

CRANE CO /DE/
Form 10-K
February 25, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ý ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended: December 31, 2013

¨ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 1-1657
CRANE CO.

State of incorporation:
Delaware

I.R.S. Employer identification
No. 13-1952290

Principal executive office:
100 First Stamford Place, Stamford, CT 06902
Registrant's telephone number, including area code: (203) 363-7300
Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$1.00	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act
Yes ý No ¨

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15 (d) of the Act
Yes ¨ No ý

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes ý No ¨

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes ý No ¨

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ¨
Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer", "non-accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act). (Check one):
Large accelerated filer x Accelerated filer o

Edgar Filing: CRANE CO /DE/ - Form 10-K

Non-accelerated filer (Do not check if a smaller reporting company) Smaller Reporting Company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Based on the closing stock price of \$59.33 on June 30, 2013, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the voting common equity held by nonaffiliates of the registrant was \$2,925,227,878

The number of shares outstanding of the registrant's common stock, par value \$1.00, was 58,264,491 at January 31, 2014.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the annual shareholders' meeting to be held on April 28, 2014 are incorporated by reference into Part III of this Form 10-K.

FORWARD-LOOKING INFORMATION

This Annual Report on Form 10-K contains information about us, some of which includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements other than historical information or statements about our current condition. You can identify forward-looking statements by the use of terms such as “believes”, “contemplates”, “expects”, “may”, “will”, “could”, “should”, “would”, or “anticipates”, other similar phrases, or the negatives of these terms.

We have based the forward-looking statements relating to our operations on our current expectations, estimates and projections about us and the markets we serve. We caution you that these statements are not guarantees of future performance and involve risks and uncertainties. These statements should be considered in conjunction with the discussion in Part I, the information set forth under Item 1A, “Risk Factors” and with the discussion of the business included in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

We have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Any differences could result from a variety of factors, including the following:

- The effect of changes in economic conditions in the markets in which we operate, including financial market conditions, fluctuations in raw material prices and the financial condition of our customers and suppliers;
- Economic, social and political instability, currency fluctuation and other risks of doing business outside of the United States;
- Competitive pressures, including the need for technology improvement, successful new product development and introduction and any inability to pass increased costs of raw materials to customers;
- Our ability to successfully integrate acquisitions and to realize synergies and opportunities for growth and innovation;
- Our ability to successfully value acquisition candidates;
- Our ongoing need to attract and retain highly qualified personnel and key management;
- A reduction in congressional appropriations that affect defense spending;
- The ability of the U.S. government to terminate our government contracts;
- The outcomes of legal proceedings, claims and contract disputes;
- Adverse effects on our business and results of operations, as a whole, as a result of increases in asbestos claims or the cost of defending and settling such claims;
- The outcome of restructuring and other cost savings initiatives;
- Adverse effects as a result of further increases in environmental remediation activities, costs and related claims;
- Investment performance of our pension plan assets and fluctuations in interest rates, which may affect the amount and timing of future pension plan contributions; and
- The effect of changes in tax, environmental and other laws and regulations in the United States and other countries in which we operate.

Part I

Reference herein to “Crane”, “we”, “us”, and “our” refer to Crane Co. and its subsidiaries unless the context specifically states or implies otherwise. Amounts in the following discussion are presented in millions, except employee, share and per share data, or unless otherwise stated.

Item 1. Business.

We are a diversified manufacturer of highly engineered industrial products. Comprised of four segments – Aerospace & Electronics, Engineered Materials, Merchandising Systems and Fluid Handling – our businesses give us a substantial presence in focused niche markets, allowing us to pursue attractive returns and excess cash flow. Our primary markets are aerospace, defense electronics, non-residential construction, recreational vehicle (“RV”), transportation, automated payment and merchandising, chemical, pharmaceutical, oil, gas, power, nuclear, building services and utilities.

Since our founding in 1855, when R.T. Crane resolved “to conduct my business in the strictest honesty and fairness; to avoid all deception and trickery; to deal fairly with both customers and competitors; to be liberal and just toward employees, and to put my whole mind upon the business,” we have been committed to the highest standards of business conduct.

Our strategy is to grow the earnings and cash flows of niche businesses with leading market shares, acquire businesses that fit strategically with existing businesses, successfully develop new products, aggressively pursue operational and strategic linkages among our businesses, build a performance culture focused on productivity and continuous improvement, continue to attract and retain a committed management team whose interests are directly aligned with those of our shareholders and maintain a focused, efficient corporate structure.

We use a comprehensive set of business processes and operational excellence tools that we call the Crane Business System to drive continuous improvement throughout our businesses. Beginning with a core value of integrity, the Crane Business System incorporates “Voice of the Customer” teachings (specific processes designed to capture our customers’ requirements) and a broad range of operational excellence tools into a disciplined strategy deployment process that drives profitable growth by focusing on continuously improving safety, quality, delivery and cost.

We employ approximately 11,500 people in North and South America, Europe, the Middle East, Asia and Australia. Revenues from outside the United States were approximately 41% in both 2013 and 2012. For more information regarding our sales and assets by geographical region, see Part II, Item 8 under Note 14, “Segment Information,” to the Consolidated Financial Statements.

Business Segments

For additional information on recent business developments and other information about us and our business, you should refer to the information set forth under the captions, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” in Part II, Item 7 of this report, as well as in Part II, Item 8 under Note 14, “Segment Information,” to the Consolidated Financial Statements for sales, operating profit and assets employed by each segment.

Aerospace & Electronics

The Aerospace & Electronics segment has two groups, the Aerospace Group and the Electronics Group. This segment supplies critical components and systems, including original equipment and aftermarket parts, for both the commercial and military aerospace industries. The commercial market accounted for approximately 69% of segment sales in 2013, while sales to the military market were approximately 31% of total sales.

The Aerospace Group’s products are organized into the following solution sets which are designed, manufactured and sold under their respective brand names: Landing Systems (Hydro-Aire), Sensing and Utility Systems (ELDEC), Fluid Management (Lear Romec, Eldec, and Hydro-Aire) and Cabin Systems (P.L. Porter). The Electronics Group products are organized into the following solution sets: Power Solutions (ELDEC, Keltec and Interpoint), Microwave Systems (Signal Technology and Merrimac) and Microelectronics (Interpoint).

The Landing Systems solution set includes aircraft brake control and anti-skid systems, including electro-hydraulic servo valves and manifolds, embedded software and rugged electronic controls, hydraulic control valves, landing gear sensors, and electrical braking as original equipment to the commercial transport, business, regional, general aviation, military and government aerospace, repair and overhaul markets. This solution set also includes similar systems for

the retrofit of aircraft with improved systems as well as replacement parts for systems installed as original equipment by aircraft manufacturers. All of these solution sets are proprietary to us and are custom designed to the requirements and specifications of the aircraft manufacturer or program contractor. These systems and replacement parts are sold directly to aircraft manufacturers, Tier 1 integrators

(companies which make products specifically for an aircraft manufacturer), airlines, governments and aircraft maintenance, repair and overhaul (“MRO”) organizations. Manufacturing for Landing Systems is located in Burbank, California.

The Sensing and Utility Systems solution set includes custom landing gear control and indication systems, door control and indication systems, nose wheel steering systems, on-board and hand-held wireless tire pressure monitoring systems, proximity sensors and switches, and pressure sensors for the commercial business, regional and general aviation, military, MRO and electronics markets.

Our Fluid Management solution set includes lubrication pumps, fuel pumps, coolant/water pumps, and fuel flow transmitters for commercial and military aerospace applications. Our Fluid Management products are manufactured at three facilities located in Elyria, Ohio; Burbank, California; and Lynnwood, Washington.

Our Cabin Systems solution set includes motion control products for airline seating. We manufacture both electromechanical actuation and hydraulic/mechanical actuation solutions for aircraft seating, selling directly to seat manufacturers and to the airlines. Our Cabin Systems solutions are primarily manufactured in Burbank, California. Our Power solution set includes custom low voltage and high voltage power supplies, miniature (hybrid) power modules, battery charging systems, transformer rectifier units, high power traveling wave tube (“TWT”) transmitters and power for TWT and solid state transmitters and amplifiers for a broad array of applications predominantly in the defense, commercial aerospace and space markets. These products are used to provide power for avionics, weapons systems, radar, electronic warfare suites, communications systems, data links, aircraft utilities systems, emergency power, bulk ac/dc power conversion and motor pulse power. Products range from standard modules to full custom designed power management and distribution systems. We supply our products to commercial aerospace and space prime contractors, Tier 1 integrators and U.S. Department of Defense prime contractors and foreign allied defense organizations. Facilities are located in Redmond and Lynnwood, Washington; Ft. Walton Beach, Florida; and Kaohsiung, Taiwan.

Our Microwave Systems solution set includes sophisticated electronic radio frequency components and subsystems and specialty components and materials. These products are used in defense and space electronics applications that include radar, electronic warfare suites, communications systems and data links. We supply many U.S. Department of Defense prime contractors and foreign allied defense organizations with products that enable missile seekers and guidance systems, aircraft sensors for tactical and intelligence applications, electronic warfare, surveillance and reconnaissance missions, communications and self-protect capabilities for naval vessels. Facilities are located in Beverly, Massachusetts; Chandler, Arizona; West Caldwell, New Jersey; San Jose, Costa Rica; and Norwalk, Connecticut.

Our Microelectronics solution set, headquartered in Redmond, Washington, designs, manufactures and sells custom miniature (hybrid) electronic circuits for applications in medical, military and commercial aerospace industries. The Aerospace & Electronics segment employed approximately 2,700 people and had assets of \$512 million at December 31, 2013. The order backlog totaled \$361 million and \$378 million at December 31, 2013 and 2012, respectively.

Engineered Materials

The Engineered Materials segment manufactures fiberglass-reinforced plastic panels for the transportation industry, in refrigerated and dry-van trailers and truck bodies, RVs, industrial building applications and the commercial construction industry for food processing, restaurants and supermarket applications. Engineered Materials sells the majority of its products directly to trailer and RV manufacturers and uses distributors and retailers to serve the commercial construction market. Manufacturing facilities are located in Joliet, Illinois; Jonesboro, Arkansas; Florence, Kentucky and Goshen, Indiana.

The Engineered Materials segment employed approximately 650 people and had assets of \$233 million at December 31, 2013. The order backlog totaled \$15 million and \$13 million at December 31, 2013 and 2012, respectively.

Merchandising Systems

The Merchandising Systems segment is comprised of two businesses, Vending Solutions and Crane Payment Innovations.

Our Vending Solutions business, which is primarily engaged in the design and manufacture of vending equipment and related solutions, creates customer value through innovation by improving consumer experience and store profitability. Our products, which include a full line of vending options, including those for food, snack, coffee and cold beverages, are sold to vending operators and food and beverage companies throughout the world. Vending Solutions has leading positions in both the direct and indirect distribution channels. Our solutions include vending management software, cashless and online solutions to help customers operate their businesses more profitably, become more competitive and increase cash flow for continued business investment. Production facilities for Vending Solutions are located in Williston, South Carolina and Chippenham, England.

On December 11, 2013, we completed the acquisition of MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI"), a leading provider of payment solutions for unattended transaction systems, which serves customers in the transportation, gaming, retail, service payment and vending markets, for a purchase price of \$804 million for all of the outstanding equity interests of MEI.

Our Crane Payment Innovations ("CPI") business, which combines the former Payment Solutions business of Crane Co. and MEI, provides high technology products serving five global vertical markets: Retail, Vending, Gaming, Financial Services and Transportation. Our payment systems solutions for these markets include coin accepters and dispensers, coin hoppers, coin recyclers, bill validators and bill recyclers, and cashless systems. Major facilities are located in Malvern, Pennsylvania; Queretaro, Mexico; Tokyo, Japan; Geneva, Switzerland; Reading and Manchester, England; Buxtehude, Germany; Concord, Ontario, Canada; Kiev, Ukraine; and Salem, New Hampshire.

The Merchandising Systems segment employed approximately 2,920 people and had assets of \$1,383 million at December 31, 2013. Order backlog totaled \$52 million at December 31, 2013, which includes \$31.9 million of backlog pertaining to the MEI business acquired in December 2013. Order backlog totaled \$15 million at December 31, 2012.

Fluid Handling

The Fluid Handling segment is a provider of highly engineered fluid handling equipment, such as valves, lined pipe and pumps, for critical performance applications that require high reliability. The segment operates through vertically focused end-market businesses including the Crane Valve Group ("Valve Group"), Crane Pumps & Systems, Crane Supply and Barksdale.

The Valve Group business includes: Crane ChemPharma & Energy Flow Solutions, Valve Services and Building Services & Utilities. The Valve Group is a global manufacturer of critical on/off process valves for demanding applications in industrial end markets, as well as innovative valves, coupling and gas components for commercial construction and utilities end markets. Products and services include a wide variety of valves, corrosion-resistant plastic-lined pipe, pipe fittings, couplings, connectors, actuators and valve testing. Markets served include the chemical processing, petrochemical, pharmaceutical, oil and gas, refining, power, nuclear, mining and water, general industrial and commercial construction industries. Products are sold under the trade names Crane, Saunders, Jenkins, Pacific, Xomox, Krombach, DEPA, ELRO, REVO, Flowseal, Centerline, Stockham, Wask, Viking Johnson, IAT, Hattersley, NABIC, Sperry, Wade, Rhodes, Brownall, Resistoflex, Duocheck, Barksdale and WTA. Facilities and sales/service centers are located across the globe in the United States, as well as in Australia, Austria, Belgium, Canada, China, England, Finland, France, Germany, Hungary, India, Indonesia, Italy, Japan, Mexico, the Netherlands, Northern Ireland, Russia, Singapore, Slovenia, South Korea, Spain, Sweden, Taiwan, United Arab Emirates and Wales.

Crane Pumps & Systems manufactures pumps under the trade names Deming, Weinman, Burks and Barnes. Pumps are sold to a

broad customer base that includes industrial, municipal, and commercial water and wastewater, commercial heating, ventilation and air-conditioning industries, original equipment manufacturers and military applications. Crane Pumps & Systems has facilities in Piqua, Ohio; Bramalea, Ontario, Canada; and Zhejiang, China.

Crane Supply, a distributor of valves, fittings and piping, sells predominately to the non-residential construction and industrial markets and maintains 29 distribution facilities throughout Canada.

The Barksdale business provides valves and regulators with its ShearSeal technology for transportation applications and hazardous environments in oil and gas and pressure, temperature, and levels sensors for industrial applications.

The Fluid Handling segment employed approximately 5,200 people and had assets of \$996 million at December 31, 2013. Order backlog totaled \$334 million and \$343 million at December 31, 2013 and 2012, respectively.

Acquisitions

We have completed four acquisitions in the past five years.

On December 11, 2013, we completed the acquisition of MEI, a leading provider of payment solutions for unattended transaction systems, which serves customers in the transportation, gaming, retail, service payment and vending markets, for a purchase price of \$804 million for all of the outstanding equity interests of MEI. MEI had sales of \$399 million in 2012 and is being integrated into our CPI business within our Merchandising Systems segment. The amount

allocated to goodwill reflects the benefits we expect to realize from the acquisition, as the acquisition is expected to strengthen and broaden our product offering and will allow us to strengthen our global position in all sectors of the market. Goodwill for this acquisition amounted to \$442 million.

In July 2011, we completed the acquisition of W. T. Armatur GmbH & Co. KG (“WTA”), a manufacturer of bellows sealed globe valves, as well as certain types of specialty valves, for chemical, fertilizer and thermal oil applications, for a purchase price of \$37 million in cash and \$1 million of assumed debt. WTA’s 2010 sales were approximately \$21 million, and WTA has

been integrated into Crane ChemPharma & Energy Flow Solutions within our Fluid Handling segment. Goodwill for this acquisition amounted to \$12 million.

During 2010, we completed two acquisitions at a total cost of approximately \$144 million, including the repayment of \$3 million of assumed debt. Goodwill for the 2010 acquisitions amounted to \$51 million.

In December 2010, we completed the acquisition of Money Controls, a leading producer of a broad range of payment systems and associated products for the gaming, amusement, transportation and retail markets. Money Controls' 2010 full-year sales were approximately \$64 million, and the purchase price was approximately \$90 million, net of cash acquired of \$3 million. Money Controls has been integrated into the Payment Innovations business within our Merchandising Systems segment.

In February 2010, we completed the acquisition of Merrimac Industries, Inc. ("Merrimac"), a designer and manufacturer of RF Microwave components, subsystem assemblies and micro-multifunction modules. Merrimac's 2009 sales were approximately \$32 million, and the aggregate purchase price was \$54 million in cash, including the repayment of \$3 million of assumed debt. Merrimac has been integrated into the Electronics Group within our Aerospace & Electronics segment.

Divestitures

In December 2013, as part of the execution of regulatory remedies associated with the MEI acquisition, we sold a product line, which was formerly part of our Merchandising Systems segment, to Suzo-Happ Group for \$6.8 million and recorded a \$2 million gain. Sales of this product line were \$15.1 million in 2013.

In June 2012, we sold certain assets and operations of the Company's valve service center in Houston, Texas, which was formerly part of the Fluid Handling segment, to Furmanite Corporation for \$9.3 million. The service center had sales of \$14 million in 2011 and is reported as discontinued operations on our Consolidated Statement of Operations.

In June 2012, we also sold Azonix Corporation ("Azonix"), which was part of our former Controls segment, to Cooper Industries for \$44.8 million. Azonix had sales of \$32 million in 2011 and is reported as discontinued operations on our Consolidated Statement of Operations.

In July 2010, we sold Wireless Monitoring Systems ("WMS") to Textron Systems for \$3 million. WMS was included in our former Controls segment. WMS had sales of \$3 million in 2009.

During 2009, we sold General Technology Corporation ("GTC") to IEC Electronics Corp. for \$14 million. GTC, also known as Crane Electronic Manufacturing Services, was included in our Aerospace & Electronics segment, as part of the Electronics Group. GTC had \$26 million in sales in 2009.

Competitive Conditions

Our lines of business are conducted under highly competitive conditions in each of the geographic and product areas they serve. Because of the diversity of the classes of products manufactured and sold, they do not compete with the same companies in all geographic or product areas. Accordingly, it is not possible to estimate the precise number of competitors or to identify our competitive position, although we believe that we are a principal competitor in many of our markets. Our principal method of competition is production of quality products at competitive prices delivered in a timely and efficient manner.

Our products have primary application in the aerospace, defense electronics, non-residential construction, RV, transportation, automated payment and merchandising, chemical, pharmaceutical, oil, gas, power, nuclear, building services and utilities end markets. As such, our revenues are dependent upon numerous unpredictable factors, including changes in market demand, general economic conditions and capital spending. Because these products are also sold in a wide variety of markets and applications, we do not believe we can reliably quantify or predict the possible effects upon our business resulting from such changes.

Our engineering and product development activities are directed primarily toward improvement of existing products and adaptation of existing products to particular customer requirements as well as the development of new products. We own numerous patents, trademarks, copyrights, trade secrets and licenses to intellectual property, no one of which is of such importance that termination would materially affect our business. From time to time, however, we do engage in litigation to protect our intellectual property.

Research and Development

Research and development costs are expensed when incurred. These costs were \$52.7 million, \$66.9 million and \$64.2 million in 2013, 2012 and 2011, respectively, and were incurred primarily by the Aerospace & Electronics segment.
Our Customers

No customer accounted for more than 10% of our consolidated revenues in 2013, 2012 or 2011.

Page 5

Raw Materials

Our manufacturing operations employ a wide variety of raw materials, including steel, copper, cast iron, electronic components, aluminum, plastics and various petroleum-based products. We purchase raw materials from a large number of independent sources around the world. Although market forces have generally caused increases in the costs of steel, copper and petroleum-based products, there have been no raw materials shortages that have had a material adverse impact on our business, and we believe that we will generally be able to obtain adequate supplies of major raw material requirements or reasonable substitutes at reasonable costs.

Seasonal Nature of Business

Our business does not experience significant seasonality.

Government Contracts

We have agreements relating to the sale of products to government entities, primarily involving products in our Aerospace & Electronics segment and our Fluid Handling segment. As a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws and regulations governing government contracts differ from those governing private contracts. For example, some government contracts require disclosure of cost and pricing data and impose certain sourcing conditions that are not applicable to private contracts. Our failure to comply with these laws could result in suspension of these contracts, criminal or civil sanctions, administrative penalties and fines or suspension or debarment from government contracting or subcontracting for a period of time. For a further discussion of risks related to compliance with government contracting requirements; please refer to “Item 1A. Risk Factors.”

Financing

In December 2013, we issued 10 year notes having an aggregate principal amount of \$300 million. The notes are unsecured, senior obligations that mature on December 15, 2023 and bear interest at 4.45% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of Crane, and if as a consequence, the notes are rated below investment grade by both Moody’s Investors Service and Standard & Poor’s, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 4.56%. Also in December 2013, we issued five year notes having an aggregate principal amount of \$250 million. The notes are unsecured, senior obligations that mature on December 15, 2018 and bear interest at 2.75% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross-default provisions. If there is a change in control of Crane, and if as a consequence, the notes are rated below investment grade by both Moody’s Investors Service and Standard & Poor’s, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 2.92%. Senior unsecured notes having an aggregate principal amount of \$200 million matured in the third quarter of 2013. These notes were repaid using \$90 million of cash and \$110 million of multi-year credit facility borrowings. In December 2012, we obtained \$600 million of bank loan commitments in support of our acquisition of MEI. The commitments included a \$200 million expansion of the \$300 million credit facility as further described below, and an additional \$400 million 364 day credit facility. The 364 day credit facility was terminated on December 13, 2013 after being used to fund the MEI acquisition.

In May 2012, we entered into a five year, \$300 million Amended and Restated Credit Agreement (as subsequently amended, and increased to \$500 million, the “facility”), which is due to expire in May 2017. The facility allows us to borrow, repay, or to the extent permitted by the agreement, prepay and re-borrow funds at any time prior to the stated maturity date, and the loan proceeds may be used for general corporate purposes including financing for acquisitions. Interest is based on, at our option, (1) a LIBOR-based formula that is dependent in part on the Company's credit rating

(LIBOR plus 105 basis points as of the date of this Report; up to a maximum of LIBOR plus 147.5 basis points), or (2) the greatest of (i) the JPMorgan Chase Bank, N.A.'s prime rate, (ii) the Federal Funds rate plus 50 basis points, or (iii) an adjusted LIBOR rate plus 100 basis points, plus a spread dependent on the Company's credit rating (5 basis points as of the date of this Report; up to a maximum of 47.5 basis points).

At December 31, 2013, outstanding borrowings under the facility totaled \$125 million. The facility contains customary affirmative and negative covenants for credit facilities of this type, including the absence of a material adverse effect and limitations on us and our subsidiaries with respect to indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of all or substantially all assets, transactions with affiliates and hedging arrangements. The facility also provides for customary events of default, including failure to pay principal, interest or fees when due, failure to comply with covenants, the fact that any representation or warranty made by us is false in any material respect, default under certain other indebtedness, certain insolvency or receivership events affecting us and our subsidiaries, certain ERISA events, material judgments and a change in control of Crane. The facility contains a leverage ratio covenant requiring a ratio of total debt to total capitalization of less than or equal to 65%. At December 31, 2013, our ratio was 42%.

In November 2006, we issued 30 year notes having an aggregate principal amount of \$200 million. The notes are unsecured, senior obligations that mature on November 15, 2036 and bear interest at 6.55% per annum, payable semi-annually on May 15 and November 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of Crane, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest.

Available Information

We file annual, quarterly and current reports and amendments to these reports, proxy statements and other information with the United States Securities and Exchange Commission ("SEC"). You may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding issuers, like us, that file electronically with the SEC. The address of the SEC's website is www.sec.gov.

We also make our filings available free of charge through our Internet website, as soon as reasonably practicable after filing such material electronically with, or furnishing such material to the SEC. Also posted on our website are our Corporate Governance Guidelines, Standards for Director Independence, Crane Co. Code of Ethics and the charters and a brief description of each of the Audit Committee, the Management Organization and Compensation Committee and the Nominating and Governance Committee. These items are available in the "Investors – Corporate Governance" section of our website at www.craneco.com. The content of our website is not part of this report.

Brendan Curran	Group President, Aerospace	Group President, Aerospace of Aerospace & Electronics since May 2013. Pratt Whitney: Vice President, Business Development, Strategy & Partnerships, Commercial Engines from July 2012 through June 2013 and Vice President, Commercial Engines & Global Services from April 2011 through June 2012. Hamilton Sundstrand, United Technologies Corporation: VP and General Manager, Repair & Supply Chain from May 2009 through March 2011 and VP, Aftermarket Sales & Commercial Spares from 2004 through April 2009.	52	2013
Augustus I. duPont	Vice President, General Counsel and Secretary	Vice President, General Counsel and Secretary since 1996.	62	1996
Bradley L. Ellis	Group President, Merchandising Systems	Group President, Merchandising Systems since 2003. Vice President, Crane Business System from March 2009 to December 2011.	45	2000
Andrea L. Frohning	Vice President, Human Resources	Vice President, Human Resources since November 2013. Vice President, Hubbell Inc. from 2006 through October 2013.	44	2013
Richard A. Maue	Vice President - Finance and Chief Financial Officer	Vice President - Finance and Chief Financial Officer since January 2013. Principal Accounting Officer since August 2007 and Controller from August 2007 to December 2011.	43	2007
Anthony D. Pantaleoni	Vice President, Environment, Health and Safety	Vice President, Environment, Health and Safety since 1989.	59	1989
Thomas J. Perlitz	Vice President, Corporate Strategy	Acting Group President, Aerospace of Aerospace & Electronics from January 2013 through May 2013. Vice President, Corporate Strategy since March 2009 and Group President, Controls from October 2008 through July 2013. Vice President, Operational Excellence from 2005 to March	45	2005

Edgar Filing: CRANE CO /DE/ - Form 10-K

Louis V. Pinkham	Group President, Fluid Handling	2009. Group President, Fluid Handling since October 2012. Senior Vice President, General Manager at Eaton Corp. (diversified power management company) from June 2011 to October 2012. Vice President, General Manager Eaton Corp. from 2008 to 2011.	42	2012
Tazewell S. Rowe	Vice President, Treasurer	Vice President, Treasurer since August 2013. Assistant Treasurer, ITT Corporation from January 2010 through August 2013. Managing Director, Corporate Strategy, Ally Financial from October 2006 through January 2010.	42	2013
Kristian R. Salovaara	Vice President, Business Development	Vice President, Business Development since May 2011. Managing Director at FBR Capital Markets & Co. from September 2009 to May 2011. Founding Partner at Watch Hill Partners, LLC (investment banking firm) from 2004 to September 2009.	53	2011
Edward S. Switter	Vice President, Tax	Vice President, Tax since 2011. Director Global Tax from 2010 to 2011. Director of Tax from 2006 to 2010.	39	2011
Robert E. Tavares	Group President, Electronics	President, Electronics Group of Aerospace & Electronics since March 2012. President of EV2, North America from July 2011 to March 2012. Vice President, Microwave Solutions, Electronics from September 2010 to July 2011. Vice President, General Manager Cobham M/A-COM Inc (technology solutions company) from 2008 to 2010.	52	2012

Item 1A. Risk Factors.

The following is a description of what we consider the key challenges and risks confronting our business. This discussion should be considered in conjunction with the discussion under the caption “Forward-Looking Information” preceding Part I, the information set forth under Item 1, “Business” and with the discussion of the business included in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” These risks comprise the material risks of which we are aware. If any of the events or developments described below or elsewhere in this Annual Report on Form 10-K, or in any documents that we subsequently file publicly were to occur, it could have a material adverse effect on our business, financial condition or results of operations.

Risks Relating to Our Business

We are subject to numerous lawsuits for asbestos-related personal injury, and costs associated with these lawsuits may adversely affect our results of operations, cash flow and financial position.

We are subject to numerous lawsuits for asbestos-related personal injury. Estimation of our ultimate exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims. Our estimate of the future expense of these claims is derived from assumptions with respect to future claims, settlement and defense costs which are based on experience during the last few years and which may not prove reliable as predictors. A significant upward or downward trend in the number of claims filed, depending on the nature of the alleged injury, the jurisdiction where filed and the quality of the product identification, or a significant upward or downward trend in the costs of defending claims, could change the estimated liability, as would substantial adverse verdicts at trial or on appeal. A legislative solution or a structured settlement transaction could also change the estimated liability. These uncertainties may result in us incurring future charges or increases to income to adjust the carrying value of recorded liabilities and assets, particularly if the number of claims and settlements and defense costs escalates or if legislation or another alternative solution is implemented; however, we are currently unable to predict such future events. The resolution of these claims may take many years, and the effect on results of operations, cash flow and financial position in any given period from a revision to these estimates could be material.

