Portfolio Holdings (unaudited) (continued)

The inputs of methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. The summary of inputs used to value the Fund's net assets as of January 31, 2015 is as follows (See Note A – Security Valuation and Fair Value measurements in the Notes to Portfolio Holdings):

	Total Value at 01/31/15	Level 1 Quoted Price	Level 2 Significant Observable Input	Level 3 Significant Unobservable Input
Investments in Securities*	\$ 71,820,074	\$ 71,820,074	\$	\$

* See Portfolio Holdings detail for country breakout.

At the end of the quarter ended January 31, 2015, an investment with a total aggregate value of \$2,068,827 was transferred from Level 2 to Level 1 because the security traded on the last day of the quarter.

A. Valuation and Investment Practices:

Security Valuation: Securities listed on a stock exchange for which market quotations are readily available are valued at the closing prices on the date of valuation, or if no such closing prices are available, at the last bid price quoted on such day. If there are no such quotations available for the date of valuation, the last available closing price will be used. The value of securities and other assets for which no market quotations are readily available, or whose values have been materially affected by events occurring before the Fund's pricing time but after the close of the securities' primary markets, are valued by methods deemed by the Board of Directors to represent fair value. Short-term securities that mature in 60 days or less are valued at amortized cost.

Fair Value Measurements: As described above, the Fund utilizes various methods to measure the fair value of most of its investments on a recurring basis. U.S. Generally Accepted Accounting Principles (GAAP) establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

- Level 1 unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety. A summary of the levels of the Fund's investments as of January 31, 2015 is included with the Fund's Portfolio of Holdings.

The New Ireland Fund, Inc.*Notes to Portfolio Holdings (unaudited) (continued)*

At the end of each calendar quarter, management evaluates the Level 2 and Level 3 assets and liabilities, if any, for changes in liquidity, including but not limited to: whether a broker is willing to execute at the quoted price, the depth and consistency of prices from third party services, and the existence of contemporaneous, observable trades in the market. Additionally, management evaluates the Level 1 and Level 2 assets and liabilities on a quarterly basis for changes in listings or delistings on national exchanges.

Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the spot rate of such currencies against U.S. dollars by obtaining from Interactive Data Corp. each day the current 4:00 pm London time spot rate and future rate (the future rates are quoted in 30-day increments) on foreign currency contracts. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amount actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gains and losses on security transactions.

Securities Transactions: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the identified cost basis.

B. Unrealized Appreciation/(Depreciation):

The aggregate cost of investments and the composition of unrealized appreciation and depreciation on investments and appreciation on assets and liabilities in foreign currencies on a tax basis as of January 31, 2015 were as follows:

	Gross Unrealized Appreciation on Investments	Gross Unrealized Depreciation on Investments	Net Unrealized Appreciation on Investments	Net Unrealized Depreciation on Foreign Currency	Net Unrealized Appreciation
Total Cost of Investments	\$ 25,450,242	\$ (6,892,158)	\$ 18,558,084	\$ (31,645)	\$ 18,526,439

C. Risk Factors:

Investing in the Fund may involve certain risks including, but not limited to, those described below.

The prices of securities held by the Fund may decline in response to certain events, including those directly involving the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. The growth-oriented, equity-type securities generally purchased by the Fund may involve large price swings and potential for loss.

Investments in securities issued by entities based outside the United States may also be affected by currency controls; different accounting, auditing, financial reporting, and legal standards and practices; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transaction costs; and various
