Approximate Date of Proposed Public Offering:

As soon as practicable after the effective date of this Registration Statement.

If the securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box)

When declared effective pursuant to section 8(c)

Immediately upon filing pursuant to no-action relief granted to Registrant on November 9, 2010.

PROSPECTUS

8.8 Million Common Shares

Nuveen Senior Income Fund

Nuveen Senior Income Fund (the Fund) is a diversified, closed-end management investment company. The Fund's investment objective is to achieve a high level of current income, consistent with preservation of capital. The Fund cannot assure you that it will achieve its investment objective.

Investing in the Fund's Common Shares involves certain risks that are described in the Risk Factors section of this Prospectus including the specific risks relating to the Fund's use of leverage.

Neither the Securities Exchange Commission (the SEC) nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information, dated March 8, 2017 (the SAI), containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the SEC's web site (<http://www.sec.gov>).

The Fund's Common Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

Portfolio Contents. Under normal circumstances, the Fund will invest at least 80% of its Managed Assets (as defined below) in adjustable rate, U.S. dollar-denominated secured and unsecured senior loans (Senior Loans), which unsecured Senior Loans will be, at the time of investment, investment grade quality. The Fund will invest at least 65% of its Managed Assets in Senior Loans that are secured by specific collateral. Such collateral consists of assets and/or stock of the borrower. Senior Loans are made to corporations, partnerships, limited liability companies and other similar types of business entities (Borrowers) to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes. No more than 30% of the Fund's Managed Assets may be invested

Edgar Filing: NUVEEN SENIOR INCOME FUND - Form 486BPOS

in Senior Loans and other debt securities that are, at the time of investment, rated CCC+ or Caa or below by Standard & Poor's Corporation, a division of The McGraw-Hill Companies, Moody's Investor Service, Inc. or Fitch Ratings, part of the Fitch Group or that are unrated but judged to be of comparable quality. The Fund may invest up to 20% of its Managed Assets in U.S. dollar-denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. In addition, the Fund may invest up to 20% of its Managed Assets, in the aggregate, in other income producing securities such as investment and non-investment grade corporate debt securities, high quality, short-term debt securities and equity securities and warrants acquired in connection with the Fund's investments in Senior Loans. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage).

Adviser and Subadviser. Nuveen Fund Advisors, LLC, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategy and its implementation, including the use of leverage and hedging. Symphony Asset Management LLC, the Fund's investment sub-adviser, oversees the day-to-day investment operations of the Fund.

The minimum price on any day at which Common Shares may be sold will not be less than the current net asset value per share plus the per share amount of the commission to be paid to the Fund's distributor, Nuveen Securities, LLC (Nuveen Securities). The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For more information on how Common Shares may be sold, see the Plan of Distribution section of this Prospectus.

As of March 1, 2017, the Fund has sold an aggregate of 2,598,036 Common Shares, representing net proceeds to the Fund of \$20,407,028, after payment of commissions of \$206,137 in the aggregate.

Common Shares are listed on the New York Stock Exchange (NYSE). The trading or ticker symbol of the Fund is NSL. The Fund's closing price on the NYSE on March 1, 2017 was \$7.11.

The date of this Prospectus is March 8, 2017.

The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund will update this Prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the Statement of Additional Information (the SAI).

The Fund

Nuveen Senior Income Fund (the Fund) is a diversified, closed-end management investment company. See The Fund. The Fund's Common Shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (the NYSE) under the symbol NSL. See Description of Shares. As of January 31, 2017, the Fund had 38,621,872 Common Shares outstanding, 43,000 Term Preferred Shares (referred to herein as TP Shares), and net assets applicable to Common Shares of \$269,959,113.

Investment Objective and Policies

The Fund's investment objective is to achieve a high level of current income, consistent with preservation of capital. The Fund cannot assure you that it will achieve its investment objective. The Fund's investment objective and any investment policies identified as such are considered fundamental and may not be changed without shareholder approval.

