## DESCRIPTION OF THE NOTES

The following description of the material provisions of the notes supplements the general description of the notes provided in the accompanying prospectus. You should therefore review the accompanying prospectus carefully. You should carefully review the information in this prospectus supplement. The pricing supplement for each offering of notes will contain the specific information and terms and conditions for that offering. As such, you should carefully review the information contained in the pricing supplement, including any description of the method of calculating interest on any note. The applicable pricing supplement may also add, update, supplement or clarify information contained in this prospectus supplement or the accompanying prospectus. It is important for you to consider the information contained in the accompanying prospectus, this prospectus supplement, the applicable pricing supplement, the indenture and the notes in making your investment decision.

This section describes some technical concepts and uses some capitalized terms that are not defined in this prospectus supplement. You should refer to the form of indenture and the form of note certificates filed as exhibits to the registration statement (of which this prospectus supplement and the accompanying prospectus are a part) for the full description of those concepts and complete definitions of these terms.

### General

#### *Indenture*

Each trust will issue one series of notes, subject to and entitled to the benefits of a separate indenture between the trust and the indenture trustee, which will adopt and incorporate the standard indenture terms. Such notes will be issued only on the original issue date for such notes. With respect to a particular trust, we refer to the applicable indenture and the standard indenture terms as the indenture. Each series of notes will be the subject of a pricing supplement. The indenture is subject to, and governed by, the Trust Indenture Act of 1939, as amended. For a description of the terms of the indenture, see Description of the Notes beginning on page 22 of the accompanying prospectus.

At the date of this prospectus supplement, the notes offered pursuant to this prospectus supplement are limited to an aggregate initial public offering price or purchase price of up to \$4,000,000,000, or its equivalent in one or more foreign or composite currencies. This amount is subject to reduction as a result of the issuance of notes previously under this program, our Principal® Life CoreNotes® program, our secured medium-term notes retail program or otherwise under the accompanying prospectus.

#### *Collateral*

The notes of a series will be the trust's unconditional, direct, non-recourse, secured and unsubordinated obligations. Under the indenture, the funding agreement issued to and deposited into a trust by us, in exchange for the proceeds received by the trust from the offering of its series of notes and trust beneficial interest, will be collaterally assigned by the trust, and the trust will grant a security interest in the funding agreement, to the indenture trustee for the benefit of the holders of the related series of notes. A trust may purchase only one funding agreement from us and the principal amount of the funding agreement may not be increased. The trust will also collaterally assign and grant a security interest in the guarantee issued by PFG to the trust in favor of the indenture trustee for the benefit of the holders of the related series of notes. Each series of notes will be secured by a security interest in the collateral, consisting of:

the relevant funding agreement;

the related guarantee issued by PFG to the trust, which fully and unconditionally guarantees our payment obligations under the relevant funding agreement;

all proceeds of the relevant funding agreement and the relevant guarantee and all amounts and instruments on deposit from time to time in the related collection account;

all books and records pertaining to the relevant funding agreement and the related guarantee; and

all of the trust's rights pertaining to the foregoing.

Under the custodial agreement, upon the collateral assignment and grant of security interest in the funding agreement and the guarantee related to a series of notes of a trust, the custodian will hold the funding agreement and the guarantee, on behalf of the indenture trustee in the State of Iowa.

***Ranking***

The notes of a series of a trust will rank equally among themselves.

***Pricing Options***

Notes that bear interest will either be fixed rate notes or floating rate notes, or a combination of fixed rate and floating rate, as specified in the applicable pricing supplement. A trust may also issue discount notes and amortizing notes as specified in the applicable pricing supplement.

***Pricing Supplement***

The pricing supplement relating to the offering of a series of notes will describe the following terms:

the principal amount and specified currency for the note;

whether the note:

(1) is a fixed rate note,

(2) is a floating rate note,

(3) is an amortizing note, meaning that a portion or all of the principal amount is payable prior to the stated maturity date in accordance with a schedule or by application of a formula, and/or

(4) is a discount note that does not bear any interest currently or bears interest at a rate that is below market rates at the time of issuance;

the price at which the note will be issued, which will be expressed as a percentage of the aggregate principal amount or face amount;

the original issue date on which the note will be issued;

the stated maturity date;

if the note is a fixed rate note, the rate per annum at which the note will bear any interest and the Interest Payment Date frequency;

if the note is a floating rate note, relevant terms such as:

(1) the Interest Rate Basis,

(2) the Initial Interest Rate,

(3) the Interest Reset Period or the Interest Reset Dates,

(4) the Interest Payment Dates,

(5) the Index Maturity,

(6) any Maximum Interest Rate,

(7) any Minimum Interest Rate,

(8) the Spread and/or Spread Multiplier, and

(9) any other terms relating to the particular method of calculating the interest rate for the note and whether and how the Spread and/or Spread Multiplier may be changed prior to the stated maturity date; if the note is an amortizing note, the terms for repayment prior to the stated maturity date;

whether the note may be redeemed by the trust, or repaid at the option of the holder, prior to the stated maturity date and the terms of its redemption or repayment, provided that any such redemption or repayment will be accompanied by the simultaneous redemption or repayment of the relevant funding agreement;

any special United States federal income tax considerations relating to the purchase, ownership and disposition of the note;

the jurisdiction of formation of the trust; and

any other terms of the note provided in the accompanying prospectus to be set forth in a pricing

S-15

---

supplement or that are otherwise consistent with the provisions of the indenture under which the note will be issued.

***Maturity***

Unless otherwise specified in the applicable pricing supplement, each series of notes will mature on a day between nine months and 30 years from its date of original issuance on the last scheduled interest payment date (the stated maturity date), as specified in the applicable pricing supplement, unless the principal of such series becomes due and payable prior to the stated maturity date, whether, as applicable, by the declaration of acceleration of maturity, notice of redemption by the trust, notice of the registered holder's option to elect repayment or otherwise (we refer to the stated maturity date or any date prior to the stated maturity date on which the particular series of notes becomes due and payable, as the case may be, as the maturity date with respect to the principal of such series of notes repayable on that date).

***Currency***

Unless otherwise specified in the applicable pricing supplement, the notes of a series will be denominated in, and payments of principal, premium, if any, and/or interest, if any, in respect thereof will be made in, United States dollars. In the alternative, each series of notes may be denominated in, and payments of principal, premium, if any, and/or interest, if any, in respect thereof may be made in, a single foreign currency. The currency in which a particular series of notes is denominated (or, if that currency is no longer legal tender for the payment of public and private debts in the country issuing that currency or, in the case of the euro, in the member states of the European Union that have adopted the single currency in accordance with the treaty establishing the European Community, as amended by the treaty on European Union, the currency which is then legal tender in the related country or in the adopting member states of the European Union, as the case may be) is referred to as the specified currency with respect to such series of notes.

You will be required to pay for your notes in the specified currency. At the present time, there are limited facilities in the United States for the conversion of United States dollars into foreign currencies and vice versa, and commercial banks do not generally offer non-United States dollar checking or savings account facilities in the United States. The Agent from or through which a foreign currency note is purchased may be prepared to arrange for the conversion of United States dollars into the specified currency in order to enable you to pay for your foreign currency note, provided that you make a request to that Agent on or prior to the fifth business day (as defined below) preceding the date of delivery of the particular foreign currency note, or by any other day determined by that Agent. Each conversion will be made by an Agent on the terms and subject to the conditions, limitations and charges as that Agent may from time to time establish in accordance with its regular foreign exchange practices. You will be required to bear all costs of exchange in respect of your foreign currency note.

A trust may (if so specified in the applicable pricing supplement), without the consent of the holders of any note, redenominate all, but not less than all, of the notes of any series on or after the date on which the member state of the European Union in whose national currency such notes are denominated has become a participant member in the third stage of the European economic and monetary union as more fully set out in the applicable pricing supplement.

***Form of Notes; Denominations***

Each trust will issue each note as a book-entry note represented by one or more fully registered global securities, unless otherwise specified in the applicable pricing supplement. Unless otherwise specified in the applicable pricing supplement, the minimum denominations of each note will be \$1,000 and integral multiples of \$1,000 in excess thereof.

***Listing***

Unless otherwise specified in the applicable pricing supplement, your series of notes will not be listed on any securities exchange.

***Payments***

A trust will make payments of principal of, and premium, if any, and interest and other amounts due and owing, if any, on book-entry

notes through the indenture trustee to the account of the depository or its nominee. See Book Entry Notes. In the case of definitive notes, the trust will make payments of principal of, and premium, if any, and interest and other amounts due and owing, if any, on the maturity date in immediately available funds upon presentation and surrender thereof (and, in the case of any repayment on an optional repayment date, upon submission of a duly completed election form if and as required by the provisions described below) at the office or agency maintained by the trust for this purpose in the Borough of Manhattan, The City of New York, which is currently the paying agency office of the indenture trustee located at 111 Wall Street, 15th Floor, Zone 3, New York, New York 10005. A trust will make payments of interest and other amounts due and owing, if any, on the maturity date of a definitive note to the person to whom payment of the principal thereof and premium, if any, thereon shall be made. A trust will make payments of interest and other amounts due and owing, if any, on a definitive note on any Interest Payment Date (as defined below) other than the maturity date by check mailed to the address of the registered holder entitled thereto appearing in the note register. Notwithstanding the foregoing, the trust will make payments of interest and other amounts due and owing, if any, on a definitive note on any Interest Payment Date other than the maturity date to each registered holder of \$10,000,000 (or, if the specified currency is other than United States dollars, the equivalent thereof in the particular specified currency) or more in aggregate principal amount of definitive notes (whether having identical or different terms and provisions) by wire transfer of immediately available funds if the applicable registered holder has delivered appropriate wire transfer instructions in writing to the indenture trustee not less than 15 calendar days prior to the particular Interest Payment Date. Any wire transfer instructions received by the indenture trustee shall remain in effect until revoked by the applicable registered holder.

***Business Day***

Business day means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which commercial banks are authorized or required by law, regulation or executive order to close in The City of New York; provided, however, that, with respect to foreign currency notes, the day must also not be a day on which commercial banks are authorized or required by law, regulation or executive order to close in the Principal Financial Center (as defined below) of the country issuing the specified currency (or, if the specified currency is the euro, the day must also be a day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System is open); provided, further, that, with respect to notes as to which LIBOR (as defined below) is an applicable Interest Rate Basis, the day must also be a London Banking Day, which means a day on which commercial banks are open for business (including dealings in the LIBOR Currency (as defined below)) in London.

***Principal Financial Center***

Principal Financial Center means, as applicable:

the capital city of the country issuing the specified currency; or

the capital city of the country to which the LIBOR Currency relates;

provided, however, that with respect to United States dollars, Australian dollars, Canadian dollars, the euro, South African rand and Swiss francs, the Principal Financial Center shall be The City of New York, Sydney, Toronto, London (solely in the case of the LIBOR Currency), Johannesburg and Zurich, respectively.

***Registration and Transfer of Notes***

Book-entry notes may be transferred or exchanged only through the clearing systems (described below). Registration of transfer or exchange of definitive notes will be made at the office or agency maintained by the trust for this purpose in the Borough of Manhattan, The City of New York, which is currently the corporate trust office of the indenture trustee located at 111 Wall Street, 15th Floor, Zone 3, New York, New York 10005. No service charge will be imposed for any such registration of transfer or exchange of notes, but the trust may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection therewith (other than certain exchanges not involving any transfer).

### **Withholding Tax and Payment of Additional Amounts**

All amounts due in respect of the notes will be made without any applicable withholding or deduction for or on account of any present or future taxes, duties, levies, assessments or other governmental charges of whatever nature imposed or levied by or on behalf of any governmental authority, unless such withholding or deduction is required by law. Unless otherwise specified in the applicable pricing supplement, the trust will not pay any additional amounts to holders of any series of notes in respect of any such withholding or deduction, any such withholding or deduction will not give rise to an event of default or any independent right or obligation to redeem the notes of such series and each holder of a note of the applicable series will be deemed for all purposes to have received cash in an amount equal to the portion of such withholding or deduction that is attributable to such holder's interest in the notes as equitably determined by the trust.

If it is specified in the applicable pricing supplement and funding agreement that we have agreed to pay additional amounts to the trust to reflect any required withholding or deduction under the funding agreement and we are required, or based on an opinion of independent legal counsel selected by us a material probability exists that we will be required, to pay additional amounts in respect of such withholding or deduction, pursuant to (a) any amendment to, or change (including any announced prospective change) in, the tax laws (or any regulations thereunder) of the United States or any political subdivision or taxing authority thereof or therein or (b) any amendment to, or change in, an interpretation or application of any such laws or regulations by any governmental authority in the United States, which amendment or change is enacted, promulgated, issued or announced on or after the effective date of the applicable funding agreement, we will have the right to redeem the affected funding agreement by giving not less than 30 and no more than 60 days prior written notice to the trust and by paying the trust the outstanding principal of, and accrued but unpaid interest on, the related funding agreement or such other amount as is specified in the applicable pricing supplement. If we redeem the related funding agreement issued to the trust, the related trust will redeem all of the notes of the applicable series as provided in the indenture. See Description of the Funding Agreements Early Redemption for Tax Event in the accompanying prospectus.

### **Final European Union Withholding Tax System**

On July 1, 2005, a directive adopted by the European Council of Economics and Finance Ministers regarding the taxation of savings income took effect. The directive provides for the tax authorities of the European Union member states to provide each other with details of payments of interest and similar income made to individuals but permits Austria, Belgium and Luxembourg instead to impose a withholding tax on the payments concerned for a transitional period (although it provides that no such withholding tax should be levied where the beneficial owner of the payment authorizes an exchange of information and/or where the beneficial owner presents a certificate from the tax authority of the European Union member state in which the beneficial owner is resident). The directive does not preclude European Union member states from levying other types of withholding tax.

For the avoidance of doubt, unless otherwise specified in the applicable pricing supplement, no trust will pay any additional amounts with respect to its series of notes should any deduction or withholding on account of tax be required to be made, or be made, pursuant to the directive.

### **Tax Redemption**

If a tax event as to the relevant funding agreement occurs, we will have the right to redeem the funding agreement and, upon such redemption, the applicable trust will redeem its series of notes in the same manner described under Optional Redemption; Optional Repayment; No Sinking Fund below. For further diugn="center" style="font-size: 3pt;">

**CALCULATION OF REGISTRATION FEE**

affiliates or any other trust. A trust's obligations under its series of notes will be secured by all of its rights and title in a funding agreement issued by us, the payment obligations of which are guaranteed by the related guarantee issued by PFG to the trust and other rights and assets included in the applicable collateral held in the trust.

Since we will be the sole obligor under the funding agreement and PFG will be the sole obligor under the related guarantee, the trust's ability to meet its obligations, and your ability to receive payments from the trust, with respect to the applicable series of notes, will be principally dependent upon our ability to perform our obligations under the applicable funding agreement held in the relevant trust and PFG's ability to perform its obligations under the guarantee of our payment obligations under the related funding agreement. However, you will have no direct contractual rights against us or PFG under the funding agreement or the guarantee, respectively. Under the terms of the funding agreement and related guarantee, recourse rights to us or PFG, respectively, will belong to the trust, its successors and its permitted assignees, but only with respect to the relevant trust. In connection with the offering and sale of a series of notes, the trust will collaterally assign and grant a security interest in the relevant funding agreement for such series of notes to, and the trust will collaterally assign and grant a security interest in the related guarantee in favor of, the indenture trustee for the benefit of the holders of such series of notes. Accordingly, recourse to us under such funding agreement and to PFG under the related guarantee will be enforceable only by the indenture trustee as a secured party on behalf of the holders of such series of notes, or by the holders of such series of notes by directing the indenture trustee under the limited circumstances described in the accompanying prospectus under "Description of the Notes—Certain Rights of Holders." See also "Description of the Notes—Nonrecourse Enforcement" in the accompanying prospectus.

Since we and PFG are registrants, purchasers of notes may proceed directly against us and PFG to enforce their rights under the United States federal and state securities laws. The right by such purchasers to proceed against us, with respect to the applicable funding agreement, under the United States federal and state securities laws is no different than if we had issued the funding agreement directly to such purchasers. The right by such purchasers to proceed against PFG, with respect to the applicable guarantee, under the United States federal and state securities laws is no different than if PFG had issued the guarantee directly to such purchasers.

**Optional Redemption; Optional Repayment; No Sinking Fund**

In the case of notes that are not discount notes, if an optional redemption date is specified in the pricing supplement relating to a series of notes, and we have redeemed the related funding agreement in full or part, as applicable, the related trust will redeem the series of notes secured by such funding agreement, in full or in part as applicable, prior to the stated maturity date of such series of notes. Such redemptions shall be made in whole or from time to time in part in increments of \$1,000 or any other integral multiple of an authorized denomination specified in the applicable pricing supplement (provided that any remaining principal amount thereof shall be at least \$1,000 or other minimum authorized denomination applicable thereto), at the applicable redemption price (as defined below), together with unpaid interest, if any, accrued thereon to, but excluding, the date of redemption. The trust must give written notice to the holders of the particular series of notes to be redeemed not more than 60 nor less than 30 calendar days prior to the date of redemption. Redemption price, with respect to a series of notes, means an amount equal to the initial redemption percentage specified in the applicable pricing supplement (as adjusted by the annual redemption percentage reduction, as described in the pricing supplement, if applicable) multiplied by the unpaid principal amount thereof to be redeemed. The initial redemption percentage, if any, applicable to a series of notes shall decline at each anniversary of the initial redemption date by an amount equal to the applicable annual redemption percentage reduction, if any, until the redemption price is equal to 100% of the unpaid amount thereof to be redeemed. Notes that may be redeemed at a time when 20% or more of the original principal amount of such notes are outstanding will be designated in their title as "callable" in the relevant pricing supplement. For a discussion of the redemption of discount notes, s

If fewer than all of the notes are to be redeemed, DTC will select the notes to be redeemed not more than 60 calendar days prior to the redemption date by lot or, if the notes are not in book-entry form, the indenture trustee will do so, in its reasonable discretion, by lot or on a pro rata basis in accordance with its customary procedures. If any note is redeemed in part only, a new note in principal amount equal to the unredeemed principal portion will be issued.

If an optional repayment right is specified in the pricing supplement relating to a series of notes, such notes may be subject to repayment at the option of the holders of such series of notes on any repayment date specified in the applicable pricing supplement. Exercise of the repayment option under the notes by the holders will also require the applicable trust to exercise a corresponding repayment under the applicable funding agreement. On any such repayment date, unless otherwise specified in the applicable pricing supplement, the notes shall be repayable in whole or in part in increments of \$1,000 at the option of the holders thereof at a repayment price equal to 100% of the principal amount thereof to be repaid, together with interest thereon payable to the date of repayment. A holder of a series of notes exercising its repayment right must submit to the indenture trustee at its corporate trust office, or at such other place or places of which the relevant trust has notified such holder, the notes to be repaid together with the option to elect repayment form attached to the notes not more than 60 nor less than 30 calendar days prior to the date of repayment. Exercise of such repayment right by a holder shall be irrevocable. If a holder requests repayment in part only, a new note in principal amount equal to the principal portion of the notes not repaid will be issued.

Only DTC may exercise a repayment option in respect of notes issued in book-entry form. Accordingly, beneficial owners of notes that desire to exercise their repayment option, if any, with respect to all or any portion of such notes, must instruct the participant through which they own their interest to direct DTC to exercise the repayment option on their behalf by delivering the duly completed election form to the indenture trustee as aforesaid. In order to ensure that the election form is received by the indenture trustee on a particular day, the applicable beneficial owner must so instruct the participant through which it owns its interest before such participant's deadline for accepting instructions for that day. Participants may have different deadlines for accepting instructions from their customers. Accordingly, a beneficial owner should consult the participant through which it owns its interest in the notes for the participant's deadline for receiving payment instructions. In addition, at the time such instructions are given, each such beneficial owner will cause such participant to transfer such beneficial owner's interest in the notes issued in book-entry form, on DTC's records, to the indenture trustee.

No series of notes will be subject to, or entitled to the benefit of, any sinking fund unless otherwise specified in the applicable pricing supplement. A trust may issue amortizing notes that pay a level amount in respect of both interest and principal over the life of the notes, if specified in the applicable pricing supplement. See Amortizing Notes.

#### **Purchase of Notes by Us**

We may at any time purchase notes at any price or prices in the open market or otherwise. Notes so purchased by us will be surrendered to the indenture trustee for cancellation. Concurrently with the surrender to the indenture trustee of any note, the funding agreement related to such note will be similarly cancelled.

If applicable, such trust will comply with the requirements of Section 14(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act), and the rules promulgated thereunder, and any other securities laws or regulations in connection with any repurchase of the notes by us.

#### **Interest**

Each interest-bearing series of notes will bear interest from its date of issue at the rate per annum, in the case of notes that bear interest at fixed rates, or pursuant to the interest rate formula, in the case of notes that bear interest at floating rates, in each case as specified in the applicable pricing supplement, until the principal thereof is paid or made available for payment. The trust will make interest payments in respect of each series of notes in an amount equal to the interest accrued from and including the immedi-

ately preceding interest payment date in respect of which interest has been paid or from and including the date of issue, if no interest has been paid, to but excluding the applicable interest payment date or the maturity date, as the case may be (each, an interest period ).

Interest on each series of notes will be payable in arrears on each interest payment date, to the registered holder at the close of business on the regular interest record date (as defined below) (except that interest, if any, due at maturity will be paid to the person to whom the principal of the note is paid), and on the maturity date. The first payment of interest on any series of notes originally issued between a regular interest record date and the related interest payment date will be made on the interest payment date immediately following the next succeeding regular interest record date to the registered holder on the next succeeding regular interest record date. The regular interest record date shall be the day that is fifteen (15) calendar days preceding the applicable interest payment date, whether or not a business day.

