BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1: Basis of Presentation

The Bank of South Carolina (the “Bank”) was organized on October 22, 1986 and opened for business as a state-chartered financial institution on February 26, 1987, in Charleston, South Carolina. The Bank was reorganized into a wholly-owned subsidiary of Bank of South Carolina Corporation (the “Company”), effective April 17, 1995. At the time of the reorganization, each outstanding share of the Bank was exchanged for two shares of Bank of South Carolina Corporation Stock.

The Bank operates as an independent, community oriented, commercial bank providing a broad range of financial services and products. We have four banking house locations: 256 Meeting Street, Charleston, SC, 100 North Main Street, Summerville, SC, 1337 Chuck Dawley Boulevard, Mt. Pleasant, SC and 2027 Sam Rittenberg Boulevard, Charleston, SC. We intend to open a banking office in North Charleston, SC on Highway 78 and Ingleside Boulevard in 2015.

References to “we,” “us,” “our,” “the Bank,” or “the Company” refer to the parent and its subsidiary, that are consolidated for financial purposes.

The consolidated financial statements in this report are unaudited, except for the December 31, 2013 consolidated balance sheet. All adjustments consisting of normal recurring accruals which are, in the opinion of management, necessary for fair presentation of the interim consolidated financial statements have been included and fairly and accurately present the financial position, results of operations and cash flows of the Company. The results of operations for the three months ended March 31, 2014, are not necessarily indicative of the results which may be expected for the entire year.

The preparation of the consolidated financial statements are in conformity with accounting principles generally accepted in the United States of America (GAAP) which requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ significantly from these estimates and assumptions. Material estimates generally susceptible to significant change are related to the determination of the allowance for loan losses, impaired loans, other real estate owned, asset prepayment rates and other-than-temporary impairment of investment securities.

In preparing these financial statements, we evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued.

NOTE 2: Investment Securities

We classify investments into three categories as follows: (1) Held to Maturity - debt securities that we have the positive intent and ability to hold to maturity, which are reported at amortized cost, adjusted for the amortization of any related premiums or the accretion of any related discounts into interest income using a methodology which approximates a level yield of interest over the estimated remaining period until maturity; (2) Trading - debt and equity securities that are bought and held principally for the purpose of selling them in the near term, which are reported at fair value, with unrealized gains and losses included in earnings; and (3) Available for Sale - debt and equity securities that may be sold under certain conditions, which are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Realized gains or losses on the sale of investments are recognized on a specific identification, trade date basis. All securities were classified as available for sale for the three months ended March 31, 2014 and 2013. We do not have any mortgage-backed securities nor have we ever invested in mortgage-backed securities. (See "non-interest income" for discussion on the sale of investment securities.)

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3: Mortgage Loans to be Sold

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated market value in the aggregate. Net unrealized losses are provided for in a valuation allowance by charges to operations as a component of mortgage banking income. At March 31, 2014 and December 31, 2013, we had approximately \$6.8 million and \$4.7 million in mortgage loans held for sale, respectively. Gains or losses on sales of loans are recognized when control over these assets has been surrendered and are included in mortgage banking income in the consolidated statements of income.

We originate fixed and variable rate residential mortgage loans on a service release basis in the secondary market. Loans closed but not yet settled with an investor are carried in our loans held for sale portfolio. These loans are fixed and variable rate residential mortgage loans that have been originated in our name and have closed. Virtually all of these loans have commitments to be purchased by investors and the majority of these loans were locked in by price with the investors on the same day or shortly thereafter that the loan was locked in with our customers. Therefore, these loans present very little market risk. We usually deliver to, and receive funding from, the investor within 30 to 60 days. Commitments to sell these loans to the investor are considered derivative contracts and are sold to investors on a “best efforts” basis. We are not obligated to deliver a loan or pay a penalty if a loan is not delivered to the investor. As a result of the short-term nature of these derivative contracts, the fair value of the mortgage loans held for sale in most cases is the same as the value of the loan amount at its origination.

NOTE 4: Loans and Allowance for Loan Losses

Loans are carried at principal amounts outstanding. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment to yield. Interest income on all loans is recorded on an accrual basis. The accrual of interest and the amortization of net loan fees are generally discontinued on loans which 1) are maintained on a cash basis because of deterioration in the financial condition of the borrower; 2) for which payment of full principal is not expected; or 3) upon which principal or interest has been in default for a period of 90 days or more. The accrual of interest, however, may continue on these loans if they are well secured, in the process of collection, and management deems it appropriate. Non-accrual loans are reviewed individually by management to determine if they should be returned to accrual status. We define past due loans based on contractual payment and maturity dates.

We account for nonrefundable fees and costs associated with originating or acquiring loans by requiring that loan origination fees be recognized over the life of the related loan as an adjustment on the loan's yield. Certain direct loan origination costs shall be recognized over the life of the related loan as a reduction of the loan's yield.

We account for impaired loans by requiring that all loans for which it is estimated that we will be unable to collect all amounts due according to the terms of the loan agreement be recorded at the loan's fair value. Fair value may be determined based upon the present value of expected future cash flows discounted at the loan's effective interest rate, or the fair value of the collateral if the loan is collateral dependent.

Additional accounting guidance allows us to use existing methods for recognizing interest income on an impaired loan. The guidance also requires additional disclosures about how we estimate interest income related to our impaired loans.

The accrual of interest is generally discontinued on loans, that become 90 days past due as to principal or interest. The accrual of interest on some loans, however, may continue even though they are 90 days past due if the loans are well secured or in the process of collection and management deems it appropriate. If non-accrual loans decrease their past due status to less than 30 days for a period of 6 to 9 months, they are reviewed individually by management to determine if they should be returned to accrual status.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

When the ultimate collectability of an impaired loan's principal is in doubt, wholly or partially, all cash receipts are applied to principal. Once the recorded principal balance has been reduced to zero, future cash receipts are applied to interest income, to the extent that any interest has been foregone. Further cash receipts are recorded as recoveries of any amounts previously charged off. When this doubt does not exist, cash receipts are applied under the contractual terms of the loan agreement first to interest income and then to principal.

A loan is also considered impaired if its terms are modified in a troubled debt restructuring ("TDR"). For this type of impaired loan, cash receipts are typically applied to principal and interest receivable in accordance with the terms of the restructured loan agreement. Interest income is recognized on these loans using the accrual method of accounting, provided they are performing in accordance with their restructured terms.

Management believes that the allowance is adequate to absorb inherent losses in the loan portfolio; however, assessing the adequacy of the allowance is a process that requires considerable judgment. Management's judgments are based on numerous assumptions about current events which management believes to be reasonable, but which may or may not be valid. Thus there can be no assurance that loan losses in future periods will not exceed the current allowance amount or that future increases in the allowance will not be required. No assurance can be given that management's ongoing evaluation of the loan portfolio, in light of changing economic conditions and other relevant circumstances, will not require significant future additions to the allowance, thus adversely affecting our operating results.

The allowance is also subject to examination by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the allowance relative to that of peer institutions and other adequacy tests. In addition, such regulatory agencies could require us to adjust our allowance based on information available to us at the time of our examination.

The methodology used to determine the reserve for unfunded lending commitments, which is included in other liabilities, is inherently similar to that used to determine the allowance for loan losses adjusted for factors specific to binding commitments, including the probability of funding and historical loss ratio.

The following is a summary of the non-accrual loans as of March 31, 2014 and December 31, 2013.

The following table sets forth the changes in the allowance and an allocation of the allowance by loan category at March 31, 2014 and December 31, 2013. The allocation of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-impaired loans and is based on historical loss experience adjusted for current economic factors described above.

There were no additional loans identified as a TDR during the three months ended March 31, 2014.

NOTE 5: Premises, Equipment and Leasehold Improvements and Depreciation

Buildings and equipment are carried at cost less accumulated depreciation, calculated on the straight-line method over the estimated useful life of the related assets - 40 years for buildings and 3 to 15 years for equipment. Amortization of leasehold improvements is recorded using the straight-line method over the lesser of the estimated useful life of the asset or the term of the lease. Maintenance and repairs are charged to operating expenses as incurred.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 6: Income Taxes

We account for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Net deferred tax assets are included in other assets in the consolidated balance sheet.