As a non-fundamental policy, under normal circumstances, the Fund will invest at least 80% of its Managed Assets in adjustable rate, U.S. dollar-denominated secured and unsecured senior loans (Senior Loans), which unsecured Senior Loans will be, at the time of investment, investment grade quality. Senior Loans hold the most senior position in the capital structure of an issuer (i.e., they have a claim on the assets and/or stock of the issuer that has priority over subordinated debt holders and stockholders of the issuer). With respect to the Fund's Senior Loans included in the 80% policy described above, such instruments will at all times have a dollar-weighted average time until the next interest rate adjustment of 90 days or less.

Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage).

Investment grade quality securities are those securities that, at the time of investment, are rated by at least one nationally recognized statistical rating organization (NRSRO) within the four highest grades unrated but judged to be of comparable quality.

As a non-fundamental policy, under normal circumstances, the Fund will invest at least 65% of its Managed Assets in Senior Loans that are secured by specific collateral. Such collateral consists of assets and/or stock of the borrower. Senior Loans are made to corporations, partnerships, limited liability companies and other similar types of business entities (Borrowers) to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other

purposes. No more than 30% of the Fund's Managed Assets may be invested in Senior Loans and other debt securities that are, at the time of investment, rated CCC+ or Caa or below by Standard & Poor's Corporation, a division of The McGraw-Hill Companies (S&P), Moody's Investor Service, Inc. (Moody's) or Fitch Ratings, part of the Fitch Group (Fitch) or that are unrated but judged to be of comparable quality. Also as a non-fundamental policy, under normal circumstances, the Fund may invest up to 20% of its Managed Assets in U.S. dollar-denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. Additionally, as a non-fundamental policy, the Fund may invest up to 20% of its Managed Assets, in the aggregate, in:

other income producing securities such as investment and non-investment grade corporate debt securities, of corporate or governmental issuers, and

equity securities and warrants acquired in connection with the Fund's investments in Senior Loans.

The Fund may also engage in lending of its securities, repurchase agreements, reverse repurchase agreements and, for hedging and risk management purposes, certain derivative transactions. See Risk Factors.

Investment Adviser

Nuveen Fund Advisors, LLC (NFALLC), the Fund's investment adviser, offers advisory and investment management services to a broad range of investment company clients. NFALLC has overall responsibility for management of the Fund, oversees the management of the Fund's portfolio, manages the Fund's business affairs and provides certain clerical, bookkeeping and other administrative services. NFALLC is located at 333 West Wacker Drive, Chicago, Illinois 60606. NFALLC is a subsidiary of Nuveen, LLC (Nuveen), the investment management arm of Teachers Insurance and Annuity Association of America (TIAA). TIAA is a life insurance company founded in 1918 by the Carnegie Foundation for the Advancement of Teaching and is the companion organization of College Retirement Equities Fund. As of December 31, 2016, Nuveen managed approximately \$882 billion in assets, of which approximately \$126 billion was managed by NFALLC.

Sub-Adviser

Symphony Asset Management LLC (Symphony or Subadviser) is the Fund's subadviser and oversees the day-to-day investment operations of the Fund.

Symphony, a registered investment adviser, is an indirect wholly owned subsidiary of Nuveen Investments. Founded in 1994, Symphony had approximately \$18.7 billion in assets under management as of December 31, 2016. Symphony specializes in the management of both long-only and alternative equity and debt strategies.

NFALLC and Symphony will sometimes individually be referred to as an Adviser and together be referred to as the Advisers.

Nuveen Securities, LLC (Nuveen Securities), a registered broker-dealer affiliate of NFALLC is involved in the offering of the Fund's Common Shares. See Plan of Distribution Distribution Through At-the-Market Transactions.

Use of Leverage

Regulatory leverage consists of senior securities as defined under the Investment Company Act of 1940, as amended (the 1940 Act), which include (1) borrowings, including loans from financial institutions (Borrowings); (2) issuance of debt securities; and (3) issuance of preferred shares ((1), (2), and (3) are hereinafter collectively referred to as regulatory leverage). The Fund may utilize regulatory leverage to the extent permissible under the 1940 Act.