**Fixed Rate Notes**

In the case of each series of notes that bear interest at fixed rates, the applicable pricing supplement will specify the fixed interest rate per annum applicable to each note and the frequency with which interest is payable. Interest on each series of notes that bears interest at fixed rates will be computed on the basis of a 360-day year of twelve 30-day months.

Unless otherwise specified in the applicable pricing supplement, the interest payment dates for fixed rate notes will be as follows:

**Interest Payment  
Frequency**

**Interest Payment Dates**

Monthly	Fifteenth day of each calendar month, beginning in the first calendar month following the month the note was issued.
Quarterly	Fifteenth day of every third calendar month, beginning in the third calendar month following the month the note was issued.
Semi-annual	Fifteenth day of every sixth calendar month, beginning in the sixth calendar month following the month the note was issued.
Annual	Fifteenth day of every twelfth calendar month, beginning in the twelfth calendar month following the month the note was issued.

If any interest payment date or the maturity date of a series of notes that bear interest at fixed rates falls on a day that is not a business day, the applicable trust will make the required payment of principal, premium, if any, and/or interest or other amounts on the next succeeding business day, and no additional interest will accrue in respect of the payment made on that next succeeding business day.

Interest rates that each trust offers on its fixed rate notes may differ from the rates offered by other trusts depending upon, among other factors, the aggregate principal amount of notes purchased in any single transaction. Notes with different variable terms other than interest rates may also be offered by other trusts concurrently to different investors. Other trusts may change interest rates or formulas and other terms of notes from time to time, but no change of terms will affect any note any other trust has previously issued or as to which any other trust has accepted an offer to purchase.

**Floating Rate Notes**

Interest on each series of notes that bears interest at floating rates will be determined by reference to the applicable Interest Rate Basis or

Interest Rate Bases, which may, as described below, include:

the CD Rate;

the CMT Rate;

the Commercial Paper Rate;

the Constant Maturity Swap Rate;

the Eleventh District Cost of Funds Rate;

the Federal Funds Open Rate;

the Federal Funds Rate;

LIBOR;

EURIBOR;

the Prime Rate; or

the Treasury Rate.

The applicable pricing supplement will specify certain terms of the particular series of notes that bears interest at floating rates, including:

whether the note that bears interest at floating rates is:

a Regular Floating Rate Note;

a Floating Rate/ Fixed Rate Note; or

an Inverse Floating Rate Note;

the Fixed Rate Commencement Date, if applicable;

Fixed Interest Rate, if applicable;

Interest Rate Basis or Interest Rate Bases;

Initial Interest Rate, if any;

Interest Reset Dates;

Interest Payment Dates;

Index Maturity;

Maximum Interest Rate and/or Minimum Interest Rate, if any;

Spread and/or Spread Multiplier; or

if one or more of the applicable Interest Rate Bases is LIBOR, the LIBOR Currency and LIBOR Page.

The rate derived from the applicable Interest Rate Basis will be determined in accordance with the related provisions below. The interest rate in effect on each day will be based on:

if that day is an Interest Reset Date, the rate determined as of the Interest Determination Date (as defined below) immediately preceding that Interest Reset Date; or

if that day is not an Interest Reset Date, the rate determined as of the Interest Determination Date immediately preceding the most recent Interest Reset Date.

The Spread is the number of basis points (one one-hundredth of a percentage point) specified in the applicable pricing supplement to be added to or subtracted from the related Interest Rate Basis or Interest Rate Bases applicable to a series of notes that bears interest at floating rates. The Spread Multiplier is the percentage specified in the applicable pricing supplement of the related Interest Rate Basis or Interest Rate Bases applicable to a series of notes that bears interest at floating rates by which the Interest Rate Basis or Interest Rate Bases will be multiplied to determine the applicable interest rate. The Index Maturity is the period to maturity of the instrument or obligation with respect to which the related Interest Rate Basis or Interest Rate Bases will be calculated.

Interest rates that each trust offers on its floating rate notes may differ from the rates offered by other trusts depending upon, among other factors, the aggregate principal amount of notes purchased in any single transaction. Notes with different variable terms other than interest rates may also be offered by other trusts concurrently to different investors. Other trusts may change interest rates or formulas and other terms of notes from time to time, but no change of terms will affect any note any other trust has previously issued or as to which any other trust has accepted an offer to purchase.

**Regular Floating Rate Notes**

Unless a series of notes that bears interest at floating rates is designated as a series of Floating Rate/ Fixed Rate Notes or a series of Inverse Floating Rate Notes, or as having an addendum attached or having other/additional provisions apply, in each case relating to a different interest rate formula, such series of notes that bears interest at floating rates will be a series of Regular Floating Rate Notes and will bear interest at the rate determined by reference to the applicable Interest Rate Basis or Interest Rate Bases:

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any.

Commencing on the first Interest Reset Date, as specified in the relevant pricing supplement, the rate at which interest on a series of Regular Floating Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate.

**Floating Rate/ Fixed Rate Notes**

If a series of notes that bears interest at floating rates is designated as a series of Floating Rate/ Fixed Rate Notes, such series of notes that bears interest at floating rates will bear interest at the rate determined by refap style="border-top: 1pt solid #000000;">

- (1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(o) under the Securities Act of 1933.
- (2) If any securities are (a) denominated or payable in a foreign or composite currency or currencies, such principal amount as shall result in an aggregate initial offering price equivalent to \$4,000,000,000, (b) issued at an original issue discount, such principal amount as shall result in an aggregate initial offering price of \$4,000,000,000, or (c) issued with their principal amount payable at maturity to be determined with reference to a currency exchange rate or other index, such principal amount as shall result in an aggregate initial offering price of \$4,000,000,000.
- (3) The registration fee has been calculated on the basis of the maximum aggregate offering price of all securities listed in accordance with Rule 457(o) under the Securities Act of 1933.
- (4) Each Funding Agreement of Principal Life Insurance Company will be purchased by a separate and distinct issuing trust with the proceeds of the sale of a related series of the Secured Medium-Term Notes issued by such issuing trust. Pursuant to Rule 457(o) under the Securities Act of 1933, no separate fee is payable in respect of the Funding Agreements.
- (5) No separate consideration will be received for the Principal Financial Group, Inc. Guarantees. Pursuant to Rule 457(n) under the Securities Act of 1933, no separate fee is payable in respect of the Principal Financial Group, Inc. Guarantees.

**The Registrants hereby amend this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrants shall file a further amendment which specifically states that this**

**Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.**

---

**EXPLANATORY NOTE**

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any.

Commencing on the first Interest Reset Date, the rate at which interest on a series of Floating Rate/ Fixed Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that:

the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate, as specified in the relevant pricing supplement; and

the interest rate in effect commencing on the Fixed Rate Commencement Date will be the Fixed Interest Rate, if specified in the applicable pricing supplement, or, if not so specified, the interest rate in effect on the day immediately preceding the Fixed Rate Commencement Date.

***Inverse Floating Rate Notes***

If a series of notes that bears interest at floating rates is designated as a series of Inverse Floating Rate Notes, such series of notes that bears interest at floating rates will bear interest at the Fixed Interest Rate minus the rate determined by reference to the applicable Interest Rate Basis or Interest Rate Bases:

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any;

provided, however, that interest on a series of Inverse Floating Rate Notes will not be less than zero. Commencing on the first Interest Reset Date, the rate at which interest on a series of Inverse Floating Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate.

***Interest Reset Dates***

The applicable pricing supplement will specify the dates on which the rate of interest on a series of notes that bears interest at floating rates will be reset (each, an Interest Reset Date ), and the period between Interest Reset Dates will be the Interest Reset Period. Unless otherwise specified in the applicable pricing supplement, the Interest Reset Dates will be, in the case of a series of notes that bears interest at floating rates which reset:

*daily* each business day;

*weekly* the Wednesday of each week, with the exception of weekly

S-23

---

reset series of notes that bear interest at floating rates as to which the Treasury Rate is an applicable Interest Rate Basis, which will reset the Tuesday of each week;

*monthly* the fifteenth day of each calendar month, with the exception of monthly reset series of notes that bear interest at floating rates as to which the Eleventh District Cost of Funds Rate is an applicable Interest Rate Basis, which will reset on the first calendar day of the month;

*quarterly* the fifteenth day of March, June, September and December of each year;

*semi-annually* the fifteenth day of the two months of each year specified in the applicable pricing supplement; and

*annually* the fifteenth day of the month of each year specified in the applicable pricing supplement; provided, however, that, with respect to any series of Floating Rate/ Fixed Rate Notes, the rate of interest thereon will not reset after the particular Fixed Rate Commencement Date.

If any Interest Reset Date for any series of notes that bears interest at floating rates would otherwise be a day that is not a business day, the particular Interest Reset Date will be postponed to the next succeeding business day, except that in the case of a series of notes that bears interest at floating rates as to which LIBOR is an applicable Interest Rate Basis and that business day falls in the next succeeding calendar month, the particular Interest Reset Date will be the immediately preceding business day.

***Interest Determination Dates***

The interest rate applicable to a series of notes that bears interest at floating rates for an Interest Reset Period commencing on the related Interest Reset Date will be determined by reference to the applicable Interest Rate Basis as of the particular Interest Determination Date, which will be:

*with respect to the Federal Funds Open Rate* the related Interest Reset Date;

*with respect to the Commercial Paper Rate, the Federal Funds Rate and the Prime Rate* the business day preceding the related Interest Reset Date;

*with respect to the CD Rate and the CMT Rate* the second business day preceding the related Interest Reset Date;

*with respect to the Constant Maturity Swap Rate* the second U.S. Government Securities business day (as defined under *Constant Maturity Swap Rate* below) preceding the related Interest Reset Date; provided, however, that if, after attempting to determine the Constant Maturity Swap Rate (as described under *Constant Maturity Swap Rate* below), such rate is not determinable for a particular Interest Determination Date (the *original interest determination date*), then such Interest Determination Date shall be the first U.S. Government Securities business day preceding the original interest determination date for which the Constant Maturity Swap Rate can be determined as described under *Constant Maturity Swap Rate* below;

*with respect to the Eleventh District Cost of Funds Rate* the last working day of the month preceding the related Interest Reset Date on which the Federal Home Loan Bank of San Francisco publishes the Eleventh District Index (as defined below);

*with respect to LIBOR and EURIBOR* the second London Banking Day preceding the related Interest Reset Date; and

*with respect to the Treasury Rate* the day of the week in which the related Interest Reset Date falls on which day Treasury Bills (as defined below) are normally auctioned (i.e., Treasury Bills are normally sold at auction on Monday of each week, unless that day is a legal holiday, in which case the auction is normally held on the following Tuesday, except that the auction may be held on the preceding Friday); provided, however, that if an auction is held on the Friday of the week preceding the related Interest Reset Date, the Interest Determination Date will be the preceding Friday.

The Interest Determination Date pertaining to a series of notes that bears interest at floating rates the interest rate of which is determined with reference to two or more Interest Rate Bases will be the latest business day which is at least two business days before the related Interest Reset Date for the applicable note that bears interest at floating rates on which each Interest Reset Basis is determinable.

***Calculation Dates***

The indenture trustee will be the Calculation Agent, unless otherwise specified in the applicable pricing supplement. The interest rate applicable to each Interest Reset Period will be determined by the Calculation Agent on or prior to the Calculation Date (as defined below), except with respect to LIBOR, EURIBOR and the Eleventh District Cost of Funds Rate, which will be determined on the particular Interest Determination Date. Upon request of the registered holder of a series of notes that bears interest at floating rates, the Calculation Agent will disclose the interest rate then in effect and, if determined, the interest rate that will become effective as a result of a determination made for the next succeeding Interest Reset Date with respect to the particular series of notes that bears interest at floating rates. The Calculation Date, if applicable, pertaining to any Interest Determination Date will be the earlier of: the tenth calendar day after the particular Interest Determination Date or, if such day is not a business day, the next succeeding business day; or

the business day immediately preceding the applicable Interest Payment Date or the maturity date, as the case may be.

***Maximum and Minimum Interest Rates***

A series of notes that bears interest at floating rates may also have either or both of the following if specified in the applicable pricing supplement:

a maximum numerical limitation, or ceiling, that may accrue during any Interest Reset Period (a Maximum Interest Rate ); and

a minimum numerical limitation, or floor, that may accrue during any Interest Reset Period (a Minimum Interest Rate ).

In addition to any Maximum Interest Rate that may apply to a series of notes that bears interest at floating rates, the interest rate on a series of notes that bears interest at floating rates will in no event be higher than the maximum rate permitted by New York law, as the same may be modified by United States law of general application.

***Interest Payments***

Unless otherwise specified in the applicable pricing supplement, interest on each series of notes that bears interest at floating rates will be payable on the date(s) set forth below (each, an Interest Payment Date with respect to such series of notes that bears interest at floating rates). Unless otherwise specified in the applicable pricing supplement, the Interest Payment Dates will be, in the case of a series of notes that bears interest at floating rates which reset:

*daily, weekly or monthly* the fifteenth day of each calendar month or on the fifteenth day of March, June, September and December of each year, as specified in the applicable pricing supplement;

*quarterly* the fifteenth day of March, June, September and December of each year;

*semi-annually* the fifteenth day of the two months of each year specified in the applicable pricing supplement; and

*annually* the fifteenth day of the month of each year specified in the applicable pricing supplement.

&nbsp;= "left" style="font-size: 10pt; margin-top: 6pt; margin-left: 0; margin-right: 0; margin-bottom: 0; color: #000000; background: #ffffff;"> This Registration Statement contains:

three prospectus supplements relating to notes (one for an offering of secured medium-term notes which will be offered primarily to institutional investors, one for an offering of Principal® Life CoreNotes® which will be offered primarily to retail investors and one for an offering of secured medium-term notes which will be offered primarily to retail investors) that one or more newly established separate and distinct trusts may issue and sell to the public, from time to time, with payment of principal and interest on the applicable series of notes to be secured by a funding agreement sold to, and deposited into, the applicable trust, by Principal Life Insurance Company, the payment obligations under which will be fully and unconditionally guaranteed by a guarantee issued by Principal Financial Group, Inc.; and

a base prospectus relating to notes that one or more newly established separate and distinct trusts may issue and sell to the public, from time to time, with payment of principal and interest on the applicable series of notes to be secured by a funding agreement sold to, and deposited into, the applicable trust, by Principal Life Insurance Company, the payment obligations under which will be fully and unconditionally guaranteed by a guarantee issued by Principal Financial Group, Inc.

Each offering of notes made under this Registration Statement will be made pursuant to:

the base prospectus and one of the prospectus supplements included in this Registration Statement, with the specifications of the notes, funding agreements and guarantees offered thereby set forth in a pricing supplement; or

a newly filed prospectus supplement to the base prospectus, with the specifications of the notes, funding agreements and guarantees offered thereby set forth in such newly filed prospectus supplement or a pricing supplement.

---

The information in this prospectus supplement is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus supplement is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

**Subject to Completion, dated November 16, 2005**

**PROSPECTUS SUPPLEMENT**

**(To prospectus dated \_\_\_\_\_, 2005)**

**\$4,000,000,000**

**Secured Medium-Term Notes**

**Due Between Nine Months and Thirty Years From the Date of Issue**

**Issued Through**

**Principal Life Income Fundings Trusts**

**Secured by Funding Agreements Issued by**

**Principal Life Insurance Company and**

**Guarantees Issued by Principal Financial Group, Inc.**

**Principal Life:** We are Principal Life Insurance Company, an Iowa insurance company, the sponsor of the program and the depositor and issuer of the funding agreements described below. This prospectus supplement relates to the offering, from time to time, through newly established separate and distinct trusts described below, of one or more series of secured medium-term notes, which we refer to in this prospectus supplement as notes, in an aggregate principal amount of up to \$4,000,000,000 or the equivalent amount in one or more foreign or composite currencies, less any principal amount of notes previously issued under this program pursuant to this prospectus supplement, our Principal® Life CoreNotes® program issued primarily to retail investors pursuant to a separate prospectus supplement dated the date hereof, our secured medium-term notes retail program issued primarily to retail investors pursuant to a separate prospectus supplement dated the date hereof or otherwise under the accompanying prospectus.

The applicable trust will use the net proceeds from the offering of its series of notes to purchase a funding agreement sold to, and deposited into, the applicable trust, by us. Our payment obligations under the funding agreement relating to the applicable series of notes will be fully and unconditionally guaranteed by a guarantee issued by Principal Financial Group, Inc., a Delaware corporation and our indirect parent ( PFG ).

Each trust exists for the exclusive purpose of issuing and selling one series of notes to investors, using the net proceeds from the sale of that series of notes to acquire a funding agreement from us, collaterally assigning and granting a security interest in the applicable funding agreement, and collaterally assigning and granting a security interest in the applicable guarantee, in favor of the indenture trustee, and engaging in other activities necessary or incidental thereto.

You should read this prospectus supplement, the accompanying prospectus and the applicable pricing supplement carefully before you invest in the notes.

**The notes:** The specific terms and conditions of each series of notes will be as set forth in a separate pricing supplement. The notes of each series will:

be issued by a separate and distinct trust;

rank as secured indebtedness of the trust secured primarily by a funding agreement issued by us;

unless otherwise specified in the applicable pricing supplement, not be listed on any securities exchange;

be issued in only one class;

unless otherwise specified in the applicable pricing supplement, have a minimum denomination of \$1,000 and integral multiples in excess thereof or other specified denominations for foreign currencies;

be in book-entry or definitive form;

have a stated maturity of between 9 months and 30 years from the date of issue;

have redemption and/or repayment provisions, if applicable, whether mandatory or at the option of the trust or the holders of the notes;

represent non-recourse obligations of the trust and be paid only from the assets of that trust;

be the trust's obligations only and will not be obligations of, or guaranteed by, us, PFG or any of our or its affiliates;

provide for payment in U.S. dollars or one or more foreign currencies;

bear interest at fixed or floating rates, or bear no interest at all;

pay interest on each series of notes on a monthly, quarterly, semi-annual or annual basis (unless otherwise specified in the applicable pricing supplement); and

be sold to United States and foreign institutional and other investors.

Holder of a series of notes may look only to the trust's rights and title in the funding agreement issued to, and deposited into, the applicable trust by us, the related guarantee issued by PFG and any proceeds of that funding agreement and guarantee held in the trust and not to any other assets or collateral held by any other trust, us or PFG.

**Investing in the notes involves risks that are described in the Risk Factors section beginning on page 2 of the accompanying prospectus.**

**None of the Securities and Exchange Commission (the SEC), any state securities commission or any state insurance commission has approved or disapproved of these securities or determined if this prospectus supplement, the accompanying prospectus or any pricing supplement is truthful or complete. Any representation to the contrary is a criminal offense.**

The trusts may sell notes to one or more of the applicable agents referred to below (collectively, the Agents) as principals for resale at varying or fixed offering prices or through the applicable Agents using their reasonable efforts on behalf of the trust.

Morgan Stanley  
UBS Investment Bank**

If any Interest Payment Date other than the maturity date for any series of notes that bears interest at floating rates would otherwise be a day that is not a business day, such Interest Payment Date will be postponed to the next succeeding business day, except that in the case of a series of notes that bears interest at floating rates as to which LIBOR is an applicable Interest Rate Basis and that business day falls in the next succeeding calendar month, the

particular Interest Payment Date will be the immediately preceding business day. If the maturity date of a series of notes that bears interest at floating rates falls on a day that is not a business day, the trust will make the required payment of principal, premium, if any, and interest or other amounts on the next succeeding business day, and no additional interest will accrue in respect of the payment made on that next succeeding business day.

All percentages resulting from any calculation on notes that bear interest at floating rates will be rounded to the nearest one hundred-thousandth of a percentage point, with five one-millionths of a percentage point rounded upwards. For example, 9.876545% (or .09876545) would be rounded to 9.87655% (or .0987655). All dollar amounts used in or resulting from any calculation on notes that bear interest at floating rates will be rounded, in the case of United States dollars, to the nearest cent or, in the case of a foreign currency, to the nearest unit (with one-half cent or unit being rounded upwards).

With respect to each series of notes that bears interest at floating rates, accrued interest is calculated by multiplying the principal amount of such note that bears interest at floating rates by an accrued interest factor. The accrued interest factor is computed by adding the interest factor calculated for each day in the particular Interest Reset Period. The interest factor for each day will be computed by dividing the interest rate applicable to such day by 360, in the case of a series of notes that bears interest at floating rates as to which the CD Rate, the Commercial Paper Rate, the Eleventh District Cost of Funds Rate, the Federal Funds Open Rate, the Federal Funds Rate, LIBOR, EURIBOR or the Prime Rate is an applicable Interest Rate Basis, or by the actual number of days in the year, in the case of a series of notes that bears interest at floating rates as to which the CMT Rate or the Treasury Rate is an applicable Interest Rate Basis. In the case of a series of notes that bears interest at floating rates as to which the Constant Maturity Swap Rate is the Interest Rate Basis, the interest factor for each day will be computed by dividing the number of days in the interest period by 360 (the number of days to be calculated on the basis of a year of 360 days with twelve 30-day months (unless (i) the last day of the interest period is the 31st day of a month but the first day of the interest period is a day other than the 30th or 31st day of a month, in which case the month that includes that last day shall not be considered to be shortened to a 30-day month, or (ii) the last day of the interest period is the last day of the month of February, in which case the month of February shall not be considered to be lengthened to a 30-day month)). The interest factor for a series of notes that bears interest at floating rates as to which the interest rate is calculated with reference to two or more Interest Rate Bases will be calculated in each period in the same manner as if only the applicable Interest Rate Basis specified in the applicable pricing supplement applied.

The Calculation Agent shall determine the rate derived from each Interest Rate Basis in accordance with the following provisions.

