Advertising Age. Each Domino's store located in the contiguous United States is obligated to pay a percentage of its sales in advertising fees. In fiscal 2013, each store in the contiguous United States generally was required to contribute 6% of their sales to DNAF (subject, in limited instances, to lower rates based on certain incentives and waivers), which uses such fees for national advertising in addition to contributions for local market-level advertising. We currently anticipate that this 6% contribution rate will remain in place for the foreseeable future. While additional funds for advertising in the past have been provided by us, our franchisees and other third parties, none of these additional funds are legally required. The lack of continued financial support for advertising activities could significantly curtail our marketing efforts, which may in turn materially and adversely affect our business and our operating results.

We face risks of litigation and negative publicity from customers, franchisees, suppliers, employees and others in the ordinary course of business, which can or could divert our financial and management resources. Any adverse litigation or publicity may negatively impact our financial condition and results of operations.

Claims of illness or injury relating to food quality or food handling are common in the food service industry, and vehicular accidents and injuries occur in the food delivery business. Claims within our industry of improper supplier actions have also recently arisen that, if made against one of our suppliers, could potentially damage our brand image. In addition, class action lawsuits have been filed, and may continue to be filed, against various quick service restaurants alleging, among other things, that quick service restaurants have failed to disclose the health risks associated with high-fat foods and that quick service restaurant marketing practices have encouraged obesity. In addition to decreasing our sales and profitability and diverting our management resources, adverse publicity or a substantial judgment against us could negatively impact our financial condition, results of operations and brand reputation, thereby hindering our ability to attract and retain franchisees and grow our business.

Further, we may be subject to employee, franchisee and other claims in the future based on, among other things, discrimination, harassment, wrongful termination and wage, rest break and meal break issues, and those claims relating to overtime compensation. We are currently subject to these types of claims and have been subject to these types of claims in the past. If one or more of these claims were to be successful or if there is a significant increase in the number of these claims or if we receive significant negative publicity, our business, financial condition and operating results could be harmed.

Loss of key employees or our inability to attract and retain new qualified employees could hurt our business and inhibit our ability to operate and grow successfully.

Our success in the highly competitive pizza delivery and carry-out business will continue to depend to a significant extent on our leadership team and other key management personnel. Other than with our President and Chief Executive Officer, J. Patrick Doyle, we do not have long-term employment agreements with any of our executive officers. As a result, we may not be able to retain our executive officers and key personnel or attract additional qualified management. While we do not have long-term employment agreements with our executive officers, for all of our executive officers we have non-compete and non-solicitation agreements that extend for 24 months following the termination of such executive officer's employment. Our success also will continue to depend on our ability to attract and retain qualified personnel to operate our stores, dough manufacturing and supply chain centers and international operations. The loss of these employees or our inability to recruit and retain qualified personnel could have a material adverse effect on our operating results.

Table of Contents

Our international operations subject us to additional risk. Such risks and costs may differ in each country in which we and our franchisees do business and may cause our profitability to decline due to increased costs.

We conduct a significant portion of our business outside the United States. Our financial condition and results of operations may be adversely affected if global markets in which our franchise stores compete are affected by changes in political, economic or other factors. These factors, over which neither we nor our franchisees have control, may include:

recessionary or expansive trends in international markets;

changing labor conditions and difficulties in staffing and managing our foreign operations;

increases in the taxes we pay and other changes in applicable tax laws;

legal and regulatory changes, and the burdens and costs of our compliance with a variety of foreign laws;

changes in inflation rates;

changes in exchange rates and the imposition of restrictions on currency conversion or the transfer of funds;

difficulty in collecting our royalties and longer payment cycles;

expropriation of private enterprises;

increases in anti-American sentiment and the identification of the Domino's Pizza® brand as an American brand;

political and economic instability; and

other external factors.

Adverse economic conditions and the global debt crisis subject us to additional risk.

Our financial condition and results of operations are impacted by global markets and economic conditions over which neither we nor our franchisees have control. An economic downturn may result in a reduction in the demand for our products, longer payment cycles, slower adoption of new technologies and increased price competition. Poor economic conditions may adversely affect the ability of our franchisees to pay royalties or amounts owed, and could have a material adverse impact on our ability to pursue our growth strategy, which would reduce cash collections and

in turn, may materially and adversely affect our ability to service our debt obligations.

Deterioration of the market value of sovereign debt of several European countries, together with the risk of contagion to other more stable countries, could result in fiscal reforms (including austerity measures), sovereign debt restructurings, currency instability, increased counterparty credit risk, high levels of volatility, and, potentially, disruptions in the credit and equity markets, as well as other outcomes that might adversely impact us. With respect to currency instability, concerns exist in the eurozone over the overall stability of the euro and the suitability of the euro as a single currency given the diverse economic and political circumstances among countries that use the euro as their currency. These concerns could lead to the re-introduction of individual currencies in one or more of these countries, or, in more extreme circumstances, the possible dissolution of the euro currency entirely. Should the euro dissolve entirely, the legal and contractual consequences for holders of euro denominated obligations would be determined by laws in effect at such time. In addition, the capital market disruption that would likely accompany any such redenomination event could have a material adverse impact on our liquidity and financial condition. Furthermore, any redenomination event would likely be accompanied by significant economic dislocation, particularly within the eurozone countries, which in turn could have an adverse impact on demand for our products, and accordingly, on our revenue and cash flows. As of December 29, 2013, we had 1,855 stores in Europe, up from 975 at 2008 year end.

Fluctuations in the value of the U.S. dollar in relation to other currencies may lead to lower revenues and earnings.

Exchange rate fluctuations could have an adverse effect on our results of operations. Approximately 12.2% of our total revenues in 2011, 13.0% of our total revenues in 2012 and 13.5% of our total revenues in 2013 were derived from our international segment, a majority of which were denominated in foreign currencies. Sales made by franchise stores outside the United States are denominated in the currency of the country in which the store is located, and this currency could become less valuable in U.S. dollars as a result of exchange rate fluctuations. Unfavorable currency fluctuations could lead to increased prices to customers outside the United States or lower profitability to our franchisees outside the United States, or could result in lower revenues for us, on a U.S. dollar basis, from such customers and franchisees. A hypothetical 10% adverse change in the foreign currency rates in each of our top ten international markets, based on store count, would have resulted in a negative impact on revenues of approximately \$9.7 million in 2013.

Table of Contents

We may not be able to adequately protect our intellectual property, which could harm the value of our brand and branded products and adversely affect our business.

We depend in large part on our brand and branded products and believe that they are very important to our business. We rely on a combination of trademarks, copyrights, service marks, trade secrets and similar intellectual property rights to protect our brand and branded products. The success of our business depends on our continued ability to use our existing trademarks and service marks in order to increase brand awareness and further develop our branded products in both domestic and international markets. We have registered certain trademarks and have other trademark registrations pending in the United States and foreign jurisdictions. Not all of the trademarks that we currently use have been registered in all of the countries in which we do business, and they may never be registered in all of these countries. We may not be able to adequately protect our trademarks and our use of these trademarks may result in liability for trademark infringement, trademark dilution or unfair competition. All of the steps we have taken to protect our intellectual property in the United States and in foreign countries may not be adequate. In addition, the laws of some foreign countries do not protect intellectual property rights to the same extent as the laws of the United States. Further, through acquisitions of third parties, we may acquire brands and related trademarks that are subject to the same risks as the brands and trademarks we currently own.

We may from time to time be required to institute litigation to enforce our trademarks or other intellectual property rights, or to protect our trade secrets. Such litigation could result in substantial costs and diversion of resources and could negatively affect our sales, profitability and prospects regardless of whether we are able to successfully enforce our rights.

Our earnings and business growth strategy depends on the success of our franchisees, and we may be harmed by actions taken by our franchisees, or employees of our franchisees, that are outside of our control.

A significant portion of our earnings comes from royalties generated by our franchise stores. Franchisees are independent operators, and their employees are not our employees. We provide limited training and support to franchisees, but the quality of franchise store operations may be diminished by any number of factors beyond our control. Consequently, franchisees may not successfully operate stores in a manner consistent with our standards and requirements, or may not hire and train qualified managers and other store employees. If they do not, our image and reputation may suffer, and as a result our revenues and stock price could decline. While we try to ensure that our franchisees maintain the quality of our brand and branded products, our franchisees may take actions that adversely affect the value of our intellectual property or reputation. As of December 29, 2013, we had 958 domestic franchisees operating 4,596 domestic stores. Ten of these franchisees each operate over 50 domestic stores, including our largest domestic franchisee who operates 135 stores, and the average franchisee owns and operates five stores.

In addition, our international master franchisees are generally responsible for the development of significantly more stores than our domestic franchisees. As a result, our international operations are more closely tied to the success of a smaller number of franchisees than our domestic operations. Our largest international master franchisee operates 1,270 stores in six markets, which accounts for approximately 22% of our total international store count. Our domestic and international franchisees may not operate their franchises successfully. If one or more of our key franchisees were to become insolvent or otherwise were unable or unwilling to pay us our royalties or other amounts owed, our business and results of operations would be adversely affected.

Interruption, failure or compromise of our information technology, communications systems and electronic data could hurt our ability to effectively serve our customers and protect customer data, which could damage our reputation and adversely affect our business and operating results.

A significant portion of our retail sales depends on the continuing operation of our information technology and communications systems, including but not limited to, Domino's PULSE, our online ordering platform and our credit card processing systems. Our information technology, communication systems and electronic data may be vulnerable to damage or interruption from earthquakes, terrorist attacks, floods, fires, power loss, telecommunications failures, computer viruses, loss of data, unauthorized data breaches or other attempts to harm our systems. Additionally, we operate data centers that are also subject to break-ins, sabotage and intentional acts of vandalism that could cause disruptions in our ability to serve our customers and protect customer data. Some of our systems are not fully redundant, and our disaster recovery planning cannot account for all eventualities. The occurrence of a natural disaster, intentional sabotage or other unanticipated problems could result in lengthy interruptions in our service. Any errors or vulnerabilities in our systems, or damage to or failure of our systems, could result in interruptions in our services and non-compliance with certain regulations, which could reduce our revenues and profits, and damage our business and brand.

Table of Contents

We rely on proprietary and commercially available systems, software, tools and monitoring to provide security for processing, transmission and storage of confidential customer information, such as payment card and personal information and any unauthorized data breaches could damage our reputation and adversely affect our business.

Unauthorized intrusion into the portions of our computer systems or those of our franchisees that process and store information related to customer transactions may result in the theft of customer data. Furthermore, the systems currently used for transmission and approval of payment card transactions, and the technology utilized in payment cards themselves, all of which can put payment card data at risk, are determined and mandated by payment card industry standards, not by us. In addition to improper activities by third parties, bugs in newly-deployed or early stage advances in hardware and software capabilities, encryption technology, and other events or developments may facilitate or result in a compromise or breach of our computer systems. Any such compromises or breaches could cause interruptions in operations and damage to the reputation of the Domino's Pizza® brand, subject us to costs and liabilities and hurt sales, revenues and profits.

We are subject to extensive government regulation and requirements issued by other groups and our failure to comply with existing or increased regulations could adversely affect our business and operating results.

We are subject to numerous federal, state, local and foreign laws and regulations, as well as, requirements issued by other groups, including those relating to:

the preparation, sale and labeling of food;

building and zoning requirements;

environmental protection;

minimum wage, overtime and other labor requirements;

compliance with securities laws and New York Stock Exchange listed company rules;

compliance with the Americans with Disabilities Act of 1990, as amended;

working and safety conditions;

menu labeling and other nutritional requirements;

compliance with the Payment Card Industry Data Security Standards (PCI DSS) and similar requirements;

compliance with the Patient Protection and Affordable Care Act, and subsequent amendments; and

compliance with the Dodd-Frank Wall Street Reform and Consumer Protection Act and any rules promulgated thereunder.

The Patient Protection and Affordable Care Act requires employers such as us to provide health insurance for all qualifying employees or pay penalties for not providing coverage. We are evaluating the impact the new law will have on us, and although we cannot predict with certainty the financial and operational impacts the new law will have, we expect that the requirement to provide expanded health care coverage to employees above what we currently provide could have an adverse effect on our results of operations and financial position, as well as an adverse effect on some of our larger franchisees. We anticipate that the majority of the increases in these costs will begin in 2015 and escalate in subsequent years. Such increases may be large enough to materially impact labor costs for us and our franchisees.

We may also become subject to legislation or regulation seeking to tax and/or regulate high-fat foods, foods with high sugar and salt content, or foods otherwise deemed to be unhealthy. If we fail to comply with existing or future laws and regulations, we may be subject to governmental or judicial fines or sanctions. In addition, our capital expenditures could increase due to remediation measures that may be required if we are found to be noncompliant with any of these laws or regulations.

We are also subject to a Federal Trade Commission rule and to various state and foreign laws that govern the offer and sale of franchises. Additionally, these laws regulate various aspects of the franchise relationship, including terminations and the refusal to renew franchises. The failure to comply with these laws and regulations in any jurisdiction or to obtain required government approvals could result in a ban or temporary suspension on future franchise sales, fines or other penalties or require us to make offers of rescission or restitution, any of which could adversely affect our business and operating results.

Table of Contents

Our current insurance coverage may not be adequate, insurance premiums for such coverage may increase and we may not be able to obtain insurance at acceptable rates, or at all.

We have retention programs for workers' compensation, general liability and owned and non-owned automobile liabilities. We are generally responsible for up to \$1.0 million per occurrence under these retention programs for workers' compensation and general liability. We are also generally responsible for between \$500,000 and \$3.0 million per occurrence under these retention programs for owned and non-owned automobile liabilities. Total insurance limits under these retention programs vary depending upon the period covered and range up to \$110.0 million per occurrence for general liability and owned and non-owned automobile liabilities and up to the applicable statutory limits for workers' compensation. These insurance policies may not be adequate to protect us from liabilities that we incur in our business. In addition, in the future our insurance premiums may increase and we may not be able to obtain similar levels of insurance on reasonable terms, or at all. Any such inadequacy of, or inability to obtain insurance coverage could have a material adverse effect on our business, financial condition and results of operations.

Our annual and quarterly financial results are subject to significant fluctuations depending on various factors, many of which are beyond our control, and if we fail to meet the expectations of securities analysts or investors, our share price may decline significantly.

Our sales and operating results can vary significantly from quarter-to-quarter and year-to-year depending on various factors, many of which are beyond our control. These factors include, among other things:

variations in the timing and volume of our sales and our franchisees' sales;

the timing of expenditures in anticipation of future sales;

sales promotions by us and our competitors;

changes in competitive and economic conditions generally;

changes in the cost or availability of our ingredients or labor; and

foreign currency exposure.

As a result, our operational performance may decline quickly and significantly in response to changes in order patterns or rapid decreases in demand for our products. We anticipate that fluctuations in operating results will continue in the future.

Our common stock price could be subject to significant fluctuations and/or may decline.

The market price of our common stock could be subject to significant fluctuations. Among the factors that could affect our stock price are:

changes planned or actual to our capital or debt structure;

variations in our operating results;

changes in revenues or earnings estimates or publication of research reports by analysts;

speculation in the press or investment community;

strategic actions by us or our competitors, such as sales promotions, acquisitions or restructurings;

actions by institutional and other stockholders;

changes in our dividend policy;

changes in the market values of public companies that operate in our business segments;

general market conditions; and

domestic and international economic factors unrelated to our performance.

The stock markets in general have experienced volatility that has sometimes been unrelated to the operating performance of particular companies. These broad market fluctuations may cause the trading price of our common stock to decline.

Table of Contents

Our substantial indebtedness could adversely affect our business and limit our ability to plan for or respond to changes in our business.

We have a substantial amount of indebtedness. As of December 29, 2013, our consolidated long-term indebtedness was approximately \$1.54 billion. We may also incur additional debt, which would not be prohibited under the terms of our current securitized debt agreements. Our substantial indebtedness could have important consequences to our business and our shareholders. For example, it could:

make it more difficult for us to satisfy our obligations with respect to our debt agreements;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow for other purposes; and

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate, thereby placing us at a competitive disadvantage compared to our peers that may have less debt.

In addition, the financial and other covenants we agreed to with our lenders may limit our ability to incur additional indebtedness, make investments, pay dividends and engage in other transactions, and the leverage may cause potential lenders to be less willing to loan funds to us in the future. Our failure to comply with these covenants could result in an event of default that, if not cured or waived, could result in the acceleration of repayment of all of our indebtedness.

We may be unable to generate sufficient cash flow to satisfy our significant debt service obligations, which would adversely affect our financial condition and results of operations.