The Fund currently employs regulatory leverage through borrowings and currently has outstanding TP Shares. The Fund has entered into a credit agreement with State Street Bank & Trust Company as lender (State Street) (the Credit Agreement). The borrowing capacity under the Credit Agreement is \$115 million. The term of the Credit Agreement ends on January 29, 2018, unless extended. The Fund has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement. This credit facility is secured by substantially all of the assets of the Fund. As of July 31, 2016, the Fund had a credit agreement with several conduit lenders and Citibank, N.A. as a lender, liquidity provider and as agent for the lenders (collectively, Citibank) (Citibank Credit Agreement) and, as of that date, the Fund's outstanding balance on the Citibank Credit Agreement was \$101,000,000. For the fiscal year ended July 31, 2016, the average daily balance outstanding and the average annual interest rate on these Borrowings were \$99,435,792 and 1.28%, respectively.

In addition to the regulatory leverage described above, the Fund may also enter into reverse repurchase agreements and derivatives transactions, such as certain credit default swaps, total return swaps and bond futures, that have the economic effect of leverage by creating additional investment exposure. See Use of Leverage and The Fund's Investments Portfolio Composition and Other Information Derivatives in the Prospectus and Hedging Transactions in the SAI.

Leverage involves special risks. See Risk Factors Leverage Risk. There is no assurance that the Fund's leveraging strategy will be successful. The Fund will seek to invest the proceeds of any future leverage in a manner consistent with the Fund's investment objective and policies. See Use of Leverage.

The Fund pays a management fee to NFALLC (which in turn pays a portion of its fee to Symphony) based on a percentage of Managed Assets. NFALLC will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage is in the best interests of the Fund. However, the fact that a decision to employ or increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed Assets and therefore the amount of fees paid to NFALLC. This means that NFALLC may have a conflict of interest in determining whether to use or increase leverage. NFALLC will seek to manage that potential conflict by leveraging the Fund (or increasing such leverage) only when it determines that such action is in the best interests of the Fund, and by periodically reviewing the Fund's performance and use of leverage with the Board of Trustees.

Offering Methods

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions through one or more broker-dealers that have entered into a selected dealer agreement with Nuveen Securities, one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

Distribution Through At-the-Market Transactions. The Fund from time to time may offer its Common Shares through Nuveen Securities, to certain broker-dealers that have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with Stifel, Nicolaus & Company, Incorporated (Stifel Nicolaus) pursuant to which Stifel Nicolaus will be acting as Nuveen Securities's exclusive sub-placement agent with respect to at-the-market offerings of Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund, Nuveen Securities and Stifel Nicolaus. Common Shares will be sold at market prices, which shall be determined with reference to trades on the New York Stock Exchange (NYSE), subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a commission rate of up to 1% of the gross proceeds of the sale of Common Shares. Nuveen Securities will compensate Stifel Nicolaus at a fixed rate of 0.8% of the gross proceeds of the sale of Common Shares sold by Stifel Nicolaus. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), and the compensation of Nuveen may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, each of Nuveen Securities and Stifel Nicolaus will act on a reasonable efforts basis.

The offering of Common Shares will be made pursuant to the Selected Dealer Agreement among the Fund, Nuveen Securities and Stifel Nicolaus, which will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Selected Dealer Agreement. Each of Nuveen Securities and Stifel Nicolaus shall have the right to terminate the Selected Dealer Agreement in its discretion at any time. See "Plan of Distribution - Distribution Through At-the-Market Transactions."

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

The Fund's closing price on the NYSE on March 1, 2017 was \$7.11.

Distribution Through Underwriting Syndicates. The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, Underwriters will market and price the offering on an expedited basis (e.g., overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 2% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 94% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See "Plan of Distribution - Distribution Through Underwriting Syndicates."

Distribution Through Privately Negotiated Transactions. The Fund, through Nuveen Securities, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares. No sales commission or other compensation will be paid to Nuveen Securities or any other FINRA member in connection with such transactions.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share of the Fund's Common Shares or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

Investment and Market Risk. An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, which generally do not trade on a national securities exchange, NASDAQ or in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk.

Recent Market Circumstances. The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and

credit has become scarcer worldwide. Recent regulatory changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and the introduction of new international capital and liquidity requirements set forth by the Basel Committee on Banking Supervision (known as Basel III), may cause lending activity within the financial services sector to be constrained for several years as Basel III rules phase in and rules and regulations are promulgated and interpreted under the Dodd-Frank Act.