Accounting standards require the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. These standards also prescribe a recognition threshold and measurement of a tax position taken or expected to be taken in an enterprise's tax return. We believe that we had no uncertain tax positions as of March 31, 2014 or March 31, 2013.

NOTE 7: Stock Based Compensation

The shareholders of the Company voted at the Company's Annual Meeting, April 13, 2010 to approve the 2010 Omnibus Stock Incentive Plan, including 330,000 shares (adjusted for a 10% stock dividend declared on August 26, 2010) reserved under the plan (copy of the plan was filed with 2010 Proxy Statement). This plan is intended to assist the Company in recruiting and retaining employees with ability and initiative by enabling employees to participate in its future success and to associate their interest with those of the Company and its shareholders. Under the Omnibus Stock Incentive Plan, options are periodically granted to employees at a price not less than 100% of the fair market value of the shares at the date of the grant. All employees are eligible to participate in this plan if the Executive Committee, in its sole discretion, determines that such person has contributed or can be expected to contribute to the profits or growth of the Company or its subsidiary. Options may be exercised in whole at any time or in part from time to time at such times and in compliance with such requirements as the Executive Committee shall determine. The maximum period in which an option may be exercised is determined at the date of grant and shall not exceed 10 years from the date of grant.

The options are not transferable except by will or by the laws of descent and distribution. There were no options granted during the three months ended March 31, 2014 or three months ended March 31, 2013.

On April 14, 1998 the Company adopted the 1998 Omnibus Stock Incentive Plan which expired on April 14, 2008. Options can no longer be granted under the 1998 Plan. Options granted before April 14, 2008, shall remain valid in accordance with their terms. There are currently options to purchase 24,915 shares outstanding under this plan with options to purchase 10,989 shares exercisable.

Under both plans employees become 20% vested after five years and vest 20% each year until fully vested. The right to exercise each such 20% of the options is cumulative and will not expire until the tenth anniversary of the date of the grant.

The following is a summary of the activity under the 1998 and 2010 Omnibus Stock Incentive Plan for the three months ended March 31, 2014 and for the three months ended March 31, 2013.

Three Months Ended March 31, 2014	Options	Weighted Average Exercise Price
Balance at January 1, 2014	159,165	\$ 11.34
Forfeited	—	—
Exercised	(2,500)	10.42
Balance at March 31, 2014	156,665	11.35

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Three months Ended March 31, 2013	Options	Weighted Average Exercise Price
Balance at January 1, 2013	174,467	\$11.20
Forfeited	(3,600)	12.10
Exercised	(2,662)	8.54
Balance at March 31, 2013	168,205	11.22
Options exercisable at March 31, 2014	10,989	\$14.91

NOTE 8: Shareholders' Equity

Basic earnings per share are computed by dividing net income by the weighted-average number of common shares outstanding. Diluted earnings per share are computed by dividing net income by the weighted-average number of common shares and potential common shares outstanding. Potential common shares consist of dilutive stock options determined using the treasury stock method and the average market price of common stock.

A regular quarterly cash dividend of \$.13 per share was declared on March 27, 2014 for shareholders of record at April 8, 2014, payable April 30, 2014. Income per common share for the three months ended March 31, 2014 and for the three months ended March 31, 2013 was calculated as follows:

	FOR THE THREE MONTHS ENDED MARCH 31, 2014		
	INCOME (NUMERATOR)	SHARES (DENOMINATOR)	PER SHARE AMOUNT
Net income	\$955,798		
Basic income available to common shareholders	\$955,798	4,461,332	\$.21
Effect of dilutive options		11,261	
Diluted income available to common shareholders	\$955,798	4,472,593	\$.21

FOR THE THREE MONTHS ENDED
MARCH 31, 2013

	INCOME (NUMERATOR)	SHARES (DENOMINATOR)	PER SHARE AMOUNT
Net income	\$998,805		
Basic income available to common shareholders	\$998,805	4,446,905	\$.22
Effect of dilutive options		—	
Diluted income available to common shareholders	\$998,805	4,446,905	\$.22

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The future payment of cash dividends is subject to the discretion of the Board of Directors and depends upon a number of factors, including future earnings, financial condition, cash requirements, and general business conditions. Cash dividends when declared, are paid by the Bank to the Company for distribution to shareholders of the Company. The Bank's ability to pay dividends to the Company is restricted by the laws and regulations of the State of South Carolina. Generally, these restrictions allow the Bank to pay dividends from current earnings without the prior written consent of the South Carolina Commissioner of Banking, if it received a satisfactory rating at its most recent examination.

NOTE 9: Comprehensive Income

We apply accounting standards which establish guidance for the reporting and display of comprehensive income and its components in a full set of general purpose financial statements. Comprehensive income consists of net income and net unrealized gains or losses on securities.

Comprehensive income totaled \$1,074,923 at March 31, 2014 and \$835,912 at March 31, 2013.

NOTE 10: Fair Value Measurements

Fair value measurements apply whenever GAAP requires or permits assets or liabilities to be measured at fair value either on a recurring or nonrecurring basis. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction between market participants at the measurement date. Fair value is based on the assumptions that management believes market participants would use when pricing an asset or liability. Fair value measurement and disclosure guidance establishes a three-level fair value hierarchy that prioritizes the use of inputs used in valuation methodologies.

The three levels of input that may be used to measure fair value are the following:

**Level
1**

Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as US Treasuries and money market funds.

**Level
2**

Valuation is based upon quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, mortgage-backed securities, municipal bonds, corporate debt securities and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain derivative contracts and impaired loans.

**Level
3**

Valuation is generated from model-based techniques that use at least one significant assumption based on unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity. In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The guidance requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available-for-sale investment securities) or on a nonrecurring basis (for example, impaired loans). Fair value estimates, methods, and assumptions are set forth below.

Investment Securities Available for Sale

Securities available for sale are recorded at fair value on a recurring basis and are based upon quoted prices if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange such as the New York Stock Exchange, or by dealers or brokers in active over-the-counter markets. Level 2 securities include mortgage backed securities issued by government sponsored entities, municipal bonds and corporate debt securities. Securities classified as Level 3 include asset-backed securities in less liquid markets.

Assets and liabilities measured at fair value on a recurring basis at March 31, 2014 and December 31, 2013 are as follows:

Balance
at
March 31, 2014

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total

Other Real Estate Owned (OREO)

Loans, secured by real estate, are adjusted to fair value upon transfer to other real estate owned (OREO). Subsequently, OREO is carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraisal, we record the asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, we record the asset as nonrecurring Level 3. We did not have any Other Real Estate Owned at March 31, 2014 or December 31, 2013.

Impaired Loans

We do not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans are reviewed for impairment on a quarterly basis if any of the following criteria are met:

- 1) Any loan on non-accrual
- 2) Any loan that is a troubled debt restructuring
- 3) Any loan over 60 days past due
- 4) Any loan rated sub-standard, doubtful, or loss
- 5) Excessive principal extensions are executed
- 6) If we are provided information that indicates that we will not collect all principal and interest as scheduled

Once a loan is identified as individually impaired, management measures the impairment in accordance with Accounting Standards Codification (ASC) 310-10, "Accounting by Creditors for Impairment of a Loan".

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

In accordance with this standard, the fair value is estimated using one of the following methods: fair value of the collateral less estimated costs to sell, discounted cash flows, or market value of the loan based on similar debt. The fair value of the collateral less estimated costs to sell is the most frequently used method. Typically, we review the most recent appraisal and if it is over 12 to 18 months old we may request a new third party appraisal. Depending on the particular circumstances surrounding the loan, including the location of the collateral, the date of the most recent appraisal and the value of the collateral relative to the recorded investment in the loan, management may order an independent appraisal immediately or, in some instances, may elect to perform an internal analysis. Specifically as an example, in situations where the collateral on a nonperforming commercial real estate loan is out of our primary market area, management would typically order an independent appraisal immediately, at the earlier of the date the loan becomes nonperforming or immediately following the determination that the loan is impaired. However, as a second example, on a nonperforming commercial real estate loan where management is familiar with the property and surrounding areas and where the original appraisal value far exceeds the recorded investment in the loan, management may perform an internal analysis whereby the previous appraisal value would be reviewed considering recent current conditions, and known recent sales or listings of similar properties in the area, and any other relevant economic trends. This analysis may result in the call for a new appraisal. These valuations are reviewed and updated on a quarterly basis.

Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2014 and December 31, 2013, substantially all of the total impaired loans were evaluated based on the fair value of the collateral. In accordance with ASC 820, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. We record the impaired loan as nonrecurring Level 3.

Mortgage Loans Held for Sale

We originate fixed and variable rate residential mortgage loans on a service release basis in the secondary market. Loans closed but not yet settled with an investor are carried in our loans held for sale portfolio. These loans are fixed and variable rate residential mortgage loans that have been originated in our name and have closed. Virtually all of these loans have commitments to be purchased by investors and the majority of these loans were locked in by price with the investors on the same day or shortly thereafter that the loan was locked in with our customers. Therefore, these loans present very little market risk. We usually deliver to, and receive funding from, the investor within 30 to 60 days. Commitments to sell these loans to the investor are considered derivative contracts and are sold to investors on a "best efforts" basis. We are not obligated to deliver a loan or pay a penalty if a loan is not delivered to the investor. As a result of the short-term nature of these derivative contracts, the fair value of the mortgage loans held for sale in most cases is the same as the value of the loan amount at its origination. These loans are classified as Level 2.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets and liabilities carried on the balance sheet by caption and by level within the valuation hierarchy (as described above) as of March 31, 2014 and December 31, 2013, for which a nonrecurring change in fair value has been recorded during the three months ended March 31, 2014 and twelve months ended December 31, 2013.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Accounting standards require disclosure of fair value information about financial instruments whether or not recognized on the balance sheet, for which it is practicable to estimate fair value. Fair value estimates are made as of a specific point in time based on the characteristics of the financial instruments and the relevant market information. When available, quoted market prices are used. In other cases, fair values are based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, prepayments, and estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, may or may not be realized in an immediate sale of the instrument.

Under the accounting standard, fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of the assets and liabilities that are not financial instruments. Accordingly, the aggregate fair value amounts of existing financing instruments do not represent the underlying value of those instruments on our books.

The following describes the methods and assumptions we use in estimating the fair values of financial instruments:

a. Cash and due from banks, interest bearing deposits in other banks and federal funds sold

The carrying value approximates fair value. All mature within 90 days and do not present unanticipated credit concerns.

b. Investment securities available for sale

The fair value of investment securities is derived from quoted market prices.

c. Loans

The carrying values of variable rate consumer and commercial loans and consumer and commercial loans with remaining maturities of three months or less, approximate fair value. The fair values of fixed rate consumer and commercial loans with maturities greater than three months are determined using a discounted cash flow analysis and

assume the rate being offered on these types of loans at March 31, 2014 and December 31, 2013, approximate market.

The carrying value of mortgage loans held for sale approximates fair value.

For lines of credit, the carrying value approximates fair value.

d. Deposits

The estimated fair value of deposits with no stated maturity is equal to the carrying amount. The fair value of time deposits is estimated by discounting contractual cash flows, by applying interest rates currently being offered on the deposit products. The fair value estimates for deposits do not include the benefit that results from the low cost funding provided by the deposit liabilities as compared to the cost of alternative forms of funding (deposit base intangibles).

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The following presents the carrying amount, fair value, and placement in the fair value hierarchy of our financial instruments as of March 31, 2014 and December 31, 2013. This table excludes financial instruments for which the carrying amount approximates fair value. For short-term financial assets such as cash and cash equivalents, the carrying amount is a reasonable estimate of fair value due to the relatively short time between the origination of the instrument and its expected realization.

NOTE 11: Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting and/or disclosure of financial information by the Company.

On February 28, 2013, the FASB amended the liabilities topic to address obligations resulting from joint and several liability arrangements. The guidance addresses recognition of financial commitments arising from joint and several liability arrangements. Specifically, the amendments require recognition of financial commitments arising from loans, contracts, and legal rulings if the Company can be held liable for the entire claim. The amendments became effective for the Company for reporting periods beginning after December 15, 2013 and did not have a material effect on its financial statements.

In July 2013, the FASB issued guidance to eliminate the diversity in practice regarding presentation of unrecognized tax benefits in the statement of financial position. Under the clarified guidance, an unrecognized tax benefit, or a portion of an unrecognized tax benefit, will be presented in the financial statements as a reduction to a deferred tax asset unless certain criteria are met. The requirements should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. The amendments became effective for the Company for reporting periods beginning after December 15, 2013 and did not have a material effect on the

Company's financial statements.

In January 2014, the FASB amended the Receivables—Troubled Debt Restructurings by Creditors subtopic of the Codification to address the reclassification of consumer mortgage loans collateralized by residential real estate upon foreclosure. The amendments clarify the criteria for concluding that an in substance repossession or foreclosure has occurred, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. The amendments also outline interim and annual disclosure requirements. The amendments will be effective for the Company for interim and annual reporting periods beginning after December 15, 2014. Companies are allowed to use either a modified retrospective transition method or a prospective transition method when adopting this update. Early adoption is permitted. The Company does not expect these amendments to have a material effect on its financial statements.

BANK OF SOUTH CAROLINA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

NOTE 12: Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were issued and noted no subsequent event requiring accrual or disclosure.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS

OR PLAN OF OPERATION

Management's discussion and analysis is included to assist shareholders in understanding our financial condition, results of operations, and cash flow. This discussion should be reviewed in conjunction with the consolidated financial statements (unaudited) and notes presented in this report and the supplemental financial data appearing throughout this report. Since the primary asset of the Company is its wholly-owned subsidiary, most of the discussion and analysis relates to the Bank.

Management's Discussion and Analysis of Financial Condition and Results of Operations and other portions of this quarterly report contain certain "forward-looking statements" concerning the future operations. We desire to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1996 and are including this statement for the express purpose of availing the Company of protections of such safe harbor with respect to all "forward-looking statements" contained in this Form 10-Q. Forward looking statements may relate to, among other matters, the financial condition, results of operations, plans, objectives, future performance, and business of the Company. Forward-looking statements are based on many assumptions and estimates and are not guarantees of future performance. Actual results may differ materially from those anticipated in any forward-looking statements. The

words “may”, “would”, “could”, “should”, “will”, “expect”, “anticipate”, “predict”, “project”, “potential”, “continue”, “assume”, “plan”, “forecast”, “goal”, and “estimate”, as well as similar expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ materially from those anticipated in our forward-looking statements include, without limitations, those described under the heading “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2013 as filed with the Securities and Exchange Commission (the SEC) and the following:

- Risk from changes in economic, monetary policy, and industry conditions
- Changes in interest rates, shape of the yield curve, deposit rates, the net interest margin and funding sources
- Market risk (including net income at risk analysis and economic value of equity risk analysis) and inflation
- Risk inherent in making loans including repayment risks and changes in the value of collateral
- Loan growth, the adequacy of the allowance for loan losses, provisions for loan losses, and the assessment of problem loans
- Level, composition, and re-pricing characteristics of the securities portfolio
- Deposit growth, change in the mix or type of deposit products and services
- Continued availability of senior management
- Technological changes
- Ability to control expenses
- Changes in compensation
- Risks associated with income taxes including potential for adverse adjustments
- Changes in accounting policies and practices
- Changes in regulatory actions, including the potential for adverse adjustments
- Recently enacted or proposed legislation
- Current uncertainty in the financial service industry

These risks are exacerbated by the development over the last five years in national and international financial markets, and we are unable to predict what effect continued uncertainty in market conditions will have on us. There can be no assurance that the unprecedented developments experienced over the last five years will not materially and adversely affect our business, financial condition and results of operations.

All forward-looking statements in this report are based on information available to us as of the date of this report. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that these expectations will be achieved. We will undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events. In addition, certain statements in our future filings with the SEC, in our press releases, and in our oral and written statements, which are not statements of historical fact, constitute forward looking statements.