Our ability to make principal and interest payments on and to refinance our indebtedness will depend on our ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. If our business does not generate sufficient cash flow from operations, in the amounts projected or at all, or if future borrowings are not available to us under our variable funding notes in amounts sufficient to fund our other liquidity needs, our financial condition and results of operations may be adversely affected. If we cannot generate sufficient cash flow from operations to make scheduled principal amortization and interest payments on our debt obligations in the future, we may need to refinance all or a portion of our indebtedness on or before maturity, sell assets, delay capital expenditures or seek additional equity. If we are unable to refinance any of our indebtedness on commercially reasonable terms or at all or to effect any other action relating to our indebtedness on satisfactory terms or at all, our business may be harmed.

The terms of our securitized debt financing of certain of our wholly-owned subsidiaries have restrictive terms and our failure to comply with any of these terms could put us in default, which would have an adverse effect on our business and prospects.

Unless and until we repay all outstanding borrowings under our securitized debt, we will remain subject to the restrictive terms of these borrowings. The securitized debt, under which certain of our wholly-owned subsidiaries issued and guaranteed fixed rate notes and variable funding senior revolving notes, contain a number of covenants,

with the most significant financial covenant being a debt service coverage calculation. These covenants limit the ability of certain of our subsidiaries to, among other things:

sell assets;

alter the business we conduct;

engage in mergers, acquisitions and other business combinations;

declare dividends or redeem or repurchase capital stock;

incur, assume or permit to exist additional indebtedness or guarantees;

make loans and investments;

incur liens; and

enter into transactions with affiliates.

The securitized debt also requires us to maintain specified financial ratios at the end of each fiscal quarter. These restrictions could affect our ability to pay dividends or repurchase shares of our common stock. Our ability to meet these financial ratios can be affected by events beyond our control, and we may not satisfy such a test. A breach of this covenant could result in a rapid amortization event or default under the securitized debt. If amounts owed under the securitized debt are accelerated because of a default under the securitized debt and we are unable to pay such amounts, the investors may have the right to assume control of substantially all of the securitized assets.

Table of Contents

During the seven-year term following issuance, the outstanding senior notes will accrue interest at a fixed rate of 5.216% per year. Additionally, the senior notes have scheduled principal amortization payments of \$23.6 million in 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. If we meet certain conditions, including maximum leverage ratios of less than 4.5x total debt to EBITDA, we may elect to not make the scheduled principal payments. If one of the leverage ratios subsequently exceeds 4.5x, we must make up the payments we had elected not to make.

If we are unable to refinance or repay amounts under the securitized debt prior to the expiration of the seven-year term, our cash flow would be directed to the repayment of the securitized debt and, other than a weekly management fee sufficient to cover minimal selling, general and administrative expenses, would not be available for operating our business.

No assurance can be given that any refinancing or additional financing will be possible when needed or that we will be able to negotiate acceptable terms. In addition, our access to capital is affected by prevailing conditions in the financial and capital markets and other factors beyond our control. There can be no assurance that market conditions will be favorable at the times that we require new or additional financing.

The indenture governing the securitized debt will restrict the cash flow from the entities subject to the securitization to any of our other entities and upon the occurrence of certain events, cash flow would be further restricted.

In the event that a rapid amortization event occurs under the indenture (including, without limitation, upon an event of default under the indenture or the failure to repay the securitized debt at the end of the seven-year term), the funds available to us would be reduced or eliminated, which would in turn reduce our ability to operate or grow our business.

Table of Contents

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

We lease approximately 223,000 square feet for our World Resource Center located in Ann Arbor, Michigan under an operating lease with Domino's Farms Office Park, L.L.C., a unrelated company. The lease, as amended, expires in December 2022 and has two five-year renewal options.

We own two domestic Company-owned store buildings and five supply chain center buildings. We also own two store buildings that we lease to domestic franchisees. All other domestic Company-owned stores are leased by us, typically under five-year leases with one or two five-year renewal options. All other domestic and international supply chain centers are leased by us, typically under leases ranging between five and 15 years with one or two five-year renewal options. All other franchise stores are leased or owned directly by the respective franchisees. We believe that our existing headquarters and other leased and owned facilities are adequate to meet our current requirements.

Item 3. Legal Proceedings.

We are a party to lawsuits, revenue agent reviews by taxing authorities and administrative proceedings in the ordinary course of business which include, without limitation, workers' compensation, general liability, automobile and franchisee claims. We are also subject to suits related to employment practices.

Litigation is subject to many uncertainties, and the outcome of individual litigated matters is not predictable with assurance. Included in the matters referenced above, we are party to six employment practice cases and five casualty cases. We have established legal and insurance accruals for losses relating to these cases which we believe are reasonable based upon our assessment of the current facts and circumstances. However, it is reasonably possible that our ultimate losses could exceed the amounts recorded by \$5.0 million. The remaining cases referenced above could be decided unfavorably to us and could require us to pay damages or make other expenditures in amounts or a range of amounts that cannot be estimated with accuracy. In management's opinion, these matters, individually and in the aggregate, should not have a significant adverse effect on the financial condition of the Company, and the established accruals adequately provide for the estimated resolution of such claims.

We were also named as a defendant in a lawsuit along with a large franchisee and the franchisee's delivery driver. During the third quarter of 2013, the jury delivered a \$32.0 million judgment for the plaintiff where we were found to be 60% liable. We deny liability and filed an appeal of the verdict on a variety of grounds. This case is covered under our casualty insurance program, subject to a \$3.0 million deductible. We also have indemnity provisions in our franchise agreements.

While we may occasionally be party to large claims, including class action suits, we do not believe that these matters, individually or in the aggregate, will materially affect our financial position, results of operations or cash flows.

Item 4. Mine Safety Disclosures.

Not applicable.

Table of Contents**Part II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

As of February 18, 2014, Domino's Pizza, Inc. had 170,000,000 authorized shares of common stock, par value \$0.01 per share, of which 55,733,015 were issued and outstanding. Domino's Pizza, Inc.'s common stock is traded on the New York Stock Exchange (NYSE) under the ticker symbol DPZ.

The following table presents the high and low closing prices by quarter for Domino's Pizza, Inc.'s common stock, as reported by the NYSE, and dividends declared per common share.

	High	Low	Dividends Declared Per Share
2012:			
First quarter (January 2, 2012 – March 25, 2012)	\$ 38.22	\$ 28.92	\$ 3.00
Second quarter (March 26, 2012 – June 17, 2012)	37.81	28.75	
Third quarter (June 18, 2012 – September 9, 2012)	36.19	28.75	
Fourth quarter (September 10, 2012 – December 30, 2012)	43.46	33.93	
2013:			
First quarter (December 31, 2012 – March 24, 2013)	\$ 51.19	\$ 43.55	\$ 0.20
Second quarter (March 25, 2013 – June 16, 2013)	60.72	49.65	0.20
Third quarter (June 17, 2013 – September 8, 2013)	64.00	57.01	0.20
Fourth quarter (September 9, 2013 – December 29, 2013)	70.68	63.04	0.20

Our Board of Directors declared a quarterly dividend of \$0.25 per common share on February 12, 2014 payable on March 28, 2014 to shareholders of record at the close of business on March 14, 2014.

We currently anticipate continuing the payment of quarterly cash dividends. The actual amount of such dividends will depend upon future earnings, results of operations, capital requirements, our financial condition and certain other factors. There can be no assurance as to the amount of free cash flow that we will generate in future years and, accordingly, dividends will be considered after reviewing returns to shareholders, profitability expectations and financing needs and will be declared at the discretion of our Board of Directors.

As of February 18, 2014, there were 857 registered holders of record of Domino's Pizza, Inc.'s common stock.

We have a Board of Directors-approved open market share repurchase program for up to \$200.0 million of our common stock, of which approximately \$55.2 million remained available at December 29, 2013 for future purchases of our common stock. Any future purchases of our common stock would be funded by current cash amounts, available borrowings or future excess cash flow. On February 12, 2014, the Board of Directors approved an increase to the Company's open market share repurchase program, resulting in a total remaining authorized amount for additional share repurchases of \$200.0 million.

The following table summarizes our repurchase activity during the fourth quarter ended December 29, 2013:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
Period #1 (September 9, 2013 to October 6, 2013)	3,100	\$ 61.48	3,100	\$ 75,297,405
Period #2 (October 7, 2013 to November 3, 2013)	72,170	66.72	71,000	70,562,397
Period #3 (November 4, 2013 to December 1, 2013)	23,113	66.87	21,998	69,091,347
Period #4 (December 2, 2013 to December 29, 2013)	202,695	68.84	201,105	55,246,931
Total	301,078	\$ 68.11	297,203	\$ 55,246,931

(1) Includes 3,875 shares purchased as part of the Company's employee stock purchase discount plan. During the fourth quarter, the shares were purchased at an average price of \$68.19. All of the remaining shares presented were purchased pursuant to the publicly announced program.

Table of Contents

The comparative stock performance line graph below compares the cumulative shareholder return on the common stock of Domino's Pizza, Inc. for the five-year period between December 31, 2008 through December 31, 2013, with cumulative total return on (i) the Total Return Index for the New York Stock Exchange (the NYSE Composite Index), (ii) the Standard & Poor's 500 Index (the S&P 500) and (iii) the peer group, the Standard & Poors 400 Restaurant Index (the S&P 400 Restaurant Index). Management believes that the companies included in the S&P 400 Restaurant Index appropriately reflect the scope of the Company's operations and match the competitive market in which the Company operates. The cumulative total return computations set forth in the performance graph assume the investment of \$100 in the Company's common stock, the NYSE Composite Index, the S&P 500 Index and the S&P 400 Restaurant Index on December 31, 2008.

Table of Contents**Item 6. Selected Financial Data.**

The selected financial data set forth below should be read in conjunction with, and is qualified by reference to, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related notes included in this Form 10-K. The selected financial data below, with the exception of store counts and same store sales growth, have been derived from the audited consolidated financial statements of Domino's Pizza, Inc. and subsidiaries. This historical data is not necessarily indicative of results to be expected for any future period.

Total stores	8,999	9,351	9,742	10,255	10,886

- (1) The fiscal 2009 and fiscal 2010 Other amounts represent the net gains recognized on the repurchase and retirement of principal on the 2007 Notes.
- (2) The working capital amounts exclude restricted cash amounts of \$91.1 million in 2009, \$85.5 million in 2010, \$92.6 million in 2011, \$60.0 million in 2012 and \$125.5 million in 2013.
- (3) Same store sales growth is calculated including only sales from stores that also had sales in the comparable period of the prior year, but excluding sales from certain seasonal locations such as stadiums and concert arenas. International same store sales growth is calculated similarly to domestic same store sales growth. Changes in international same store sales are reported on a constant dollar basis which reflects changes in international local currency sales. The 53rd week in fiscal 2009 had no impact on reported same store sales growth percentages.
- (4) In connection with our recapitalization in 2012, the Company borrowed \$1.575 billion of fixed rate notes and used a portion of the proceeds from the borrowings to repay in full the outstanding principal under the 2007 Notes, pay accrued interest on the 2007 Notes, pay transaction-related fees and expenses and fund a reserve account for the payment of interest on the 2012 fixed rate notes. In fiscal 2012, the Company recorded \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet in fiscal 2011 is being amortized into interest expense over the seven-year expected term of the debt. In connection with the repayment of the 2007 Notes, we wrote off \$8.1 million, net, of unamortized deferred financing fees and interest rate swap. Additionally, we incurred \$2.1 million of interest expense on the 2007 borrowings subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 Notes, resulting in the payment of interest on both the 2007 and 2012 facilities for a short period of time. Further, the Company incurred \$0.3 million of other net 2012 Recapitalization-related general and administrative expenses, including stock compensation expenses, payroll taxes related to the payments made to certain stock option holders and legal and professional fees incurred in connection with the 2012 Recapitalization. In connection with the 2012 Recapitalization, the Company also paid a special cash dividend on our outstanding common stock totaling \$171.1 million, made a corresponding anti-dilution equivalent payment of \$13.5 million on certain stock options and accrued an estimated \$2.4 million for payments

to be made to certain performance-based restricted stock grants upon vesting. Total cash paid for common stock dividends and related anti-dilution payments totaled \$185.5 million in fiscal 2012 and as of December 30, 2012 the total estimated liability recorded for future cash dividend payments on certain performance-based restricted stock was approximately \$1.5 million. Of the total amount of \$187.0 million recorded for common stock dividends and related anti-dilution payments, \$10.2 million was recorded as a reduction of additional paid-in capital and \$176.8 million was recorded as an increase in retained deficit.

- (5) The 2009 fiscal year includes 53 weeks, while the 2010, 2011, 2012 and 2013 fiscal years each include 52 weeks.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Overview

Our fiscal year typically includes 52 weeks, comprised of three twelve-week quarters and one sixteen-week quarter. Every five or six years our fiscal year includes an extra (or 53rd) week in the fourth quarter. Fiscal 2011, fiscal 2012 and fiscal 2013 each consisted of 52 weeks.

Description of the Business

We are the number one pizza delivery company in the United States with a 23.6% share of the pizza delivery market, and the second largest pizza company in the carry-out segment based on reported consumer spending. We also have a leading international presence, ranking as the second largest pizza company in the world, based on number of units and retail sales. We operate through a network of 390 Company-owned stores, all of which are in the United States, and 10,496 franchise stores located in all 50 states and in more than 70 international markets. In addition, we operate 19 regional manufacturing and supply chain centers in the contiguous United States as well as seven dough manufacturing and supply chain centers outside the contiguous United States.

Our financial results are driven largely by retail sales at our franchise and Company-owned stores. Changes in retail sales are driven by changes in same store sales and store counts. We monitor both of these metrics very closely, as they directly impact our revenues and profits, and strive to consistently increase both same store sales and our store counts. Retail sales drive royalty payments from franchisees as well as Company-owned store and supply chain revenues. Retail sales are primarily impacted by the strength of the Domino's Pizza® brand, the results of our marketing promotions, our ability to execute our store operating model, the overall global economic environment and the success of our business strategies.

We devote significant attention to our brand-building efforts, which is evident in our system's estimated \$1.4 billion of domestic advertising spending over the past five years and our frequent designation as a MegaBrand by *Advertising Age*. Additionally, our international franchisees invest significant amounts in advertising efforts in their markets. We plan on continuing to build our brand and retail sales by satisfying customers worldwide with our pizza delivery and carry-out offerings and by continuing to invest significant amounts in the advertising and marketing of the Domino's Pizza® brand.

We also pay particular attention to the store economics, or the investment performance of a store to its owner, of both our franchise and Company-owned stores. We believe that our system's favorable store economics benefit from the relatively small initial and ongoing investments required to own and operate a Domino's Pizza store. We believe these favorable investment requirements, coupled with a strong brand message supported by significant advertising spending, as well as high-quality and focused menu offerings, drive strong store economics, which, in turn, drive demand for new stores.

Business Performance

During 2013, the Company continued to produce steady, consistent results with strong earnings growth and cash flows. The Company produced positive order count growth, sales growth and store growth domestically, while also producing sales growth and record store growth internationally. The results in 2013 demonstrated that we continue to deliver the products, service and value that are resonating with our global consumers. We have continued to improve store level profitability for our domestic franchise and Company-owned stores in 2013. Further, over the past several years, our focus domestically has been improving our Company through several initiatives, including investments to improve upon our menu, marketing, technology, operations and franchise base. In 2012, we launched our new

Handmade Pan Pizza, which we believe has been an important driver in the success of our domestic stores over the past two years. Technology remains a focus for us as digital orders continue to grow. In 2011, we launched a new mobile application for the iPhone and iPod touch, and in 2012, we launched a new mobile application for the Android smartphone and for Amazon's Kindle Fire. In 2013, we launched our enhanced online ordering profiles platform, allowing customers the ability to reorder their favorite order in as few as five clicks, or about 30 seconds. We believe our new product platforms combined with an innovative, transparent and effective advertising campaign, continued focus on operational excellence and new technology, generated strong sales and earnings growth for the Company in 2011, 2012 and 2013. Additionally, we have implemented a relocation and re-imaging campaign aimed at increasing store sales and market share through improved brand visibility. We believe our accomplishments and efforts in each of these areas will improve our brand image and brand positioning in the future.

Table of Contents

Our international division continued to post strong same store sales growth (6.2% in 2013) and had a record 573 net store openings, including 125 net stores in India, 76 net stores in Turkey, 51 net stores in the United Kingdom, 42 net stores in Japan and 41 net stores in Australia. Continued strong same store sales growth combined with continued store count growth, demonstrate the consistency and reliability of this growing business segment.

These strong results from both our domestic and international stores produced earnings growth and increased cash flows in 2013. We believe that our franchise business model provides a solid structure on which to build consistent retail sales and store growth that results in strong cash flows that we can deploy to drive shareholder value.