Since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and has spread to varying degrees throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Fund, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Fund. In the United States, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to AA+ from AAA. Any additional downgrade by S&P, or any other rating agency, could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt.

Global economies and financial markets are also becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. For example, in a referendum held on June 23, 2016, citizens of the United Kingdom voted to leave the European Union (EU), creating economic and political uncertainty in its wake. The country's departure from the EU (known as Brexit) sparked depreciation in the value of the British pound, short-term declines in the stock markets and heightened risk of continued economic volatility worldwide.

As a consequence of the United Kingdom's vote to withdraw from the EU, the government of the United Kingdom may, pursuant to the Treaty of Lisbon (the Treaty), give notice of its withdrawal and enter into negotiations with the EU Council to agree to terms for the United Kingdom's withdrawal from the EU. The Treaty provides for a two-year negotiation period, which may be shortened or extended by agreement of the parties. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom's exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative

impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties.

The impact of these developments in the near- and long-term is unknown and could have additional adverse effects on economies, financial markets and asset valuations around the world.

Legislation and Regulatory Risk. At any time after the date of this Prospectus, legislation or additional regulations may be enacted that could negatively affect the assets of the Fund, securities held by the Fund or the issuers of such securities. Fund shareholders may incur increased costs resulting from such legislation or additional regulation. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives.

The SEC recently proposed rules governing the use of derivatives by registered investment companies, which could affect the nature and extent of derivatives used by the Fund. The proposed rules have not yet been adopted and therefore the full extent of such rules is uncertain at this time. It is possible that such rules, if adopted, could limit the implementation of the Fund's use of derivatives, which could have an adverse impact on the Fund.

Market Discount from Net Asset Value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund. The net asset value per Common Share will also be reduced by costs associated with any future issuances of Common or preferred shares. The Common Shares are designed primarily for

long-term investors, and you should not view the Fund as a vehicle for trading purposes. See Risk Factors Market Discount from Net Asset Value.

Net Asset Value Fluctuations. The Senior Loans in which the Fund will invest generally are not listed on any securities exchange. Certain Senior Loans are traded by institutional investors in an over-the-counter secondary market for Senior Loan obligations that has developed over the past several years. The secondary market for those Senior Loans generally is comparatively illiquid relative to markets for other income securities and no active trading market exists for many Senior Loans. Because of the lack of an active trading market, Senior Loans are generally more difficult to value than liquid securities for which an active trading market exists. In determining net asset value, the Fund will utilize the valuations of Senior Loans furnished by an independent third-party pricing service, which typically values Senior Loans at the mean of the highest bona fide bid and lowest bona fide ask prices when current quotations are readily available. Senior Loans for which current quotations are not readily available are valued at a fair value as determined by the pricing service using pricing matrices and other information and analyses, including credit considerations considered relevant by such pricing service, to determine valuations. If the pricing service does not provide a value for a Senior Loan, a value will be determined by NFALLC. To the extent that an active secondary trading market in Senior Loan interests develops to a reliable degree, the pricing service may rely to an increasing extent on such market prices and quotations in determining valuations of the Senior Loan interests in the Fund's portfolio. The Fund purchases Senior Loans primarily to seek to achieve its investment objective of high current income, consistent with preservation of capital, and does not anticipate that it will actively trade Senior Loans. To the extent a trading market continues to develop, certain participants in the market may have objectives other than current income and may pursue short-term trading strategies, which may result in erratic movements in the market prices for Senior Loans as a result of movements in short-term interest rates or otherwise. Although the Fund's policy of acquiring interests in floating rate Senior Loans is intended to minimize fluctuations in net asset value resulting from changes in market interest rates, the Fund's net asset value will fluctuate. See Net Asset Value.

Senior Loan Risks.