Overview

Bank of South Carolina Corporation (the Company) is a financial institution holding company headquartered in Charleston, South Carolina, with \$336.6 million in assets as of March 31, 2014 and net income of \$955,798 for the three months ended March 31, 2014. The Company offers a broad range of financial services through its wholly-owned subsidiary, The Bank of South Carolina (the Bank). The Bank is a state-chartered commercial bank which operates primarily in the Charleston, Dorchester and Berkeley counties of South Carolina. The Bank's original and current concept is to be a full service financial institution specializing in personal service, responsiveness, and attention to detail to foster long standing relationships.

The following is a discussion of our financial condition as of March 31, 2014 as compared to December 31, 2013 and the results of operations for the three months ended March 31, 2014 as compared to the three months ended March 31, 2013. The discussion and analysis identifies significant factors that have affected our financial position and operating results and should be read in conjunction with the financial statements and the related notes included in this report.

We derive most of our income from interest on loans and investments (interest bearing assets). The primary source of funding for making these loans and investments is our interest and non-interest bearing deposits. Consequently, one of the key measures of our success is the amount of net interest income, or the difference between the income on our interest earning assets, such as loans and investments, and the expense on our interest bearing liabilities, such as deposits. Another key measure is the spread between the yield we earn on these interest bearing assets and the rate we pay on our interest bearing liabilities.

A consequence of lending activities is that we may incur credit losses. The amount of such losses will vary depending upon the risk characteristics of the loan and lease portfolio as affected by economic conditions such as rising interest rates and the financial performance of borrowers. The reserve for credit losses consists of the allowance for loan and lease losses (the "Allowance") and a reserve for unfunded commitments (the "Unfunded Reserve"). The Allowance provides for probable and estimable losses inherent in our loan and lease portfolio. The Allowance is increased or decreased through the provisioning process. For a detailed discussion on the allowance for loan losses see "Allowance for Loan Losses".

In addition to earning interest on loans and investments, we earn income through fees and other expenses we charge to the customer. The various components of non-interest income as well as non-interest expense are described in the following discussion.

CRITICAL ACCOUNTING POLICIES

We have adopted various accounting policies that govern the application of principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our unaudited consolidated financial statements as of March 31, 2014 and our notes included in the consolidated financial statements in our 2013 Annual Report on Form 10-K as filed with the SEC.

Certain accounting policies involve significant judgments and assumptions by the Company that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the number of the judgments and assumptions that we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

We consider our policies regarding the allowance for loan losses to be our most subjective accounting policy due to the significant degree of management judgment. We have developed what we believe to be appropriate policies and procedures for assessing the adequacy of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to our loan portfolio. Our assessments may be impacted in future periods by changes in economic conditions, the impact of regulatory examinations and the discovery of information with respect to borrowers which were not known at the time of the issuance of the consolidated financial statements. For additional discussion concerning our allowance for loan losses and related matters, see "Allowance for Loan Losses."

BALANCE SHEET

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash and noninterest-bearing deposits, and interest-bearing deposits. All amounts are readily convertible to cash and have maturities of less than 90 days. Total cash and cash equivalents decreased 49.15% or \$10,874,738 to \$11,249,358 at March 31, 2014, from \$22,124,096 at December 31, 2013. This decrease was primarily due to a decrease in deposits in other banks and an increase in loans.

Regulations set by the Federal Reserve require that we maintain certain average cash reserve balances. For the three months ended March 31, 2014 and 2013 our cash reserve requirement with the Federal Reserve was satisfied by vault cash.

LOANS

We focus our lending activities on small and middle market businesses, professionals and individuals in our geographic markets. At March 31, 2014, outstanding loans (plus deferred loan fees of \$79,198) totaled \$227,240,465 which equaled 75.78% of total deposits and 67.51% of total assets. Substantially all loans were to borrowers located in our market area of Charleston, Dorchester and Berkeley counties of South Carolina.

The quality of our loan portfolio is contingent upon our risk selection and underwriting practices. Every credit with over \$100,000 in exposure is summarized by our Credit Department and reviewed by the Loan Committee on a monthly basis. The Board of Directors review credits over \$500,000 monthly with annual credit analyses conducted on these borrowers upon the receipt of updated financial information. Prior to any extension of credit, every loan request goes through sound credit underwriting. The Credit Department conducts detailed cash flow analysis on each proposal using the most current financial information. Relevant trends and ratios are evaluated.

The breakdown of total loans by type and the respective percentage of total loans are as follows:

	March 31, 2014	2013	December 31, 2013
Commercial loans	\$53,233,240	55,724,957	\$53,303,569

Consumer real estate	26.70 %	22.78 %	25.04 %		
Consumer other	1.91 %	1.87 %	1.87 %		
Total	100.00%	100.00%	100.00 %		

INVESTMENT SECURITIES AVAILABLE FOR SALE

We use the investment securities portfolio for several purposes. It serves as a vehicle to manage interest rate and prepayment risk, to generate interest and dividend income from investment of funds, to provide liquidity to meet funding requirements, and to provide collateral for pledges on public funds. Investments are classified into three categories (1) Held to Maturity (2) Trading and (3) Available for Sale. We believe that maintaining our securities in the Available for Sale category provides greater flexibility in the management of the overall investment portfolio. The average yield on investments at March 31, 2014 was 2.20% compared to 2.46% at December 31, 2013. The amortized

cost of the investments available for sale at March 31, 2014, March 31, 2013 and December 31, 2013 and percentage of each category to total investments are as follows:

30

INVESTMENT PORTFOLIO

	March 31, 2014	March 31, 2013	December 31, 2013			
US Treasury Notes	\$ 10,747,414	\$ 6,188,438	\$ 15,832,401			
Government-Sponsored Enterprises	45,639,243	18,250,090	43,635,038			
Municipal Securities	33,842,675	33,977,335	35,180,782			
	\$ 90,229,332	\$ 58,415,863	\$ 94,648,221			
US Treasury Notes	11.91	% 10.59	% 16.73	%		
Government-Sponsored Enterprises	50.58	% 31.24	% 46.10	%		
Municipal Securities	37.51	% 58.17	% 37.17	%		
	100.00	% 100.00	% 100.00	%		

All investment securities were classified as Available for Sale (debt and equity securities that may be sold under certain conditions), at March 31, 2014 and December 31, 2013. The securities were reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Gains or losses on the sale of securities are recognized on a specific identification, trade date basis. (See "non-interest income" for discussion on the sale of investment securities.)

The amortized cost and fair value of investment securities available for sale are summarized as follows as of March 31, 2014 and December 31, 2013:

	MARCH 31, 2014			
	AMORTIZED COST	GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	ESTIMATED FAIR VALUE

Due in ten years and over	10,864,864	11,083,530
Total	\$ 93,130,918	\$ 94,648,221

The fair value of investment securities available for sale with unrealized losses at March 31, 2014, and December 31, 2013, are as follows:

MARCH 31, 2014

Description of Securities	Less than 12 months		12 months or longer		Total	Unrealized Losses
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	
U.S. Treasury Notes	\$10,747,414	\$ 66,698	\$ —	\$ —	\$10,747,414	\$ 66,698
Government-Sponsored Enterprises	25,293,461	286,044	—	—	25,293,461	286,044
Municipal Securities	1,924,577	67,746	—	—	1,924,577	67,746
Total	\$37,965,452	\$ 420,488	\$ —	\$ —	\$37,965,452	\$ 420,488

DECEMBER 31, 2013

Description of Securities	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury Notes	\$9,713,619	\$ 67,929	\$—	\$ —	\$9,713,619	\$ 67,929
Government-Sponsored Enterprises	20,027,016	311,062	—	—	20,027,016	311,062
Municipal Securities	2,496,742	125,652	401,624	102	2,898,366	125,754
Total	\$32,237,377	\$ 504,643	\$401,624	\$ 102	\$32,639,001	\$ 504,745

At March 31, 2014, we had four US Treasury Notes with an unrealized loss of \$66,698, six Agency Notes with an unrealized loss of \$286,044 and three Municipal Securities with an unrealized loss of \$67,746. At December 31, 2013 we had three US Treasury Notes with an unrealized loss of \$67,929, five Agency Notes with an unrealized loss of \$311,062 and six Municipal Securities with an unrealized loss of \$125,754. The unrealized losses on investments were caused by interest rate increase. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Therefore, these investments are not considered other-than-temporarily impaired. We have the ability to hold these investments until market price recovery or maturity.