Worldwide store counts have increased from 9,351 at the beginning of 2011 to 10,886 at the end of 2013. This growth in store counts can be attributed to the global growth of our brand and our pizza delivery and carry-out concepts as well as the economics inherent in our system, which attract new franchisees and encourage existing franchisees to grow their businesses. Domestic same store sales increased 3.5% in 2011, 3.1% in 2012 and 5.4% in 2013. The increase in domestic same store sales throughout the past three years was attributable to our innovative and effective advertising campaign for our improved pizza recipe, continued focus on operational excellence, innovative technology initiatives and efforts to strengthen our franchisee base. The Company experienced traffic increases in our domestic stores in 2011, 2012 and 2013. International same store sales increased 6.8% in 2011, 5.2% in 2012 and 6.2% in 2013. Internationally, same stores sales growth continues to result from the growing acceptance of pizza and delivered pizza around the globe and the successful execution of the Domino's Pizza concept.

In 2013, global retail sales, which are total retail sales at Company-owned and franchise stores worldwide, increased 8.2% as compared to 2012. Retail sales for franchise stores are reported to the Company by its franchisees and are not included in Company revenues. This increase was driven primarily by both domestic and international same store sales growth as well as an increase in our worldwide store counts during the trailing four quarters, offset in part by the negative impact of foreign currency exchange rates. Domestic same store sales growth reflected the sustained positive sales trends and the continued success of our new products and promotions. International same store sales growth reflected continued strong performance in the markets where we compete. In 2012, global retail sales increased 6.5% as compared to 2011, driven primarily by both domestic and international same store sales growth as well as an increase in our worldwide store counts during the trailing four quarters, offset in part by the negative impact of foreign currency exchange rates.

Our revenues increased \$123.8 million or 7.4% in 2013 and increased \$26.2 million or 1.6% in 2012. The increase in revenues in 2013 was driven primarily by higher supply chain revenues due to higher volumes from increased store order counts, higher commodity prices, and a change in the mix of products sold, higher international revenues attributable to same store sales and store count growth and higher domestic franchise and Company-owned store revenues due to an increase in same store sales. These increases were offset in part by the negative impact on international revenues from changes in foreign currency exchange rates. The increase in revenues in 2012 was driven by higher international revenues attributable to same store sales and store count growth, higher supply chain revenues due primarily to a change in the mix of products sold offset in part by slightly lower volumes, and higher domestic franchise revenues due to an increase in same store sales. These increases were offset, in part by lower Company-owned store revenues, resulting from the sale of 58 Company-owned stores to multiple franchisees during fiscal 2011 and six Company-owned stores in the first quarter of 2012, as well as the negative impact on international revenues of changes in foreign currency exchange rates.

Income from operations increased \$31.5 million or 11.2% in 2013 and increased \$23.2 million or 8.9% in 2012. The increase in 2013 was driven primarily by higher royalty revenues from both domestic and international franchise stores, higher domestic supply chain margins as described in more detail below and higher domestic Company-owned store margins. These increases were offset, in part, by higher general and administrative expenses and the negative

impact of the changes in foreign currency exchange rates. The increase in 2012 was driven primarily by higher royalty revenues from both domestic and international franchise stores, higher domestic Company-owned store margins and higher domestic supply chain margins as described in more detail below. These increases were offset, in part, by the negative impact of the changes in foreign currency exchange rates and higher general and administrative expenses.

Table of Contents

Net income increased \$30.6 million or 27.2% in 2013 and increased \$7.0 million or 6.7% in 2012. The increase in 2013 was due primarily to domestic and international same store sales growth, global store growth, higher domestic supply chain margins, higher domestic Company-owned store margins and a lower effective tax rate and was negatively impacted by higher general and administrative expenses and changes in foreign currency exchange rates. The increase in net income in 2012 was due primarily to domestic and international same store sales growth, global store growth, higher domestic Company-owned store margins and higher domestic supply chain margins and was negatively impacted by changes in foreign currency exchange rates and higher general and administrative expenses. Additionally, fiscal 2012 was negatively impacted by approximately \$10.5 million of net pre-tax expenses incurred in connection with the Company's recapitalization.

We operate with significant levels of debt. As of December 29, 2013, consolidated debt was \$1.54 billion. Historically, a large portion of our cash flows from operations has been used to make principal and interest payments on our indebtedness as well as distributions to shareholders in the form of dividends and stock repurchases. Our securitized debt requires principal and interest payments until the expected repayment date of January 2019. The scheduled principal amortization payments are \$23.6 million in 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During fiscal 2013 and fiscal 2012, the Company made principal payments of approximately \$23.6 million and approximately \$17.7 million. Overall, we believe that our ability to consistently produce significant excess cash flows allows us the flexibility not only to service our debt but also to invest in our growing business as well as return cash to our shareholders.

Critical accounting policies and estimates

The following discussion and analysis of financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires our management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an ongoing basis, our management evaluates its estimates, including those related to revenue recognition, allowances for uncollectible receivables, long-lived and intangible assets, insurance and legal matters, share-based payments and income taxes. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates. Changes in our accounting policies and estimates could materially impact our results of operations and financial condition for any particular period. We believe that our most critical accounting policies and estimates are:

Revenue recognition. We earn revenues through our network of domestic Company-owned and franchise stores, dough manufacturing and supply chain centers and international operations. Retail sales from Company-owned stores and royalty revenues resulting from the retail sales from franchise stores are recognized as revenues when the items are delivered to or carried out by customers. Retail sales are generally reported and related royalties paid to the Company on a weekly basis based on a percentage of retail sales, as specified in the related standard franchise agreement (generally 5.5% of domestic franchise retail sales). In the event that retail sales are not reported timely by a franchisee, the Company will record royalty revenues in the period earned based on an estimate of the franchisee's sales; however, these estimates are not significant and have historically been materially consistent with the actual amounts. Revenues from Company-owned stores and royalty revenues from franchise stores fluctuate from time-to-time as a result of store count changes. For example, if a Company-owned store that generated \$500,000 in revenue in fiscal 2012 is sold to a franchisee in fiscal 2013, revenues from Company-owned stores would have declined by \$500,000 in fiscal 2013, while franchise royalty revenues would have increased by only \$27,500 in fiscal 2013, as we generally collect 5.5% of a domestic franchisee's retail sales. Sales of food from our supply chain centers

are recognized as revenues upon delivery of the food to franchisees, while sales of equipment and supplies are generally recognized as revenues upon shipment of the related products to franchisees.

Allowances for uncollectible receivables. We closely monitor our accounts and notes receivable balances and provide allowances for uncollectible amounts as a result of our reviews. These estimates are based on, among other factors, historical collection experience and a review of our receivables by aging category. Additionally, we may also provide allowances for uncollectible receivables based on specific customer collection issues that we have identified. While write-offs of bad debts have historically been within our expectations and the provisions established, management cannot guarantee that future write-offs will not exceed historical rates. Specifically, if the financial condition of our franchisees were to deteriorate resulting in an impairment of their ability to make payments, additional allowances may be required.

Table of Contents

At December 29, 2013, our total allowance for uncollectible accounts receivables was approximately \$5.1 million, compared to \$5.9 million at December 30, 2012, representing approximately 4.6% and 5.9% of our consolidated gross accounts receivable at both those respective year-ends. A 10% change in our allowance for uncollectible accounts receivables at December 29, 2013 would result in a change in reserves of approximately \$0.5 million and a change in income before provision for income taxes by the same amount. Currently, management does not believe that there is a reasonable likelihood that there will be a material change in the future estimates or assumptions that were used to calculate our allowance for uncollectible accounts receivables.

Long-lived and intangible assets. We record long-lived assets, including property, plant and equipment and capitalized software, at cost. For acquisitions of franchise operations, we estimate the fair values of the assets and liabilities acquired based on physical inspection of assets, historical experience and other information available to us regarding the acquisition. We depreciate and amortize long-lived assets using useful lives determined by us based on historical experience and other information available to us. We evaluate the potential impairment of long-lived assets at least annually based on various analyses, including the projection of undiscounted cash flows and whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. For Company-owned stores, we perform related impairment tests on an operating market basis, which the Company has determined to be the lowest level for which identifiable cash flows are largely independent of other cash flows. If the carrying amount of a long-lived asset exceeds the amount of the expected future undiscounted cash flows of that asset or the estimated fair value of the asset, an impairment loss is recognized and the asset is written down to its estimated fair value.

We have not made any significant changes in the methodology used to project the future market cash flows of Company-owned stores during the years presented. Same store sales fluctuations and the rates at which operating costs will fluctuate in the future are key factors in evaluating recoverability of the related assets. If our same store sales significantly decline or if operating costs increase and we are unable to recover these costs, the carrying value of our Company-owned stores, by market, may be unrecoverable and we may be required to recognize an impairment charge. At December 29, 2013, we determined that our long-lived assets were not impaired.

A significant portion of our goodwill relates to acquisitions of domestic franchise stores and is included in our domestic stores segment, specifically, our Company-owned stores. We evaluate goodwill annually for impairment by comparing the fair value of the reporting unit, which is primarily determined using the present value of historical cash flows, to its carrying value. If the carrying value of the reporting unit exceeds the fair value, goodwill would be impaired. We have not made any significant changes in the methodology used to evaluate goodwill impairment during the years presented. At December 29, 2013, the fair value of our business operations with associated goodwill exceeded their recorded carrying value, including the related goodwill. If cash flows generated by our Company-owned stores were to decline significantly in the future or there were negative revisions to the market multiple assumption, we may be required to recognize a goodwill impairment charge. However, based on the latest impairment analysis, we do not believe it is reasonably likely that there could be changes in assumptions that would trigger impairment.

Insurance and legal matters. We are a party to lawsuits and legal proceedings arising in the ordinary course of business. Management closely monitors these legal matters and estimates the probable costs for the resolution of such matters. These estimates are primarily determined by consulting with both internal and external parties handling the matters and are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. While historically our actual losses have been materially consistent with our reserves, legal judgments can be volatile and difficult to predict. Accordingly, if our estimates relating to legal matters proved inaccurate for any reason, we may be required to increase or decrease the related expense in future periods. We had accruals for legal matters of approximately \$5.0 million at both December 30, 2012 and December 29, 2013.

For certain periods prior to December 1998 and for periods after December 2001, we maintain insurance coverage for workers' compensation, general liability and owned and non-owned auto liability under insurance policies requiring payment of a deductible for each occurrence up to between \$500,000 and \$3.0 million, depending on the policy year and line of coverage. The related insurance reserves are based on undiscounted independent actuarial estimates, which are based on historical information along with assumptions about future events. Specifically, various methods, including analyses of historical trends and actuarial valuation methods, are utilized to estimate the cost to settle reported claims, and claims incurred but not yet reported. The actuarial valuation methods develop estimates of the future ultimate claim costs based on the claims incurred as of the balance sheet date. When estimating these liabilities, several factors are considered, including the severity, duration and frequency of claims, legal cost associated with claims, healthcare trends and projected inflation. Over the past several years, we have experienced improvements in frequency of claims; however increasing severity of claims and medical costs has partially offset these trends.

Table of Contents

Our methodology for determining our exposure has remained consistent throughout the years presented. Management believes that the various assumptions developed and actuarial methods used to determine our self-insurance reserves are reasonable and provide meaningful data that management uses to make its best estimate of our exposure to these risks. While historically our actual losses have been materially consistent with our reserves, changes in assumptions for such factors as medical costs and legal actions, as well as changes in actual experience, could cause our estimates to change in the near term which could result in an increase or decrease in the related expense in future periods. A 10% change in our self-insurance liability at December 29, 2013 would have affected our income before provision for income taxes by approximately \$3.9 million for fiscal 2013. We had accruals for insurance matters of approximately \$37.2 million at December 30, 2012 and \$38.8 million at December 29, 2013.

Share-based payments. We recognize compensation expense related to our share-based compensation arrangements over the requisite service period based on the grant date fair value of the awards. The grant date fair value of each restricted stock and performance-based restricted stock award is equal to the market price of our stock on the date of grant. The grant date fair value of each stock option award is estimated using a Black-Scholes option pricing model. The pricing model requires assumptions, including the expected life of the stock option, the risk-free interest rate, the expected dividend yield and expected volatility of our stock over the expected life, which significantly impact the assumed fair value. We are also required to estimate the expected forfeiture rate and only recognize expense for those awards expected to vest. We use historical data to determine these assumptions. Additionally, our stock option, restricted stock and performance-based restricted stock arrangements provide for accelerated vesting and the ability to exercise during the remainder of the ten-year stock option life upon the retirement of individuals holding the awards who have achieved specified service and age requirements. Management believes that the methods and various assumptions used to determine compensation expense related to these arrangements are reasonable, but if the assumptions change significantly for future grants, share-based compensation expense will fluctuate in future years.

Income taxes. We recognize deferred tax assets and liabilities based on the differences between the financial statement carrying amounts and the tax basis of assets and liabilities and reserves for uncertain tax positions. We measure deferred tax assets and liabilities using current enacted tax rates that will apply in the years in which we expect the temporary differences to be recovered or paid. Judgment is required in determining the provision for income taxes and related reserves, deferred tax assets and liabilities. These include establishing a valuation allowance related to the ability to realize certain deferred tax assets, if necessary. During fiscal 2012 and in connection with the sale of its six remaining Company-owned stores in a certain market to a franchisee, the Company recorded a deferred tax asset related to the capital loss that resulted from the write-off of the tax basis goodwill associated with the market that was sold. Management believes it is more likely than not that a portion of the deferred tax asset will not be realized and provided a valuation allowance of approximately \$0.9 million. The valuation allowance was recorded as an increase to the provision for income taxes and increased the Company's effective tax rate in 2012. On an ongoing basis, management will assess whether it remains more likely than not that the net deferred tax asset will be realized. The Company had no additional valuation allowances recorded for deferred tax assets as of December 29, 2013 or December 30, 2012. Our accounting for deferred tax assets represents our best estimate of future events. Our net deferred tax assets assume that we will generate sufficient taxable income in specific tax jurisdictions, based on our estimates and assumptions. Changes in our current estimates due to unanticipated events could have a material impact on our financial condition and results of operations.

The amounts relating to taxes recorded on the balance sheet, including tax reserves, also consider the ultimate resolution of revenue agent reviews based on estimates and assumptions. We believe we have appropriately accounted for our uncertain tax positions; however, tax audits, changes in tax laws and other unforeseen matters may result in us owing additional taxes. We adjust our reserves for uncertain tax positions when facts and circumstances change or due to the passage of time; for example the completion of a tax audit, or the expiration of a statute of limitations, or changes in penalty and interest reserves associated with uncertain tax positions. Management believes that our tax

positions comply with applicable tax law and that we have adequately provided for these matters. However, to the extent the final tax outcome of these matters is different than our recorded amounts, we may be required to adjust our tax reserves resulting in additional income tax expense or benefit in future periods.

Table of Contents**Same Store Sales Growth**

	2011	2012	2013

2013 compared to 2012

(tabular amounts in millions, except percentages)

Revenues. Revenues primarily consist of retail sales from our Company-owned stores, royalties and fees from our domestic and international franchise stores and sales of food, equipment and supplies from our supply chain centers to substantially all of our domestic franchise stores and certain international franchise stores. Company-owned store and franchise store revenues may vary significantly from period to period due to changes in store count mix, while supply chain revenues may vary significantly as a result of fluctuations in commodity prices, primarily cheese and meats.

Table of Contents

Consolidated revenues increased \$123.8 million or 7.4% in 2013. This increase in revenues was driven primarily by higher supply chain revenues due to a change in the mix of products sold, higher volumes from increased store order counts and higher commodity prices, higher international revenues attributable to same store sales and store count growth and higher domestic franchise and Company-owned store revenues due to an increase in same store sales. These increases were offset in part by the negative impact on international revenues of changes in foreign currency exchange rates. These changes in revenues are more fully described below.

Domestic stores. Domestic stores revenues are primarily comprised of retail sales from domestic Company-owned store operations as well as royalties from retail sales and other fees from domestic franchise stores, as summarized in the following table.

	2012		2013	
Domestic Company-owned stores	\$ 323.7	62.4%	\$ 337.4	61.4%
Domestic franchise	195.0	37.6%	212.4	38.6%
Total domestic stores revenues	\$ 518.7	100.0%	\$ 549.8	100.0%

Domestic stores revenues increased \$31.1 million or 6.0% in 2013. This increase was due primarily to royalty revenues earned on higher franchise same store sales and higher domestic Company-owned same store sales. These results are more fully described below.

Domestic Company-owned stores. Revenues from domestic Company-owned store operations increased \$13.8 million or 4.3% in 2013. This increase was due to a 3.9% increase in same store sales as compared to 2012. There were 388 domestic Company-owned stores in operation as of December 30, 2012 and 390 domestic Company-owned stores in operation as of December 29, 2013.