Issuer Credit Risk. Borrowers of Senior Loans may default on their obligations to pay principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a Senior Loan experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. Although under normal circumstances at least 65% of the Fund's Managed Assets will be invested in Senior Loans that are secured by specific collateral, there

can be no assurance that liquidation of such collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. Investments by the Fund in debt securities issued by middle-market companies may subject the Fund to greater risk of Issuer default, in part because, middle-market companies may have limited financial resources and typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render middle-market companies more vulnerable to competitors' actions and adverse market conditions. In the event of bankruptcy of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a Senior Loan. The Fund is subject to the same inherent risks described above with respect to issuers of other debt instruments in which the Fund may invest, although it is not expected that those debt instruments will be secured by collateral.

Senior Loan Interest Rate Risk. Because the interest rates of Senior Loans reset frequently, if market interest rates fall, the loans' interest rates will be reset to lower levels, potentially reducing the Fund's income. Because both Senior Loans and the Fund's preferred shares, if any, and Borrowings generally pay interest or dividends based on short-term market interest rates, the Fund's investments in Senior Loans may potentially offset the leverage risks borne by the Fund relating to the fluctuations on Common Share income due to variations in the preferred share dividend rate and/or the interest rate on Borrowings. See *Use of Leverage*. The Fund is subject to the same inherent risks described above with respect to other adjustable rate debt instruments in which the Fund may invest.

Participation Risks. The Fund also may purchase a participation interest in a Senior Loan and by doing so acquire some or all of the interest of a bank or other lending institution in a Senior Loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the lender, not the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not have a senior claim to the lender's interest in the loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the lender would have under the loan. Such third party participation arrangements are designed to give loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the Borrower. Even when these arrangements exist, however, there can be

no assurance that the principal and interest owed on the loan will be repaid in full. See Risk Factors Senior Loan Risks Participation Risk and Risk Factors Below Investment Grade Risk.

Prepayment Risk. During periods of declining interest rates or for other purposes, Borrowers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk.

Other Risks Associated with Senior Loans. Many Senior Loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the SEC and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to Senior Loans generally may be less extensive than that available for registered and exchange-listed securities. Economic and other events (whether real or perceived) can reduce the demand for certain Senior Loans or Senior Loans generally, which may reduce market prices and cause the Fund's net asset value per share to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market currently exists for some Senior Loans in which the Fund may invest and, thus, those loans may be illiquid. As a result, such Senior Loans generally are more difficult to value than more liquid securities for which a trading market exists.

Below Investment Grade Risk. The Fund may invest up to 100% of its assets in Senior Loans and other securities that are below investment grade or that are unrated but judged to be of comparable quality. Securities of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower rated securities may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade securities are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher rated securities. The secondary market for lower rated securities, including some Senior Loans, may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. See Risk Factors Below Investment Grade Risk.

Non-U.S. Issuer Risk. The Fund may invest up to 20% of its Managed Assets in U.S. dollar denominated Senior Loans of Borrowers that are organized or located in countries outside the United States. Although the Senior Loans will require payment of interest and principal in U.S. dollars, these Borrowers may have

significant non-U.S. dollar revenues. Investment in non-U.S. Borrowers involves special risks, including that non-U.S. Borrowers may be subject to: (i) less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible seizure of a company's assets; (vii) restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest due to blockages of foreign currency exchanges or otherwise; and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant portion of its assets in companies located in one region and to the extent that the Fund invests in instruments of issuers in emerging markets countries. In addition, economic, political and social developments may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against non-U.S. issuers.

See Risk Factors Non-U.S. Issuer Risk.

Credit Risks Associated with Investments in Participations. The Fund may acquire from a Lender a portion of the Lender's rights under a loan agreement. This is commonly referred to as purchasing a Participation in a Senior Loan. The Fund does not currently intend to invest more than 20% of its Managed Assets in Participations. Under a Participation, the Fund generally will have rights that are more limited than the rights of Lenders or of persons who acquire a Senior Loan by Assignment (as defined below). In a Participation, the Fund typically has a contractual relationship with the Lender selling the Participation, but not with the Borrower. If the Lender selling the Participation becomes insolvent, the Fund may be treated as a general creditor of such Lender, and may not have any exclusive or senior claim with respect to such Lender's interest in, or the collateral with respect to, the Senior Loan. As a result, the Fund assumes the credit risk of the Lender selling the Participation in addition to the credit risk of the Borrower. The Fund may pay a fee or forgo a portion of interest payments when acquiring Participations or purchase assignments or novations (Assignments). A Lender selling a Participation and other persons interpositioned between the Lender and the Fund with respect to a Participation will likely conduct their principal business activities in the banking, finance and financial services industries. Because the Fund may invest in Participations, the Fund may be more susceptible than a fund without such a policy to any single economic, political or regulatory occurrence affecting such industries. The Fund intends to take measures which it believes will