DEPOSITS

Deposits remain our primary source of funding for loans and investments. Average interest bearing deposits provided funding for 64.40% of average earning assets for the three months ended March 31, 2014, and 66.07% for the twelve months ended December 31, 2013. The Company encounters strong competition from other financial institutions as well as consumer and commercial finance companies, insurance companies and brokerage firms located in the primary service area of the Bank. However, the percentage of funding provided by deposits has remained stable. The breakdown of total deposits by type and the respective percentage of total deposits are as follows:

	March 31,		December 31,
	2014	2013	2013
Non-interest bearing demand	\$85,613,981	\$86,883,466	\$90,574,330
Interest bearing demand	75,233,813	76,682,220	78,576,851
Money market accounts	50,885,257	52,807,591	47,190,365
Certificates of deposit \$100,000 and over	50,291,095	42,410,373	52,516,487
Other time deposits	15,485,341	15,815,284	15,730,187
Other savings deposits	22,368,706	18,379,803	20,654,435
Total Deposits	\$299,878,193	\$292,978,737	\$305,242,655

Percentage of Deposits	March 31,		December
	2014	2013	31, 2013

Edgar Filing: BANK OF SOUTH CAROLINA CORP - Form 10-Q

Non-interest bearing demand	28.55 %	29.66 %	29.67 %
Interest bearing demand	25.09 %	26.17 %	25.74 %
Money market accounts	16.97 %	18.02 %	15.46 %
Certificates of deposit \$100,000 and over	16.77 %	14.48 %	17.21 %
Other time deposits	5.16 %	5.40 %	5.51 %
Other savings deposits	7.46 %	6.27 %	6.77 %
Total Deposits	100.00%	100.00%	100.00 %

Deposits increased 2.35% or \$6,899,456 from March 31, 2013 to March 31, 2014 and declined 1.76% or \$5,364,462 from December 31, 2013 to March 31, 2014.

SHORT-TERM BORROWINGS

At March 31, 2014 and December 31, 2013, we had no outstanding federal funds purchased with the option to borrow up to \$19,000,000 on short term lines of credit. In March 2012, we established a \$6 million REPO Line with Raymond James. There have been no borrowings under this agreement. We also established a Borrower-In-Custody arrangement with the Federal Reserve as a secondary source of liquidity. This arrangement permits us to retain possession of loans pledged as collateral to secure advances from the Federal Reserve Discount Window. Under this agreement we could borrow up to \$65.5 million and \$69 million at March 31, 2014 and December 31, 2013, respectively. There have been no borrowings under this arrangement.

Comparison of Three Months Ended March 31, 2014 to Three Months Ended March 31, 2013

Net income decreased \$43,007 or 4.31% to \$955,798, or basic and diluted earnings per share of \$.21 and \$.21, respectively, for the three months ended March 31, 2014, from \$998,805, or basic and diluted earnings per share of \$.22 and \$.22, respectively, for the three months ended March 31, 2013. Our return on average assets and average equity for the three months ended March 31, 2014 were 1.15% and 10.92%, respectively, compared with 1.26% and 11.72%, respectively, for the three months ended March 31, 2013.

Net Interest Income

Net interest income is affected by the size and mix of our balance sheet components as well as the spread between interest earned on assets and interest paid on liabilities. Net interest margin is a measure of the difference between interest income on earning assets and interest paid on interest bearing liabilities relative to the amount of interest bearing assets. Net interest income increased \$144,703 or 4.89% to \$3,105,362 for the three months ended March 31, 2014 from \$2,960,659 for the three months ended March 31, 2013. The increase in net interest income was primarily due to an increase in interest and dividends from investment securities. We made a decision to invest some of our excess cash in securities rather than leaving it at the Federal Reserve where it was earning .25%. Average investments increased \$36,060,067 or 61.90% for the three months ended March 31, 2014 from the three months ended March 31, 2013, with a yield of 2.11%. We had a modest increase in average loans of \$713,864 to \$226,323,287 for the three months ended March 31, 2014 from \$225,609,423 for the three months ended March 31, 2013. The yield on average loans remained relatively stable at 4.86% for the three months ended March 31, 2013 from 4.87% for the three months ended March 31, 2013. Total average interest bearing assets increased \$14,328,096 or 4.54% to \$330,194,832 for the three months ended March 31, 2014. Our average interest bearing deposits increased \$8,767,971 or 4.30% to \$212,653,464 for the three months ended March 31, 2014 from \$203,885,493 for the three months ended March 31, 2013. The yield on these deposits remained relatively unchanged from .20% for the three months ended March 31, 2013 to .19% for the three months ended March 31, 2014.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses inherent in the loan portfolio. The adequacy of the allowance for loan losses (the "allowance") is reviewed monthly by the Loan Committee and on a quarterly basis by the Board of Directors. For purposes of this analysis, adequacy is defined as a level sufficient to absorb estimated losses in the loan portfolio as of the balance sheet date presented. The methodology employed for this analysis has had various modifications over the years to better reflect the economic environment and to implement regulatory guidance. This allowance is reviewed on a monthly basis by Credit Personnel (who have no lending authority nor complete the allowance). In addition, the allowance is validated on a periodic basis by the Company's Risk Manager. The revised methodology is based on a Reserve Model that is comprised of the three components listed below:

- 1) Specific Reserve analysis for impaired loans based on Financial Accounting Standards Board (FASB) ASC 310-10-35.
- 2) General reserve analysis applying historical loss rates based on FASB ASC 450-20.
- 3) Qualitative or environmental factors.

Loans are reviewed for impairment on a quarterly basis if any of the following criteria are met:

- 1) Any loan on non-accrual
- 2) Any loan that is a troubled debt restructuring
- 3) Any loan over 60 days past due
- 4) Any loan rated sub-standard, doubtful, or loss
- 5) Excessive principal extensions are executed
- 6) If we are provided information that indicates we will not collect all principal and interest as scheduled

The aforementioned methodology applies to both secured and unsecured loans, yet it does not apply to large groups of smaller balance loans that are collectively evaluated. Impairment is measured by the present value of the future cash flow discounted at the loan's effective interest rate, or, alternatively the fair value of the collateral if the loan is collateral dependent. An impaired loan may not represent an expected loss.

A general reserve analysis is performed on all loans, excluding impaired loans. This analysis includes a pool of loans that are reviewed for impairment but are not found to be impaired. Historical losses are segregated into risk-similar groups and a loss ratio is determined for each group over a three year period. The three year average loss ratio by type is then used to calculate the estimated loss based on the current balance of each group. The three year historical loss percentage was .10% and .22% at March 31, 2014 and March 31, 2013, respectively.

Qualitative and environmental factors include external risk factors that management believes are representative of the overall lending environment of the Company. Management believes that the following factors create a more comprehensive system of controls in which we can monitor the quality of the loan portfolio.

- | | |
|----|---|
| 1) | Portfolio risk |
| a. | Levels and trends in delinquencies and impaired loans |
| b. | Trends in volume and terms of loans |
| c. | Over-margined real estate lending risk |
| 2) | National and local economic trends and conditions |
| 3) | Effects of changes in risk selection and underwriting practices |
| 4) | Experience, ability and depth of lending management staff |
| 5) | Industry conditions |
| 6) | Effects of changes in credit concentrations |
| a. | Loan concentration |
| b. | Geographic concentration |

- c. Regulatory concentration
 - 7) Loan and credit administration risk
 - a. Collateral documentation
 - b. Insurance risk
 - c. Maintenance of financial information risk

The sum of each component's analysis results represents the "estimated loss" within the Company's total portfolio.

Portfolio risk includes the levels and trends in delinquencies, impaired loans and changes in the loan rating matrix, trends in volume and terms of loans and overmargined real estate lending. Management is satisfied with the stability of the past due and non-performing loans and believes there has been no decline in the quality of the loan portfolio due to any trend in delinquent or adversely classified loans. Sizable unsecured principal balances on a non-amortizing basis are monitored. Although the vast majority of our real estate loans are underwritten on a cash flow basis, the secondary source of repayment is typically tied to our ability to realize on the collateral. We closely monitor loan to value ratios. The maximum collateral advance rate is 80% on all real estate transactions, with the exception of raw land at 65% and land development at 70%.