***CD Rate***

CD Rate means:

- (1) the rate on the particular Interest Determination Date for negotiable United States dollar certificates of deposit having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) (as defined

below) under the caption CDs (secondary market); or

(2) if the rate referred to in clause (1) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date for negotiable United States dollar certificates of deposit of the particular Index Maturity as published in H.15 Daily Update (as defined below), or other recognized electronic source used for the purpose of displaying the applicable rate, under the caption CDs (secondary market); or

(3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the arithmetic mean of the secondary market offered rates as of 10:00 A.M., New York City time, on that Interest Determination Date, of three leading non-bank dealers in negotiable United States dollar certificates of deposit in The City of New York (which may include the Agents or their affiliates) selected by the Calculation Agent for negotiable United States dollar certificates of deposit of major United States money market banks for negotiable United States certificates of deposit with a remaining maturity closest to the particular Index Maturity in an amount that is representative for a single transaction in that market at that time; or

(4) if the dealers so selected by the Calculation Agent are not quoting as mentioned in clause (3), the CD Rate in effect on the particular Interest Determination Date.

H.15(519) means the weekly statistical release designated as H.15(519), or any successor publication, published by the Board of Governors of the Federal Reserve System.

H.15 Daily Update means the daily update of H.15(519), available through the world-wide-web site of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/releases/H15/update>, or any successor site or publication.

**CMT Rate**

CMT Rate means:

(1) if CMT Moneyline Telerate Page 7051 is specified in the applicable pricing supplement:

(a) the percentage equal to the yield for United States Treasury securities at constant maturity having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) under the caption Treasury Constant Maturities, as the yield is displayed on Moneyline Telerate (or any successor service) on page 7051 (or any other page as may replace the specified page on that service) ( Moneyline Telerate Page 7051 ), for the particular Interest Determination Date; or

(b) if the rate referred to in clause (a) does not so appear on Moneyline Telerate Page 7051, the percentage equal to the yield for United States Treasury securities at constant maturity having the particular Index Maturity and for the particular Interest Determination Date as published in H.15(519) under the caption Treasury Constant Maturities; or

(c) if the rate referred to in clause (b) does not so appear in H.15(519), the rate on the particular Interest Determination Date for the period of the particular Index Maturity as may then be published by either the Federal Reserve System Board of Governors or the United States Department of the Treasury that the Calculation Agent determines to be comparable to the rate which would otherwise have been published in H.15(519); or

(d) if the rate referred to in clause (c) is not so published, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices at approximately 3:30 P.M., New York City time, on that Interest Determination Date of three leading primary United States government securities dealers in The City of New York (which may include the Agents or their affiliates) (each, a Reference Dealer ), selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the highest quotation, or, in the event of equality, one of the highest, and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity equal to the particular Index Maturity, a remaining term to maturity no more than one year shorter than that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at that time; or

(e) if fewer than five but more than two of the prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations shall be eliminated; or

(f) if fewer than three prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices as of approximately 3:30 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the highest quotation or, in the event of equality, one of the highest and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity greater than the particular Index Maturity, a remaining term to maturity closest to that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at that time; or

(g) if fewer than five but more than two prices referred to in clause (f) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations will be eliminated; or

(h) if fewer than three prices referred to in clause (f) are provided as requested, the CMT Rate in effect on the particular Interest Determination Date; or

(2) if CMT Moneyline Telerate Page 7052 is specified in the applicable pricing supplement:

(a) the percentage equal to the one-week or one-month, as specified in the applicable pricing supplement average yield for United States Treasury securities at constant maturity having the Index Maturity specified in the applicable pricing supplement as

**ABOUT THIS PROSPECTUS SUPPLEMENT AND THE PRICING SUPPLEMENTS**

This document is a prospectus supplement and supplements a prospectus which is part of the registration statement that we and PFG have filed with the SEC. This prospectus supplement provides you with a general description of the notes being offered, through newly established separate and distinct trusts and the underlying funding agreements and guarantees, and supplements the description of the notes, the underlying funding agreements and guarantees contained in the accompanying prospectus. These notes may be offered from time to time, through trusts, in one or more series of notes with a total initial public offering price or purchase price of up to \$4,000,000,000 or the equivalent amount in one or more foreign or composite currencies, less any principal amount of notes previously issued under this program pursuant to this prospectus supplement, our Principal® Life CoreNotes® program issued primarily to retail investors pursuant to a separate prospectus supplement dated the date hereof, our secured medium-term notes retail program issued primarily to retail investors pursuant to a separate prospectus supplement dated the date hereof or otherwise under the accompanying prospectus.

The specific terms and conditions of notes being offered and the related funding agreement and guarantee will be contained in a pricing supplement. A copy of that pricing supplement will be provided to

you along with a copy of this prospectus supplement and the accompanying prospectus. That pricing supplement also may add, update, supplement or clarify information in this prospectus supplement and the accompanying prospectus. You should carefully review such additional, updated, supplemental or clarifying information contained in the pricing supplement. You should read this prospectus supplement and the accompanying prospectus and the pricing supplement together with the additional information that is incorporated by reference in this prospectus supplement and the accompanying prospectus. That additional information is described under the heading **Incorporation of Certain Documents by Reference** beginning on page 12 of the accompanying prospectus.

You should rely only on the information incorporated by reference or provided in this prospectus supplement, the accompanying prospectus and the applicable pricing supplement. None of us, PFG, any trust or any Agent has authorized any other person to provide you with different or additional information. If anyone provides you with different or additional information, you should not rely on it. None of us, PFG, any trust or any Agent is making an offer to sell the notes in any jurisdiction where the offer or sale is not permitted. You should assume that the information contained or incorporated by reference in this prospectus supplement, the accompanying prospectus and the applicable pricing supplement, as well as information PFG previously filed with the SEC and incorporated by reference, is accurate only as of its respective date. The business, financial condition, results of operations and prospects of us and PFG may have changed since that date.

In this prospectus supplement, references to **Principal Life**, **we**, **us** and **our** are to Principal Life Insurance Company, an Iowa life insurance company, references to **PFG** are to Principal Financial Group, Inc., a Delaware corporation and our indirect parent company, and references to **trust** are to the applicable newly established separate and distinct special purpose common law trust, formed in a jurisdiction located in the United States of America specified in the applicable pricing supplement, which actually issues the applicable series of notes. In this prospectus supplement, we refer to each series of Secured Medium-Term Notes as a **series of notes** and to Secured Medium-Term Notes in general as **notes**.

In this prospectus supplement, references to **United States dollars**, **U.S. dollars** or **\$** are to lawful currency of the United States of America, and references to **euros** are to the currency introduced at the start of the third stage of the European economic and monetary union pursuant to the treaty establishing the European Community, as amended.

### SUMMARY

*This section summarizes the material legal and financial terms of the notes and the underlying fble pricing supplement, average yield for United States Treasury securities at constant maturity having the particular Index Maturity and for the week or month, as applicable, preceding the particular Interest Determination Date as published in H.15(519) opposite the caption Treasury Constant Maturities; or* (c) if the rate referred to in clause (b) does not so appear in H.15(519), the one-week or one-month, as specified in the applicable pricing supplement, average yield for United States Treasury securities at constant maturity having the particular Index Maturity as otherwise announced by the Federal Reserve Bank of New York for the week or month, as applicable, ended immediately preceding the week or month, as applicable, in which the particular Interest Determination Date falls; or (d) if the rate referred to in clause (c) is not so published, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices at approximately 3:30 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the highest quotation, or, in the event of equality, one of the highest, and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity equal to the particular Index Maturity, a remaining term to maturity no more than one year shorter than that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at that time; or (e) if fewer than five but more than two of the prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations shall be eliminated; or (f) if fewer than three prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices as of approximately 3:30 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the

highest quotation or, in the event of equality, one of the highest and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity greater than the particular Index Maturity, a remaining term to maturity closest to that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at the time; or

(g) if fewer than five but more than two prices referred to in clause (f) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations will be eliminated; or

(h) if fewer than three prices referred to in clause (f) are provided as requested, the CMT Rate in effect on that Interest Determination Date.

*If two United States Treasury securities with an original maturity greater than the Index Maturity specified in the applicable pricing supplement have remaining terms to maturity equally close to the particular Index Maturity, the quotes for the United States Treasury security with the shorter original remaining term to maturity will be used.*

**Commercial Paper Rate**

*Commercial Paper Rate means:*

(1) the Money Market Yield (as defined below) on the particular Interest Determination Date of the rate for commercial paper having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) under the caption Commercial Paper Nonfinancial; or

(2) if the rate referred to in clause (1) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the Money Market Yield of the rate on the particular Interest Determination Date for commercial paper having the particular Index Maturity as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying the applicable rate, under the caption Commercial Paper Nonfinancial; or

(3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the Money Market Yield of the arithmetic mean of the offered rates at approximately 11:00 A.M., New York City time, on that Interest Determination Date of three leading dealers of United States dollar commercial paper in The City of New York (which may include the Agents or their affiliates) selected by the Calculation Agent for commercial paper having the particular Index Maturity placed for industrial issuers whose bond rating is Aa , or the equivalent, from a nationally recognized statistical rating organization; or

(4) if the dealers so selected by the Calculation Agent are not quoting as mentioned in clause (3), the Commercial Paper Rate in effect on the particular Interest Determination Date.

*Money Market Yield means a yield (expressed as a percentage) calculated in accordance with the following formula:*

$$\text{Money Market Yield} = \frac{D \times 360}{360 - (D \times M)} \times 100$$

where *D* refers to the applicable per annum rate for commercial paper quoted on a bank discount basis and expressed as a decimal, and *M* refers to the actual number of days in the applicable Interest Reset Period.

**Constant Maturity Swap Rate**

*Constant Maturity Swap Rate* means:

(1) the rate for U.S. dollar swaps with the designated maturity specified in the applicable pricing supplement, expressed as a percentage, which appears on the Reuters Screen (or any successor service) ISDAFIX1 Page as of 11:00 A.M., New York City time, on the particular Interest Determination Date; or

(2) if the rate referred to in clause (1) does not appear on the Reuters Screen (or any successor service) ISDAFIX1 Page by 2:00 P.M., New York City time, on such Interest Determination Date, a percentage determined on the basis of the mid-market semi-annual swap rate quotations provided by the reference banks (as defined below) as of approximately 11:00 A.M., New York City time, on such Interest Determination Date, and, for this purpose, the semi-annual swap rate means the mean of the bid and offered rates for the semi-annual fixed leg, calculated on a 30/360 day count basis, of a fixed-for-floating U.S. dollar interest rate swap transaction with a term equal to the designated maturity specified in the applicable pricing supplement commencing on the Interest Reset Date and in a representative amount (as defined below) with an acknowledged dealer of good credit in the swap market, where the floating leg, calculated on an actual/360 day count basis, is equivalent to USD-LIBOR-BBA with a designated maturity specified in the applicable pricing supplement. The Calculation Agent will request the principal New York City office of each of the reference banks to provide a quotation of its rate. If at least three quotations are provided, the rate for that Interest Determination Date will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality, one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest); or

(3) if at least three quotations are not received by the Calculation Agent as mentioned in clause 4 and funding agreements and guarantees that are described in more detail in Description of the Notes beginning on page S-14 of this prospectus supplement, Description of the Funding Agreements beginning on page S-41 of this prospectus supplement, and Description of the Guarantees beginning on page 40 of the accompanying prospectus. Final terms of any particular series of notes and the related funding agreement and guarantee are set at the time of sale and will be contained in a pricing supplement relating to that series of notes and the related funding agreement and guarantee. That pricing supplement may add to, update, supplement or clarify the terms contained in this summary. In addition, you should read the more detailed information appearing elsewhere in the accompanying prospectus, this prospectus supplement and the applicable pricing supplement.

The Trusts	Each series of notes will be issued by a newly established and separately created common law trust. Each trust will be established by GSS Holdings II, Inc., as trust beneficial owner, and U.S. Bank Trust National Association, as trustee, pursuant to a trust agreement (each, a trust agreement ). The assets and liabilities of each trust are separate and distinct from the assets and liabilities of every other trust, us and PFG.
The Sponsor and the Depositor	We are the sponsor of the program and a registrant as the depositor and issuer of the funding agreements under the program.
The Guarantor	PFG is a registrant as the issuer of the guarantees that will fully and unconditionally guarantee our payment obligations under the funding agreements.
Purpose of Trusts	The sole purpose of the trusts is to provide for the payment of the principal and interest on the notes, (2), the Constant Maturity Swap Rate in effect on the particular Interest Determination Date.

U.S. Government Securities business day means any day except for Saturday, Sunday, or a day on which The Bond Market Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities.

Representative amount means an amount that is representative for a single transaction in the relevant market at the relevant time.

Reference banks mean five leading swap dealers in the New York City interbank market, selected by the Calculation Agent, after consultation with us.

***Eleventh District Cost of Funds Rate***

Eleventh District Cost of Funds Rate means:

(1) the rate equal to the monthly weighted average cost of funds for the calendar month immediately preceding the month in which the particular Interest Determination Date falls as set forth under the caption 11th District on the display on Moneyline Telerate (or any successor service) on page 7058 (or any other page as may replace the specified page on that service) ( Moneyline Telerate Page 7058 ) as of 11:00 A.M., San Francisco time, on that Interest Determination Date; or

(2) if the rate referred to in clause (1) does not so appear on Moneyline Telerate Page 7058, the monthly weighted average cost of funds paid by member institutions of the Eleventh Federal Home Loan Bank District that was most recently announced (the Eleventh District Index ) by the Federal Home Loan Bank of San Francisco as the cost of funds for the calendar month immediately preceding that Interest Determination Date; or

(3) if the Federal Home Loan Bank of San Francisco fails to announce the Eleventh District Index on or prior to the particular Inurpose of each trust is to facilitate a program for the issuance of notes to the public. Each trust may only issue one series of notes and such notes will be issued only on the original issue date for such notes. Each series of notes will be secured by only one funding agreement purchased from us by the applicable trust, the principal amount of which may not be increased. Our payment obligations under each funding agreement will be fully and unconditionally guaranteed by PFG. The trust will use the net proceeds received from issuing a series of notes to acquire a funding agreement for, and to be held in, the trust. The trust will hold the collateral described below pertaining to the applicable series of notes to fund its obligations under that series of notes. Notes issued by the trust will be the direct obligations of the trust and will not be the obligations of any other trust, us or PFG. Holders of notes of a particular series may only look to the funding agreement issued by us, the related guarantee issued by PFG and any proceeds of such funding agreement and guarantee held in the related trust for payment on their notes and not to the assets held in any other trust or by us or PFG.

We and PFG are not affiliated with any trust. Neither we, PFG nor any of our officers, directors, subsidiaries or affiliates owns any beneficial

interest in  
any trust nor  
has any of  
these  
persons or  
entities  
entered into  
any  
agreement  
with any  
trust other  
than in  
furtherance  
of the  
issuance of  
notes from  
time

S-3

---

to time as contemplated by this prospectus supplement and the accompanying prospectus.

Neither we, PFG nor any of our officers, directors, subsidiaries or affiliates is affiliated with the trustee, the trust beneficial owner or the indenture trustee relating to the notes.

Below is a diagram showing the parties involved in the issuance of notes by each trust.

We Can Issue Medium-Term  
Notes and  
Funding Agreements Directly  
to Investors

We are able to issue our own medium-term notes directly to investors and do issue funding agreements directly to investors. However, by securing each trust's notes with a funding agreement, such trust's notes are secured by an asset that would have a higher priority in insolvency than our unsecured medium-term notes, if any, and may be entitled to receive a higher investment interest Deter-

mination Date for the calendar month immediately preceding that Interest Determination Date, the Eleventh District Cost of Funds Rate in effect on the particular Interest Determination Date.

**Federal Funds Rates**

Federal Funds Open Rate means the rate set forth on Moneyline Telerate (or any successor service) on page 5 (or any other page as may replace the specified page on that service) for an Interest Determination Date underneath the caption FEDERAL FUNDS in the row titled OPEN. If the rate is not available for an Interest Determination Date, the rate for that Interest Determination Date shall be the Federal Funds Rate as determined below.

Federal Funds Rate means:

(1) the rate on the particular Interest Determination Date for United States dollar federal funds as published in H.15(519) under the caption Federal Funds (Effective) and displayed on Moneyline Telerate (or any successor service) on page 120 (or any other page as may replace the specified page on that service) ( Moneyline Telerate Page 120 ); or

(2) if the rate referred to in clause (1) does not so appear on Moneyline Telerate Page 120 or is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date for United States dollar federal funds as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying the applicable rate, under the caption Federal Funds (Effective); or

(3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the arithmetic mean of the rates for the last transaction in overnight United States dollar federal funds arranged by three leading brokers of United States dollar federal funds transactions in The City of New York (which may include the Agents or their affiliates), selected by the Calculation Agent prior to 9:00 A.M., New York City time, on that Interest Determination Date; or

(4) if the brokers so selected by the Calculation Agent are not quoting as mentioned in clause (3), the Federal Funds Rate in effect on the particular Interest Determination Date.

**LIBOR**

LIBOR means:

(1) if LIBOR Moneyline Telerate is specified in the applicable pricing supplement or if neither LIBOR Reuters nor LIBOR Moneyline Telerate is specified in the applicable pricing supplement as the method for calculating LIBOR, the rate for deposits in the LIBOR Currency having the Index Maturity specified in the applicable pricing supplement, commencing on the related Interest Reset Date, that appears on the LIBOR Page as of 11:00 A.M., London time, on the particular Interest Determination Date; or

(2) if LIBOR Reuters is specified in the applicable pricing supplement, the arithmetic mean of the offered rates, calculated by the Calculation Agent, or the offered rate, if the LIBOR Page by its terms provides only for a single rate, for deposits in the LIBOR Currency having the particular Index Maturity, commencing on the related Interest Reset Date, that appear or appears, as the case may be, on the LIBOR Page as of 11:00 A.M., London time, on the particular Interest Determination Date; or

(3) if fewer than two offered rates appear, or no rate appears, as the case may be, on the particular Interest Determination Date on the LIBOR Page as specified in clause (1) or (2), as applicable, the rate calculated by the Calculation Agent of at least two offered quotations obtained by the Calculation Agent after requesting the principal

London offices of each of four major reference banks (which may include affiliates of the Agents), in the London interbank market to provide the Calculation Agent with its offered quotation for deposits in the LIBOR Currency for the period of the particular Index Maturity, commencing on the related Interest Reset Date, to prime banks in the London interbank market at approximately 11:00 A.M., London time, on that Interest Determination Date and in a principal amount that is representative for a single transaction in the LIBOR Currency in that market at that time; or

(4) if fewer than two offered quotations referred to in clause (3) are provided as requested, the rate calculated by the Calculation Agent as the arithmetic mean of the rates quoted at approximately 11:00 A.M., in the applicable Principal Financial Center, on the particular Interest Determination Date by three major banks (which may include affiliates of the Agents) in that principal financial center selected by the Calculation Agent for loans in the LIBOR Currency to leading European banks, having the particular Index Maturity and in a principal amount that is representative for a single transaction in the LIBOR Currency in that market at that time; or

(5) if the banks so selected by the Calculation Agent are not quoting as mentioned in clause (4), LIBOR in effect on the particular Interest Determination Date.

LIBOR Currency means the currency specified in the applicable pricing supplement as to which LIBOR shall be calculated or, if no currency is specified in the applicable pricing supplement, United States dollars.

& nbt rating from one or more nationally recognized rating agencies than our unsecured medium-term notes. In addition, funding agreements are very difficult to transfer and have no active secondary market. By securing each trust s notes with a funding agreement, investors may be able to avail themselves of many of the benefits of our funding agreements while benefiting from the liquidity afforded by each trust s medium-term notes. Agents Merrill Lynch, Pierce, Fenner & Smith Incorporated, ABN AMRO Incorporated, Banc of America Securities LLC, Barclays Capital Inc., Bear, Stearns & Co. Inc., BNP Paribas Securities Corp., Citigroup Global Markets Inc., Credit Suisse First Boston LLC, Deutsche Bank Securities Inc., Goldman, Sachs & Co., Lehman Brothers Inc., Morgan Stanley & Co. Incorporated, UBS Securities LLC and Wachovia Capital Markets, LLC.

Secured Medium-Term  
Notes Program

This prospectus supplement relates to notes that one or more trusts may issue and sell to United States and foreign institutional and other investors under our secured medium-term notes program.

Principal® Life CoreNotes®  
Program

Included in the registration statement, of which this prospectus supplement is a part, is another prospectus supplement relating to notes that may be issued and sold to retail investors by newly established trusts under the related Principal® Life CoreNotes® program. The terms of the Principal® Life CoreNotes® are identical in all material respects to the terms of the notes to be sold under this program, as described in this prospectus supplement, except that the Principal® Life CoreNotes®:

may not be issued as amortizing notes;

will be denominated in U.S. dollars only;

will not provide for the payment of additional amounts relating to any required withholding under any circumstances; and

may contain a survivor's option, permitting optional repayment of notes of a series of notes, subject to certain limitations, prior to maturity, if requested, following the death of the beneficial owner of notes of that series of notes.

Secured Medium-Term Notes  
Retail Program

Included in the registration statement, of which this prospectus supplement is a part, is another prospectus supplement relating to notes that may be issued and sold to retail investors by newly established trusts under the related secured medium-term notes retail program. The terms of the secured medium-term notes retail program are identical in all material respects to the terms of the notes to be sold under this program, as described in this prospectus supplement, except that the secured medium-term retail notes:

may not be issued as amortizing notes;

will be denominated in U.S. dollars only;

will not provide for the payment of additional amounts relating to any required withholding under any circumstances; and

may contain a survivor's option, permitting optional repayment of notes of a series of notes, subject to certain limitations, prior to maturity, if requested, following the death of the beneficial owner of notes of that series of notes.