reduce its exposure to such risks but no assurances can be given as to their effectiveness. See The Fund's Investments.

Interest Rate Risk. When interest rates decline, the value of a portfolio invested in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a portfolio invested in fixed-rate obligations can be expected to decline. Currently, market interest rates are at or near historically low levels. Although the Fund's net asset value will vary, NFALLC expects the Fund's policy of acquiring primarily interests in floating rate Senior Loans to minimize fluctuations in net asset value resulting from changes in market interest rates. However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in the Fund's net asset value. The Fund's use of leverage, as described herein, will also tend to increase Common Share interest rate risk. See Risk Factors Investment and Market Risk and Risk Factors Interest Rate Risk.

Income Risk. The Fund invests primarily in Senior Loans whose interest rates reset frequently. If market interest rates fall, these interest rates will be reset at lower levels, reducing the Fund's income and in turn, dividends paid to holders of Common Shares.

Portfolio Liquidity. No active trading market currently exists for many of the Senior Loans in which the Fund will invest. Senior Loans are thus relatively illiquid. Liquidity relates to the ability of the Fund to sell an investment in a timely manner at a price approximately equal to its value on the Fund's books. The illiquidity of Senior Loans may impair the Fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets, and the Fund may suffer capital losses as a result. The market for relatively illiquid securities could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. Although the Fund believes that investing in adjustable rate Senior Loans should limit fluctuations in the Fund's net asset value from changes in interest rates, extraordinary and sudden changes in market interest rates could disrupt the market for Senior Loans and result in fluctuations in the Fund's net asset value. See The Fund's Investments and Net Asset Value.

A substantial portion of the Fund's assets may be invested in relatively illiquid Senior Loan interests. However, many of the Senior Loans in which the Fund expects to invest are of a relatively large principal amount and are held by a relatively large number of financial institutions which should, in NFALLC's opinion, enhance the relative liquidity of such interests. The risks associated with illiquidity are particularly acute in situations where the Fund's operations require cash, such as when, based on a Board determination, the Fund makes open market repurchases or tender

offers for its Common Shares, or if NFALLC considers it advantageous to increase the percentage of the Fund's portfolio invested in high quality, short-term securities. See The Fund's Investments.

Leverage Risk. The use of leverage creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. The risk of loss attributable to the Fund's use of leverage is borne by Common Shareholders. The Fund's use of leverage can result in a greater decrease in net asset values in declining markets. The Fund's use of leverage similarly can magnify the impact of changing market conditions on Common Share market prices. See Risk Factors Leverage Risk.

Because the long-term debt securities in which the Fund invests generally pay fixed rates of interest while the Fund's costs of leverage generally fluctuate with short- to intermediate term yields, the incremental earnings from leverage will vary over time. However, the Fund may use derivatives, such as interest rate swaps, to manage the Fund's effective cost of leverage exposure in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. The income benefit from leverage will increase to the extent that the difference widens between the net earnings on the Fund's portfolio securities and its cost of leverage. If short- or intermediate-term rates rise, the Fund's cost of leverage could exceed the fixed rate of return on longer-term bonds held by the Fund that were acquired during periods of lower interest rates, reducing income and returns to Common Shareholders. This could occur even if short-term or intermediate-term and long-term interest rates rise. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing, or dividends paid on preferred shares, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund is subject to requirements imposed by its use of leverage through Borrowings, including the Credit Agreement, and its Preferred Shares, including TP Shares. These requirements may include asset coverage and/or restrictions relating to portfolio characteristics such as portfolio diversification and credit rating criteria. In addition, the TP Shares are required to use commercially reasonable efforts to maintain a rating by at least one NRSRO and are subject to asset coverage requirements of 225%. While these

restrictions may be different than those under the 1940 Act, it is not anticipated that these restrictions will impede the management of the Fund's portfolio in accordance with the Fund's investment objectives and policies. However, in order to maintain such requirements, the Fund may be required to take certain actions, such as redeeming Preferred Shares or reducing Borrowings with the proceeds from portfolio transactions at what might be an inopportune time in the market. Such actions could reduce the net earnings or returns to Common Shareholders over time.