As of December 31, 2013, we were one of a number of defendants in cases involving 51,490 pending claims filed in various state and federal courts that allege injury or death as a result of exposure to asbestos. See Note 11, “Commitments and Contingencies” of the Notes to Consolidated Financial Statements for additional information on:

• Our pending claims;

• Our historical settlement and defense costs for asbestos claims;

• The liability we have recorded in our financial statements for pending and reasonably anticipated asbestos claims through 2021;

• The asset we have recorded in our financial statements related to our estimated insurance coverage for asbestos claims; and

• Uncertainties related to our net asbestos liability.

We have recorded a liability for pending and reasonably anticipated asbestos claims through 2021, and while it is probable that this amount will change and that we may incur additional liabilities for asbestos claims after 2021, which additional liabilities may be significant, we cannot reasonably estimate the amount of such additional liabilities at this time. The liability was \$699 million as of December 31, 2013.

Macroeconomic fluctuations may harm our business, results of operations and stock price.

Although the global economy has shown positive indications, the recovery has been slower than anticipated and the continuation and duration of that recovery remains uncertain. Contributing factors include persistent high unemployment in the U.S. and Europe, a slow recovery of the U.S. and European commercial construction markets and government budget reduction plans, including mandatory reductions in U.S. defense spending. While concerns regarding the stability and viability of major financial institutions have partially abated, future turmoil in the capital markets may impede our ability to access the capital markets when we would like, or need, to raise capital or restrict our ability to borrow money on favorable terms. Such market conditions could have an adverse impact on our flexibility to react to changing economic and business conditions and on our ability to fund our operations or refinance

maturing debt balances at attractive interest rates. In addition, restrictions on credit availability could adversely affect the ability of our customers to obtain financing for significant purchases and could result in decreases in or cancellation of orders for our products and services as well as impact the ability of our customers to make payments. Similarly, credit restrictions may adversely affect our supplier base and increase the potential for one or more of our suppliers to experience financial distress or bankruptcy. A return to unfavorable economic conditions, or even an increase in economic uncertainty, could harm our business by adversely affecting our revenues, results of operations, cash flows and financial condition. See “Specific Risks Related to Our Business Segments”.

Our operations expose us to the risk of environmental liabilities, costs, litigation and violations that could adversely affect our financial condition, results of operations, cash flow and reputation.

Our operations are subject to environmental laws and regulations in the jurisdictions in which they operate, which impose limitations on the discharge of pollutants into the ground, air and water and establish standards for the generation, treatment, use, storage and disposal of solid and hazardous wastes. We must also comply with various health and safety regulations in the United States and abroad in connection with our operations. Failure to comply with any of these laws could result in civil and criminal, monetary and non-monetary penalties and damage to our reputation. In addition, we cannot provide assurance that our costs related to remedial efforts or alleged environmental damage associated with past or current waste disposal practices or other hazardous materials handling practices will not exceed our estimates or adversely affect our financial condition, results of operations and cash flow.

We may be unable to identify or to complete acquisitions, or to successfully integrate the businesses we acquire.

We have evaluated, and expect to continue to evaluate, a wide array of potential acquisition transactions. Our acquisition program attempts to address the potential risks inherent in assessing the value, strengths, weaknesses, contingent or other liabilities, systems of internal control and potential profitability of acquisition candidates, as well as other challenges such as retaining the employees and integrating the operations of the businesses we acquire.

Integrating acquired operations, such as MEI, involves significant risks and uncertainties, including:

• Maintenance of uniform standards, controls, policies and procedures;

• Diversion of management's attention from normal business operations during the integration process;

• Unplanned expenses associated with the integration efforts;

• Inability to achieve planned synergies; and

• Unidentified issues not discovered in the due diligence process, including legal contingencies.

There can be no assurance that suitable acquisition opportunities will be available in the future, that we will continue to acquire businesses or that any business acquired will be integrated successfully or prove profitable, which could adversely impact our growth rate. Our ability to achieve our growth goals depends in part upon our ability to identify and successfully acquire and integrate companies and businesses at appropriate prices and realize anticipated cost savings.

Our businesses are subject to extensive governmental regulation; failure to comply with those regulations could adversely affect our financial condition, results of operations, cash flow and reputation.

We are required to comply with various import and export control laws, which may affect our transactions with certain customers, particularly in our Aerospace & Electronics and Fluid Handling segments, as discussed more fully under "Specific Risks Relating to Our Business Segments". In certain circumstances, export control and economic sanctions regulations may prohibit the export of certain products, services and technologies, and in other circumstances we may be required to obtain an export license before exporting the controlled item. A failure to comply with these requirements might result in suspension of these contracts and suspension or debarment from government contracting or subcontracting. In addition, we are subject to the Foreign Corrupt Practices Act (the "FCPA"), which generally prohibits U.S. companies and their intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business, or securing any improper advantage and the anti-bribery laws of other jurisdictions. Failure to comply with any of these regulations could result in civil and criminal, monetary and non-monetary penalties, fines, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation.

The prices of our raw materials can fluctuate dramatically, which may adversely affect our profitability.

The costs of certain raw materials that are critical to our profitability are volatile. This volatility can have a significant impact on our profitability. In our Engineered Materials segment, for example, profits could be adversely affected by further increases in resin and styrene material costs and by the inability on the part of the businesses to maintain their position in product cost and functionality against competing materials. The costs in our Fluid Handling and Merchandising Systems segments similarly are affected by fluctuations in the price of metals such as steel and copper. While we have taken actions aimed at securing an adequate supply of raw materials at prices which are favorable to us, if the prices of critical raw materials increase, our operating costs could be negatively affected.

Our ability to obtain parts and raw materials from our suppliers is uncertain, and any disruptions or delays in our supply chain could negatively affect our results of operations.

Our operations require significant amounts of important parts and raw materials. We are engaged in a continuous, company-wide effort to concentrate our purchases of parts and raw materials on fewer suppliers, and to obtain parts from suppliers in low-cost countries where possible. If we are unable to procure these parts or raw materials, our operations may be disrupted, or we could experience a delay or halt in certain of our manufacturing operations. We believe that our supply management and production practices are based on an appropriate balancing of the foreseeable risks and the costs of alternative practices.

Nonetheless, supplier capacity constraints, supplier production disruptions, supplier financial condition, price volatility or the unavailability of some raw materials may have an adverse effect on our operating results and financial condition.

Demand for our products is variable and subject to factors beyond our control, which could result in unanticipated events significantly impacting our results of operations.

A substantial portion of our sales is concentrated in industries that are cyclical in nature or subject to market conditions which may cause customer demand for our products to be volatile. These industries often are subject to fluctuations in domestic and international economies as well as to currency fluctuations and inflationary pressures. Reductions in demand by these industries would reduce the sales and profitability of the affected business segments. In our Aerospace & Electronics segment, for example, a significant decline in demand for air travel, or a decline in airline profitability generally, could result in reduced orders for aircraft and could also cause airlines to reduce their purchases of repair parts from our businesses. Our Aerospace businesses could also be impacted to the extent that major aircraft manufacturers encountered production problems, or if pricing pressure from aircraft customers caused the manufacturers to press their suppliers to lower prices; in addition, demand for military and defense products is dependent upon government spending, which remains uncertain. In our Engineered Materials segment, sales and profits could be affected by declines in demand for truck trailers, RVs, or building products. In our Fluid Handling segment, a slower recovery of the economy or major markets could reduce sales and profits, particularly if projects for which these businesses are suppliers or bidders are canceled or delayed. Results at our Merchandising Systems segment could be affected by sustained low employment levels, office occupancy rates and factors affecting vending operator profitability such as higher fuel, food and equipment financing costs; results could also be impacted by unforeseen advances in payment processing technologies.

We could face potential product liability or warranty claims, we may not accurately estimate costs related to such claims, and we may not have sufficient insurance coverage available to cover such claims.

Our products are used in a wide variety of commercial applications and certain residential applications. We face an inherent business risk of exposure to product liability or other claims in the event our products are alleged to be defective or that the use of our products is alleged to have resulted in harm to others or to property. We may in the future incur liability if product liability lawsuits against us are successful. Moreover, any such lawsuits, whether or not successful, could result in adverse publicity to us, which could cause our sales to decline.

In addition, consistent with industry practice, we provide warranties on many of our products and we may experience costs of warranty or breach of contract claims if our products have defects in manufacture or design or they do not meet contractual specifications. We estimate our future warranty costs based on historical trends and product sales, but we may fail to accurately estimate those costs and thereby fail to establish adequate warranty reserves for them. We maintain insurance coverage to protect us against product liability claims, but that coverage may not be adequate to cover all claims that may arise or we may not be able to maintain adequate insurance coverage in the future at an acceptable cost. Any liability not covered by insurance or that exceeds our established reserves could materially and adversely impact our financial condition and results of operations.

We may be unable to improve productivity, reduce costs and align manufacturing capacity with customer demand. We are committed to continuous productivity improvement and continue to evaluate opportunities to reduce costs, simplify or improve global processes, and increase the reliability of order fulfillment and satisfaction of customer needs. In order to operate more efficiently and control costs, from time to time we execute restructuring activities, which include workforce reductions and facility consolidations. For example, in 2012, the Company recorded pre-tax restructuring and related charges of \$20.6 million associated with repositioning actions which improved profitability in 2013, primarily in the European portion of the Fluid Handling segment. However, our failure to respond to potential declines in global demand for our products and services and properly align our cost base would have an adverse effect on our financial condition, results of operations and cash flow.

We may be unable to successfully develop and introduce new products, which would limit our ability to grow and maintain our competitive position and adversely affect our financial condition, results of operations and cash flow. Our growth depends, in part, on continued sales of existing products, as well as the successful development and introduction of new products, which face the uncertainty of customer acceptance and reaction from competitors. Any delay in the development or launch of a new product could result in our not being the first to market, which could compromise our competitive position. Further, the development and introduction of new products may require us to make investments in specialized personnel and capital equipment, increase marketing efforts and reallocate resources away from other uses. We also may need to modify our systems and strategy in light of new products that we develop. If we are unable to develop and introduce new products in a cost-effective manner or otherwise manage effectively the operations related to new products, our results of operations and financial condition could be adversely impacted.

Pension expense and pension contributions associated with the Company's retirement benefit plans may fluctuate significantly depending upon changes in actuarial assumptions and future market performance of plan assets.

A significant portion of our current and retired employee population is covered by pension and post-retirement benefit plans, the costs of which are dependent upon various assumptions, including estimates of rates of return on benefit related assets, discount rates for future payment obligations, rates of future cost growth and trends for future costs. In addition, funding requirements for benefit obligations of our pension and post-retirement benefit plans are subject to legislative and other government regulatory actions. Variances from these estimates could have an impact on our consolidated financial position, results of operations and cash flow.

We face significant competition which may adversely impact our results of operations and financial position in the future.

While we are a principal competitor in most of our markets, all of our markets are highly competitive. The competitors in many of our business segments can be expected in the future to improve technologies, reduce costs and develop and introduce new products, and the ability of our business segments to achieve similar advances will be important to our competitive positions. Competitive pressures, including those discussed above, could cause one or more of our business segments to lose market share or could result in significant price erosion, either of which could have an adverse effect on our results of operations.

We conduct a substantial portion of our business outside the United States and face risks inherent in non-domestic operations.

Net sales and assets related to our operations outside the United States were 41% in both 2013 and 2012 of our consolidated amounts. These operations and transactions are subject to the risks associated with conducting business internationally, including the risks of currency fluctuations, slower payment of invoices, adverse trade regulations and possible social, economic and political instability in the countries and regions in which we operate. In addition, we expect that non-U.S. sales will continue to account for a significant portion of our revenues for the foreseeable future. Accordingly, declines in foreign currency exchange rates, primarily the euro, the British pound, the Canadian dollar, the Japanese yen, the Mexican peso, or the Indian rupee could adversely affect our reported results, primarily in our Fluid Handling and Merchandising Systems segments, as amounts earned in other countries are translated into U.S. dollars for reporting purposes.

We are dependent on key personnel, and we may not be able to retain our key personnel or hire and retain additional personnel needed for us to sustain and grow our business as planned.

Certain of our business segments and corporate offices are dependent upon highly qualified personnel, and we generally are dependent upon the continued efforts of key management employees. We may have difficulty retaining such personnel or locating and hiring additional qualified personnel. The loss of the services of any of our key personnel or our failure to attract and retain other qualified and experienced personnel on acceptable terms could impair our ability to successfully sustain and grow our business, which could impact our results of operations in a materially adverse manner.

If our internal controls are found to be ineffective, our financial results or our stock price may be adversely affected. We believe that we currently have adequate internal control procedures in place for future periods; however, increased risk of internal control breakdowns generally exists in a business environment that is decentralized. In addition, if our internal control over financial reporting is found to be ineffective, investors may lose confidence in the reliability of our financial statements, which may adversely affect our stock price.

Failure to maintain the security of our information and technology networks, including personally identifiable and other information, non-compliance with our contractual or other legal obligations regarding such information, or a violation of the Company's privacy and security policies with respect to such information, could adversely affect us. We are dependent on information technology networks and systems, including the Internet, to process, transmit and store electronic information, and, in the normal course of our business, we collect and retain significant volumes of certain types of personally identifiable and other information pertaining to our customers, stockholders and employees. The legal, regulatory and contractual environment surrounding information security and privacy is constantly evolving and companies that collect and retain such information are under increasing attack by cyber-criminals around the world. A significant actual or potential theft, loss, fraudulent use or misuse of customer,

stockholder, employee or our data by cybercrime or otherwise, non-compliance with our contractual or other legal obligations regarding such data or a violation of our privacy and security policies with respect to such data could adversely impact our reputation and could result in costs, fines, litigation or regulatory action against us. Security breaches of this infrastructure can create system disruptions and shutdowns that could result in disruptions to our operations. We cannot be certain that advances in criminal capabilities, new discoveries in the field of cryptography or other developments will not compromise or breach the technology protecting the networks that access our products and services.

Specific Risks Relating to Our Business Segments

Aerospace & Electronics

Our Aerospace & Electronics segment is particularly affected by economic conditions in the commercial and military aerospace industries which are cyclical in nature and affected by periodic downturns that are beyond our control. Although the operating environment faced by commercial airlines generally continued to improve through 2013, uncertainty continues to exist. The principal markets for manufacturers of commercial aircraft are large commercial airlines, which could be adversely affected by a number of factors, including current and predicted traffic levels, load factors, aircraft fuel pricing, worldwide airline profits, terrorism, pandemic health issues and general economic conditions. Our commercial business is also affected by the market for business jets which could be adversely impacted by a decline in business travel due to lower corporate profitability. In addition, a portion of this segment's business is conducted under U.S. government contracts and subcontracts; therefore, a reduction in Congressional appropriations that affect defense spending or the ability of the U.S. government to terminate our contracts could impact the performance of this business. Any decrease in demand for new aircraft or equipment or use of existing aircraft and equipment will likely result in a decrease in demand of our products and services, and correspondingly, our revenues, thereby adversely affecting our business, financial condition and results of operation. Our sales to military customers are also affected by continued pressure on U.S. and global defense spending and the level of activity in military flight operations. Furthermore, due to the lengthy research and development cycle involved in bringing commercial and military products to market, we cannot predict the economic conditions that will exist when any new product is complete. In addition, if we are unable to develop and introduce new products in a cost-effective manner or otherwise manage effectively the operations related to new products, our results of operations and financial condition could be adversely impacted.

In addition, we are required to comply with various export control laws, which may affect our transactions with certain customers. In certain circumstances, export control and economic sanctions regulations may prohibit the export of certain products, services and technologies, and in other circumstances we may be required to obtain an export license before exporting the controlled item. We are also subject to investigation and audit for compliance with the requirements governing government contracts, including requirements related to procurement integrity, export control, employment practices, the accuracy of records and the recording of costs. A failure to comply with these requirements might result in suspension of these contracts and suspension or debarment from government contracting or subcontracting. Failure to comply with any of these regulations could result in civil and criminal, monetary and non-monetary penalties, fines, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation.

Engineered Materials

In our Engineered Materials segment, sales and profits could fall if there were a decline in demand or a loss in market share for products used for trucks, trailers, RVs and building product applications for which our business produces fiberglass-reinforced plastic panels. In addition, profits could also be adversely affected by further increases in resin and styrene material costs, by the loss of a principal supplier or by an inability on the part of the business to maintain product cost and functionality advantages when compared to competing materials.

Merchandising Systems

Results at our Merchandising Systems businesses could be reduced by unfavorable economic conditions, including sustained or increased levels of manufacturing unemployment and office vacancies, inflation for key raw materials and continued increases in fuel costs. Demand for most of our products and services depend on the level of new capital investment and planned maintenance expenditures by our customers. The level of capital expenditures by our customers depends in turn on general economic conditions, availability of credit and expectation of future market behavior. In addition, delays in launching or supplying new products or an inability to achieve new product sales objectives, or unfavorable changes in gaming regulations affecting certain of our CPI customers would adversely affect our profitability. Results at our foreign locations have been and will continue to be affected by fluctuations in the value of the euro, the British pound, the Japanese yen, the Mexican peso and the Canadian dollar versus the U.S.

dollar. We also may not be able to successfully integrate and realize the expected benefits of our recent acquisition of MEI.

Fluid Handling

The markets for our Fluid Handling businesses' products and services are fragmented and highly competitive. We compete against large and well established global companies, as well as smaller regional and local companies. While we compete based on technical expertise, timeliness of delivery, quality and reliability, the competitive influence of pricing has broadened as a result of the generally weaker global economy. Demand for most of our products and services depend on the level of new capital investment and planned maintenance expenditures by our customers. The level of capital expenditures by our customers depends in turn on general economic conditions, availability of credit and expectation of future market behavior. Additionally, volatility in commodity prices could negatively affect the level of these activities as could continued postponement of capital

spending decisions or the delay or cancellation of projects. While we experienced a gradual continued recovery in 2013, orders in the fourth quarter of 2013 were weaker due to project delays, which could adversely affect our future operating results.

A portion of this segment's business is subject to government rules and regulations. Failure to comply with these requirements might result in suspension or debarment from government contracting or subcontracting. Failure to comply with any of these regulations could result in civil and criminal, monetary and non-monetary penalties, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation. In addition, at our foreign operations, reported results in U.S. dollar terms could be eroded by a weakening of currency of the respective businesses, particularly where we operate using the euro, British pound, Canadian dollar, Indian rupee and Chinese yuan.

Part II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Crane Co. common stock is traded on the New York Stock Exchange ("NYSE") under the symbol CR. The following are the high and low sale prices as reported on the NYSE Composite Tape and the quarterly dividends declared per share for each quarter of 2013 and 2012.

MARKET AND DIVIDEND INFORMATION — CRANE CO. COMMON SHARES

Quarter	New York Stock Exchange Composite Price per Share				Dividends per Share	
	2013	2013	2012	2012	2013	2012
	High	Low	High	Low		
First	\$55.94	\$46.00	\$51.48	\$45.79	\$0.28	\$0.26
Second	\$59.51	\$51.43	\$49.24	\$35.30	0.28	0.26
Third	\$63.41	\$57.10	\$42.67	\$34.89	0.30	0.28
Fourth	\$67.25	\$58.72	\$46.74	\$39.99	0.30	0.28
					\$1.16	\$1.08

On December 31, 2013, there were approximately 2,559 holders of record of Crane Co. common stock.

We did not make any open-market share repurchases of our common stock during the year ended December 31, 2013.

We routinely receive shares of our common stock as payment for stock option exercises and the withholding taxes due on stock option exercises and the vesting of restricted stock awards from stock-based compensation program participants.

Item 6. Selected Financial Data.

FIVE YEAR SUMMARY OF SELECTED FINANCIAL DATA

(in thousands, except per share data)	For the year ended December 31,				
	2013	2012	2011	2010	2009
Net sales(a)	\$2,595,281	\$2,579,068	\$2,500,369	\$2,179,319	\$2,163,860
Operating profit from continuing operations(b)	347,876	310,441	36,571	233,300	209,849
Interest expense	(26,460)	(26,831)	(26,255)	(26,841)	(27,139)
Income from continuing operations before taxes(a)(b)	326,016	284,605	14,761	209,067	186,506
Provision (benefit) for income taxes(c)	105,065	88,416	(8,055)	56,087	51,399
Income from continuing operations	220,951	196,189	22,816	152,980	135,107

Net income attributable to common shareholders	3.79	3.78	0.45	2.63	2.29
Earnings (loss) per diluted share(c) *					
Income from continuing operations attributable to common shareholders	3.73	3.35	0.38	2.57	2.29
Discontinued operations, net of tax	—	0.37	0.06	0.02	(0.02)
Net income attributable to common shareholders	3.73	3.72	0.44	2.59	2.28
Cash dividends per common share	1.16	1.08	0.98	0.86	0.80
Total assets	3,559,607	2,889,878	2,843,531	2,706,697	2,712,898
Long-term debt	749,170	399,092	398,914	398,736	398,557
Accrued pension and postretirement benefits	151,133	233,603	178,382	98,324	141,849
Long-term asbestos liability	610,530	704,195	792,701	619,666	730,013
Long-term insurance receivable — asbestos	148,222	171,752	208,952	180,689	213,004

(a) Includes \$18,880 from the Boeing and GE Aviation LLC settlement related to our brake control systems in 2009.

Includes i) acquisition related inventory and backlog amortization of \$4,654 in 2013, ii) acquisition related transaction costs of \$22,765, \$3,874 and \$1,276 in 2013, 2012 and 2010, respectively, iii) restructuring and related charges of \$20,632, \$6,676 and \$5,243 in 2012, 2010 and 2009, respectively, iv) an asbestos provision, net of insurance recoveries, of \$241,647 in 2011, v) environmental provisions of \$30,327 in 2011, vi) \$16,360 of income from the above-mentioned settlement related to our brake control systems in 2009, and vii) a charge of \$7,250 related to a lawsuit settlement in connection with our fiberglass-reinforced plastic material in 2009.

Includes the tax effect of items cited in note (b) as well as \$2,892 withholding taxes related to acquisition funding and a \$2,006 gain on sale of product line in 2013, a \$5,625 tax benefit caused by the reinvestment of non-U.S. earnings associated with the acquisition of Money Controls in 2010 and a \$5,238 tax benefit related to a divestiture in 2009.

(d) Includes a \$19,176 gain on divestiture, net of tax, in 2012.

* EPS amounts may not add due to rounding.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes included under Item 8 of this Annual Report on Form 10-K. Beginning in the first quarter of 2013, the Controls segment (consisting of the Barksdale and Crane Environmental businesses) is now included in the Fluid Handling segment. Prior period amounts have been reclassified to the new reporting structure for comparative purposes.

We are a diversified manufacturer of highly engineered industrial products. Our business consists of four segments: Aerospace & Electronics, Engineered Materials, Merchandising Systems and Fluid Handling. Our primary markets are aerospace, defense electronics, non-residential construction, recreational vehicle ("RV"), transportation, automated payment and merchandising, chemical, pharmaceutical, oil, gas, power, nuclear, building services and utilities. Our strategy is to grow the earnings of niche businesses with leading market shares, acquire companies that fit strategically with existing businesses, aggressively pursue operational and strategic linkages among our businesses, build a performance culture focused on continuous improvement and a committed management team whose interests are directly aligned with those of the shareholders and maintain a focused, efficient corporate structure.

Items Affecting Comparability of Reported Results

The comparability of our operating results from continuing operations for the years ended December 31, 2013, 2012 and 2011 is affected by the following significant items:

Acquisition-Related Costs

During 2013, we recorded the following costs associated with the acquisition of MEI: 1) pre-tax transaction costs of \$22.8 million, 2) pre-tax inventory step-up and backlog amortization of \$4.7 million and 3) withholding taxes of \$2.9 million related to cash marshaling activities supporting payment for the acquisition. During 2012, we recorded pre-tax transaction costs associated with the acquisition of MEI of \$3.9 million.

Gain on Sale of Product Line

In 2013, as part of the execution of regulatory remedies associated with the MEI acquisition, we sold a product line, which was formerly part of our Merchandising Systems segment, to Suzo-Happ Group for \$6.8 million and recorded a \$2 million gain. Sales of this product line were \$15.1 million in 2013.

Restructuring and Related Costs

In 2012, we recorded pre-tax restructuring charges and related costs of \$20.6 million, of which \$18.5 million was associated with repositioning actions designed to improve profitability beginning in 2013, primarily in the European portion of the Fluid Handling segment. Included in the repositioning actions are \$2.0 million of non-cash charges related to the completion of previous restructuring actions.

Asbestos Charge

With the assistance of Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the field, effective as of December 31, 2011, we updated and extended our estimate of the asbestos liability, including the costs of settlement or indemnity payments and defense costs relating to currently pending claims and future claims projected to be filed against us through 2021. Our previous estimate was for asbestos claims filed or projected to be filed through 2017. As a result of this updated estimate, we recorded an additional liability of \$285 million as of December 31, 2011. Our decision to take this action at such date was based on several factors which contribute to our ability to reasonably estimate this liability for the additional period noted, as follows:

The number of mesothelioma claims (which, although constituting approximately 8% of our total pending asbestos claims, have accounted for approximately 90% of our aggregate settlement and defense costs) being filed against us and associated settlement costs have recently stabilized. In our opinion, the outlook for mesothelioma claims expected to be filed and resolved in the forecast period is reasonably stable.

There have been favorable developments in the trend of case law, which has been a contributing factor in stabilizing the asbestos claims activity and related settlement costs.

There have been significant actions taken by certain state legislatures and courts over the past several years that have reduced the number and types of claims that can proceed to trial, which has been a significant factor in stabilizing the asbestos claims activity.

We have now entered into coverage-in-place agreements with almost all of our excess insurers, which enable us to project a more stable relationship between settlement and defense costs paid by us and reimbursements from our insurers.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Taking all of these factors into account, we believe that we can continue to reasonably estimate the asbestos liability for pending claims and future claims to be filed through 2021. While it is probable that we will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, we continue to believe that no such amount can be reasonably estimated beyond 2021. Accordingly, no accrual has been recorded for any costs which may be incurred for claims which may be made subsequent to 2021. The liability was \$699 million and \$796 million, offset in part by a corresponding insurance receivable of \$171 million and \$205 million, as of December 31, 2013 and 2012, respectively.

Environmental Charge

For environmental matters, the Company records a liability for estimated remediation costs when it is probable that the Company will be responsible for such costs and they can be reasonably estimated. Generally, third party specialists assist in the estimation of remediation costs. The environmental remediation liability as of December 31, 2013 and 2012 is substantially related to the former manufacturing site in Goodyear, Arizona (the "Goodyear Site") discussed below.