Occasionally, we extend credit beyond our normal collateral advance margins in real estate lending. Although infrequent, the aggregate of these loans represent a notable part of our portfolio. Accordingly, these loans are monitored and the balances reported to the Board every quarter. An excessive level of this practice (as a percentage of capital) could result in additional regulatory scrutiny, competitive disadvantages and potential losses if forced to convert the collateral. The consideration of overmargined real estate loans directly relates to the capacity of the borrower to repay. Management often requests additional collateral to bring the loan to value ratio within the policy guidelines and also requires a strong secondary source of repayment in addition to the primary source of repayment.

Although significantly under the threshold of 100% of capital (currently approximately \$35 million), the number of over-margined real estate loans currently totals approximately \$20.9 million or approximately 9.21% of our loan portfolio at March 31, 2014 compared to \$19.1 million or approximately 8.48% of the loan portfolio at March 31, 2013.

A credit rating matrix is used to rate all extensions of credit and to provide a more specified picture of the risk each loan poses to the quality of the loan portfolio. There are eight possible ratings used to determine the quality of each loan based on nine different qualifying characteristics: cash flow, collateral quality, guarantor strength, financial condition, management quality, operating performance, the relevancy of the financial statements, historical loan performance, and the borrower's leverage position. The matrix is designed to meet management's standards and expectations of loan quality. One hundred percent of our loans are graded.

National and local economic trends and conditions are constantly changing and result in both positive and negative impact on borrowers. Most macroeconomic conditions are not controllable by us and are incorporated into the qualitative risk factors. Natural and environmental disasters, wars and the recent collapse of the subprime lending market as well as problems in the traditional mortgage market are a few of the trends and conditions that are currently affecting the national and local economies. Changes in the national and local economy have impacted borrowers' ability, in many cases, to repay loans in a timely manner. On occasion, a loan's primary source of repayment (i.e., personal income, cash flow, or lease income) may be eroded as a result of unemployment, lack of revenues, or the inability of a tenant to make rent payments.

The quality of our loan portfolio is contingent upon our risk selection and underwriting practices. Every credit with over \$100,000 in exposure is summarized by our Credit Department and reviewed by the Loan Committee on a monthly basis. The Board of Directors reviews credits over \$500,000 monthly with annual credit analyses conducted on these borrowers upon the receipt of updated financial information. Prior to any extension of credit, every significant commercial loan goes through sound credit underwriting. The Credit Department conducts a detailed cash flow on each proposal using the most current financial information. Relevant trends and ratios are evaluated. Between March 31, 2013 and March 31, 2014 we originated \$9.6 million in new equity lines, an increase of 23.23%. Equity lines have always been a significant portion of our loan portfolio and, as of March 31, 2014, comprise 26.70% of all loans.

We have over 350 years of lending management experience among twelve members of our lending staff. In addition to the lending staff, we have an Advisory Board for each office comprised of business and community leaders from the specific office market area. An additional Advisory Board was created during the year ended December 31, 2012, to support our business efforts in the North Charleston area of South Carolina. The Bank recently announced its intention to open an office in North Charleston, South Carolina on Highway 78 and Ingleside Boulevard. We have signed a lease with an anticipated opening in 2015. Management meets with these advisory boards quarterly to discuss the trends and conditions in each respective market. Management is aware of the many challenges currently facing the banking industry. As other banks look to increase earnings in the short term, we will continue to emphasize the need to maintain safe and sound lending practices and core deposit growth.

There continues to be an influx of large banks in our geographic area. This increase has decreased the local industry's overall margins as a result of pricing competition. Management believes that our borrowing base is well established and therefore unsound price competition is not necessary.

The risks associated with the effects of changes in credit concentration include loan concentration, geographic concentration and regulatory concentration.

As of March 31, 2014, there were only four Standard Industrial Code groups that comprised more than 2% of our total outstanding loans. The four groups are activities related to real estate, offices and clinics of doctors, real estate agents and managers, and legal services.

We are located along the coast and on an earthquake fault, increasing the chances that a natural disaster may impact us and our borrowers. We have a Disaster Recovery Plan in place; however, the amount of time it would take for our customers to return to normal operations is unknown. This plan is reviewed and tested annually.

Loan and credit administration risk includes collateral documentation, insurance risk and maintaining financial information risk.

The majority of our loan portfolio is collateralized with a variety of our borrowers' assets. The execution and monitoring of the documentation to properly secure the loan is the responsibility of our lenders and Loan Department. We require insurance coverage naming us as the mortgagee or loss payee. Although insurance risk is also considered collateral documentation risk, the actual coverage, amounts of coverage and increased deductibles are important to management. Recent legislation passed by Congress addresses the need for reform to the National Flood Insurance Program. This legislation, known as the Biggert Waters Flood Insurance Reform and Modernization Act of 2012, has resulted in significant unintended consequences causing dramatic increases in the cost of flood insurance coverage and its potential unaffordability. However, on March 14, 2014 the President signed the 2014 Homeowner Flood Insurance Affordability Act. This new law allows most properties to retain their subsidized premiums. Annual rate increases are also limited to 18% per year and the grandfather plan has been reinstated. In addition, the new law requires the Federal Emergency Management Agency ("FEMA") to refund policy holders who overpaid for premiums under the Biggert Waters Flood Insurance Reform and Modernization Act of 2012.

Risk includes a function of time during which the borrower's financial condition may change; therefore, keeping financial information up to date is important to us. Our policy requires all new loans, regardless of the customer's history with us, to have updated financial information. In addition, we monitor appraisals closely as real estate values continue to fluctuate.

Based on our allowance for loan loss model, we recorded a provision for loan loss of \$30,000 for the three months ended March 31, 2014 compared to \$75,000 for the three months ended March 31, 2013. At March 31, 2014 the three year average loss ratios were: .142% Commercial, .706% Consumer, .116% 1-4 Residential, .000% Real Estate Construction and .044% Real Estate Mortgage. The three year historical loss ratio used at March 31, 2014 was .10% compared to .22% at March 31, 2013.

During the three months ended March 31, 2014 charge-offs of \$6,018 and recoveries of \$7,306 were recorded to the allowance for loan losses, resulting in an allowance for loan losses of \$3,323,565 or 1.46% of total loans at March 31, 2014, compared to charge-offs of \$93,953 and recoveries of \$5,062 resulting in an allowance for loan losses of \$3,418,953 or 1.58% of total loans at March 31, 2013.

We had impaired loans totaling \$7,020,982 as of March 31, 2014 compared to \$11,503,291 at March 31, 2013. The impaired loans include non-accrual loans with balances at March 31, 2014, and 2013, of \$1,501,158 and \$4,021,870, respectively. We had four restructured loans (“TDR”) at March 31, 2014 and five restructured loans at March 31, 2013. According to GAAP, we are required to account for certain loan modifications or restructuring as a troubled debt restructuring, when appropriate. In general, the modification or restructuring of a debt is considered a TDR if we, for economic or legal reasons related to a borrower’s financial difficulties, grants a concession to the borrower that we would not otherwise consider. At March 31, 2014 the four restructured loans had an aggregate balance of \$1,184,994 compared to the five restructured loans with an aggregate balance of \$1,602,025 at March 31, 2013. Included in the impaired loans at March 31, 2013, was one credit totaling \$2,623,556 which is entirely secured by a first mortgage, improving the Bank’s existing second real estate mortgage secured position and including the existing unsecured debt. This loan was paid off in the second quarter of 2013. We do not know of any loans which will not meet their contractual obligations that are not otherwise discussed herein.