Amount

The trusts may collectively issue up to a maximum aggregate principal amount of \$4,000,000,000 of notes, or the equivalent in one or more foreign or composite currencies, in connection with this prospectus supplement, less any principal amount of

notes previously issued under this program pursuant to this prospectus supplement, our Principal® Life CoreNotes® program pursuant to a separate prospectus supplement dated the date hereof, our secured medium-term notes retail program pursuant to a separate prospectus supplement dated the date hereof or otherwise under the accompanying prospectus.

Flow of Funds

Other than during the occurrence and continuance of an event of default under the notes of a trust, amounts received by or on behalf of the trust will be paid:

*first*, to amounts due under the notes; and

*second*, with respect to any remaining funds, in accordance with the applicable trust agreement.

During the occurrence and continuance of an event of default under the notes of a trust, amounts received by or on behalf of the trust will be paid:

*first*, to the payment of the reasonable and customary expenses and counsel fees incurred by the indenture trustee and any other amounts due and unpaid to the indenture trustee, in an aggregate amount of no more than \$250,000 for all notes issued under the program, to the extent not paid pursuant to the applicable expense and indemnity agreement;

*second*, to amounts due under the notes; and

*third*, with respect to any remaining funds, in accordance with the applicable trust agreement.

See Description of the Notes Application of Money Collected Under the Indenture in the accompanying prospectus.

Since we and PFG are registrants, purchasers of notes may proceed directly against us and PFG to enforce their rights under the United States federal and state securities laws. The right of such purchasers to proceed against us, with respect to the applicable funding agreement, under the United States federal and state securities laws, is no different than if we had issued the funding agreement directly to such purchasers. The right of such purchasers to proceed against PFG, with respect to the applicable guarantee, under the United States federal and state securities laws is no different than if PFG had issued the guarantee directly to such purchasers.

Terms of the Notes:  
*Status*

Each series of notes will be the unconditional, direct, non-recourse, secured and unsubordinated obligations of the applicable trust. Each series of notes will be secured by the collateral relating to that series of notes.

Each series of notes may be accelerated in the payment of principal and outstanding interest if an event of default under the notes occurs. Upon the occurrence of an event of default, the indenture trustee (described below), on behalf of the holders of such notes, may only proceed against the collateral held in the related trust.

The notes of each series are not, and will not be, obligations of, or guaranteed by, us or any other insurance company or any affiliate of ours, including PFG. The notes will not benefit from any insurance guarantee fund coverage or any similar protection.

*Payment of Principal and Interest*

Principal and interest payments, if any, on any series of notes will be made solely from the proceeds of a funding agreement purchased with respect to such series of notes for, and to be held in, the related trust and the full and unconditional guarantee issued by PFG of our payment obligations under the relevant funding agreement.

Each series of notes may be interest bearing or non-interest bearing as specified in the applicable pricing supplement. Each series of notes may bear interest at either a fixed rate or a floating rate, or a combination of fixed rates and floating rates, as specified in the applicable pricing supplement.

The principal amount of each note (other than amortizing notes) will be payable on its stated maturity date, repayment date or redemption date, as specified in the applicable pricing supplement, at the corporate trust office of the paying agent or any other place the relevant trust designates.

Unless otherwise specified in the applicable pricing supplement, interest, if any, on each series of notes will be payable on a monthly, quarterly, semi-annual or annual basis.

A trust may issue amortizing notes that pay an amount in respect of both interest and principal amortized over the life of the note as specified in the applicable pricing supplement.

*Interest Rate*

Each fixed rate note will bear interest from its date of issue at the rate(s) stated in the applicable pricing supplement until the principal is paid. Each floating rate note will bear interest from the date of original issuance until the principal is paid at a rate determined by reference to an interest rate or interest rate

formula, which may be adjusted by a spread and/or spread multiplier (each as more fully described under "Description of the Notes"). The applicable pricing supplement will designate one or more of the following interest rate bases along with the index maturity for that interest rate basis:

the CD Rate;

the CMT Rate;

the Commercial Paper Rate;

the Constant Maturity Swap Rate;

the Eleventh District Cost of Funds Rate;

if "LIBOR Reuters" is specified in the applicable pricing supplement, the display on the Reuter Monitor Money Rates Service (or any successor service) on the page specified in the applicable pricing supplement (or any other page as may replace that page on that service) for the purpose of displaying the London interbank rates of major banks for the LIBOR Currency; or

if "LIBOR Moneyline Telerate" is specified in the applicable pricing supplement or neither "LIBOR Reuters" nor "LIBOR Moneyline Telerate" is specified in the applicable pricing supplement as the method for calculating LIBOR, the display on Moneyline Telerate (or any successor service) on the page specified in the applicable pricing supplement (or any other page as may replace such page on such service) for the purpose of displaying the London interbank rates of major banks for the LIBOR Currency.

**EURIBOR**

EURIBOR means: (1) with respect to any Interest Determination Date relating to a series of EURIBOR Notes or a series of notes that bears interest at floating rates for which the interest rate is determined with reference to EURIBOR (a "EURIBOR Interest Determination Date"), the rate for deposits in euros as sponsored, calculated and published jointly by the European Banking Federation and ACI - The Financial Market Association, or any company established by the joint sponsors for purposes of compiling and publishing those rates, having the Index Maturity specified in the applicable pricing supplement, commencing on the applicable Interest Reset Date, as the rate appears on Moneyline Telerate, Inc., or any successor service, on page 248 (or any other page as may replace that specified page on the service) ("Moneyline Telerate Page 248") as of 11:00 A.M., Brussels time, on the applicable EURIBOR Interest Determination Date; or (2) if such rate does not appear on Moneyline Telerate Page 248, or is not so published by 11:00 A.M., Brussels time, on the applicable EURIBOR Interest Determination Date, such rate will be calculated by the Calculation Agent and will be the arithmetic mean of at least two quotations obtained by the Calculation Agent after requesting the principal

Euro-zone (as defined below) offices of four major banks in the Euro-zone interbank market to provide the Calculation Agent with its offered quotation for deposits in euros for the period of the Index Maturity specified in the applicable pricing supplement, commencing on the applicable Interest Reset Date, to prime banks in the Euro-zone interbank market at approximately 11:00 A.M., Brussels time, on the applicable EURIBOR Interest Determination Date and in a principal amount not less than the equivalent of \$1 million in euros that is representative for a single transaction in euro in the market at that time; or (3) if fewer than two such quotations are so provided, the rate on the applicable EURIBOR Interest Determination Date will be calculated by the Calculation Agent and will be the arithmetic mean of the rates quoted at approximately 11:00 A.M., Brussels time, on such EURIBOR Interest Determination Date by four major banks in the Euro-zone for loans in euro to leading European banks, having the Index Maturity specified in the applicable pricing supplement, commencing on the applicable Interest Reset Date and in a principal amount not less than the equivalent of \$1 million in euros that is representative for a single transaction in euros in the market at that time; or (4) if the banks so selected by the Calculation Agent are not quoting as mentioned above, EURIBOR will be EURIBOR in effect on the applicable EURIBOR Interest Determination Date.

Euro-zone means the region comprised of member states of the European Union that have adopted the single currency in accordance with the treaty establishing the European Community, as amended by the treaty on European Union.

***Prime Rate***

Prime Rate means:

- (1) the rate on the particular Interest Determination Date as published in H.15(519) under the caption Bank Prime Loan; or
- (2) if the rate referred to in clause (1) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying the applicable rate, under the caption Bank Prime Loan; or
- (3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the arithmetic mean of the rates of interest publicly announced by each bank that appears on the Reuters Screen US PRIME 1 Page (as defined below) as the applicable bank's prime rate or base lending rate as of 11:00 A.M., New York City time, on that Interest Determination Date; or
- (4) if fewer than four rates referred to in clause (3) are so published by 3:00 p.m., New York City time, on the related Calculation Date, the rate calculated by the Calculation Agent as the particular Interest Determination Date calculated by the Calculation Agent as the arithmetic mean of the prime rates or base lending rates quoted on the basis of the actual number of days in the year divided by a 360-day year as of the close of business on that

Interest Determination Date by three major banks (which may include affiliates of the Agents) in The City of New York selected by the Calculation Agent; or

(5) if the banks so selected by the Calculation Agent are not quoting as mentioned in clause (4), the Prime Rate in effect on the particular Interest Determination Date.

Reuters Screen US PRIME 1 Page means the display on the Reuter Monitor Money Rates Service (or any successor service) on the US PRIME 1 page (or any other page as may replace that page on that service) for the purpose of displaying prime rates or base lending rates of major United States banks.

S-34

---

***Treasury Rate***

Treasury Rate means:

(1) the rate from the auction held on the Treasury Rate Interest Determination Date (the Auction) of direct obligations of the United States ( Treasury Bills ) having the Index Maturity specified in the applicable pricing supplement under the caption INVESTMENT RATE on the display on Moneyline Telerate (or any successor service) on page 56 (or any other page as may replace that page on that service) ( Moneyline Telerate Page 56 ) or page 57 (or any other page as may replace that page on that service) ( Moneyline Telerate Page 57 ); or

(2) if the rate referred to in clause (1) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the Bond Equivalent Yield (as defined below) of the rate for the applicable Treasury Bills as published in H.15 Daily Update, or another recognized electronic source used for the purpose of displaying the applicable rate, under the caption U.S. Government Securities/ Treasury Bills/ Auction High ; or

(3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the Bond Equivalent Yield of the auction rate of the applicable Treasury Bills as announced by the United States Department of the Treasury; or

(4) if the rate referred to in clause (3) is not so announced by the United States Department of the Treasury, or if the Auction is not held, the Bond Equivalent Yield of the rate on the particular Interest Determination Date of the applicable Treasury Bills as published in H.15(519) under the caption U.S. Government Securities/ Treasury Bills/ Secondary Market; or

(5) if the rate referred to in clause (4) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date of the applicable Treasury Bills as published in H.15 Daily Update, or another recognized electronic source used for the purpose of displaying the applicable rate, under the caption U.S. Government Securities/ Treasury Bills/ Secondary Market ; or

(6) if the rate referred to in clause (5) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the Bond Equivalent Yield of the arithmetic mean of the secondary market bid rates, as of approximately 3:30 P.M., New York City time, on that Interest Determination Date, of three primary United States government securities dealers (which may include the Agents or their affiliates) selected by the Calculation Agent, for the issue of Treasury Bills with a remaining maturity closest to the Index Maturity specified in the applicable pricing supplement; or

(7) if the dealers so selected by the Calculation Agent are not quoting as mentioned in clause (6), the Treasury Rate in effect on the particular

Interest Determination Date.

Bond Equivalent Yield means a yield (expressed as a percentage) calculated in accordance with the following formula:

$$\text{Bond Equivalent Yield} = \frac{D \times N}{360 - (D \times M)} \times 100$$

where  $D$  refers to the applicable per annum rate for Treasury Bills quoted on a bank discount basis and expressed as a decimal,  $N$  refers to 365 or 366, as the case may be, and  $M$  refers to the actual number of days in the applicable Interest Reset Period.

**Other/ Additional Provisions; Addendum**

Any provision with respect to a series of notes, including the specification and determination of one or more Interest Rate Bases, the calculation of the interest rate applicable to a note that bears interest at floating rates, the interest

S-35

---

payment dates, the stated maturity date, any redemption or repayment provisions or any other term relating to the applicable notes, may be modified and/or supplemented as specified under *Other/ Additional Provisions* on the face thereof or in an addendum relating thereof, if so specified on the face thereof and in each case described in the applicable pricing supplement.

**Discount Notes**

A trust may issue a series of notes ( *Discount Notes* ) that has an Issue Price (as specified in the applicable pricing supplement) that is less than the principal amount thereof by an amount that is equal to or greater than the *de minimis* amount. The *de minimis* amount is equal to 0.25% multiplied by the product of the principal amount of the notes and the number of full years to the stated maturity date. A series of Discount Notes may not bear any interest currently or may bear interest at a rate that is below market rates at the time of issuance. The difference between the Issue Price of a series of Discount Notes and par is referred to as the *Discount*. In the event of redemption, repayment or acceleration of maturity of a series of Discount Notes, the amount payable to the holders of such series of Discount Notes will be equal to the sum of:

the Issue Price (increased by any accruals of *Discount*) and, in the event of any redemption of such series of Discount Notes, if applicable, multiplied by the initial redemption percentage (as adjusted by the annual redemption percentage reduction, if applicable); and

any unpaid interest accrued on such series of Discount Notes to the maturity date.

Unless otherwise specified in the applicable pricing supplement, for purposes of determining the amount of *Discount* that has accvalign="top"> the Federal Funds Open Rate;

the Federal Funds Rate;

LIBOR;

EURIBOR;

the Prime Rate; or

the Treasury Rate.

Interest, if any, will be payable monthly, quarterly, semi-annually or annually on each interest payment date and on the maturity date or, if applicable, earlier redemption or repayment, and, with respect to fixed rate notes, will be computed on the basis of a 360-day year of twelve 30-day months, unless otherwise specified in the applicable pricing supplement.

*Maturities*

Unless otherwise specified in the applicable pricing supplement, each series of notes will mature between nine months and 30 years from its date of original issuance on the last scheduled interest payment date, as specified in the applicable pricing supplement.

*Redemption and Repayment* A trust will redeem its series of notes if we redeem the funding agreement securing such series of notes. Except as otherwise specified in the accompanying prospectus, this prospectus supplement or the applicable pricing supplement, the funding agreement securing a series of notes will not be redeemable by us and no series of notes will be repayable at the option of the holder prior to their stated maturity date. Unless otherwise specified in the applicable pricing supplement, the notes will not be subject to any sinking fund.

**Withholding Tax** All amounts due in respect of the notes of any series, the related guarantee and the related funding agreement will be made without any applicable withholding or deduction for or on account of any present or future taxes, duties, levies, assessments or other governmental charges of whatever nature imposed or levied by or on behalf of any governmental authority, unless such withholding or deduction is required by law. Unless otherwise specified in the applicable pricing

supplement, none of the notes, the related guarantee or the related funding agreement will provide for the payment of additional amounts relating to any required withholding or deduction imposed or levied on payments in respect of a series of notes, the related guarantee or the related funding agreement. As a result, unless otherwise specified in the applicable pricing supplement, the risk of any such withholding or deduction, whether or not as a result of a change in law or otherwise, will be borne by the holders of such series of notes.

Material United States Federal  
Income Tax Considerations

We intend to take the position, for United States federal income tax purposes, that each trust will be disregarded and that the notes will be treated as representing our indebtedness (the Intended Tax Characterization). Each holder of a note (or any beneficial interest therein), by acceptance of the note (or beneficial interest therein), agrees to the Intended Tax Characterization. Accordingly, holders of the notes generally will have the same United States federal income tax consequences from the purchase of the notes as they would have had if they purchased a debt obligation issued directly by us. Prospective purchasers of the notes must carefully consider the tax consequences of the ownership and disposition of the notes set forth under Material United States Federal Income Tax Considerations.

Fees and Expenses

We will pay the costs and expenses incurred by a trust under the expense and indemnity agreements with each of the indenture trustee, the custodian, the trust beneficial owner and the trustee (on behalf of itself and each trust formed in connection with the issuance of a series of notes) and any additional service provider appointed from time to time.

Under each expense and indemnity agreement, we will pay certain costs and expenses relating to the offering, sale, issuance and administration of any series of notes and certain costs, expenses and taxes incurred by a trust and will indemnify the indenture trustee, the custodian, the trust beneficial owner, the trustee, each trust and additional service providers appointed from time to time with respect to certain matters. See Description of the Expense and Indemnity Agreements in the accompanying prospectus.

We anticipate that the indenture trustee fees for the program will be approximately \$215 per year for each series of notes.

Denominations; Currency

Unless otherwise specified in the applicable pricing supplement, the notes will be denominated in U.S. dollars and sold in denominations of \$1,000 and integral multiples of \$1,000 in excess thereof.

Listing

Unless otherwise specified in the applicable pricing supplement, your series of notes will not be listed on any securities exchange.

Form of Notes	<p>Unless otherwise specified in the applicable pricing supplement, each series of notes will be issued in fully registered form and will be initially represented by one or more book-entry notes registered in the name of Cede &amp; Co., the nominee of The Depository Trust Company, as depository. Each book-entry note will be held by the indenture trustee as custodian for the depository or its nominee.</p>
Clearing Systems	<p>The Depository Trust Company and/or, in relation to any series of notes, any other clearing system as may be specified in the applicable pricing supplement.</p>
Collateral	<p>The notes of any series will be secured by the right, title and interest of the applicable trust in and to (1) the relevant funding agreement held in that trust, (2) the related guarantee issued by PFG to the trust fully and unconditionally guaranteeing our payment obligations under the funding agreement, (3) all proceeds of the funding agreement and the guarantee and all amounts and instruments on deposit from time to time in the related collection account, (4) all books and records pertaining to the relevant funding agreement and the related guarantee and (5) all rights of the trust pertaining to the foregoing.</p> <p>Each series of notes will be secured by the collateral held in the applicable trust. The trust will collaterally assign and grant a security interest in the related funding agreement and the related guarantee in favor of the indenture trustee for the benefit of the holders of notes of the applicable series.</p> <p>Under the custodial agreement (the custodial agreement ) entered into among the indenture trustee, Bankers Trust Company, N.A. (the custodian ) and the trustee (on behalf of each trust to be formed in connection with the issuance of a series of notes), upon the collateral assignment of and grant of security interest in the funding agreement and the guarantee related to a series of notes of a trust, the custodian will hold the funding agreement and the guarantee, on behalf of the indenture trustee in the State of Iowa.</p>
Funding Agreements	<p>A funding agreement is a type of insurance company product in which the purchaser, usually an institutional investor, pays the insurance company a deposit and, in turn, receives scheduled payments of principal and interest. The deposit we receive on the issuance of a funding agreement will be part of our general account and not allocated to any of our separate accounts. Our general account is the account which contains all of our assets and liabilities other than those held in our separate accounts. (Separate accounts are segregated accounts which are established for certain products that we sell. A separate account holds assets and liabilities specifically related to one or more products and segregates these assets and liabilities from the assets and liabilities of all other separate accounts and the assets and liabilities of our general account.) Since the deposit made under any funding agreement will be</p>

part of our general account, our obligations under each funding agreement will be the obligations of our general account, rather than the obligations of any separate account. As such, we will invest the proceeds from the sale of funding agreements in a portfolio of assets which along with our other general account assets will be used to meet our contractual obligations under the funding agreements and our other general account obligations. We will earn the spread differential between the cost of our obligations under the funding agreements and the yield on our invested assets. We may periodically, consistent with our past practice and subject to all applicable regulatory restrictions on our insurance operations, dividend a portion of the spread income to PFG.

Each trust will use the net proceeds received from the sale of its series of notes to purchase a funding agreement issued by us, the terms of which will be set forth in the applicable pricing supplement. The funding agreement will have a deposit amount equal to the sum of the principal amount (or issue price in the case of discount notes) of the related series of notes and the amount of the beneficial interest in the related trust. The rate at which the funding agreement bears interest will be equal to the rate of interest, if any, on the related series of notes. The funding agreement will otherwise have substantially similar payment and other terms to the related series of notes.

Each funding agreement is our unsecured obligation. See Ratings below.

In the event of our impairment or insolvency, the Iowa Insurance Commissioner will be authorized and directed to commence delinquency proceedings for the purpose of liquidating, rehabilitating, reorganizing or conserving us pursuant to Iowa Code Sections 507C.4, 507C.12, 507C.13, 507C.14 and 507C.16. In conducting delinquency proceedings, claims are prioritized and an order of distribution is specified pursuant to Iowa Code Section 507C.42. There are nine classes within the priority scheme, with each successive class being fully junior to the preceding class. Class 1 priority is given to the costs and expenses of administration of the insurer during the delinquency proceedings and Class 2 priority is given to the claims of the insurer's policyholders and guaranty associations. We believe that, in a properly prepared and presented case, a court applying Iowa law would conclude that loss claims of principal and interest in respect of each funding agreement would be accorded Class 2 priority under Iowa Code Section 507C.42 and paid equally in priority with our other policyholders. See Description of the Funding Agreements in the accompanying prospectus.

Iowa law would apply to our insolvency or receivership proceedings. Investors should note, however, that the statutory liquidation priority accorded to funding agreements under Iowa law does not clearly apply to any additional amounts

required to be paid (if specified in the applicable pricing supplement and related funding agreement) as may be necessary in order that the net amounts receivable by a holder after any withholding or deduction shall equal the respective amounts which would have been receivable by such holder in the absence of such withholding or deduction. Accordingly, in the event of our insolvency or receivership, claims under a funding agreement for such payments, if any, may not rank equally with either life insurance policy and annuity claims or funding agreement claims, and may rank equally with our unsecured debt obligations, which are given Class 5 priority under Iowa Code Section 507C.42. See Description of the Funding Agreements in the accompanying prospectus.

**Guarantees**

Our payment obligations under the funding agreement issued to each trust will be fully and unconditionally guaranteed by PFG under a guarantee issued by PFG to the trust as described in the accompanying prospectus. Each guarantee will be an unsecured, unsubordinated, contingent obligation of PFG. See Description of the Guarantees in the accompanying prospectus.