The Goodyear Site was operated by UniDynamics/Phoenix, Inc. ("UPI"), which became an indirect subsidiary of the Company in 1985 when the Company acquired UPI's parent company, UniDynamics Corporation. UPI manufactured explosive and pyrotechnic compounds at the Goodyear Site, including components for critical military programs, from 1962 to 1993, under contracts with the U.S. Department of Defense and other government agencies and certain of their prime contractors. No manufacturing operations have been conducted at the Goodyear Site since 1994. The Goodyear Site was placed on the National Priorities List in 1983, and is now part of the Phoenix-Goodyear Airport North Superfund Goodyear Site. In 1990, the EPA issued administrative orders requiring UPI to design and carry out certain remedial actions, which UPI has done. On July 26, 2006, the Company entered into a consent decree with the EPA with respect to the Goodyear Site providing for, among other things, a work plan for further investigation and remediation activities at the Goodyear Site. The remediation activities have changed over time due in part to the changing groundwater flow rates and contaminant plume direction, and required changes and upgrades to the remediation equipment in operation at the Goodyear Site. These changes have resulted in the Company revising its liability estimate from time to time. As of December 31, 2010, the liability was \$53.8 million. During the fourth quarter of 2011, additional remediation activities were determined to be required, in consultation with our advisors, to further address the migration of the contaminant plume. As a result, we recorded a charge of \$30 million during the fourth quarter of 2011, extending the accrued costs through 2016. It is not possible at this point to reasonably estimate the amount of any obligation in excess of our current accruals through the 2016 forecast period because of the aforementioned uncertainties, in particular, the continued significant changes in the Goodyear Site conditions and additional expectations of remediation activities experienced in recent years. As of December 31, 2013 and 2012, the liability was \$33 million and \$50 million, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results From Continuing Operations — For the Years Ended December 31, 2013, 2012 and 2011

(in millions, except %)	For the year ended December 31,			2013 vs 2012		2012 vs 2011

* The disclosure of total segment operating profit and total segment operating profit margin provides supplemental information to assist management and investors in analyzing our profitability but is considered a non-GAAP financial measure when presented in any context other than the required reconciliation to operating profit in accordance with ASC 280 "Disclosures about Segments of an Enterprise and Related Information." Management believes that the disclosure of total segment operating profit and total segment operating profit margin, non-GAAP financial measures, present additional useful comparisons between current results and results in prior operating periods, providing investors with a clearer view of the underlying trends of the business. Management also uses these non-GAAP financial measures in making financial, operating, planning and compensation decisions and in evaluating our performance. Non-GAAP financial measures, which may be inconsistent with

similarly captioned measures presented by other companies, should be viewed in addition to, and not as a substitute for, our reported results prepared in accordance with GAAP.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2013 compared with 2012

Sales in 2013 increased \$16 million, or 1%, to \$2.595 billion compared with \$2.579 billion. The sales increase was driven by an increase in core business sales of \$1 million and a net increase in revenue from acquisitions and dispositions of \$25 million, partially offset by unfavorable foreign exchange of \$9 million. In our Engineered Materials segment, sales increased \$16 million, reflecting \$20 million of higher sales to RV manufacturers, partially offset by \$2 million of lower sales to our transportation-related customers, \$1 million of lower sales to our international customers and \$1 million of lower sales to our building product customers. Merchandising Systems segment revenue increased \$9 million, or 2%, in 2013 reflecting an increase in sales of \$25 million related to the acquisition of MEI and \$12 million of higher sales from our Payment Solution business, partially offset by \$27 million of lower sales from our Vending Solutions business and \$2 million of unfavorable foreign exchange. Our Aerospace & Electronics segment reported a sales decrease of \$7 million, or 1%. Our Aerospace Group had a 1% sales decrease in 2013 compared to the prior year, reflecting \$12 million of lower aftermarket product sales, partially offset by \$10 million of higher original equipment manufacturer ("OEM") sales. The Electronics Group experienced a \$5 million sales decrease, or 2%, due to lower sales of our Microwave and Power Solutions products for military and defense applications. Our Fluid Handling segment reported a sales decrease of \$0.8 million, primarily reflecting a \$19 million decrease in Crane Supply, partially offset by an increase of \$16 million in our Crane Valve Group driven by strength in the power and nuclear end markets, partially offset by weakness in our chemical business. In addition, sales in our Crane Pumps and Systems business increased by \$5 million driven by share gains.

Total segment operating profit increased \$49 million, or 13%, to \$424 million in 2013 compared to \$375 million in 2012. The increase in segment operating profit over the prior year was driven by increases in operating profit in all segments. Our Fluid Handling segment operating profit was \$34 million, or 21% higher in 2013 compared to the prior year; our Engineered Materials segment operating profit was \$10 million, or 40% higher in 2013 compared to the prior year; our Aerospace & Electronics segment operating profit was \$4 million, or 3% higher in 2013 compared to the prior year and our Merchandising Systems segment was \$1 million, or 3.1%, higher in 2013 compared to prior year. The Fluid Handling operating profit increase primarily reflects the absence of repositioning charges of \$13 million recorded in 2012 and \$10 million of repositioning savings realized in 2013. The primary drivers of the increase in our Engineered Materials segment operating profit were \$5 million from higher sales, the absence of a \$2 million repositioning charge taken in 2012 and \$4 million of repositioning savings realized in 2013. Productivity gains related to improving material yield coupled with targeted pricing actions offset higher raw material costs (primarily resin and styrene). The improvement in the Aerospace & Electronics segment operating profit primarily reflected productivity gains and solid cost management. The operating profit increase in our Merchandising Systems segment is primarily due to the impact of the higher sales in our legacy Payment Solutions business, productivity gains of \$8 million driven by focused efforts to reduce material costs across the business, the absence of repositioning charges recorded in 2012 of \$4 million and \$2 million of repositioning savings realized in 2013. These favorable changes were partially offset by a \$6 million impact from the lower sales volume, acquisition and transaction related costs and unfavorable mix in our Vending business. Total segment operating margins increased to 16.3% in 2013 compared to 14.6% in 2012.

2012 compared with 2011

Sales in 2012 increased \$79 million, or 3%, to \$2.579 billion compared with \$2.500 billion in 2011. The sales increase was driven by an increase in core business sales of \$105 million (4%) and a net increase in revenue from acquisitions and dispositions of \$12 million (1%), partially offset by unfavorable foreign exchange of \$38 million (2%). Our Aerospace & Electronics segment reported a sales increase of \$24 million, or 3%. Our Aerospace Group had a 5% sales increase in 2012 compared to the prior year, reflecting \$15 million of higher OEM and \$5 million of higher aftermarket product sales. The Electronics Group experienced a \$4 million increase in sales, or 1%, due to higher core sales of our Microwave and Power Solutions products. In our Engineered Materials segment, sales decreased 2%, reflecting \$7 million of lower sales to our transportation-related customers and \$5 million of lower sales to our international customers, partially offset by \$8 million of higher sales to RV manufacturers. Merchandising Systems

segment revenue decreased 1% in 2012 reflecting \$6 million of unfavorable foreign exchange partially offset by \$4 million of higher core sales from our Payment and Vending Solutions businesses. Our Fluid Handling segment reported a core sales increase of \$73 million, or 6%, primarily reflecting sales growth of \$49 million in our Crane ChemPharma & Energy Flow Solutions business due to strong demand in the North America chemical industry as well as \$34 million of higher sales in our Crane Supply business resulting from increases in commercial construction and mining activity in Canada, partially offset by \$11 million of lower sales in our Building Services and Utilities business driven primarily by a softer commercial building construction end market in the United Kingdom and Europe.

Total segment operating profit increased \$9 million, or 2%, to \$375 million in 2012 compared to \$367 million in 2011. Total segment operating profit in 2012 included \$20.6 million of restructuring and related charges. Reflecting these charges, total segment operating margins decreased to 14.6% in 2012 compared to 14.7% in 2011.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The increase in segment operating profit over the prior year was driven by increases in operating profit in our Aerospace & Electronics and Merchandising Systems, partially offset by decreases in our Engineered Materials and Fluid Handling segments. Our Aerospace & Electronics operating profit was \$10 million, or 7% higher in 2012, compared to the prior year; our Merchandising Systems segment was \$3 million, or 11% higher in 2011, compared to the prior year; our Engineered Materials segment was \$5 million, or 18% lower in 2012, compared to the prior year and our Fluid Handling segment was relatively flat compared to the prior year. The improvement in the Aerospace & Electronics segment operating profit primarily reflected \$9 million of leverage on the higher sales volume. The operating profit increase in our Merchandising Systems segment is primarily due to \$4 million of productivity gains, the absence of a \$1.7 million non-recurring purchase accounting charge associated with our Money Controls acquisition in 2011 and a \$3 million impact from the higher sales volume, partially offset by \$4 million of restructuring and related charges recorded in the second quarter of 2012, and the costs to settle a lawsuit in the first quarter of 2012. Operating profit in our Engineered Materials segment decreased due to \$2 million in lower sales, \$3 million of higher raw material costs and \$4 million of restructuring and related charges, largely offset by \$4 million of effective cost controls. Fluid Handling segment's operating profit primarily reflected \$13 million of restructuring and related charges and \$1 million of unfavorable foreign exchange, partially offset by \$14 million of leverage from the higher core sales, which included higher manufacturing costs in certain European manufacturing operations.

Results From Discontinued Operations — For the Years Ended December 31, 2013, 2012 and 2011

(in millions)	2013	2012	2011
Income from Continuing Operations	\$221	\$196	\$23
Discontinued Operations:			
Income from Discontinued Operations, net of tax	—	2	4
Gain from Sales of Discontinued Operations, net of tax	—	19	—
Discontinued Operations, net of tax	—	22	4
Net income before allocation to noncontrolling interests	\$221	\$218	\$27
Net income attributable to common shareholders	\$220	\$217	\$26

For the years 2013, 2012 and 2011, we reported two divested businesses as discontinued operations on our Statements of Operations. The sale of Azonix in 2012 resulted in an after-tax gain of \$14.5 million. Azonix had sales of \$17.1 million and \$31.7 million and pre-tax profit from operations of \$2.4 million and \$3.4 million and in 2012 and 2011, respectively. The sale of our valve service center in Houston, Texas in 2012 resulted in an after-tax gain of \$4.6 million. Our valve service center in Houston, Texas, had sales of \$8.4 million, and \$13.8 million and pre-tax profit from operations of \$1.3 million and \$2.3 million and in 2012 and 2011, respectively. There were no sales reported in 2013 for Azonix or our valve service center in Houston, Texas.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

AEROSPACE & ELECTRONICS

(in millions, except %)	2013	2012	2011	
Net Sales	\$694	\$701	\$678	
Operating Profit	160	156	146	
Assets	512	510	514	
Operating Margin	23.1	% 22.2	% 21.5	%

2013 compared with 2012. Sales of our Aerospace & Electronics segment decreased \$7 million, or 1%, in 2013 to \$694 million, reflecting sales decreases of \$2 million and \$5 million in our Aerospace Group and Electronics Group, respectively. The Aerospace & Electronics segment's operating profit increased \$4 million, or 3%, in 2013. The increase in operating profit was due to a \$5 million increase in operating profit in the Aerospace Group, partially offset by a \$1 million decrease in the Electronics Group. The operating margin for the segment was 23.1% in 2013 compared to 22.2% in 2012. Backlog was \$361 million at December 31, 2013, a decrease of 4% from \$378 million at December 31, 2012.

Aerospace Group sales in 2013 by the four solution sets were as follows: Landing Systems, 33%; Sensing and Utility Systems, 35%; Fluid Management, 22%; and Cabin Systems, 10%. The commercial market accounted for 81% of Aerospace Group sales in 2013, while sales to the military market were 19% of total Aerospace Group sales. During 2013, sales to OEMs and aftermarket customers were 62% and 38%, respectively.

Aerospace Group sales decreased \$2 million, or 1%, from \$437 million in 2012 to \$435 million in 2013. The decrease was largely attributable to a \$12 million, or 7%, decline in aftermarket product sales, partially offset by a \$10 million, or 4%, increase in OEM product sales. The aftermarket product sales decrease primarily reflects a decline in military aftermarket sales of \$13 million, or 25%, partially offset by an increase in commercial aftermarket sales of \$1 million, or 1%. The decrease in military aftermarket sales was primarily driven by lower modernization and upgrade ("M&U") product sales reflecting the completion in 2012 of a carbon brake control upgrade program for the U.S. Air Force C-130 aircraft which accounted for \$12 million of sales in 2012. The higher OEM sales were primarily due to the higher commercial product sales associated with large commercial transport and business jets, both of which have benefited from increased passenger air travel and higher air cargo volumes.

Aerospace Group operating profit increased \$5 million, or 4%, over the prior year, primarily due to productivity gains and solid cost management including \$4 million of lower pension expense, as well as \$5 million of lower engineering spending resulting in part from the timing of certain development programs, partially offset by the impact of the lower sales volume and the unfavorable OEM and aftermarket product mix. Engineering expense will increase or decrease depending on the nature and timing of program wins requiring engineering resources. Aerospace engineering expense was \$32 million, or 7% of sales in 2013 compared to 8% in 2012.

Electronics Group sales by market in 2013 were as follows: military/defense, 53% and commercial aerospace, 47%. Sales in 2013 by the Group's solution sets were as follows: Power, 64%; Microwave Systems, 26%; and Microelectronics, 10%.

Electronics Group sales decreased 2% from \$264 million in 2012 to \$259 million in 2013. The decrease in core sales reflects lower sales of our Microwave and Power Solutions products, partially offset by an increase in Microelectronic product sales. The decrease in Microwave and Power Solutions product sales primarily reflects delays and lower demand in defense-related programs. The increase in Microelectronics product sales reflects higher sales to medical device customers, driven by increased end user demand for implantable devices.

Electronics Group operating profit decreased \$1 million, or 3%, over the prior year reflecting a \$3 million unfavorable sales mix shift toward engineering sales targeted on new programs and medical device sales, both of which are sold at lower margins, and a \$2 million impact on the lower sales volume, partially offset by certain cost reductions.

2012 compared with 2011. Sales of our Aerospace & Electronics segment increased \$24 million, or 3%, in 2012 to \$701 million, reflecting sales increases of \$20 million and \$4 million in our Aerospace Group and Electronics Group, respectively. The Aerospace & Electronics segment's operating profit increased \$10 million, or 7%, in 2012. The increase in operating profit was due to a \$15 million increase in operating profit in the Aerospace Group and \$5 million decrease in the Electronics Group. The operating margin for the segment was 22.2% in 2012 compared to

21.5% in 2011. Backlog was \$378 million at December 31, 2012, a decrease of 8% from \$411 million at December 31, 2011.

Aerospace Group sales in 2012 by the four solution sets were as follows: Landing Systems, 34%; Sensing and Utility Systems, 33%; Fluid Management, 23%; and Cabin Systems, 10%. The commercial market accounted for 78% of Aerospace Group sales in 2012, while sales to the military market were 22% of total Aerospace Group sales. During both 2012 and 2011, sales to OEMs and aftermarket customers were 59% and 41%, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Aerospace Group sales increased 5% from \$417 million in 2011 to \$437 million in 2012. The increase in 2012 was due to higher OEM sales which increased \$15 million, or 6%, to \$260 million in 2012 from \$246 million in 2011, primarily due to higher commercial product sales associated with large commercial transport and business jets, both of which have benefited from increased passenger air travel and higher air cargo volumes. In addition, the sales increase was attributable to higher aftermarket product sales which increased \$5 million, or 3%, to \$177 million in 2012 from \$172 million in 2011 primarily due to higher M&U products sales, and, to a lesser extent, higher repair and overhaul sales. M&U product sales in 2011 and 2012 included approximately \$12 million related to a carbon brake upgrade program for the U.S. Air Force C-130 aircraft. The C-130 upgrade program was completed in the fourth quarter of 2012.

Aerospace Group operating profit increased 14% over the prior year, primarily due to \$8 million of lower engineering expense resulting from the completion of certain development programs and \$7 million from the leverage on higher sales volume. Aerospace engineering expense was about 8% of sales in 2012 versus 11% in 2011. Total engineering expense for the Aerospace Group was \$36 million in 2012 compared to \$44 million in 2011. Engineering expense will increase or decrease from time-to-time depending on the timing of program wins and the nature and amount of required engineering resources.

Electronics Group sales by market in 2012 were as follows: military/defense, 58%; commercial aerospace, 25%; and other, 17%. Sales in 2012 by the Group's solution sets were as follows: Power, 64%; Microwave Systems, 26%; and Microelectronics, 10%.

Electronics Group sales increased 1% from \$261 million in 2011 to \$264 million in 2012. The slight core sales increase reflects higher sales of our Microwave and Power Solutions products, partially offset by lower sales of our Microelectronics Solutions products. The increase in Power Solutions product sales reflects an increase in demand from the defense and space markets, which have been an area of continued investment on behalf of the U.S. government, primarily in the surveillance and reconnaissance end markets. The decrease in Microelectronics product sales reflects lower sales to medical device customers as a result of lower levels of their end products sales.

Electronics Group operating profit decreased 11% over the prior year reflecting \$2 million of unfavorable sales mix shift toward engineering sales targeted on new programs and medical device sales, both of which are sold at lower margins, and \$3 million of higher manufacturing costs, partially offset by \$1 million from the impact of the higher sales volume.

ENGINEERED MATERIALS

(in millions, except %)	2013	2012	2011	
Net Sales	\$232	\$217	\$220	
Operating Profit	34	25	30	
Restructuring and Related Charges*	—	4	—	
Assets	233	237	245	
Operating Margin	14.8	% 11.3	% 13.5	%

* The restructuring and related charges are included in operating profit and operating margin.

2013 compared with 2012. Engineered Materials sales increased by \$16 million to \$232 million in 2013, from \$217 million in 2012. Operating profit of \$34 million in 2013 increased \$10 million in 2013 compared to 2012. Operating margins were 14.8% in 2013 compared with 11.3% in 2012.

Sales increased \$16 million, or 7%, reflecting higher sales to our RV customers, partially offset by lower sales to our transportation-related, international and building products customers. We experienced a \$20 million, or 22%, sales increase to our traditional RV manufacturers reflecting higher demand for our RV-related applications as RV OEM build rates remained strong throughout 2013, with strength in both dealer and retail demand. We believe this to be in direct response to increased consumer confidence in North America as the U.S. economy continues to recover. Sales to our building product customers decreased \$1 million, or 1%, reflecting continued soft commercial construction markets. Sales to our transportation-related customers decreased by \$2 million, or 6%, reflecting soft markets and difficult competitive conditions. Sales to our international customers decreased by \$1 million, or 10%, primarily due to softness in Europe.

Operating profit in our Engineered Materials segment increased \$10 million, or 40%. The primary drivers of this increase were \$5 million from the higher sales, the absence of a \$4 million repositioning charge taken in 2012 and \$2 million of repositioning savings realized in 2013. Productivity gains related to improving material yield coupled with targeted pricing actions offset higher raw material costs (primarily resin and styrene).

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2012 compared with 2011. Engineered Materials sales decreased by \$4 million to \$217 million in 2012, from \$220 million in 2011. Operating profit of \$25 million in 2012 decreased \$5 million compared to 2011. Operating margins were 11.3% in 2012 compared with 13.5% in 2011.

Sales decreased \$4 million, or 2%, reflecting lower sales to our domestic transportation-related and international customers, partially offset by higher sales to RV manufacturers. We experienced an \$8 million, or 10%, sales increase to our traditional RV manufacturers reflecting an increase in demand for our RV related applications as RV OEM build rates improved, with strength in both dealer and retail demand in the second half of 2012. We believe this to be in direct response to increased consumer confidence in North America as the U.S. economy continued to recover. In addition, sales to our building product customers were flat, reflecting soft commercial construction markets. Sales to our transportation-related customers decreased by \$7 million, or 16%, due to difficult competitive conditions. Sales to our international customers decreased by \$5 million, or 30%, partly due to softness in the European market and the closure of a small manufacturing facility in the United Kingdom.

Operating profit in our Engineered Materials segment decreased \$5 million, or 18%. The primary drivers of this decline were \$2 million from lower sales, \$3 million related to higher raw material costs, reflecting rising prices for our primary raw materials (resin and styrene), and restructuring and related charges of \$4 million recorded in 2012 (\$1 million was related to the write-down of inventory resulting from the closure of a product line). These unfavorable changes were partially offset by effective cost management efficiencies of \$4 million, which were largely related to material productivity gains as we improved material yield rates in our manufacturing processes. Our restructuring and related actions include the closure of the aforementioned manufacturing facility in the United Kingdom, which had total sales of \$8 million in 2011.

MERCHANDISING SYSTEMS

(in millions, except %)

	2013	2012	2011	
Net Sales	\$381	\$372	\$374	
Operating Profit	35	34	30	
Restructuring and Related Charges*	—	4	—	
Assets	1,383	409	409	
Operating Margin	9.1	% 9.1	% 8.1	%

* The restructuring and related charges are included in operating profit and operating margin.

2013 compared with 2012. Merchandising Systems sales increased by \$9 million from \$372 million in 2012 to \$381 million in 2013. Operating profit increased by \$1 million from \$34 million in 2012 to \$35 million in 2013. Operating margins were 9.1% in both 2013 and 2012.

Sales increased \$9 million, or 2%, including sales from the acquisition of MEI of \$25 million, or 7%, partially offset by a core sales decline of \$14 million, or 4%, and unfavorable foreign currency translation of \$2 million, or 1%. The decrease in core sales reflected lower sales in our Vending Solutions businesses, partially offset by higher sales in our legacy Payment Solutions business. Sales decreased in our Vending Solutions business reflecting lower capital spending by certain U.S. bottler customers, as well as, continued weak market conditions in Europe. Sales increased in our legacy Payment Solutions business reflecting higher sales in the retail, vending, transportation and casino gaming vertical markets. The increase in the retail market was driven by higher sales to self check-out OEM customers. The increase in the vending market was driven primarily by share gains, particularly in Europe and Asia. The increase in the transportation market was driven by share gains in the mass transit market. The increase in casino gaming was due to higher sales to key gaming OEM customers resulting from improving casino operations, primarily in the U.S. Operating profit of \$35 million increased 3% in 2013 compared to 2012. The operating profit increase was primarily driven by productivity gains of \$8 million, the absence of repositioning charges recorded in 2012 of \$4 million and \$2 million of repositioning savings realized in 2013. These favorable changes were partially offset by a \$6 million impact from the lower core sales, acquisition-related costs, which included inventory step-up and backlog amortization of \$5 million and transaction-related costs of \$1 million, and unfavorable mix in our Vending business.

2012 compared with 2011. Merchandising Systems sales decreased by \$2 million from \$374 million in 2011 to \$372 million in 2012. Operating profit increased by \$3 million from \$30 million in 2011 to \$34 million in 2012. Operating

profit included restructuring and related charges of \$4 million in 2012. Operating margins were 9.1% in 2012 compared with 8.1% in 2011.

Sales decreased \$2 million, or 1%, compared to the prior year, including unfavorable foreign currency translation of \$6 million, or 2%, partially offset by a core sales increase of \$4 million, or 1%. The increase in core sales reflected higher sales in our Vending Solutions businesses, particularly to bottlers. We also experienced higher core sales in our Payment Innovations

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

business reflecting higher volume in the both the vending and retail vertical end markets. The increase in the vending market was driven primarily by share gains in Europe. The increase in the retail market was driven by higher sales to self check-out OEM customers, reflecting their increased share gains at key target retail accounts.

Operating profit of \$34 million increased 11% in 2012 compared to 2011. The operating profit increase is primarily due to \$4 million in productivity gains, driven by focused efforts to reduce material and headcount costs in our North American Vending business. Also contributing to the change was the absence of a \$1.7 million non-recurring purchase accounting charge associated with our Money Controls acquisition in 2011 and the \$3 million impact of higher sales volume in our vending and retail vertical markets in our Payment Innovations business, partially offset by \$4 million of restructuring and related charges recorded in 2012 as well as, to a lesser extent, costs to settle a lawsuit in 2012.

FLUID HANDLING

(in millions, except %)	2013	2012	2011	
Net Sales	\$1,289	\$1,289	\$1,229	
Operating Profit	195	161	161	
Restructuring and Related Charges*	—	13	—	
Assets	996	993	973	
Operating Margin	15.1	% 12.5	% 13.1	%

* The restructuring and related charges are included in operating profit and operating margin.

2013 compared with 2012. Fluid Handling sales were lower by \$0.8 million compared to the prior year. Operating profit increased by \$34 million from \$161 million in 2012 to \$195 million in 2013. Operating profit in 2012 included restructuring charges of \$13 million. Operating margins were 15.1% in 2013 compared with 12.5% in 2012.

Sales decreased \$0.8 million, driven by unfavorable foreign currency translation of \$7.6 million, partially offset by a core sales increase of \$6.8 million. Backlog was \$334 million at December 31, 2013, a decrease of 3% from \$343 million at December 31, 2012.

Crane Valve Group ("Valve Group") includes the following businesses: Crane ChemPharma & Energy Flow Solutions, Building Services & Utilities and Valve Services. Valve Group sales increased 2% to \$904 million in 2013 from \$888 million in 2012, including a core sales increase of \$17 million, or 2%, partially offset by unfavorable foreign currency translation of \$2 million, as both the British pound and Indian rupee weakened against the U.S. dollar. The increase in core sales was driven by higher sales in our Valve Services business, reflecting an increased number of nuclear outages when compared to 2012, and moderately higher volumes in our Building Services & Utilities business, primarily reflecting an improving commercial building construction end market in the United Kingdom. The Crane ChemPharma & Energy Flow Solutions business experienced a slight decrease in core sales, primarily driven by project delays and lower investments in downstream chemical applications for our severe service valves.

Crane Pumps & Systems sales increased 6% to \$89 million in 2013 from \$83 million in 2012, with market growth and share gains in the municipal, residential and industrial markets. Share gains were driven by new product introductions as well as expanding channel access for existing products.

Crane Supply revenue decreased 9% to \$205 million in 2013 from \$224 million in 2012 due to \$13 million of lower sales volume reflecting softer commercial construction and mining markets in Canada and \$6 million of unfavorable foreign exchange as the Canadian dollar weakened against the U.S. dollar.

Barksdale sales decreased \$2 million, or 2%, reflecting a decline in demand for our industrial and hazardous products, driven by weaker end market conditions.

Fluid Handling operating profit increased \$34 million, or 21%, compared to 2012, primarily reflecting the absence of repositioning charges of \$13 million recorded in 2012, \$10 million of repositioning savings realized in 2013, and the impact of higher pricing.

2012 compared with 2011. Fluid Handling sales increased by \$61 million from \$1.229 billion in 2011 to \$1.289 billion in 2012. Operating profit was flat in 2012 compared to 2011. Operating profit in 2012 included restructuring charges of \$13 million. Operating margins were 12.5% in 2012 compared with 13.1% in 2011.

Sales increased \$61 million, or 5%, including a core sales increase of \$80 million, or 6%, and an increase in sales from the acquisition of W.T. Armatur GmbH & Co. KG (“WTA”) of \$12 million, or 1%, partially offset by unfavorable foreign currency

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

translation of \$31 million, or 3%. Backlog was \$343 million at December 31, 2012, an increase of 1% from \$341 million at December 31, 2011.

Valve Group sales increased 3% to \$888 million in 2012 from \$864 million in 2011, including a core sales increase of \$39 million, or 5%, and an increase in sales from the acquisition of WTA of \$12 million, or 1%, partially offset by unfavorable foreign currency translation of \$26 million, or 3%, as both the euro and the British pound weakened against the U.S. dollar. The Crane ChemPharma & Energy Flow Solutions business experienced a significant increase in core sales of \$49 million reflecting strong demand in the North America chemical industry, primarily reflecting higher investment in downstream chemical applications, as well as targeted price increases, partially offset by the aforementioned unfavorable foreign exchange and weaker end markets in Europe. Building Services & Utilities core sales decreased \$11 million, driven by a decline in volume, primarily reflecting a softer commercial building construction end market in the United Kingdom and weaker end markets in Europe and, to a lesser extent, unfavorable foreign exchange.

Crane Pumps & Systems sales of \$83 million were flat in 2012 compared to 2011, with market declines in both the residential and municipal markets being offset by share gain initiatives in the commercial building and municipal market. Share gains were driven by new product introductions as well as expanding channel access for existing products.

Crane Supply revenue increased \$30 million to \$224 million, or 15%, in 2012, from \$194 million in 2011 due to \$35 million of higher sales volume reflecting strong market growth in commercial construction starts in Canada and, to a lesser extent, increased mining activity, partially offset by unfavorable foreign exchange as the Canadian dollar weakened against the U.S. dollar.

Barksdale sales increased \$4 million, or 6%, in 2012 compared with 2011. The sales increase reflects improvement in transportation and oil and gas related demand.

Fluid Handling operating profit was relatively flat compared to 2011. On the \$80 million of higher core growth reference above, approximately \$19 million of operating profit was generated, which included higher than expected manufacturing costs in certain European manufacturing operations. In response to the higher manufacturing costs which resulted in lower than expected profit on the higher core sales, repositioning actions were executed in the second quarter which resulted in restructuring and related charges of \$13 million in 2012 designed to reduce our European cost base. In addition, there was a \$2 million unfavorable impact of foreign exchange.

CORPORATE

(in millions, except %)

	2013	2012	2011
Corporate expense	\$(76)	\$(65)	\$(58)
Corporate expense — Asbestos	—	—	(242)
Corporate expense — Environmental	—	—	(30)
Total Corporate	(76)	(65)	(330)
Interest income	2	2	2
Interest expense	(26)	(27)	(26)
Miscellaneous	3	(1)	3

2013 compared with 2012. Total Corporate expense increased \$11 million in 2013, which included \$22 million of acquisition related transaction costs recorded in 2013 compared to \$4 million of acquisition related transaction costs recorded in 2012. This increase was partially offset by \$6 million of lower pension expense resulting from the freezing of our domestic pension plan effective January 1, 2013. The transaction costs were primarily comprised of professional fees associated with obtaining various regulatory approvals and, to a lesser extent, fees and costs associated with financing arrangements.

