Decision to Acquire Certain Businesses from SK Planet

On January 21, 2016, the Board of Directors of SK Telecom Co., Ltd. (the Company) resolved to acquire the location-based services business and the ancillary mobile phone verification services business (the Acquired Businesses) from SK Planet Co., Ltd. (SK Planet), a wholly-owned subsidiary of the Company. This transaction will be effected through a spin-off of the Acquired Businesses from SK Planet which will then be merged into the Company through a short-form merger (the Merger). No new shares will be issued in connection with the Merger. The purpose of this transaction is to strengthen the Company's platform business capabilities and to refocus SK Planet's business portfolio on its commerce business.

As SK Planet is already a wholly-owned subsidiary of the Company, the consummation of the Merger is not expected to have a material effect on the Company's financial position. The Company is aiming to transform into the next generation platform solutions provider as a foundation for continued growth. It is expected that the Company will leverage the Acquired Businesses in line with this goal and SK Planet will further concentrate its resources on its commerce business. The Company expects that various business synergies will be created within the Company's platform business such as its online-to-offline business, location-based service business and big data business through the Company's ability to leverage Korea's leading real-time mobile navigation service, T-Map Navigation, as well as the other location-based services that are acquired through the Merger. In addition, the Company will be able to increase the range of services it offers to customers by directly operating the ancillary mobile phone verification services business acquired through the Merger.

Set forth below is summary financial information relating to the Acquired Businesses as of and for the year ended December 31, 2015 (tentative):