**Ratings**

Unless otherwise indicated in the applicable pricing supplement, the notes will have an issue credit rating of AA from Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc. (Standard & Poor's). Standard & Poor's has rated the program AA. If Standard & Poor's changes the program rating, the new program rating will be specified in the applicable pricing supplement. We expect the program to be rated Aa2 by Moody's Investors Service, Inc. (Moody's). If Moody's changes the program rating, the new program rating will be specified in the applicable pricing supplement. If a redemption, repayment or acceleration of maturity occurs for a series of Discount Notes, a Discount will be accrued using a constant yield method. The constant yield will be calculated using a 30-day month, 360-day year convention, a compounding period that, except for the Initial Period (as defined below), corresponds to the shortest period between Interest Payment Dates for the applicable series of Discount Notes (with ratable accruals within a compounding period), a coupon rate equal to the initial coupon rate applicable to the applicable series of Discount Notes and an assumption that the maturity of such series of Discount Notes will not be accelerated. If the period from the date of issue to the first Interest Payment Date for a series of Discount Notes (the Initial Period) is shorter than the compounding period for such series of Discount Notes, a proportionate amount of the yield for an entire compounding period will be accrued. If the Initial Period is longer than the compounding period, then the period will be divided into a regular compounding period and a short period with the short period being treated as provided in the preceding sentence. The accrual of the applicable Discount may differ from the accrual of original issue discount for purposes of the Internal Revenue Code of 1986, as amended, certain series of Discount Notes may not be treated as having original issue discount within the meaning of such Code, and certain series of notes other than Discount Notes may be treated as issued with original issue discount for United States federal income tax purposes. See Material United States Federal Income Tax Considerations.

In the case of discount notes that may be redeemed at a time when 20% or more of such notes are outstanding, such notes will be designated in their title as callable in the applicable pricing supplement.

**Amortizing Notes**

A trust may issue a series of notes ( Amortizing Notes ) with the amount of principal thereoam rating will be specified in the applicable pricing supplement. Notes of a series will be issued under the program only in the event that, at the time of issuance of such series of notes, at least one nationally recognized rating agency would assign an investment grade rating to such series of notes and the funding agreement securing such series of notes. Indenture and Indenture Trustee Each trust will issue its series of notes to the public pursuant to an indenture between that trust and Citibank, N.A., in its capacity as indenture trustee. See Description of the Notes General Indenture. The indenture is subject to the Trust Indenture Act of 1939, as amended. The indenture trustee is not affiliated with any trust, with us or PFG. Administration of the Trusts U.S. Bank Trust National Association, a national banking association, will be each trust s sole trustee (the trustee ). The trustee will not be obligated in any way to make payments under or in respect of the notes. The trustee is not affiliated with us or PFG.

Trust Beneficial Owner

GSS Holdings II, Inc., a Delaware corporation, will be the sole beneficial owner of each trust (the trust beneficial owner ). The beneficial interest of each trust:

will be purchased by the trust beneficial owner for \$15 (or in the case of a trust that issues discount notes, such other amount as corresponds to the discount on such notes), unless otherwise specified in the applicable pricing supplement;

will be issued in book-entry form only;

will entitle the trust beneficial owner to receive payments in respect thereof on the same terms as the payments to be made to the holders of notes of the related series; and

will be subordinated to the related series of notes.

The trust beneficial owner will receive periodic distributions on its beneficial interest at the same rate and on the same day that holders of and interest thereon payable in installments over their terms. Unless otherwise specified in the applicable pricing supplement, interest on each series of Amortizing Notes will be computed on the basis of a 360-day year of twelve 30-day months. Payments with respect to a series of Amortizing Notes will be applied first to interest due and payable thereon and then to the reduction of the unpaid principal amount thereof. Further information concerning additional terms and provisions of a particular series of Amortizing Notes will be specified in the applicable pricing supplement, including a table setting forth repayment information for such series of Amortizing Notes.

### **Book-Entry Notes**

We have established a depositary arrangement, on behalf of the trusts, with DTC with respect to the book-entry notes, the terms of which are summarized below.

All book-entry notes having the same terms will be represented by one or more global securities. Each global security will be deposited with, or on behalf of, DTC and will be registered in the name of DTC or its nominee. No global security may be transferred or exchanged except as a whole by DTC or a nominee of DTC to DTC or to another nominee of DTC, or by DTC or another nominee of DTC to a successor of DTC or a nominee of a successor to DTC. So long as DTC or its nominee is the registered holder of a global security, DTC or its nominee will be the sole owner of the related book-entry notes represented thereby for all purposes under the indenture. Except as otherwise provided below, the beneficial owners of the global security or securities represented by book-entry notes will not be entitled to receive physical delivery of definitive notes and will not be considered the registered holders of the book-entry notes for any purpose under the indenture and no global security representing book-entry notes will be exchangeable or traof notes of the related series receive interest payments. On the maturity date of the trust beneficial owner s beneficial interest and the related series of notes, the trust will redeem the principal amount of the related series of notes to the holders of such notes and the principal amount of the beneficial interest to the trust beneficial owner. The trust beneficial owner is not affiliated with us or PFG. Governing Law The notes and each indenture will be governed by, and construed in accordance with, the laws of the State of New York. Each guarantee issued by PFG will be governed by, and construed in accordance with, the laws of the State of New York. The trust agreement for the applicable trust will be governed by, and construed in accordance with, the laws of the jurisdiction in which it is formed. Each funding agreement will be governed by the laws of the State of Iowa.

Each global security representing book-entry notes will be exchangeable for definitive notes having the same terms in a like aggregate principal amount only if:

the trust notifies the indenture trustee that the trust wishes in its sole discretion to exchange the global security for definitive notes;

an event of default on the notes of that series has occurred and has not been cured; or

DTC notifies us that it is unwilling or unable to continue as a clearing system for the global securities, or we have become aware that it has ceased to be a clearing agency registered under the Exchange Act and, in either case, a successor clearing system is not appointed by us within 60 calendar days after receiving the notice from DTC or becoming aware that DTC is no longer registered.

If any of these events occurs, the appropriate trust will print and deliver definitive notes. Definitive notes issued under these circumstances will be regisBLE>

## DESCRIPTION OF THE NOTES

The following description of the material provisions of the notes supplements the general description of the notes provided in the accompanying prospectus. You should therefore review the accompanying prospectus carefully. You should carefully review the information in this prospectus supplement. The pricing supplement for each offering of notes will contain the specific information and terms and conditions for that offering. As such, you should carefully review the information contained in the pricing supplement, including any description of the method of calculating interest on any note. The applicable pricing supplement may also add, update, supplement or clarify information contained in this prospectus supplement or the accompanying prospectus. It is important for you to consider the information contained in the accompanying prospectus, this prospectus supplement, the applicable pricing supplement, the indenture and the notes in making your investment decision.

This section describes some technical concepts and uses some capitalized terms that are not defined in this prospectus supplement. You should refer to the form of indenture and the form of note certificates filed as exhibits to the registration statement (of which this prospectus supplement and the accompanying prospectus are a part) for the full description of those concepts and complete definitions of these terms.

### General

#### *Indenture*

Each trust will issue one series of notes, subject to and entitled to the benefits of a separate indenture between the trust and the indenture trustee, which will adopt and incorporate the standard indenture terms. Such notes will be issued only on the original issue date for such notes. With respect to a particular trust, we refer to the applicable indenture and the standard indenture terms as the indenture. Each series of notes will be the subject of a pricing supplement. The indenture is subject to, and governed by, the Trust Indenture Act of 1939, as amended. For a description of the terms of the indenture, see Description of the Notes beginning on page 22 of the accompanying prospectus.

At the date of this prospectus supplement, the notes offered pursuant to this prospectus supplement are limited to an aggregate initial public offering price or purchase price of up to \$4,000,000,000, or its equivalent in one or more foreign or composite currencies. This amount is subject to reduction as a result of the issuance of notes previously under this program, our Principal® Life CoreNotes® program, our secured medium-term notes retail program or otherwise under the accompanying prospectus.

#### *Collateral*

The notes of a series will be the trust's unconditional, direct, non-recourse, secured and unsubordinated obligations. Under the indenture, the funding agreement issued to and deposited into a trust by us, in exchange for the proceeds received by the trust from the offering of its series of notes and trust beneficial interest, will be collaterally assigned by the trust, and the trust will grant a security interest in the funding agreement, to the indenture trustee for the benefit of the holders of the related series of notes. A trust may purchase only one funding agreement from us and the principal amount of the funding agreement may not be increased. The trust will also collaterally assign and grant a security interest in the guarantee issued by PFG to the trust in favor of the indenture trustee for the benefit of the holders of the related series of notes. Each series of notes will be secured by a security interest in the collateral, consisting of:

the relevant funding agreement;

and securities deposited in the names of the beneficial owners of the related global securities as provided to the indenture trustee by the participants identified by DTC.

### About the Depositary

The following is based on information furnished by DTC:

DTC will act as securities depository for the book-entry notes. The book-entry notes will be issued as fully registered securities in the name of Cede & Co. (DTC's nominee) or another name requested by DTC. One fully registered global security will be issued for each issue of a series of book-entry notes in the aggregate principal amount of that issue and will be deposited with, or on behalf of, DTC. If the aggregate principal amount of any issue

exceeds DTC's limit for a single global security, then the global securities will be issued in the form of one or more global securities having a principal amount equal to DTC's limit and one or more additional global securities representing any remaining principal amount.

DTC is a limited-purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC holds securities that its direct participants deposit with it. DTC also facilitates the settlement among direct participants of transactions in depos-

ited securities, such as transfers and pledges, through electronic computerized book-entry changes in direct participants' accounts. This eliminates the need for physical movement of securities certificates. DTC's direct participants include securities brokers and dealers (including the purchasing agent), banks, trust companies, clearing corporations and other organizations. DTC is owned by a number of its direct participants and by the New York Stock Exchange, Inc., the American Stock Exchange LLC and the National Association of Securities Dealers, Inc. Access to DTC's system is also available to others such as securities brokers and dealers, banks and trust companies that clear through or maintain a custodial relationship with a direct participant, either directly or indirectly. The rules applicable to DTC and its direct and indirect participants are on file with the SEC.

Under DTC's system, purchases of book-entry notes must be made by or through direct participants, which will receive a credit for the book-entry notes on DTC's records. The ownership interest of the actual purchaser is in turn recorded on the records of the direct and indirect participants. Beneficial owners will not receive written confirmation from DTC of their purchase, but are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the direct or indirect participants through which they entered into the transaction. Transfers of ownership interests in book-entry notes are accomplished by entries made on the books of the direct and indirect participants acting on behalf of the beneficial owners. Beneficial owners will not receive definitive notes unless use of the book-entry system is discontinued as described above.

To facilitate subsequent transfers, all global securities representing the book-entry notes deposited with, or on behalf of, DTC will be registered in the name of DTC's nominee, Cede & Co., or any other name that DTC requests. The deposit of global securities with, or on behalf of, DTC and their registration in the name of Cede & Co. effect no change in beneficial ownership. DTC has no knowledge of the actual beneficial owners of the book-entry notes; DTC's records reflect only the identity of the direct participants to whose accounts the book-entry notes are credited, which may or may not be the beneficial owners. DTC's participants are responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications from DTC to direct participants, from direct participants to indirect participants and from direct participants and indirect participants to beneficial owners are governed by arrangements among them and are subject to statutory and regulatory requirements.

Neither DTC nor Cede & Co. will consent or vote with respect to global securities. Under its usual procedures, DTC mails an omnibus proxy to a company as soon as possible after a record date. The omnibus proxy assigns Cede & Co.'s consenting or voting rights to those direct participants to whose accounts the book-entry notes are credited on the record date (identified in a listing attached to the omnibus proxy).

The trust will make payments on the global securities in immediately available funds to Cede & Co. or any other nominee named by DTC. DTC's practice is to credit direct participants' accounts on the applicable payment date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on that date. Payments by participants to beneficial owners are governed by standing instructions and customary practices and are subject to statutory and regulatory requirements. The trust and the trustee are responsible only for making payments to DTC; DTC is responsible for disbursing those payments to its direct participants and the direct participants (and any indirect participants) are solely responsible for disbursing those payments to the beneficial owners.

Any redemption notices will be sent to Cede & Co. If less than all of the book-entry notes having the same terms are being redeemed, DTC's current practice is to determine by lot the amount of the interest of each direct participant in those notes to be redeemed.

A beneficial owner must give notice of any election to have its book-entry notes repaid through its participant to the indenture trustee. Delivery of the book-entry notes will be effected by causing the relevant direct participant to transfer the relevant part of its interest in the global securities to the indenture trustee on DTC's records.

DTC may discontinue providing its services as securities depository at any time by giving reasonable notice to us or the indenture trustee. If we do not obtain a successor securities depository, the applicable trust will print and deliver definitive notes.

We may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). If we do so, the applicable trust will print and deliver definitive notes.

**SPECIAL PROVISIONS RELATING TO FOREIGN CURRENCY NOTES**

**General**

& the related guarantee issued by PFG to the trust, which fully and unconditionally guarantees our payment obligations under the relevant funding agreement; all proceeds of the relevant funding agreement and the relevant guarantee and all amounts and instruments on deposit from time to time in the related collection account; all books and records pertaining to the relevant funding agreement and the related guarantee; and

all of the trust's rights pertaining to the foregoing.

Under the custodial agreement, upon the collateral assignment and grant of security interest in the funding agreement and the guarantee related to a series of notes of a trust, the custodian will hold the funding agreement and the guarantee, on behalf of the indenture trustee in the State of Iowa.

***Ranking***

The notes of a series of a trust will rank equally among themselves.

***Pricing Options***

Notes that bear interest will either be fixed rate notes or floating rate notes, or a combination of fixed rate and floating rate, as specified in the applicable pricing supplement. A trust may also issue discount notes and amortizing notes as specified in the applicable pricing supplement.

***Pricing Supplement***

The pricing supplement relating to the offering of a series of notes will describe the following terms:

the principal amount and specified currency for the note;

whether the note:

(1) is a fixed rate note,

(2) is a floating rate note,

(3) is an amortizing note, meaning that a portion or all of the principal amount is payable prior to the stated maturity date in accordance with a schedule or by application of a formula, and/or

(4) is a discount note that does not bear any interest currently or bears interest at a rate that is below market rates at the time of issuance;

the price at which the note will be issued, which will be expressed as a percentage of the aggregate principal amount or face amount;

the original issue date on which the note will be issued;

the stated maturity date;

if the note is a fixed rate note, the rate per annum at which the note will bear any interest and the Interest Payment Date frequency;

if the note is a floating rate note, relevant terms such as:

(1) the Interest Rate Basis,

(2) the Initial Interest Rate,

(3) the Interest Reset Period or the Interest Reset Dates,

(4) the Interest Payment Dates,

(5) the Index Maturity,

(6) any Maximum Interest Rate,

(7) any Minimum Interest Rate,

(8) the Spread and/or Spread Multiplier, and

(9) any other terms relating to the particular method of calculating the interest rate for the note and whether and how the Spread and/or Spread Multiplier may be changed prior to the stated maturity date; if the note is an amortizing note, the terms for repayment prior to the stated maturity date;

whether the note may be redeemed by the trust, or repaid at the option of the holder, prior to the stated maturity date and the terms of its redemption or repayment, provided that any such redemption or repayment will be accompanied by the simultaneous redemption or repayment of the relevant funding agreement;

any special United States federal income tax considerations relating to the purchase, ownership and disposition of the note;

the jurisdiction of formation of the trust; and

any other terms of the note provided in the accompanying prospectus to be set forth in a pricing

S-15

---

supplement or that are otherwise consistent with the provisions of the indenture under which the note will be issued.

***Maturity***

Unless otherwise specified in the applicable pricing supplement, each series of notes will mature on a day between nine months and 30 years from its date of original issuance on the last scheduled interest payment date (the stated maturity date), as specified in the applicable pricing supplement, unless the principal of such series becomes due and payable prior to the stated maturity date, whether, as applicable, by the declaration of acceleration of maturity, notice of redemption by the trust, notice of the registered holder's option to elect repayment or otherwise (we refer to the stated maturity date or any date prior to the stated maturity date on which the particular series of notes becomes due and payable, as the case may be, as the maturity date with respect to the principal of such series of notes repayable on that date).

***Currency***

Unless otherwise specified in the applicable pricing supplement, the notes of a series will be denominated in, and payments of principal, premium, if any, and/or interest, if any, in respect thereof will be made in, United States dollars. In the alternative, each series of notes may be denominated in, and payments of principal, premium, if any, and/or interest, if any, in respect thereof may be made in, a single foreign currency. The currency in which a particular series of notes is denominated (or, if that currency is no longer legal tender for the payment of public and private debts in the country issuing that currency or, in the case of the euro, in the member states of the European Union that have adopted the single currency in accordance with the treaty establishing the European Community, as amended by the treaty on European Union, the currency which is then legal tender in the related country or in the adopting member states of the European Union, as the case may be) is referred to as the specified currency with respect to such series of notes.

You will be required to pay for your notes in the specified currency. At the present time, there are limited facilities in the United States for the conversion of United States dollars into foreign currencies and vice versa, and commercial banks do not generally offer non-United States dollar checking or savings account facilities in the United States. The Agent from or through which a foreign currency note is purchased may be prepared to arrange for the conversion of United States dollars into the specified currency in order to enable you to pay for your foreign currency note, provided that you make a request to that Agent on or prior to the fifth business day (as defined below) preceding the date of delivery of the particular foreign currency note, or by any other day determined by that Agent. Each conversion will be made by an Agent on the terms and subject to the conditions, limitations and charges as that Agent may from time to time establish in accordance with its regular foreign exchange practices. You will be required to bear all costs of exchange in respect of your foreign currency note.

A trust may (if so specified in the applicable pricing supplement), without the consent of the holders of any note, redenominate all, but not less than all, of the notes of any series on or after the date on which the member state of the European Union in whose national currency such notes are denominated has become a participant member in the third stage of the European economic and monetary union as more fully set out in the applicable pricing supplement.

***Form of Notes; Denominations***

Each trust will issue each note as a book-entry note represented by one or more fully registered global securities, unless otherwise specified in the applicable pricing supplement. Unless otherwise specified in the applicable pricing supplement, the minimum denominations of each note will be \$1,000 and integral multiples of \$1,000 in excess thereof.

***Listing***

Unless otherwise specified in the applicable pricing supplement, your series of notes will not be listed on any securities exchange.

***Payments***

A trust will make payments of principal of, and premium, if any, and interest and other amounts due and owing, if any, on book-entry

notes through the indenture trustee to the account of the depository or its nominee. See Book Entry Notes. In the case of definitive notes, the trust will make payments of principal of, and premium, if any, and interest and other amounts due and owing, if any, on the maturity date in immediately available funds upon presentation and surrender thereof (and, in the case of any repayment on an optional repayment date, upon submission of a duly completed election form if and as required by the provisions described below) at the office or agency maintained by the trust for this purpose in the Borough of Manhattan, The City of New York, which is currently the paying agency office of the indenture trustee located at 111 Wall Street, 15th Floor, Zone 3, New York, New York 10005. A trust will make payments of interest and other amounts due and owing, if any, on the maturity date of a definitive note to the person to whom payment of the principal thereof and premium, if any, thereon shall be made. A trust will make payments of interest and other amounts due and owing, if any, on a definitive note on any Interest Payment Date (as defined below) other than the maturity date by check mailed to the address of the registered holder entitled thereto appearing in the note register. Notwithstanding the foregoing, the trust will make payments of interest and other amounts due and owing, if any, on a definitive note on any Interest Payment Date other than the maturity date to each registered holder of \$10,000,000 (or, if the specified currency is other than United States dollars, the equivalent thereof in the particular specified currency) or more in aggregate principal amount of definitive notes (whether having identical or different terms and provisions) by wire transfer of immediately available funds if the applicable registered holder has delivered appropriate wire transfer instructions in writing to the indenture trustee not less than 15 calendar days prior to the particular Interest Payment Date. Any wire transfer instructions received by the indenture trustee shall remain in effect until revoked by the applicable registered holder.

#### ***Business Day***

Business day means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which commercial banks are authorized or required by law, regulation or executive order to close in The City of New York; provided, however, that, with respect to foreign currency notes, the day must also not be a day on which commercial banks are authorized or required by law, regulation or executive order to close in the Principal Financial Center (as defined below) of the country issuing the specified currency (or, if the specified currency is the euro, the day must also be a day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System is open); provided, further, that, with respect to notes as to which LIBOR (as defined below) is an applicable Interest Rate Basis, the day must also be a London Banking Day, which nbsp; Unless otherwise specified in the applicable pricing supplement, foreign currency notes will not be sold in, or to residents of, the country issuing the specified currency. The information set forth in this prospectus supplement is directed to prospective purchasers who are United States residents and, with respect to foreign currency notes, is by necessity incomplete. We, PFG, the trusts and the Agents disclaim any responsibility to advise prospective purchasers who are residents of countries other than the United States with respect to any matters that may affect the purchase, holding or receipt of payments of principal of, and premium, if any, and interest, if any, on, their foreign currency notes. These purchasers should consult their own financial and legal advisors with regard to these risks. See Risk Factors Risk Factors Relating to the Notes If the trust issues notes denominated in a foreign currency, those notes are subject to exchange rate and exchange control risks in the accompanying prospectus.

#### **Payment of Principal, Premium, if Any, and Interest, if Any**

Unless otherwise specified in the applicable pricing supplement, a trust is obligated to make payments of principal of, and premium, if any, and interest, if any, on, a foreign currency note in the specified currency. Any amounts so payable by the trust in the specified currency will be converted by the exchange rate agent named in the applicable pricing supplement (the exchange rate agent ) into United States dollars for payment to the registered holders thereof unless otherwise specified in the applicable pricing supplement or a registered holder elects, in the manner described below, to receive these amounts in the specified currency.

Any United States dollar amount to be received by a registered holder of a foreign currency note will be based on the highest bid quotation in The City of New York received by the exchange rate agent at approximately 11:00 A.M., New York City time, on the second business day preceding the applicable payment date from three recognized foreign exchange dealers (one of whom may be the exchange rate agent) selected by the exchange rate

agent and approved by the trust for the purchase by the quoting dealer of the specified currency for United States dollars for settlement on that payment date in the aggregate amount of the specified currency payable to all registered holders of foreign currency notes scheduled to receive United States dollar payments and at which the applicable dealer commits to execute a contract. All currency exchange costs will be borne by the registered holders of foreign currency notes by deductions from any payments. If three bid quotations are not available, payments will be made in the specified currency.