The accrual of interest is generally discontinued on loans, which become 90 days past due as to principal or interest. The accrual of interest on some loans, however, may continue even though they are 90 days past due if the loans are well secured or in the process of collection and management deems it appropriate. If non-accrual loans decrease their past due status to less than 30 days for a period of 6 to 9 months, they are reviewed individually by management to determine if they should be returned to accrual status. There was one loan over 90 days past due still accruing interest at March 31, 2014 and no loans over 90 days past due still accruing interest at March 31, 2013. Total loans past due greater than 30 days decreased \$1,886,757 from \$5,204,431 at March 31, 2013 to \$3,317,674 at March 31, 2014. This decrease was due to the payoff of two loans totaling \$1.87 million.

Net recoveries for the three months ended March 31, 2014, were \$1,288 as compared to net charge-offs of \$88,891 for the three months ended March 31, 2013. Although uncertainty in the economic outlook still exists, management believes loss exposure in the portfolio is identified, reserved against and closely monitored to ensure that changes are promptly addressed in the analysis of reserve adequacy.

The following table represents the net charge-offs by loan type.

Net recovery (charge-offs)	March 31, 2014	March 31, 2013
Commercial Loans	\$—	\$(92,464)
Commercial Real Estate	3,147	3,000
Consumer Real Estate	—	—
Consumer Other	(1,859)	573
Net recovery (Charge-Offs)	\$1,288	\$(88,891)

We had \$481,529, in unallocated reserves at March 31, 2014 related to other inherent risk in the portfolio compared to unallocated reserves of \$340,874 at March 31, 2013. We believe this amount is appropriate and properly supported through the environmental factors of our allowance for loan losses. We believe the allowance for loan losses at March 31, 2014, is adequate to cover estimated losses in our loan portfolio; however, assessing the adequacy of the allowance is a process that requires considerable judgment. Our judgments are based on numerous assumptions about current events which we believe to be reasonable, but which may or may not be valid. Thus, there can be no assurance that loan losses in future periods will not exceed the current allowance amount or that future increases in the allowance will not be required. No assurance can be given that our ongoing evaluation of the loan portfolio in light of changing economic conditions and other relevant circumstances will not require significant future additions to the allowance, thus adversely affecting our operating results.

The following table presents a breakdown of the allowance for loan losses as of March 31, 2014 and 2013, respectively.

	March 31, 2014			March 31, 2013		
	Allowance by loan type	Percentage of loans to total loans		Allowance by loan type	Percentage of loans to total loans	
Commercial Loans	\$1,395,087	23	%	\$1,337,967	26	%
Commercial Real Estate	958,270	48	%	368,395	49	%
Consumer Real Estate	405,361	27	%	693,705	23	%
Consumer Other	83,318	2	%	70,473	2	%
Unallocated	481,529	0	%	948,413	0	%
Total	\$3,323,565	100	%	\$3,418,953	100	%

The allowance is also subject to examination testing by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the allowance relative to that of peer institutions, and other adequacy tests. In addition, such regulatory agencies could require us to adjust our allowance based on information available to them at the time of their examination.

The methodology used to determine the reserve for unfunded lending commitments, which is included in other liabilities, is inherently similar to that used to determine the allowance for loan losses described above adjusted for factors specific to binding commitments, including the probability of funding and historical loss ratio. No provision was recorded during the three months ended March 31, 2014 or the three months ended March 31, 2013, resulting in no change to the balance of \$20,825.

Non-interest Income

Our non-interest income decreased \$192,084 or 26.26% to \$539,335 for the three months ended March 31, 2014, from \$731,419 for the three months ended March 31, 2013. This decrease was primarily due to a decrease in mortgage banking income of \$266,957 or 54.04% to \$227,055 for the three months ended March 31, 2014 as compared to \$494,012 for the three months ended March 31, 2013. Higher interest rates and an increase in home prices impacted our mortgage loan originations. These trends began in the second half of 2013 and have resulted in lower discount fees earned and lower service release premiums. Discount fees decreased \$202,870 or 45.04% and service release premiums decreased \$232,793 or 73.54% for the three months ended March 31, 2014. The decrease in mortgage banking income was offset by a gain of \$84,898 on the sale of \$14,000,000 in investment securities. This sale included one \$3,000,000 Agency Note and three US Treasury Notes that totaled \$11,000,000. The investments were replaced by one \$5,000,000 Agency Note and two US Treasury Notes that totaled \$6,000,000.

Non-interest Expense

Non-interest expense increased \$73,743 or 3.40% to \$2,240,499 for the three months ended March 31, 2014, from \$2,166,756 for the three months ended March 31, 2013. This increase was primarily due to increases in salaries and employee benefits and an increase in occupancy expense offset by a decrease in other operating expenses. Salaries and employee benefits increased \$47,828 or 3.73% from \$1,282,083 for the three months ended March 31, 2013 to \$1,329,911 for the three months ended March 31, 2014, as a result of annual merit increases and an increase in the cost of providing medical insurance. Wages increased \$50,892 to \$1,048,282 for the three months ended March 31, 2014. The Compensation Committee of the Board of Directors recommended and the Board of Directors approved a \$15,000 salary increase for Executive Officers for the year ending December 31, 2014. All other employees received annual merit increases. In addition to the salary increases, the cost of providing insurance for employees increased \$11,648 from \$119,081 for the three months ended March 31, 2013 to \$130,729 for the three months ended March 31, 2014.

Our net occupancy expense increased \$37,134 to \$364,672 for the three months ended March 31, 2014. This increase was primarily due to the increases in rent paid on our banking houses in Summerville, Meeting Street and the larger space obtained for our Mortgage Department. In addition, we had an increase of \$14,828 in maintenance contracts as well as an increase of \$4,662 in depreciation on furniture and fixtures.

Our other operating expenses decreased as the result of lower professional fees and a decrease in fees paid for professional meetings. Our professional fees decreased as a result of lower legal fees, a decrease of \$6,500 or 52.00%

to \$6,000 for the three months ended March 31, 2014. Our fees paid for professional meetings decreased \$9,945 or 68.92% to \$4,484 for the three months ended March 31, 2014 from \$14,429 for the three months ended March 31, 2013.

Income Tax Expense

For the three months ended March 31, 2014, the Company's effective tax rate was 30.45% compared to 31.13% during the three months ended March 31, 2013.

Off Balance Sheet Arrangements

In the normal course of operations, we engage in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements, or are recorded in amounts that differ from the notional amounts. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used by us for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate and liquidity risk or to optimize capital. Customer transactions are used to manage customer requests for funding.

Our off-balance sheet arrangements consist principally of commitments to extend credit described below. We estimate probable losses related to binding unfunded lending commitments and record a reserve for unfunded lending commitments in other liabilities on the consolidated balance sheet. At March 31, 2014 and 2013 the balance of this reserve was \$20,825. At March 31, 2014 and 2013, we had no interests in non-consolidated special purpose entities.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained if deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, negotiable instruments, inventory, property, plant and equipment, and real estate. Commitments to extend credit, including unused lines of credit, amounted to \$61,498,207 and \$57,583,876 at March 31, 2014 and 2013, respectively.

Standby letters of credit represent our obligation to a third party contingent upon the failure of our customer to perform under the terms of an underlying contract with the third party or obligates us to guarantee or stand as surety for the benefit of the third party. The underlying contract may entail either financial or nonfinancial obligations and may involve such things as the shipment of goods, performance of a contract, or repayment of an obligation. Under the terms of a standby letter, generally drafts will be drawn only when the underlying event fails to occur as intended. We can seek recovery of the amounts paid from the borrower. The majority of these standby letters of credit are unsecured. Commitments under standby letters of credit are usually for one year or less. The maximum potential amount of undiscounted future payments related to standby letters of credit at March 31, 2014 and 2013 was \$557,593 and \$734,712, respectively.

We originate certain fixed rate residential loans and commit these loans for sale. The commitments to originate fixed rate residential loans and the sales commitments are freestanding derivative instruments. We had forward sales commitments, totaling \$6,809,498 at March 31, 2014, to sell loans held for sale of \$6,809,498. At March 31, 2013, we had forward sales commitments of \$10,193,974. The fair value of these commitments was not significant at March 31, 2014 or 2013. We had no embedded derivative instruments requiring separate accounting treatment.