Our effective tax rate is affected by a number of items, both recurring and discrete, including the amount of income we earn in different jurisdictions and their respective statutory tax rates, acquisitions and dispositions, changes in the valuation of our deferred tax assets and liabilities, changes in tax laws, regulations and accounting principles, the continued availability of statutory tax credits and deductions, the continued reinvestment of our overseas earnings, and examinations initiated by tax authorities around the world.

See Application of Critical Accounting Policies included later in this Item 7 for additional information about our provision for income taxes.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table presents our income (loss) from continuing operations before taxes, provision (benefit) for income taxes from continuing operations, and effective tax rate from continuing operations for the last three years:

(in millions, except %)	2013	2012	2011
Income (loss) before tax — U.S.	\$177	\$175	\$(121)
Income before tax — non-U.S.	149	110	136
Income before tax — worldwide	326	285	15
Provision (benefit) for income taxes	105	88	(8)
Effective tax rate	32.2 %	31.1 %	(55.3)%

Our effective tax rate from continuing operations was higher in 2013 than in 2012 primarily due to non-deductible transaction costs and withholding taxes related to the MEI acquisition, partially offset by the U.S. federal research credit, which lapsed during 2012 and was retroactively extended in January 2013.

A reconciliation of the statutory U.S. federal tax rate to our effective tax rate is set forth in Note 3 of the Notes to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K.

2012 compared with 2011. Total Corporate decreased \$265 million in 2012 due to the absence of a provision of \$242 million to update and extend the estimate of our asbestos liability and an environmental provision of \$30 million related to our expected liability at our Goodyear, Arizona Superfund Site, partially offset by higher corporate expenses, which included \$3.9 million of acquisition related transaction costs recorded in 2012.

Our effective rate from continuing operations of 31.1% for 2012 reflected a tax provision on pre-tax income from continuing operations, while our effective tax rate from continuing operations of (55.3%) for 2011 reflected a tax benefit on pre-tax income from continuing operations.

The tax benefit associated with our 2011 charges for asbestos and environmental was the most significant reason our effective tax rate from continuing operations was negative in 2011. Further, these 2011 charges reduced our income before tax from continuing operations to such a level that all our 2011 tax adjustments had a larger impact on our 2011 effective tax rate from continuing operations than they otherwise would have.

When compared to our 2011 effective tax rate from continuing operations, our 2012 effective tax rate from continuing operations reflects a lower benefit from both non-U.S. taxes and the U.S. federal research and development tax credit (due to its statutory expiration as of December 31, 2011), and higher state taxes. These items were partially offset by a higher tax benefit from domestic manufacturing activities and a lower amount of non-deductible expenses.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES

Our operating philosophy is to deploy cash provided from operating activities, when appropriate, to provide value to shareholders by reinvesting in existing businesses, by making acquisitions that will complement our portfolio of businesses and by paying dividends and/or repurchasing shares. Consistent with our philosophy of balanced capital deployment, in 2013, we completed the acquisition of MEI at a purchase price of \$804 million, and we paid dividends of \$67 million (quarterly dividends per share increased 7% from \$0.28 to \$0.30 in July 2013).

Our current cash balance of \$271 million, together with cash we expect to generate from future operations and the \$375 million available under our existing committed revolving credit facility, are expected to be sufficient to finance our short-term and long-term capital requirements, as well as fund payments associated with our asbestos and environmental exposures and expected pension contributions. In addition, we believe our credit ratings afford us adequate access to public and private markets for debt. We have borrowings totaling \$125 million outstanding under our \$500 million Amended and Restated Credit Agreement which expires in May 2017. There are no other significant debt maturities coming due until 2018.

We have an estimated liability of \$699 million for pending and reasonably anticipated asbestos claims through 2021, and while it is probable that this amount will change and we may incur additional liabilities for asbestos claims after 2021, which additional liabilities may be material, we cannot reasonably estimate the amount of such additional liabilities at this time. Similarly, we have an estimated liability of \$33 million related to environmental remediation costs projected through 2016 related to our Superfund Site in Goodyear, Arizona.

Our cash totaled \$271 million as of December 31, 2013. Of this amount, approximately \$257 million is held by our non-U.S. subsidiaries and is subject to additional tax upon repatriation to the U.S. Our intent is to permanently reinvest the earnings of our non-U.S. operations, and current plans do not anticipate that we will need funds generated from our non-U.S. operations to fund our U.S. operations. In the event we were to repatriate the cash balances of our non-U.S. subsidiaries, we would provide for and pay additional U.S. and non-U.S. taxes in connection with such repatriation.

Operating Activities

Cash provided by operating activities, a key source of our liquidity, was \$239 million in 2013, an increase of \$5 million, or 3%, compared to 2012. The increase resulted from lower net asbestos-related payments, partially offset by higher working capital requirements, including incremental acquisition transaction costs of \$19 million, and higher defined benefit plan and postretirement contributions. We expect to make payments related to asbestos settlement and defense costs, net of related insurance recoveries, of approximately \$60 million to \$70 million and contributions to our defined benefit plans of approximately \$24 million in 2014.

Investing Activities

Cash flows relating to investing activities consist primarily of cash provided by divestitures of businesses or assets and cash used for acquisitions and capital expenditures. Cash used for investing activities was \$824 million in 2013, compared to cash provided by investing activities of \$31 million in 2012. The increase in cash used for investing activities was primarily related to cash paid for the acquisition of MEI of \$802 million and the absence of proceeds of the divestitures of businesses in our Fluid Handling and former Controls segments in 2012. Capital expenditures were relatively flat in 2013 compared to the prior year. Capital expenditures are made primarily for increasing capacity, replacing equipment, supporting new product development and improving information systems. We expect our capital expenditures to approximate \$45 million in 2014, reflecting anticipated increases in new product development initiatives, primarily in our Aerospace and Electronics and Fluid Handling segments.

Financing Activities

Financing cash flows consist primarily of the issuance of new debt, dividends to shareholders, share repurchases and proceeds from the issuance of common stock. Cash provided by financing activities was \$433 million in 2013, compared to cash used for financing activities of \$95 million in 2012. The higher levels of cash provided by financial activities was primarily due to proceeds received from issuance of long-term notes of \$550 million related to the acquisition of MEI, an increase in proceeds received from credit facility of \$125 million, the absence of open market share repurchases (we repurchased 1,271,592 shares of our common stock at a cost of \$50 million in 2012), and \$12

million of higher net proceeds received from employee stock option exercises during the period. These increases in cash provided by financing activities was partially offset by an increase in dividend payments of \$5 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financing Arrangements

At December 31, 2013 and 2012, we had total debt of \$875 million and \$400 million, respectively. Net debt increased by \$628 million to a net debt position (debt less cash) of \$604 million at December 31, 2013, primarily reflecting strong cash flow from operations offset by higher debt and lower cash balances associated with the acquisition of MEI. The net debt to net capitalization ratio was 33.2% at December 31, 2013, compared to (2.6%) at December 31, 2012.

In December 2013, we issued 10 year notes having an aggregate principal amount of \$300 million. The notes are unsecured, senior obligations that mature on December 15, 2023 and bear interest at 4.45% per annum, payable semi-annually on June 15 and December 15 of each year+. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of Crane, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 4.56%.

Also in December 2013, we issued five year notes having an aggregate principal amount of \$250 million. The notes are unsecured, senior obligations that mature on December 15, 2018 and bear interest at 2.75% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of Crane, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 2.92%.

Senior unsecured notes having an aggregate principal amount of \$200 million matured in the third quarter of 2013. These notes were repaid using \$90 million of cash and \$110 million of multi-year credit facility borrowings.

In December 2012, we obtained \$600 million of bank loan commitments in support of our acquisition of MEI. The commitments supported a \$200 million expansion of the \$300 million credit facility referred to in the next paragraph, and an additional \$400 million 364 day credit facility. The 364 day credit facility was terminated on December 13, 2013 after being used to fund the MEI acquisition.

In May 2012, we entered into a five year, \$300 million Amended and Restated Credit Agreement (as subsequently amended, and increased to \$500 million, the "facility"), which is due to expire in May 2017. The facility allows us to borrow, repay, or to the extent permitted by the agreement, prepay and re-borrow funds at any time prior to the stated maturity date, and the loan proceeds may be used for general corporate purposes including financing for acquisitions. Interest is based on, at our option, (1) a LIBOR-based formula that is dependent in part on the Company's credit rating (LIBOR plus 105 basis points as of the date of this Report; up to a maximum of LIBOR plus 147.5 basis points), or (2) the greatest of (i) the JPMorgan Chase Bank, N.A.'s prime rate, (ii) the Federal Funds rate plus 50 basis points, or (iii) an adjusted LIBOR rate plus 100 basis points, plus a spread dependent on the Company's credit rating (5 basis points as of the date of this Report; up to a maximum of 47.5 basis points). At December 31, 2013, outstanding borrowings under the facility totaled \$125 million. The facility contains customary affirmative and negative covenants for credit facilities of this type, including the absence of a material adverse effect and limitations on us and our subsidiaries with respect to indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of all or substantially all assets, transactions with affiliates and hedging arrangements. The facility also provides for customary events of default, including failure to pay principal, interest or fees when due, failure to comply with covenants, the fact that any representation or warranty made by us is false in any material respect, default under certain other indebtedness, certain insolvency or receivership events affecting us and our subsidiaries, certain ERISA events, material judgments and a change in control of Crane. The facility contains a leverage ratio covenant requiring a ratio of total debt to total capitalization of less than or equal to 65%. At December 31, 2013, our ratio was 42%

In November 2006, we issued 30 year notes having an aggregate principal amount of \$200 million. The notes are unsecured, senior obligations that mature on November 15, 2036 and bear interest at 6.55% per annum, payable semi-annually on May 15 and November 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or in part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of Crane, and if as a consequence the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 6.67%.

The 2018 and 2023 notes were issued under an indenture dated as of December 13, 2013. The 2036 notes were issued under an indenture dated as of April 1, 1991. Both indentures contain certain limitations on liens and sale and lease-back transactions.

At December 31, 2013, we had open standby letters of credit of \$28.3 million issued pursuant to a \$60 million uncommitted Letter of Credit Reimbursement Agreement and certain other credit lines, substantially all of which expire in 2014.

Credit Ratings

As of December 31, 2013, our senior unsecured debt was rated BBB by Standard & Poor's and Baa2 with Negative Outlook by Moody's Investors Service. We believe that these ratings afford us adequate access to the public and private markets for debt.

Contractual Obligations

Under various agreements, we are obligated to make future cash payments in fixed amounts. These include payments under our long-term debt agreements and rent payments required under operating lease agreements. The following table summarizes our fixed cash obligations as of December 31, 2013:

(in thousands)	Payment due by Period				
	Total	2014	2015 -2016	2017 -2018	After 2019
Long-term debt(1)	750,000	\$—	\$—	\$250,000	\$500,000
Fixed interest payments	467,675	33,175	66,350	66,350	301,800
Operating lease payments	49,143	14,928	19,186	11,285	3,744
Purchase obligations	110,204	103,381	5,276	1,547	—
Pension and postretirement benefits(2)	490,269	41,563	87,149	94,496	267,061
Other long-term liabilities reflected on Consolidated Balance Sheets(3)	—	—	—	—	—
Total	\$1,867,291	\$193,047	\$177,961	\$423,678	\$1,072,605

(1) Excludes original issue discount.

Pension benefits are funded by the respective pension trusts. The postretirement benefit component of the (2) obligation is approximately \$1 million per year for which there is no trust and will be directly funded by us.

Pension and postretirement benefits are included through 2023.

As the timing of future cash outflows is uncertain, the following long-term liabilities (and related balances) are (3) excluded from the above table: Long-term asbestos liability (\$611 million) and long-term environmental liability (\$21 million).

Capital Structure

The following table sets forth our capitalization:

(in millions, except %) December 31,	2013	2012
Short-term borrowings	\$125,826	\$1,123
Long-term debt	\$749,170	\$399,092
Total debt	874,996	400,215
Less cash and cash equivalents	270,643	423,947
Net debt (net cash)*	604,353	(23,732)
Equity	1,214,673	927,376
Net capitalization*	\$1,819,026	\$903,644
Net debt (net cash) to Equity*	49.8	% (2.6)%
Net debt (net cash) to net capitalization*	33.2	% (2.6)%

*

Net debt (net cash), a non-GAAP measure, represents total debt less cash and cash equivalents. We report our financial results in accordance with U.S. generally accepted accounting principles (U.S. GAAP). However, management believes that certain non-GAAP financial measures, which include the presentation of net debt, provides useful information about our ability to satisfy our debt obligation with currently available funds. Management also uses these non-GAAP financial measures in making financial, operating, planning and compensation decisions and in evaluating the Company's performance.

Non-GAAP financial measures, which may be inconsistent with similarly captioned measures presented by other companies, should be viewed in the context of the definitions of the elements of such measures we provide and in addition to, and not as a substitute for, our reported results prepared and presented in accordance with U.S. GAAP.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In 2013, equity increased \$287 million, primarily as a result of net income attributable to common shareholders of \$221 million, changes in pension and postretirement plan assets and benefit obligations, net of tax, of \$76 million and stock option exercises of \$28 million, partially offset by cash dividends of \$67 million.

Off Balance Sheet Arrangements

We do not have any majority-owned subsidiaries that are not included in the consolidated financial statements, nor do we have any interests in or relationships with any special purpose off-balance sheet financing entities.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Outlook

Overall

Our sales depend heavily on industries that are cyclical in nature, or are subject to market conditions which may cause customer demand for our products to be volatile. These industries are subject to fluctuations in domestic and international economies as well as to currency fluctuations, inflationary pressures, and commodity costs.

Although the global economy has shown positive indications, the recovery has been slower than anticipated and the continuation and duration of that recovery remains uncertain, in part, to continued high unemployment in the U.S. and Europe, a slow recovery in the U.S. and European housing markets and undetermined government budget reduction plans. Although we remain cautious, we are expecting a gradual improvement in core sales in 2014, as 80% of our business is tied to the recovering economies in North America and Europe. Specifically, in 2014, we expect total year-over-year sales growth in a range of 15% and 17%, comprised of 1% to 3% of organic sales growth and the full year impact of sales from MEI (adding 14%). Also, in connection with the recent acquisition of MEI, we expect to incur \$18 to \$21 million in transaction and integration related costs and inventory step up amortization charges. In addition, we expect modest repositioning actions in 2014, reflecting our continued focus on margin expansion. The costs associated with these repositioning actions are expected to be \$10 to \$13 million and are expected to be largely offset by gains from expected sales of certain company owned real estate. Savings associated with these repositioning actions are estimated to be \$5 million in 2015 and to increase to \$10 million on an annual basis beginning in 2016.

Aerospace & Electronics

In 2014, we believe market conditions in the aerospace industry will remain generally positive. Accordingly, we expect an increase in Aerospace group sales as a result of original equipment manufacturers ("OEM") sales growth as we benefit from increasing build rates across a broad range of platforms, primarily for large aircraft manufacturers. We remain cautiously optimistic about the aerospace aftermarket. We expect sales in our Electronics Group to be modestly lower as a result of continued delays in defense-related programs. Considering all of the foregoing, in 2014, we expect total segment sales to be slightly higher. We expect segment operating profit in 2014 to decline slightly, reflecting incremental costs associated with anticipated repositioning of certain facilities, the impact of the lower sales in Electronics and higher engineering expense related to new program wins and new product development initiatives in both businesses. These impacts are expected to be partially offset by strong leverage on the higher volumes in the Aerospace Group.

Engineered Materials

In 2014, we expect the Engineered Materials segment will show continued improvement in sales, driven by modest growth in RV-related applications and a gradual improvement in Building Products shipments over the course of the year. We expect to be able to leverage this growth together with additional productivity initiatives to drive operating profit and margin improvement.

Merchandising Systems

In 2014, we anticipate Merchandising Systems sales to increase substantially, primarily reflecting sales contributed from the acquisition of MEI, partially offset by lost sales associated with a divested product line as required by the European Commission. We expect sales from our Vending Solution business to increase slightly. We expect segment operating profit to increase commensurate with the sales contributed from MEI, partly offset by the impact of the above mentioned transaction and integration-related costs and inventory step up amortization charges.

Fluid Handling

In 2014, in our Fluid Handling segment, we expect modest sales growth with a gradual strengthening in our core process ChemPharma Energy valve business in the second half, reflecting anticipated improving chemical industry demand in North America and Europe. We also anticipate chemical investments in the Middle East and China to continue to move forward. In addition, we expect U.S. refineries to continue their turnaround and upgrade activities. Demand from power markets in China and Europe has been generally positive and we expect this to continue in 2014, and we believe the Americas and India will remain soft. With respect to our commercial valve businesses, we anticipate activity in North America to remain soft in 2014, in particular in Canada, driven by weaker non-residential construction and mining end markets; and while we are seeing some improvement in Europe, the markets remain

generally uncertain. We expect to continue to grow operating profit, driven by leverage on higher sales and a continued focus on productivity.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

APPLICATION OF CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. Our significant accounting policies are more fully described in Note 1, "Nature of Operations and Significant Accounting Policies" to the Notes to the Consolidated Financial Statements. Certain accounting policies require us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. On an ongoing basis, we evaluate our estimates and assumptions, and the effects of revisions are reflected in the financial statements in the period in which they are determined to be necessary. The accounting policies described below are those that most frequently require us to make estimates and judgments and, therefore, are critical to understanding our results of operations. We have discussed the development and selection of these accounting estimates and the related disclosures with the Audit Committee of our Board of Directors.

Revenue Recognition. Sales revenue is recorded when title (risk of loss) passes to the customer and collection of the resulting receivable is reasonably assured. Revenue on long-term, fixed-price contracts is recorded on a percentage of completion basis using units of delivery as the measurement basis for progress toward completion. Sales under cost-reimbursement-type contracts are recorded as costs are incurred.

Accounts Receivable. We continually monitor collections from customers, and in addition to providing an allowance for uncollectible accounts based upon a customer's financial condition, we record a provision for estimated credit losses when customer accounts exceed 90 days past due. We aggressively pursue collection efforts on these overdue accounts. The allowance for doubtful accounts was \$5 million and \$7 million at December 31, 2013 and 2012, respectively.

Inventories. Inventories include the costs of material, labor and overhead and are stated at the lower of cost or market. We regularly review inventory values on hand and record a provision for excess and obsolete inventory primarily based on historical performance and our forecast of product demand over the next two years. As actual future demand or market conditions vary from those projected by us, adjustments will be required. Domestic inventories are stated at either the lower of cost or market using the last-in, first-out ("LIFO") method or the lower of cost or market using the first-in, first-out ("FIFO") method. We use LIFO for certain domestic locations, which is allowable under U.S. GAAP, primarily because this method was elected for tax purposes and thus required for financial statement reporting purposes. Inventories held in foreign locations are primarily stated at the lower of cost or market using the FIFO method. The LIFO method is not being used at our foreign locations as such a method is not allowable for tax purposes. Changes in the levels of LIFO inventories have reduced costs of sales by \$1.1 million, increased cost of sales by \$3.1 million and reduced cost of sales by \$0.8 million for the years ended December 31, 2013, 2012 and 2011, respectively. The portion of inventories costed using the LIFO method was 29% of consolidated inventories at both December 31, 2013 and 2012. If inventories that were valued using the LIFO method had been valued under the FIFO method, they would have been higher by \$14.3 million and \$15.4 million at December 31, 2013 and 2012, respectively.

Valuation of Long-Lived Assets. We review our long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a loss is recognized based on the amount by which the carrying amount exceeds the estimated fair value. Judgments we make which impact these assessments relate to the expected useful lives of long-lived assets and our ability to realize any undiscounted

cash flows in excess of the carrying amounts of such assets, and are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods due to either changing assumptions or changing facts and circumstances.

Income Taxes. We account for income taxes in accordance with Accounting Standards Codification (“ASC”) Topic 740 “Income Taxes” (“ASC 740”), which requires an asset and liability approach for the financial accounting and reporting of income taxes. Under this method, deferred income taxes are recognized for the expected future tax consequences of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. These balances are measured using the enacted tax rates expected to apply in the year(s) in which these temporary differences are expected to

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

reverse. The effect of a change in tax rates on deferred income taxes is recognized in income in the period when the change is enacted. Based on consideration of all available evidence regarding their utilization, we record net deferred tax assets to the extent that it is more likely than not that they will be realized. Where, based on the weight of all available evidence, it is more likely than not that some amount of a deferred tax asset will not be realized, we establish a valuation allowance for the amount that, in our judgment, is sufficient to reduce the deferred tax asset to an amount that is more likely than not to be realized. The evidence we consider in reaching such conclusions includes, but is not limited to, (1) future reversals of existing taxable temporary differences, (2) future taxable income exclusive of reversing taxable temporary differences, (3) taxable income in prior carryback year(s) if carryback is permitted under the tax law, (4) cumulative losses in recent years, (5) a history of tax losses or credit carryforwards expiring unused, (6) a carryback or carryforward period that is so brief it limits realization of tax benefits, and (7) a strong earnings history exclusive of the loss that created the carryforward and support showing that the loss is an aberration rather than a continuing condition.

We account for unrecognized tax benefits in accordance with ASC 740, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation, based solely on the technical merits of the position. The tax benefit recognized is the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

We recognize interest and penalties related to unrecognized tax benefits within the income tax expense line of the Consolidated Statement of Operations, while accrued interest and penalties are included within the related tax liability line of the Consolidated Balance Sheets.

In determining whether the earnings of our non-U.S. subsidiaries are permanently reinvested overseas, we consider the following:

- Our history of utilizing non-U.S. cash to acquire non-U.S. businesses,
- Our current and future needs for cash outside the U.S. (e.g., to fund capital expenditures, business operations, potential acquisitions, etc.),
- Our ability to satisfy U.S.-based cash needs (e.g., domestic pension contributions, interest payment on external debt, dividends to shareholders, etc.) with cash generated by our U.S. businesses, and
- The effect U.S. tax reform proposals calling for reduced corporate income tax rates and/or "repatriation" tax holidays would have on the amount of the tax liability.

Goodwill and Other Intangible Assets. As of December 31, 2013, we had \$1.249 billion of goodwill. Our business acquisitions typically result in the acquisition of goodwill and other intangible assets. We follow the provisions under ASC Topic 350, "Intangibles – Goodwill and Other" ("ASC 350") as it relates to the accounting for goodwill in our Consolidated Financial Statements. These provisions require that we, on at least an annual basis, evaluate the fair value of the reporting units to which goodwill is assigned and attributed and compare that fair value to the carrying value of the reporting unit to determine if impairment exists. Impairment testing takes place more often than annually if events or circumstances indicate a change in the impairment status. A reporting unit is an operating segment unless discrete financial information is prepared and reviewed by segment management for businesses one level below that operating segment (a "component"), in which case the component would be the reporting unit. At December 31, 2013, we had eight reporting units.

When performing our annual impairment assessment, we compare the fair value of each of our reporting units to their respective carrying value. Goodwill is considered to be potentially impaired when the net book value of a reporting unit exceeds its estimated fair value. Fair values are established primarily by discounting estimated future cash flows at an estimated cost of capital which varies for each reporting unit and which, as of our most recent annual impairment

assessment, ranged between 10% and 13% (a weighted average of 11%), reflecting the respective inherent business risk of each of the reporting units tested. This methodology for valuing the Company's reporting units (commonly referred to as the Income Method) has not changed since the prior year. The determination of discounted cash flows is based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin assumptions are projected by each reporting unit based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis of goodwill impairment. In addition to the foregoing, for each reporting unit, market multiples are used to corroborate our discounted cash flow results where fair value is estimated based on earnings before income taxes, depreciation, and amortization (EBITDA) multiples determined by available public information of comparable businesses. While we believe we have made reasonable estimates and assumptions to calculate the fair value of our reporting units, it is possible a material change could occur. If actual results are not consistent with management's estimates and assumptions, goodwill and other

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

intangible assets may be overstated and a charge would need to be taken against net earnings. Furthermore, in order to evaluate the sensitivity of the fair value calculations on the goodwill impairment test, we applied a hypothetical, reasonably possible 10% decrease to the fair values of each reporting unit. The results of this hypothetical 10% decrease would still result in a fair value calculation exceeding our carrying value for each of our reporting units. No impairment charges have been required during 2013, 2012 and 2011.

As of December 31, 2013, we had \$409 million of net intangible assets, of which \$31 million were intangibles with indefinite useful lives, consisting of trade names. We amortize the cost of other intangibles over their estimated useful lives unless such lives are deemed indefinite. Indefinite lived intangibles are tested annually for impairment, or when events or changes in circumstances indicate the potential for impairment. If the carrying amount of the indefinite lived intangible exceeds the fair value, the intangible asset is written down to its fair value. Fair value is calculated using discounted cash flows.

In addition to annual testing for impairment of indefinite-lived intangible assets, we review all of our long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific asset appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups and include consideration of estimated future revenues, gross profit margins, operating profit margins and capital expenditures which are based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin assumptions are based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a charge would be taken against net earnings based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that we make which impact these assessments relate to the expected useful lives of long-lived assets and our ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets. Such judgments are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods. Historical results to date have generally approximated expected cash flows for the identifiable cash flow generating level. We believe that there have been no events or circumstances which would more likely than not reduce the fair value of our indefinite-lived and amortizable intangible assets.

Contingencies. The categories of claims for which we have estimated our liability, the amount of our liability accruals, and the estimates of our related insurance receivables are critical accounting estimates related to legal proceedings and other contingencies. Please refer to Note 10, "Commitments and Contingencies", of the Notes to the Consolidated Financial Statements.

Asbestos Liability and Related Insurance Coverage and Receivable. As of December 31, 2013, we had an aggregate asbestos liability of \$699 million for pending claims and future claims projected to be filed against us through December 31, 2021. Estimation of our exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims and the manner of their resolution. We have retained the firm of Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the field, to assist management in estimating our asbestos liability in the tort system. HR&A reviews information provided by us concerning claims filed, settled and dismissed, amounts paid in settlements and relevant

claim information such as the nature of the asbestos-related disease asserted by the claimant, the jurisdiction where filed and the time lag from filing to disposition of the claim. The methodology used by HR&A to project future asbestos costs is based largely on our experience during a base reference period of eleven quarterly periods (consisting of the two full preceding calendar years and three additional quarterly periods to the estimate date) for claims filed, settled and dismissed. Our experience is then compared to the results of widely used previously conducted epidemiological studies estimating the number of individuals likely to develop asbestos-related diseases. Using that information, HR&A estimates the number of future claims that would be filed against us through our forecast period and estimates the aggregate settlement or indemnity costs that would be incurred to resolve both pending and future claims based upon the average settlement costs by disease during the reference period. After discussions with us, HR&A augments our liability estimate for the costs of defending asbestos claims in the tort system using a forecast from us which is based upon discussions with our defense counsel. Based on this information, HR&A compiles an estimate of our asbestos liability for pending and future claims

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

expected to be filed through the indicated forecast period. The most significant factors affecting the liability estimate are (1) the number of new mesothelioma claims filed against us, (2) the average settlement costs for mesothelioma claims, (3) the percentage of mesothelioma claims dismissed against us and (4) the aggregate defense costs incurred by us. These factors are interdependent, and no one factor predominates in determining the liability estimate. Although the methodology used by HR&A can be applied to show claims and costs for periods subsequent to the indicated period (up to and including the endpoint of the epidemiological studies referred to above), management believes that the level of uncertainty regarding the various factors used in estimating future asbestos costs is too great to provide for reasonable estimation of the number of future claims, the nature of such claims or the cost to resolve them for years beyond the indicated estimate. Through December 31, 2013, our actual experience during the updated reference period for mesothelioma claims filed and dismissed generally approximated the assumptions in our liability estimate. In addition to this claims experience, we considered additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. Based on this evaluation, we determined that no change in the estimate was warranted for the period ended December 31, 2013. Nevertheless, if certain factors show a pattern of sustained increase or decrease, the liability could change materially; however, all the assumptions used in estimating the asbestos liability are interdependent and no single factor predominates in determining the liability estimate. Because of the uncertainty with regard to and the interdependency of such factors used in the calculation of our asbestos liability, and since no one factor predominates, we believe that a range of potential liability estimates beyond the indicated forecast period cannot be reasonably estimated.