Registered holders of foreign currency notes may elect to receive all or a specified portion of any payment of principal, premium, if any, and/or interest, if any, in the specified currency by submitting a written request to the indenture trustee at its corporate trust office in The City of New York on or prior to the applicable regular record date or at least 15 calendar days prior to the maturity date, as the case may be. This written request may be mailed or hand delivered or sent by cable, telex or other form of facsimile transmission. This election will remain in effect until revoked by written notice delivered to the indenture trustee on or prior to a regular record date or at least 15 calendar days prior to the maturity date, as the case may be. Registered holders of foreign currency notes to be held in the name of a broker or nominee should contact their broker or nominee to determine

S-39

---

whether and how an election to receive payments in the specified currency may be made.

Unless otherwise specified in the applicable pricing supplement, if the specified currency is other than United States dollars, a beneficial owner of a global security which elects to receive payments of principal, premium, if any, and/or interest, if any, in the specified currency must notify the participant through which it owns its interest on or prior to the applicable record date or at least 15 calendar days prior to the maturity date, as the case may be, of its election. The applicable participant must notify the depository of its election on or prior to the third business day after the applicable record date or at least 12 calendar days prior to the maturity date, as the case may be, and the depository will notify the indenture trustee of that election on or prior to the fifth business day after the applicable record date or at least ten calendar days prior the maturity date, as the case may be. If complete instructions are received by the participant from the applicable beneficial owner and forwarded by the participant to the depository, and by the depository to the trustee, on or prior to such dates, then the applicable beneficial owner will receive payments in the specified currency.

A trust will make payments of the principal of, and premium, if any, and/or interest, if any, on foreign currency notes which means a day on which commercial banks are open for business (including dealings in the LIBOR Currency (as defined below)) in London.

***Principal Financial Center***

Principal Financial Center means, as applicable:

the capital city of the country issuing the specified currency; or

S-40

---

currency. It is not certain, however, whether a non-New York state court would follow the same rules and procedures with respect to conversions of foreign currency judgments.

Each trust will indemnify the registered holder of any of its notes against any loss incurred as a result of any judgment or order being given or made for any amount due under the particular note and that judgment or order requiring payment in a currency (the judgment currency) other than the specified currency, and as a result of any variation between:

the rate of exchange at which the specified currency amount is converted into the judgment currency for the purpose of that judgment or order; and

the rate of exchange at which the registered holder, on the date of payment of that judgment or order, is able to purchase the specified currency with the amount of the judgment currency actually received.

#### **DESCRIPTION OF THE FUNDING AGREEMENTS**

Each trust will use the net proceeds from the issuance of a series of notes to the public and the issuance of the trust beneficial interest to the trust beneficial owner to purchase a funding agreement. The funding agreement will have substantially similar payment and other terms to the related series of notes. The funding agreement may be interest bearing or non-interest bearing. A funding agreement may bear interest at either a fixed or a floating rate, or a combination of fixed and floating rates, as specified in the applicable pricing supplement. The calculation of the interest rate, the dates of interest and maturity payments and such other payment terms on the funding agreement will be determined in the same manner as described above under Description of the Notes. An amount equal to the funding agreement deposit plus accrued but unpaid interest, if any, and accrued discount, if any (in the case of a discount funding agreement) (other than an amortizing funding agreement) will be payable on its stated maturity date, as specified in the applicable pricing supplement. We may issue an amortizing funding agreement that pays an amount in respect of both interest and deposit amount over the life of the funding agreement, if specified in the applicable pricing supplement.

The pricing supplement relating to a series of notes will describe the following pricing terms of the related funding agreement:

the deposit amount and the specified currency for the funding agreement;

whether the funding agreement:

(1) is a fixed rate funding agreement,

(2) is a floating rate funding agreement,

(3) is an amortizing funding agreement, meaning that a portion or all of the deposit amount is payable prior to the stated maturity in accordance with a schedule or by application of a formula, and/or

(4) is a discount funding agreement that does not bear interest currently or bears interest at a rate that is below market rates at the effective date;

the price at which the funding agreement will be issued, which will be expressed as a percentage of the aggregate deposit amount or face amount;

the effective date on which the funding agreement will be issued;

the stated maturity date;

if the funding agreement is a fixed rate funding agreement, the rate per annum at which the funding

the capital city of the country to which the LIBOR Currency relates;

provided, however, that with respect to United States dollars, Australian dollars, Canadian dollars, the euro, South African rand and Swiss francs, the Principal Financial Center shall be The City of New York, Sydney, Toronto, London (solely in the case of the LIBOR Currency), Johannesburg and Zurich, respectively.

***Registration and Transfer of Notes***

Book-entry notes may be transferred or exchanged only through the clearing systems (described below). Registration of transfer or exchange of definitive notes will be made at the office or agency maintained by the trust for this purpose in the Borough of Manhattan, The City of New York, which is currently the corporate trust office of the indenture trustee located at 111 Wall Street, 15th Floor, Zone 3, New York, New York 10005. No service charge will be imposed for any such registration of transfer or exchange of notes, but the trust may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection therewith (other than certain exchanges not involving any transfer).

S-17

---

### **Withholding Tax and Payment of Additional Amounts**

All amounts due in respect of the notes will be made without any applicable withholding or deduction for or on account of any present or future taxes, duties, levies, assessments or other governmental charges of whatever nature imposed or levied by or on behalf of any governmental authority, unless such withholding or deduction is required by law. Unless otherwise specified in the applicable pricing supplement, the trust will not pay any additional amounts to holders of any series of notes in respect of any such withholding or deduction, any such withholding or deduction will not give rise to an event of default or any independent right or obligation to redeem the notes of such series and each holder of a note of the applicable series will be deemed for all purposes to have received cash in an amount equal to the portion of such withholding or deduction that is attributable to such holder's interest in the notes as equitably determined by the trust.

If it is specified in the applicable pricing supplement and funding agreement that we have agreed to pay additional amounts to the trust to reflect any required withholding or deduction under the funding agreement and we are required, or based on an opinion of independent legal counsel selected by us a material probability exists that we will be required, to pay additional amounts in respect of such withholding or deduction, pursuant to (a) any amendment to, or change (including any announced prospective change) in, the tax laws (or any regulations thereunder) of the United States or any political subdivision or taxing authority thereof or therein or (b) any amendment to, or change in, an interpretation or application of any such laws or regulations by any governmental authority in the United States, which amendment or change is enacted, promulgated, issued or announced on or after the effective date of the applicable funding agreement, we will have the right to redeem the affected funding agreement by giving not less than 30 and no more than 60 days prior written notice to the trust and by paying the trust the outstanding principal of, and accrued but unpaid interest on, the related funding agreement or such other amount as is specified in the applicable pricing supplement. If we redeem the related funding agreement issued to the trust, the related trust will redeem all of the notes of the applicable series as provided in the indenture. See Description of the Funding Agreements Early Redemption for Tax Event in the accompanying prospectus.

### **Final European Union Withholding Tax System**

On July 1, 2005, a directive adopted by the European Council of Economics and Finance Ministers regarding the taxation of savings income took effect. The directive provides for the tax authorities of the European Union member states to provide each other with details of payments of interest and similar income made to individuals but permits Austria, Belgium and Luxembourg instead to impose a withholding tax on the payments concerned for a transitional period (although it provides that no such withholding tax should be levied where the beneficial owner of the payment authorizes an exchange of information and/or where the beneficial owner presents a certificate from the tax authority of the European Union member state in which the beneficial owner is resident). The directive does not preclude European Union member states from levying other types of withholding tax.

For the avoidance of doubt, unless otherwise specified in the applicable pricing supplement, no trust will pay any additional amounts with respect to its series of notes should any deduction or withholding on account of tax be required to be made, or be made, pursuant to the directive.

### **Tax Redemption**

If a tax event as to the relevant funding agreement occurs, we will have the right to redeem the funding agreement and, upon such redemption, the applicable trust will redeem its series of notes in the same manner described under Optional Redemption; Optional Repayment; No Sinking Fund below. For further digreement will bear any interest and the interest payment date frequency;

if the funding agreement is a floating rate funding agreement, relevant terms such as:

- (1) the interest rate basis,
- (2) the initial interest rate,
- (3) the interest reset period or the interest reset dates,
- (4) the interest payment dates,
- (5) the index maturity,
- (6) any maximum interest rate,
- (7) any minimum interest rate,
- (8) the spread and/or spread multiplier, and

(9) any other terms relating to the particular method of calculating the interest rate for the funding agreement and whether and how the spread and/or spread multiplier may be changed prior to stated maturity; if the funding agreement is an amortizing funding agreement, the terms for repayment prior to the stated maturity;

whether the funding agreement may be redeemed by us, or repaid at the option of the trust, prior to the stated maturity and the terms of its redemption or repayment; provided in either case the relevant series of notes will contain substantially the same redemption and repayment terms and no funding agreement may be redeemed or repaid without the simultaneous redemption or repayment of the related series of notes; and

any other terms of the funding agreement.

For a more detailed discussion of the funding agreements, see [Description of the Funding Agreements](#) in the accompanying prospectus.

#### **MATERIAL UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS**

The following is a general discussion of the material United States federal income tax considerations relating to the purchase, ownership and disposition of the notes by initial purchasers of the notes who purchase the notes at their issue price (determined as set forth below) and hold the notes as capital assets within the meaning of section 1221 of the Internal Revenue Code of 1986, as amended (the [Code](#) ). The statements set forth in the following discussion, to the extent they constitute matters of United States federal income tax law or legal conclusions with respect thereto, represent the opinion of Sidley Austin Brown & Wood LLP, special United States income tax counsel to us. This discussion does not address all of the tax considerations that may be relevant to prospective purchasers in light of their particular circumstances or to persons subject to special rules under United States federal tax laws, such as certain financial institutions, insurance companies, real estate investment trusts, dealers in securities, tax-exempt entities, certain former citizens or residents of the United States, persons who hold the notes as part of a [straddle](#), [hedging](#), [conversion](#) or other integrated transaction, persons who mark their securities to market for United States federal income tax purposes or persons whose functional currency (as defined in section 985 of the Code) is not the U.S. dollar. In addition, this discussion does not address the effect of any state, local or foreign tax laws or the effect of the U.S. federal alternative minimum tax. Accordingly, prospective purchasers are advised to consult their own tax advisers with respect to their individual circumstances.

This discussion is based on the Code, the Treasury Regulations promulgated thereunder and administrative and judicial pronouncements, all as in effect on the date hereof, and all of which are subject to change, possibly with

retroactive effect.

For purposes of the following discussion, the term "U.S. Holder" means a beneficial owner of a note who or which is, for United States federal income tax purposes, (i) an individual citizen or resident of the United States, (ii) a corporation created or organized in or under the laws of the United States or of any political subdivision thereof or (iii) an estate or trust treated as a United States person under section 7701(a)(30) of the Code. The term

"Non-U.S. Holder" means a beneficial owner of a

S-42

---

note other than a U.S. Holder. For the purposes of this discussion, U.S. Holders and Non-U.S. Holders shall be referred to collectively as holders.

Special rules, not discussed in this prospectus supplement or the accompanying prospectus, may apply to persons purchasing notes through entities treated for U.S. federal income tax purposes as partnerships, and such persons should consult their own tax advisors in that regard.

#### **Classification of the Notes and the Trust**

We intend to take the position, for United States federal income tax purposes, that each trust will be disregarded and that the notes will be treated as representing our indebtedness (the Intended Tax Characterization). Each holder of a note (or any beneficial interest therein), by acceptance of the note (or beneficial interest), agrees to treat the trust with respect to which the note was issued and the note consistently with the Intended Tax Characterization.

Notwithstanding the Intended Tax Characterization, it is possible that a trust could be viewed as a separate entity for United States federal income tax purposes. Sidley Austin Brown & Wood LLP is of the opinion that, under current law and assuming full compliance with the terms of the trust agreement and the indenture (and certain other documents), and based on certain facts and assumptions contained in such opinion, each trust will not be classified as an association (or publicly traded partnership) taxable as a corporation for United States federal income tax purposes. Accordingly, whether the Intended Tax Characterization is respected or not, each trust will not be treated as a taxable entity for United States federal income tax purposes. If a trust is viewed as a separate entity rather than disregarded, each holder of a note (or any beneficial interest therein) agrees to treat the trust as a grantor trust and the notes as undivided ownership interests in such trust. If this were the case, a U.S. Holder would be required to include in income, consistent with its method of accounting, its pro rata share of any amounts paid to the relevant trust to satisfy expenses and would be entitled to deduct, consistent with its method of accounting, its pro rata share of any such expenses as provided in sections 162 and 212 of the Code. If the U.S. Holder is an individual, trust or estate, or to the extent the U.S. Holder's income is reportable on the income tax return of an individual, trust or estate, the deduction for such person's share of such expenses will be allowed only to the extent that all of such person's miscellaneous itemized deductions, including such person's share of the relevant trust's expenses, exceed two percent of such person's adjusted gross income. In addition, an individual's itemized deductions may be subject to other limitations. Accordingly, U.S. Holders who are individuals, or whose income is reported in whole or in part on the income tax return of a United States citizen or resident, should consult their tax advisors with respect to such deductions.

The remainder of this summary assumes that the Intended Tax Characterization is correct.

#### **U.S. Holders**

##### ***Interest and Original Issue Discount***

Each U.S. Holder of a note will include in income payments of qualified stated interest (as described below) in respect of such note, in accordance with such U.S. Holder's method of accounting for United States federal income tax purposes, as ordinary interest income. In general, if the issue price of a note, determined by the first price at which a substantial amount of the notes of the related series are sold (ignoring sales to bond houses, brokers or similar persons or organizations acting in the capacity of underwriters, placement agents or wholesalers), is less than the stated redemption price at maturity (as described below) of such note by an amount equal to or more than a *de minimis* amount, a U.S. Holder will be considered to have purchased such note with original issue discount (OID). In general, the *de minimis* amount is equal to  $\frac{1}{4}$  of one percent of the stated redemption price at maturity multiplied by the weighted average number of complete years to maturity from the issue date of such note. If a U.S. Holder acquires a note with OID, then regardless of such U.S. Holder's method of accounting, such U.S. Holder will be required to accrue its pro rata share of OID on such note on a constant-yield basis and include such accruals in gross income, whether or not such U.S. Holder has received any cash payment on the notes. Any amount not treated as OID because it is less than the *de*

*minimis* amount generally must be included in income (generally as gain from the sale of notes) as principal payments are received in the proportion that each such payment bears to the original principal amount of the note. Special rules apply to notes with a fixed maturity of one year or less. See Short Term Notes.

Stated redemption price at maturity means the sum of all payments to be made on a note other than payments of qualified stated interest. Qualified stated interest generally means stated interest that is unconditionally payable at least annually at a single fixed rate or, in the case of a variable rate debt instrument (as defined below), at a single qualified floating rate or single objective rate (as such terms are defined below). If a note is a variable rate debt instrument but interest is payable at other than a single qualified floating rate or a single objective rate, special rules apply that are not discussed in this prospectus supplement or the accompanying prospectus.

In the case of a variable rate debt instrument, the amount of qualified stated interest and the amount of OID, if any, that accrues during an accrual period is generally determined assuming that the variable rate is a fixed rate equal to (i) in the case of a qualified floating rate or qualified inverse floating rate (each as defined below), the value, as of the issue date, of the qualified floating rate or qualified inverse floating rate or (ii) in the case of an objective rate (as defined below, and other than a qualified inverse floating rate), a fixed rate that reflects the yield that is reasonably expected for the debt instrument, and the qualified stated interest (or, if there is no qualified stated interest, OID) allocable to an accrual period is increased (or decreased) if the interest actually paid during an accrual period exceeds (or is less than) the interest assumed to be paid during the accrual period pursuant to clause (i) or (ii), as applicable. Special rules apply to a variable rate debt instrument that provides for stated interest at a fixed rate under certain circumstances.

A variable rate debt instrument is a debt instrument that (i) has an issue price that does not exceed the total noncontingent principal payments by more than an amount equal to the lesser of (a) 0.015 multiplied by the product of such total noncontingent principal payments and the number of complete years to maturity of the instrument (or, in the case of a note providing for the payment of any amount other than qualified stated interest prior to maturity, multiplied by the weighted average maturity of the note) or (b) 15 percent of the total noncontingent principal payments, (ii) provides for stated interest (compounded or paid at least annually) at the current value of (A) one or more qualified floating rates, (B) a single fixed rate and one or more qualified floating rates, (C) a single objective rate or (D) a single fixed rate and a single objective rate that is a qualified inverse floating rate, and (iii) does not provide for any principal payments that are contingent. The current value is the value of the rate on any day that is no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

A qualified floating rate is generally a floating rate under which variations in the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which a debt instrument is denominated. A multiple of a qualified floating rate is not a qualified floating rate unless the relevant multiplier is (i) fixed at a number that is greater than 0.65 but not more than 1.35 or (ii) fixed at a number that is greater than 0.65 but not more than 1.35, increased or decreased by a fixed rate. A variable rate is not considered a qualified floating rate if the variable rate is subject to a cap, floor, governor (i.e., a restriction on the amount of increase or decrease in the stated interest rate) or similar restriction that is reasonably expected as of the issue date to cause the yield on the note to be significantly more or less than the expected yield determined without the restriction (other than a cap, floor, governor or similar restriction that is fixed throughout the term of the note).

An objective rate is a rate (other than a qualified floating rate) that is determined using a single fixed formula and that is based on objective financial or economic information, *provided, however*, that an objective rate will not include a rate based on information that is within the control of the issuer (or certain related parties of the issuer) or that is unique to the circumstances of the issuer (or certain related parties of the issuer), such as dividends, profits or the value of the issuer's stock. A qualified inverse floating rate is an objective rate (x) that is equal to a

fixed rate minus a qualified floating rate and (y) the variations in which can reasonably be expected to inversely reflect contemporaneous variations in the qualified floating rate (disregarding any caps, floors, governors or similar restrictions that would not, as described above, cause a rate to fail to be a qualified floating rate). Notwithstanding the first sentence of this paragraph, a rate is not an objective rate if it is reasonably expected that the average value of the rate during the first half of the note's term will be either significantly less than or significantly greater than the average value of the rate during the final half of the note's term. The Internal Revenue Service ( IRS ) may designate rates other than those specified above that will be treated as objective rates. As of the date of this prospectus supplement, no other rates have been designated.

If interest on a note is stated at a fixed rate for an initial period of one year or less followed by a variable rate that is either a qualified floating rate or an objective rate for a subsequent period, and the value of the variable rate on the issue date is intended to approximate the fixed rate, the fixed rate and the variable rate together constitute a single qualified floating rate or objective rate. A fixed rate and a variable rate will be conclusively presumed to meet the requirements of the preceding sentence if the value of the variable rate on the issue date does not differ from the value of the fixed rate by more than 0.25 percentage points (25 basis points).

If a floating rate note does not qualify as a variable rate debt instrument or otherwise provides for contingent payments, or if a fixed rate note provides for contingent payments, such note may constitute a contingent payment debt instrument. A note that is a contingent payment debt instrument is generally taxable as follows:

First, we are required to determine, as of the issue date, the comparable yield for the note. The comparable yield is generally the yield at which we would issue a fixed rate debt instrument with terms and conditions similar to those of the note (including the level of subordination, term, timing of payments and general market conditions, but not taking into consideration the riskiness of the contingencies or the liquidity of the note), but not less than the applicable federal rate announced monthly by the IRS (the AFR ). In certain cases where a floating rate note is marketed or sold in substantial part to tax-exempt investors or other investors for whom the presscussion of tax event redemption, see Description of the Funding Agreements Early Redemption for Tax Event in the accompanying prospectus.

#### **Security; Non-Recourse Obligations**

Each series of notes will be solely the obligations of the related trust and will not be guaranteed by any person, including but not limited to us, PFG, any Agent, any of our or their

affiliates or any other trust. A trust's obligations under its series of notes will be secured by all of its rights and title in a funding agreement issued by us, the payment obligations of which are guaranteed by the related guarantee issued by PFG to the trust and other rights and assets included in the applicable collateral held in the trust.

Since we will be the sole obligor under the funding agreement and PFG will be the sole obligor under the related guarantee, the trust's ability to meet its obligations, and your ability to receive payments from the trust, with respect to the applicable series of notes, will be principally dependent upon our ability to perform our obligations under the applicable funding agreement held in the relevant trust and PFG's ability to perform its obligations under the guarantee of our payment obligations under the related funding agreement. However, you will have no direct contractual rights against us or PFG under the funding agreement or the guarantee, respectively. Under the terms of the funding agreement and related guarantee, recourse rights to us or PFG, respectively, will belong to the trust, its successors and its permitted assignees, but only with respect to the relevant trust. In connection with the offering and sale of a series of notes, the trust will collaterally assign and grant a security interest in the relevant funding agreement for such series of notes to, and the trust will collaterally assign and grant a security interest in the related guarantee in favor of, the indenture trustee for the benefit of the holders of such series of notes. Accordingly, recourse to us under such funding agreement and to PFG under the related guarantee will be enforceable only by the indenture trustee as a secured party on behalf of the holders of such series of notes, or by the holders of such series of notes by directing the indenture trustee under the limited circumstances described in the accompanying prospectus under "Description of the Notes—Certain Rights of Holders." See also "Description of the Notes—Nonrecourse Enforcement" in the accompanying prospectus.