Domestic franchise. Revenues from domestic franchise operations increased \$17.4 million or 8.9% in 2013. This increase was due primarily to a 5.5% increase in same store sales as compared to 2012 and to a lesser extent, an increase in the average number of domestic franchise stores open during 2013. Revenues further benefited from fees paid by franchisees related to our insourced online ordering platform and we also incurred an increase in expenses related to these technology initiatives. Additionally, we contracted with a third party to manage our gift card program during 2013. In connection with this program change, we refined our assessment of our gift card liability and recorded approximately \$3.2 million of domestic franchise revenue and reimbursed approximately \$1.5 million to our national advertising fund, as discussed further in general and administrative expenses. There were 4,540 domestic franchise stores in operation as of December 30, 2012 and 4,596 domestic franchise stores in operation as of December 29, 2013.

Domestic supply chain. Revenues from domestic supply chain operations increased \$67.6 million or 7.2% in 2013. This increase was due primarily to higher volumes as a result of increased order counts at the store level, higher overall commodity prices, including cheese, a change in the mix of products sold and increases in sales of equipment and supplies. Cheese prices positively impacted revenues by approximately \$8.6 million in 2013.

International. International revenues primarily consist of royalties from retail sales and other fees from our international franchise stores and international supply chain sales. Revenues from international operations increased \$25.0 million or 11.5% in 2013. This increase was due to both higher international royalty and other revenues and higher international supply chain revenues. This increase was negatively impacted by changes in foreign currency exchange rates. These changes in international revenues are more fully described below.

	2012		2013	
International royalty and other	\$ 120.1	55.2%	\$ 133.7	55.1%
International supply chain	97.5	44.8%	108.9	44.9%
Total international revenues	\$ 217.6	100.0%	\$ 242.6	100.0%

International royalty and other. Revenues from international royalties and other increased \$13.6 million or 11.3% in 2013. This increase was due primarily to higher same store sales and an increase in the average number of international stores open during 2013, offset in part by the negative impact of changes in foreign currency exchange rates of approximately \$4.3 million in 2013. On a constant dollar basis (which excludes the impact of foreign currency exchange rates), same store sales increased 6.2% in 2013 compared to 2012. On a historical dollar basis (which includes the impact of foreign currency exchange rates), same store sales increased 2.8% in 2013 compared to 2012. The variance in our same store sales on a constant dollar basis versus a historical dollar basis in 2013 was caused by a stronger U.S. dollar when compared to the currencies in the international markets in which we compete. There were 5,327 international stores in operation as of December 30, 2012 and 5,900 international stores in operation as of December 29, 2013.

Table of Contents

International supply chain. Revenues from international supply chain operations increased \$11.4 million or 11.7% in 2013. This increase resulted primarily from higher volumes in 2013.

Cost of sales / Operating margin. Consolidated cost of sales consists primarily of domestic Company-owned store and supply chain costs incurred to generate related revenues. Components of consolidated cost of sales primarily include food, labor and occupancy costs.

The consolidated operating margin, which we define as revenues less cost of sales, increased \$47.7 million or 9.5% in 2013, as summarized in the following table.

	2012		2013	
Consolidated revenues	\$ 1,678.4	100.0%	\$ 1,802.2	100.0%
Consolidated cost of sales	1,177.1	70.1%	1,253.2	69.5%
Consolidated operating margin	\$ 501.3	29.9%	\$ 549.0	30.5%

The \$47.7 million increase in consolidated operating margin was due primarily to higher domestic and international franchise revenues, higher margins at our Company-owned stores and higher domestic supply chain margins. Franchise revenues do not have a cost of sales component and, as such, changes in franchise revenues have a disproportionate effect on the consolidated operating margin.

As a percentage of total revenues, our consolidated operating margin increased 0.6 percentage points in 2013, due primarily to a higher mix of franchise revenues and higher supply chain and Company-owned stores operating margins, offset in part by higher overall commodity prices, including cheese.

Domestic Company-owned stores. The domestic Company-owned store operating margin, which does not include other store-level costs such as royalties and advertising, increased \$4.5 million or 6.0% in 2013, as summarized in the following table.

	2012		2013	
Revenues	\$ 323.7	100.0%	\$ 337.4	100.0%
Cost of sales	247.4	76.4%	256.6	76.0%
Store operating margin	\$ 76.3	23.6%	\$ 80.8	24.0%

The \$4.5 million increase in the domestic Company-owned store operating margin was due primarily to higher same store sales, lower labor and related expenses, lower occupancy expenses, and lower insurance expenses, offset in part by an increase in overall commodity prices, including cheese. As a percentage of store revenues, the store operating margin increased 0.4 percentage points in 2013, as discussed in more detail below.

As a percentage of store revenues, food costs increased 0.5 percentage points to 27.6% in 2013, due primarily to higher overall commodity prices, including cheese. The cheese block price per pound averaged \$1.75 in 2013 compared to \$1.69 in 2012.

As a percentage of store revenues, occupancy costs, which include rent, telephone, utilities and depreciation, decreased 0.2 percentage points to 9.3% in 2013 due primarily to the positive impact of higher sales per store.

Edgar Filing: DOMINOS PIZZA INC - Form 10-K

As a percentage of store revenues, labor and related costs decreased 0.4 percentage points to 28.0% in 2013, due primarily to leveraging the higher sales per store.

As a percentage of store revenues, insurance costs decreased 0.3 percentage points to 2.8% in 2013, due primarily to lower health costs per store and the positive impact of higher sales per store.

Domestic supply chain. The domestic supply chain operating margin increased \$11.1 million or 11.2% in 2013, as summarized in the following table.

	2012		2013	
Revenues	\$ 942.2	100.0%	\$ 1,009.9	100.0%
Cost of sales	843.3	89.5%	899.9	89.1%
Domestic supply chain operating margin	\$ 98.9	10.5%	\$ 110.0	10.9%

The \$11.1 million increase in domestic supply chain operating margin was due primarily to higher volumes from increased store order counts and a change in the mix of products sold.

Table of Contents

As a percentage of domestic supply chain revenues, the domestic supply chain operating margin increased 0.4 percentage points in 2013 due primarily to the positive impact of higher volumes and lower health insurance costs, offset in part by higher commodity costs. Increases in certain food prices have a negative effect on the domestic supply chain operating margin percentage due to the fixed dollar margin earned by domestic supply chain on certain food items. Had the 2013 cheese prices been in effect during 2012, the domestic supply chain operating margin as a percentage of domestic supply chain revenues would have been approximately 10.4% for 2012 versus the reported 10.5%. However, the dollar margin would have been unaffected.

General and administrative expenses. General and administrative expenses increased \$16.2 million or 7.4% in 2013. These increases were due in part to an increase in non-cash compensation expense of \$4.4 million and higher variable performance-based compensation expenses of approximately \$2.0 million. General and administrative expenses also include a reimbursement of approximately \$1.5 million during 2013 to our national advertising fund related to their historical costs to support the Company's gift card program, as discussed above in domestic franchise revenues. Additionally, we continued our investments in technology and international initiatives, including the addition of team members in both areas, which also increased general and administrative expenses during 2013 compared to 2012.

Interest income. Interest income decreased slightly to \$0.2 million in 2013, from \$0.3 million in 2012.

Interest expense. Interest expense decreased \$12.6 million to \$88.9 million in 2013. The decrease was due primarily to approximately \$10.2 million of expenses incurred in the first quarter of 2012 related to the 2012 Recapitalization which did not recur in 2013, as well as from lower interest expense resulting from an average lower debt balance during 2013 compared to 2012.

Our cash borrowing rate decreased slightly, by 0.2 percentage points, to 5.3% during fiscal 2013. Our average outstanding debt balance, excluding capital lease obligations, was approximately \$1.5 billion in 2013 and approximately \$1.6 billion in 2012. The decrease in the Company's average outstanding debt balance resulted from the principal payments made on its fixed rate notes during 2013.

Provision for income taxes. Provision for income taxes increased \$13.3 million to \$82.1 million in 2013, due primarily to higher pre-tax income. The Company's effective income tax rate decreased 1.5 percentage points to 36.5% of pre-tax income in 2013 due in part to a tax benefit of approximately \$1.4 million recorded in the third quarter of 2013 related to prior tax years in connection with the Company revising its calculation for a deduction related to its domestic dough production.

2012 compared to 2011

(tabular amounts in millions, except percentages)

Revenues. Consolidated revenues increased \$26.2 million or 1.6% in 2012. This increase in revenues was due primarily to higher international revenues attributable to same store sales and store count growth, higher supply chain revenues due primarily to a change in the mix of products sold, offset in part by slightly lower volumes and higher domestic franchise revenues due to an increase in same store sales and store count growth. These increases were offset in part by lower Company-owned store revenues, resulting from the sale of 58 Company-owned stores to multiple franchisees during fiscal 2011 and six Company-owned stores in the first quarter of 2012, and the negative impact on international revenues of changes in foreign currency exchange rates. These changes in revenues are more fully described below.

Domestic stores. Domestic stores revenues are summarized in the following table.

	2011		2012	
Domestic Company-owned stores	\$ 336.3	64.3%	\$ 323.7	62.4%
Domestic franchise	187.0	35.7%	195.0	37.6%
Total domestic stores revenues	\$ 523.4	100.0%	\$ 518.7	100.0%

Domestic stores revenues decreased \$4.7 million or 0.9% in 2012. This decrease was due primarily to lower Company-owned store revenues, resulting from the sale of 58 Company-owned stores to multiple franchisees during fiscal 2011 and six Company-owned stores in the first quarter of 2012. The decrease was offset in part by higher domestic Company-owned and franchise same store sales. These results are more fully described below.

Domestic Company-owned stores. Revenues from domestic Company-owned store operations decreased \$12.6 million or 3.8% in 2012. This decrease was due to fewer Company-owned stores being open during 2012, primarily as a result of the sale of 58 Company-owned stores to multiple franchisees during fiscal 2011 and six Company-owned stores in the first quarter of 2012. The decrease was partially offset by a 1.3% increase in same store sales compared to 2011. There were 394 domestic Company-owned stores in operation as of January 1, 2012 and 388 domestic Company-owned stores in operation as of December 30, 2012.

Table of Contents

Domestic franchise. Revenues from domestic franchise operations increased \$8.0 million or 4.3% in 2012. This increase was due primarily to higher domestic franchise same store sales and an increase in the average number of domestic franchise stores open during 2012. Additionally, domestic franchise revenues in 2012 benefited from a 3.2% increase in same store sales compared to 2011. There were 4,513 domestic franchise stores in operation as of January 1, 2012 and 4,540 domestic franchise stores in operation as of December 30, 2012.

Domestic supply chain. Revenues from domestic supply chain operations increased \$14.3 million or 1.5% in 2012. This increase was due primarily to a change in the mix of products sold and an increase in the number of franchise stores in operation. The increases were offset in part by slightly lower volumes and slightly lower overall commodity prices, including cheese. Cheese prices negatively impacted revenues by approximately \$9.9 million in 2012.

International. International revenues primarily consist of royalties from our international franchise stores and international supply chain sales. Revenues from international operations increased \$16.7 million or 8.3% in 2012. This increase was due primarily to higher international royalty and other revenues and higher international supply chain revenues. This increase was negatively impacted by approximately \$4.0 million related to changes in foreign currency exchange rates. These changes in international revenues are more fully described below.

	2011		2012	
International royalty and other	\$ 107.9	53.7%	\$ 120.1	55.2%
International supply chain	93.0	46.3%	97.5	44.8%
Total international revenues	\$ 200.9	100.0%	\$ 217.6	100.0%

International royalty and other. Revenues from international royalties and other increased \$12.2 million or 11.2% in 2012. This increase was due primarily to higher same store sales and an increase in the average number of international stores open during 2012, offset in part by the negative impact of changes in foreign currency exchange rates of approximately \$4.0 million in 2012. On a constant dollar basis (which excludes the impact of foreign currency exchange rates), same store sales increased 5.2% in 2012 compared to 2011. On a historical dollar basis (which includes the impact of foreign currency exchange rates), same store sales increased 2.1% in 2012 compared to 2011. The variance in our same store sales on a constant dollar basis versus a historical dollar basis in 2012 was caused by a stronger U.S. dollar when compared to the currencies in the international markets in which we compete. There were 4,835 international stores in operation as of January 1, 2012 and 5,327 international stores in operation as of December 30, 2012.

International supply chain. Revenues from international supply chain operations increased \$4.5 million or 4.9% in 2012. This increase resulted primarily from higher volumes in 2012.

Cost of sales / Operating margin. The consolidated operating margin, which we define as revenues less cost of sales, increased \$30.8 million or 6.6% in 2012, as summarized in the following table.

	2011		2012	
Consolidated revenues	\$ 1,652.2	100.0%	\$ 1,678.4	100.0%
Consolidated cost of sales	1,181.7	71.5%	1,177.1	70.1%
Consolidated operating margin	\$ 470.5	28.5%	\$ 501.3	29.9%

The \$30.8 million increase in consolidated operating margin was due primarily to higher domestic and international franchise revenues, higher margins at our Company-owned stores and higher domestic supply chain margins. Franchise revenues do not have a cost of sales component and, as such, changes in franchise revenues have a disproportionate effect on the consolidated operating margin.

As a percentage of total revenues, our consolidated operating margin increased 1.4 percentage points in 2012, due primarily to a higher mix of franchise revenues, higher Company-owned stores operating margins and lower overall commodity prices, including cheese.

Domestic Company-owned stores. The domestic Company-owned store operating margin, which does not include other store-level costs such as royalties and advertising, increased \$7.0 million or 10.1% in 2012, as summarized in the following table.

	2011		2012	
Revenues	\$ 336.3	100.0%	\$ 323.7	100.0%
Cost of sales	267.1	79.4%	247.4	76.4%
Store operating margin	\$ 69.3	20.6%	\$ 76.3	23.6%

Table of Contents

The \$7.0 million increase in the domestic Company-owned store operating margin was due primarily to lower food costs, lower labor and related expenses, lower occupancy expenses, lower insurance expenses and the positive impact of a higher average customer price paid per order. The sale of 58 Company-owned stores to multiple franchisees in fiscal 2011 and six Company-owned stores in the first quarter of 2012 had a slightly positive impact on the domestic Company-owned stores operating margin in 2012. As a percentage of store revenues, the store operating margin increased 3.0 percentage points in 2012, as discussed in more detail below.

As a percentage of store revenues, food costs decreased 1.2 percentage points to 27.1% in 2012, due primarily to the positive impact of a higher average customer price paid per order and lower overall commodity prices, including cheese. The cheese block price per pound averaged \$1.69 in 2012 compared to \$1.80 in 2011.

As a percentage of store revenues, occupancy costs, which include rent, telephone, utilities and depreciation, decreased 0.8 percentage points to 9.5% in 2012 due primarily to lower rates and reduced usage per store, and to a lesser extent, the positive impact of a higher average customer price paid per order on utilities and depreciation costs per store during fiscal 2012.

As a percentage of store revenues, labor and related costs decreased 0.6 percentage points to 28.4% in 2012, due primarily to the positive impact of a higher average customer price paid per order during fiscal 2012.

As a percentage of store revenues, insurance costs decreased 0.6 percentage points to 3.1% in 2012, due primarily to lower health insurance expenses per store.

Domestic supply chain. The domestic supply chain operating margin increased \$2.7 million or 2.8% in 2012, as summarized in the following table.

	2011		2012	
Revenues	\$ 927.9	100.0%	\$ 942.2	100.0%
Cost of sales	831.7	89.6%	843.3	89.5%
Domestic supply chain operating margin	\$ 96.2	10.4%	\$ 98.9	10.5%

The domestic supply chain operating margin increased \$2.7 million in 2012 due primarily to a change in the mix of products sold, offset in part by slightly lower volumes.

As a percentage of domestic supply chain revenues, the domestic supply chain operating margin increased 0.1 percentage points in 2012 due primarily to a decrease in overall commodity prices, including cheese and a change in the mix of products sold. This was offset in part by slightly lower volumes. Decreases in certain food prices, including cheese, have a positive effect on the domestic supply chain operating margin percentage due to the fixed dollar margin earned by domestic supply chain on certain food items. Had the 2012 cheese prices been in effect during 2011, the domestic supply chain operating margin as a percentage of domestic supply chain revenues would have been approximately 10.5% for 2011 versus the reported 10.4%. However, the dollar margin would have been unaffected.

General and administrative expenses. General and administrative expenses increased \$7.6 million or 3.6% in 2012. Approximately \$2.2 million of the increase in general and administrative expenses in fiscal 2012 resulted from pre-tax gains recorded on the sale of certain Company-owned operations in 2011 that did not recur in 2012. Additionally, approximately \$0.3 million of recapitalization-related expenses that were recorded in the first quarter of 2012 negatively impacted the year-over-year comparison. Excluding these items, general and administrative expenses

increased \$5.1 million in fiscal 2012. These increases were primarily due to a \$3.7 million increase in non-cash compensation, investments in additional technology and international team members, and other strategic initiatives.