Furthermore, the amount of fees paid to NFALLC and Symphony for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for NFALLC and Symphony to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above.

See Risk Factors Leverage Risk and Use of Leverage.

Regulatory Risk. To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of Senior Loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of Senior Loans.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of Issuers and may make Issuer default more likely, which may result in a decline in the value of the Fund's portfolio. See Risk Factors Definition Risk.

Derivatives Risk, Including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if NFALLC and Symphony correctly forecast market values, interest rates and other applicable factors. If NFALLC and Symphony incorrectly forecast

these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by NFALLC and Symphony not only of the referenced asset, rate or index, but also of the swap itself. The derivatives market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments. See Risk Factors Derivatives Risk, Including the Risk of Swaps, Risk Factors Counterparty Risk, Hedging Transactions and the SAI.

Counterparty Risk. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives or other transactions supported by another party's credit will affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant financial hardships including bankruptcy and losses as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using such derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. See Risk Factors Counterparty Risk.

Reliance on Investment Adviser. The Fund is dependent upon services and resources provided by its investment adviser, NFALLC, and therefore the investment adviser's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2014 or to fund its other liquidity needs. Nuveen Investments' failure to satisfy the terms of its indebtedness, including covenants therein, may generally have an adverse effect on the financial condition of Nuveen Investments.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-laws (the By-laws) include provisions that could limit the ability of other entities or persons to

acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and Risk Factors Anti-Takeover Provisions.

Potential Conflicts of Interest Risk. NFALLC and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, NFALLC and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients. NFALLC and Symphony have each adopted policies and procedures designed to address such situations and other potential conflicts of interests. For additional information about potential conflicts of interest, and the way in which NFALLC and Symphony address such conflicts, please see the SAI.

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the Risk Factors section of this Prospectus.

Distributions

The Fund pays monthly distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on TP Shares, if issued in the future. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. For each year, the Fund will distribute all or substantially all of its net investment income (after it pays accrued dividends on outstanding TP Shares, if any). In addition, the Fund intends to distribute, at least annually, the net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares then outstanding, including TP Shares, or pay any interest and required principal payments on borrowings. You may elect to reinvest automatically some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan.

If the Fund does not distribute all of its net capital gain for a taxable year, it will pay federal income tax on the retained gain. Each Common

Shareholder of record as of the end of the Fund's taxable year will include in income for federal income tax purposes, as long-term capital gain, his or her share of the retained gain, will be deemed to have paid his or her proportionate share of the tax paid by the Fund on such retained gain, and will be entitled to an income tax credit or refund for that share of the tax. The Fund will treat the retained capital gain amount as a substitute for equivalent cash distributions. See [Distributions](#) and [Dividend Reinvestment Plan](#).

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time, subject to a finding by the Fund's Board of Trustees that such change is in the best interests of the Fund and its Common Shareholders.

Custodian and Transfer Agent

State Street Bank and Trust Company serves as custodian and transfer agent of the Fund's assets. See [Custodian and Transfer Agent](#).

Special Tax Considerations

Dividends with respect to the Common Shares generally will not constitute qualified dividend income for federal income tax purposes and thus generally will not be eligible for taxation at long-term capital gain tax rates (except in the case of capital gain dividends). See [Tax Matters](#).