Since we and PFG are registrants, purchasers of notes may proceed directly against us and PFG to enforce their rights under the United States federal and state securities laws. The right by such purchasers to proceed against us, with respect to the applicable funding agreement, under the United States federal and state securities laws is no different than if we had issued the funding agreement directly to such purchasers. The right by such purchasers to proceed against PFG, with respect to the applicable guarantee, under the United States federal and state securities laws is no different than if PFG had issued the guarantee directly to such purchasers.

**Optional Redemption; Optional Repayment; No Sinking Fund**

In the case of notes that are not discount notes, if an optional redemption date is specified in the pricing supplement relating to a series of notes, and we have redeemed the related funding agreement in full or part, as applicable, the related trust will redeem the series of notes secured by such funding agreement, in full or in part as applicable, prior to the stated maturity date of such series of notes. Such redemptions shall be made in whole or from time to time in part in increments of \$1,000 or any other integral multiple of an authorized denomination specified in the applicable pricing supplement (provided that any remaining principal amount thereof shall be at least \$1,000 or other minimum authorized denomination applicable thereto), at the applicable redemption price (as defined below), together with unpaid interest, if any, accrued thereon to, but excluding, the date of redemption. The trust must give written notice to the holders of the particular series of notes to be redeemed not more than 60 nor less than 30 calendar days prior to the date of redemption. Redemption price, with respect to a series of notes, means an amount equal to the initial redemption percentage specified in the applicable pricing supplement (as adjusted by the annual redemption percentage reduction, as described in the pricing supplement, if applicable) multiplied by the unpaid principal amount thereof to be redeemed. The initial redemption percentage, if any, applicable to a series of notes shall decline at each anniversary of the initial redemption date by an amount equal to the applicable annual redemption percentage reduction, if any, until the redemption price is equal to 100% of the unpaid amount thereof to be redeemed. Notes that may be redeemed at a time when 20% or more of the original principal amount of such notes are outstanding will be designated in their title as "callable" in the relevant pricing supplement. For a discussion of the redemption of discount notes, see "Discount Notes."

If fewer than all of the notes are to be redeemed, DTC will select the notes to be redeemed not more than 60 calendar days prior to the redemption date by lot or, if the notes are not in book-entry form, the indenture trustee will do so, in its reasonable discretion, by lot or on a pro rata basis in accordance with its customary procedures. If any note is redeemed in part only, a new note in principal amount equal to the unredeemed principal portion will be issued.

If an optional repayment right is specified in the pricing supplement relating to a series of notes, such notes may be subject to repayment at the option of the holders of such series of notes on any repayment date specified in the applicable pricing supplement. Exercise of the repayment option under the notes by the holders will also require the applicable trust to exercise a corresponding repayment under the applicable funding agreement. On any such repayment date, unless otherwise specified in the applicable pricing supplement, the notes shall be repayable in whole or in part in increments of \$1,000 at the option of the holders thereof at a repayment price equal to 100% of the principal amount thereof to be repaid, together with interest thereon payable to the date of repayment. A holder of a series of notes exercising its repayment right must submit to the indenture trustee at its corporate trust office, or at such other place or places of which the relevant trust has notified such holder, the notes to be repaid together with the option to elect repayment form attached to the notes not more than 60 nor less than 30 calendar days prior to the date of repayment. Exercise of such repayment right by a holder shall be irrevocable. If a holder requests repayment in part only, a new note in principal amount equal to the principal portion of the notes not repaid will be issued.

Only DTC may exercise a repayment option in respect of notes issued in book-entry form. Accordingly, beneficial owners of notes that desire to exercise their repayment option, if any, with respect to all or any portion of such notes, must instruct the participant through which they own their interest to direct DTC to exercise the repayment option on their behalf by delivering the duly completed election form to the indenture trustee as aforesaid. In order to ensure that the election form is received by the indenture trustee on a particular day, the applicable beneficial owner must so instruct the participant through which it owns its interest before such participant's deadline for accepting instructions for that day. Participants may have different deadlines for accepting instructions from their customers. Accordingly, a beneficial owner should consult the participant through which it owns its interest in the notes for the participant's deadline for receiving payment instructions. In addition, at the time such instructions are given, each such beneficial owner will cause such participant to transfer such beneficial owner's interest in the notes issued in book-entry form, on DTC's records, to the indenture trustee.

No series of notes will be subject to, or entitled to the benefit of, any sinking fund unless otherwise specified in the applicable pricing supplement. A trust may issue amortizing notes that pay a level amount in respect of both interest and principal over the life of the notes, if specified in the applicable pricing supplement. See Amortizing Notes.

#### **Purchase of Notes by Us**

We may at any time purchase notes at any price or prices in the open market or otherwise. Notes so purchased by us will be surrendered to the indenture trustee for cancellation. Concurrently with the surrender to the indenture trustee of any note, the funding agreement related to such note will be similarly cancelled.

If applicable, such trust will comply with the requirements of Section 14(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act), and the rules promulgated thereunder, and any other securities laws or regulations in connection with any repurchase of the notes by us.

#### **Interest**

Each interest-bearing series of notes will bear interest from its date of issue at the rate per annum, in the case of notes that bear interest at fixed rates, or pursuant to the interest rate formula, in the case of notes that bear interest at floating rates, in each case as specified in the applicable pricing supplement, until the principal thereof is paid or made available for payment. The trust will make interest payments in respect of each series of notes in an amount equal to the interest accrued from and including the immedi-

ately preceding interest payment date in respect of which interest has been paid or from and including the date of issue, if no interest has been paid, to but excluding the applicable interest payment date or the maturity date, as the case may be (each, an interest period ).

Interest on each series of notes will be payable in arrears on each interest payment date, to the registered holder at the close of business on the regular interest record date (as defined below) (except that interest, if any, due at maturity will be paid to the person to whom the principal of the note is paid), and on the maturity date. The first payment of interest on any series of notes originally issued between a regular interest record date and the related interest payment date will be made on the interest payment date immediately following the next succeeding regular interest record date to the registered holder on the next succeeding regular interest record date. The regular interest record date shall be the day that is fifteen (15) calendar days preceding the applicable interest payment date, whether or not a business day.

**Fixed Rate Notes**

In the case of each series of notes that bear interest at fixed rates, the applicable pricing supplement will specify the fixed interest rate per annum applicable to each note and the frequency with which interest is payable. Interest on each series of notes that bears interest at fixed rates will be computed on the basis of a 360-day year of twelve 30-day months.

Unless otherwise specified in the applicable pricing supplement, the interest payment dates for fixed rate notes will be as follows:

**Interest Payment Frequency**

**Interest Payment Dates**

Monthly	Fifteenth day of each calendar month, beginning in the first calendar month following the month the note was issued.
Quarterly	Fifteenth day of every third calendar month, beginning in the third calendar month following the month the note was issued.
Semi-annual	Fifteenth day of every sixth calendar month, beginning in the sixth calendar month following the month the note was issued.
Annual	Fifteenth day of every twelfth calendar month, beginning in the twelfth calendar month following the month the note was issued.

If any interest payment date or the maturity date of a series of notes that bear interest at fixed rates falls on a day that is not a business day, the applicable trust will make the required payment of principal, premium, if any, and/or credited inclusion of interest is not expected to have a substantial effect on their U.S. federal tax liability, the comparable yield for the note, without proper evidence to the contrary, is presumed to be the AFR.

Second, we are required to construct a projected schedule of payments (the Schedule ). The Schedule is determined as of the issue date and generally remains in place throughout the term of the note. The Schedule includes each noncontingent payment and a projected payment for each contingent payment. The Schedule must produce the comparable yield determined as set forth above.

Third, under the usual rules applicable to OID and based on the comparable yield, each U.S. Holder will be required to accrue its pro rata share of OID on a constant yield basis and include such accrual in gross income.

Fourth, appropriate adjustments are made to the OID determined under the foregoing rules to account for any differences between actual contingent payments and the projected payments on the Schedule.

Differences between the actual contingent payments made to a U.S. Holder in such U.S. Holder's taxable year and the projected payments for such taxable year are generally aggregated and taken into account, in the case of a positive difference, as additional interest income, or, in the case of a negative difference, first as a reduction in OID for such year and thereafter, subject to certain limitations, as ordinary loss. We are required to provide to each holder of notes a copy of the Schedule. Our determination of the Schedule must be used by a U.S. Holder unless the Schedule is unreasonable and such U.S. Holder discloses to the IRS that it is using a different schedule. In general, any gain

realized by a U.S. Holder on the sale, exchange, retirement or other disposition of a note that is a contingent payment debt instrument prior to the time no contingent payments remain is treated as interest income. In general, any loss on such a note is treated as ordinary loss to the extent it does not exceed such U.S. Holder's prior interest inclusions on the note (net of negative adjustments). The above described treatment of contingent payment

S-45

---

debt instruments assumes that the instrument is properly treated as debt for U.S. federal tax purposes.

### ***Premiums***

If the amount paid by a U.S. Holder for a note exceeds the stated redemption price at maturity of the note, the U.S. Holder generally will be considered to have purchased the note at a premium equal in amount to such excess. In this event, the U.S. Holder may elect to amortize such premium, generally on a constant-yield basis, as an offset to interest income. In the case of a note that may be redeemed prior to maturity, the premium is calculated assuming the trust and the U.S. Holder will exercise or not exercise redemption rights in a manner that maximizes the U.S. Holder's yield. It is unclear how premium is calculated when the redemption date or the amount of any redemption premium is uncertain. The election to amortize bond premium, once made, will apply to all debt obligations held or subsequently acquired by the electing U.S. Holder on or after the first day of the first taxable year to which the election applies, and may not be revoked without the consent of the IRS.

### ***Short-Term Notes***

Notes that have a fixed maturity of one year or less ( Short-Term Notes ) will be treated as issued with OID. In general, an individual or other U.S. Holder that uses the cash method of accounting is not required to accrue such OID unless the U.S. Holder elects to do so. If such an election is not made, any gain recognized by such U.S. Holder on the sale, exchange, retirement or other disposition of Short-Term Notes will be ordinary income to the extent of the OID accrued on a straight-line basis, or upon election under the constant yield method (based on daily compounding), through the date of sale, exchange, retirement or other disposition, and a portion of the deduction otherwise allowable to such U.S. Holder for interest on borrowings allocable to Short-Term Notes will be deferred until a corresponding amount of income is realized. U.S. Holders who report income for United States federal income tax purposes under the accrual method of accounting and certain other holders are required to accrue OID related to a Short-Term Note as ordinary income on a straight-line basis unless an election is made to accrue the OID under a constant yield method (based on daily compounding).

### ***Sale, Exchange, Retirement or Other Disposition of Notes***

In general, a U.S. Holder of a note will have a tax basis in the note equal to the cost of the note to the U.S. Holder, increased by any amount includible in income by the U.S. Holder as OID and reduced by any amortized premium and any payments other than payments of qualified stated interest. Upon a sale, exchange, retirement or other disposition of a note, a U.S. Holder will generally recognize gain or loss equal to the difference between the amount realized on the sale, exchange, retirement or other disposition (less any amount realized that is attributable to accrued but unpaid qualified stated interest, which will constitute ordinary income if not previously included in income) and the U.S. Holder's tax basis in such note. Subject to the rules described below under Foreign Currency Notes, such gain or loss will be long-term capital gain or loss if the U.S. Holder held the note for more than one year at the time of disposition. A U.S. Holder that is an individual is entitled to preferential treatment for net long-term capital gains. The ability of a U.S. Holder to offset capital losses against ordinary income is limited.

### ***Foreign Currency Notes***

The following discussion generally describes special rules that apply, in addition to the rules described above, to notes that are denominated in, or provide for payments determined by reference to, a currency or currency unit other than the U.S. dollar ( Foreign Currency Notes ). The amount of qualified stated interest paid with respect to a Foreign Currency Note that is includible in income by a U.S. Holder that uses the cash method of accounting for United States federal income tax purposes is the U.S. dollar value of the amount paid, as determined on the date of actual or constructive receipt by such U.S. Holder, using the spot rate of exchange on such date. In the case of qualified stated interest paid to a U.S. Holder that uses the accrual method of accounting, and in the case of OID (other than OID from a Short-Term Note that is not required to be accrued) for every U.S. Holder, such U.S. Holder is required to include the U.S. dollar value of the amount of such interest

income or OID that accrued during the accrual period. The U.S. dollar value of such accrued interest income or OID is generally determined by translating such income at the average rate of exchange for the accrual period or, at the U.S. Holder's election, at the spot rate of exchange on the last day of the accrual period. The U.S. Holder will recognize, as ordinary income or loss, foreign currency exchange gain or loss with respect to such accrued interest income or OID on the date the interest or OID is actually or constructively received, reflecting fluctuations in currency exchange rates between the exchange rate used to determine the accrued interest income or OID for the relevant accrual period and the exchange rate on the date such interest or OID is actually or constructively received.

The amount realized with respect to a sale, exchange, retirement or other disposition of a Foreign Currency Note generally will be the U.S. dollar value of the payment received, determined on the date of disposition of such note (using the spot rate on such date). Gain or loss that is recognized will be ordinary income or loss to the extent it is attributable to fluctuations in currency rates between the date of purchase and the date of sale, exchange, retirement or other disposition. Such foreign currency gain or loss will be recognized only to the extent of the total gain or loss realized by the U.S. Holder on the sale, exchange, retirement or other disposition of the Foreign Currency Note. Any gain or loss realized by a U.S. Holder in excess of such foreign currency gain or loss generally will be capital gain or loss.

#### **Non-U.S. Holders**

Subject to the discussion below concerning backup withholding, the following is a discussion of United States federal income tax considerations generally applicable to Non-U.S. Holders:

(a) payments of principal and interest (including OID) with respect to a note held by or for a Non-U.S. Holder will not be subject to withholding of United States federal income tax, provided that, in the case of interest, (i) such interest is not received by a bank on an extension of credit made pursuant to a loan agreement entered in the ordinary course of its trade or business, (ii) such Non-U.S. Holder does not own, actually or constructively, 10% or more of the total combined voting power of all of our classes of stock entitled to vote, (iii) such Non-U.S. Holder is not a controlled foreign corporation, within the meaning of section 957(a) of the Code, that is related, directly or indirectly, to us through stock ownership, (iv) such interest is not contingent interest described in section 871(h)(4)(A) of the Code and (v) the statement requirement set forth in section 871(h) or section 881(c) of the Code (described below) has been fulfilled with respect to such Non-U.S. Holder; and

(b) a Non-U.S. Holder will generally not be subject to United States federal income tax on gain realized on the sale, exchange, retirement or other disposition of a note, unless (i) such Non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of such sale, exchange, retirement or other disposition and certain other conditions are met or (ii) such gain is effectively connected with the conduct, by such Non-U.S. Holder, of a trade or business in the United States.

Sections 871(h) and 881(c) of the Code require that, in order to obtain the exemption from withholding of United States federal income tax described in paragraph (a) above, either the Non-U.S. Holder or a securities clearing organization, bank or other financial institution that holds customers' securities in the ordinary course of its trade or business (a Financial Institution) and that is holding the note on behalf of such Non-U.S. Holder must file a statement with the withholding agent to the effect that the Non-U.S. Holder is not a United States person. Such requirement will be fulfilled if the Non-U.S. Holder certifies on IRS Form W-8BEN (or successor form), under penalties of perjury, that it is not a United States person and provides its name and address, or any Financial Institution holding the note on behalf of the Non-U.S. Holder files a statement with the withholding agent to the effect that it has received such a statement from the Non-U.S. Holder (and

furnishes the withholding agent with a copy thereof). In addition, in the case of notes held by a foreign intermediary (other than a qualified intermediary ) or a foreign partnership (other than a withholding foreign partnership ), the foreign intermediary or partnership, as the case may be, generally must provide a properly executed IRS Form W-8IMY (or successor form) and attach thereto an appropriate certification by each foreign beneficial owner or United States payee.

If a Non-U.S. Holder is engaged in a trade or business in the United States, and if amounts treated as interest for United States federal income tax purposes on a note or gain realized on the sale, exchange, retirement or other disposition of a note is effectively connected with the conduct of such trade or business, the Non-U.S. Holder, although exempt from the withholding of federal income tax described in paragraph (a) above, will, unless otherwise provided by an applicable tax treaty, generally be subject to regular United States federal income tax on such effectively connected income in the same manner as if it were a U.S. Holder. In lieu of the certificate described in the preceding paragraph, such Non-U.S. Holder will be required to provide a properly executed IRS Form W-8ECI (or successor form) to the withholding agent in order to claim an exemption from withholding tax. In addition, if such Non-U.S. Holder is a foreign corporation, it may be subject to a branch profits tax equal to 30% (or such lower rate provided by an applicable treaty) of its effectively connected earnings and profits for the taxable year, subject to certain adjustments.

If a Non-U.S. Holder is not eligible for relief under one of the exceptions described above, it may nonetheless qualify for an exemption from, or reduced rate of, United States withholding tax under an income tax treaty. In general, this exemption or reduced rate of tax applies only if the Non-U.S. Holder provides a properly completed IRS Form W-8BEN claiming benefits under an applicable treaty.

#### **Backup Withholding and Information Reporting**

Backup withholding and information reporting requirements generally apply to interest (including OID) and principal payments made to, and r interest or other amounts on the next succeeding business day, and no additional interest will accrue in respect of the payment made on that next succeeding business day.

Interest rates that each trust offers on its fixed rate notes may differ from the rates offered by other trusts depending upon, among other factors, the aggregate principal amount of notes purchased in any single transaction. Notes with different variable terms other than interest rates may also be offered by other trusts concurrently to different investors. Other trusts may change interest rates or formulas and other terms of notes from time to time, but no change of terms will affect any note any other trust has previously issued or as to which any other trust has accepted an offer to purchase.

#### **Floating Rate Notes**

Interest on each series of notes that bears interest at floating rates will be determined by reference to the applicable Interest Rate Basis or

Interest Rate Bases, which may, as described below, include:

the CD Rate;

the CMT Rate;

the Commercial Paper Rate;

the Constant Maturity Swap Rate;

the Eleventh District Cost of Funds Rate;

the Federal Funds Open Rate;

the Federal Funds Rate;

LIBOR;

EURIBOR;

the Prime Rate; or

the Treasury Rate.

The applicable pricing supplement will specify certain terms of the particular series of notes that bears interest at floating rates, including:

whether the note that bears interest at floating rates is:

a Regular Floating Rate Note;

a Floating Rate/ Fixed Rate Note; or

an Inverse Floating Rate Note;

the Fixed Rate Commencement Date, if applicable;

Fixed Interest Rate, if applicable;

Interest Rate Basis or Interest Rate Bases;

Initial Interest Rate, if any;

Interest Reset Dates;

Interest Payment Dates;

Index Maturity;

Maximum Interest Rate and/or Minimum Interest Rate, if any;

Spread and/or Spread Multiplier; or

if one or more of the applicable Interest Rate Bases is LIBOR, the LIBOR Currency and LIBOR Page.

The rate derived from the applicable Interest Rate Basis will be determined in accordance with the related provisions below. The interest rate in effect on each day will be based on:

if that day is an Interest Reset Date, the rate determined as of the Interest Determination Date (as defined below) immediately preceding that Interest Reset Date; or

if that day is not an Interest Reset Date, the rate determined as of the Interest Determination Date immediately preceding the most recent Interest Reset Date.

The Spread is the number of basis points (one one-hundredth of a percentage point) specified in the applicable pricing supplement to be added to or subtracted from the related Interest Rate Basis or Interest Rate Bases applicable to a series of notes that bears interest at floating rates. The Spread Multiplier is the percentage specified in the applicable pricing supplement of the related Interest Rate Basis or Interest Rate Bases applicable to a series of notes that bears interest at floating rates by which the Interest Rate Basis or Interest Rate Bases will be multiplied to determine the applicable interest rate. The Index Maturity is the period to maturity of the instrument or obligation with respect to which the related Interest Rate Basis or Interest Rate Bases will be calculated.

Interest rates that each trust of the proceeds of sales by, certain non-corporate U.S. Holders. A U.S. Holder not otherwise exempt from backup withholding generally can avoid backup withholding by providing a properly-executed IRS Form W-9 (or successor form). In the case of a Non-U.S. Holder, backup withholding and information reporting will not apply to payments on, or from the sale, exchange, retirement or other disposition of, a note if a statement referred to in clause (a)(v) of the first paragraph in Non-U.S. Holders above has been received and the payor does not have actual knowledge that the beneficial owner is a United States person. Withholding agents must nevertheless report to the IRS and to each Non-U.S. Holder the amount of interest (including OID) paid with respect to the notes held by each Non-U.S. Holder and the rate of withholding (if any) applicable to each Non-U.S. Holder. Non-U.S. Holders should consult their own tax advisers regarding the application of information reporting and backup withholding in their particular situations, the availability of an exemption therefrom, and the procedure for obtaining such an exemption, if available. Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against the beneficial owner's United States federal income tax liability provided the required information is furnished to the IRS.

#### **European Union Directive on the Taxation of Savings Income**

On July 1, 2005, a directive adopted by the European Council of Economics and Finance Ministers regarding the taxation of savings income took effect. Should any deduction or withholding on account of tax be required to be made, or be made, in accordance with the terms of this section, no additional amounts shall be paid or payable by any trust or by us unless specified in the applicable pricing supplement or funding agreement that additional amounts will be paid. See Description of the Notes Final European Union Withholding Tax System.

#### **Opinion Regarding Tax Matters**

Prior to the issuance of any notes, we will file with a Current Report on Form 8-K an unqualified opinion of legal counsel regarding the tax treatment of such notes.