Once we sell certain fixed rate residential loans, the loans are no longer reportable on our balance sheet. With most of these sales, we have an obligation to repurchase the loan in the event of a default of principal or interest on the loan. This recourse period ranges from three to six months with unlimited recourse as a result of fraud. The unpaid principal balance of loans sold with recourse was \$10.8 million at March 31, 2014 and \$57.8 million at March 31, 2013. For the three months ended March 31, 2014 and March 31, 2013 there were no loans repurchased.

Liquidity

Historically, we have maintained our liquidity at levels believed by management to be adequate to meet requirements of normal operations, potential deposit outflows and strong loan demand and still allow for optimal investment of funds and return on assets.

We manage our assets and liabilities to ensure there is sufficient liquidity to enable management to fund deposit withdrawals, loan demand, capital expenditures, reserve requirements, operating expenses, dividends and to manage daily operations on an ongoing basis. Funds are primarily provided by the Bank through customer deposits, principal and interest payments on loans, mortgage loan sales, the sale or maturity of securities, temporary investments and earnings.

Proper liquidity management is crucial to ensure that we are able to take advantage of new business opportunities as well as meet the credit needs of our existing customers. Investment securities are an important tool in our liquidity management. Our primary liquid assets are cash and due from banks, federal funds sold, investments available for sale, other short-term investments and mortgage loans held for sale. Our primary liquid assets accounted for 32.17% and 33.99% of total assets at March 31, 2014 and 2013, respectively. Securities classified as available for sale, which are not pledged, may be sold in response to changes in interest rates and liquidity needs. All of the securities presently owned are classified as Available for Sale. Net cash provided by operations and deposits from customers have been the primary sources of liquidity. At March 31, 2014, we had unused short-term lines of credit totaling approximately \$19 million (which can be withdrawn at the lender's option). Additional sources of funds available to us for additional liquidity needs include borrowing on a short-term basis from the Federal Reserve System, increasing deposits by raising interest rates paid and selling mortgage loans held for sale. In March 2012, we established a \$6 million REPO Line with Raymond James (formerly Morgan Keegan). There have been no borrowings under this agreement. We also established a Borrower-In-Custody arrangement with the Federal Reserve. This arrangement permits us to retain possession of assets pledged as collateral to secure advances from the Federal Reserve Discount Window. At March 31, 2014 we could borrow up to \$65.5 million. There have been no borrowings under this arrangement.

Our core deposits consist of non-interest bearing accounts, NOW accounts, money market accounts, time deposits and savings accounts. We closely monitor our reliance on certificates of deposit greater than \$100,000 and other large deposits. We believe our liquidity sources are adequate to meet our operating needs and do not know of any trends, events or uncertainties that may result in a significant adverse effect on our liquidity position. At March 31, 2014 and 2013, our liquidity ratio was 26.48% and 23.97%, respectively.

Capital Resources

Our capital needs have been met to date through the \$10,600,000 in capital raised in our initial offering, the retention of earnings less dividends paid and the exercise of stock options for a total shareholders' equity at March 31, 2014, of \$35,278,526. The rate of asset growth since our inception has not negatively impacted this capital base. The current risk-based capital guidelines for financial institutions are designed to highlight differences in risk profiles among financial institutions and to account for off-balance sheet risk. The current guidelines established require a minimum risk-based capital ratio of 8% for bank holding companies and banks. The risk-based capital ratio at March 31, 2014 for the Bank was 14.51% and 13.65% at March 31, 2013. Our management does not know of any trends, events or uncertainties that may result in our capital resources materially increasing or decreasing.

On June 23, 2011 the Board of Directors voted to file a shelf registration (Form S-3) with the Securities and Exchange Commission ("SEC"). This shelf registration statement on Form S-3 provides for the offer and sale from time to time over a three year period, in one or more public offerings, up to \$10 million in common stock or debt securities. Specific terms and prices will be determined at the time of each offering under a separate prospectus supplement, which will be filed with the SEC at the time of the offering. The registration statement was filed with the SEC on June 23, 2011. The filing of the shelf registration does not require us to issue securities. Although we have no current commitments to sell additional stock or securities, the shelf registration will provide us with a source of additional capital for acquisitions, capital expenditures, and repayment of indebtedness we may incur in the future, working capital and other general corporate purposes.

The shelf registration will expire in June 2014. As of the date of this filing, the Board of Directors has not determined whether another Form S-3 will be filed when the shelf registration expires.

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a material effect on the financial statements. Under current capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Current quantitative measures established by regulation to ensure capital adequacy require that we maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and to average assets. Management believes, as of March 31, 2014, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

At March 31, 2014 and 2013, the Company and Bank are categorized as “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 10%, 6% and 5%, respectively, and to be categorized as “adequately capitalized,” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 8%, 4% and 4%, respectively. There are no current conditions or events that management believes would change the Company’s or the Bank’s category.

On July 2, 2013, the Federal Reserve Board approved the final rules implementing the Basel Committee on Banking Supervision’s (“BCBS”) capital guidelines for US banks. Under the final rules, minimum requirements will increase our quantity and quality of the capital. The rules include a new common equity Tier 1 capital to risk-weighted assets ratio of 4.5% and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The final rule also raises the minimum ratio of Tier 1 capital to risk-weighted assets from 4% to 6% and requires a minimum leverage ratio of 4%. The final rule also implements strict eligibility criteria for regulatory capital instruments and improves the methodology for calculating risk-weighted assets to enhance risk sensitivity.

On July 9, 2013 the FDIC also approved, as an interim final rule, the regulatory capital requirements for US banks, following the actions of the Federal Reserve Bank. The FDIC’s rule is identical in substance to the final rules issued by the Federal Reserve Bank.

The phase-in-period for the final rules will begin on January 1, 2015, with full compliance with all of the final rule requirements phased in over a multi-year schedule. Management believes that as of March 31, 2014, the Company and

the Bank would remain “well capitalized” under the new rules.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required.

ITEM 4

CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures and internal controls and procedures for financial reporting

An evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities and Exchange Act of 1934 as amended (the "Act") was carried out as of March 31, 2014 under the supervision and with the participation of the Bank of South Carolina Corporation's management, including its President/Chief Executive Officer and the Chief Financial Officer/Executive Vice President and several other members of the Company's senior management. Based upon that evaluation, Bank of South Carolina Corporation's management, including the President/Chief Executive Officer and the Chief Financial Officer/Executive Vice President concluded that, as of March 31, 2014, the Company's disclosure controls and procedures were effective in ensuring that the information the Company is required to disclose in the reports filed or submitted under the act has been (i) accumulated and communicated to management (including the President/Chief Executive Officer and Chief Financial Officer/Executive Vice President) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

The Company's management is responsible for establishing and maintaining adequate internal controls over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of published financial statements in accordance with generally accepted accounting principles.

Under the supervision and with the participation of management, including the President/Chief Executive Officer and the Chief Financial Officer/Executive Vice President, the Company's management has evaluated the effectiveness of its internal control over financial reporting as of March 31, 2014, based on the framework established in a report entitled "*Internal Control-Integrated Framework*" issued by the Committee of Sponsoring Organizations of the Treadway Commission and the interpretive guidance issued by the Securities and Exchange Commission in Release No. 34-55929.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2014. Based on this assessment, management believes that as of March 31, 2014, the Company's internal control over financial reporting was effective. There were no changes in the Company's internal control over financial reporting that occurred during the year ended March 31, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

On January 20, 2014 we were served with a civil complaint for imperfect securitization of a Note and/or Mortgage. We closed this loan on June 22, 2006 using a MERS Mortgage. The loan was then sold to Countrywide (now known as Bank of America). Our Note was endorsed to Countrywide prior to submitting the loan for their purchase review. After the loan was purchased on July 10, 2006, the transfer was completed for the sale of the Mortgage to Countrywide on the MERS registration system on July 12, 2006. Our legal counsel is reviewing the suit. We believe there will be no loss in the case.

In our opinion, there are no other legal proceedings pending other than routine litigation incidental to our business involving amounts which are not material to our financial condition.

Item 1A. Risk Factors

Not required.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

None.

Item 6. Exhibits

¹ The Consolidated Financial Statements are included in this Form 10-Q and listed on pages as indicated.

	Page
(1) Consolidated Balance Sheets	3