Voting Rights

The holders of the Fund's TP Shares, voting as a separate class, would have the right to elect at least two Trustees at all times and to elect a majority of the Trustees in the event two full years' dividends on the preferred shares, including TP Shares, are unpaid. In each case, the remaining Trustees will be elected by holders of shares of Common Shares and preferred shares, including TP Shares, voting together as a single class. The holders of preferred shares, including TP Shares, will vote as a separate class or classes on certain other matters as required under the Declaration, the 1940 Act and Massachusetts law. See [Description of Shares](#) [TP Shares](#) [Voting Rights](#) and [Certain Provisions in the Declaration of Trust](#).

SUMMARY OF FUND EXPENSES

The purpose of the table below and the Examples below are to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The table shows the expenses of the Fund as a percentage of the average net assets applicable to Common Shares, and not as a percentage of total assets or Managed Assets.

Shareholder Transaction Expenses (as a percentage of offering price)

Maximum Sales Charge	4.00%*
Dividend Reinvestment Plan Fees(1)	None

- * A maximum sales charge of 4.00% applies only to offerings pursuant to a syndicated underwriting. The maximum sales charge for offerings made at-the-market is 1.00%. There is no sales charge for offerings pursuant to a private transaction.

	As a Percentage of Net Assets Attributable to Common Shares(2)
Annual Expenses	
Management Fees	1.30%
Interest Expense on Borrowings and Fees on TP Shares(3)	1.25%
Other Expenses(4)	0.14%
Total Annual Expenses	2.69%

- (1) You will be charged a \$2.50 service charge and pay brokerage charges if you direct State Street Bank and Trust Company, as agent for the Common Shareholders (the Plan Agent), to sell your Common Shares held in a dividend reinvestment account.
- (2) Stated as a percentage of average net assets attributable to Common Shares for the fiscal year ended July 31, 2016.
- (3) Interest Expense on Borrowings and Fees on TP Shares has been restated using current fees as if they had been in effect during the previous fiscal year. Interest Expense on Borrowings are calculated at a rate per annum equal to 1-Month LIBOR plus 0.80%. Fees on TP Shares assume annual dividends paid and amortization of offering costs. The actual Interest Expense on Borrowings and Fees on TP Shares incurred in the future may be higher or lower. The Fund's use of leverage will increase the amount of management fees paid to NFALLC and Symphony.
- (4) Other Expenses is based on estimated amounts for the current fiscal year. Expenses attributable to the Fund's investments, if any, in other investment companies are currently estimated not to exceed 0.01%. See Portfolio Composition Other Investment Companies in the SAI.

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. See Management of the Fund Investment Adviser and Subadviser.

Examples

The following examples illustrate the expenses (including the applicable transaction fees, (referred to as the Maximum Sales Charge in the fee table above) if any, that a shareholder would pay on a \$1,000 investment

that is held for the time periods provided in the table. Each example assumes that all dividends and other distributions are reinvested in the Fund and that the Fund's Total Annual Expenses, as provided above, remain the same. The examples also assume a 5% annual return.(1)

Example # 1 (At-the-Market Transaction)

The following example assumes a transaction fee of 1.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$37	\$ 93	\$ 151	\$ 309

Example # 2 (Underwriting Syndicate Transaction)

The following example assumes a transaction fee of 4.00%, as a percentage of the offering price.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$66	\$ 120	\$ 177	\$ 330

Example # 3 (Privately Negotiated Transaction)

The following example assumes there is no transaction fee.

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$27	\$ 84	\$ 142	\$ 302

The examples should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown above.

(1) The examples assume that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

[THIS PAGE INTENTIONALLY LEFT BLANK]

FINANCIAL HIGHLIGHTS

The following Financial Highlights table is intended to help a prospective investor understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single Common share of the Fund. The total returns in the table represent the rate an investor would have earned or lost on an investment in Common shares of the Fund (assuming reinvestment of all dividends). The Fund's annual financial statements as of and for the fiscal years ended July 31, 2016 and 2015, including the financial highlights for the fiscal years then ended, have been audited by KPMG LLP, an independent registered public accounting firm. KPMG has not reviewed or examined any records, transactions or events after the date of such reports. The information with respect to the fiscal years ended prior to July 31, 2015 has been audited by other auditors. A copy of the Annual Report may be obtained from www.sec.gov or by visiting www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. Past results are not indicative of future performance.

The following per share data and ratios have been derived from information provided in the financial statements.