In conjunction with developing the aggregate liability estimate referenced above, we also developed an estimate of probable insurance recoveries for our asbestos liabilities. As of December 31, 2013, we had an aggregate asbestos receivable of \$171 million. In developing this estimate, we considered our coverage-in-place and other settlement agreements, as well as a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships.

Environmental. For environmental matters, we record a liability for estimated remediation costs when it is probable that we will be responsible for such costs and they can be reasonably estimated. Generally, third party specialists assist in the estimation of remediation costs. The environmental remediation liability at December 31, 2013 is substantially all for the former manufacturing site in Goodyear, Arizona (the "Goodyear Site"). As of December 31, 2013, the total estimated gross liability for the Goodyear Site was \$33 million.

On July 31, 2006, we entered into a consent decree with the U.S. Department of Justice on behalf of the Department of Defense and the Department of Energy pursuant to which, among other things, the U.S. Government reimburses us for 21% of qualifying costs of investigation and remediation activities at the Goodyear Site. As of December 31, 2013, the total estimated receivable from the U.S. Government related to the environmental remediation liabilities of the Goodyear Site was \$9 million.

Pension Plans. In the United States, we sponsor a defined benefit pension plan that covers approximately 27% of all U.S. employees. In the fourth quarter of 2012, we announced that pension eligible employees will no longer earn future benefits in the domestic defined benefit pension plan effective January 1, 2013. The benefits are based on years of service and compensation on a final average pay basis, except for certain hourly employees where benefits are fixed per year of service. This plan is funded with a trustee in respect to past and current service. Charges to expense are based upon costs computed by an independent actuary. Our funding policy is to contribute, annually, amounts that are allowable for federal or other income tax purposes. These contributions are intended to provide for future benefits earned to date. A number of our non-U.S. subsidiaries sponsor defined benefit pension plans that cover approximately 17% of all non-U.S. employees. The benefits are typically based upon years of service and compensation. These plans are generally funded with trustees in respect to past and current service. Charges to expense are based upon costs computed by independent actuaries. Our funding policy is to contribute, annually, amounts that are allowable for tax

purposes or mandated by local statutory requirements. These contributions are intended to provide for future benefits earned to date.

The net periodic pension cost was \$5 million, \$20 million and \$6 million in 2013, 2012 and 2011, respectively. Employer cash contributions were \$15 million, \$4 million and \$47 million (of which \$30 million was made on a discretionary basis in 2011), in 2013, 2012 and 2011, respectively, to our U.S. defined benefit pension plan. We expect, based on current actuarial calculations, to contribute cash of approximately \$24 million to our pension plans in 2014. Cash contributions in subsequent years will depend on a number of factors including the investment performance of plan assets.

For the pension plan, holding all other factors constant, a decrease in the expected long-term rate of return of plan assets by 0.25 percentage points would have increased U.S. 2013 pension expense by \$0.9 million for U.S. pension plans and \$0.9 million for non-U.S. pension plans. Also, holding all other factors constant, a decrease in the discount rate used to determine net

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

periodic pension cost by 0.25 percentage points would have increased 2013 pension expense by \$0.2 million for U.S. pension plans and \$0.9 million for non-U.S. pension plans.

The following key assumptions were used to calculate the benefit obligation and net periodic cost for the periods indicated:

December 31, Benefit Obligations	Pension Benefits			
	2013	2012	2011	
U.S. Plans:				
Discount rate	4.90	% 4.20	% 5.00	%
Rate of compensation increase	3.50	% 3.50	% 3.50	%
Non-U.S. Plans:				
Discount rate	4.05	% 3.93	% 4.56	%
Rate of compensation increase	2.56	% 3.14	% 3.89	%
Net Periodic Benefit Cost				
U.S. Plans:				
Discount rate	4.20	% 5.00	% 5.80	%
Expected rate of return on plan assets	7.75	% 8.25	% 8.25	%
Rate of compensation increase	3.50	% 3.50	% 3.50	%
Non-U.S. Plans:				
Discount rate	3.93	% 4.56	% 5.40	%
Expected rate of return on plan assets	7.01	% 7.00	% 7.01	%
Rate of compensation increase	3.14	% 3.89	% 3.74	%

The long term expected rate of return on plan assets assumptions were determined with input from independent investment consultants and plan actuaries, utilizing asset pricing models and considering historic returns. The discount rates we used for valuing pension liabilities are based on a review of high quality corporate bond yields with maturities approximating the remaining life of the projected benefit obligation.

Postretirement Benefits Other than Pensions. We and certain of our subsidiaries provide postretirement health care and life insurance benefits to current and former employees hired before January 1, 1990, who meet minimum age and years of service requirements. We do not pre-fund these benefits and retain the right to modify or terminate the plans. We expect, based on current actuarial calculations, to contribute cash of \$1.2 million to our postretirement benefit plans in 2014. The weighted average discount rates assumed to determine postretirement benefit obligations were 3.9%, 3.2% and 4.25% for 2013, 2012, and 2011, respectively. The health care cost trend rates assumed were 7.0%, 8.0% and 8.5% in 2013, 2012 and 2011, respectively. See Note 7, "Pension and Postretirement Benefits," to the Notes to the Consolidated Financial Statements for details of the impact of a one percentage point change in assumed health care trend rates on the postretirement health care benefit expense and obligation.

Recent Accounting Pronouncements

Information regarding new accounting pronouncements is included in Note 1 to the Consolidated Financial Statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Our cash flows and earnings are subject to fluctuations from changes in interest rates and foreign currency exchange rates. We manage our exposures to these market risks through internally established policies and procedures and, when deemed appropriate, through the use of interest-rate swap agreements and forward exchange contracts. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

Total debt outstanding was \$875 million at December 31, 2013, the majority of which was at fixed rates of interest ranging from 2.75% to 6.55%.

The following is an analysis of the potential changes in interest rates and currency exchange rates based upon sensitivity analysis that models effects of shifts in rates. These are not forecasts.

Our year-end portfolio is comprised primarily of fixed-rate debt; therefore, the effect of a market change in interest rates would not be significant.

If, on January 1, 2014, currency exchange rates were to decline 1% against the U.S. dollar and the decline remained in place for 2014, based on our year-end 2013 portfolio, net income would not be materially impacted.

Item 8. Financial Statements and Supplementary Data.

MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL REPORTING

The accompanying consolidated financial statements of Crane Co. and subsidiaries have been prepared by management in conformity with accounting principles generally accepted in the United States of America and, in the judgment of management, present fairly and consistently the Company's financial position and results of operations and cash flows. These statements by necessity include amounts that are based on management's best estimates and judgments and give due consideration to materiality.

Management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2013. In making this assessment, it used the criteria established in "Internal Control — Integrated Framework (1992)," issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment we believe that, as of December 31, 2013, the Company's internal control over financial reporting is effective based on those criteria.

As permitted under Securities and Exchange Commission ("SEC") rules, management excluded from its assessment the internal control over financial reporting at MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI") which was acquired on December 11, 2013 and whose financial statements constitute 27% of total assets and 1% of revenues of the consolidated financial statement amounts as of and for the year ended December 31, 2013.

Deloitte & Touche LLP, the independent registered public accounting firm that also audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, audited the internal control over financial reporting as of December 31, 2013, and issued their related attestation report which is included herein.

Vice President - Finance and Chief Financial Officer
(Principal Financial Officer)

The Section 302 certifications of the Company's Chief Executive Officer and its Principal Financial Officer have been filed as Exhibit 31 to the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have audited the accompanying consolidated balance sheets of Crane Co. and subsidiaries (the "Company") as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), cash flows and changes in equity for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Crane Co. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on the criteria established in Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 24, 2014 expressed an unqualified opinion on the Company's internal control over financial reporting.

Note 1 – Nature of Operations and Significant Accounting Policies

Nature of Operations

Crane Co. (the “Company”) is a diversified manufacturer of highly engineered industrial products.

The Company’s business consists of four reporting segments: Aerospace & Electronics, Engineered Materials, Merchandising Systems and Fluid Handling.

The Aerospace & Electronics segment consists of two groups: the Aerospace Group and the Electronics Group. Aerospace products include pressure, fuel flow and position sensors and subsystems; brake control systems; coolant, lube and fuel pumps; and seat actuation. Electronics products include high-reliability power supplies and custom microelectronics for aerospace, defense, medical and other applications; and electrical power components, power management products, electronic radio frequency and microwave frequency components and subsystems for the defense, space and military communications markets.

The Engineered Materials segment manufactures fiberglass-reinforced plastic panels for the truck trailer and recreational vehicle (“RV”) markets, industrial markets and the commercial construction industry.

The Merchandising Systems segment consists of two groups: Vending Solutions and Crane Payment Innovations (“CPI”). Vending Solutions products include food, snack and beverage vending machines and vending machine software and online solutions. CPI products include coin accepters and dispensers, coin hoppers, coin recyclers, bill validators and bill recyclers.

The Fluid Handling segment manufactures and sells various types of industrial and commercial valves and actuators; provides valve testing, parts and services; manufactures and sells pumps and water purification solutions; distributes pipe, pipe fittings, couplings and connectors; and designs, manufactures and sells corrosion-resistant plastic-lined pipes and fittings.

See Note 14, “Segment Information” for the relative size of these segments in relation to the total Company (both net sales and total assets).

Significant Accounting Policies

Use of Estimates The Company’s consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). These accounting principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results may differ from those estimated. Estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the financial statements in the period in which they are determined to be necessary. Estimates are used when accounting for such items as asset valuations, allowance for doubtful accounts, depreciation and amortization, impairment assessments, restructuring provisions, employee benefits, taxes, asbestos liability and related insurance receivable, environmental liability and contingencies.

Currency Translation Assets and liabilities of subsidiaries that prepare financial statements in currencies other than the U.S. dollar are translated at the rate of exchange in effect on the balance sheet date; results of operations are translated at the average rates of exchange prevailing during the year. The related translation adjustments are included in accumulated other comprehensive income (loss) in a separate component of equity.

Revenue Recognition Sales revenue is recorded when title (risk of loss) passes to the customer and collection of the resulting receivable is reasonably assured. Revenue on long-term, fixed-price contracts is recorded on a percentage of completion basis using units of delivery as the measurement basis for progress toward completion. Sales under cost reimbursement type contracts are recorded as costs are incurred.

Cost of Goods Sold Cost of goods sold includes the costs of inventory sold and the related purchase and distribution costs. In addition to material, labor and direct overhead, inventoried cost and, accordingly, cost of goods sold include allocations of other expenses that are part of the production process, such as inbound freight charges, purchasing and receiving costs, inspection costs, warehousing costs, amortization of production related intangible assets and depreciation expense. The Company also includes costs directly associated with products sold, such as warranty provisions.

Selling, General and Administrative Expenses Selling, general and administrative expense is charged to income as incurred. Such expenses include the costs of promoting and selling products and include such items as compensation, advertising, sales commissions and travel. In addition, compensation for other operating activities such as executive office administrative and engineering functions are included, as well as general operating expenses such as office supplies, non-income taxes, insurance and office equipment rentals.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Income Taxes The Company accounts for income taxes in accordance with Accounting Standards Codification (“ASC”) Topic 740 “Income Taxes” (“ASC 740”) which requires an asset and liability approach for the financial accounting and reporting of income taxes. Under this method, deferred income taxes are recognized for the expected future tax consequences of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. These balances are measured using the enacted tax rates expected to apply in the year(s) in which these temporary differences are expected to reverse. The effect of a change in tax rates on deferred income taxes is recognized in income in the period when the change is enacted.

Based on consideration of all available evidence regarding their utilization, the Company records net deferred tax assets to the extent that it is more likely than not that they will be realized. Where, based on the weight of all available evidence, it is more likely than not that some amount of a deferred tax asset will not be realized, the Company establishes a valuation allowance for the amount that, in management's judgment, is sufficient to reduce the deferred tax asset to an amount that is more likely than not to be realized. The evidence the Company considers in reaching such conclusions includes, but is not limited to, (1) future reversals of existing taxable temporary differences, (2) future taxable income exclusive of reversing taxable temporary differences, (3) taxable income in prior carryback year(s) if carryback is permitted under the tax law, (4) cumulative losses in recent years, (5) a history of tax losses or credit carryforwards expiring unused, (6) a carryback or carryforward period that is so brief it limits realization of tax benefits, and (7) a strong earnings history exclusive of the loss that created the carryforward and support showing that the loss is an aberration rather than a continuing condition.

The Company accounts for unrecognized tax benefits in accordance with ASC 740, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation, based solely on the technical merits of the position. The tax benefit recognized is the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The Company recognizes interest and penalties related to unrecognized tax benefits within the income tax expense line of its Consolidated Statement of Operations, while accrued interest and penalties are included within the related tax liability line of its Consolidated Balance Sheets.

In determining whether the earnings of its non-U.S. subsidiaries are permanently reinvested overseas, the Company considers the following:

- Its history of utilizing non-U.S. cash to acquire non-U.S. businesses,
- Its current and future needs for cash outside the U.S. (e.g., to fund capital expenditures, business operations, potential acquisitions, etc.),
- Its ability to satisfy U.S.-based cash needs (e.g., domestic pension contributions, interest payment on external debt, dividends to shareholders, etc.) with cash generated by its U.S. businesses, and
- The effect U.S. tax reform proposals calling for reduced corporate income tax rates and/or “repatriation” tax holidays would have on the amount of the tax liability.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Earnings Per Share The Company's basic earnings per share calculations are based on the weighted average number of common shares outstanding during the year. Shares of restricted stock are included in the computation of both basic and diluted earnings per share. Potentially dilutive securities include outstanding stock options, restricted share units, deferred stock units and performance-based restricted share units. The dilutive effect of potentially dilutive securities is reflected in diluted earnings per common share by application of the treasury method. Diluted earnings per share gives effect to all potential dilutive common shares outstanding during the year.

(in thousands, except per share data) For the year ended December 31,	2013	2012	2011
Income from continuing operations	\$220,951	\$196,189	\$22,816
Less: Non-controlling interest in subsidiaries' earnings	1,449	828	201
Income from continuing operations attributable to common shareholders	219,502	195,361	22,615
Discontinued operations, net of tax	—	21,632	3,700
Net income attributable to common shareholders	\$219,502	\$216,993	\$26,315
Average basic shares outstanding	57,896	57,443	58,120
Effect of dilutive stock options	943	850	1,084
Average diluted shares outstanding	58,839	58,293	59,204
Earnings per share - basic:			
Income from continuing operations attributable to common shareholders	\$3.79	\$3.40	\$0.39
Discontinued operations, net of tax	—	0.38	0.06
Net income attributable to common shareholders	\$3.79	\$3.78	\$0.45
Earnings per share - diluted:			
Income from continuing operations attributable to common shareholders	\$3.73	\$3.35	\$0.38
Discontinued operations, net of tax	—	0.37	0.06
Net income attributable to common shareholders	\$3.73	\$3.72	\$0.44

Cash and Cash Equivalents Cash and cash equivalents include highly liquid investments with original maturities of three months or less that are readily convertible to cash and are not subject to significant risk from fluctuations in interest rates. As a result, the carrying amount of cash and cash equivalents approximates fair value.

Accounts Receivable Receivables are carried at net realizable value.

A summary of allowance for doubtful accounts activity follows:

(in thousands) December 31,	2013	2012	2011
Balance at beginning of year	\$6,691	\$7,317	\$8,221
Provisions	1,500	5,878	5,518
Deductions	(3,377)	(6,504)	(6,422)
Balance at end of year	\$4,814	\$6,691	\$7,317

Concentrations of credit risk with respect to accounts receivable are limited due to the large number of customers and relatively small account balances within the majority of the Company's customer base and their dispersion across different businesses. The Company periodically evaluates the financial strength of its customers and believes that its credit risk exposure is limited.

Inventories Inventories consist of the following:

(in thousands) December 31,	2013	2012
Finished goods	\$108,409	\$113,872
Finished parts and subassemblies	36,645	37,517
Work in process	55,434	59,277
Raw materials	168,398	142,059
Total inventories	\$368,886	\$352,725

Inventories include the costs of material, labor and overhead and are stated at the lower of cost or market. Domestic inventories are stated at either the lower of cost or market using the last-in, first-out ("LIFO") method or the lower of cost or market using the first-in, first-out ("FIFO") method. The Company uses LIFO for certain domestic locations, which is allowable under U.S. GAAP, primarily because this method was elected for tax purposes and thus required for financial statement reporting purposes. Inventories held in foreign locations are primarily stated at the lower of

cost or market using the FIFO method. The LIFO

Page 46

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

method is not being used at the Company's foreign locations as such a method is not allowable for tax purposes. Changes in the levels of LIFO inventories have reduced costs of sales by \$1.1 million, increased cost of sales by \$3.1 million and reduced cost of sales by \$0.8 million for the years ended December 31, 2013, 2012 and 2011, respectively. The portion of inventories costed using the LIFO method was 29% of consolidated inventories at both December 31, 2013 and 2012. If inventories that were valued using the LIFO method had been valued under the FIFO method, they would have been higher by \$14.3 million and \$15.4 million at December 31, 2013 and 2012, respectively.

Property, Plant and Equipment, net Property, plant and equipment, net consist of the following:

(in thousands) December 31,	2013	2012
Land	\$71,250	\$69,385
Buildings and improvements	181,228	180,909
Machinery and equipment	588,753	546,083
Gross property, plant and equipment	841,231	796,377
Less: accumulated depreciation	536,176	528,094
Property, plant and equipment, net	\$305,055	\$268,283

Property, plant and equipment are stated at cost and depreciation is calculated by the straight-line method over the estimated useful lives of the respective assets, which range from 10 to 25 years for buildings and improvements and three to ten years for machinery and equipment. Depreciation expense was \$38.7 million, \$40.4 million and \$39.9 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Goodwill and Intangible Assets The Company's business acquisitions have typically resulted in the recognition of goodwill and other intangible assets. The Company follows the provisions under ASC Topic 350, "Intangibles – Goodwill and Other" ("ASC 350") as it relates to the accounting for goodwill in the Consolidated Financial Statements. These provisions require that the Company, on at least an annual basis, evaluate the fair value of the reporting units to which goodwill is assigned and attributed and compare that fair value to the carrying value of the reporting unit to determine if an impairment has occurred. The Company performs its annual impairment testing during the fourth quarter. Impairment testing takes place more often than annually if events or circumstances indicate a change in status that would indicate a potential impairment. The Company believes that there have been no events or circumstances which would more likely than not reduce the fair value for its reporting units below its carrying value. A reporting unit is an operating segment unless discrete financial information is prepared and reviewed by segment management for businesses one level below that operating segment (a "component"), in which case the component would be the reporting unit. At December 31, 2013, the Company had eight reporting units.

When performing its annual impairment assessment, the Company compares the fair value of each of its reporting units to its respective carrying value. Goodwill is considered to be potentially impaired when the net book value of the reporting unit exceeds its estimated fair value. Fair values are established primarily by discounting estimated future cash flows at an estimated cost of capital which varies for each reporting unit and which, as of the Company's most recent annual impairment assessment, ranged between 10.0% and 13% (a weighted average of 11%), reflecting the respective inherent business risk of each of the reporting units tested. This methodology for valuing the Company's reporting units (commonly referred to as the Income Method) has not changed since the adoption of the provisions under ASC 350. The determination of discounted cash flows is based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent best estimates based on current and forecasted market conditions. Profit margin assumptions are projected by each reporting unit based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis of goodwill impairment. In addition to the foregoing, for each reporting unit, market multiples are used to corroborate its discounted cash flow results where fair value is estimated based on earnings multiples determined by available public information of comparable businesses. While the Company believes it has made reasonable estimates and assumptions to calculate the fair value of its reporting units, it is possible a material change could occur. If actual results are not consistent with management's estimates and assumptions, goodwill and other intangible assets may then be determined to be overstated and a charge would need to be taken against net

earnings. Furthermore, in order to evaluate the sensitivity of the fair value calculations on the goodwill impairment test performed during the fourth quarter of 2013, the Company applied a hypothetical, reasonably possible 10% decrease to the fair values of each reporting unit. The effects of this hypothetical 10% decrease would still result in the fair value calculation exceeding the carrying value for each reporting unit.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Changes to goodwill are as follows:

(in thousands) December 31,	2013	2012
Balance at beginning of period	\$813,792	\$820,824
Additions	442,170	—
Disposals	(2,834)	(13,966)
Adjustments to purchase price allocations	—	—
Currency translation	(3,812)	6,934
Balance at end of period	\$1,249,316	\$813,792

For the year ended December 31, 2013, the additions to goodwill represent the initial purchase price allocation related to the December 2013 acquisition of MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI") and the disposals represent the goodwill associated with the Company's sale of a product line as part of the execution of regulatory remedies associated with the MEI acquisition. See discussion in Note 12, "Acquisitions and Divestitures" for further details. For the year ended December 31, 2012, the disposals represent goodwill associated with the Company's divested businesses. See discussion in Note 2, "Discontinued Operations" for further details.

Changes to intangible assets are as follows:

(in thousands) December 31,	2013	2012
Balance at beginning of period, net of accumulated amortization	\$125,913	\$146,227
Additions	301,800	—
Disposals	(311)	(3,789)
Amortization expense	(18,795)	(16,907)
Currency translation and other	316	382
Balance at end of period, net of accumulated amortization	\$408,923	\$125,913

For the year ended December 31, 2013, the additions represent the initial purchase price allocation related to the December 2013 acquisition of MEI and the disposals represent the intangible assets associated with the Company's sale of a product line as part of the execution of regulatory remedies associated with the MEI acquisition. See discussion in Note 12, "Acquisitions and Divestitures" for further details. For the year ended December 31, 2012, the disposals represent intangible assets associated with the Company's divested businesses. See discussion in Note 2, "Discontinued Operations" for further details. For the year ended December 31, 2012, the additions relate to the December 2010 acquisition of Money Controls and the July 2011 acquisition of WTA.

As of December 31, 2013, the Company had \$408.9 million of net intangible assets, of which \$30.8 million were intangibles with indefinite useful lives, consisting of trade names. The Company amortizes the cost of other intangibles over their estimated useful lives unless such lives are deemed indefinite. Intangibles with indefinite useful lives are tested annually for impairment, or when events or changes in circumstances indicate the potential for impairment. If the carrying amount of the intangibles with indefinite useful lives exceeds the fair value, the intangible asset is written down to its fair value. Fair value is calculated using discounted cash flows.

In addition to annual testing for impairment of indefinite-lived intangible assets, the Company reviews all of its long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups and include estimated future revenues, gross profit margins, operating profit margins and capital expenditures which are based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin

assumptions are based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a charge

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

would be taken against net earnings based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that the Company makes which impact these assessments relate to the expected useful lives of long-lived assets and its ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets, and are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods. Historical results to date have generally approximated expected cash flows for the identifiable cash flow generating level. The Company believes that there have been no events or circumstances which would more likely than not reduce the fair value of its indefinite-lived and amortizing intangible assets.

A summary of intangible assets follows:

(in thousands)	Weighted Average Amortization Period of Finite Lived Assets (in years)	December 31, 2013			December 31, 2012		
		Gross Asset	Accumulated Amortization	Net	Gross Asset	Accumulated Amortization	Net
Intellectual property rights	18.2	\$95,052	\$48,960	\$46,092	\$88,614	\$47,202	\$41,412
Customer relationships and backlog	13.9	420,951	86,556	334,395	140,250	73,630	66,620
Drawings	37.9	11,149	9,951	1,198	11,149	9,850	1,299
Other	12.7	64,800	37,562	27,238	51,093	34,511	16,582
Total	14.7	\$591,952	\$183,029	\$408,923	\$291,106	\$165,193	\$125,913

Amortization expense for these intangible assets is currently estimated to be approximately \$45.7 million in 2014, \$38.5 million in 2015, \$37.7 million in 2016 and \$36.8 million in 2017, \$219.4 million in 2018 and thereafter.

Valuation of Long-Lived Assets The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a loss is recognized based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that the Company makes which impact these assessments relate to the expected useful lives of long-lived assets and its ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets, and are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods.

Financial Instruments The Company does not hold or issue derivative financial instruments for trading or speculative purposes. The Company periodically uses forward foreign exchange contracts as economic hedges of anticipated transactions and firm purchase and sale commitments. These contracts are marked to fair value on a current basis and the respective gains and losses are recognized in other income (expense). The Company also periodically enters into interest-rate swap agreements to moderate its exposure to interest rate changes. Interest-rate swaps are agreements to

exchange fixed and variable rate payments based on the notional principal amounts. The changes in the fair value of these derivatives are recognized in other comprehensive income for qualifying cash flow hedges.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Accumulated Other Comprehensive Income (Loss)

The table below provides the accumulated balances for each classification of accumulated other comprehensive income (loss), as reflected on the Consolidated Balance Sheets.

(in thousands)	Defined Benefit Pension and Other Postretirement Items*	Currency Translation Adjustment	Total
Balance as of December 31, 2012	\$(197,806) \$69,729	\$(128,077)
Other comprehensive income before reclassifications	67,354	2,938	70,292
Amounts reclassified from accumulated other comprehensive income	9,134	—	9,134
Net current-period other comprehensive income	76,488	2,938	79,426
Balance as of December 31, 2013	\$(121,318) \$72,667	\$(48,651)

Net of tax benefit of \$53,373, \$89,540 and \$76,179 for 2013, 2012, and 2011, respectively

The table below illustrates the amounts (in thousands) reclassified out of each component of accumulated other comprehensive income for the period ended December 31, 2013.

Details of Accumulated Other Comprehensive Income Components	Amount Reclassified from Accumulated Other Comprehensive Income	Affected Line Item in the Statement of Operations
Amortization of defined benefit pension items:		
Prior-service costs	\$ 23	\$32 and (\$8) have been recorded within Cost of Sales and Selling, General & Administrative, respectively
Net loss (gain)	13,861	\$18,787 and (\$4,926) have been recorded within Cost of Sales and Selling, General & Administrative, respectively
Amortization of other postretirement items:		
Prior-service costs	(236) Recorded within Selling, General & Administrative
Net loss (gain)	(46) Recorded within Selling, General & Administrative
	\$ 13,602	Total before tax
	4,468	Tax benefit
Total reclassifications for the period	\$ 9,134	Net of tax
Recently Issued Accounting Standards		

In July 2013, the Financial Accounting Standard Board ("FASB") issued amended guidance on the presentation of certain unrecognized tax benefits ("UTBs") in the financial statements. The amendments require the netting of UTBs against a deferred tax asset for a loss or other carryforward that would apply in settlement of the uncertain tax positions. UTBs will be netted against all available same-jurisdiction loss or other tax carryforwards that would be

utilized, rather than only against carryforwards created by the UTBs. The amendments require prospective adoption but allow optional retrospective adoption (for all periods presented). The amendments are effective for fiscal years and interim periods within those years beginning after December 15, 2013. The Company is currently evaluating the impact that the amended guidance will have on its consolidated balance sheets when adopted.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 2 – Discontinued Operations

On June 19, 2012, the Company sold Azonix Corporation (“Azonix”), which was part of the former Controls segment, to Cooper Industries for \$44.8 million, of which \$0.9 million and \$0.5 million were recorded in the third and fourth quarters, respectively, resulting in an after tax gain of \$14.5 million. As a result, the Consolidated Statement of Operations presents Azonix as a discontinued operation.

On June 28, 2012, the Company sold certain assets and operations of the Company’s valve service center in Houston, Texas, which was formerly part of the Fluid Handling segment, to Furmanite Corporation for \$9.3 million, resulting in an after tax gain of \$4.6 million. As a result, the Consolidated Statement of Operations presents the Company’s valve service center in Houston, Texas as a discontinued operation.