Interest income. Interest income remained flat at \$0.3 million in 2012.

Interest expense. Interest expense increased \$9.8 million to \$101.4 million in 2012. The increase was due primarily to approximately \$10.2 million of expenses incurred in the first quarter of 2012 related to the 2012 Recapitalization, including \$8.1 million of write-offs of deferred financing fees and the interest rate swap related to the extinguished debt and \$2.1 million of interest expense that was incurred on the 2007 debt subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 debt.

Our cash borrowing rate decreased 0.4 percentage points to 5.5% during fiscal 2012. Our average outstanding debt balance, excluding capital lease obligations, was approximately \$1.6 billion in 2012 and approximately \$1.4 billion in 2011. The decrease in the Company's cash borrowing rate and the increase in the Company's average outstanding debt balance resulted from the completion of the 2012 Recapitalization during the first quarter of 2012.

Table of Contents

Provision for income taxes. Provision for income taxes increased \$6.4 million to \$68.8 million in 2012, due primarily to higher pre-tax income. The Company's effective income tax rate increased 0.8 percentage points to 38.0% of pre-tax income in 2012 due primarily to a lower effective income tax rate in 2011 resulting from higher wage credits.

Liquidity and capital resources

As of December 29, 2013, we had negative working capital of \$28.5 million, excluding restricted cash and cash equivalents of \$125.5 million and including total unrestricted cash and cash equivalents of \$14.4 million. Historically, we have operated with minimal positive working capital or negative working capital primarily because our receivable collection periods and inventory turn rates are faster than the normal payment terms on our current liabilities. We generally collect our receivables within three weeks from the date of the related sale, and we generally experience 30 to 40 inventory turns per year. In addition, our sales are not typically seasonal, which further limits our working capital requirements. These factors, coupled with the use of our ongoing cash flows from operations to service our debt obligations, invest in our business, pay dividends and repurchase our common stock, reduce our working capital amounts. As of December 29, 2013, we had approximately \$51.3 million of restricted cash held for future principal and interest payments, \$42.0 million of cash held as collateral for outstanding letters of credit, \$21.0 million of restricted cash held in a three month interest reserve as required by the related debt agreements, \$11.1 million of cash related to the Company's third quarter 2013 dividend payment to shareholders, and \$0.1 million of other restricted cash, for a total of \$125.5 million of restricted cash and cash equivalents.

In 2012, we completed the 2012 Recapitalization in which certain of our subsidiaries replaced the outstanding 2007 Notes and variable funding notes with new notes (the Notes) issued pursuant to an asset-backed securitization. The Notes consist of \$1.575 billion of Series 2012-1 5.216% Fixed Rate Senior Secured Notes, Class A-2 (the Fixed Rate Notes) and \$100.0 million of Series 2012-1 Variable Funding Senior Secured Notes, Class A-1 (the Variable Funding Notes). The Notes were issued in a private placement transaction by indirect, bankruptcy-remote subsidiaries that hold substantially all of our revenue-generating assets, excluding Company-owned stores. The Fixed Rate Notes have an expected maturity of seven years and a legal maturity of 30 years. The Variable Funding Notes have an expected maturity of five years, with an option for up to two one-year renewals (subject to certain minimum financial conditions), and a legal maturity of 30 years. The Variable Funding Notes were undrawn on the closing date. At December 29, 2013, approximately \$42.3 million was pledged against the Variable Funding Notes for outstanding letters of credit, leaving \$57.7 million of Variable Funding Notes available for borrowings. The letters of credit are primarily related to our casualty insurance programs and supply chain center leases. The Company has collateralized these letters of credit with \$42.0 million of restricted cash to reduce its fees on the Variable Funding Notes, and has the ability to access this cash with minimal notice.

The Fixed Rate Notes have scheduled principal amortization payments of \$23.6 million in 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During fiscal 2013, we made principal payments of approximately \$23.6 million. If we meet certain conditions, including maximum leverage ratios of less than 4.5x total debt to EBITDA, we may elect to not make the scheduled principal amortization payments. If one of the leverage ratios subsequently exceeds 4.5x, we must make-up the payments we had elected not to make.

The Notes are subject to certain financial and non-financial covenants, including a debt service coverage calculation, as defined in the related agreements. In the event that certain covenants are not met, the Notes may become due and payable on an accelerated schedule.

We used a portion of the proceeds from the 2012 Recapitalization to repay approximately \$1.447 billion in outstanding principal under the 2007 Notes. The proceeds were also used to pay accrued interest on the 2007 Notes and transaction-related fees and expenses incurred in connection with the 2012 Recapitalization and to fund a reserve account for the payment of interest on the Notes.

Table of Contents

On March 16, 2012, our Board of Directors declared a \$3.00 per share special cash dividend on the outstanding common stock totaling \$171.1 million, which was paid on April 2, 2012 to stockholders of record at the close of business on March 26, 2012. Additionally, pursuant to the anti-dilution provisions in our underlying stock option plans, on April 2, 2012, we made a corresponding cash payment of approximately \$13.5 million on certain stock options, reduced the exercise price on certain other stock options by an equivalent per share amount and, in certain circumstances, both reduced the stock option exercise price and made a cash payment totaling \$3.00 per share. On April 2, 2012, we also accrued an estimated \$2.4 million for payments to be made as certain performance-based restricted stock grants vest. The dividend and related dividend equivalent payments were funded with the remaining proceeds from the 2012 Recapitalization and cash on hand. These anti-dilution payments were accounted for as modifications/settlements and were recorded as increases in total stockholders' deficit. As of December 30, 2012, total cash paid for common stock dividends and related anti-dilution equivalent payments was approximately \$185.5 million and the total estimated liability recorded for future cash dividend payments on certain performance-based restricted stock was approximately \$1.5 million. As of December 29, 2013, the total estimated liability recorded for future cash dividend payments on certain performance-based restricted stock was approximately \$0.8 million.

During fiscal 2012 and in connection with the 2012 Recapitalization, we incurred approximately \$10.5 million of net expenses. Additionally, in connection with the 2012 Recapitalization, we recorded an additional \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet during fiscal 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012 is being amortized into interest expense over the seven-year expected term of the debt.

As of December 29, 2013, we had approximately \$1.54 billion of total debt, of which \$24.1 million was classified as a current liability. Additionally, as of December 29, 2013, we had \$42.3 million of outstanding letters of credit and \$57.7 million of available borrowing capacity under our \$100.0 million Variable Funding Notes. The letters of credit are primarily related to our casualty insurance programs and supply chain center leases. The Company has collateralized these letters of credit with \$42.0 million of restricted cash to reduce its fees on the Variable Funding Notes, and has the ability to access this cash with minimal notice. Borrowings under the Variable Funding Notes are available to fund our working capital requirements, capital expenditures and, subject to other limitations, other general corporate purposes including dividend payments. Our primary source of liquidity is cash flows from operations and availability of borrowings under our Variable Funding Notes.

The Company has a Board of Directors approved open market share repurchase program of the Company's common stock, which was reset during the third quarter of 2012 at \$200.0 million. The open market share repurchase program has historically been funded by excess cash flows and borrowings available under the Variable Funding Notes. The Company used cash of approximately \$88.2 million and \$97.1 million in 2012 and 2013, respectively, for share repurchases under this program. The Company had approximately \$55.2 million left under the \$200.0 million authorization as of December 29, 2013. On February 12, 2014, the Board of Directors approved an increase to the Company's open market share repurchase program, resulting in a total remaining authorized amount for additional share repurchases of \$200.0 million. We expect to continue to use ongoing excess cash flow generation and (subject to certain restrictions in the documents governing the Variable Funding Notes) availability under the Variable Funding Notes to, among other things, repurchase shares under the current authorized program.

During fiscal 2013, we experienced increases in both domestic and international same store sales versus fiscal 2012. Additionally, our international business continued to grow stores at a record pace in fiscal 2013. These factors have contributed to our continued ability to generate positive operating cash flows. We expect to use our unrestricted cash and cash equivalents, our restricted cash amounts pledged as collateral for letters of credit, ongoing cash flows from operations and available borrowings under the Variable Funding Notes to, among other things, fund working capital requirements, invest in our core business, pay dividends and repurchase our common stock. We have historically

funded our working capital requirements, capital expenditures, debt repayments, dividend payments, and repurchases of common stock primarily from our cash flows from operations and, when necessary, our available borrowings under variable funding note facilities. Management believes its current unrestricted cash and cash equivalents balance, its restricted cash amounts pledged as collateral for letters of credit, and its expected ongoing cash flows from operations will be sufficient to fund operations for the foreseeable future.

In the past three years, we have incurred annual capital expenditures of between \$24.3 million to \$40.4 million. In 2013, we invested \$40.4 million in capital expenditures which primarily related to investments in existing Company-owned stores, supply chain centers and training facilities as well as investments in our proprietary internally developed point-of-sale system (Domino's PULSE), our digital ordering platform and other technology initiatives, which we believe are necessary to sustain and grow our business. We expect to continue this level of capital expenditure in the future as we see continuing opportunities to invest in our industry leading technology platform, the reimagining of our corporate stores, and other initiatives to grow our brand. We did not have any material commitments for capital expenditures as of December 29, 2013.

Table of Contents

Cash provided by operating activities was \$194.0 million in 2013, \$176.3 million in 2012 and \$153.1 million in 2011. The \$17.7 million increase in 2013 versus 2012 was due primarily to a \$26.3 million increase in net income excluding non-cash adjustments offset by an \$8.6 million net change in operating assets and liabilities resulting from the timing of payments on current operating liabilities and the timing of accounts receivable. The \$23.2 million increase in 2012 versus 2011 was due primarily to a \$15.1 million increase in net income excluding non-cash adjustments and an \$8.1 million net change in operating assets and liabilities, due primarily to the timing of payments on current operating liabilities and the timing of prepaid expenses. We are focused on continually improving our net income and cash flow from operations. As noted above, we generated \$194.0 million of cash from our operating activities in 2013. Even after deducting our \$40.4 million of capital expenditures, we generated a substantial amount of excess cash in 2013, some of which was deployed on other activities, including, but not limited to, dividend payments and repurchases of our common stock. Management expects to continue to generate positive cash flows from operating activities for the foreseeable future.

Cash used in investing activities was \$99.7 million in 2013, cash provided by investing activities was \$7.3 million in 2012 and cash used in investing activities was \$26.9 million in 2011. The \$107.1 million net change in 2013 versus 2012 was due primarily to a \$98.0 million increase in restricted cash and cash equivalents and an \$11.1 million increase in capital expenditures due to increased investments in Company-owned stores and supply chain centers as well as investments in our technology initiatives. The \$34.2 million net change in 2012 versus 2011 was due primarily to a \$39.7 million decrease in restricted cash and cash equivalents due to the Company eliminating cash pledged as collateral on its letters of credit. In connection with the 2012 Recapitalization, these letters of credit now reduce the amount of borrowing available under the Company's Variable Funding Notes. This was offset in part by a \$4.9 million increase in capital expenditures during 2012 as a result of increased investments in existing Company-owned stores and supply chain centers as well as investments in our technology initiatives.

Cash used in financing activities was \$134.8 million in 2013, \$177.4 million in 2012 and \$123.5 million in 2011. The \$42.6 million decrease in 2013 versus 2012 was due primarily to a \$1.4 billion decrease in repayments of long-term debt, a \$151.2 million decrease in common stock dividends and equivalent payments and a \$32.5 million decrease in cash paid for financing costs offset by a \$1.6 billion decrease of proceeds from issuance of the 2012 debt facility. These changes were due primarily to our 2012 recapitalization. The \$53.9 million increase in 2012 versus 2011 was due primarily to \$1.4 billion of repayments of the 2007 debt facilities, \$185.5 million of dividend and equivalent payments, a \$28.8 million increase in cash paid for financing costs, all of which resulted from our 2012 Recapitalization, and a \$24.6 million decrease in proceeds from the exercise of stock options. These uses of cash for financing activities were offset, in part by \$1.6 billion of proceeds from issuance of the 2012 Fixed Rate Notes and a \$76.8 million decrease in purchases of common stock.

Based upon the current level of operations and anticipated growth, we believe that the cash generated from operations, our current unrestricted cash and cash equivalents and amounts available under the Variable Funding Notes will be more than adequate to meet our anticipated debt service requirements, capital expenditures, dividend payments and working capital needs for the foreseeable future. Our ability to continue to fund these items and continue to reduce debt could be adversely affected by the occurrence of any of the events described in Item 1A. Risk Factors. There can be no assurance, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available under the Variable Funding Notes or otherwise to enable us to service our indebtedness, or to make anticipated capital expenditures. Our future operating performance and our ability to service, extend or refinance the Fixed Rate Notes and to service, extend or refinance the Variable Funding Notes will be subject to future economic conditions and to financial, business and other factors, many of which are beyond our control.

Impact of inflation

We believe that our results of operations are not materially impacted by moderate changes in the inflation rate. Inflation did not have a material impact on our operations in 2011, 2012 or 2013. Severe increases in inflation, however, could affect the global and U.S. economies and could have an adverse impact on our business, financial condition and results of operations. Further discussion on the impact of commodities and other cost pressures is included above as well as in Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

New accounting pronouncements

Accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

Table of Contents**Contractual obligations**

The following is a summary of our significant contractual obligations at December 29, 2013.

(dollars in millions)	2014	2015	2016	2017	2018	Thereafter	Total
Long-term debt (1):							
Principal	\$ 23.6	\$ 29.5	\$ 37.4	\$ 39.4	\$ 39.4	\$ 1,364.3	\$ 1,533.6
Interest (3)	80.0	78.0	76.3	74.5	72.4	17.8	399.0
Capital leases (2)	0.7	0.7	0.7	0.7	0.5		3.4
Operating leases (4)	38.1	35.2	31.5	27.7	23.0	48.0	203.4

- (1) The maturity date of the long-term debt noted within the table above reflects the Company's expected repayment date of January 2019, rather than the legal maturity date of January 2042.
- (2) The principal portion of the capital lease obligation amounts above, which totaled \$2.8 million at December 29, 2013, are classified as debt in our consolidated financial statements.
- (3) The interest rate on our variable funding notes is based primarily on a current commercial paper rate plus 50 basis points. The interest rate on the Fixed Rate Notes is fixed at 5.216% per year.
- (4) We lease certain retail store and supply chain center locations, supply chain vehicles, various equipment and our World Resource Center, which is our corporate headquarters, under leases with expiration dates through 2022. Liabilities for unrecognized tax benefits of \$3.6 million are excluded from the above table, as we are unable to make a reasonably reliable estimate of the amount and period of payment. For additional information on unrecognized tax benefits see Note 6 to the consolidated financial statements included in this Form 10-K.

Off-balance sheet arrangements

We are party to letters of credit and, to a lesser extent, financial guarantees with off-balance sheet risk. Our exposure to credit loss for letters of credit and financial guarantees is represented by the contractual amounts of these instruments. Total conditional commitments under letters of credit as of December 29, 2013 were approximately \$42.3 million and relate to our insurance programs and supply chain center leases. The Company has guaranteed lease payments related to certain franchisees' lease arrangements. The maximum amount of potential future payments under these guarantees is \$0.6 million as of December 29, 2013. We believe that none of these arrangements has or is likely to have a material effect on our results of operations, financial condition or liquidity.

Table of Contents

SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Annual Report on Form 10-K includes various forward-looking statements about the Company within the meaning of the Private Securities Litigation Reform Act of 1995 (the Act) that are based on current management expectations that involve substantial risks and uncertainties which could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. The following cautionary statements are being made pursuant to the provisions of the Act and with the intention of obtaining the benefits of the safe harbor provisions of the Act. Forward-looking statements include information concerning future results of operations, and business strategy. Also, statements that contain words such as anticipate, believe, could, estimate, expect, intend, plan, predict, project, will, potential, outlook and similar terms and phrases, including references to assumptions, are forward-looking statements. These forward-looking statements relating to our anticipated profitability, the growth of our international business, ability to service our indebtedness, our operating performance, trends in our business and other descriptions of future events reflect management's expectations based upon currently available information and data. While we believe these expectations and projections are based on reasonable assumptions, such forward-looking statements are inherently subject to risks, uncertainties and assumptions about us, including the risk factors listed under Item 1A. Risk Factors, as well as other cautionary language in this Form 10-K. Actual results may differ materially from those in the forward looking statements as a result of various factors, including but not limited to, the following:

our substantial increased indebtedness as a result of the recapitalization in 2012 and our ability to incur additional indebtedness or refinance that indebtedness in the future;

our future financial performance;

the success of our marketing initiatives;

our future cash needs;

our ability to maintain good relationships with our franchisees;

our ability to successfully implement cost-saving strategies;

increases in our operating costs, including cheese, fuel and other commodity costs and the minimum wage;

our ability to compete domestically and internationally in our intensely competitive industry;

additional risk precipitated by international operations;

our ability to retain or replace our executive officers and other key members of management and our ability to adequately staff our stores and supply chain centers with qualified personnel;

our ability to pay principal and interest on our substantial debt;

our ability to find and/or retain suitable real estate for our stores and supply chain centers;

adverse legislation, regulation or publicity;

adverse legal judgments or settlements;

food-borne illness or contamination of products;

data breaches or other cyber risks;

the effect of war, terrorism or catastrophic events;

our ability to pay dividends;

changes in consumer taste, demographic trends and traffic patterns; and

adequacy of insurance coverage.