### PLAN OF DISTRIBUTION

This prospectus supplement relates to the offering of notes by separate trusts from time to time for sale to or through Merrill Lynch, Pierce, Fenner & Smith Incorporated, ABN AMRO Incorporated, Banc of America Securities LLC, Barclays Capital Inc., Bear, Stearns & Co. Inc., BNP Paribas Securities Corp., Citigroup Global Markets Inc., Credit Suisse First Boston LLC, Deutsche Bank Securities Inc., Goldman, Sachs & Co., Lehman Brothers Inc., Morgan Stanley & Co. Incorporated, UBS Securities LLC and Wachovia Capital Markets, LLC (the Agents) pursuant to a distribution agreement (the Distribution Agreement) among the applicable trust, us, PFG and the Agents. From time to time, we may also appoint one or more other broker-dealers to act as an Agent under the secured medium-term notes program pursuant to the terms of the Distribution Agreement and such Agent will be specified in the applicable pricing supplement. The Agents, individually or in a syndicate, may purchase notes, as principal, from separate trusts from time to time for resale to investors and other purchasers at varying prices relating to prevailing market prices at the time of resale as determined by the applicable Agent or, if so specified in the applicable pricing supplement, for resale at a fixed offering price. However, the applicable trust may agree with an Agent for that Agent to utilize its reasonable efforts on an agency basis on its behalf to solicit offers to purchase notes at 100% of the principal amount thereof, unless otherwise specified in the applicable pricing supplement. In all such cases, a single trust may only issue notes of a single series on the initial date of sale of such notes. No additional notes may thereafter be issued by that trust. Unless otherwise specified in the applicable pricing supplement, the applicable trust will pay a commission to an Agent, ranging from .150% to .875% of the principal amount of each note, depending upon its stated maturity, sold through that Agent as its agent. The notes may be sold to United States and foreign institutional and other investors.

Subject to the terms of the Distribution Agreement, concurrently with any offering of notes as described in this prospectus supplement by the applicable trust, a separate trust may issue other notes under our Principal® Life CoreNotes® program or our secured medium-term notes retail program primarily to retail investors or the accompanying prospectus or this prospectus supplement.

Unless otherwise specified in the applicable pricing supplement, any note sold to an Agent as principal will be purchased by that Agent at a price equal to 100% of the principal amount thereof less a percentage of the principal amount equal to the commission applicable to an agency sale of a note of identical maturity. An Agent may sell notes it has purchased from the applicable trust as principal to certain dealers less a concession equal to all or any portion of the discount received in connection with that purchase. An Agent may allow, and dealers may reallow, a discount to certain other dealers. After the initial offering of notes (in the case of notes to be sold on a fixed offering price basis), the concession and the reallowance may be changed.

The applicable trust reserves the right to withdraw, cancel or modify the offer made hereby without notice and may reject offers in whole or in part. Each Agent will have the right, in its discretion reasonably exercised, to reject in whole or in part any offer to purchase notes received by it on an agency basis.

Unless otherwise specified in the applicable pricing supplement, you will be required to pay the purchase price of your notes in immediately available funds in the specified currency in The City of New York on the date of settlement.

Upon issuance, the notes will not have an established trading market. The notes may not be listed on any securities exchange. The Agents may from time to time purchase and sell notes in the secondary market, but the Agents are not obligated to do so. There can be no assurance that a secondary market for the notes will develop or that there will be liquidity in the secondary market if one develops. From time to time, the Agents may make a market in the notes, but the Agents are not obligated to do so and may discontinue any market-making activity at any time.

In connection with an offering of notes purchased by one or more Agents as principal on a fixed offering price basis, the applicable Agents will be permitted to engage in certain transactions that stabilize the price of notes. These transactions may consist of bids or purchases for the purpose

of pegging, fixing or maintaining the price of notes. If those Agents create a short position in notes (i.e., if they sell notes in an amount exceeding the amount referred to in the applicable pricing supplement), they may reduce that short position by purchasing notes in the open market. In general, purchases of notes for the purpose of stabilization or to reduce a short position could cause the price of notes to be higher than it might be in the absence of these type of purchases.

None of us, PFG, the applicable trust or any Agent makes any representation or prediction as to the direction or magnitude of any effect that the transactions described in the immediately preceding paragraph may have on the price of notes. In addition, none of us, PFG, the applicable trust or any Agent makes any representation that the Agents will engage in any such transactions or that such transactions, once commenced, will not be discontinued without notice.

The Agents are underwriters within the meaning of the Securities Act of 1933, as amended, with respect to the notes being distributed, the funding agreement purchased by the trust and the guarantee issued to the trust. We and PFG have agreed, jointly and severally, to indemnify the Agents against certain liabilities, including liabilities under the Securities Act of 1933, as amended, or to contribute to payments the Agents may be required to make in respect thereof.

With respect to any series of notes as to which affiliates of the indenture trustee will serve as an Agent, the relevant trust will appoint an eligible and unaffiliated entity to serve as indenture trustee with respect to such series of notes, instead of the indenture trustee.

We are a statutory issuer of the notes under the Securities Act of 1933, as amended. In addition, under the Securities Act of 1933, as amended, each trust is a statutory underwriter of the related funding agreement and guarantee.

In the ordinary course of business, the Agents and their affiliates have engaged, and may in the future engage, in investment and commercial banking transactions with us and certain of our affiliates, including PFG.

**\$4,000,000,000**

fers on its floating rate notes may differ from the rates offered by other trusts depending upon, among other factors, the aggregate principal amount of notes purchased in any single transaction. Notes with different variable terms other than interest rates may also be offered by other trusts concurrently to different investors. Other trusts may change interest rates or formulas and other terms of notes from time to time, but no change of terms will affect any note any other trust has previously issued or as to which any other trust has accepted an offer to purchase.

S-22

---

***Regular Floating Rate Notes***

Unless a series of notes that bears interest at floating rates is designated as a series of Floating Rate/ Fixed Rate Notes or a series of Inverse Floating Rate Notes, or as having an addendum attached or having other/additional provisions apply, in each case relating to a different interest rate formula, such series of notes that bears interest at floating rates will be a series of Regular Floating Rate Notes and will bear interest at the rate determined by reference to the applicable Interest Rate Basis or Interest Rate Bases:

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any.

Commencing on the first Interest Reset Date, as specified in the relevant pricing supplement, the rate at which interest on a series of Regular Floating Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate.

***Floating Rate/ Fixed Rate Notes***

If a series of notes that bears interest at floating rates is designated as a series of Floating Rate/ Fixed Rate Notes, such series of notes that bears interest at floating rates will bear interest at the rate determined by reference to the applicable Interest Rate Basis or Interest Rate Bases:

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any.

Commencing on the first Interest Reset Date, the rate at which interest on a series of Floating Rate/ Fixed Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that:

the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate, as specified in the relevant pricing supplement; and

the interest rate in effect commencing on the Fixed Rate Commencement Date will be the Fixed Interest Rate, if specified in the applicable pricing supplement, or, if not so specified, the interest rate in effect on the day immediately preceding the Fixed Rate Commencement Date.

***Inverse Floating Rate Notes***

If a series of notes that bears interest at floating rates is designated as a series of Inverse Floating Rate Notes, such series of notes that bears interest at floating rates will bear interest at the Fixed Interest Rate minus the rate determined by reference to the applicable Interest Rate Basis or Interest Rate Bases:

plus or minus the applicable Spread, if any; and/or

multiplied by the applicable Spread Multiplier, if any;

provided, however, that interest on a series of Inverse Floating Rate Notes will not be less than zero. Commencing on the first Interest Reset Date, the rate at which interest on a series of Inverse Floating Rate Notes is payable will be reset as of each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the date of issue to the first Interest Reset Date will be the Initial Interest Rate.

***Interest Reset Dates***

The applicable pricing supplement will specify the dates on which the rate of interest on a series of notes that bears interest at floating rates will be reset (each, an Interest Reset Date ), and the period between Interest Reset Dates will be the Interest Reset Period. Unless otherwise specified in the applicable pricing supplement, the Interest Reset Dates will be, in the case of a series of notes that bears interest at floating rates which reset:

*daily* each business day;

*weekly* the Wednesday of each week, with the exception of weekly

reset series of notes that bear interest at floating rates as to which the Treasury Rate is an applicable Interest Rate Basis, which will reset the Tuesday of each week;

*monthly* the fifteenth day of each calendar month, with the exception of monthly reset series of notes that bear interest at floating rates as to which the Eleventh District Cost of Funds Rate is an applicable Interest Rate Basis, which will reset on the first calendar day of the month;

*quarterly* the fifteenth day of March, June, September and December of each year;

*semi-annually* the fifteenth day of the two months of each year specified in the applicable pricing supplement; and

*annually* the fifteenth day of the month of each year specified in the applicable pricing supplement; provided, however, that, with respect to any series of Floating Rate/ Fixed Rate Notes, the rate of interest thereon will not reset after the particular Fixed Rate Commencement Date.

If any Interest Reset Date for any series of notes that bears interest at floating rates would otherwise be a day that is not a business day, the particular Interest Reset Date will be postponed to the next succeeding business day, except that in the case of a series of notes that bears interest at floating rates as to which LIBOR is an applicable Interest Rate Basis and that business day falls in the next succeeding calendar month, the particular Interest Reset Date will be the immediately preceding business day.

***Interest Determination Dates***

The interest rate applicable to a series of notes that bears interest at floating rates for an Interest Reset Period commencing on the related Interest Reset Date will be determined by reference to the applicable Interest Rate Basis as of the particular Interest Determination Date, which will be:

*with respect to the Federal Funds Open Rate* the related Interest Reset Date;

*with respect to the Commercial Paper Rate, the Federal Funds Rate and the Prime Rate* the business day preceding the related Interest Reset Date;

*with respect to the CD Rate and the CMT Rate* the second business day preceding the related Interest Reset Date;

*with respect to the Constant Maturity Swap Rate* the second U.S. Government Securities business day (as defined under *Constant Maturity Swap Rate* below) preceding the related Interest Reset Date; provided, however, that if, after attempting to determine the Constant Maturity Swap Rate (as described under *Constant Maturity Swap Rate* below), such rate is not determinable for a particular Interest Determination Date (the *original interest determination date*), then such Interest Determination Date shall be the first U.S. Government Securities business day preceding the original interest determination date for which the Constant Maturity Swap Rate can be determined as described under *Constant Maturity Swap Rate* below;

*with respect to the Eleventh District Cost of Funds Rate* the last working day of the month preceding the related Interest Reset Date on which the Federal Home Loan Bank of San Francisco publishes the Eleventh District Index (as defined below);

*with respect to LIBOR and EURIBOR* the second London Banking Day preceding the related Interest Reset Date; and

*with respect to the Treasury Rate* the day of the week in which the related Interest Reset Date falls on which day Treasury Bills (as defined below) are normally auctioned (i.e., Treasury Bills are normally sold at auction on Monday of each week, unless that day is a legal holiday, in which case the auction is normally held on the following Tuesday, except that the auction may be held on the preceding Friday); provided, however, that if an auction is held on the Friday of the week preceding the related Interest Reset Date, the Interest Determination Date will be the preceding Friday.

The Interest Determination Date pertaining to a series of notes that bears interest at floating rates the interest rate of which is determined with reference to two or more Interest Rate Bases will be the latest business day which is at least two business days before the related Interest Reset Date for the applicable note that bears interest at floating rates on which each Interest Reset Basis is determinable.

***Calculation Dates***

The indenture trustee will be the Calculation Agent, unless otherwise specified in the applicable pricing supplement. The interest rate applicable to each Interest Reset Period will be determined by the Calculation Agent on or prior to the Calculation Date (as defined below), except with respect to LIBOR, EURIBOR and the Eleventh District Cost of Funds Rate, which will be determined on the particular Interest Determination Date. Upon request of the registered holder of a series of notes that bears interest at floating rates, the Calculation Agent will disclose the interest rate then in effect and, if determined, the interest rate that will become effective as a result of a determination made for the next succeeding Interest Reset Date with respect to the particular series of notes that bears interest at floating rates. The Calculation Date, if applicable, pertaining to any Interest Determination Date will be the earlier of: the tenth calendar day after the particular Interest Determination Date or, if such day is not a business day, the next succeeding business day; or

the business day immediately preceding the applicable Interest Payment Date or the maturity date, as the case may be.

The information in this prospectus supplement is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus supplement is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

**Subject to Completion, dated November 16, 2005**

**PROSPECTUS SUPPLEMENT**

**(To prospectus dated \_\_\_\_\_, 2005)**

**\$4,000,000,000**

**Principal® Life CoreNotes®**

**Due Between Nine Months and Thirty Years From the Date of Issue**

**Issued Through**

**Principal Life Income Fundings Trusts**

**Secured by Funding Agreements Issued by**

**Principal Life Insurance Company and**

**Guarantees Issued by Principal Financial Group, Inc.**

**Principal Life:** We are Principal Life Insurance Company, an Iowa insurance company, the sponsor of the program and the depositor and issuer of the funding agreements described below. This prospectus supplement relates to the offering, from time to time, through newly established separate and distinct trusts described below, of one or more series of Principal® Life CoreNotes®, which we refer to in this prospectus supplement as notes, in an aggregate principal amount of up to \$4,000,000,000, less any principal amount of notes previously issued under this program pursuant to this prospectus supplement, our secured medium-term notes program issued primarily to institutional investors pursuant to a separate prospectus supplement dated the date hereof, our secured medium-term notes retail program issued primarily to retail investors pursuant to a separate prospectus supplement dated the date hereof or otherwise under the accompanying prospectus.

The applicable trust will use the net proceeds from the offering of its series of notes to purchase a funding agreement sold to, and deposited into, the applicable trust, by us. Our payment obligations under the funding agreement relating to the applicable series of notes will be fully and unconditionally guaranteed by a guarantee issued by Principal Financial Group, Inc., a Delaware corporation and our indirect parent ( PFG ).

Each trust exists for the exclusive purpose of issuing and selling one series of notes to investors, using the net proceeds from the sale of that series of notes to acquire a funding agreement from us, collaterally assigning and granting a security interest in the applicable funding agreement, and collaterally assigning and granting a security interest in the applicable guarantee, in favor of the indenture trustee, and engaging in other activities necessary or incidental thereto.

You should read this prospectus supplement, the accompanying prospectus and the applicable pricing supplement carefully before you invest in the notes.

**The notes:** The specific terms and conditions of each series of notes will be as set forth in a separate pricing supplement. The notes of each series will:

be issued by a separate and distinct trust;

provide for payment in U.S. dollars;

rank as secured indebtedness of the trust secured primarily by a funding agreement issued by us;

be issued in only one class;

unless otherwise specified in the applicable pricing supplement, not be listed on any securities exchange;

unless otherwise specified in the applicable pricing supplement, have a minimum denomination of \$1,000 and integral multiples in excess thereof;

be in book-entry form;

represent non-recourse obligations of the trust and be paid only from the assets of that trust;

be the trust's obligations only and will not be obligations of, or guaranteed by, us, PFG or any of our or its affiliates;

bear interest at fixed or floating rates, or bear no interest at all;

pay interest on each series of notes on a monthly, quarterly, semi-annual or annual basis (unless otherwise specified in the applicable pricing supplement);

have a stated maturity of between 9 months and 30 years from the date of issue;

have redemption and/or repayment provisions, if applicable, whether mandatory or at the option of the trust or the holders of notes; and

be sold in the United States to retail investors.

Holders of a series of notes may look only to the trust's rights and title in the funding agreement issued to, and deposited into, the applicable trust by us, the related guarantee issued by PFG and any proceeds of that funding agreement and guarantee held in the trust and not to any other assets or collateral held by any other trust, us or PFG.

**Investing in the notes involves risks that are described in the Risk Factors section beginning on page 2 of the accompanying prospectus.**

**None of the Securities and Exchange Commission (the SEC), any state securities commission or any state insurance commission has approved or disapproved of these securities or determined if this prospectus supplement, the accompanying prospectus or any pricing supplement is truthful or complete. Any representation to the contrary is a criminal offense.**

The trusts may sell notes to the purchasing agent referred to below as principal for resale at a fixed offering price specified in the applicable pricing supplement or at varying prices. The trusts may also explicitly agree with the purchasing agent that it will use its reasonable efforts as agent on the trust's behalf to solicit offers to purchase notes from such trusts.

<i>Maximum and Minimum Interest Rates</i>	
A series of notes that bears interest at floating rates may also have either or both of the following if specified in the applicable pricing supplement:	
a maximum numerical limitation, or ceiling, that may accrue during any Interest Reset Period (a Maximum Interest Rate ); and	
a minimum numerical limitation, or floor, that may accrue during any Interest Reset Period (a Minimum Interest Rate ).	
In addition to any Maximum Interest Rate that may apply to a series of notes that bears interest at floating rates, the interest rate on a series of notes that bears interest at floating rates will in no event be higher than the maximum rate permitted by New York law, as the same may be modified by United States law of general application.

<u>DESCRIPTION OF THE NOTES</u>	

< to such day by 360, in the case of a series of notes that bears interest at floating rates as to which the CD Rate, the Commercial Paper Rate, the Eleventh District Cost of Funds Rate, the Federal Funds Open Rate, the Federal Funds Rate, LIBOR, EURIBOR or the Prime Rate is an applicable Interest Rate Basis, or by the actual number of days in the year, in the case of a series of notes that bears interest at floating rates as to which the CMT Rate or the Treasury Rate is an applicable Interest Rate Basis. In the case of a series of notes that bears interest at floating rates as to which the Constant Maturity Swap Rate is the Interest Rate Basis, the interest factor for each day will be computed by dividing the number of days in the interest period by 360 (the number of days to be calculated on the basis of a year of 360 days with twelve 30-day months (unless (i) the last day of the interest period is the 31st day of a month but the first day of the interest period is a day other than the 30th or 31st day of a month, in which case the month that includes that last day shall not be considered to be shortened to a 30-day month, or (ii) the last day of the interest period is the last day of the month of February, in which case the month of February shall not be considered to be lengthened to a 30-day month)). The interest factor for a series of notes that bears interest at floating rates as to which the interest rate is calculated with reference to two or more Interest Rate Bases will be calculated in each period in the same manner as if only the applicable Interest Rate Basis specified in the applicable pricing supplement applied.

The Calculation Agent shall determine the rate derived from each Interest Rate Basis in accordance with the following provisions.

***CD Rate***

CD Rate means:

- (1) the rate on the particular Interest Determination Date for negotiable United States dollar certificates of deposit having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) (as defined

below) under the caption CDs (secondary market); or

(2) if the rate referred to in clause (1) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date for negotiable United States dollar certificates of deposit of the particular Index Maturity as published in H.15 Daily Update (as defined below), or other recognized electronic source used for the purpose of displaying the applicable rate, under the caption CDs (secondary market); or

(3) if the rate referred to in clause (2) is not so published by 3:00 P.M., New York City time, on the related Calculation Date, the rate on the particular Interest Determination Date calculated by the Calculation Agent as the arithmetic mean of the secondary market offered rates as of 10:00 A.M., New York City time, on that Interest Determination Date, of three leading non-bank dealers in negotiable United States dollar certificates of deposit in The City of New York (which may include the Agents or their affiliates) selected by the Calculation Agent for negotiable United States dollar certificates of deposit of major United States money market banks for negotiable United States certificates of deposit with a remaining maturity closest to the particular Index Maturity in an amount that is representative for a single transaction in that market at that time; or

(4) if the dealers so selected by the Calculation Agent are not quoting as mentioned in clause (3), the CD Rate in effect on the particular Interest Determination Date.

H.15(519) means the weekly statistical release designated as H.15(519), or any successor publication, published by the Board of Governors of the Federal Reserve System.

H.15 Daily Update means the daily update of H.15(519), available through the world-wide-web site of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/releases/H15/update>, or any successor site or publication.

**CMT Rate**

CMT Rate means:

(1) if CMT Moneyline Telerate Page 7051 is specified in the applicable pricing supplement:

(a) the percentage equal to the yield for United States Treasury securities at constant maturity having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) under the caption Treasury Constant Maturities, as the yield is displayed on Moneyline Telerate (or any successor service) on page 7051 (or any other page as may replace the specified page on that service) ( Moneyline Telerate Page 7051 ), for the particular Interest Determination Date; or

(b) if the rate referred to in clause (a) does not so appear on Moneyline Telerate Page 7051, the percentage equal to the yield for United States Treasury securities at constant maturity having the particular Index Maturity and for the particular Interest Determination Date as published in H.15(519) under the caption Treasury Constant Maturities; or

(c) if the rate referred to in clause (b) does not so appear in H.15(519), the rate on the particular Interest Determination Date for the period of the particular Index Maturity as may then be published by either the Federal Reserve System Board of Governors or the United States Department of the Treasury that the Calculation Agent determines to be comparable to the rate which would otherwise have been published in H.15(519); or

(d) if the rate referred to in clause (c) is not so published, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices at approximately 3:30 P.M., New York City time, on that Interest Determination Date of three leading primary United States government securities dealers in The City of New York (which may include the Agents or their affiliates) (each, a Reference Dealer ), selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the highest quotation, or, in the event of equality, one of the highest, and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity equal to the particular Index Maturity, a remaining term to maturity no more than one year shorter than that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at that time; or

(e) if fewer than five but more than two of the prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations shall be eliminated; or

(f) if fewer than three prices referred to in clause (d) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices as of approximately 3:30 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent from five Reference Dealers selected by the Calculation Agent and eliminating the highest quotation or, in the event of equality, one of the highest and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity greater than the particular Index Maturity, a remaining term to maturity closest to that Index Maturity and in a principal amount that is representative for a single transaction in the securities in that market at that time; or

(g) if fewer than five but more than two prices referred to in clause (f) are provided as requested, the rate on the particular Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations will be eliminated; or

(h) if fewer than three prices referred to in clause (f) are provided as requested, the CMT Rate in effect on the particular Interest Determination Date; or

(2) if CMT Moneyline Telerate Page 7052 is specified in the applicable pricing supplement:

(a) the percentage equal to the one-week or one-month, as specified in the applicable pricing supplement average yield for United States Treasury securities at constant maturity having the Index Maturity specified in the applicable pricing supplement as