The operating results of the discontinued operations for the years ended December 31, 2013, 2012 and 2011 were as follows:

(in thousands) For year ended December 31,	2013	2012	2011
Net Sales	\$—	\$25,544	\$45,498
Income from discontinued operations before income taxes	\$—	\$3,777	\$5,693
Provision for income taxes	—	(1,321)	(1,993)
Income from discontinued operations, net of income taxes	\$—	\$2,456	\$3,700

Note 3 – Income Taxes

Provision for Income Taxes

The Company’s income (loss) from continuing operations before taxes is as follows:

(in thousands) For year ended December 31,	2013	2012	2011
U.S. operations	\$177,257	\$175,055	\$(121,411)
Non-U.S. operations	148,759	109,550	136,172
Total	\$326,016	\$284,605	\$14,761

The Company’s provision (benefit) for income taxes from continuing operations consists of:

(in thousands) For year ended December 31,	2013	2012	2011
Current:			
U.S. federal tax	\$11,401	\$5,154	\$1,124
U.S. state and local tax	3,366	1,948	1,928
Non-U.S. tax	41,334	26,314	32,816
Total current	56,101	33,416	35,868
Deferred:			
U.S. federal tax	43,743	52,948	(45,576)
U.S. state and local tax	628	1,068	524
Non-U.S. tax	4,593	984	1,129
Total deferred	48,964	55,000	(43,923)
Total provision (benefit) for income taxes	\$105,065	\$88,416	\$(8,055)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A reconciliation of the statutory U.S. federal tax rate to the Company's effective tax rate from continuing operations is as follows:

(in thousands) For year ended December 31,	2013		2012		2011	
Statutory U.S. federal tax rate	35.0	%	35.0	%	35.0	%
Increase (reduction) from:						
Non-U.S. taxes	(2.0))%	(4.0))%	(98.4))%
Repatriation of non-U.S. earnings, net of credits	0.1	%	0.1	%	8.8	%
State and local taxes, net of federal benefit	1.2	%	1.1	%	18.4	%
U.S. research and development tax credit	(1.9))%	(0.3))%	(15.3))%
U.S. domestic manufacturing deduction	(1.0))%	(0.9))%	(12.7))%
Non-deductible acquisition costs	2.3	%	0.5	%	—	%
Other	(1.5))%	(0.4))%	8.9	%
Effective tax rate	32.2	%	31.1	%	(55.3))%

As of December 31, 2013, the Company has not provided deferred taxes on approximately \$520 million of undistributed earnings of its non-U.S. subsidiaries because the Company intends to permanently reinvest these earnings outside the U.S. Determination of the U.S. income taxes and non-U.S. withholding taxes due upon the repatriation of these earnings is not practicable because the amount of such taxes depends upon circumstances existing when the remittance occurs.

At December 31, 2013 and 2012, \$257 million and \$321 million, respectively of the Company's cash was held by non-U.S. subsidiaries, and is generally subject to U.S. income taxation upon repatriation.

During 2013, 2012 and 2011, income tax benefits attributable to equity-based compensation transactions exceeded amounts recorded at grant date fair market value and, accordingly, were credited to capital surplus in the amounts of \$6.4 million, \$3.6 million and \$6.1 million, respectively.

During 2013, 2012 and 2011, tax provision (benefit) of \$36.2 million, \$(13.4) million, and \$(44.1) million, respectively, related to changes in pension and post-retirement plan assets and benefit obligations, were recorded to accumulated other comprehensive income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Deferred Taxes and Valuation Allowances

The components of deferred tax assets and liabilities included on the Company's Consolidated Balance Sheets are as follows:

(in thousands) December 31,	2013	2012
Deferred tax assets:		
Asbestos-related liabilities	\$206,178	\$230,166
Tax loss and credit carryforwards	136,224	77,098
Pension and post-retirement benefits	29,098	66,313
Inventories	20,334	12,827
Accrued bonus and stock-based compensation	17,003	12,470
Environmental reserves	9,920	12,614
Other	43,674	42,348
Total	462,431	453,836
Less: valuation allowance	150,591	115,014
Total deferred tax assets, net of valuation allowance	311,840	338,822
Deferred tax liabilities:		
Basis difference in intangible assets	(141,762)	(78,086)
Basis difference in fixed assets	(28,287)	(30,130)
Total deferred tax liabilities	(170,049)	(108,216)
Net deferred tax asset	\$141,791	\$230,606
Balance sheet classification:		
Current deferred tax assets	31,651	\$21,618
Long-term deferred tax assets	186,734	245,843
Accrued liabilities	(553)	(2)
Long-term deferred tax liability	(76,041)	(36,853)
Net deferred tax asset	\$141,791	\$230,606

As of December 31, 2013, the Company had U.S. federal, U.S. state and non-U.S. tax loss and credit carryforwards that will expire, if unused, as follows:

(in thousands)	U.S. Federal Tax Credits	U.S. Federal Tax Losses	U.S. State Tax Credits	U.S. State Tax Losses	Non- U.S. Tax Losses	Total
Year of expiration						
2014-2018	\$13,036	\$—	\$2,316	\$50,317	\$4,718

Valuation allowance on tax carryforwards	(21,351)	(373)	(14,280)	(35,178)	(37,561)	(108,743)
Net deferred tax asset on tax carryforwards	\$186	\$26,669	\$626	\$—	\$—	\$27,481

At December 31, 2013 and 2012, the Company determined that it was more likely than not that \$108.7 million and \$62.1 million, respectively, of its deferred tax assets related to tax loss and credit carryforwards will not be realized. As a result, the Company recorded a valuation allowance against these deferred tax assets. The Company also determined that it is more likely than not that a portion of the benefit related to U.S. state and non-U.S. deferred tax assets other than tax loss and credit carryforwards will be not realized. Accordingly, at December 31, 2013 and 2012, a valuation allowance of \$41.9 million and \$52.9 million, respectively, was established against these U.S. state and non-U.S. deferred tax assets. The Company's total valuation allowance at December 31, 2013 and 2012 was \$150.6

million and \$115.0 million, respectively.

Page 53

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unrecognized Tax Benefits

A reconciliation of the beginning and ending amount of the Company's gross unrecognized tax benefits, excluding interest and penalties, is as follows:

(in thousands)	2013	2012	2011
Balance of liability as of January 1	\$19,164	\$9,590	\$3,725
Increase as a result of tax positions taken during a prior year	6,728	5,941	3,334
Decrease as a result of tax positions taken during a prior year	(243)	(25)	(19)
Increase as a result of tax positions taken during the current year	5,897	3,893	2,876
Decrease as a result of settlements with taxing authorities	(28)	—	—
Reduction as a result of a lapse of the statute of limitations	(139)	(235)	(326)
Balance of liability as of December 31	\$31,379	\$19,164	\$9,590

As of December 31, 2013, 2012 and 2011, the amount of the Company's unrecognized tax benefits that, if recognized, would affect its effective tax rate was \$27.7 million, \$18.9 million, and \$9.3 million, respectively. The difference between these amounts and those reflected in the table above relates to (1) offsetting tax effects from other tax jurisdictions, (2) interest expense, net of deferred taxes, and (3) unrecognized tax benefits whose reversal during 2014 would be recorded to goodwill.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of its income tax expense. During the years ended December 31, 2013, 2012 and 2011, the Company recognized interest and penalty expense of \$0.9 million, \$0.4 million, and \$0.2 million, respectively, in its Consolidated Statements of Operations. At December 31, 2013 and 2012, the Company had accrued \$4.0 million and \$1.0 million, respectively, of interest and penalties related to unrecognized tax benefits in its Consolidated Balance Sheets.

During the next twelve months, it is reasonably possible that resolutions of tax examinations, settlements with tax authorities, and the expiration of statutes of limitations could reduce the Company's unrecognized tax benefits by \$3.3 million

Income Tax Examinations

The Company's income tax returns are subject to examination by U.S. federal, U.S. state and local, and non-U.S. tax authorities.

In the fourth quarter of 2013, the U.S. Internal Revenue Service began an examination of the Company's consolidated U.S. federal income tax returns for the years ended December 31, 2010 and December 31, 2011. The Company's consolidated U.S. federal income tax return for 2012 and certain consolidated U.S. federal tax carryforwards generated before 2010 remain subject to examination, as do acquired subsidiaries' U.S. federal income tax returns for 2009 through 2012 and certain acquired U.S. federal tax carryforwards generated before 2009.

With few exceptions, the Company is no longer subject to U.S. state and local or non-U.S. income tax examinations for years before 2008. During 2013, a Hungarian income tax examination of 2009 and 2010 was completed and an assessment of \$0.3 million issued, for which an accrual was previously established. As of December 31, 2013, the Company and its subsidiaries are under examination in various jurisdictions, including Germany (2006 through 2011) and California (2007 and 2008). In addition, the Company's appeal of certain Canadian tax assessments (2007 through 2009) is on-going.

The Company believes it has provided adequate income tax accruals for all jurisdictions' open years; however, the ultimate resolution of all income tax examinations is uncertain. If issues raised during examinations of the Company's income tax returns are not resolved in a manner consistent with management's expectations, the Company could be required to adjust its provision for income taxes in the period such resolution occurs.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 4 – Accrued Liabilities

Accrued liabilities consist of:

(in thousands) December 31,	2013	2012
Employee related expenses	\$91,984	\$90,911
Warranty	18,923	10,718
Other	112,241	119,049
Total	\$223,148	\$220,678

The Company accrues warranty liabilities when it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. Warranty provision is included in cost of sales in the Consolidated Statements of Operations.

A summary of the warranty liabilities is as follows:

(in thousands) December 31,	2013	2012
Balance at beginning of period	\$10,718	\$16,379
Expense	10,230	6,190
Changes due to acquisitions/divestitures	10,211	(498)
Payments / deductions	(12,464)	(11,426)
Currency translation	228	73
Balance at end of period	\$18,923	\$10,718

Note 5 – Other Liabilities

(in thousands) December 31,	2013	2012
Environmental	\$20,610	\$33,825
Other	68,548	43,046
	\$89,158	\$76,871

Note 6 – Research and Development

Research and development costs are expensed when incurred. These costs were \$52.7 million, \$66.9 million and \$64.2 million in 2013, 2012 and 2011, respectively.

Note 7 – Pension and Postretirement Benefits

In the United States, the Company sponsors a defined benefit pension plan that covers approximately 27% of all U.S. employees. In the fourth quarter of 2012, the Company announced that pension eligible employees will no longer earn future benefits in the domestic defined benefit pension plan effective January 1, 2013. The benefits are based on years of service and compensation on a final average pay basis, except for certain hourly employees where benefits are fixed per year of service. This plan is funded with a trustee in respect of past and current service. Charges to expense are based upon costs computed by an independent actuary. The Company's funding policy is to contribute annually amounts that are allowable for federal or other income tax purposes. These contributions are intended to provide for future benefits earned to date. A number of the Company's non-U.S. subsidiaries sponsor defined benefit pension plans that cover approximately 17% of all non-U.S. employees. The benefits are typically based upon years of service and compensation. These plans are funded with trustees in respect of past and current service. Charges to expense are based upon costs computed by independent actuaries. The Company's funding policy is to contribute annually amounts that are allowable for tax purposes or mandated by local statutory requirements. These contributions are intended to provide for future benefits earned to date.

Non-union employees hired after December 31, 2005 are no longer eligible for participation in the ELDEC Corporation ("ELDEC") and Interpoint Corporation ("Interpoint") money purchase plan. Qualifying employees receive an additional 2% Company contribution to their 401(K) plan accounts. Certain of the Company's non-U.S. defined benefit pension plans were also amended whereby eligibility for new participants will cease.

Postretirement health care and life insurance benefits are provided for certain employees hired before January 1, 1990, who meet minimum age and service requirements. The Company does not pre-fund these benefits and has the right to modify or terminate the plan.

A summary of benefit obligations, fair value of plan assets and funded status is as follows:

(in thousands) December 31,	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Change in benefit obligation:				
Beginning of year	\$906,264	\$786,592	\$12,620	\$12,562
Service cost	6,383	13,503	90	107
Interest cost	36,845	37,653	372	497
Plan participants' contributions	1,291	1,324	—	—
Amendments	264	3	—	—
Actuarial (gain) loss	(24,402)	104,539	(864)	670
Settlement	—	(466)	—	—
Benefits paid	(36,788)	(35,561)	(1,226)	(1,226)
Foreign currency exchange impact	7,509	15,513	(25)	10
Acquisition/divestitures/curtailment	37,681	(16,223)	—	—
Adjustment for expenses/tax contained in service cost	(698)	(613)	—	—
Benefit obligation at end of year	\$934,349	\$906,264	\$10,967	\$12,620
Change in plan assets:				
Fair value of plan assets at beginning of year	\$735,580	\$678,250		
Actual return on plan assets	108,016	73,981		
Foreign currency exchange impact	4,235	14,877		
Employer contributions	14,703	4,278		
Administrative expenses paid	(1,218)	(1,103)		
Acquisitions	44,873	—		
Plan participants' contributions	1,291	1,324		
Settlement	—	(466)		
Benefits paid	(36,788)	(35,561)		
Fair value of plan assets at end of year	\$870,692	\$735,580	\$—	\$—
Funded status	\$(63,657)	\$(170,684)	\$(10,967)	\$(12,620)

Amounts recognized in the Consolidated Balance Sheets consist of:

(in thousands) December 31,	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Other assets	\$78,688	\$52,304	\$—	\$—
Current liabilities	(1,024)	(817)	(1,155)	(1,188)
Accrued pension and postretirement benefits	(141,321)	(222,171)	(9,812)	(11,432)
Funded status	\$(63,657)	\$(170,684)	\$(10,967)	\$(12,620)

Amounts recognized in accumulated other comprehensive loss (income) consist of:

(in thousands) December 31,	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Net actuarial loss (gain)	\$177,177	\$290,417	\$(1,531)	\$(707)
Prior service cost (credit)	973	141	(891)	(1,127)
Transition asset	—	(2)	—	—
	\$178,150	\$290,556	\$(2,422)	\$(1,834)

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the U.S. and Non-U.S. plans, are as follows:

	Pension Obligations/Assets					
	U.S.		Non-U.S.		Total	
(in millions) December 31,	2013	2012	2013	2012	2013	2012
Projected benefit obligation	\$470.8	\$506.5	\$463.5	\$399.8	\$934.3	\$906.3
Accumulated benefit obligation	470.8	506.3	450.8	370.0	921.6	876.3
Fair value of plan assets	409.1	357.9	462.0	377.7	871.1	735.6

Information for pension plans with an accumulated benefit obligation in excess of plan assets is as follows:

	Pension Benefits	
	2013	2012
(in thousands) December 31,		
Projected benefit obligation	\$729,759	\$705,007
Accumulated benefit obligation	717,549	683,019
Fair value of plan assets	587,426	482,019

Components of Net Periodic Benefit Cost are as follows:

	Pension Benefits			Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
(in thousands) December 31,						
Net Periodic Benefit Cost:						
Service cost	\$6,383	\$13,503	\$11,710	\$90	\$108	\$121
Interest cost	36,845	37,653	38,163	372	498	588
Expected return on plan assets	(52,225)	(51,437)	(50,620)	—	—	—
Amortization of prior service cost	23	402	421	(236)	(236)	(236)
Amortization of net loss (gain)	13,861	19,403	6,733	(46)	(139)	(110)
Recognized curtailment loss	(288)	460	—	—	—	—
Settlement costs	—	(125)	—	—	—	—
Special termination benefits	—	—	—	—	—	—
Net periodic benefit cost	\$4,599	\$19,859	\$6,407	\$180	\$231	363

The estimated net loss and prior service cost for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year are \$5.0 million and \$0.1 million, respectively. The estimated net gain and prior service cost for the postretirement plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year are \$0.1 million and \$0.2 million, respectively.

The weighted average assumptions used to determine benefit obligations are as follows:

December 31,	Pension Benefits			Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
U.S. Plans:						
Discount rate	4.90 %	4.20 %	5.00 %	3.90 %	3.20 %	4.25 %
Rate of compensation increase	3.50 %	3.50 %	3.50 %			
Non-U.S. Plans:						
Discount rate	4.05 %	3.93 %	4.56 %			
Rate of compensation increase	2.56 %	3.14 %	3.89 %			

The weighted-average assumptions used to determine net periodic benefit cost are as follows:

December 31,	Pension Benefits			Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
U.S. Plans:						
Discount rate	4.20	% 5.00	% 5.80	% 3.20	% 4.25	% 4.25
Expected rate of return on plan assets	7.75	% 8.25	% 8.25	%		
Rate of compensation increase	3.50	% 3.50	% 3.50	%		
Non-U.S. Plans:						
Discount rate	3.93	% 4.56	% 5.40	%		
Expected rate of return on plan assets	7.01	% 7.00	% 7.01	%		
Rate of compensation increase	3.14	% 3.89	% 3.74	%		

The long term expected rate of return on plan assets assumptions were determined by the Company with input from independent investment consultants and plan actuaries, utilizing asset pricing models and considering historical returns. The discount rates used by the Company for valuing pension liabilities are based on a review of high quality corporate bond yields with maturities approximating the remaining life of the projected benefit obligations.

In the U.S. Plan, the 7.75% expected rate of return on assets assumption for 2013 reflected a long-term asset allocation target comprised of an asset allocation range of 25%-75% equity securities, 15%-35% fixed income securities, 10%-35% alternative assets, and 0%-10% cash. As of December 31, 2013, the actual asset allocation for the U.S. plan was 60% equity securities, 18% fixed income securities, 18% alternative assets, and 4% cash and cash equivalents. The Company periodically reviews the Plan's long-term rate of return assumptions to ensure they are in line with prevailing long-term market outlooks. Accordingly, the expected rate of return on assets assumption for the U.S. Plan has been reduced to 7.75% beginning in 2014.

For the non-U.S. Plans, the 7.01% expected rate of return on assets assumption for 2013 reflected a weighted average of the long-term asset allocation targets for our various international plans. As of December 31, 2013, the actual weighted average asset allocation for the non-U.S. plans was 51% equity securities, 37% fixed income securities, 11% alternative assets/other, and 1% cash and cash equivalents.

The assumed health care cost trend rates are as follows:

December 31,	2013	2012
Health care cost trend rate assumed for next year	7.00	% 7.50
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.75	% 4.75
Year that the rate reaches the ultimate trend rate	2019	2019

Assumed health care cost trend rates have a significant effect on the amounts reported for the Company's health care plans.

A one-percentage-point change in assumed health care cost trend rates would have the following effects:

(in thousands)	One Percentage Point Increase	One Percentage Point (Decrease)
Effect on total of service and interest cost components	\$28	\$(25)
Effect on postretirement benefit obligation	\$572	\$(529)

Plan Assets

The Company's pension plan target allocations and weighted-average asset allocations by asset category are as follows:

Asset Category December 31,	Target Allocation	Actual Allocation	
		2013	2012
Equity securities	35%-75%	55	% 49
Fixed income securities	20%-50%	28	% 37

Alternative assets/Other	0%-20%	14	%	13	%
Money market	0%-10%	3	%	1	%

The Company's pension investment committees and trustees, as applicable, exercise reasonable care, skill and caution in making investment decisions. Independent investment consultants are retained to assist in executing the plans' investment strategies. A number of factors are evaluated in determining if an investment strategy will be implemented in the Company's pension trusts. These factors include, but are not limited to, investment style, investment risk, investment manager performance and costs.

The primary investment objective of the Company's various pension trusts is to maximize the value of plan assets, focusing on capital preservation, current income and long-term growth of capital and income. The plans' assets are typically invested in a broad range of equity securities, fixed income securities, alternative assets and cash instruments. The Company's investment strategies across its pension plans worldwide results in a global target asset allocation range of 35%-75% equity securities, 20%-50% fixed income securities, 0%-20% alternative assets, and 0%-10% money market, as noted in the table above.

Equity securities include investments in large-cap, mid-cap, and small-cap companies located in both developed countries and emerging markets around the world. Fixed income securities include government bonds of various countries, corporate bonds that are primarily investment-grade, and mortgage-backed securities. Alternative assets include investments in hedge funds with a wide variety of strategies.

The Company periodically reviews investment managers and their performance in relation to the plans' investment objectives. The Company expects its pension trust investments to meet or exceed their predetermined benchmark indices, net of fees. Generally, however, the Company realizes that investment strategies should be given a full market cycle, normally over a three to five year time period, to achieve stated objectives.

Equity securities include Crane Co. common stock, which represents 5% and 4% of plan assets at December 31, 2013 and 2012, respectively.

The fair value of the Company's pension plan assets at December 31, 2013, by asset category are as follows:

(in thousands)	Active Markets for Identical Assets Level 1	Other Observable Inputs Level 2	Unobservable Inputs Level 3	Total Fair Value
Cash and Money Markets	\$19,425	\$—	\$—	\$19,425
Common Stocks

(i) These funds invest in a blend of equities, fixed income, cash and property in the U.S. and seek to outperform a similarly weighted index.

Cash Flows

The Company expects, based on current actuarial calculations, to contribute cash of approximately \$24 million to its defined benefit pension plans and \$1 million to its other postretirement benefit plan in 2014. Cash contributions in subsequent years will depend on a number of factors including the investment performance of plan assets.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

Estimated future payments (in thousands)	Pension Benefits	Postretirement Benefits
2014	\$40,386	\$1,177
2015	41,619	1,174
2016	43,188	1,168
2017	45,281	1,185
2018	46,848	1,182
2019-2023	262,218	4,843

Total payments \$479,540 \$ 10,729

The Company's subsidiaries ELDEC and Interpoint have a money purchase plan to provide retirement benefits for all eligible employees. The annual contribution in 2012 was 5% of each eligible participant's gross compensation. The contributions were \$2.2 million in 2013, \$2.2 million in 2012 and \$2.3 million.

The Company and its subsidiaries sponsor savings and investment plans that are available to eligible employees of the Company and its subsidiaries. The Company made contributions to the plans of \$6.7 million in 2013, \$6.4 million in 2012 and \$6.6 million in 2011.

In addition to participant deferral contributions and Company matching contributions on those deferrals, the Company provides a 2% non-matching contribution to eligible participants. The Company made non-matching contributions to these plans of \$3.3 million in 2013, \$3.3 million in 2012 and \$2.4 million in 2011.

Note 8 – Long-Term Debt and Notes Payable

The following table summarizes the Company's debt as of December 31, 2013 and 2012:

(in thousands) December 31,	2013	2012
Long-term debt consists of:		
5.50% notes due 2013 (a)	\$—	\$ 199,898
2.75% notes due 2018	249,965	—
4.45% notes due 2023	299,976	—
6.55% notes due 2036	199,229	199,194
Total long-term debt	\$ 749,170	\$ 399,092
Short-term borrowings	\$ 125,826	\$ 1,123

(a) As of December 31, 2012, the Company classified the notes which mature in 2013 as long-term debt due to the Company's intent to refinance on a long-term basis and the ability to utilize the existing five-year \$300 million Amended and Restated Credit Agreement.

In December 2013, the Company issued 10 year notes having an aggregate principal amount of \$300 million. The notes are unsecured, senior obligations that mature on December 15, 2023 and bear interest at 4.45% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 4.56%.

Also in December 2013, the Company issued five year notes having an aggregate principal amount of \$250 million. The notes are unsecured, senior obligations that mature on December 15, 2018 and bear interest at 2.75% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 2.92%.

Senior unsecured notes having an aggregate principal amount of \$200 million matured in the third quarter of 2013. These notes were repaid using \$90 million of cash and \$110 million of multi-year credit facility borrowings.

In December 2012, the Company obtained \$600 million of bank loan commitments in support of its acquisition of MEI. The commitments supported a \$200 million expansion of the \$300 million credit facility referred to in the next paragraph, and an additional \$400 million 364 day credit facility. The 364 day credit facility was terminated on December 13, 2013 after being used to fund the MEI acquisition.

In May 2012, the Company entered into a five year, \$300 million Amended and Restated Credit Agreement (as subsequently amended, and increased to \$500 million, the “facility”), which is due to expire in May 2017. The facility allows the Company to borrow, repay, or to the extent permitted by the agreement, prepay and re-borrow funds at any time prior to the stated maturity date, and the loan proceeds may be used for general corporate purposes including financing for acquisitions. Interest is based on, at our option, (1) a LIBOR-based formula that is dependent in part on the Company's credit rating (LIBOR plus 105 basis points as of the date of this Report; up to a maximum of LIBOR plus 147.5 basis points), or (2) the greatest of (i) the JPMorgan Chase Bank, N.A.'s prime rate, (ii) the Federal Funds rate plus 50 basis points, or (iii) an adjusted LIBOR rate plus 100 basis points, plus a spread dependent on the Company's credit rating (5 basis points as of the date of this Report; up to a maximum of 47.5 basis points). At December 31, 2013, outstanding borrowings under the facility totaled \$125 million. The facility contains customary affirmative and negative covenants for credit facilities of this type, including the absence of a

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

material adverse effect and limitations on the Company and its subsidiaries with respect to indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of all or substantially all assets, transactions with affiliates and hedging arrangements. The facility also provides for customary events of default, including failure to pay principal, interest or fees when due, failure to comply with covenants, the fact that any representation or warranty made by us is false in any material respect, default under certain other indebtedness, certain insolvency or receivership events affecting us and our subsidiaries, certain ERISA events, material judgments and a change in control of the Company. The facility contains a leverage ratio covenant requiring a ratio of total debt to total capitalization of less than or equal to 65%. At December 31, 2013, our ratio was 42%

(in thousands) December 31,	2013	
Short-term borrowings	\$125,826	
Long-term debt	749,170	
Total indebtedness	\$874,996	
Total indebtedness	\$874,996	
Total shareholders' equity	1,204,319	
Capitalization	\$2,079,315	
Total indebtedness to capitalization	42	%

In November 2006, the Company issued 30 year notes having an aggregate principal amount of \$200 million. The notes are unsecured, senior obligations of the Company that mature on November 15, 2036 and bear interest at 6.55% per annum, payable semi-annually on May 15 and November 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or in part, at the option of the Company. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require the Company to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization; these notes have an effective annualized interest rate of 6.67%.

All outstanding senior, unsecured notes were issued under an indenture dated as of April 1, 1991. The indenture contains certain limitations on liens and sale and lease-back transactions.

At December 31, 2013, the Company had open standby letters of credit of \$28 million issued pursuant to a \$60 million uncommitted Letter of Credit Reimbursement Agreement, and certain other credit lines, substantially all of which expire in 2014.

Note 9 - Fair Value Measurements

Accounting standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are to be considered from the perspective of a market participant that holds the asset or owes the liability. The standards also establish a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The standards describe three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices in active markets for identical or similar assets and liabilities.

Level 2: Quoted prices for identical or similar assets and liabilities in markets that are not active or observable inputs other than quoted prices in active markets for identical or similar assets and liabilities. Level 2 assets and liabilities include over-the-counter derivatives, principally forward foreign exchange contracts, whose value is determined using pricing models with inputs that are generally based on published foreign exchange rates and exchange traded prices, adjusted for other specific inputs that are primarily observable in the market or can be derived principally from or corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes assets and liabilities measured at fair value on a recurring basis at the dates indicated:

(in thousands)	December 31, 2013			Total Fair Value	December 31, 2012			Total Fair Value
	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	
	Level 1	Level 2	Level 3		Level 1	Level 2	Level 3	
Assets:								
Derivatives - foreign exchange contracts	\$—	\$2,787	\$—	\$2,787	\$—	\$2,617	\$—	\$2,617
Liabilities:								
Derivatives - foreign exchange contracts	\$—	\$5,861	\$—	\$5,861	\$—	\$172	\$—	\$172

Valuation Technique - The Company's derivative assets and liabilities include foreign exchange contract derivatives that are measured at fair value using internal models based on observable market inputs such as forward rates and interest rates. Based on these inputs, the derivatives are classified within Level 2 of the valuation hierarchy.

The carrying value of the Company's financial assets and liabilities, including cash and cash equivalents, accounts receivable, accounts payable and short-term loans payable approximate fair value, without being discounted, due to the short periods during which these amounts are outstanding. Long-term debt rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate the fair value for debt issues that are not quoted on an exchange. The estimated fair value of long-term debt is measured using Level 2 inputs and was \$759.7 million and \$431.1 million at December 31, 2013 and 2012, respectively.