All forward-looking statements should be evaluated with the understanding of their inherent uncertainty. We will not undertake and specifically decline any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this Annual Report on Form 10-K might not occur.

Forward-looking statements speak only as of the date of this Form 10-K. Except as required under federal securities laws and the rules and regulations of the Securities and Exchange Commission, we do not have any intention to update any forward-looking statements to reflect events or circumstances arising after the date of this Form 10-K, whether as a result of new information, future events or otherwise. As a result of these risks and uncertainties, readers are cautioned not to place undue reliance on the forward-looking statements included in this Form 10-K or that may be made elsewhere from time to time by, or on behalf of, us. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Market risk

We do not engage in speculative transactions nor do we hold or issue financial instruments for trading purposes. In connection with the recapitalization in 2012, we issued fixed rate notes and, at December 29, 2013, we are only exposed to interest rate risk on borrowings under our Variable Funding Notes. As of December 29, 2013, we had no outstanding borrowings under our Variable Funding Notes. Our fixed rate debt exposes the Company to changes in market interest rates reflected in the fair value of the debt and to the risk that the Company may need to refinance maturing debt with new debt at a higher rate.

We are exposed to market risks from changes in commodity prices. During the normal course of business, we purchase cheese and certain other food products that are affected by changes in commodity prices and, as a result, we are subject to volatility in our food costs. We may periodically enter into financial instruments to manage this risk. We do not engage in speculative transactions nor do we hold or issue financial instruments for trading purposes. In instances when we use fixed pricing agreements with our suppliers, these agreements cover our physical commodity needs, are not net-settled and are accounted for as normal purchases.

From time to time we have entered into interest rate swaps, collars or similar instruments with the objective of managing volatility relating to our borrowing costs. We had no outstanding derivative instruments as of December 30, 2012 or December 29, 2013.

Foreign currency exchange rate risk

We have exposure to various foreign currency exchange rate fluctuations for revenues generated by our operations outside the United States, which can adversely impact our net income and cash flows. Total revenues of approximately 12.2% in 2011, 13.0% in 2012 and 13.5% in 2013 were derived from sales to customers and royalties from franchisees outside the contiguous United States. This business is conducted in the local currency but royalty payments are generally remitted to us in U.S. dollars. We do not enter into financial instruments to manage this foreign currency exchange risk. A hypothetical 10% adverse change in the foreign currency rates in each of our top ten international markets, based on store count, would have resulted in a negative impact on revenues of approximately \$9.7 million in 2013.

Table of Contents

Item 8. Financial Statements and Supplementary Data.
Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors

of Domino's Pizza, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Domino's Pizza, Inc. and its subsidiaries at December 29, 2013 and December 30, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 29, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 29, 2013, based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting, appearing under Item 9(A). Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Domino s Pizza, Inc. (DPI), a Delaware corporation, conducts its operations and derives substantially all of its operating income and cash flows through its wholly-owned subsidiary, Domino s, Inc. (Domino s) and Domino s wholly-owned subsidiary, Domino s Pizza LLC (DPLLC). DPI and its wholly-owned subsidiaries (collectively, the Company) are primarily engaged in the following business activities: (i) retail sales of food through Company-owned Domino s Pizza stores; (ii) sales of food, equipment and supplies to Company-owned and franchised Domino s Pizza stores through Company-owned supply chain centers; and (iii) receipt of royalties and fees from domestic and international Domino s Pizza franchisees.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of DPI and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

Fiscal Year

The Company s fiscal year ends on the Sunday closest to December 31. The 2011 fiscal year ended January 1, 2012, the 2012 fiscal year ended December 30, 2012 and the 2013 fiscal year ended on December 29, 2013. The 2011, 2012 and 2013 fiscal years each consisted of fifty-two weeks.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less at the date of purchase. These investments are carried at cost, which approximates fair value.

Restricted Cash and Cash Equivalents

Restricted cash at December 29, 2013 includes \$51.3 million of cash held for future principal and interest payments, \$21.0 million of cash held in a three month interest reserve, \$42.0 million of cash held as collateral for outstanding letters of credit, \$11.1 million of cash related to the Company s third quarter 2013 dividend payment to shareholders, and \$0.1 million of other restricted cash.

Inventories

Inventories are valued at the lower of cost (on a first-in, first-out basis) or market. Inventories at December 30, 2012 and December 29, 2013 are comprised of the following (in thousands):

2012 2013

Edgar Filing: DOMINOS PIZZA INC - Form 10-K

Food	\$ 27,946	\$ 25,673
Equipment and supplies	3,115	4,648
Inventories	\$ 31,061	\$ 30,321

Notes Receivable

During the normal course of business, the Company may provide financing to franchisees in the form of notes. Notes receivable generally require monthly payments of principal and interest, or monthly payments of interest only, generally ranging from 8% to 10%, with balloon payments of the remaining principal due two to seven years from the original issuance date. Such notes are generally secured by the related assets or business. The carrying amounts of these notes approximate fair value.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Other Assets

Current and long-term other assets primarily include prepaid expenses such as insurance, rent and taxes, deposits, as well as covenants not-to-compete and other intangible assets primarily arising from franchise acquisitions. Amortization expense related to intangible assets for financial reporting purposes is provided using the straight-line method over the useful lives for covenants not-to-compete and other intangible assets and was approximately \$0.3 million in 2011, 2012 and 2013. As of December 29, 2013, scheduled amortization of these assets for the next five fiscal years is approximately \$0.1 million in 2014. There is no scheduled amortization in fiscal years 2015, 2016, 2017 and 2018. The carrying value of intangible assets as of December 30, 2012 and December 29, 2013 was approximately \$0.4 million and \$0.1 million, respectively.

Property, Plant and Equipment

Additions to property, plant and equipment are recorded at cost. Repair and maintenance costs are expensed as incurred. Depreciation and amortization expense for financial reporting purposes is provided using the straight-line method over the estimated useful lives of the related assets. Estimated useful lives, other than the estimated useful life of the capital lease assets as described below, are generally as follows (in years):

Buildings	20
Leasehold and other improvements	7 15
Equipment	3 15

Included in land and buildings as of December 30, 2012 and December 29, 2013 are capital lease assets of approximately \$2.6 million and \$1.9 million, which are net of \$5.2 million and \$5.5 million of accumulated amortization, respectively, primarily related to the lease of a supply chain center building, and to a lesser extent, leases of computer equipment. The capital lease assets are being amortized using the straight-line method over the lease terms.

Depreciation and amortization expense on property, plant and equipment was approximately \$20.1 million, \$19.5 million and \$20.5 million in 2011, 2012 and 2013, respectively.

Impairments of Long-Lived Assets

The Company evaluates the potential impairment of long-lived assets at least annually based on various analyses including the projection of undiscounted cash flows and whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. For Company-owned stores, the Company performs this evaluation on an operating market basis, which the Company has determined to be the lowest level for which identifiable cash flows are largely independent of other cash flows. If the carrying amount of a long-lived asset exceeds the amount of the expected future undiscounted cash flows of that asset or the estimated fair value of the

asset, an impairment loss is recognized and the asset is written down to its estimated fair value. The Company did not record an impairment loss on long-lived assets in 2011, 2012 or 2013.

Investments in Marketable Securities

Investments in marketable securities consist of investments in various mutual funds made by eligible individuals as part of the Company's deferred compensation plan (Note 7). These investments are stated at aggregate fair value, are restricted and have been placed in a rabbi trust whereby the amounts are irrevocably set aside to fund the Company's obligations under the deferred compensation plan. The Company classifies and accounts for these investments in marketable securities as trading securities.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Deferred Financing Costs

Deferred financing costs primarily include debt issuance costs incurred by the Company as part of the 2012 Recapitalization (Note 4). Amortization is provided on a straight-line basis over the expected term of the respective debt instrument to which the costs relate and is included in interest expense.

In connection with the 2012 Recapitalization, the Company recorded an additional \$32.5 million of deferred financing costs as an asset during fiscal 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012, is being amortized into interest expense over the seven-year expected term of the debt. Additionally, in connection with the 2012 Recapitalization, the Company had write-offs of financing costs totaling approximately \$8.0 million related to the extinguishment of the previous debt facility.

In connection with scheduled principal payments of its Fixed Rate Notes (Note 4), the Company expensed financing costs of approximately \$0.4 million in 2012 and approximately \$0.5 million in 2013. Deferred financing cost expense, including the aforementioned amounts, was approximately \$3.7 million, \$13.8 million and \$6.1 million in 2011, 2012 and 2013, respectively.

Goodwill

The Company's goodwill amounts primarily relate to franchise store acquisitions and are not amortized. The Company performs its required impairment tests in the fourth quarter of each fiscal year and did not recognize any goodwill impairment charges in 2011, 2012 or 2013.

Capitalized Software

Capitalized software is recorded at cost and includes purchased, internally-developed and externally-developed software used in the Company's operations. Amortization expense for financial reporting purposes is provided using the straight-line method over the estimated useful lives of the software, which range from one to three years. Capitalized software amortization expense was approximately \$3.6 million, \$3.3 million and \$5.0 million in 2011, 2012 and 2013, respectively. The Company received \$2.5 million, \$2.7 million and \$3.0 million from franchisees from sales and enhancements of internally developed point-of-sale software during 2011, 2012 and 2013, respectively.

Insurance Reserves

The Company has retention programs for workers' compensation, general liability and owned and non-owned automobile liabilities for certain periods prior to December 1998 and for periods after December 2001. The Company is generally responsible for up to \$1.0 million per occurrence under these retention programs for workers' compensation and general liability exposures. The Company is also generally responsible for between \$500,000 and \$3.0 million per occurrence under these retention programs for owned and non-owned automobile liabilities depending on the year. Total insurance limits under these retention programs vary depending on the year covered and

range up to \$110.0 million per occurrence for general liability and owned and non-owned automobile liabilities and up to the applicable statutory limits for workers' compensation.

Insurance reserves relating to our retention programs are based on undiscounted actuarial estimates. These estimates are based on historical information and on certain assumptions about future events. Changes in assumptions for such factors as medical costs and legal actions, as well as changes in actual experience, could cause these estimates to change in the near term. The Company receives estimates of outstanding insurance exposures from its independent actuary and differences between these estimated actuarial exposures and the Company's recorded amounts are adjusted as appropriate.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Other Accrued Liabilities

Current and long-term other accrued liabilities primarily include accruals for sales, property and other taxes, store operating expenses, deferred rent expense and deferred compensation liabilities.

Foreign Currency Translation

The Company's foreign entities use their local currency as the functional currency. Where the functional currency is the local currency, the Company translates net assets into U.S. dollars at year end exchange rates, while income and expense accounts are translated at average annual exchange rates. Currency translation adjustments are included in accumulated other comprehensive income (loss) and foreign currency transaction gains and losses are included in determining net income.

Revenue Recognition

Domestic Company-owned stores revenues are comprised of retail sales of food through Company-owned Domino's Pizza stores located in the contiguous United States and are recognized when the items are delivered to or carried out by customers.

Domestic franchise revenues are primarily comprised of royalties and fees from Domino's Pizza franchisees with operations in the contiguous United States. Royalty revenues are recognized when the items are delivered to or carried out by franchise customers.

Domestic supply chain revenues are primarily comprised of sales of food, equipment and supplies to franchised Domino's Pizza stores located in the contiguous United States. Revenues from the sales of food are recognized upon delivery of the food to franchisees, while revenues from the sales of equipment and supplies are generally recognized upon shipment of the related products to franchisees.

International revenues are primarily comprised of sales of food to, and royalties and fees from Domino's Pizza franchisees outside the contiguous United States. These revenues are recognized consistently with the policies applied for revenues generated in the contiguous United States.

Domestic Supply Chain Profit-Sharing Arrangements

The Company enters into profit-sharing arrangements with Domestic Stores (Note 11) that purchase all of their food from Domestic Supply Chain (Note 11). These profit-sharing arrangements generally offer domestic Company-owned stores and participating franchisees with 50% (or a higher percentage in the case of Company-owned stores and certain franchisees who operate a larger number of stores) of their regional supply chain center's pre-tax profits based upon each store's purchases from the supply chain center. Profit-sharing obligations are recorded as a revenue reduction in Domestic Supply Chain in the same period as the related revenues and costs are recorded, and were \$62.5

million, \$64.5 million and \$68.8 million in 2011, 2012 and 2013, respectively.

Advertising

Advertising costs are expensed as incurred. Advertising expense, which relates primarily to Company-owned stores, was approximately \$28.5 million, \$27.6 million and \$29.6 million during 2011, 2012 and 2013, respectively.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Domestic Stores are required to contribute a certain percentage of sales to the Domino s National Advertising Fund Inc. (DNAF), a not-for-profit subsidiary that administers the Domino s Pizza system s national and market level advertising activities. Included in advertising expense were national advertising contributions from Company-owned stores to DNAF of approximately \$18.5 million, \$17.8 million and \$20.1 million in 2011, 2012 and 2013, respectively. DNAF also received national advertising contributions from franchisees of approximately \$165.8 million, \$173.6 million and \$199.4 million during 2011, 2012 and 2013, respectively. Franchisee contributions to DNAF and offsetting disbursements are presented net in the accompanying statements of income.

DNAF assets, consisting primarily of cash received from franchisees and accounts receivable from franchisees, can only be used for activities that promote the Domino s Pizza brand. Accordingly, all assets held by the DNAF are considered restricted.

Rent

The Company leases certain equipment, vehicles, retail store and supply chain center locations and its corporate headquarters under operating leases with expiration dates through 2024. Rent expenses totaled approximately \$39.7 million during both 2011 and 2012 and \$40.2 million during 2013.

Common Stock Dividends

During 2012, the Company declared dividends and dividend equivalents totaling approximately \$187.0 million, or \$3.00 per share, of which approximately \$185.5 million were paid in 2012. During 2013, the Company declared dividends of approximately \$44.2 million, or \$0.80 per share, of which approximately \$34.2 million were paid in 2013. The third quarter 2013 dividend of approximately \$11.1 million was paid to shareholders on December 30, 2013, the first day of fiscal 2014.

Derivative Instruments

The Company recognizes all derivatives as either assets or liabilities in the balance sheet and measures those instruments at fair value. The Company had no outstanding derivative instruments as of December 30, 2012 and December 29, 2013.

In connection with the 2007 Recapitalization, the Company entered into a five-year forward-starting interest rate swap agreement with a notional amount of \$1.25 billion. This interest rate swap was entered into to hedge the variability of future interest rates in contemplation of the recapitalization-related debt issuances. The Company subsequently settled the swap agreement with a cash payment of \$11.5 million, in accordance with its terms, concurrent with the issuance of debt as part of the 2007 Recapitalization. In connection with this settlement, the accumulated other comprehensive loss amount was adjusted for the after-tax net settlement amount of \$7.1 million which was being amortized into interest expense over the term of the hedged item. As part of the 2012 Recapitalization, the remaining amount of this swap settlement that was included in accumulated other comprehensive loss was recorded into interest expense.

Stock Options and Other Equity-Based Compensation Arrangements

The cost of all of the Company's employee stock options, as well as other equity-based compensation arrangements, is reflected in the financial statements based on the estimated fair value of the awards.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Earnings Per Share

The Company discloses two calculations of earnings per share (EPS): basic EPS and diluted EPS. The numerator in calculating common stock basic and diluted EPS is consolidated net income. The denominator in calculating common stock basic EPS is the weighted average shares outstanding. The denominator in calculating common stock diluted EPS includes the additional dilutive effect of outstanding stock options and unvested restricted stock and unvested performance-based restricted stock grants.

Supplemental Disclosures of Cash Flow Information

The Company paid interest of approximately \$85.0 million, \$87.3 million and \$82.9 million during 2011, 2012 and 2013, respectively. Cash paid for income taxes was approximately \$41.2 million, \$46.1 million and \$62.8 million in 2011, 2012 and 2013, respectively.