Note 10 - Derivative Instruments and Hedging Activities

The Company is exposed to certain risks related to its ongoing business operations, including market risks related to fluctuation in currency exchange. The Company uses foreign exchange contracts to manage the risk of certain cross-currency business relationships to minimize the impact of currency exchange fluctuations on the Company's earnings and cash flows. The Company does not hold or issue derivative financial instruments for trading or speculative purposes. As of December 31, 2013, the foreign exchange contracts designated as hedging instruments did not have a material impact on the Company's consolidated statement of operations, balance sheet or cash flows. Foreign exchange contracts not designated as hedging instruments, which primarily pertain to foreign exchange fluctuation risk of intercompany positions, had a notional value of \$300 million and \$178 million as of December 31, 2013 and December 31, 2012, respectively. The settlement of derivative contracts for the years ended December 31, 2013, 2012 and 2011 resulted in net cash inflows (outflows) of \$4.9 million, \$(13.0) million and \$(4.7) million, respectively and is reported with "Total provided by operating activities" on the Consolidated Statements of Cash Flows.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 11 - Commitments and Contingencies

Leases

The Company leases certain facilities, vehicles and equipment. Future minimum payments, by year and in the aggregate, under leases with initial or remaining terms of one year or more consisted of the following at December 31, 2013:

(in thousands)	Operating Leases	Minimum Sublease Income	Net
2014	\$15,110	\$183	\$14,927
2015	10,789	—	10,789
2016	8,397	—	8,397
2017	6,265	—	6,265
2018	5,020	—	5,020
Thereafter	3,744	—	3,744
Total minimum lease payments	\$49,325	\$183	\$49,142

Rental expense was \$26.9 million, \$26.7 million and \$27.1 million for 2013, 2012 and 2011, respectively.

The Company entered into a seven year operating lease for an airplane in the first quarter of 2007 which included a maximum residual value guarantee of \$14.1 million by the Company if the fair value of the airplane was less than \$22.1 million. This commitment was secured by the leased airplane and the residual value guarantee liability was \$9.5 million as of December 31, 2013, and was paid in January 2014 in conjunction with the Company entering into a new 5 year operating lease. This lease includes a residual value guarantee of \$7.8 million by the Company if the fair value of the airplane is less than \$9.5 million.

Asbestos Liability

Information Regarding Claims and Costs in the Tort System

As of December 31, 2013, the Company was a defendant in cases filed in numerous state and federal courts alleging injury or death as a result of exposure to asbestos. Activity related to asbestos claims during the periods indicated was as follows:

For the year ended December 31,	2013	2012	2011
Beginning claims	56,442	58,658	64,839
New claims	2,950	3,542	3,748
Settlements	(1,142)	(1,030)	(1,117)
Dismissals	(6,762)	(4,919)	(11,059)
MARDOC claims*	2	191	2,247
Ending claims	51,490	56,442	58,658

* As of January 1, 2010, the Company was named in 36,448 maritime actions which had been administratively dismissed by the United States District Court for the Eastern District of Pennsylvania ("MARDOC claims"), and therefore were not classified as active claims. In addition, the Company was named in 8 new maritime actions in 2010 (also not classified as active claims). Through December 31, 2013, pursuant to an ongoing review process initiated by the Court, 26,562 claims were permanently dismissed, and 3,393 claims were classified as active, of which 2,980 claims were subsequently dismissed, 225 claims were subsequently settled and 188 claims remain active (and have been added to "Ending claims"). By settlement agreement of December 30, 2013, the Company resolved all of the remaining MARDOC claims with plaintiffs' counsel. The agreement will result in the dismissal of all MARDOC claims against the Company.

Of the 51,490 pending claims as of December 31, 2013, approximately 19,000 claims were pending in New York, approximately 9,700 claims were pending in Texas, approximately 5,300 claims were pending in Mississippi, and approximately 600 claims were pending in Ohio, all jurisdictions in which legislation or judicial orders restrict the types of claims that can proceed to trial on the merits.

Substantially all of the claims the Company resolves are either dismissed or concluded through settlements. To date, the Company has paid two judgments arising from adverse jury verdicts in asbestos matters. The first payment, in the

amount of \$2.54 million, was made on July 14, 2008, approximately two years after the adverse verdict in the Joseph Norris matter in California, after the Company had exhausted all post-trial and appellate remedies. The second payment, in the amount of \$0.02 million, was made in June 2009 after an adverse verdict in the Earl Haupt case in Los Angeles, California on April 21, 2009.

The Company has tried several cases resulting in defense verdicts by the jury or directed verdicts for the defense by the court, one of which, the Patrick O'Neil claim in Los Angeles, was reversed on appeal. In an opinion dated January 12, 2012, the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

California Supreme Court reversed the decision of the Court of Appeal and instructed the trial court to enter a judgment of nonsuit in favor of the defendants.

On March 14, 2008, the Company received an adverse verdict in the James Baccus claim in Philadelphia, Pennsylvania, with compensatory damages of \$2.45 million and additional damages of \$11.9 million. The Company's post-trial motions were denied by order dated January 5, 2009. The case was concluded by settlement in the fourth quarter of 2010 during the pendency of the Company's appeal to the Superior Court of Pennsylvania.

On May 16, 2008, the Company received an adverse verdict in the Chief Brewer claim in Los Angeles, California. The amount of the judgment entered was \$0.68 million plus interest and costs. The Company pursued an appeal in this matter, and on August 2, 2012 the California Court of Appeal reversed the judgment and remanded the matter to the trial court for entry of judgment notwithstanding the verdict in favor of the Company on the ground that this claim could not be distinguished factually from the Patrick O'Neil case decided in the Company's favor by the California Supreme Court.

On February 2, 2009, the Company received an adverse verdict in the Dennis Woodard claim in Los Angeles, California. The jury found that the Company was responsible for one-half of one percent (0.5%) of plaintiffs' damages of \$16.93 million; however, based on California court rules regarding allocation of damages, judgment was entered against the Company in the amount of \$1.65 million, plus costs. Following entry of judgment, the Company filed a motion with the trial court requesting judgment in the Company's favor notwithstanding the jury's verdict, and on June 30, 2009, the court advised that the Company's motion was granted and judgment was entered in favor of the Company. The trial court's ruling was affirmed on appeal by order dated August 25, 2011. The plaintiffs appealed that ruling to the Supreme Court of California, which dismissed the appeal on February 29, 2012; the matter is now finally determined in the Company's favor.

On March 23, 2010, a Philadelphia, Pennsylvania, state court jury found the Company responsible for a 1/11th share of a \$14.5 million verdict in the James Nelson claim, and for a 1/20th share of a \$3.5 million verdict in the Larry Bell claim. On February 23, 2011, the court entered judgment on the verdicts in the amount of \$0.2 million against the Company, only, in Bell, and in the amount of \$4.0 million, jointly, against the Company and two other defendants in Nelson, with additional interest in the amount of \$0.01 million being assessed against the Company, only, in Nelson. All defendants, including the Company, and the plaintiffs took timely appeals of certain aspects of those judgments. The Company resolved the Bell appeal by settlement, which is reflected in the settled claims for 2012. On September 5, 2013, a panel of the Pennsylvania Superior Court, in a 2-1 decision, vacated the Nelson verdict against all defendants, reversing and remanding for a new trial. Plaintiffs have requested a rehearing in the Superior Court, which the defendants, including the Company, have opposed. By order dated November 18, 2013, the Superior Court vacated the panel opinion, and granted en banc reargument at a date to be scheduled.

On August 17, 2011, a New York City state court jury found the Company responsible for a 99% share of a \$32 million verdict on the Ronald Dummitt claim. The Company filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages, which the Company argued were excessive under New York appellate case law governing awards for non-economic losses. The Court held oral argument on these motions on October 18, 2011 and issued a written decision on August 21, 2012 confirming the jury's liability findings but reducing the award of damages to \$8 million. At plaintiffs' request, the Court entered a judgment in the amount of \$4.9 million against the Company, taking into account settlement offsets and accrued interest under New York law. The Company has appealed.

On March 9, 2012, a Philadelphia, Pennsylvania, state court jury found the Company responsible for a 1/8th share of a \$123,000 verdict in the Frank Paasch claim. The Company and plaintiffs filed post-trial motions. On May 31, 2012, on plaintiffs' motion, the Court entered an order dismissing the claim against the Company, with prejudice, and without any payment.

On August 29, 2012, the Company received an adverse verdict in the William Paulus claim in Los Angeles, California. The jury found that the Company was responsible for ten percent (10%), of plaintiffs' non-economic damages of \$6.5 million, plus a portion of plaintiffs' economic damages of \$0.4 million. Based on California court rules regarding allocation of damages, judgment was entered in the amount of \$0.8 million against the Company. The

Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict, which were denied. The Company has appealed.

On October 23, 2012, the Company received an adverse verdict in the Gerald Suttner claim in Buffalo, New York. The jury found that the Company was responsible for four percent (4%) of plaintiffs' damages of \$3 million. The Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict, which were denied. The court entered a judgment of \$0.1 million against the Company. The Company has appealed. On November 28, 2012, the Company received an adverse verdict in the James Hellam claim in Oakland, CA. The jury found that the Company was responsible for seven percent (7%) of plaintiffs' non-economic damages of \$4.5 million, plus a portion of

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

their economic damages of \$0.9 million. Based on California court rules regarding allocation of damages, judgment was entered against the Company in the amount of \$1.282 million. The Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict and also requesting that settlement offsets be applied to reduce the judgment in accordance with California law. On January 31, 2013, the court entered an order disposing partially of that motion. On March 1, 2013, the Company filed an appeal regarding the portions of the motion that were denied. The court entered judgment against the Company in the amount of \$1.1 million. The Company appealed.

On February 25, 2013, a Philadelphia, Pennsylvania, state court jury found the Company responsible for a 1/10th share of a \$2.5 million verdict in the Thomas Amato claim and a 1/5th share of a \$2.3 million verdict in the Frank Vinciguerra claim, which were consolidated for trial. The Company filed post-trial motions requesting judgments in the Company's favor notwithstanding the jury's verdicts or new trials, and also requesting that settlement offsets be applied to reduce the judgment in accordance with Pennsylvania law. These motions were denied. The Company has appealed.

On March 1, 2013, a New York City state court jury entered a \$35 million verdict against the Company in the Ivo Peraica claim. The Company filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages, which the Company argues were excessive under New York appellate case law governing awards for non-economic losses and further were subject to settlement offsets. After the trial court remitted the verdict to \$18 million, but otherwise denied the Company's post-trial motion, judgment also entered against the Company in the amount of \$10.6 million (including interest). The Company has appealed. The Company has taken a separate appeal of the trial court's denial of its summary judgment motion.

On July 31, 2013, a Buffalo, New York state court jury entered a \$3.1 million verdict against the Company in the Lee Holdsworth claim. The Company plans to file post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages, which the Company argues were excessive under New York appellate case law governing awards for non-economic losses and further were subject to settlement offsets. Plaintiffs have requested judgment in the amount of \$1.1 million. Post-trial motions remain pending. The Company plans to pursue an appeal if necessary.

On September 11, 2013, a Columbia, South Carolina state court jury in the Lloyd Garvin claim entered an \$11 million verdict for compensatory damages against the Company and two other defendants jointly, and also awarded exemplary damages against the Company in the amount of \$11 million. The jury also awarded exemplary damages against both other defendants. The Company has filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages. The Company plans to pursue an appeal if necessary.

On September 17, 2013, a Fort Lauderdale, Florida state court jury in the Richard DeLisle claim found the Company responsible for 16 percent of an \$8 million verdict. The trial court denied all parties' post-trial motions, and entered judgment against the Company in the amount of \$1.3 million. The Company has appealed.

Such judgment amounts are not included in the Company's incurred costs until all available appeals are exhausted and the final payment amount is determined.

The gross settlement and defense costs incurred (before insurance recoveries and tax effects) for the Company for the years ended December 31, 2013, 2012 and 2011 totaled \$90.8 million, \$96.1 million and \$105.5 million, respectively. In contrast to the recognition of settlement and defense costs, which reflect the current level of activity in the tort system, cash payments and receipts generally lag the tort system activity by several months or more, and may show some fluctuation from quarter to quarter. Cash payments of settlement amounts are not made until all releases and other required documentation are received by the Company, and reimbursements of both settlement amounts and defense costs by insurers may be uneven due to insurer payment practices, transitions from one insurance layer to the next excess layer and the payment terms of certain reimbursement agreements. The Company's total pre-tax payments for settlement and defense costs, net of funds received from insurers, for the years ended December 31, 2013, 2012 and 2011 totaled \$62.8 million, \$78.0 million and \$79.3 million, respectively. Detailed below are the comparable amounts for the periods indicated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(in millions) For the year ended December 31,	2013	2012	2011
Settlement / indemnity costs incurred (1)	\$31.6	\$37.5	\$50.2
Defense costs incurred (1)	59.1	58.7	55.3
Total costs incurred	\$90.8	\$96.1	\$105.5
Settlement / indemnity payments	\$37.8	\$38.0	\$55.0
Defense payments	59.5	59.8	56.5
Insurance receipts	(34.5)	(19.8)	(32.2)
Pre-tax cash payments	\$62.8	\$78.0	\$79.3

(1) Before insurance recoveries and tax effects.

The amounts shown for settlement and defense costs incurred, and cash payments, are not necessarily indicative of future period amounts, which may be higher or lower than those reported.

Cumulatively through December 31, 2013, the Company has resolved (by settlement or dismissal) approximately 100,000 claims, not including the MARDOC claims referred to above. The related settlement cost incurred by the Company and its insurance carriers is approximately \$399 million, for an average settlement cost per resolved claim of approximately \$4,000. The average settlement cost per claim resolved during the years ended December 31, 2013, 2012 and 2011 was \$3,300, \$6,300 and \$4,123 respectively. Because claims are sometimes dismissed in large groups, the average cost per resolved claim, as well as the number of open claims, can fluctuate significantly from period to period. In addition to large group dismissals, the nature of the disease and corresponding settlement amounts for each claim resolved will also drive changes from period to period in the average settlement cost per claim. Accordingly, the average cost per resolved claim is not considered in the Company's periodic review of its estimated asbestos liability. For a discussion regarding the four most significant factors affecting the liability estimate, see "Effects on the Consolidated Financial Statements".

Effects on the Consolidated Financial Statements

The Company has retained the firm of Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the field, to assist management in estimating the Company's asbestos liability in the tort system. HR&A reviews information provided by the Company concerning claims filed, settled and dismissed, amounts paid in settlements and relevant claim information such as the nature of the asbestos-related disease asserted by the claimant, the jurisdiction where filed and the time lag from filing to disposition of the claim. The methodology used by HR&A to project future asbestos costs is based largely on the Company's experience during a base reference period of eleven quarterly periods (consisting of the two full preceding calendar years and three additional quarterly periods to the estimate date) for claims filed, settled and dismissed. The Company's experience is then compared to the results of widely used previously conducted epidemiological studies estimating the number of individuals likely to develop asbestos-related diseases. Those studies were undertaken in connection with national analyses of the population of workers believed to have been exposed to asbestos. Using that information, HR&A estimates the number of future claims that would be filed against the Company and estimates the aggregate settlement or indemnity costs that would be incurred to resolve both pending and future claims based upon the average settlement costs by disease during the reference period. This methodology has been accepted by numerous courts. After discussions with the Company, HR&A augments its liability estimate for the costs of defending asbestos claims in the tort system using a forecast from the Company which is based upon discussions with its defense counsel. Based on this information, HR&A compiles an estimate of the Company's asbestos liability for pending and future claims, based on claim experience during the reference period and covering claims expected to be filed through the indicated forecast period. The most significant factors affecting the liability estimate are (1) the number of new mesothelioma claims filed against the Company, (2) the average settlement costs for mesothelioma claims, (3) the percentage of mesothelioma claims dismissed against the Company and (4) the aggregate defense costs incurred by the Company. These factors are interdependent, and no one factor predominates in determining the liability estimate. Although the methodology used by HR&A can be applied to show claims and costs for periods subsequent to the indicated period (up to and including the endpoint of the asbestos studies referred to above), management believes that the level of uncertainty regarding the

various factors used in estimating future asbestos costs is too great to provide for reasonable estimation of the number of future claims, the nature of such claims or the cost to resolve them for years beyond the indicated estimate. In the Company's view, the forecast period used to provide the best estimate for asbestos claims and related liabilities and costs is a judgment based upon a number of trend factors, including the number and type of claims being filed each year; the jurisdictions where such claims are filed, and the effect of any legislation or judicial orders in such jurisdictions restricting the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

types of claims that can proceed to trial on the merits; and the likelihood of any comprehensive asbestos legislation at the federal level. In addition, the dynamics of asbestos litigation in the tort system have been significantly affected over the past five to ten years by the substantial number of companies that have filed for bankruptcy protection, thereby staying any asbestos claims against them until the conclusion of such proceedings, and the establishment of a number of post-bankruptcy trusts for asbestos claimants, which are estimated to provide \$36 billion for payments to current and future claimants. These trend factors have both positive and negative effects on the dynamics of asbestos litigation in the tort system and the related best estimate of the Company's asbestos liability, and these effects do not move in a linear fashion but rather change over multi-year periods. Accordingly, the Company's management continues to monitor these trend factors over time and periodically assesses whether an alternative forecast period is appropriate.

Each quarter, HR&A compiles an update based upon the Company's experience in claims filed, settled and dismissed during the updated reference period (consisting of the preceding eleven quarterly periods) as well as average settlement costs by disease category (mesothelioma, lung cancer, other cancer, and non-malignant conditions including asbestosis) during that period. In addition to this claims experience, the Company also considers additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. As part of this process, the Company also takes into account trends in the tort system such as those enumerated above. Management considers all these factors in conjunction with the liability estimate of HR&A and determines whether a change in the estimate is warranted.

Liability Estimate. With the assistance of HR&A, effective as of December 31, 2011, the Company updated and extended its estimate of the asbestos liability, including the costs of settlement or indemnity payments and defense costs relating to currently pending claims and future claims projected to be filed against the Company through 2021. The Company's previous estimate was for asbestos claims filed or projected to be filed through 2017. As a result of this updated estimate, the Company recorded an additional liability of \$285 million as of December 31, 2011. The Company's decision to take this action at such date was based on several factors which contribute to the Company's ability to reasonably estimate this liability for the additional period noted. First, the number of mesothelioma claims (which although constituting approximately 8% of the Company's total pending asbestos claims, have accounted for approximately 90% of the Company's aggregate settlement and defense costs) being filed against the Company and associated settlement costs have recently stabilized. In the Company's opinion, the outlook for mesothelioma claims expected to be filed and resolved in the forecast period is reasonably stable. Second, there have been favorable developments in the trend of case law which has been a contributing factor in stabilizing the asbestos claims activity and related settlement costs. Third, there have been significant actions taken by certain state legislatures and courts over the past several years that have reduced the number and types of claims that can proceed to trial, which has been a significant factor in stabilizing the asbestos claims activity. Fourth, the Company has now entered into coverage-in-place agreements with almost all of its excess insurers, which enables the Company to project a more stable relationship between settlement and defense costs paid by the Company and reimbursements from its insurers. Taking all of these factors into account, the Company believes that it can reasonably estimate the asbestos liability for pending claims and future claims to be filed through 2021. While it is probable that the Company will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, the Company does not believe that any such amount can be reasonably estimated beyond 2021. Accordingly, no accrual has been recorded for any costs which may be incurred for claims which may be made subsequent to 2021.

Management has made its best estimate of the costs through 2021 based on the analysis by HR&A completed in January 2012. Through December 31, 2013, the Company's actual experience during the updated reference period for mesothelioma claims filed and dismissed generally approximated the assumptions in the Company's liability estimate. In addition to this claims experience, the Company considered additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. Based on this evaluation, the Company determined that no change in the estimate was warranted for the period ended December 31, 2013. Nevertheless, if certain factors show a pattern of sustained increase or decrease, the liability could change materially; however, all the assumptions used in

estimating the asbestos liability are interdependent and no single factor predominates in determining the liability estimate. Because of the uncertainty with regard to and the interdependency of such factors used in the calculation of its asbestos liability, and since no one factor predominates, the Company believes that a range of potential liability estimates beyond the indicated forecast period cannot be reasonably estimated.

A liability of \$894 million was recorded as of December 31, 2011 to cover the estimated cost of asbestos claims now pending or subsequently asserted through 2021, of which approximately 80% is attributable to settlement and defense costs for future claims projected to be filed through 2021. The liability is reduced when cash payments are made in respect of settled claims and defense costs. The liability was \$699 million as of December 31, 2013. It is not possible to forecast when cash payments related to the asbestos liability will be fully expended; however, it is expected such cash payments will continue for a number of years past 2021, due to the significant proportion of future claims included in the estimated asbestos liability and the lag time between

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

the date a claim is filed and when it is resolved. None of these estimated costs have been discounted to present value due to the inability to reliably forecast the timing of payments. The current portion of the total estimated liability at December 31, 2013 was \$88 million and represents the Company's best estimate of total asbestos costs expected to be paid during the twelve-month period. Such amount is based upon the HR&A model together with the Company's prior year payment experience for both settlement and defense costs.

Insurance Coverage and Receivables. Prior to 2005, a significant portion of the Company's settlement and defense costs were paid by its primary insurers. With the exhaustion of that primary coverage, the Company began negotiations with its excess insurers to reimburse the Company for a portion of its settlement and/or defense costs as incurred. To date, the Company has entered into agreements providing for such reimbursements, known as "coverage-in-place", with eleven of its excess insurer groups. Under such coverage-in-place agreements, an insurer's policies remain in force and the insurer undertakes to provide coverage for the Company's present and future asbestos claims on specified terms and conditions that address, among other things, the share of asbestos claims costs to be paid by the insurer, payment terms, claims handling procedures and the expiration of the insurer's obligations. Similarly, under a variant of coverage-in-place, the Company has entered into an agreement with a group of insurers confirming the aggregate amount of available coverage under the subject policies and setting forth a schedule for future reimbursement payments to the Company based on aggregate indemnity and defense payments made. In addition, with ten of its excess insurer groups, the Company entered into policy buyout agreements, settling all asbestos and other coverage obligations for an agreed sum, totaling \$82.5 million in aggregate. Reimbursements from insurers for past and ongoing settlement and defense costs allocable to their policies have been made in accordance with these coverage-in-place and other agreements. All of these agreements include provisions for mutual releases, indemnification of the insurer and, for coverage-in-place, claims handling procedures. With the agreements referenced above, the Company has concluded settlements with all but one of its solvent excess insurers whose policies are expected to respond to the aggregate costs included in the updated liability estimate. That insurer, which issued a single applicable policy, has been paying the shares of defense and indemnity costs the Company has allocated to it, subject to a reservation of rights. There are no pending legal proceedings between the Company and any insurer contesting the Company's asbestos claims under its insurance policies.

In conjunction with developing the aggregate liability estimate referenced above, the Company also developed an estimate of probable insurance recoveries for its asbestos liabilities. In developing this estimate, the Company considered its coverage-in-place and other settlement agreements described above, as well as a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, the timing and amount of reimbursements will vary because the Company's insurance coverage for asbestos claims involves multiple insurers, with different policy terms and certain gaps in coverage. In addition to consulting with legal counsel on these insurance matters, the Company retained insurance consultants to assist management in the estimation of probable insurance recoveries based upon the aggregate liability estimate described above and assuming the continued viability of all solvent insurance carriers. Based upon the analysis of policy terms and other factors noted above by the Company's legal counsel, and incorporating risk mitigation judgments by the Company where policy terms or other factors were not certain, the Company's insurance consultants compiled a model indicating how the Company's historical insurance policies would respond to varying levels of asbestos settlement and defense costs and the allocation of such costs between such insurers and the Company. Using the estimated liability as of December 31, 2011 (for claims filed or expected to be filed through 2021), the insurance consultant's model forecasted that approximately 25% of the liability would be reimbursed by the Company's insurers. While there are overall limits on the aggregate amount of insurance available to the Company with respect to asbestos claims, those overall limits were not reached by the total estimated liability currently recorded by the Company, and such overall limits did not influence the Company in its determination of the asset amount to record. The proportion of the asbestos liability that is allocated to certain insurance coverage years, however, exceeds the limits of available insurance in those years. The Company allocates to itself the amount of the asbestos liability (for claims filed or expected to be filed through 2021) that is in excess of available insurance

coverage allocated to such years. An asset of \$225 million was recorded as of December 31, 2011 representing the probable insurance reimbursement for such claims expected through 2021. The asset is reduced as reimbursements and other payments from insurers are received. The asset was \$171 million as of December 31, 2013.

The Company reviews the aforementioned estimated reimbursement rate with its insurance consultants on a periodic basis in order to confirm its overall consistency with the Company's established reserves. The reviews encompass consideration of the performance of the insurers under coverage-in-place agreements and the effect of any additional lump-sum payments under policy buyout agreements. Since December 2011, there have been no developments that have caused the Company to change the estimated 25% rate, although actual insurance reimbursements vary from period to period, and will decline over time, for the reasons cited above.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Uncertainties. Estimation of the Company's ultimate exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims and the manner of their resolution. The Company cautions that its estimated liability is based on assumptions with respect to future claims, settlement and defense costs based on past experience that may not prove reliable as predictors. A significant upward or downward trend in the number of claims filed, depending on the nature of the alleged injury, the jurisdiction where filed and the quality of the product identification, or a significant upward or downward trend in the costs of defending claims, could change the estimated liability, as would substantial adverse verdicts at trial that withstand appeal. A legislative solution, structured settlement transaction, or significant change in relevant case law could also change the estimated liability.

The same factors that affect developing estimates of probable settlement and defense costs for asbestos-related liabilities also affect estimates of the probable insurance reimbursements, as do a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, due to the uncertainties inherent in litigation matters, no assurances can be given regarding the outcome of any litigation, if necessary, to enforce the Company's rights under its insurance policies or settlement agreements.

Many uncertainties exist surrounding asbestos litigation, and the Company will continue to evaluate its estimated asbestos-related liability and corresponding estimated insurance reimbursement as well as the underlying assumptions and process used to derive these amounts. These uncertainties may result in the Company incurring future charges or increases to income to adjust the carrying value of recorded liabilities and assets, particularly if the number of claims and settlement and defense costs change significantly, or if there are significant developments in the trend of case law or court procedures, or if legislation or another alternative solution is implemented; however, the Company is currently unable to estimate such future changes and, accordingly, while it is probable that the Company will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, the Company does not believe that any such amount can be reasonably determined beyond 2021. Although the resolution of these claims may take many years, the effect on the results of operations, financial position and cash flow in any given period from a revision to these estimates could be material.

Other Contingencies

Environmental Matters

For environmental matters, the Company records a liability for estimated remediation costs when it is probable that the Company will be responsible for such costs and they can be reasonably estimated. Generally, third party specialists assist in the estimation of remediation costs. The environmental remediation liability as of December 31, 2013 is substantially related to the former manufacturing site in Goodyear, Arizona (the "Goodyear Site") discussed below.

The Goodyear Site was operated by UniDynamics/Phoenix, Inc. ("UPI"), which became an indirect subsidiary of the Company in 1985 when the Company acquired UPI's parent company, UniDynamics Corporation. UPI manufactured explosive and pyrotechnic compounds, including components for critical military programs, for the U.S. government at the Goodyear Site from 1962 to 1993, under contracts with the Department of Defense and other government agencies and certain of their prime contractors. No manufacturing operations have been conducted at the Goodyear Site since 1994. The Goodyear Site was placed on the National Priorities List in 1983, and is now part of the Phoenix-Goodyear Airport North Superfund Site. In 1990, the U.S. Environmental Protection Agency ("EPA") issued administrative orders requiring UPI to design and carry out certain remedial actions, which UPI has done.

Groundwater extraction and treatment systems have been in operation at the Goodyear Site since 1994. A soil vapor extraction system was in operation from 1994 to 1998, was restarted in 2004, and is currently in operation. The Company recorded a liability in 2004 for estimated costs to remediate the Goodyear Site. On July 26, 2006, the Company entered into a consent decree with the EPA with respect to the Goodyear Site providing for, among other things, a work plan for further investigation and remediation activities (inclusive of a supplemental remediation investigation and feasibility study). During the fourth quarter of 2007, the Company and its technical advisors

determined that changing groundwater flow rates and contaminant plume direction at the Goodyear Site required additional extraction systems as well as modifications and upgrades of the existing systems. In consultation with its technical advisors, the Company prepared a forecast of the expenditures required for these new and upgraded systems as well as the costs of operation over the forecast period through 2014. Taking these additional costs into consideration, the Company estimated its liability for the costs of such activities through 2014 to be \$41.5 million as of December 31, 2007. During the fourth quarter of 2008, based on further consultation with the Company's advisors and the EPA and in response to groundwater monitoring results that reflected a continuing migration in contaminant plume direction during the year, the Company revised its forecast of remedial activities to increase the level of extraction systems and the number of monitoring wells in and around the Goodyear Site, among other things. As of December 31, 2008, the revised liability estimate was \$65.2 million which resulted in an additional charge of \$24.3 million during the fourth quarter of 2008. During the fourth quarter of 2011, additional remediation activities were

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

determined to be required, in consultation with the Company's advisors, to further address the migration of the contaminant plume. As a result, the Company recorded a charge of \$30.3 million during the fourth quarter of 2011, extending the accrued costs through 2016. The total estimated gross liability was \$32.8 million as of December 31, 2013, and as described below, a portion is reimbursable by the U.S. Government. The current portion of the total estimated liability was approximately \$12.2 million and represents the Company's best estimate, in consultation with its technical advisors, of total remediation costs expected to be paid during the twelve-month period.