New Accounting Pronouncements

The accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(2) EARNINGS PER SHARE

The computation of basic and diluted earnings per common share is as follows (in thousands, except share and per share amounts):

	2011	2012	2013
Net income available to common stockholders basic and diluted	\$ 105,361	\$ 112,392	\$ 142,985
	58,918,038	56,419,645	55,345,554

Edgar Filing: DOMINOS PIZZA INC - Form 10-K

Weighted average number of common shares

Earnings per common share	basic	\$	1.79	\$	1.99	\$	2.58
Diluted weighted average number of common shares			61,653,519		58,997,476		57,720,998
Earnings per common share	diluted	\$	1.71	\$	1.91	\$	2.48

The denominator in calculating the common stock diluted EPS does not include 206,800 stock options in 2011, 210,820 stock options in 2012 and 152,340 stock options in 2013, as their inclusion would be anti-dilutive.

(Continued)

(3) FAIR VALUE MEASUREMENTS

Fair value measurements enable the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The Company classifies and discloses assets and liabilities carried at fair value in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The fair values of the Company's cash equivalents and investments in marketable securities are based on quoted prices in active markets for identical assets. The following table summarizes the carrying amounts and fair values of certain assets at December 30, 2012:

	At December 30, 2012			
	Carrying Amount	Fair Value Level 1 Inputs	Fair Value Level 2 Inputs	Fair Value Level 3 Inputs
Cash equivalents	\$ 44,531	\$ 44,531	\$	\$
Restricted cash equivalents	50,591	50,591		
Investments in marketable securities	2,097	2,097		

The following table summarizes the carrying amounts and fair values of certain assets at December 29, 2013:

	At December 29, 2013			
	Carrying Amount	Fair Value Level 1 Inputs	Fair Value Level 2 Inputs	Fair Value Level 3 Inputs
Cash equivalents	\$ 5,303	\$ 5,303	\$	\$
Restricted cash equivalents	93,608	93,608		
Investments in marketable securities	3,269	3,269		

(4) RECAPITALIZATIONS AND FINANCING ARRANGEMENTS**2007 Recapitalization**

During 2007, the Company completed a recapitalization transaction (the 2007 Recapitalization) consisting of, among other things, (i) issuing \$1.7 billion of fixed rate notes, (ii) purchasing and retiring all of the outstanding 8 $\frac{1}{4}$ % senior subordinated notes due 2011, (iii) the repayment of all outstanding borrowings under a previous credit agreement, and (iv) a special cash dividend to stockholders and related anti-dilution payments and adjustments to certain stock option holders. Borrowings under the 2007 Recapitalization had an expected repayment date of April 2014, with legal final maturity in April 2037.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2012 Recapitalization

On March 16, 2012, the Company completed a recapitalization transaction (the 2012 Recapitalization). As part of the 2012 Recapitalization, a wholly-owned subsidiary of DPLLC and three of its wholly-owned subsidiaries completed an asset-backed securitization (ABS) by co-issuing a \$1.675 billion facility in a private transaction consisting of \$1.575 billion of Series 2012-1 5.216% Fixed Rate Senior Secured Notes, Class A-2 (the Fixed Rate Notes) and \$100.0 million of Series 2012-1 Variable Funding Senior Secured Notes, Class A-1 (the Variable Funding Notes). Gross proceeds from the issuance of the Fixed Rate Notes were \$1.575 billion. The Variable Funding Notes were undrawn upon at issuance.

The Company used a portion of the proceeds from the 2012 Recapitalization to repay approximately \$1.447 billion in outstanding fixed rate notes under the 2007 Recapitalization. The proceeds were also used to pay accrued interest on fixed rate notes under the 2007 Recapitalization and transaction-related fees and expenses incurred in connection with the 2012 Recapitalization and to fund reserve accounts for the payments related to the Fixed Rate Notes.

Also on March 16, 2012, the Company's Board of Directors declared a \$3.00 per share special cash dividend on its outstanding common stock totaling \$171.1 million, which was paid on April 2, 2012 to stockholders of record at the close of business on March 26, 2012. Additionally, pursuant to the anti-dilution provisions in the Company's underlying stock option plans, on April 2, 2012, the Company made a corresponding cash payment of approximately \$13.5 million on certain stock options, reduced the exercise price on certain other stock options by an equivalent per share amount and, in certain circumstances, both reduced the stock option exercise price and made a cash payment for amounts totaling \$3.00 per share. On April 2, 2012, the Company also accrued an estimated \$2.4 million for payments to be made as certain performance-based restricted stock grants vest. The dividend and related dividend equivalent payments were funded with the remaining proceeds from the 2012 Recapitalization and cash on hand. These anti-dilution payments were accounted for as modifications/settlements and were recorded as increases in total stockholders' deficit. As of December 30, 2012, total cash paid for common stock dividends and related anti-dilution equivalent payments was approximately \$185.5 million and the total estimated liability recorded for future cash dividend payments on certain performance-based restricted stock was approximately \$1.5 million. As of December 29, 2013, the total estimated liability recorded for future cash dividend payments on certain performance-based restricted stock was approximately \$0.8 million. Of the total amount of \$187.0 million recorded for common stock dividends and related anti-dilution payments, \$10.2 million was recorded as a reduction of additional paid-in capital and \$176.8 million was recorded as an increase in retained deficit.

During fiscal 2012 and in connection with the 2012 Recapitalization, the Company incurred approximately \$10.5 million of net expenses. This consisted primarily of \$8.1 million of net write-offs of deferred financing fees and the interest rate swap related to the extinguished debt. The Company also incurred \$2.1 million of interest expense on the 2007 Recapitalization borrowings subsequent to the closing of the 2012 Recapitalization but prior to the repayment of the 2007 Recapitalization borrowings, resulting in the payment of interest on both the 2007 and 2012 facilities for a short period of time. Further, the Company incurred \$0.3 million of other net 2012 Recapitalization-related general and administrative expenses, including stock compensation expenses, payroll taxes related to the payments made to

certain stock option holders and legal and professional fees incurred in connection with the 2012 Recapitalization.

In connection with the 2012 Recapitalization, the Company recorded an additional \$32.5 million of deferred financing costs as an asset in the consolidated balance sheet during fiscal 2012. This amount, in addition to the \$7.4 million recorded on the consolidated balance sheet at January 1, 2012, is being amortized into interest expense over the seven-year expected term of the debt.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Fixed Rate Notes and the Variable Funding Notes

The Fixed Rate Notes bear interest at 5.216% payable quarterly. The Fixed Rate Notes have scheduled principal amortization payments while the Variable Funding Notes require no scheduled principal amortization payments. The Fixed Rate Notes future scheduled principal amortization payments are \$23.6 million in 2014, \$29.5 million in 2015, \$37.4 million in 2016, \$39.4 million in each of 2017 and 2018, and \$9.8 million in 2019. During fiscal 2013, the Company made principal payments of approximately \$23.6 million. If the Company meets certain conditions, including maximum leverage ratios of less than 4.5x total debt to EBITDA, as defined in the related agreements, it may elect to not make the scheduled principal amortization payments on the Fixed Rate Notes. If one of the leverage ratios subsequently exceeds 4.5x, it must make up the payments it had elected not to make. The expected repayment date for the Fixed Rate Notes is January 2019, with legal final maturity in January 2042.

The Fixed Rate Notes and the Variable Funding Notes are guaranteed by four subsidiaries of DPLLC and secured by a security interest in substantially all of the assets of the Company, including royalty income from all domestic stores, domestic supply chain income, international income and intellectual property. The restrictions placed on the Company's subsidiaries require that the Company's interest obligations have first priority and amounts are segregated weekly to ensure appropriate funds are reserved to pay the quarterly interest amounts due. The amount of weekly cash flow that exceeds the required weekly interest reserve is generally remitted to the Company in the form of a dividend. However, once the interest obligations are satisfied, there are no further restrictions, including payment of dividends, on the cash flows of the subsidiaries.

The Fixed Rate Notes are subject to certain financial and non-financial covenants, including a debt service coverage ratio calculation, as defined in the related agreements. The covenants, among other things, limit the ability of certain of our subsidiaries to declare dividends, make loans or advances or enter into transactions with affiliates. In the event that certain covenants are not met, the Fixed Rate Notes may become partially or fully due and payable on an accelerated schedule. In addition, the Company may voluntarily prepay, in part or in full, the Fixed Rate Notes at any time, subject to certain make-whole interest obligations. All make-whole interest obligations cease after July 2017. Further, the Company may elect to prepay up to \$551.3 million of its Fixed Rate Notes at par on or after July 2015.

The Variable Funding Notes allowed for the issuance of up to \$100.0 million of financing and certain other credit instruments, including letters of credit in support of various obligations of the Company. Interest on a portion of any outstanding Variable Funding Note borrowings is payable quarterly at a rate equal to a commercial paper rate plus 50 basis points, with the remainder at LIBOR plus 50 basis points. The Variable Funding Notes have an expected maturity in January 2017, with an option for up to two one-year renewals (subject to certain conditions, including a minimum debt service coverage ratio), and a legal final maturity in January 2042. At December 29, 2013, there were \$42.3 million of outstanding letters of credit and \$57.7 million of borrowing capacity available under the \$100.0 million Variable Funding Notes.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

At December 29, 2013, management estimates that the approximately \$1.534 billion in principal amount of outstanding Fixed Rate Notes had a fair value of approximately \$1.643 billion, and at December 30, 2012 the approximately \$1.557 billion in principal amount of Fixed Rate Notes had a fair value of approximately \$1.732 billion. The Fixed Rate Notes are classified as a Level 2 measurement (Note 3), as the Company estimated the fair value amount by using available market information. The Company estimated the fair value amounts by using available market information. The Company obtained broker quotes from two separate brokerage firms that are knowledgeable about the Company's Fixed Rate Notes and, at times, trade these notes. Further, the Company performs its own internal analysis based on the information it gathers from public markets, including information on notes that are similar to that of the Company. However, considerable judgment is required in interpreting market data to develop estimates of fair value. Accordingly, the fair value estimates presented herein are not necessarily indicative of the amount that the Company or the debtholders could realize in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair value.

Consolidated Long-Term Debt

At December 30, 2012 and December 29, 2013, consolidated long-term debt consisted of the following (in thousands):

	2012	2013
5.216% Class A-2 Notes; expected repayment date January 2019; legal final maturity January 2042	\$ 1,557,281	\$ 1,533,656

Total future minimum rental commitments	\$ 203,406	3,436	\$ 206,842
Less amounts representing interest		(608)	
Total principal payable on capital leases		\$ 2,828	

Legal Proceedings and Related Matters

The Company is a party to lawsuits, revenue agent reviews by taxing authorities and legal proceedings, of which the majority involve workers' compensation, employment practices liability, general liability and automobile and franchisee claims arising in the ordinary course of business. The Company records legal fees associated with loss contingencies when they are probable and reasonably estimable.

Litigation is subject to many uncertainties, and the outcome of individual litigated matters is not predictable with assurance. Included in the matters referenced above, the Company is party to six employment practice cases and five casualty cases. We have established legal and insurance accruals for losses relating to these cases which we believe are reasonable based upon our assessment of the current facts and circumstances. However, it is reasonably possible that our ultimate losses could exceed the amounts recorded by \$5.0 million. The remaining cases referenced above could be decided unfavorably to us and could require us to pay damages or make other expenditures in amounts or a range of amounts that cannot be estimated with accuracy. In management's opinion, these matters, individually and in the aggregate, should not have a significant adverse effect on the financial condition of the Company, and the established accruals adequately provide for the estimated resolution of such claims.

Additionally, the Company was also named as a defendant in a lawsuit along with a large franchisee and the franchisee's delivery driver. During the third quarter of 2013, the jury delivered a \$32.0 million judgment for the plaintiff where the Company was found to be 60% liable. The Company denies liability and filed an appeal of the verdict on a variety of grounds. This case is covered under the Company's casualty insurance program, subject to a \$3.0 million deductible. The Company also has indemnity provisions in its franchise agreements.

Table of Contents

DOMINO S PIZZA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Realization of the Company's deferred tax assets is dependent upon many factors, including, but not limited to, the Company's ability to generate sufficient taxable income. Although realization of the Company's net deferred tax assets is not assured, management believes it is more likely than not that the net deferred tax assets will be realized. On an ongoing basis, management will assess whether it remains more likely than not that the net deferred tax assets will be realized.

For financial reporting purposes the Company's investment in foreign subsidiaries does not exceed its tax basis. Therefore no deferred income taxes have been provided.

The Company recognizes the financial statement benefit of a tax position if it is more likely than not that the position is sustainable, based solely on its technical merits and consideration of the relevant taxing authority's widely understood administrative practices and precedents. For tax positions meeting the more likely than not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company recognizes accrued interest related to unrecognized tax benefits in interest expense and penalties in income tax expense.

During 2011, the Company accrued interest expense of \$0.1 million and released interest of \$0.2 million. At January 1, 2012, the amount of unrecognized tax benefits was \$3.5 million of which, if ultimately recognized, \$2.2 million would be recognized as an income tax benefit and reduce the Company's effective tax rate. At January 1, 2012, the Company had \$0.4 million of accrued interest and no accrued penalties. This amount is excluded from the \$3.5 million total unrecognized tax benefit.

During 2012, the Company recorded a tax benefit of approximately \$0.7 million to reflect an increased tax basis for certain Company assets due to the issuance of final tax regulations. Additionally, during 2012 and in connection with the sale of its six remaining Company-owned stores in a certain market to a franchisee, the Company recorded a deferred tax asset related to the capital loss that resulted from the write-off of the tax basis goodwill associated with the market that was sold. Management believes it is more likely than not that a portion of the deferred tax asset will not be realized and provided a valuation allowance of approximately \$0.9 million. The valuation allowance was recorded as an increase to the provision for income taxes and increased the Company's 2012 effective tax rate. On an ongoing basis, management will assess whether it remains more likely than not that the net deferred tax asset will be realized.

During 2012, the Company accrued interest expense of \$0.1 million. At December 30, 2012, the amount of unrecognized tax benefits was \$3.5 million of which, if ultimately recognized, \$2.1 million would be recognized as an income tax benefit and reduce the Company's effective tax rate. At December 30, 2012, the Company had \$0.5 million of accrued interest and no accrued penalties. This amount is excluded from the \$3.5 million total unrecognized tax benefit.

During 2013, the Company accrued interest expense of \$0.1 million. At December 29, 2013, the amount of unrecognized tax benefits was \$3.6 million of which, if ultimately recognized, \$2.1 million would be recognized as an

income tax benefit and reduce the Company's effective tax rate. At December 29, 2013, the Company had \$0.6 million of accrued interest and no accrued penalties. This amount is excluded from the \$3.6 million total unrecognized tax benefit.

Settlements during the period	(133)
Lapses of applicable statute of limitations	(344)
 Balance as of December 29, 2013	 \$ 3,573

The Company continues to be under examination by certain states. The Company's Federal statute of limitation has expired for years prior to 2010 and the relevant state statutes vary. The Company expects the current ongoing examinations to be concluded in the next twelve months and does not expect the assessment of any significant additional amounts in excess of amounts reserved.

(7) EMPLOYEE BENEFITS

The Company has a retirement savings plan which qualifies under Internal Revenue Code Section 401(k). All employees of the Company who have completed 1,000 hours of service and are at least 21 years of age are eligible to participate in the plan. The plan requires the Company to match 100% of the first 3% of each employee's elective

deferrals and 50% of the next 2% of each employee's elective deferrals. During 2011, 2012 and 2013, the Company's matching contributions were made in the form of cash and vested immediately. The expenses incurred for Company contributions to the plan were approximately \$3.7 million in 2011, \$3.8 million in 2012 and \$3.9 million in 2013.

The Company has established a non-qualified deferred compensation plan available for certain key employees. Under this self-funding plan, the participants may defer up to 40% of their annual compensation. The participants direct the investment of their deferred compensation within several investment funds. The Company is not required to contribute and did not contribute to this plan during 2011, 2012 or 2013.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Company has an employee stock purchase discount plan (the ESPDP). Under the ESPDP, eligible employees may deduct up to 15% of their eligible wages to purchase common stock at 85% of the market price of the stock at the purchase date. The ESPDP requires employees to hold their purchased common stock for at least one year. There are 1,000,000 shares authorized to be issued under the ESPDP. There were 40,107 shares, 130 shares and 230 shares issued under the ESPDP in 2011, 2012 and 2013, respectively. During 2011, the Company began to purchase common stock on the open market for the ESPDP at the current market price as soon as practicable under the plan. There were 23,468 shares, 37,769 shares and 27,404 shares of common stock in 2011, 2012 and 2013, respectively, purchased on the open market for participating employees at a weighted-average price of \$27.99 in 2011, \$34.60 in 2012 and \$55.24 in 2013. The expenses incurred under the ESPDP were approximately \$0.1 million in 2011 and \$0.2 million in both 2012 and 2013.