Estimates of the Company's environmental liabilities at the Goodyear Site are based on currently available facts, present laws and regulations and current technology available for remediation, and are recorded on an undiscounted basis. These estimates consider the Company's prior experience in the Goodyear Site investigation and remediation, as well as available data from, and in consultation with, the Company's environmental specialists. Estimates at the Goodyear Site are subject to significant uncertainties caused primarily by the dynamic nature of the Goodyear Site conditions, the range of remediation alternatives available, together with the corresponding estimates of cleanup methodology and costs, as well as ongoing, required regulatory approvals, primarily from the EPA. Accordingly, it is likely that upon completing the supplemental remediation investigation and feasibility study and reaching a final work plan in or before 2016, an adjustment to the Company's liability estimate may be necessary to account for the agreed upon additional work as further information and circumstances regarding the Goodyear Site characterization develop. While actual remediation cost therefore may be more than amounts accrued, the Company believes it has established adequate reserves for all probable and reasonably estimable costs.

It is not possible at this point to reasonably estimate the amount of any obligation in excess of the Company's current accruals through the 2016 forecast period because of the aforementioned uncertainties, in particular, the continued significant changes in the Goodyear Site conditions and additional expectations of remediation activities experienced in recent years.

On July 31, 2006, the Company entered into a consent decree with the U.S. Department of Justice on behalf of the Department of Defense and the Department of Energy pursuant to which, among other things, the U.S. Government reimburses the Company for 21% of qualifying costs of investigation and remediation activities at the Goodyear Site. As of December 31, 2013, the Company has recorded a receivable of \$9.3 million for the expected reimbursements from the U.S. Government in respect of the aggregate liability as at that date. The receivable is reduced as reimbursements and other payments from the U.S. Government are received.

The Company has been identified as a potentially responsible party ("PRP") with respect to environmental contamination at the Crab Orchard National Wildlife Refuge Superfund Site (the "Crab Orchard Site"). The Crab Orchard Site is located near Marion, Illinois, and consists of approximately 55,000 acres. Beginning in 1941, the United States used the Crab Orchard Site for the production of ordnance and other related products for use in World War II. In 1947, the Crab Orchard Site was transferred to the United States Fish and Wildlife Service ("FWS"), and about half of the Crab Orchard Site was leased to a variety of industrial tenants whose activities (which continue to this day) included manufacturing ordnance and explosives. A predecessor to the Company formerly leased portions of the Crab Orchard Site, and conducted manufacturing operations at the Crab Orchard Site from 1952 until 1964. General Dynamics Ordnance and Tactical Systems, Inc. ("GD-OTS") is in the process of conducting a remedial investigation and feasibility study for the Additional and Uncharacterized Sites Operable Unit ("AUS-OU") at the Crab Orchard Site, pursuant to an Administrative Order on Consent between GD-OTS and the FWS, the EPA and the Illinois Environmental Protection Agency. The Company is not a party to that agreement, and has not been asked by any agency of the United States Government or the State of Illinois to participate in any investigative or remedial activity relative to the Crab Orchard Site. The Company has been informed that GD-OTS completed a Phase I remedial investigation in 2008, and a Phase II remedial investigation in 2010. Additionally, FWS completed its human health and baseline ecological risk assessments in 2010, and submitted a revised human health risk assessment in December 2011. GD-OTS is in the process of responding to agency comments on a revised draft remedial investigation report, and in connection with its efforts is awaiting additional technical information from the agencies. In GD-OTS's most recent summary of developments related to the AUS-OU, it reported that it is still awaiting agency comments, and cannot finalize a revised remedial investigation report until comments are received. Work on interim

deliverables for the feasibility study is reportedly underway, but it is unclear when a draft FS report will be submitted or approved, or when a final Record of Decision may be issued.

GD-OTS has asked the Company to participate in a voluntary cost allocation/mediation exercise with respect to response costs it has incurred or will incur with respect to the AUS-OU. To date, the Company, along with a number of other PRPs that were contacted, have declined, citing the absence of certain necessary parties as well as an underdeveloped environmental record. In light of the ongoing investigative activities, and the apparent willingness of the U.S. government to participate in a mediation proceeding, it is possible that an allocation or mediation proceeding may go forward, and may commence in 2014. The Company at present cannot predict when any determination of the allocable share of the various PRPs, including the U.S. Government, is likely to be completed. Although a loss is probable, it is not possible at this time to reasonably estimate the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

amount of any obligation for remediation of the Crab Orchard Site because the extent of the environmental impact, allocation among PRPs, remediation alternatives, and concurrence of regulatory authorities have not yet advanced to the stage where a reasonable estimate can be made. The Company has notified its insurers of this potential liability and will seek coverage under its insurance policies.

On a related matter, the United States has brought suit against GD-OTS and Schlumberger Technology Corporation (“Schlumberger”), seeking to recover response costs that the United States has allegedly incurred in connection with alleged environmental contamination at a portion of the Crab Orchard Site known as “Site 36,” which is within the Site's Miscellaneous Areas Operable Unit. This area, reported to be the wastewater treatment plant formerly serving the Crab Orchard Site, is not a part of the AUS-OU, as discussed above. On June 1, 2012, GD-OTS and Schlumberger filed a third-party complaint against the Company and seven other third-party defendants, seeking to shift a portion of any costs that GD-OTS and Schlumberger are held liable to pay to other entities formerly conducting activities at Site 36. GD-OTS and Schlumberger have also counterclaimed against the United States, seeking to compel the United States to bear a share of the response costs the United States allegedly has incurred. The United States, GD-OTS, Schlumberger, the Company, and all remaining third-party defendants have resolved in principle their claims against each other and have finalized the terms of a consent decree, which is awaiting approval from senior management in the Department of Justice. Pursuant to the agreement in principle, the Company has paid into escrow \$166,667 to resolve all past and future claims for response costs relating to Site 36. The Company's obligation does not become final until the consent decree has been entered by the Court. The consent decree has been lodged with the Court for public comment, and we project that the consent decree will be approved and entered in the first quarter of 2014. The Company notified its insurers of this liability and has obtained an agreement for coverage for the settlement amount referenced above.

Other Proceedings

On January 8, 2010, a lawsuit related to the acquisition of Merrimac was filed in the Superior Court of the State of New Jersey. The action, brought by a purported stockholder of Merrimac, names Merrimac, each of Merrimac's directors, and Crane Co. as defendants, and alleges, among other things, breaches of fiduciary duties by the Merrimac directors, aided and abetted by Crane Co., that resulted in the payment to Merrimac stockholders of an allegedly unfair price of \$16.00 per share in the acquisition and unjust enrichment of Merrimac's directors. The complaint seeks certification as a class of all Merrimac stockholders, except the defendants and their affiliates, and unspecified damages. Simultaneously with the filing of the complaint, the plaintiff filed a motion that sought to enjoin the transaction from proceeding. After a hearing on January 14, 2010, the court denied the plaintiff's motion. All defendants thereafter filed motions seeking dismissal of the complaint on various grounds. After a hearing on March 19, 2010, the court denied the defendants' motions to dismiss and ordered the case to proceed to pretrial discovery. All defendants have filed their answers and deny any liability. The Court certified the class, and the parties engaged in pre-trial discovery. Fact discovery closed in July 2012, and expert discovery, including the exchange of expert reports and depositions of expert witnesses, closed on November 30, 2012. Summary judgment motions were due to be submitted on or before January 15, 2013. However, on December 26, 2012, plaintiff's counsel proposed a settlement figure that was substantially less than had previously been proposed. This led to negotiations which culminated, on January 11, 2013, in an agreement, in principle, to resolve the case on the following terms, which are subject to Court approval. In consideration of the establishment of a settlement fund in the amount of \$2 million, to be funded almost entirely from the insurance policy covering the former officers and directors of Merrimac, and with a single contribution of \$150,000 by Crane Co., the plaintiffs agreed (1) to withdraw the single claim asserted in the Complaint against Crane Co., (2) that all plaintiff's attorney's fees and expenses associated with the case will come from the settlement amount, and (3) that all costs of notification of the settlement to the members of the class, costs related to the distribution of pro rata amounts to class members, and any other administrative costs, will also come from the settlement amount. In addition, all defendants, including Crane Co., will receive full class-wide releases. On January 15, 2013, with the consent of counsel for Crane Co. and the other defendants, plaintiff's counsel notified the Court that the parties had reached a provisional agreement to resolve the case, subject to court approval, and asked that the case be stayed for all purposes except for settlement-related proceedings. On July 1, 2013, the settlement of this case received final approval by the Superior Court for Essex County. All claims against all defendants, including

the single claim alleged against Crane, have been dismissed with prejudice.

In 2009, at the request of the New Jersey Department of Environmental Protection, the Company performed certain tests of the indoor air quality of approximately 40 homes in a residential area surrounding a former manufacturing facility in Roseland, New Jersey (the "Site"), where the Company had performed soil and groundwater remediation activities after the manufacturing facility was closed in the mid-1980s, to determine if any contaminants (volatile organic compound vapors from groundwater) from the Site were present in those homes. The test results showed that three homes had volatile organic compound vapors above NJ DEP's recommended concentration levels, and the Company installed vapor mitigation equipment in those homes. On April 15, 2011, those three homeowners, and the tenants in one of those homes, filed separate suits against

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

the Company seeking unspecified compensatory and punitive damages for their lost property value and nuisance. In addition, a homeowner in the testing area, whose home tested negative for the presence of contaminants, filed a class action suit against the Company on behalf of himself and 141 other homeowners in the surrounding area, claiming damages in the nature of loss of value on their homes due to their proximity to the Site. The plaintiffs in these cases recently amended their complaints to assert claims under New Jersey's Environmental Rights Act for the Company's alleged failure to properly report its waste discharge practices in the late 1960s and early 1970s, and for natural resource damages. In late December 2013, the plaintiffs moved to have the class certified, and the motion was granted in early February 2014; however, the Court delayed notice to the class members of the certification for 90 days, allowing the Company to first seek appellate review of the Court's decision. The Company believes the Court's decision to certify the class was in error, and the Company will seek appellate review of the decision. It is not possible at this time to reasonably estimate the amount of a loss and therefore, no loss amount has been accrued for the claims because, among other things, the number of homes potentially affected, the extent of the environmental impact, and consideration of other factors affecting value have not yet advanced to the stage where a reasonable estimate can be made.

A number of other lawsuits, claims and proceedings have been or may be asserted against the Company relating to the conduct of its business, including those pertaining to product liability, patent infringement, commercial, employment, employee benefits, environmental and stockholder matters. While the outcome of litigation cannot be predicted with certainty, and some of these other lawsuits, claims or proceedings may be determined adversely to the Company, the Company does not believe that the disposition of any such other pending matters is likely to have a material impact on its financial condition or liquidity, although the resolution in any reporting period of one or more of these matters could have a significant impact on the Company's results of operations and cash flows for that period.

Note 12 - Acquisitions and Divestitures

Acquisitions are accounted for in accordance with the guidance for business combinations. Accordingly, the Company makes an initial allocation of the purchase price at the date of acquisition based upon its understanding of the fair value of the acquired assets and assumed liabilities. The Company obtains this information during due diligence and through other sources. In the months after closing, as the Company obtains additional information about these assets and liabilities, including through tangible and intangible asset appraisals, it is able to refine the estimates of fair value and more accurately allocate the purchase price. Only items identified as of the acquisition date are considered for subsequent adjustment. The Company will make appropriate adjustments to the purchase price allocation prior to completion of the measurement period, as required.

On December 11, 2013, the Company completed the acquisition of MEI, a leading provider of Payment Innovations for unattended transaction systems, serves customers in the transportation, gaming, retail, service payment and vending markets for a purchase price of \$804 million for all of the outstanding equity interests of MEI. MEI had sales of \$399 million in 2012 and will be integrated into the Company's Payment Innovations business within its Merchandising Systems segment. The amount allocated to goodwill reflects the benefits the Company expects to realize from the acquisition, as the acquisition is expected to strengthen and broaden the Company's product offering and will allow the Company to strengthen its position in the gaming and retail sectors of the market, including self checkout applications. The goodwill from this acquisition is not deductible for tax purposes.

To finance the cash consideration for the MEI acquisition, the Company issued \$250 million of 2.75% Senior Notes due 2018 and \$300 million of 4.45% Senior Notes due 2023. For the remainder of the cash consideration, the Company utilized cash and cash equivalents generated from operating activities.

Allocation of Consideration Transferred to Net Assets Acquired:

The following amounts represent the preliminary determination of the fair value of identifiable assets acquired and liabilities assumed from the Company's acquisition of MEI. The final determination of the fair value of certain assets and liabilities will be completed within the one year measurement period as required by ASC Topic 805, "Business Combinations ("ASC 805")." The size and breadth of the MEI acquisition will necessitate the use of this measurement period to adequately analyze and assess a number of the factors used in establishing the asset and liability fair values as of the acquisition date including the significant contractual and operational factors underlying the customer relationship intangible asset; the assumptions underpinning the related tax impacts of any changes made. Any

potential adjustments made could be material in relation to the preliminary values presented below:

Page 73

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(in millions)

Total current assets	\$173
Property, plant and equipment	45
Other assets	7
Intangible assets	302
Goodwill	442
Total assets acquired	969
Assumed liabilities	120
Net assets acquired	\$849

The amounts allocated to acquired intangible assets, and their associated weighted- average useful lives which were determined based on the period which the assets are expected to contribute directly or indirectly to our future cash flows, consist of the following:

Intangible Assets (dollars in millions)	Intangible Fair Value	Weighted Average Life
Trademarks/trade names	\$7	6.7
Customer relationships	277	16.6
Backlog	5	0.3
Product technology	13	5.7
Total acquired Intangible assets	\$302	

In order to allocate the consideration transferred for MEI, the fair values of all identifiable assets and liabilities needed to be established. For accounting and financial reporting purposes, fair value is defined under ASC Topic 820, "Fair Value Measurement and Disclosure" as the price that would be received upon sale of an asset or the amount paid to transfer a liability in an orderly transaction between market participants at the measurement date. Market participants are assumed to be buyers and sellers in the principal (most advantageous) market for the asset or liability. Additionally, fair value measurements for an asset assume the highest and best use of that asset by market participants. Use of different estimates and judgments could yield different results.

The fair values of the trademark and trade name intangible assets were determined by using an "income approach", specifically the relief-from-royalty approach, which is a commonly accepted valuation approach. This approach is based on the assumption that in lieu of ownership, a firm would be willing to pay a royalty in order to exploit the related benefits of this asset. Therefore, a portion of MEI's earnings, equal to the after-tax royalty that would have been paid for the use of the asset, can be attributed to the firm's ownership. The trademark and trade names are being amortized on a straight-line basis (which approximates the economic pattern of benefits) over the estimated economic life of five to ten years.

The fair values of the product technology intangible assets were also determined by the relief-from-royalty approach. Similarly, this approach is based on the assumption that in lieu of ownership, a firm would be willing to pay a royalty in order to exploit the related benefits of the technology. Therefore, a portion of MEI's earnings, equal to the after-tax royalty that would have been paid for the use of the technology, can be attributed to the firm's ownership of the technology. The technology assets are being amortized on a straight-line basis (which approximates the economic pattern of benefits) over the estimated economic life of three to six years.

The fair values of the customer relationships and backlog intangible assets, were determined by using an "income approach" which is a commonly accepted valuation approach. Under this approach, the net earnings attributable to the asset or liability being measured are isolated using the discounted projected net cash flows. These projected cash flows are isolated from the projected cash flows of the combined asset group over the remaining economic life of the intangible asset or liability being measured. Both the amount and the duration of the cash flows are considered from a

market participant perspective. Our estimates of market participant net cash flows considered historical and projected pricing, operational performance including market participant synergies, aftermarket retention, product life cycles, material and labor pricing, and other relevant customer, contractual and market factors. Where appropriate, the net cash flows were-adjusted to reflect the potential attrition of existing

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

customers in the future, as existing customers are a “wasting” asset and are expected to decline over time. The attrition-adjusted future cash flows are then discounted to present value using an appropriate discount rate. The customer relationship is being amortized on a straight-line basis (which approximates the economic pattern of benefits) over the estimated economic life of 13 to 18 years.

Acquisition-Related Transactions:

Acquisition-related costs are being expensed as incurred. For the year ended December 31, 2013, the Company recorded \$22.8 million of transaction costs. In addition, as part of the execution of regulatory remedies associated with the MEI acquisition, the Company sold a product line, which was formerly part of its Merchandising Systems segment, to Suzo-Happ Group for \$6.8 million and recorded a \$2 million gain. Sales of this product line were \$15.1 million in 2013.

Supplemental Pro-Forma Data (Unaudited):

MEI's results of operations have been included in the Company's financial statements for the period subsequent to the completion of the acquisition on December 11, 2013. MEI contributed sales of approximately \$25 million resulting in an operating loss of approximately \$2 million for the period from the completion of the acquisition through December 31, 2013. The following unaudited supplemental pro-forma data presents consolidated information as if the acquisition had been completed on January 1, 2012.

For the year ended December 31, (in millions)	2013	2012
Net Sales	\$2,936	\$2,969
Net income attributable to common shareholders	\$242	\$239
Basic earnings per share from continuing operations	\$4.18	\$4.17
Diluted earnings per share from continuing operations	\$4.11	\$4.11

The unaudited supplemental pro-forma data above includes adjustments for inventory step up, depreciation and amortization related to acquired MEI property, plant & equipment and intangible assets, transaction costs, interest expense related financing directly associated with the acquisition and the effect of required dispositions to meet regulatory approval.

Other Acquisition and Disposition Activity:

In July 2011, the Company completed the acquisition of W.T. Armatur GmbH & Co. KG (“WTA”), a manufacturer of bellows sealed globe valves, as well as certain types of specialty valves, for chemical, fertilizer and thermal oil applications for a purchase price of \$37 million in cash and \$1 million of assumed debt. WTA's 2010 sales were approximately \$21 million, and WTA has been integrated into the Company's Fluid Handling segment. In connection with the WTA acquisition, the purchase price and recording of the transaction were based on valuation assessments. The allocation of the aggregate purchase price resulted in current assets of \$8 million; property, plant, and equipment of \$12 million; identified intangible assets of \$9 million, which primarily consist of customer relationships; goodwill of \$12 million; and current liabilities of \$4 million. The amount allocated to goodwill reflects the benefits the Company expects to realize from the acquisition, as the acquisition is expected to strengthen and broaden the Company's portfolio by providing valves with zero fugitive emissions used in severe service applications. The goodwill from this acquisition is deductible for tax purposes. The pro forma impact of this acquisition on the Company's historical results of operations was not material.

Please refer to Note 2, “Discontinued Operations,” for discussion of the divestitures of Azonix and the Company's valve service center in Houston, Texas.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 13 – Stock-Based Compensation Plans

Effective February 2013, the Company terminated its two existing stock compensation plans and created a single plan to cover all employees and directors: the Stock Incentive Plan and the Non-Employee Director Stock Compensation Plan. The Stock Incentive Plan is used to provide long-term incentive compensation through stock options, restricted share units and performance-based restricted share units.

Options are granted under the Stock Incentive Plan to officers and other key employees and directors at an exercise price equal to the closing price on the date of grant. For grants prior to April 23, 2007, the exercise price is equal to the fair market value of the shares on the date of grant, which is defined for purposes of the plans as the average of the high and low prices for the Company's common stock on the 10 trading days ending on the date of grant. Unless otherwise determined by the Compensation Committee which administers the plan, options become exercisable at a rate of 25% after the first year, 50% after the second year, 75% after the third year and 100% after the fourth year from the date of grant and expire six years after the date of grant (ten years for all options granted to directors and for options granted to officers and employees prior to 2004). Options granted prior to January 29, 2007, became exercisable at a rate of 50% after the first year, 75% after the second year and 100% after the third year.

The Company determines the fair value of each grant using the Black-Scholes option pricing model. The weighted-average assumptions for grants made during the years ended December 31, 2013, 2012 and 2011 are as follows:

	2013	2012	2011	
Dividend yield	2.76	% 2.18	% 2.23	%
Volatility	35.52	% 43.09	% 41.06	%
Risk-free interest rate	0.76	% 0.79	% 1.79	%
Expected lives in years	4.20	4.28	4.29	

Expected dividend yield is based on the Company's dividend rate. Expected stock volatility was determined based upon the historical volatility for the four-year-period preceding the date of grant. The risk-free interest rate was based on the yield curve in effect at the time the options were granted, using U.S. constant maturities over the expected life of the option. The expected lives of the awards represents the period of time that options granted are expected to be outstanding.

Activity in the Company's stock option plans for the year ended December 31, 2013 was as follows:

Option Activity	Number of Shares (in 000's)	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)
Options outstanding at January 1, 2013	3,464	\$39.11	
Granted	707	49.35	
Exercised	(1,219)) 33.83	
Canceled	(171)) 45.60	
Options outstanding at December 31, 2013	2,781	\$43.61	3.67
Options exercisable at December 31, 2013	873	\$37.05	2.77

The weighted-average fair value of options granted during 2013, 2012 and 2011 was \$12.08, \$15.07 and \$13.36, respectively. The total fair value of shares vested during 2013, 2012 and 2011 was \$9.1 million, \$7.3 million and \$6.0 million, respectively. The total intrinsic value of options exercised during 2013, 2012 and 2011 was \$26.2 million, \$14.8 million and \$24.9 million, respectively. The total cash received from these option exercises was \$31.0 million, \$18.7 million and \$30.8 million, respectively, and the tax benefit realized for the tax deductions from option exercises and vesting of restricted stock was \$6.4 million, \$3.6 million and \$6.1 million, respectively. The aggregate intrinsic value of exercisable options was \$26.4 million, \$15.6 million and \$20.8 million as of December 31, 2013, 2012 and 2011, respectively.

Restricted stock and restricted share units vest at a rate of 25% after the first year, 50% after the second year, 75% after the third year and 100% after the fourth year from the date of grant and are subject to forfeiture restrictions

which lapse over time. The vesting of Performance-based restricted share units is determined in three years based on relative total shareholder return for Crane Co. compared to the S&P Midcap 400 Capital Goods Group, with payout potential ranging from 0% to 175% but capped at 100% if the Company's three-year total shareholder return is negative.

Included in the Company's share-based compensation was expense recognized for its restricted stock, restricted share unit and performance-based restricted share unit awards of \$11.9 million, \$8.3 million and \$8.1 million in 2013, 2012 and 2011,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

respectively. Changes in the Company's restricted stock and restricted share units for the year ended December 31, 2013 were as follows:

Restricted Stock and Restricted Share Unit Activity	Restricted Stock and Restricted Share Units (in 000's)	Weighted Average Grant-Date Fair Value
Restricted Stock and Restricted Share Units at January 1, 2013	652	\$39.48
Restricted Share Units granted	195	49.92
Restricted Share Units vested	(162) 32.89
Restricted Share Units forfeited	(26) 44.31
Performance-based Restricted Share Units granted	136	47.93
Performance-based Restricted Share Units forfeited	(29) 46.90
Restricted Stock and Restricted Share Units at December 31, 2013	766	\$44.56

Note 14 – Segment Information

Beginning in the first quarter of 2013, the Controls segment (consisting of the Barksdale and Crane Environmental businesses) is now included in the Fluid Handling segment. Prior period amounts have been reclassified to the new reporting structure for comparative purposes.

The Company's segments are reported on the same basis used internally for evaluating performance and for allocating resources. The Company has four reporting segments: Aerospace & Electronics, Engineered Materials, Merchandising Systems, and Fluid Handling. In accordance with ASC Topic 280, "Segment Reporting", for purposes of segment performance measurement, the Company does not allocate to the business segments items that are of a non-operating nature, including charges which occur from time to time related to the Company's asbestos liability and its legacy environmental liabilities, as such items are not related to current business activities; or corporate organizational and functional expenses of a governance nature. "Corporate expenses-before asbestos and environmental charges" consist of corporate office expenses including compensation, benefits, occupancy, depreciation, and other administrative costs. Assets of the business segments exclude general corporate assets, which principally consist of cash and cash equivalents, deferred tax assets, insurance receivables, certain property, plant and equipment, and certain other assets. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties at current market prices.

- (s) Includes the impact of item (j) cited above, net of tax.

* EPS amounts may not add due to rounding

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 16 – Restructuring

In 2012, the Company recorded pre-tax restructuring charges of \$18.5 million, of which \$16.5 million was associated with repositioning actions designed to improve profitability largely beginning in 2013, primarily in the European portion of the Fluid Handling segment and \$2.0 million of non-cash charges were related to the completion of previous restructuring actions.

The repositioning actions included \$14.6 million of severance and other cash-related restructuring costs and \$1.9 million of non-cash restructuring costs related to asset write-downs. The severance and other costs pertain to the closure of two small European plants, the transfer of certain manufacturing operations from higher cost to lower cost Company facilities and other staff reduction actions. These actions resulted in workforce reductions of approximately 200 employees, or about 2% of the Company's global workforce and were substantially completed in 2012. The Company expects the payments related to the repositioning actions to be substantially completed in 2013, which will be funded with cash generated from operations.

Related to the repositioning actions, the Company also recorded \$1.6 million of additional charges related to the write-down of inventory resulting from the closure of a product line which was recorded in cost of sales and \$0.5 million pension curtailment charge which was recorded in selling, general and administrative.

The following table summarizes the accrual balances related to these restructuring charges:

(in millions)	January 1, 2013	Expense	Utilization	December 31, 2013
Severance	\$4.6	\$(0.2) \$(4.1) \$0.3
Other	1.7	0.1	(1.8) —
	\$6.3	\$(0.1) \$(5.9) \$0.3

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures. The Company's Chief Executive Officer and Principal Financial Officer evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the year covered by this annual report. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that are filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's ("SEC") rules and forms and the information is accumulated and communicated to the Company's Chief Executive Officer and Principal Financial Officer to allow timely decisions regarding required disclosure. Based on this evaluation, the Company's Chief Executive Officer and Principal Financial Officer have concluded that these controls are effective as of the end of the year covered by this annual report.

As permitted under SEC rules, management excluded from its assessment the internal control over financial reporting at MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI") which was acquired on December 11, 2013 and whose financial statements constitute 27% of total assets and 1% of revenues of the consolidated financial statement amounts as of and for the year ended December 31, 2013.

Change in Internal Controls over Financial Reporting. During the fiscal quarter ended December 31, 2013, there have been no changes in the Company's internal control over financial reporting, identified in connection with our evaluation thereof, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Design and Evaluation of Internal Control over Financial Reporting. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we included a report of our management's assessment of the design and effectiveness of our internal controls as part of this Annual Report on Form 10-K for the year ended December 31, 2013. Our independent registered public accounting firm also attested to, and reported on, our management's assessment of the effectiveness of internal control over financial reporting. Our management's report and our independent registered public accounting firm's attestation report are set forth in Part II, Item 8 of this Annual Report on Form 10-K under the captions entitled "Management's Responsibility for Financial Reporting" and "Report of Independent Registered Public Accounting Firm."

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Crane Co.
Stamford, CT

We have audited the internal control over financial reporting of Crane Co. and subsidiaries (the "Company") as of December 31, 2013 based on criteria established in Internal Control -Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Controls and Procedures appearing in Item 9.A., management excluded from its assessment the internal control over financial reporting at MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together "MEI"), which was acquired on December 11, 2013 and whose financial statements constitute 27 % of total assets and 1% of revenues of the consolidated financial statement amounts as of and for the year ended December 31, 2013. Accordingly, our audit did not include the internal control over financial reporting at MEI. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Controls and Procedures appearing in Item 9A. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the criteria established in Internal Control- Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2013 of the Company and our report dated February 24, 2014 expressed an unqualified opinion on those financial statements.