(8) FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Company is a party to stand-by letters of credit. The Company's exposure to credit loss for stand-by letters of credit is represented by the contractual amounts of these instruments. The Company uses the same credit policies in making conditional obligations as it does for on-balance sheet instruments. Total conditional commitments under letters of credit as of December 29, 2013 are \$42.3 million, and relate to the Company's insurance programs and supply chain center leases. As of December 29, 2013, significantly all of the Company's stand-by letters of credit were collateralized with cash, which is classified as restricted cash. The Company has guaranteed lease payments related to certain franchisees' lease arrangements. The maximum amount of potential future payments under these guarantees is \$0.6 million as of December 29, 2013.

(9) EQUITY INCENTIVE PLANS

The cost of all employee stock options, as well as other equity-based compensation arrangements, is reflected in the consolidated statements of income based on the estimated fair value of the awards.

The Company's current equity incentive plan benefits certain of the Company's employees and directors and is named the Domino's Pizza, Inc. 2004 Equity Incentive Plan (the 2004 Equity Incentive Plan). As of December 29, 2013, the maximum number of shares that may be granted under the 2004 Equity Incentive Plan is 15,600,000 shares of voting common stock of which 3,595,914 shares were authorized for grant but have not been granted.

The Company recorded total non-cash compensation expense of \$14.0 million, \$17.6 million and \$22.0 million in 2011, 2012 and 2013, respectively, which reduced net income by \$8.8 million, \$10.9 million and \$14.0 million in 2011, 2012 and 2013, respectively. All non-cash compensation expense amounts are recorded in general and administrative expense.

Stock Options

As of December 29, 2013, the number of stock options granted and outstanding under the 2004 Equity Incentive Plan was 4,317,065 shares of common stock. Stock options granted under the 2004 Equity Incentive Plan and a predecessor plan prior to fiscal 2009 were generally granted at the market price at the date of the grant, expire ten years from the date of grant and vest over five years from the date of grant. Stock options granted from 2009 to 2012 were granted at the market price at the date of the grant, expire ten years from the date of grant and generally vest over three years from the date of grant. Stock options granted in fiscal 2013 were granted at the market price at the date of the grant, expire ten years from the date of grant and generally vest over four years from the date of grant. Additionally, all stock options granted become fully exercisable upon vesting.

(Continued)

As part of the 2012 Recapitalization and pursuant to the anti-dilution provisions in the 2004 Equity Incentive Plan, the Company made cash payments totaling approximately \$13.5 million on certain stock options, reduced the exercise price on certain other stock options by an equivalent per share amount and, in certain circumstances, both reduced the stock option exercise price and made a cash payment totaling \$3.00 per share. In accordance with the equity restructuring guidance, these anti-dilution payments were accounted for as modifications/settlements and were recorded as increases in total stockholders' deficit. Affected stock option exercise prices presented below have been adjusted to reflect these 2012 Recapitalization-related actions.

Stock option activity related to the 2004 Equity Incentive Plan is summarized as follows:

	Outstanding	Common Stock Options Weighted Average Exercise Price	Weighted Average Remaining Life (Years)	Aggregate Intrinsic Value (In thousands)
Stock options at January 2, 2011	8,995,667	\$ 9.60		
Stock options granted	392,000	19.24		
Stock options cancelled	(170,213)	10.30		
Stock options exercised	(3,773,763)	8.88		
Stock options at January 1, 2012	5,443,691	\$ 10.78		
Stock options granted	215,670	32.28		
Stock options cancelled	(58,153)	11.91		
Stock options exercised	(938,669)	9.55		
Stock options at December 30, 2012	4,662,539	\$ 11.50		
Stock options granted	591,490	50.83		
Stock options cancelled	(8,500)	7.63		
Stock options exercised	(928,464)	10.22		
Stock options at December 29, 2013	4,317,065	\$ 17.17	5.5	\$ 228,879
Exercisable at December 29, 2013	3,464,614	\$ 11.15	4.7	\$ 204,522

The total intrinsic value of stock options exercised was approximately \$50.2 million, \$27.5 million and \$46.0 million in 2011, 2012 and 2013, respectively. Cash received from the exercise of stock options was approximately \$33.5 million, \$8.9 million and \$9.5 million in 2011, 2012 and 2013, respectively. The tax benefit realized from stock options exercised was approximately \$13.5 million, \$8.7 million and \$15.5 million in 2011, 2012 and 2013, respectively.

The Company recorded total non-cash compensation expense of \$6.1 million, \$5.3 million and \$6.9 million in 2011, 2012 and 2013, respectively, related to these awards. As of December 29, 2013, there was \$6.6 million of total unrecognized compensation cost related to unvested stock options granted under the 2004 Equity Incentive Plan which will be recognized on a straight-line basis over the related vesting period. This unrecognized compensation cost is expected to be recognized over a weighted average period of 3.0 years.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Management estimated the fair value of each option grant made during 2011, 2012 and 2013 as of the date of the grant using the Black-Scholes option pricing method. Weighted average assumptions are presented in the following table. The risk-free interest rate is based on the estimated effective term, and is estimated based on U.S. Treasury Bond rates as of the grant date. The expected life (years) is based on several factors, including, among other things, the vesting term and contractual term as well as historical experience. The expected volatility is based principally on the historical volatility of the Company's share price.

	2011	2012	2013
Risk-free interest rate	2.1%	1.0%	1.1%
Expected life (years)	5.0	5.0	5.5
Expected volatility	45.0%	45.0%	38.7%
Expected dividend yield	0.0%	0.0%	1.6%
Weighted average fair value per share	\$ 8.04	\$ 13.70	\$ 15.84

Option valuation models require the input of highly subjective assumptions. In management's opinion, existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options, as changes in subjective input assumptions can significantly affect the fair value estimate.

Other Equity-Based Compensation Arrangements

The Company granted 53,125 shares, 22,420 shares and 24,540 shares of restricted stock in 2011, 2012 and 2013, respectively, to members of its board of directors. These grants generally vest one-year from the date of the grant and have a fair value equal to the market price of the Company's stock on the grant date. The Company recorded total non-cash compensation expense of \$0.7 million, \$0.8 million and \$1.0 million in 2011, 2012 and 2013, respectively, related to these restricted stock awards. All non-cash compensation expense amounts are recorded in general and administrative expense. As of December 29, 2013, there was approximately \$0.2 million of total unrecognized compensation cost related to these restricted stock grants.

The Company granted 376,309 shares, 282,170 shares and 312,330 shares of performance-based restricted stock in 2011, 2012 and 2013, respectively, to certain employees of the Company. The performance-based restricted stock awards granted in 2011 and 2012 are separated into three tranches and have time-based and performance-based vesting conditions with the last tranche vesting three years from the issuance date. The performance-based restricted stock awards granted in 2013 are separated into four tranches and have time-based and performance-based vesting conditions with the last tranche vesting four years from the issuance date. These awards also contain provisions for accelerated vesting upon the retirement of holders that have achieved specific service and age requirements. These awards are considered granted for accounting purposes when the performance target is set, which is generally in the fourth quarter of each year. The Company recorded total non-cash compensation expense of \$7.2 million, \$11.5 million and \$14.1 million in 2011, 2012 and 2013, respectively, related to these awards. All non-cash compensation

expense amounts are recorded in general and administrative expense. As of December 29, 2013, there was an estimated \$24.7 million of total unrecognized compensation cost related to performance-based restricted stock.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Restricted stock and performance-based restricted stock activity related to the 2004 Equity Incentive Plan is summarized as follows:

	Shares	Weighted Average Grant Date Fair Value
Nonvested at December 30, 2012	691,842	\$ 17.61
Shares granted (1)	336,870	\$ 52.26
Shares cancelled	(7,776)	\$ 51.98
Shares vested	(393,760)	\$ 31.58
Nonvested at December 29, 2013	627,176	\$ 23.41

- (1) The weighted average grant date fair value for performance-based restricted shares granted was calculated based on the market price on the grant dates. Certain tranches will ultimately be valued when the performance condition is established for each tranche, which generally occurs in the fourth quarter of each fiscal year.

(10) CAPITAL STRUCTURE

The Company has a Board of Directors approved open market share repurchase program of the Company's common stock, which was reset during the third quarter of 2012 at \$200.0 million. The open market share repurchase program has historically been funded by excess cash flow and, if necessary, borrowings available under the Variable Funding Notes. During 2011, 2012 and 2013 the Company repurchased 6,414,813 shares, 2,472,863 shares and 1,666,435 shares of common stock for approximately \$165.0 million, \$88.2 million and \$97.1 million, respectively. At December 29, 2013, the Company had approximately \$55.2 million remaining under the \$200.0 million authorization. The Company's policy is to recognize the difference between the purchase price and par value of the common stock in additional paid-in capital. In instances where there is no additional paid-in capital, the difference is recognized in retained deficit.

As of December 29, 2013, authorized common stock consists of 160,000,000 voting shares and 10,000,000 non-voting shares. The share components of outstanding common stock at December 30, 2012 and December 29, 2013 are as follows:

	2012	2013
Voting	56,295,495	55,750,918
Non-Voting	17,754	17,754
Total Common Stock	56,313,249	55,768,672

11) SEGMENT INFORMATION

The Company has three reportable segments: (i) Domestic Stores; (ii) Domestic Supply Chain; and (iii) International. The Company's operations are organized by management on the combined basis of line of business and geography. The Domestic Stores segment includes operations with respect to all franchised and Company-owned stores throughout the contiguous United States. The Domestic Supply Chain segment primarily includes the distribution of food, equipment and supplies to the Domestic Stores segment from the Company's regional supply chain centers. The International segment primarily includes operations related to the Company's franchising business in foreign and non-contiguous United States markets and its supply chain center operations in Canada, Alaska and Hawaii.

The accounting policies of the reportable segments are the same as those described in Note 1. The Company evaluates the performance of its segments and allocates resources to them based on earnings before interest, taxes, depreciation, amortization and other, referred to as Segment Income.

The tables below summarize the financial information concerning the Company's reportable segments for 2011, 2012 and 2013. Intersegment Revenues are comprised of sales of food, equipment and supplies from the Domestic Supply Chain segment to the Company-owned stores in the Domestic Stores segment. Intersegment sales prices are market based. The Other column as it relates to Segment Income and income from operations information below primarily includes corporate administrative costs. The Other column as it relates to capital expenditures primarily includes capitalized software, certain equipment and leasehold improvements. Tabular amounts presented below are in thousands.

	Domestic Stores	Domestic Supply Chain	International	Intersegment Revenues	Other	Total
Revenues-						
2011	\$ 523,356	\$ 1,024,495	\$ 200,933	\$ (96,591)		\$ 1,652,193
2012	518,652	1,033,545	217,568	(91,326)		1,678,439

The following table reconciles total Segment Income to income before provision for income taxes:

	2011	2012	2013
Total Segment Income	\$ 295,020	\$ 323,915	\$ 361,948
Depreciation and amortization	(24,042)	(23,171)	(25,783)
Gains (losses) on sale/disposal of assets	2,436	(540)	(367)
Non-cash compensation expense	(13,954)	(17,621)	(21,987)
Expenses related to the sale of Company-owned stores	(315)		
2012 recapitalization-related expenses		(252)	
Income from operations	259,145	282,331	313,811
Interest income	296	304	160
Interest expense	(91,635)	(101,448)	(88,872)
Income before provision for income taxes	\$ 167,806	\$ 181,187	\$ 225,099

The following table summarizes the Company's identifiable asset information as of December 30, 2012 and December 29, 2013:

	2012	2013
Domestic Stores	\$ 54,750	\$ 57,879
Domestic Supply Chain	130,241	140,020
Total domestic assets	184,991	197,899
International	38,884	40,823
Unallocated	254,322	286,533
Total consolidated assets	\$ 478,197	\$ 525,255

Unallocated assets primarily include cash and cash equivalents, restricted cash, advertising fund assets, investments in marketable securities, deferred financing costs, certain long-lived assets and deferred income taxes.

The following table summarizes the Company's goodwill balance as of December 30, 2012 and December 29, 2013:

Edgar Filing: DOMINOS PIZZA INC - Form 10-K

	2012	2013
Domestic Stores	\$ 15,531	\$ 15,531
Domestic Supply Chain	1,067	1,067
Consolidated goodwill	\$ 16,598	\$ 16,598

The Company sold 58 stores in 2011 and six stores in 2012 to domestic franchisees. In connection with these sales of Company-owned stores, goodwill was reduced by approximately \$0.7 million in 2011 and \$0.1 million in 2012. Additionally, the closure of three Company-owned stores in 2011 resulted in a decrease in goodwill of approximately \$76,000. No Company-owned stores were sold or closed during 2013.

Table of ContentsDOMINO S PIZZA, INC. AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

(12) SALE AND CLOSURE OF COMPANY-OWNED STORES

During 2011, the Company sold 58 Company-owned stores in a series of transactions to multiple franchisees. In connection with the sale of these stores, the Company recognized pre-tax gains on the sale of assets of approximately \$2.2 million, which was net of a reduction in goodwill of approximately \$0.7 million. Additionally, the Company incurred other related expenses of approximately \$0.3 million. These items were included in general and administrative expenses.

During 2012, the Company sold its six remaining Company-owned stores in a certain market to a franchisee. In connection with the sale of these stores, the Company recognized minimal pre-tax gains on the sale of assets, which was net of a minimal reduction in goodwill.

During 2013, the Company did not sell or close any of its Company-owned stores.

(13) PERIODIC FINANCIAL DATA (UNAUDITED; IN THOUSANDS, EXCEPT PER SHARE AMOUNTS)

The Company's convention with respect to reporting periodic financial data is such that each of the first three fiscal quarters consists of twelve weeks while the last fiscal quarter consists of sixteen weeks or seventeen weeks. The fourth quarter of 2012 and 2013 are both comprised of sixteen weeks.

(14) SUBSEQUENT EVENTS

Subsequent to December 29, 2013, the Company repurchased and retired 221,481 shares of its common stock for approximately \$15.1 million, or an average of \$68.32 per share.

On February 12, 2014, the Company granted 77,630 stock options, 10,640 restricted shares and 18,750 performance-based restricted shares to certain employees and the members of the Board of Directors of the Company. Additionally, On February 12, 2014, the Board of Directors declared a quarterly dividend of \$0.25 per common share payable on March 28, 2014 to shareholders of record at the close of business on March 14, 2014. Further, on February 12, 2014, the Board of Directors approved an increase to the Company's open market share repurchase program, resulting in a total remaining authorized amount for additional share repurchases of \$200.0 million.

Table of Contents

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

The Company carried out an evaluation as of the end of the period covered by this report, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in ensuring that all information required in the reports it files or submits under the Exchange Act was accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and was recorded, processed, summarized and reported within the time period required by the rules and regulations of the Securities and Exchange Commission.

(b) Changes in Internal Control over Financial Reporting.

There have been no changes in internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Management's Annual Report on Internal Control over Financial Reporting.

The management of Domino's Pizza, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) promulgated under the Exchange Act, as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 29, 2013 based on the framework in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, management concluded that its internal control over financial reporting was effective as of December 29, 2013. The effectiveness of the Company's internal control over financial reporting as of December 29, 2013, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Item 9B. Other Information.

None.

Table of Contents**Part III****Item 10. Directors, Executive Officers and Corporate Governance.**

The following table sets forth information about our executive officers and directors.

Name	Age	Position

DOMINO S PIZZA, INC.

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

(1) INTRODUCTION AND BASIS OF PRESENTATION

Domino s Pizza, Inc., on a stand-alone basis, (the Parent Company) has accounted for majority-owned subsidiaries using the equity method of accounting. The accompanying condensed financial statements of the Parent Company should be read in conjunction with the consolidated financial statements of Domino s Pizza, Inc. and its subsidiaries (the Company) and the notes thereto included in Item 8 of this Form 10-K. These financial statements have been provided to comply with Rule 4-08(e) of Regulation S-X.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less at the date of purchase. These investments are carried at cost, which approximates fair value.

Use of Estimates

The use of estimates is inherent in the preparation of financial statements in accordance with generally accepted accounting principles. Actual results could differ from those estimates.

(2) SUPPLEMENTAL DISCLOSURES OF CASH FLOW INFORMATION

During 2012, the Parent Company received dividends from its subsidiaries primarily consisting of amounts received to pay a \$3.00 per share special cash dividend in connection with the Company s 2012 recapitalization transaction. See Note 4 to the Company s consolidated financial statements as filed in this Form 10-K for a description of the 2012 recapitalization transaction.

Non-cash activities of \$30.0 million, \$21.7 million and \$32.3 million were recorded in 2011, 2012 and 2013, respectively. These amounts primarily relate to stock-based compensation plans and amounts recorded in other comprehensive income related to the Company s subsidiaries. Non-cash activities in 2012 also include payment by a subsidiary of approximately \$13.5 million pursuant to the anti-dilution provisions in the Company s equity incentive plans which was recorded as an increase in total stockholders deficit (see Note 9 to the Company s consolidated financial statements as filed in this Form 10-K for further information).
